Ida: You better think what you are saying to me. Who can stand this sort of situation.

Elena: You have to do it, there is just no choice. You've already been in a complicated situation and showed you could do it.

Ida: . . . I have been ill: I had the flu and a terrible cough. I really did not get over it yet.

Elena: Did they examine your heart?

Ida: I've been examined by a very good doctor, one of the best cardiologists in Moscow (Neiman arranged this for me), and he finally found out what was wrong with me. He gave me some medicine, told me that I would have to take it all my life and this medicine has been keeping me going. I don't know what I would have done without it. These two crazy weeks, when I kept moving from town to town and sometimes even had to spend the night at the railway station, the medicine saved me. The most important thing is that finally it became clear that the other doctors just did not know what they were talking about and therefore prescribed the wrong medication. . . .

Elena: I'm speaking from my neighbor's flat, the Levins from Minsk. My phone is out of order.

Ida: I don't know them. Some 260 thousand people left. How could I know all of them?

Levin: Ida, I stopped at your apartment exactly 10 years ago.

Ida: Thank you for everything, but I really don't remember. So many people passed through my apartment.

Levin: Let's say there are some ideas and let's assume that Lena (Elena) can't do anything. Who, in your opinion, should be dealing with this?

Ida: Anyone who isn't important could not be of help in this matter. Don't you understand on what level things are done? I can't decide who is the right person to deal with this, how could I?

Levin: Maybe you have some ideas?

Ida: I know about the way things are done here, but I'm not so sure about the way they are done at your end.

Elena: What, in your opinion, should be done?

Ida: As long as I don't know what is going on at your end, I can't give you my decision. You yourselves must find the solution.

Levin: There are a lot of possibilities but not so many ideas.

Ida: As I see it, there are no buyers. The goods are there, the publicity is there too, but there are no buyers. That's obvious.

Levin: Let's say that this is a temporary crisis. . .

Ida: During the last 11 years I've been moving from one crisis to another. The effect was great, but the general cause profited from it more than I did. I've already told Lena that you should live your own lives, this would be better. You don't decide anything and all these troubles only wear you out and it all leads to nothing. So, leave everything as it is.

Levin: You'll do what you think is right and we'll do what we think is right. And we'll do it together.

Ida: Just leave it alone, it's a lost cause. . . . My regards to everyone.●

ENTERPRISE ZONE PLANS ANALYZED

HON. HENRY J. NOWAK

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Tuesday, September 21, 1982

● Mr. NOWAK. Mr. Speaker, the concept of establishing enterprise zones in targeted high unemployment areas is one that has provoked a great deal of discussion.

As part of this process, the Congressional Black Caucus last week conducted a workshop, chaired by our colleague from Illinois, Representative GUS SAVAGE. The caucus is to be commended for his leadership in focusing attention and generating debate on this important idea.

While my schedule unfortunately prevented my participation in the caucus' workshop, I have submitted the following statement, for the record, of its proceedings and would like to insert it in the RECORD at this time.

FREE ENTERPRISE ZONE WORKSHOP

I appreciate the opportunity to offer my views on providing economic incentives to the distressed areas of this nation, and would like to thank the Congressional Black Caucus for inviting me to join this symposium.

The current economy, marked by restrictive interest rates, increased business failures, declining productivity and record level unemployment, makes the outlook for economic recovery extremely pessimistic. In the midst of this general economic downturn the Nation's urban centers for some time have been experiencing an increasing movement toward economic deterioration.

In response to this problem, Congress has been debating the viability of the so-called "enterprise zone" concept, while the Administration has adopted an "enterprise zone" proposal as the basis of its urban policy objective.

While it is crucial for the Administration to recognize the need to provide economic

stimulation for the country's distressed areas, especially in view of the recent reduction in Federal aid to state and local governments, the Administration's "enterprise zone" plan, with its provisions for tax incentives and regulatory relief, is far too narrow in focus to effectively remedy our urban ills.

The basic shortcoming of the Administration's proposal, in its present form, is a failure to provide a well-balanced strategy for local economic development. In addition, this measure does not realistically address the need for a workable job creation initiative and the important role that small business must play in the implementation of a viable urban revitalization scheme.

The need to effectuate a solution to the current jobless rate is painfully obvious with an unemployment rate approximating nearly ten percent. Further, since small business has traditionally been credited with creating the vast majority of new jobs, it stands to reason that any program designed to encourage business development and curtail unemployment must focus on the needs of the small business community.

As Chairman of the Small Business Subcommittee on Tax, Access to Equity Capital and Business Opportunities, I have been actively involved in the debate over economic incentives to distressed areas for the past several years. I have introduced several bills, held numerous hearings and released a report on this subject entitled "Job Creation and the Revitalization of Small Business" (Report No. 97-434).

My proposals are designed to broaden the scope of the plan to revitalize the Nation's distressed areas, concentrating primarily on the need to create and retain jobs utilizing the private sector, especially small business, to implement this program. Therefore, in conjunction with tax and regulatory relief, a viable urban revitalization plan must include provisions to address the capital formation needs of the business community; maintain and improve the local infrastructure base; continue to utilize past-proven economic development tools; and train individuals to meet the explicit employment needs of the business community.

I would like to point out that in my capacity as Chairman of the Small Business Subcommittee, I have long been a proponent of using Federal tax policy as a means to enhance the capital formation position of small business and was instrumental in inclusion of several small business tax relief provisions in the 1981 tax bill. However, in the broad context of providing economic stimulation to the Nation's distressed areas, I do not view tax incentives as a panacea. A business will derive no benefit from credits and deductions if it is experiencing little or no profitability. For example, a start-up business, which as a general rule is hard pressed to realize even a modest profit in its early stages of development, would be unable to take advantage of the tax incentives currently proposed and thus would be forced to rely on outside sources for seed and working capital.

Because high and volatile interest rates have rendered conventional financing unaffordable to most small business, any successful urban revitalization plan must provide alternative sources of financing such as viable loan and venture capital programs for small business.

My enterprise development plan incorporates various provisions to meet these capital formation needs including a strengthening and improving of the cost-effective Small Business Investment Company program of the Small Business Administration. In addition, my proposal provides for the maintenance of the successful components of existing sources of small business financing such as Title IX of the Economic Development Administration. For example, the "National Development Investment Act" (H.R. 6100), which was recently passed by both the House and the Senate and is awaiting conference agreement, is designed to insure the ability of EDA to stimulate private-sector investment in distressed areas. Among other things, this measure provides funding for loans and technical assistance to small firms in distressed areas. This is a prime example of the type of economic development program which would be continued in order to provide a source of capital for firms locating in declining urban areas.

A further source of business investment capital from an existing economic development program is the tax-exempt Industrial Development Bond program. Although there has been much criticism concerning the IDB program and the recent tax bill contains some restrictions, I believe that a responsibly monitored IDB program can and will be an effective economic development tool which directly responds to the critical economic problems of declining productivity, lack of capital investment, unemployment and the deterioration of our urban centers.

Another problem area which must be addressed in formulating a meaningful urban development policy is the rapidly deteriorating infrastructure base in many areas of the country. The failure to maintain and improve a proper infrastructure has created a crisis, especially in the older cities of the Northeast, which can no longer be ignored.

The dilapidated conditions of sewers, bridges and water facilities threaten not only the safety of the citizens but also the economic vitality of numerous communities. In order to encourage businessmen to locate and remain in any area, we must provide a healthy commercial environment which necessitates a sound infrastructure base.

Broadening the perspective on incentives to distressed areas could insure that the critical problem of a failing infrastructure is effectively remedied. For example, the "National Development Investment Act" also provides funds in distressed areas for the construction, repair, rehabilitation and improvement of public facilities.

Finally, and probably the most critical consideration in formulation of an urban revitalization plan, is the need to stress the role of human capital development in the economic development and job creation process. It is essential that we emphasize the importance of providing basic training opportunities for both skilled and unskilled workers.

The severe skilled labor shortage in this country has not only contributed to declining productivity but also may undermine our competitive position in world trade and may threaten our defense capabilities. To address the problem of the skilled labor shortage, specifically, the Congress should enact a specialized skills training tax credit which would be available to the vital industries presently facing an acute shortage of skilled workers. This type of credit would be especially beneficial to small business persons, who need skilled personnel to remain competitive, but who cannot afford the high cost of training such employees. As part of my enterprise development package, I introduced the "Job Creation Tax Act" (H.R. 3726) to provide tax credits to employers who employ both skilled and unskilled laborers in distressed areas.

Furthermore, pursuant to my belief that all Federal assistance programs are not inherently undesirable and that we should maintain those which have effectively accomplished their objectives, I previously recommended that the basis structure of Private Industry Councils (PIC's) of the CETA program be continued. PIC's were designed to increase the participation of the business community in employment and training activities, with the goal of expanding private sector employment for the economically disadvantaged.

It should be noted that the "Job Training Partnership Act" (H.R. 5320), which would replace the expiring CETA program, gives the PIC's an equal voice with the local governments in determining how Federal job training programs are to be implemented. In addition, the bill requires that a majority of the members in the PIC's be representatives of business and industry with one-half of these representatives from the small business community.

While this plan maintains provisions for the training of youths, displaced workers, skilled and unskilled workers, the unique feature is a substantial increase in the input of the business community in the design and implementation of all employment and training programs, to insure that individuals are equipped with skills actually in demand.

A recent Congressional initiative, the Urgent Supplemental Appropriations for the Department of Labor (H.J. Res. 562), demonstrates the Federal government's ability to respond to both the infrastructure and unemployment dilemmas. The measure provides temporary jobs for the unemployed, provided that the activities funded are utilized to maintain and restore public properties. The concept behind this resolution could provide impetus for developing job creation and infrastructure components of a distressed area revitalization plan.

In conclusion, in order to formulate a viable program to revitalize the Nation's distressed areas, I believe that it is necessary to implement a well-balanced mixture of various incentives. This comprehensive plan should include targeted tax relief, provisions for seed capital to spur business expansion, maintenance and improvement of our infrastructure base, and a strategy to meet the human capital needs of our business community through job training programs and targeted job tax credits. In addition, it should recognize the value of existing successful economic development tools by incorporating them in the overall urban revitalization schematic.●

DEFENSE BURDEN SHARING WITH OUR ALLIES

HON. LEE H. HAMILTON

OF INDIANA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, September 21, 1982

● Mr. HAMILTON. Mr. Speaker, I wish to bring to the Members' attention an article published in the New York Times September 4, 1982, by a fellow member of the House Foreign Affairs Committee, Representative DENNIS E. ECKART. In discussing the issue of burden sharing with our NATO and Japanese allies, Represent-

ative ECKART has thoughtfully examined problems which we must address in the coming months.

Representative ECKART points to two problems which are causing tension with our allies. First, it is obvious that leaders in Japan and Western Europe do not share the administration's assumptions about the Soviet Union. From this difference emerges the second problem, the lack of firm commitment to honor a pledge on burden sharing that our NATO allies agreed to in 1977. Because of this, the United States has assumed a disproportionate share of the cost of defending our mutual security.

Some may not agree with all of Representative ECKART's conclusions, but I think we all could agree that more burden sharing by our allies is essential. Congressman ECKART's statement serves as a useful starting point for discussion on this critical foreign policy and national defense issue.

The article follows:

OUR ALLIES MUST SHARE IN THE DEFENSE BURDEN

(By Dennis E. Eckart)

WASHINGTON.—The United States bears too heavy a burden for the defense of its North Atlantic Treaty Organization allies and Japan.

The United States is wounding its economy by footing 53 percent of the total allied spending on defense. This spending loots the economy of capital that could and should be invested more wisely and humanely to put Americans back to work. It allows NATO and especially Japan to allocate larger shares of their resources to more efficient, productive uses and, in effect bomb America's economy. All of this is happening while some allies and Japan rig the rules of free and fair trade and export unemployment to the United States.

Unfortunately, the Administration suffers from tunnel vision. It advocates spending on an elephantine military buildup when there is lacking a consensus on what constitutes effective strategy militarily and diplomatically to deter Moscow.

What is disturbing is the failure of the Reagan Administration to understand the attitudes of the leaders of the alliance.

Leaders in Western Europe are clearly less conservative and less fearful of the Soviet Union than is President Reagan. There is a shared mutual interest in deterring Moscow's adventurism but the leaders in Western Europe also prefer a strategy that combines political, economic and social relations with the Soviet Union. Thus in the absence of a cohesive American foreign policy the allies have little incentive—at least yet—to agree to share defense spending more equitably. The unfortunate result is nothing but lip service to meeting the 1977 commitment to do so.

The allies also remain essentially divided because of conflicting political, economic and social circumstances, all of which the Administration fails to address fully in its foreign policy.

It is foolhardy to try to argue that there is some magic mathematical formula for determining each nation's fair share of defense spending. Equity, however, was the overriding principle agreed to when the United States and the allies signed the North Atlantic Treaty in 1950. To achieve the common goal of building sufficient military strength to deter aggression against any member of the alliance, the allies were supposed to agree to distribute the burden "equitably among all the North Atlantic Treaty countries on a basis agreed to multilaterally by them."

All the statistics favor sending the allies and Japan a clear signal: Uncle Sam is tired of being ill-used. Consider that the United States spends 5.6 percent of its gross national product on defense while collectively the NATO allies average about 3.5 percent and Japan only 1 percent. Per capita the United States invests $607 on defense. Compare that to NATO's collective average of $434 and Japan's meager $84, according to the latest figures available from the Defense Department.

The dilemma of fairly sharing defense costs is not entirely new. The Nixon and Ford Administrations attempted to negotiate an allied commitment for more equitable sharing in the costs of NATO's defense umbrella. Finally, in 1977, the Carter Administration won a pledge from the allies to increase their defense spending by at least 3 percent annually in real terms.

A recent Pentagon report suggests that the allies are doing a reasonably good job of meeting the 3 percent commitment. Other Pentagon evidence, however, suggests otherwise. Only half have ever achieved the 3 percent commitment in any single year, and collectively the allies this year are likely to increase their real defense spending by 2.1 percent.

Clearly, it is time to hold the allies' feet to the fire. It's also time to hold the Reagan Administration accountable for failing to exercise coherent and steadfast leadership, which coincidentally is precisely what Secretary of Defense Caspar W. Weinberger says is critical to keeping the alliance an effective deterrent against the Soviet Union.

America's commitment to Western Europe after World War II was important to restore the allies' economies. They were too weak militarily and economically to guarantee their own security. But by the time President Dwight D. Eisenhower left the White House, he believed a reduction of United States strength in Western Europe should be initiated "as soon as the European economies were restored." That has happened.

The allies and Japan are capable of paying their fair share for defense. It is now the economy of the United States that is in ruins and is in need of a helping hand. The time has arrived for the allies and Japan to assume an equitable share of defense spending. America's taxpayers favor a secure and effective alliance, but at a farer price. We can no longer be the sugar daddy.

(Dennis E. Eckart, Democrat of Ohio, is a member of the House Foreign Affairs Committee.)●

REPUBLICAN FISCAL IRRESPONSIBILITY: PART II

HON. PATRICIA SCHROEDER

OF COLORADO

IN THE HOUSE OF REPRESENTATIVES

Tuesday, September 21, 1982

●Mrs. SCHROEDER. Mr. Speaker, one of my colleagues yesterday took exception to my pointing out, among other things, the fascinating relationship between Republican Presidencies and high Federal deficits.

Among the facts I cited was that Democratic Congresses normally appropriate less than Republican Presidents ask for. In response, my colleague recalled President Ford's "veto after veto."

Well, let us look at the facts. Set out below is a comparison of congressional appropriations to Presidential budget requests:

COMPARISON OF CONGRESSIONAL APPROPRIATIONS TO PRESIDENTIAL BUDGET REQUESTS

[Dollars in billions]

Calendar year	Amount requested by President	Amount appropriated by Congress	Congressional action over (+)/under (−) President's request	
			Amount	Percent
1947	$33.4	$30.1	−$3.3	−9.9
1948	35.4	32.7	−2.7	−7.6
1949	39.5	37.8	−1.7	−4.3
1950	54.3	52.4	−1.9	−3.5
1951	96.3	91.1	−5.2	−5.4
1952	84.0	75.4	−8.6	−10.2
1953	66.6	54.5	−12.1	−18.2
1954	50.3	47.6	−2.7	−5.4
1955	55.0	53.1	−1.9	−3.5
1956	60.9	60.6	−0.3	−0.5
1957	64.6	59.6	−5.0	−7.7
1958	73.3	72.7	−0.6	−0.8
1959	74.9	73.0	−1.9	−2.5
1960	73.8	73.6	−0.2	−0.3
1961	91.6	86.6	−5.0	−5.5
1962	96.8	92.3	−4.5	−4.6
1963	98.9	92.4	−6.5	−6.6
1964	98.3	94.2	−4.1	−4.2
1965	109.4	107.0	−2.4	−2.2
1966	131.2	130.3	−0.9	−0.6
1967	147.8	141.9	−5.9	−4.0
1968	147.9	133.3	−14.6	−9.9
1969	142.7	134.4	−8.3	−5.8
1970	147.8	144.3	−3.5	−2.4
1971	167.9	165.2	−2.7	−1.6
1972	185.4	179.0	−6.4	−3.5
1973	178.0	174.9	−3.1	−1.7
1974	213.7	204.0	−9.7	−4.5
1975	267.2	259.9	−7.3	−2.7
1976	282.1	282.5	+0.4	+0.1
1977	364.9	354.0	−10.9	−3.0
1978	348.5	337.9	−10.6	−3.0
1979	397.7	386.8	−10.9	−2.7
1980	340.3	333.7	−6.6	−1.9
1981	339.0	340.0	+1.0	+0.3
Total	5,159.4	4,988.8	−170.6	−3.3

Note: These figures are compiled on a calendar-year basis, and compare the total amounts requested by the President during each session of Congress with the total amounts appropriated by Congress during that session. The totals include all appropriations—regular annual, supplemental, and deficiency.

Between calendar year 1947 and 1981, Congress appropriated more than the President requested only twice, in 1976, 0.1 percent more, and in 1981, 0.3 percent more.

One party is not necessarily more fiscally responsible than the other. Assuming, however, that a Federal deficit is the litmus test for fiscal responsibliity, Republican administrations fail, and they fail in a big way.

(NOTE.—The H7191 insert September 20, 1982, neglected to cite Republican control of the House, 1953-55.)●

TO REBUILD AMERICA—$2.5 TRILLION JOB

HON. BOB EDGAR

OF PENNSYLVANIA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, September 21, 1982

● Mr. EDGAR. Mr. Speaker, the problems of our decaying public infrastructure have increasingly forced themselves into our consciousness. Several major national publications have recently devoted space to this creeping crisis. In its September 27, 1982, issue U.S. News & World Report featured an analysis entitled "To Rebuild America—$2.5 Trillion Job." This article is an important contribution to the growing national debate on infrastucture and a Federal Capitol budget. The article follows:

TO REBUILD AMERICA—$2.5 TRILLION JOB

At a time of lingering recession, another cloud now looms, over the U.S. economy: A creeping crisis in the nation's long-neglected and decaying public works that can only be solved by trillions of dollars in new spending.

Crumbling highways, rusting bridges, backed-up sewers, leaking water mains, bursting dams, broken-down buses and subway cars—these and many other basic problems have been building up for a decade and a half, while the country occupied itself with other concerns. Now the troubles of public works, which economists call the infrastructure, have accumulated to the point where they pose a growing obstacle to a sustained national recovery.

"Much of America's infrastructure is on the verge of collapse," warns Pat Choate, senior policy analyst for the conglomerate TRW, Inc., and a congressional adviser. "Yet American business and farming depend absolutely on the smooth functioning of public works. If producers cannot get their products to market on time, prices increase and competitiveness declines. If basic services such as water supply or sewage are limited, then firms are hampered in their ability to expand and provide more jobs and income."

Suddenly, policymakers in Washington, state capitals and city halls are starting to give urgent attention to the erosion of America's basic underpinnings. The consensus of experts: It will take a staggering amount of money over many years to stem the spreading decay and reconstruct America's time-ravaged economic base.

Choate estimates that local, state and federal governments would have to spend from 2.5 to 3 trillion dollars this decade—slightly more than all planned defense outlays in the same period—just to maintain today's level of service on public facilities. At present spending levels, he says, less than a third of that renovation can be done.

The most costly items on a list Choate presented to a congressional group:

Highways and bridges outside urban areas, 1 trillion dollars.

City streets, 600 billion.

Municipal water systems, 125 billion.

Ports and inland waterways, 40 billion.

Constructing and renovating up to 3,000 prisons and jails, 15 billion.

Water-pollution controls to meet current standards, 100 billion.

"Rebuilding the nation's public infrastructure," concludes Choate, "promises to be the single most expensive government challenge of the 1980s and 1990s."

To speed efforts to cope with the developing crisis, a bipartisan coalition in Congress is pushing for creation of a "national capital budget." This would require the administration, as a beginning, to take a first-ever inventory of public works throughout the country, with a view to assigning priorities for refurbishment and new construction.

In state and city governments, which in recent years have been contributing an average of 75 percent annually on spending for public works, officials are wrestling with the unsolved problem of how to increase the funds available to rebuild the aging infrastructure. Total spending in this field, measured in constant 1972 dollars, has declined 19 percent since 1965, while the nation's gross national product has risen 62 percent.

Finding the additional money now has been made more difficult by a flight from cities to suburbs, which has reduced municipal revenues. Adding to the pinch are stiffening local tax resistance during the business slump and an escalation of interest rates on new bond issues.

Yet strong doubts exist that President Reagan can be persuaded to make any significant increase in federal funds for public works. In fact, the White House is pressing for cutbacks in subsidies to mass-transit systems and reduced federal spending in other fields, while urging state and municipal authorities to take on more of the burden with help from private enterprise.

DAILY HAZARDS, BREAKDOWNS

For many Americans, the consequences of a decaying infractructure are becoming more apparent almost daily:

In Jersey City, N.J., the water supply ran out in midsummer for the city's 223,000 residents with a rupture in a main of the 82-year-old water system. It took five days to restore drinkable water, as National Guardsmen ladled out supplies from tank trucks.

In Colorado during the same month, 80-year-old Lawn Lake Dam gave way, sending 250 million gallons of water cascading through the Rocky Mountain resort town of Estes Park. Four people were killed, and property damage from the flood ran to 21 million dollars.

Many communities now live under the daily threat of a failure of one vital public facility or another. In Cleveland, that danger is the 43-year-old Main Avenue Bridge, the main traffic artery to downtown from western Cuyahoga County. The bridge has recently shown such signs of decay that authorities closed it six nights for temporary repairs. Such repairs have cost 1.7 million dollars in the last three years, and contracts worth $600,000 more are to be let soon.

"It's a crime spending this money, because we're just putting bandages on the bridge," says Cuyahoga County Engineer Thomas J. Neff. "But closing it would be catastrophic in traffic terms, and we simply can't find the 30 million dollars it would take to rebuild."

In Phoenix, the big worry is the sudden appearance of cracks in the earth, as long as 400 feet in one residential neighborhood. A road sign outside the city depicts a car plunging into a crevice and warns drivers they are entering a "subsidence area." The fissures are a direct consequence of large-scale pumping from aquifers to meet increasing water demands in the fast-growing Arizona city.

These are but a few of the problems caused by an infrastructure that has long served the country well but now shows the effects of years of heavy usage and neglect. As John Wiedeman, president-elect of the American Society of Civil Engineers, puts it: "Virtually every part of the country has its own horror story." The full extent of the challenge of decaying public works is emerging from recent studies by government officials and private experts.

A CATALOG OF TRANSPORTATION WOES

Some 8,000 miles of the nearly completed 42,944-mile interstate-highway system—begun in the 1950s—are crumbling and must be resurfaced, says a new official survey. Pavements erode in 15 years or less, mainly because of trucks and heavy traffic. At the current rate, 2,000 miles more of the interstate-highway system is wearing out every year. A new congressional study puts the cost of completing and renovating the highways at 54.8 billion dollars.

Even more serious decay is attacking 3.9 million miles of roads totally supported by states, counties and cities. A recent study by the Road Information Program, a Washington research group, showed that almost two thirds of the major roads need resurfacing or rebuilding. Nearly 45 percent of the nation's 557,516 bridges are classified in a recent official report as "either structurally deficient or obsolete." These include 26 percent of the bridges on the federally aided road system that carries most of the nation's traffic.

Of the total of officially "deficient bridges," 126,655 of those are so unsafe as to be restricted by federal law to light vehicles—no buses, trucks, truck trailers, vans or fire engines—or closed to traffic altogether pending rehabilitation. At least 3,416 bridges have been closed for repairs or for good. The Transportation Department places the cost of replacing or rehabilitating all bridges at 47.6 billion dollars. To help state and local governments foot that bill—they finance about 60 percent of bridge costs—the Highway Users Federation has urged Congress to triple the present rate of federal funding through the federal Highway Trust Fund. The fund takes in about 6.6 billion dollars a year in fuel taxes and highway-user charges—but is already so heavily committed to various projects that it is running a deficit.

The nation's bus and subway systems also are hard pressed for money to fight spreading obsolescence. So critical is the deterioration in urban-transportation fleets that transit officials in a quarter of the 300 cities with such services say they might have to cease operations by 1985 if a threatened cut in federal support goes through. Their target: A Reagan administration proposal to cut out all federal operating subsidies, which at 1.1 billion dollars annually now cover 15 percent of transit costs.

Even at current federal-support levels and with recent fare increases in some places to as high as 90 cents, transit budgets fall far short of meeting rising labor and equipment costs. The resulting limits on maintenance and repair are causing buses and subway cars to break down with increasing frequency. San Francisco recently had to shut down its 100-year-old cable-car system, a major tourist attraction, for 20 months for a "total renewal."

A survey by the American Public Transit Association concludes that within this decade 72 percent of all transit buses and 28 percent of all subway cars must be replaced. Transportation Secretary Drew Lewis places a price tag of 40 billion dollars to maintain

the operational level of transit systems through the 1980s. To help urban authorities raise the money, he favors increasing gasoline taxes for automobiles by 4 cents a gallon and for heavy trucks by 1 cent a gallon. Neither the White House nor Congress seems ready to embrace that proposal.

Ports and inland waterways are suffering the consequences of a five-year lapse in federal authorizations for needed improvements. Commercial users seek more channel dredging to reduce harbor congestion and cut the rate of accidents. Especially sought is a renovation of old locks. "Unless critically deficient, aging, undersized locks are replaced or improved," warns Charles T. Jones, president of Amherst Industries, a Charleston, W. Va., coal shipper, "the safe and efficient movement of coal and other bulk commodities on the inland waterways will be in danger."

Jones points out that while three nations ranking as leading U.S. competitors in the world coal market have channels deep enough to accept larger coal vessels, the only one in this country is far from coal sources, in Long Beach, Calif.

DISAPPEARING WATER, BACKED-UP SEWAGE

Leakage from aging pipes is costing New York, Boston, Buffalo and other cities as much as a third of their water supplies between reservoirs and faucets. Of the nation's 43,500 dams, 9,000 are reported in need of safety improvements. Water problems are so widespread, according to one official report, that 756 urban areas face a bill of 63 billion dollars to repair or replace existing facilities. Meanwhile, the leakage is cutting into revenues from usage that might pay for new piping. Many cities warn that they will experience funding shortfalls even if water rates are doubled.

In the sun belt, a number of fast-growing cities and rural areas find themselves unable to keep pace with expanding water needs. One study for a congressional group warns that the old dust-bowl region of the central plains, which accounts for 23 percent of the nation's irrigated farmland and produces more than 40 percent of its processed beef, is in danger of depleting its water sources.

Regional officials complain that they haven't had an authorization for fresh federal aid for water projects since 1972. They warn that new water sources must be developed by the end of the decade to avoid declining yields of important export crops.

The nation's sewage-treatment systems are high on the list of decaying public works. Responding to a National League of Cities survey, 48 percent of local officials reported their sewage and drainage facilities in need of major rehabilitation or replacement. The Environmental Protection Agency estimates that by the year 2,000, 38 billion dollars will be required for replacement of sewers and 17.7 billion more for replacement of treatment plants.

Problems of sewage backups

At present, federal grants cannot be used to help meet the soaring costs of maintenance and repairs. Pressures are mounting for a change in that policy as residents of Chicago, Albuquerque and other cities experience sewage backups into their basements during heavy rains. Orlando, hard pressed to cope with one of the country's highest rates of growth, has no place but a local stream to empty its sewage after treatment.

Prisons head a long list of public buildings suffering serious deterioration. Of a total of 3,500 prisons in the country, 3,000 are so old and structurally inadequate as to need major renovation or expansion. The problem has been compounded by a sharp rise in the number of prisoners—a 12.1 percent jump in 1981 alone—caused by a nationwide trend toward tougher sentencing and a hold-down on paroles.

Estimates of what it would take to build or renew prisons to keep up with needs range from 10 to 14 billion dollars. With the necessary funds lacking in many cities and states, officials have had to require doubling up in small cells, the transfer of some prisoners to makeshift quarters—and, in Florida and Maryland, even the early release of prisoners serving short terms to make room for new convicts.

In Albuquerque, some of the 400 inmates now crowded into a jail that was built for 325 will soon share temporary quarters in a nearby mental institution, pending a prison-expansion program.

A HIDDEN AGENDA OF NEGLECT

Why have local, state and federal authorities allowed this steady deterioration of the nation's vital infrastructure? George Peterson, director for the Public Finance Center of the Urban Institute, holds the view that "in too many areas of government, public works constitute a hidden agenda of neglect."

Agreeing, one former local official observes: "For many years, the ruling philosophy has been, 'We'll take care of that later.' The tendency has been to take public works for granted, as though these never wear out."

Another obstacle is seen as Washington's traditional pork-barrel approach to public-works funding. Too often, experts charge, congressional appropriations for local improvements or construction are promoted by politicians for patronage benefits and political clout at the expense of projects that technical studies deem more necessary.

"Every politician likes to cut a ribbon," notes Representative William Clinger, Jr. (D-Pa), a leading proponent of infrastructure reform, "whether it's to open a new bridge or dam or highway or public building. Few have been as interested in the less visible work of keeping up the sewers or replacing the water pipes or the subway cars."

For this neglect, analysts say, the ordinary citizen bears at least part of the blame. Opinion polls show a majority of Americans support the trend toward tougher prison sentences, for example, yet bond issues to build more prisons have been voted down in New York and some other states. Dallas voters, seeking a modern mass-transit system, rejected local financing to speed the project. Nationally, local voters approved nearly 80 percent of proposed bond issues in the 1950s, but in the 1970s they backed barely more than 50 percent.

Even on approved projects, long delays caused by bureaucratic red tape escalate costs through inflation. The Tennessee Valley Authority currently is experiencing an average eight-year delay in constructing seven new power plants—trebling production costs and hiking the total cost by 11 billion dollars. All told, the nation has a backlog of more than 100 billion dollars in uncompleted projects, increasing the tab for taxpayers by an estimated 16 billion a year.

Costs of public works are nudged still higher by widespread fraud, corruption, inefficiency and waste. In Massachusetts, a blue-ribbon panel investigating bribery and corruption reported that more than 6.4 billion dollars' worth of state and county building construction was defective, requiring 2.1 billion in changes. Among the defects: A college auditorium stage that cannot be seen from balcony seats; a jail in which cell doors won't lock; an old-age home without stairway railings, and a 9-million-dollar power plant rendered unusable by a steam generating system installed backwards.

The biggest white elephant found by state investigators was a 28-story library—billed as the world's tallest—that dominates the campus of the University of Massachusetts at Amherst. Completed in 1974 at a cost of 17 million dollars, it has never officially opened or been able to receive a book because parts of bricks have been falling from its facade.

Oklahoma has had some of the country's worst corruption in public works. There, 195 county commissioners out of 231 have been convicted or have pleaded guilty to pocketing county funds for nonexistent transactions or from kickbacks on purchases of materials and equipment. In one case, investigators found a gunnysack stuffed with more than a million dollars in fictitious invoices.

Illegal practices among highway contractors led to the largest antitrust investigation in the Justice Department's history, generating 170 criminal presecutions since 1979 for bid rigging in which construction firms manipulate the competitive-bidding process for illegal gains. These cases—involving 154 corporations in Southern and Midwestern states—have resulted in 130 guilty pleas and 10 convictions, with maximum penalties of 1 million dollars for a corporation, $100,000 for each individual plus three years in prison. Federal investigators say the 14 states covered so far are only a starter.

MEETING THE CHALLENGE

Apart from eliminating waste and fraud, what will it take to rebuild the country's widely decaying public works?

Some authorities see no alternative but another huge spending program, perhaps rivaling President Franklin D. Roosevelt's Works Progress Administration and the Public Works Administration, during the Depression. John E. Jacob, president of the National Urban League, called on Reagan in early August to loosen his economic policy with a 100-billion-dollar public-works scheme. Jacob saw three major benefits from his plan: Renovating the infrastructure to set the stage for long-term growth, providing jobs for the nation's mounting unemployed and revitalizing sluggish industry.

In another throwback to the 1930s, Felix Rohatyn, a New York investment banker, urges revival of the Reconstruction Finance Corporation to provide federally backed loans to cities for public works. "The RFC of the 1930s," he recalls, "saved banks some cities and many businesses, thus preventing much larger dislocations. What's more, it made money for the taxpayer. If we do not take some such step to break out of our present economic straitjacket, then our infrastructure and much of our banking and industry could face much deeper trouble.

Congress is coming up with other proposals to meet the mounting public-works crisis. Most important: A plan advanced by bills in both houses to create the national capital budget. Aimed at treating the infrastructure separately from other programs to guarantee regular attention and support, the proposal is seen by many infrastructure experts as "bringing coherence to a field in disarray."

Says Representative Bob W. Edgar (D-Pa.), cosponsor of the House bill: "The

nation can no longer afford to rely on pork-barrel methods of deciding where to spend on public works. The time has come to introduce more order into the whole process, so as to spend where it can do the most good." Other sponsors range a political spectrum from liberal House Speaker Thomas P. "Tip" O'Neill (D-Mass.) to Representative Jack Kemp (R-N.Y.), a leading fiscal conservative. Support is also found is business circles David Mahoney, chairman and chief executive officer of the conglomerate Norton Simon, Inc., recently told a business group: "Without such planning, we may create a bottleneck that would limit growth and economic expansion in the future."

Such proposals for dramatic action by Washington have their critics, both in and out of government. They are called "inappropriate for what must be a long-term effort" by David A. Grossman, former New York City budget director and a public-works consultant. Others label them as inflationary and conflicting with the prevailing Reagan policy of reducing federal involvement and transferring more responsibility to the states.

Moreover, many economists say such a budget would further complicate overall policymaking, among other things, by adding another bureaucratic layer to the process. David Rusk, former Albuquerque mayor, says: "Federal lawmakers cannot match state and local ones at knowing the problems of public works in the field. Wherever possible, more taxing authority should be transferred to local governments—along with such incentives to voters as tax credits to ease the job of local financing."

Some American communities are making headway with new initiatives. Baltimore, Pittsburgh and Dallas are pursuing renovation programs with broadened local support, including that of private enterprise. Many experts look at a Cleveland experiment of involving county and regional authorities—along with local banks and private companies—as a possible model for other cities. In the East and Midwest, many of these cities are suffering a decline in tax revenues because of the flight to the suburbs, yet are deprived of suburban-annexation rights enjoyed by sun-belt cities.

Galveston has embarked on a 10-year plan to deepen and widen its port, to be paid for with municipal revenue bonds. Cincinnati, to assure better upkeep of its infrastructure, now requires that every new project include financial arrangements for maintenance during its engineered lifetime. By close planning and budgeting, the New York Port Authority's well maintained bridges, tunnels and other facilities contrast sharply with New York City's many run-down works.

Still, funding problems for public works loom so large everywhere—along with technical and political obstacles—that many experts now agree on a need for far-reaching changes in the whole approach if America is to overcome this developing crisis. As one consultant puts it: "All we are really arguing about at this point are means, not ends."

One trend already under way is to reduce the existing infrastructure. Just as the airlines have cut out some routes as uneconomical, recently some federal, state and local authorities have called off a few projects as nonessential. Awaiting a decision is a set of options for curtailing the final stages of building the interstate-highway system, now 95 percent completed after 25 years. The bill for finishing the project is set at 38.8 billion dollars. To one analyst, such economy moves are simply a case of "lowering our sights and learning to live within our means."

Accordingly, some doubt the wisdom of pumping more money into water projects to make the barren Western plains bloom, which some critics say will only produce a further tax burden for subsidizing the increasing food surplus.

The trouble is, as many experts warn, vital hardware such as water, sewage and transportation systems cannot be cut back easily in a vigorous nation dedicated to long-term growth. America's competitiveness and economic well-being depend on an effective infrastructure.

After a decade and a half of neglect of public works, the U.S. thus appears to have no other course but a new and immensely expensive commitment over many years to rebuild its crumbling economic foundations—and then to see that these are kept in better shape as a prime policy concern.●

DEAR MRS. THATCHER

HON. WILLIAM F. GOODLING

OF PENNSYLVANIA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, September 21, 1982

● Mr. GOODLING. Mr. Speaker, I would like to bring to my colleagues' attention, the following article by Ben Wattenberg which appeared in the Washington Post last Sunday. Mr. Wattenberg demonstrates very clearly how the United States provided the necessary support to the British during their Falkland crisis, yet, when the United States asked for help against the Soviets, Mrs. Thatcher reacted quite differently.

Too often, we do not respond to criticism of our foreign policy, indicating an acceptance of sorts, or a rather passive indifference to rejection by our allies to our requests for support.

DEAR MRS. THATCHER: I've been following your position on the pipeline issue. I gather you are not happy because you think England is being pushed around by America. I particularly recall what you had to say about it on our telly a little while back. And I really appreciated the part with the big wink. So I thought I'd write you this little note.

There you were in Glasgow. On the docks, an English firm was loading American technology onto a Soviet freighter so that the Soviets could complete their natural gas pipeline on time. These shipments, I understand, are to go to the Soviets at the express direction of you and your government.

You said to the assembled television cameras that you felt "particularly deeply wounded" by America, because it was good old America that was trying to punish the British firm for selling American-licensed parts to the Soviets. You said that, of course, Britain must remain a "staunch friend" of the United States and then, with that big wink of yours, you said that because we're such good friends "we must be pretty frank" about our disagreements.

Well, Mrs. Thatcher, we sure do applaud your frankness. We applauded it during the time of the Falklands when you asked for American military help and an American embargo against Argentina. You said then that it was important to set an example for aggressors all around the world. After all, you said, just think of what the lesson would be if the democratic free nations would stand idly by while aggressors aggressed.

We went along with you, although I must say a few of us winked a bit, Mrs. Thatcher. Argentina was an aggressor, it's true, but it didn't seem to be the world's most notable aggressor. Nor did the Falklands exactly seem like the strategic spot where the destiny of the free world would be determined.

Moreover, our winking went into overdrive when we recalled that when the United States had, in 1979, asked for sanctions against the Soviet Union over the invasion of Afghanistan, your government had cowered under the table along with the rest of the Europeans. (That, of course, was when American imposed a grain embargo on the Soviets under the leadership of a truly tough president—Jimmy Carter.)

When, earlier this year, we asked for an economic response to the Polish-Russian crackdown on Solidarity, you were again to be found under the table, still in a cower mode. And all this despite the fact that you were called the Iron Lady.

But, upon reflection, we thought it's better late than never about standing up to aggressors. It's better to take stands in small places than in no places at all. So we signed on as key supporters in the Falklands adventure.

And now, with Poles being shot in the street because they want a labor union, you've decided to help their Soviet masters build a pipeline using the labor of political prisoners in the arctic cold of Siberia. At the same time, you tell us how deeply wounded you are at our behavior. Well, Mrs. Thatcher, I must tell you, you're not the only one deeply wounded.

Some of us wonder what your attitude might be if the Falklands had come along just a few months later—today for example. I wonder what you would do if President Reagan was "pretty frank" with you and said that even Iron Ladies have to play by the rules: If you wanted us to oppose aggression in Argentina, we expect you to oppose aggression in Poland, even if it cost a few pounds or a few jobs to do so.

Well, of course, that's not the way it worked out. But just to be pretty frank about it, Mrs. Thatcher, I don't think it would be so politically wise to come looking for help over here if something else should arise. Oh, we'll still be staunch allies and all that, but maybe not on little things, like the Falklands.

Maybe the Soviets will give you a hand next time. I can see the headlines now: "Iron Curtain Bails Out Iron Lady." That would be ironic.●

COMPLICITY IN SHAME

HON. LARRY McDONALD

OF GEORGIA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, September 21, 1982

● Mr. McDONALD. Mr. Speaker, certain events do illuminate others with grim clarity. We live in an era in which some of the directors of the Vietnam war are jointly awarded the Nobel Peace Prize when one of them, in effect, turns over his ally to the tender mercies of a mutual foe. We

live in an era when one nominee for this year's Nobel Peace Prize is to be rewarded for cleaning up after the panzer blitzkrieg of a previous year's Nobel Laureate. Whatever the merits of the blitzkrieg, it was a panzer blitzkrieg.

And yet we have the spectacle, in 1982, of the U.S. Government collaborating with the Soviets in imposing a 41st year of imprisonment—and a 16th year of solitary confinement—upon an 88-year-old man convicted, at the end of World War II, of doing what thousands of officials, then and since, have done as a routine matter.

I speak, of course, of Rudolf Hess, the only human being ever convicted of "crimes against the peace." He was not found guilty of any war crimes, as is so often alleged. His crimes consisted, for example, of signing the German draft law in the 1930's.

Rudolf Hess is, in fact, at least as deserving of the Noble Peace Prize as many a recent recipient. He sacrificed himself in order to fly, alone, to Britain in 1941, hoping to deliver a peace plan to the British Government.

He has been imprisoned ever since.

He has never been allowed to tell what the plan was. All records of his interrogation by the British have been sealed until well into the 21st century. To this day, he has not been allowed an instant of privacy with any but his captors.

Hess is permitted 1 hour per month of contact with one of three members of his family. Representatives of the United States, the Soviet Union, Britain, and France must be present and able to hear every word. Many subjects cannot be discussed, and his family is forbidden, under severe penalties, from speaking to anyone about their visits.

Further, Rudolf Hess is forbidden to read anything about the period between 1933 and 1945. Even a book written about events in 1915 was forbbiden to him—by the British. The book was "The Lusitania," by Colin Simpson. It describes the manner in which the British First Lord of the Admiralty, Winston Churchill, and the American Secretary of the Navy, Franklin D. Roosevelt, conspired to load a passenger ship with ammunition and set it up to be torpedoed, hoping to provide an outrage sufficient to overcome the reluctance of the American people to enter World War I. This type of fruitful collaboration was repeated, with even better results, in 1941.

There are many possible reasons for this protected atrocity being committed against Hess. All of them reflect poorly upon the alleged "great powers." It is standard procedure for the three Western governments to blame it all on Soviet intransigence, but the fact is that the Western powers have been militarily in charge of Hess for three-quarters of the time he has spent in Spandau Prison, and it is evidence of cowardice or worse that he has not been unilaterally released.

The undoubted complexities of the Berlin situation are cited as a kind of fallback line of defense, when questions are raised as to America's shameful complicity. But, when Hess dies, these same complications arise, and since that event is inevitable, we can be sure that its effects have been discounted in advance.

What we are left to comtemplate is an incredibly protracted act of vengeance. It is possible to imagine that Hess is considered a stand-in for Adolf Hitler, and since Hitler is not available for this type of treatment, Hess will have to do.

No excuse can be offered for what will go down in history as one of the more grotesque atrocities of an atrocious age. Must we conclude that four allegedly great powers still fear what this lone 88-year-old man might have to say about them?

The Washington Times deserves credit for its very accurate article on Hess in its September 17 edition. The usual press coverage of the Hess situation is filled with falsehoods, misinformation, and standard prejudices.

The article follows:

AILING HESS ALLOWED VISIT FROM HIS SISTER

WEST BERLIN (REUTERS).—Former Nazi leader Rudolf Hess, seriously ill with pleurisy, was allowed a half-hour meeting with his sister yesterday after four-and-a-half hours of haggling between the Western allies and the Soviet Union.

Hess, 88, once Hitler's deputy and a prisoner now for 41 years, was moved to the British military hospital in West Berlin Wednesday after developing pleurisy of the right side, British military authorities said.

His son, Wolf-Ruediger, an architect from Stuttgart in West Germany, said he flew in yesterday after being informed by the prison secretary that his aunt's planned visit to her brother would not be allowed to take place.

But after negotiations involving the Soviet, British, French and U.S. authorities, who are jointly responsible for Spandau Prison where Hess has been the only inmate since 1966, a half-hour visit was allowed.

Attempts by the Hess family to have him freed on humanitarian grounds because of his age and frailty have foundered on the refusal of the Soviet Union, which maintains he must serve his full sentence and die in captivity.

A statement by the British authorities said Hess was responding to treatment, but his sister, Gerda Rauch, looked pale and shocked after the visit, which she was not allowed to discuss publicly.

Pleurisy is a painful inflammation of the tissue between the ribs and the lungs which constricts breathing.

Lawyer Alfred Seidl, who defended Hess at the 1946 war crimes trial in Nuremburg when he was jailed for life, and who has represented him since then, said Mrs. Rauch's visit to her brother was routine and should not have been hindered.

Hess' son, sister and wife are allowed one hour-long visit a month in the sprawling, drab red brick Spandau Prison, where he is guarded in four-month periods alternately be each of the four powers.

At the moment he is being guarded by British troops of the Irish Rangers regiment.

During a visit, representatives of each of the four powers have to be present. Hess' son said his repeated request to be allowed to speak to his father alone had been turned down.●

NATIONAL SURVEYORS WEEK

HON. WILLIAM G. WHITEHURST

OF VIRGINIA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, September 21, 1982

● Mr. WHITEHURST. Mr. Speaker, on September 9 I introduced House Joint Resolution 591, to authorize the President to issue a proclamation designating March 13-19, 1983, as "National Surveyors Week."

This resolution recognizes the important contribution surveyors have made throughout the history of our Nation, and it focuses attention on the vital role the surveying profession plays in natural resources management and the protection of private property rights.

Surveying in America has its roots in Virginia. The first society of surveyors was formed in Jamestown during the 1600's, and the College of William and Mary was officially the Surveyor-General of the Colony of Virginia. The faculty were entrusted with the duty of examining and licensing surveyors, and among those who were licensd as county surveyors were George Washington (1749) and Thomas Jefferson (1773). On the basis of Jefferson's knowldge of land surveying as well as law, he was appointed chairman of a committee formed under the Articles of Confederation in 1784 to devise a means for disposing of the western lands. The rectangular survey system developed by Jefferson and his committee was implemented and today remains the basis of the public land survey system administered by the Bureau of Land Management of the Department of the Interior. It was during President Jefferson's administration that much of the West was explored, surveyed, and mapped, and it was Jefferson who established the U.S. Coast and Geodetic Survey Department which is now the National Ocean Survey of the Department of Commerce.

Presidents Lincoln and Fillmore were also surveyors prior to their elections as chief executive.

Today's surveyor has special education, training, experience, and knowledge of the principles of mathematics, the related physical and applied sciences, and requirements of law for adequate evidence. Professional surveyors provide vital services that are

critical to many aspects of the issues Congress addresses. Land surveying is utilized in land development and planning, natural resource management, and protection of property rights. Marine or hydrographic surveying is important to dredging and navigation, coastal barrier protection, and water resources. Engineering surveys are used to study and select sites for construction, utilities, and mining operations. Geodetic surveying, the precise positioning of points on the surface of the Earth and the determination of the exact size and shape of the Earth, is used by several Federal agencies for launching and landing long-range aircraft, missiles, and satellites.

The modern surveyor is a true professional whose judgment and expertise are needed by governments at all levels and many fields in the private sector. I am pleased to have been able to offer this resolution on behalf of the National Society of Professional Surveyors, a member organization of the American Congress on Surveying and Mapping. I invite my colleagues to join me in sponsoring House Joint Resolution 591, and I urge prompt action by the Congress.

Thank you, Mr. Speaker.●

NIMMO POORLY SERVES VETERANS

HON. JAMES J. FLORIO

OF NEW JERSEY

IN THE HOUSE OF REPRESENTATIVES

Tuesday, September 21, 1982

● Mr. FLORIO. Mr. Speaker, the performance of Robert Nimmo as Administrator of the Veterans' Administration has been woefully inadequate since his confirmation. His policies have shown a remarkable insensitivity to our Nation's commitment to honor and assist those who served this country in times of need. The following article summarizes some of the most discouraging aspects of Mr. Nimmo's performance as VA Administrator. Mr. Speaker, I urge my colleagues to review this informative article.

[From the Philadelphia Inquirer, Aug. 24, 1982]

TOP REAGAN AIDES DEFEND CHIEF OF VA

(By Carl M. Cannon)

WASHINGTON.—For the second time this summer, Robert P. Nimmo, the embattled administrator of the Veterans Administration, is the object of a rescue attempt by his powerful California friends in the White House.

Administration sources reported that White House counselor Edwin Meese 3d was asking others in the administration to help him save Nimmo's job. Meese's intervention comes at a time when others in the administration want President Reagan to fire Nimmo because they believe he is insensitive to veterans, incapable of running an agency and an embarrassement to the President.

Although Reagan declined to replace Nimmo when the subject was broached in early summer by chief of staff James A. Baker 3d, many administration officials still are not satisfied by Nimmo's private pledge to the White House that he will try harder.

"It's a pity we had to cancel the President's speech at the Veterans of Foreign Wars convention [in Los Angeles last week]," said one White House official. "The President would have learned first-hand just how much Nimmo has hurt us."

REALISTIC, AT FIRST

R. Jack Powell, executive director of Paralyzed Veterans of America, amplified on this point.

"Most veterans organizations were really optimistic about the Reagan administration. But all the talk is about building up defense. They are spending all this money on fancy, sophisticated technology. . . . What about those who served in the past? Is the administration as interested in fulfilling its commitment to them? I think future generations will wonder whether the government will take care of them if they are wounded or disabled."

Like others in the veterans community, Powell believes it is a reflection of the Reagan commitment that Nimmo, a man with no VA expertise and no administrative experience, was chosen by the White House to lead the highly politicized agency with 220,000 employees, a budget of $24 billion and the noncommunist world's largest hospital system.

In his year in Washington, Nimmo has consistently offended people with his offhand remarks, his style and his policies, and he has gone from one controversy to another.

He ignored a presidential directive and spent $54,183 to redecorate and refurbish his office complex at a time he was going around proposing cuts in veterans' medical benefits.

Nimmo also ignored the advice of the VA counsel-general's office and illegally hired a chauffeur out of government funds to drive him to and from work. Later he was forced to reimburse the government $6,441. The car he leased at government expense was a $708-a-month oversized Buick Electra, another violation of government regulations, which had opted for smaller models.

To critics, he explained that he needed a large car to transport disabled veterans who use wheelchairs. The explanation infuriated the disabled veterans, mainly because they said it wasn't true—that they rarely rode anywhere with Nimmo.

He has also proved difficult to work with—he's now on his third deputy administrator and has removed eight or more other top-ranking people.

Several top people he has fired were disabled or wounded in Vietnam. Often they were replaced, Nimmo's critics say, by persons with no combat experience and whose chief qualification was personal loyalty to Nimmo.

GOES HOME EARLY

Nimmo also has annoyed career VA employees by leaving early at the end of the day, by scheduling out-of-town speaking engagements around golf dates and by such actions as posting a guard at the entrance to his office and closing off an elevator to all but the top VA brass.

Some of his former aides believe he has shown a special hostility toward Vietnam veterans, once by comparing the effects of the defoliant Agent Orange to teenage acne.

Later he refused VA employees in Washington to take time off to attend the groundbreaking ceremony for the first Vietnam veterans memorial. Nimmo himself didn't attend because he was playing golf.

But the area in which he has seemed most insensitive involves disabled veterans.

They were angered that the Reagan administration budget for 1983 called for cutting the dependents' allowance for those with less than 50 percent service-connected disabilities.

The White House explained, and Nimmo concurred, that this covered "minor" service-connected disabilities such as flat feet, laryngitis and ulcers.

No one bothered to explain what the veterans immediately realized—that it also included such battle injuries as having a leg blown off below the knee and the loss of an eye.

The disabled veterans said the crowning insult was the Nimmo's huge car often blocked the handicapped parking spaces in front of VA headquarters. A Feb. 1 internal VA memorandum, from veterans groups liaison Dean Phillips to Deputy Administrator Charles T. Hagel, observed:

"Jim Mayer of PVA [Paralyzed Veterans of America] is really P.O.'d at the administration. He complained bitterly to me that Mr. Nimmo's car has been blocking the handicapped parking spots in front of the VA every time Jim has driven to the VA to attend meetings the PVA has been invited to. We need to act now to solve this problem."

When questioned about the parking controversy, Nimmo responded: "There was one occasion when a guy who drove for me got my car out of the garage and parked it in front of the building. I don't know that it was parked in a handicapped parking space; maybe it was. . . . I know the implication was that I habitually parked in the handicapped space. But if it was ever there at all, it was only once, and I didn't park it there."

In any event, the practice stopped after Hagel received the memo from Phillips. But the next month, Phillips was gone, replaced by Nimmo reportedly because the administrator was miffed when the veterans of Foreign Wars tentatively called for Nimmo's resignation.

"I just didn't think he was doing the best possible job in that assignment," Nimmo said of Phillips.

Phillips, an Army paratrooper in Vietnam who was wounded and awarded the Silver Star for valor, replied: "Some of the things Mr. Nimmo said to the veterans organizations in my presence made the job I had to do much more difficult."

One such occasion occurred Jan. 12 when Nimmo said in a speech that military service was "a mere inconvenience," a comment that struck many listeners as highly inappropriate inasmuch as the audience included Tut Vale of the Blinded Veterans Association, Norman Hartnett of the Disabled American veterans and Jack Powell of the PVA.

STUPID THING TO SAY

"These men hardly needed to be reminded by Nimmo of the price of citizenship," said one administration official. "It was a stupid thing to say."

The latest barrage came when Hagel left. Hagel, a twice-wounded Vietnam veteran, replaced Allan Clark Jr., a Republican activist, West Point graduate and Green Beret captain who lost both legs in Vietnam.

Clark resigned after two weeks of working with Nimmo and before his nomination was confirmed by the Senate.

Clark remained silent at the time, but has since written a letter to Reagan critical of Nimmo. Hagel worked with Nimmo for 10 months and is credited by the veterans' groups and by Nimmo himself with getting the VA to study the effects of Agent Orange, with bolstering the flagging Reagan administration commitment to the Vietnam veterans' counseling centers, and with beginning an overdue reorganization of computerized medical data within the VA.

But in late May Hagel, saying that he could no longer work with Nimmo, went to the White House and offered his resignation, which was accepted.

Nimmo also visited the White House, administration sources said, talking to old friends Meese and national security adviser William P. Clark Jr., letting them know that he believed Hagel was more loyal to the veterans groups than to Nimmo or to the President.

Meese and Clark, according to White House officials, went to bat then for Nimmo, just as they reportedly are doing now.

Although Nimmo's relationship with Meese and William Clark—and not any expertise or even interest in the VA—led to his appointment as a compromise candidate when the White House was desperate to name a VA head, there is no doubt that Nimmo had served his country well as a soldier.

In 1943, he left college to become a pilot in the Army Air Corps. From bases in England, he flew B-24s on bombing missions over Germany and on his ninth flight was shot down over Poland. He was delivered to neutral Sweden, where he was interned for three months. In the Korean War, Nimmo was commander of an ordnance company.

When summoned out of retirement by the White House last year, Nimmo came to Washington with high expectations, and he concedes now that he had no idea what was waiting for him.

The VA, by many accounts, is one of the most demanding and thankless jobs in Washington. Every VA administrator in the last 15 years has been bitterly criticized by the veterans groups, and despite all the headaches, the job is not of cabinet status.

"I didn't know the extent to which so many people wanted to help manage [the VA]. Nor did I realize how sensitive some people are to the agency and what it does," Nimmo says.●

MR. REAGAN'S REPUDIATION OF HIS SUPPLY-SIDE MISTAKE

HON. JOHN J. LaFALCE

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Tuesday, September 21, 1982

● Mr. LaFALCE. Mr. Speaker, Herbert Stein has once again sounded a voice of reason on the issue of Reaganomics. Republicans and Democrats in this body would do well to consider his counsel.

A former Chairman of the Council of Economic Advisers under Presidents Nixon and Ford, a Senior Fellow at the American Enterprise Institute, and the A. Willis Robertson Professor of Economics at the University of Virginia, Herbert Stein has consistently cut through the euphemistic rhetoric surrounding the President's economic program to deliver accurate, pointed analyses of what will—and what will not—work.

In the wake of the President's victory on the tax increase legislation, Mr. Stein has once again done a superb job. In an August 27 essay in the Wall Street Journal, Mr. Stein takes on the "Vestal Virgins of the Radical Right," as he describes them, and outlines why the President had to abandon the supply-side program that has failed to deliver the promised economic prosperity.

What Mr. Stein drives home is a simple point: Mr. Reagan woke up to the ill-conceived ideas of the rightwing supply-siders. As Stein notes in the essay:

What has been abandoned is not principle. What has been abandoned is a set of flaky propositions cooked up to help Mr. Reagan get elected and to get the authors of those propositions into positions of prominence and power. Those authors and promoters knew what they were doing. They were tired of being right, responsible and out of office. They were tired of saying life is real, life is earnest, and there is no free lunch. They wanted to promise everything, like all the other girls.

Mr. Stein knew that these ideas were fated to fail. Many months ago, he called this program "punk supply-side" because it was ersatz economics—plenty of glitter and plenty of nonsense. He also knew how this grand new scheme was sold. Consider this commentary from Mr. Stein:

A few economists and assorted other intellectuals were found to legitimize these propositions. And if you didn't believe, you were a dirty old Keynesian, a bleeding-heart egalitarian, or a throwback to Herbert Hoover, or possibly all of those things.

But these propositions were false, as was bound to be discovered when the candidate became the President. And since these propositions were false, the President couldn't deliver on all the campaign promises he had made which were predicated on those propositions.

And what were those propositions to which Mr. Stein refers? They are the same themes we have heard daily in this Chamber, Mr. Speaker, themes that ring hollow today. As described by Mr. Stein, those propositions were:

1. Cutting tax rates increases the revenue.
2. Inflation can be reduced without a transitional rise of unemployment.
3. Government expenditures can be greatly reduced without sacrifice of anything by anyone except bureaucrats and welfare queens. In fact, the welfare recipients will be the chief beneficiaries of the reduction of Government expenditures, because when the public purse is closed to them they will acquire steady jobs and stable families.

Today, this rhetoric continues from a few of the most hardened rightwing true believers. The White House, prone to these flights of fancy, has toned down some of its rhetoric. And it finally realized that the "punk" program it sold the Nation was not working. That, according to Mr. Stein, is why we had a tax increase 1 year after the 1981 tax giveaway.

I urge my colleagues to take the time to read Mr. Stein's commentary. Members from both sides of the aisle ought to take heed to what this distinguished economist and former economic leader under two GOP Presidents thinks about the tax increase and the President's economic program.

The article follows:

[From the Wall Street Journal, Aug. 27, 1982]

MR. REAGAN IS A TAX HIKE HERO

(By Herbert Stein)

The Vestal Virgins of the Radical Right are tearing their hair and rending their garments. Their hero has abandoned their dearest principles by supporting a tax increase.

Nonsense! What has been abandoned is not principle. What has been abandoned is a set of flaky propositions cooked up to help Mr. Reagan get elected and to get the authors of those propositions into positions of prominence and power. The authors and promoters of these propositions knew what they were doing. They were tired of being right, responsible and out of office. They were tired of saying life is real, life is earnest and there is no free lunch. They wanted to promise everything, like all the other girls. But they did not want to shock the maiden aunts of the Republican Party, who still believed in things like balancing the budget and getting inflation down. So they invented the following propositions:

1. Cutting tax rates increases the revenue.
2. Inflation can be reduced without a transitional rise of unemployment.
3. Government expenditures can be greatly reduced without sacrifice of anything by anyone except bureaucrats and welfare queens. In fact, the welfare recipients will be the chief beneficiaries of the reduction of government expenditures, because when the public purse is closed to them they will all acquire steady jobs and stable families.

A few economists and assorted other intellectuals were found to legitimize these propositions. And if you didn't believe, you were a dirty old Keynesian, a bleeding-heart egalitarian, or a throwback to Herbert Hoover, or possibly all of those things.

But these propositions were false, as was bound to be discovered when the candidate became the president. And since these propositions were false, the president couldn't deliver on all the campaign promises he had made which were predicated on those propositions.

That is the common situation. All candidates promise more than they can deliver. I suppose that almost all voters know that. The test of a president isn't the realism of the promises he made when he was a candidate but how, once in office, he chooses which promises to meet and which not.

A NUMBER OF COMMITMENTS

Ronald Reagan came into office with a number of commitments. He was committed to a large tax reduction, to large expenditure reduction without tears, specifically to protecting Social Security benefits, to balancing the budget soon, to a large increase of defense expenditures, to reducing inflation, to reducing, or at least not increasing,

unemployment, and to increasing the trend rate of growth of output and productivity. These things could not all be done fully and immediately. Saying that is not an expression of ideology or partisanship. It is simply a matter of arithmetic and the nature of the economic system.

The problem for Mr. Reagan was which of these commitments to honor now and which to subordinate or defer. He has correctly made the two most important decisions. First, he has steadfastly supported the defense buildup, even though it has greatly complicated the budget problem. Second, he has stood my the Federal Reserve in its disinflationary policy, even though he might temporarily have relieved himself of responsibility for unemployment by trying to push the Fed onto a more expansionary course. If the Reagan administration does nothing else in this term but rearm America and put us durably on a more stable price path it will have been one of the great successes of this century.

Although these may have been the most important decisions the president has made, they may not have been the most difficult. Standing by the defense program kept him in line with his own partisans as well as with popular sentiment. Supporting the Fed didn't require him to get out in front as much as to avoid public nagging.

The most difficult decision, it seems to an outsider, was the decision to support the 1982 tax increase. He could have stood firm on the position that he was not elected to raise taxes. He could have entered into a name-calling contest with the Democrats about who was responsible for the deficits and for the condition of the economy. He might even have won such a contest. He would surely have retained the devotion of this taxophobic friends.

That would have been the easy way. But it would have been wrong. It would have been wrong for the country. And it would have been inconsistent with his campaign position. As the president pointed out in his Aug. 16 speech, even after the 1982 tax increase the ratio of revenue to GNP will be lower than candidate Reagan promised during the campaign. That is partly because Congress made some tax cuts in 1981 that the president didn't ask for. It is also partly because the decline in the inflation rate has made the real value of the tax cuts larger than expected. The tax cuts promised in 1980 and enacted in 1981 were intended to offset more bracket creep than has occurred.

There is, however, a more fundamental point about consistency with Mr. Reagan's commitments. The reason for the promised tax cut was to increase the national income. The underlying objective was to speed up real economic growth. The tax cut envisaged in 1980 was a tax cut accompanied by a decline in the federal deficit. But a tax cut that raises the deficit is most unlikely to speed up growth because it would absorb private saving in financing the deficit rather than in financing private investment.

A true supply-side policy—that is, a policy to promote growth in the supply of output—has to be a deficit-reducing policy, as was promised during the 1980 campaign.

FISCAL DISCIPINE AGAIN

The conventional taxophobic answer to that is to cut expenditures more. People who say that are not sitting with a copy of the budget in their hands. The president has practically stopped the growth of real payments to individuals, including Social Security, despite the continuing rise of the population and especially of the aged population. These expenditures had doubled between 1971 and 1981. He has cut other nondefense expenditures, excluding interest, in real terms by more than half, back to the level of Eisenhower. Other cuts are possible and desirable, but not on a sufficient scale by themselves, and probably not fair or achievable if taxpayers and tax avoiders are ruled out of bounds.

So the president gave up the rhetoric of his campaign and stuck to the reality of it, which was to promote economic growth. In the process he has done two other things. First, he has restored the possibility that we will have some principles of fiscal policy again, some budget rules by which we are willing to be disciplined. That rule doesn't have to be a budget-balancing rule. But if there is no standard of a proper relation between expenditures and revenues for which policy-makers are willing to restrain themselves, the federal budget will be wildly out of control. Until Aug. 16 we seemed to be in or fast approaching that condition.

Second, by making his sacrifice of what was his obvious preference President Reagan has laid the groundwork for what we desperately need, which is a bipartisan economic policy. The country is in economic difficulty from which it won't emerge without costs and pains. There will have to be unemployment, expenditure cuts many people will dislike and tax increases many will detest. If each party and faction is ready to exploit this situation by blaming the others for what must be done, it will not be done.

By fighting for the tax increase President Reagan has made it possible for the Democratic leadership to cooperate. There will be other things for it to cooperate on—such as Social Security reform and disinflationary monetary policy. That cooperation hasn't been assured, but at least the possibility has been created.●

H.R. 7048

HON. ROBERT W. KASTENMEIER

OF WISCONSIN

IN THE HOUSE OF REPRESENTATIVES

Tuesday, September 21, 1982

● Mr. KASTENMEIER. Mr. Speaker, once again, a new academic year is upon us. And once again, students at the University of Wisconsin-Madison are without their promised student financial money they need to pay fall tuition and fees. Delays in processing Pell grant and guaranteed student loan applications have prevented the UW financial aid office from disbursing the sought-after funds. Wallace Douma, director of the office of financial aids, as quoted in the September 1 edition of the campus newspaper, the Daily Cardinal, "Federal procrastination in establishing eligibility guidelines and other rules governing distribution of Federal aid has held up the processing of financial aid applications. . . ."

Mr. Speaker, I offer my support for H.R. 7048, which would establish a statutory Pell grant family contribution schedule. It is this schedule that financial aid offices use to determine student eligibility and award amounts. Without the schedule, financial aid offices are prevented from processing Pell grant applications. As Mr. Douma indicated in his statement, the Department of Education has consistently delayed the publication of this schedule. This year, the schedule was published 4 months after the deadline for submission of a proposed rule.

The consistent failure of the Department of Education to adhere to the statutory timetable has resulted in unnecessary aggravation for families trying to plan financing for higher education. H.R. 7048 would fix the terms of the family contribution schedule in order to assure the timely publication of this essential schedule for the 1983–84 school year, and if the Secretary of Education once again fails to publish the family contribution schedule on time, for the 1984–85 school year. Mr. Speaker, I urge passage of this bill.●

LEBANON'S TRAGEDY

HON. WILLIAM F. GOODLING

OF PENNSYLVANIA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, September 21, 1982

● Mr. GOODLING. Mr. Speaker, history will record what happened in West Beirut last week as the modern massacre of the innocents. There is and there can be absolutely no justification for the wholesale slaughter of unarmed and unsuspecting women and children. The despicable actions which have been perpetrated on the women and children of West Beirut serve only to continue the cycle of violence, making the chances for peace even more remote than before. The murder of all these innocents will not bring back Bashir Gemayel or any of his deputies; it will, however, more deeply ingrain hatred and the desire for revenge in a people already overflowing with such feelings.

I do not believe that the Israeli Army was directly involved with the massacre, but I find it difficult to believe that it was unaware of what was going on or of the movements and intents of the so-called Christian militia as it conducted one of the most cravenly shameful acts of our time. If as Israel's Government claims, it was one horrible mistake, then as is the case in a parliamentary state, the minister or ministers responsible should resign. At the very least, Israel's Minister of War Sharon should tender his resignation.

We in America should make it clear that we will not tolerate such actions by any group. We must make this clear to Prime Minister Begin and the Lebanese Christian leaders alike. If the Christian leaders want the help and cooperation of the United States in establishing a stable government in Lebanon, they must themselves

behave in a stable manner. Now more than ever, hatred must be put aside, tolerance must be learned and put into practice. Only then will Lebanon be able to reconstruct itself. A good first step would be for the new President-elect Amin Gemayel, brother to the assassinated President-elect Bashir Gemayel, to denounce and condemn in no uncertain terms last week's massacre and to disassociate himself from any persons supporting such infamous actions as last week's massacre. To fail to do so would show him to be of less than Presidential material, and the United States should make this clear to him.●

DAVE SCHAEFER—EXEMPLARY HOUSE PAGE

HON. ROBERT McCLORY

OF ILLINOIS

IN THE HOUSE OF REPRESENTATIVES

Tuesday, September 21, 1982

● Mr. McCLORY. Mr. Speaker, one of the officials of the U.S. House of Representatives who brings prestige, honor, and excellent service to the Members of this body is the Senior House Page, David Schaefer.

I have known Dave Schaefer for longer than the period of his House service and am personally familiar with his excellent reputation as a young citizen of Highland Park, which is near my hometown of Lake Bluff, Ill.

Dave Schaefer has completed 3 years at Highland Park High School, where he excelled as a student and where he took an active part in student government. Dave's intense interest in public affairs has led naturally to his role in the House as a page appointed by my distinguished Illinois colleague, FRANK ANNUNZIO, of Chicago.

Mr. Speaker, Dave Schaefer and his family are personal friends with whom we enjoy a valued relationship.

In the course of recent weeks, when this body and the institution of House pages have been under attack, Dave Schaefer has represented the cross-section of House pages in several interviews with the print and television media. In so doing, he has brought credit to himself, to the other pages of the House, and to our House Members.

Mr. Speaker, I am proud to attest to the excellence of Dave Schaefer's character, his outstanding talents of young leadership, and to his superior service to all House Members whom he has served as Senior House Page.●

H.R. 6046, THE EXTRADITION REFORM ACT OF 1982

HON. HOWARD WOLPE

OF MICHIGAN

IN THE HOUSE OF REPRESENTATIVES

Tuesday, September 21, 1982

● Mr. WOLPE. Mr. Speaker, I rise to urge my colleagues to think twice before lending their support to the passage, unamended, of H.R. 6046, the Extradition Reform Act of 1982. As the gentleman from California (Mr. EDWARDS) has correctly observed, the language of this bill is so broad and vague that it risks compromising important constitutional principles and threatens our country's ability to respond appropriately to the needs of political refugees who have come to America in search of a haven from oppression. Mr. Speaker, I am sure all of us in the House support the underlying purpose of this legislation—facilitation of the return of terrorists. Moreover, it is clear that our extradition system is sorely in need of reform and modernization. However, if we pass this legislation in its current form, we risk undermining the fundamental purposes of extradition. This legislation increases the power of the executive branch to determine who should be extradited to a foreign government. It prohibits courts from inquiring into allegations that a foreign government is seeking extradition in order to prosecute a person for his religious or political opinions. This has been the traditional role of our independent judiciary and I believe it should continue. This legislation will allow a court to hold an individual for at least 10 days based upon a mere request of a foreign government with no supporting evidence. In the interests of "efficiency and uniformity," this legislation will permit the abridgment of the human rights of not only our own citizens but of those of political refugees from oppressive regimes abroad.

Mr. Speaker, my distinguished colleague from Michigan (Mr. CROCKETT) intends to introduce a series of amendments to this resolution which will provide the necessary specificity the current bill lacks. Those amendments will restore the important role the courts currently play in our extradition process and allow a clear differentiation between terrorism and political refugees. The amendments will avoid the situation in which the extradition process could inadvertently assist oppressive regimes in their persecution of political dissidents. They will assure that accused persons are treated justly and that trial abroad of an extradited person will be only for the extraditable offense.

Mr. Speaker, I believe all of us in the Congress should give this legislation the careful consideration it deserves. We should accept the amendments put forward by my colleague from Michigan in the interests of preserving our tradition of due process and respect for civil liberties. It would be a tragedy if this ill-worded legislation were to lead to extraditions of genuine political refugees and thereby implicate the United States in their victimization. American interests would hardly be well served by such an eventuality.●

LET US GET DRUNK AND DRUGGED DRIVERS OFF THE ROADS

HON. ROMANO L. MAZZOLI

OF KENTUCKY

IN THE HOUSE OF REPRESENTATIVES

Tuesday, September 21, 1982

● Mr. MAZZOLI. Mr. Speaker, for most people, holidays like Labor Day, Thanksgiving, and Christmas are joyous times—times for rest, relaxation, traveling, spending time with family and friends.

Not so for a segment of our population. For many the coming of holidays—any holiday—means fear, grief, and bad memories. Memories of loved ones killed or crippled in auto accidents involving drunk drivers. For without fail, every holiday the incidence of this national tragedy—this national disgrace—increases.

This is why I have added my name as a cosponsor to legislation designating the week of December 12 as "National Drunk and Drugged Driving Awareness Week." I urge any of my colleagues who have not yet expressed their support for this worthwhile legislation to do so as soon as possible. It seeks to call public attention to this thoughtless slaughter on our highways right before the peak season—Christmas and New Year's. Maybe it will save some lives. Maybe yours or your family's.

Soon the House will be considering H.R. 6211, the Surface Transportation Act. This legislation contains a provision which seeks to reward States which take effective steps to combat drunk driving with grants for highway construction. The Senate passed a similar measure on May 11. I hope my colleagues will join me in supporting this important measure, also.

Earlier this month—over the Labor Day weekend—the Louisville Courier-Journal magazine and its staff writer, Elinor Brecher, did a powerful feature on drunk driving. I would like to share with my colleagues some of the heart-wrenching cases documented in Kentucky alone. All this week I will be inserting excerpts into the RECORD. Hopefully my colleagues will read and heed.

[From the Courier-Journal Magazine, Sept. 5, 1982]

DRUNKEN DRIVERS

(By Elinor J. Brecher)

One out of 10 cars on the road this Labor Day weekend will be driven by someone who is drunk. Scores of innocent people will cross their path. For them, the penalty for being in the wrong place at the wrong time could be death or serious injury. If past experience is an indication, many of the drunks won't pay any penalty.

Her name was Sarah. The snapshots show a beguiling, big-eyed moppet with platinum-blond curls. Here she is in a Halloween costume, here in play clothes, here in diapers. She was the Kentrups' only child, 2 years, one month old when she died.

The Kentrups, of Covington, had been on a short trip to Cincinnati last Dec. 14. Sarah was strapped in her infant car seat. Her parents, who had never left her with a baby sitter or allowed her to eat "junk food," had placed her in the front seat, safer than the back because it had a more secure harness belt.

At 7:38 p.m., a car traveling west in the eastbound lanes of Interstate 275 near Highland Heights, Ky., slammed into the Kentrups' year-old compact. The car, which had been pursued by a Cincinnati police officer flashing his blue lights, had already sideswiped another vehicle. The Kentrups, both 30 at the time, were seriously injured—concussions, broken ribs, fractured arms, wrists and ankles, hip and facial injuries. They weren't allowed painkillers because of the blows to the head, but none of that comes close to the agony that wracks them when they speak of the little girl who used to pad around in her daddy's slippers. The tears come as the young parents tell how the Christmas gifts they'd already bought for Sarah were taken to a charity for needy children on Christmas Eve.

"I wish I had to worry about where to get money for her college education," Ed Kentrup said, his eyes welling up. "I'd give anything in the world to have those kinds of worries."

"Just one more time. If I could hear her yell, 'Mommy' just one more time," his wife said, sobbing softly.

Officer Ernest G. Pretot of the Southgate, Ky., police department witnessed the aftermath of the crash and later wrote that it "has gotten to me I think more than anything in my 20 years of police work.

"What do you tell a mother who is trapped in the wreckage and who keeps asking you over and over, 'Where is my baby? Is my baby all right?' The patrolman answers, 'Yes ma'am, your baby is going to be OK,' but deep down you have a gut feeling that it is not going to be all right."

Joseph Elwood Fritz, 56, who had at least three prior drunken-driving convictions, was charged with murder, driving under the influence, assault and reckless driving. Police found a vial of clear liquid between the man's legs that contained 37 percent ethyl alcohol. His blood alcohol level was recorded at .23, more than twice the legal limit of .10.

Fritz's attorney, Joseph Condit, repeatedly told a Campbell County jury that because of Fritz's nearly 30 years of alcoholism, he could not be considered a murderer. The jury apparently agreed and on July 12 found Fritz guilty only of reckless homicide and driving under the influence. He was sentenced to five years in prison and fined $500. His conviction in Kentucky has no bearing on his Ohio driver's license.

"I can't believe that this society is so twisted and warped," Mrs. Kentrup, now a Northern Kentucky leader of Mothers Against Drunk Drivers, said the next day. "Now he knows he can get away with murder. He's dancing around the law, and this will only encourage drunks to sidestep the law. . . . If you want to be an alcoholic, that's your business, but the minute you get behind the wheel of a car, that's my business. I am vulnerable to what you may do.

"If the world is supposed to feel pity for the drunken driver, I guess we should all become drunks. We all agree that alcoholism is a disease, but that it's not an excuse. Everyone is responsible for his own actions. . . . He'll be paroled in a year or less—less time than it took us to bring him to trial. The jury never considered parole. They just thought, 'Oh, the poor alcoholic.' "

The couples' attorney, Kurt Phillips, said he is exploring the possibility of suing the bar in Georgetown, Ohio, where Fritz had been drinking, under an Ohio law that imposes civil liability on the person who serves liquor to someone who causes a drunken-driver crash.

Through a civil suit, the Kentrups collected on Fritz's insurance, according to Phillips, who added that all the rest of the Fritzs' property is in his wife's name.

"Most drunks are judgment-proof," Phillips said. "They have nothing."

Mrs. Kentrup said she isn't sure how to deal with what's happened.

"What kept me going was that justice would be rendered and he'd be put behind bars. . . . The bitterness scares me. I'm afraid I'll be blinded by it."●

MICHIGAN'S SUPERINTENDENT: AN OUTSTANDING LEADER

HON. WILLIAM D. FORD

OF MICHIGAN

IN THE HOUSE OF REPRESENTATIVES

Tuesday, September 21, 1982

● Mr. FORD of Michigan. Mr. Speaker, I call to my colleagues' attention an excellent article on Dr. Phillip E. Runkel, Michigan's superintendent of public instruction, in the September 8, 1982, edition of Education Week. Since he was first appointed by the State board of education in 1980, Dr. Runkel has proven time and time again what a truly committed educator can accomplish. In a very concise manner, this article accurately portrays a very sensitive advocate who is not afraid to speak out strongly on behalf of our State's school children

I am truly honored to count Dr. Runkel not only among my friends, but also among those with whom I share a sincere interest in the future of our Nation's education system.

PHIL RUNKEL'S ONE-MAN CRUSADE TO SALVAGE MICHIGAN'S SCHOOLS

(By Glen Macnow)

DETROIT.—The threats against Phillip E. Runkel began a few days before he visited the financially distressed Alpena school district last fall.

Residents of the Northern Michigan fishing community had twice rejected tax proposals needed to keep their schools open. Some resented a state bureaucrat's coming to town to campaign for higher taxes. A few warned the 54-year-old Mr. Runkel, the state's superintendent of public instruction, that he might get hurt in Alpena.

When Mr. Runkel rose to speak at a packed meeting of the local school board, he was greeted with boos. "I hear someone wants to fight me," he said, rolling up his sleeves. "Who plans to be first?"

The crowd was silenced. When Mr. Runkel finished speaking 15 minutes later, most had been won over to his side. Voters approved a tax hike that week. Runkel has been winning people to his side since being appointed in 1980 to head the nation's most economically troubled state system of public education. The hyperkinetic educator has galvanized a department previously regarded as ineffectual, and in the process he has become one of Michigan's most-talked-about public figures.

Spurred by the ongoing fiscal crisis in the state's schools, Mr. Runkel has changed the Michigan Department of Education from a conduit for federal funds to an activist force. Unlike his predecessors, he has been aggressively vocal in pushing what he regards as the interests of the state's 1.8 million students.

"I can't sit in my Lansing office shuffling papers while schools in this state are going bankrupt," Mr. Runkel says.

"It's against my nature not to get get down in the gutter where the fighting is taking place."

HAS LOBBYING ROLE

Education spending in Michigan is controlled by the state legislature and local school boards, so Mr. Runkel's role is largely that of lobbyist. And lobby he has:

Last year, Mr. Runkel made what many considered a politically unwise move by opposing a tax-cut plan sponsored by Gov. William G. Milliken. When the Governor's aids made their displeasure known, Mr. Runkel took the lead in organizing opposition to the plan. It was rejected by voters.

The superintendent has learned to persuade, cajole, and occasionally bully state legislators on school-funding issues. He was a central figure in behind-the-scenes lobbying last Wednesday when state lawmakers rejected the Governor's plan to cut $150-million in aid to elementary, secondary, and higher education. (The Govenor plans to try again.)

"He's a tremendously effective spokesman for his field," says Jack Faxon, a Democrat from surburban Detroit who chairs the state senate's education committee. "He knows the facts and figures, but more than that he knows how to persuade people."

Mr. Runkel has thrown himself into the thick of do-or-die tax battles in a half-dozen local districts that were short of funds to keep schools open. Realizing that many voters have lost faith in local officials, he has ordered unprecedented audits of the districts' operations, made cost-cutting suggestions and opened state-staffed "information centers" to deal with angry citizens and to push tax referendums. The results so far: four victories in four campaigns.

Mr. Runkel's newest idea is "Project Outreach," a program designed to get citizens involved before schools and financial crisis. Over lunches of hamburgers and French fries, Runkel meets with high-school students to ask their opinions of their education. He travels extensively throughout the state to speak to parents' groups, bingo-night crowds, and senior citizens' organizations.

"My goal is to convince people that a good public education system is a major factor in our quality of life," he says. "As the population grows older and school enrollment declines, it becomes increasingly important to convince people that everyone has a stake in the public school system."

Michigan's school system is indeed losing enrollment—about 20 percent over the past decade.

State and federal aid cuts have cost the state's school districts an estimated $500 million in the past two years. More cuts are expected as long as Michigan's auto-based economy remains stagnant.

"I can't lie and predict anything but a gloom-and-doom year for schools," Mr. Runkel says. "But we've got to try to come out of this depression with as much as we can save. We've got to keep people caring."

Mr. Runkel has been caring about schools for more than 30 years. He has been a teacher, basketball coach, junior-high-school principal, and superintendent in two Michigan districts. He was head of the American School in Athens, Greece, when the state board of education appointed him to the superintendency in January 1980.

Mr. Runkel likes to boast that he never lost a school-tax election while running the districts of Utica and Grand Rapids. In Utica, he persuaded voters to approve what was then the largest school bond issue in the history of the state.

KNOWS HOW TO DEAL WITH MEDIA

His public-relations aide, Tom Farrell, says much of his boss's success stems from a keen knowledge of how to deal with the media.

"He gets his point across even in the bad-news stories," Mr. Farrell says. "And he makes the reporter feel that he or she can be part of the solution."

Mr. Runkel's method of dealing with people is usually on the run, always between drags on an omnipresent cigarette. When not working his usual 12-hour day, Mr. Runkel is often found relaxing in front of his television watching a basketball game or at the theater.

Mr. Runkel now faces a new fight, perhaps his toughest—a campaign to consolidate Michigan's 529 school districts to fewer than 200.

"With enrollment declines, it's becoming impossible for most of the districts to offer viable programs in areas like vocational education and gifted and talented education," he says. "We could save money and improve education if we could get some of these districts to merge."

Last year, a group of school leaders from Western Michigan talked of a campaign to run Mr. Runkel for governor. The campaign never got off the ground, but it was taken seriously. That alone demonstrated how highly regarded Phil Runkel is in Michigan.●

A TRIBUTE TO RUSSELL ANGLIN

HON. NORMAN Y. MINETA

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, September 21, 1982

● Mr. MINETA. Mr. Speaker, I am saddened yet proud to rise today in honor of a constituent in my district who recently passed away. Mr. Russell Anglin died on August 14 but the legacy he left his fellow citizens will continue to bring benefits to us all for years to come, for he was a member of that shrinking fraternity of individuals who are called inventors.

Russell Anglin was born on a farm in Kentucky in 1916 and went to work in the Appalachian coal mines at an early age. His mind was not content to toil in the mines and, being intrigued with the development of the radio and the infant known as television, he began a program of self-education to learn how these devices worked. He soon found himself fixing radios for his neighbors and decided to open his own repair shop.

Russell Anglin was successful in this enterprise, but did not stop at simply fixing other people's sets. As he came to understand the technology, he began to perceive that improvements could be made, and so he undertook small efforts at invention. He developed several items which were particularly helpful in making television both better and safer. Unfortunately, the daily demands of work made it impossible for him to devote a great deal of time to invention. First as a self-employed repairman, and later, as a technician for the FMC Corp., he continued to develop ideas in his spare time, but was never able to dedicate to them the effort they deserved.

That situation changed in 1974, though it was not at first clear that the change was for the better. Russell Anglin suffered a series of heart attacks and in 1974, the condition of his health required him to retire, though his mind was still as active as ever. Wondering what to do with his suddenly bestowed spare time, Russell Anglin realized that he could now pursue his passion for inventing, and that is exactly what he did in the last years of his life.

When he retired, he was living in San Jose, where FMC had transferred him in 1965. He was soon spending many hours each day in the workshop he had set up in his garage. In short order, he was turning out the inventions which had been simmering in the back of his mind for so many years.

At his death, Russell Anglin left a prodigious list of useful items which have made their way into popular use. Among his creations are:

A device to maintain color quality in television;

A lightning arrester to dissipate the effects of lightning when it strikes an outdoor television antenna;

A device for starting cars with dead batteries, which connects to the cigarette lighter in an automobile; and

An electronic tool for testing the ripeness of watermelons.

Russell Anglin's life left little doubt about the ability of individuals to contribute to the betterment of our world. As an entrepreneur, inventor, or employee of others, he demonstrated the spirit of creativity which has made our Nation great. Similarly, as a husband to his wife of 46 years, Pauline; as a father to four children; as a member of the board of directors of the California Inventors Council, and as a member of the American Inventors Council, Russell Anglin was a source of strength and enlightenment to others.

Mr. Speaker, I ask you and all the Members of this House to join me in paying tribute to Russell Anglin. He is a man whose talents will be missed and from whose life we should take a measure of inspiration. Thank you.●

PRESIDENT CHUN'S PLAN FOR PACIFIC SUMMITS

HON. JOEL PRITCHARD

OF WASHINGTON

IN THE HOUSE OF REPRESENTATIVES

Tuesday, September 21, 1982

● Mr. PRITCHARD. Mr. Speaker, on July 31, 1982, President Chun Doo Hwan of the Republic of Korea proposed that the leaders of the nations of the Pacific Community meet annually to discuss matters of mutual concern to those nations lying within the Pacific Ocean basin and to consult on ways and means for mutual cooperation among the Pacific basin nations.

This is a farsighted and statesmanlike proposal. We are all aware of the fact that the nations of the Pacific basin are advancing rapidly as an economic center of the world. In 1979, American trade with those nations lying within the Pacific basin exceeded, for the first time in history, total American trade with the nations of Western Europe. The total exports of manufactured goods by the newly industrialized countries of Asia—South Korea, Taiwan, Hong Kong, and Singapore—are now one-third greater than those of the remaining newly industrialized countries of the world; namely, Mexico, Brazil, Spain, Portugal, Greece, and Yugoslavia. It appears inevitable that by the year 2000, the combined industrial power of Japan, South Korea, Taiwan, Hong Kong, Singapore, and Malaysia will be far greater than that of the United States or Western Europe.

It is imperative, therefore, that the United States become an active and vigorous partner of its neighbors in the Pacific region. We must, I believe, heed President Chun Doo Hwan's proposal for the establishment of a regular and systematic consultative apparatus to plan for the future of the Pacific basin.

I, therefore, enclose for inclusion in the RECORD, President Chun Doo Hwan's farsighted proposal. The text of his proposal follows:

PRESIDENT CHUN'S PLAN FOR PACIFIC SUMMITS

The following is the text of the portion of the President's news conference on July 31 in which he described his plan for annual Pacific summit meetings:

First, I believe the shortest way to overcoming various restrictions, obstacles and challenges lying in the way of the realization of the Pacific age is the introduction of a systematic consultative apparatus under which top leaders of Pacific-rim countries can meet periodically to discuss matters of mutual concern and consult on ways and means of mutual cooperation.

Needless to say, summit diplomacy is the most effective way to solve most difficult and urgent nation-to-nation problems.

Second, it is my hope that this consultative organ will, in principle, open its door to all the countries in the region.

Third, I think that respect of sovereignty and independence, reciprocity, equality and noninterference in the internal matters of other countries should be the basis of relations among the countries in the region. I also think that hegemony by any country should not be accepted and the organization should not be politically tainted or become a bloc.

Fourth, I feel that the question of exploring the endless potential which the regional countries have for multilateral development and expansion of trade, reinforcement of economic and technological cooperation manpower development, expansion of communications networks and increasing educational and cultural exchanges could be the key concerns of the consultative organ.

Fifth, I believe firmly that cooperation between advanced countries and developing nations and an increase in the cooperation among developing countries in the region will, if deepened, be able to set an example for solving the so-called South-North question.

The successful materialization of a Pacific summit conference will require consent by the countries in the region.

LEGAL ASSISTANCE TO SMALL BUSINESS

HON. RONALD V. DELLUMS

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, September 21, 1982

● Mr. DELLUMS. Mr. Speaker, I would like to bring to the attention of my colleagues an exceptional individual, Timothy H. Fine, and a new and noteworthy organization that he has founded. I believe that its creation will be of interest to the many small businesses throughout this country that need someone to fight for their rights.

I would like to insert this article from the July 1982 issue of INC. into the CONGRESSIONAL RECORD.

NEW DEFENDER FOR SMALL BUSINESS

Small business deserves its day in court. So thinks San Francisco lawyer Timothy H. Fine, founder of the Small Business Legal Defense Committee, a new organization set up to defend the rights of small companies.

The group's mission, explains Fine, is to make sure the government follows the Small Business Economic Policy Act of 1980. That law says all federal agencies must "foster the economic interests of small businesses . . . assure that adequate capital and other resources at competitive prices are available to small businesses; reduce the concentration of economic resources and expand competition; and provide an opportunity for entrepreneurship, inventiveness, and the creation and growth of small business." Granted that's a tall order—but it's the law.

Fine, who has spent his career representing small firms, says he founded his committee to defend small businesses before legislative, judicial, and executive bodies and also keep the 1980 act in the federal limelight. Fine expects to sign up 5,000 members over the next two years, at membership fees ranging from $100 to $300.

For now, Fine's attention is focused on the Justice Department. "Attorney General William French Smith and William F. Baxter, assistant attorney general in charge of the Antitrust Division, have declared open war upon the small businesspersons of the United States," Fine says. "They have brought down the curtain on antitrust enforcement and indicated that monopoly is a virtue."

In its first legal action, the committee filed an *amicus curiae* ("friend of the court") brief in the antitrust case of *United States of America* v. *Mercedes-Benz of North America Inc.* In 1979 the Justice Department had filed suit against the company for forcing auto dealers who carry Mercedes cars to also buy Mercedes-Benz replacement parts. But last March, Baxter decided to drop the case, arguing that the tie-in arrangement did not harm competition, because it did not give Mercedes any additional market power.

In opposing Baxter's action, the Small Business Legal Defense Committee told the court: "The specific harm to the small businesses precluded from competing with Mercedes-Benz . . . is obviously of no concern to Mr. Baxter's department. . . . There is no indication here that Mr. Baxter's division has paid the slightest attention to [the Small Business Economic Policy Act]."●

REBUILDING AMERICA

HON. WILLIAM F. CLINGER, JR.

OF PENNSYLVANIA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, September 21, 1982

● Mr. CLINGER. Mr. Speaker, I would like to bring to the attention of all my colleagues an incisive and compelling article by David B. Richardson which appeared in the U.S. News & World Report of September 27, 1982.

Mr. Speaker, I submit to you that the crumbling condition of our bridges, highways, and water and sewer systems is an issue of critical importance. A Congress concerned about economic development and jobs cannot afford to overlook this issue. I urge my colleagues, as we undertake a review of the budget process, to consider a national capital budget as a mechanism for improving the decisions we make regarding our public facilities.

I commend this article to the House of Representatives, and I request that it appear in the RECORD.

[From the U.S. News & World Report, Sept. 27, 1982]

TO REBUILD AMERICA—$2.5 TRILLION JOB

Bridges, ports, roads, sewage disposal—these and other underpinnings of U.S. life and economy are eroding from long neglect. Repairs will be costly, but, say experts, more delays could be disastrous.

At a time of lingering recession, another cloud now looms over the U.S. economy. A creeping crisis in the nation's long-neglected and decaying public works that can only be solved by trillions of dollars in new spending.

Crumbling highways, rusting bridges, backed-up sewers, leaking water mains, bursting dams, broken-down buses and subway cars—these and many other basic problems have been building up for a decade and a half, while the country occupied itself with other concerns. Now the troubles of public works, which economists call the infrastructure, have accumulated to the point where they pose a growing obstacle to a sustained national recovery.

"Much of America's infrastructure is on the verge of collapse," warns Pat Choate, senior policy analyst for the conglomerate TRW, Inc., and a congressional adviser. "Yet American business and farming depend absolutely on the smooth functioning of public works. If producers cannot get their products to market on time, prices increase and competitiveness declines. If basic services such as water supply or sewage are limited, then firms are hampered in their ability to expand and provide more jobs and income."

Suddenly, policymakers in Washington, state capitals and city halls are starting to give urgent attention to the erosion of America's basic underpinnings. The consensus of experts: It will take a staggering amount of money over many years to stem the spreading decay and reconstruct America's time-ravaged economic base.

Choate estimates that local, state and federal governments would have to spend from 2.5 to 3 trillion dollars this decade—slightly more than all planned defense outlays in the same period—just to maintain today's level of service on public facilities. At present spending levels, he says, less than a third of that renovation can be done.

The most costly items on a list Choate presented to a congressional group:

Highways and bridges outside urban areas, 1 trillion dollars.

City streets, 600 billion.

Municipal water systems, 125 billion.

Ports and inland waterways, 40 billion.

Constructing and renovating up to 3,000 prisons and jails, 15 billion.

Water-pollution controls to meet current standards, 100 billion.

"Rebuilding the nation's public infrastructure," concludes Choate, "promises to be the single most expensive government challenge of the 1980s and 1990s."

To speed efforts to cope with the developing crisis, a bipartisan coalition in Congress is pushing for creation of a "national capital budget." This would require the administration, as a beginning, to take a first-ever inventory of public works throughout the country, with a view to assigning priorities for refurbishment and new construction.

In state and city governments, which in recent years have been contributing an average of 75 percent annually on spending for public works, officials are wrestling with the unsolved problem of how to increase the funds available to rebuild the aging infra-

structure. Total spending in this field, measured in constant 1972 dollars, has declined 19 percent since 1965, while the nation's gross national product has risen 62 percent.

Finding the additional money now has been made more difficult by a flight from cities to suburbs, which has reduced municipal revenues. Adding to the pinch are stiffening local tax resistance during the business slump and an escalation of interest rates on new bond issues.

Yet strong doubts exist that President Reagan can be persuaded to make any significant increase in federal funds for public works. In fact, the White House is pressing for cutbacks in subsidies to mass-transit systems and reduced federal spending in other fields, while urging state and municipal authorities to take on more of the burden with help from private enterpise.

DAILY HAZARDS, BREAKDOWNS

For many Americans, the consequences of a decaying infrastructure are becoming more apparent almost daily:

In Jersey City, N.J., the water supply ran out in midsummer for the city's 223,000 residents with a rupture in a main of the 82-year-old water system. It took five days to restore drinkable water, as National Guardsmen ladled out supplies from tank trucks.

In Colorado during the same month, 80-year-old Lawn Lake Dam gave way, sending 250 million gallons of water cascading through the Rocky Mountain resort town of Estes Park. Four people were killed, and property damage from the flood ran to 21 million dollars.

Many communities now live under the daily threat of a failure of one vital public facility or another. In Cleveland, that danger is the 43-year-old Main Avenue Bridge, the main traffic artery to downtown from western Cuyahoga County. The bridge has recently shown such signs of decay that authorities closed it six nights for temporary repairs. Such repairs have cost 1.7 million dollars in the last three years, and contracts worth $600,000 more are to be let soon.

"It's a crime spending this money, because we're just putting bandages on the bridge," says Cuyahoga County Engineer Thomas J. Neff. "But closing it would be catastrophic in traffic terms, and we simply can't find the 30 million dollars it would take to rebuild."

In Phoenix, the big worry is the sudden appearance of cracks in the earth, as long as 400 feet in one residential neighborhood. A road sign outside the city depicts a car plunging into a crevice and warns drivers they are entering a "subsidence area." The fissures are a direct consequence of large-scale pumping from aquifers to meet increasing water demands in the fast-growing Arizona city.

These are but a few of the problems caused by an infrastructure that has long served the country well but now shows the effects of years of heavy usage and neglect. As John Wiedeman, president-elect of the American Society of Civil Engineers, puts it: "Virtually every part of the country has its own horror story." The full extent of the challenge of decaying public works is emerging from recent studies by government officials and private experts.

A CATALOG OF TRANSPORTATION WOES

Some 8,000 miles of the nearly completed 42,944-mile interstate-highway system—begun in the 1950s—are crumbling and must be resurfaced, says a new official survey. Pavements erode in 15 years or less, mainly because of trucks and heavy traffic. At the current rate, 2,000 miles more of the interstate-highway system is wearing out every year. A new congressional study puts the cost of completing and renovating the highways at 54.8 billion dollars.

Even more serious decay is attacking 3.9 million miles of roads totally supported by states, counties and cities. A recent study by the Road Information Program, a Washington research group, showed that almost two thirds of the major roads need resurfacing or rebuilding. Nearly 45 percent of the nation's 557,516 bridges are classified in a recent official report as "either structurally deficient or obsolete." These include 26 percent of the bridges on the federally aided road system that carries most of the nation's traffic.

Of the total of officially "deficient bridges," 126,655 of those are so unsafe as to be restricted by federal law to light vehicles—no buses, trucks, truck trailers, vans or fire engines—or closed to traffic altogether pending rehabilitation. At least 3,416 bridges have been closed for repairs or for good. The Transportation Department places the cost of replacing or rehabilitating all bridges at 47.6 billion dollars. To help state and local governments foot that bill—they finance about 60 percent of bridges costs—the Highway Users Federation has urged Congress to triple the present rate of federal funding through the federal Highway Trust Fund. The fund takes in about 6.6 billion dollars a year in fuel taxes and highway-user charges—but is already so heavily committed to various projects that it is running a deficit.

The nation's bus and subway systems also are hard pressed for money to fight spreading obsolescence. So critical is the deterioration in urban-transportation fleets that transit officials in a quarter of the 300 cities with such services say they might have to cease operations by 1985 if a threatened cut in federal support goes through. Their target: A Reagan administration proposal to cut out all federal operating subsidies, which at 1.1 billion dollars annually now cover 15 percent of transit costs.

Even at current federal-support levels and with recent fare increases in some places to as high as 90 cents, transit budgets fall far short of meeting rising labor and equipment costs. The resulting limits on maintenance and repair are causing buses and subway cars to break down with increasing frequency. San Francisco recently had to shut down its 100-year-old cable-car system, a major tourist attraction, for 20 months for a "total renewal."

A survey by the American Public Transit Association concludes that within this decade 72 percent of all transit buses and 28 percent of all subway cars must be replaced. Transportation Secretary Drew Lewis places a price tag of 40 billion dollars to maintain the operational level of transit systems through the 1980s. To help urban authorities raise the money, he favors increasing gasoline taxes for automobiles by 4 cents a gallon and for heavy trucks by 1 cent a gallon. Neither the White House nor Congress seems ready to embrace that proposal.

Ports and inland waterways are suffering the consequences of a five-year lapse in federal authorizations for needed improvements. Commercial users seek more channel dredging to reduce harbor congestion and cut the rate of accidents. Especially sought is a renovation of old locks. "Unless critically deficient, aging, undersized locks are replaced or improved," warns Charles T. Jones, president of Amherst Industries, a Charleston, W.Va., coal shipper, "the safe and efficient movement of coal and other bulk commodities on the inland waterways will be in danger."

Jones points out that while three nations ranking as leading U.S. competitors in the world coal market have channels deep enough to accept larger coal vessels, the only one in this country is far from coal sources, in Long Beach, Calif.

DISAPPEARING WATER, BACKED-UP SEWAGE

Leakage from aging pipes is costing New York, Boston, Buffalo and other cities as much as a third of their water supplies between reservoirs and faucets. Of the nation's 43,500 dams, 9,000 are reported in need of safety improvements. Water problems are so widespread, according to one official report, that 756 urban areas face a bill of 63 billion dollars to repair or replace existing facilities. Meanwhile, the leakage is cutting into revenues from usage that might pay for new piping. Many cities warn that they will experience funding shortfalls even if water rates are doubled.

In the sun belt, a number of fast-growing cities and rural areas find themselves unable to keep pace with expanding water needs. One study for a congressional group warns that the old dust-bowl region of the central plains, which accounts for 23 percent of the nation's irrigated farmland and produces more than 40 percent of its processed beef, is in danger of depleting its water sources.

Regional officials complain that they haven't had an authorization for fresh federal aid for water projects since 1972. They warn that new water sources must be developed by the end of the decade to avoid declining yields of important export crops.

The nation's sewage-treatment systems are high on the list of decaying public works. Responding to a National League of Cities survey, 48 percent of local officials reported their sewage and drainage facilities in need of major rehabilitation or replacement. The Environmental Protection agency estimates that by the year 2,000, 38 billion dollars will be required for replacement of sewers and 17.7 billion more for replacement of treatment plants.

Problems of sewage backups. At present, federal grants cannot be used to help meet the soaring costs of maintenance and repairs. Pressures are mounting for a change in that policy as residents of Chicago, Albuquerque and other cities experience sewage backups into their basements during heavy rains. Orlando, hard pressed to cope with one of the country's highest rates of growth, has no place but a local stream to empty its-sewage after treatment.

Prisons head a long list of public buildings suffering serious deterioration. Of a total of 3,500 prisons in the country, 3,000 are so old and structurally inadequate as to need major renovation or expansion.The problem has been compounded by a sharp rise in the number of prisoners—a 12.1 percent jump in 1981 alone—caused by a nationwide trend toward tougher sentencing and a hold-down on paroles.

Estimates of what it would take to build or renew prisons to keep up with needs range from 10 to 14 billion dollars. With the necessary funds lacking in many cities and states, officials have had to require doubling up in small cells, the transfer of some prisoners to makeshift quarters—and, in Florida and Maryland, even the early release of

prisoners serving short terms to make room for new convicts.

In Albuquerque, some of the 400 inmates now crowded into a jail that was built for 325 will soon share temporary quarters in a nearby mental institution, pending a prison-expansion program.

A HIDDEN AGENDA OF NEGLECT

Why have local, state and federal authorities allowed this steady deterioration of the nation's vital infrastructure? George Peterson, director for the Public Finance Center of the Urban Institute, holds the view that "in too many areas of government, public works constitute a hidden agenda of neglect."

Agreeing, one former local official observes: "For many years, the ruling philosophy has been, 'We'll take care of that later.' The tendency has been to take public works for granted, as though these never wear our."

Another obstacle is seen as Washington's traditional pork-barrel approach to public-works funding. Too often, experts charge, congressional appropriations for local improvements or construction are promoted by politicians for patronage benefits and political clout at the expense of projects that technical studies deem more necessary.

"Every politician likes to cut a ribbon," notes Representative William Clinger, Jr. (D-Pa.), a leading proponent of infrastructure reform, "whether it's to open a new bridge or dam or highway or public building. Few have been as interested in the less visible work of keeping up the sewers or replacing the water pipes or the subway cars."

For this neglect, analysts say, the ordinary citizen bears at least part of the blame. Opinion polls show a majority of Americans support the trend toward tougher prison sentences, for example, yet bond issues to build more prisons have been voted down in New York and some other states. Dallas voters, seeking a modern mass-transit system, rejected local financing to speed the project. Nationally, local voters approved nearly 80 percent of proposed bond issues in the 1950s, but in the 1970s they backed barely more than 50 percent.

Even on approved projects, long delays caused by bureaucratic red tape escalate costs though inflation. The Tennessee Valley authority currently is experiencing an average eight-year delay in constructing seven new power plants—trebling production costs and hiking the total cost by 11 billion dollars. All told, the nation has a backlog of more than 100 billion dollars in uncompleted projects, increasing the tab for taxpayers by an estimated 16 billion a year.

Costs of public works are nudged still higher by widespread fraud, corruption, inefficiency and waste. In Massachusetts, a blue-ribbon panel investigating bribery and corruption reported that more than 6.4 billion dollars' worth of state and county building construction was defective, requiring 2.1 billion in changes. Among the defects: A college auditorium stage that cannot be seen from balcony seats; a jail in which cell doors won't lock; an old-age home without stairway railings and a 9-million-dollar power plant rendered unusable by a steam generating system installed backwards.

The biggest white elephant found by state investigators was a 28-story library—billed as the world's tallest—that dominates the campus of the University of Massachusetts at Amherst. Completed in 1974 at a cost of 17 million dollars, it has never officially opened or been able to receive a book because parts of bricks have been falling from its facade.

Oklahoma has had some of the country's worst corruption in public works. There, 195 county commissioners out of 231 have been convicted or have pleaded guilty to pocketing county funds for nonexistent transactions or from kickbacks on purchases of materials and equipment. In one case, investigators found a gunnysack stuffed with more than a million dollars in fictitious invoices.

Illegal practices among highway contractors led to the largest antitrust investigation in the Justice Department's history, generating 170 criminal prosecutions since 1979 for bid rigging in which construction firms manipulate the competitive-bidding process for illegal gains. These cases—involving 154 corporations in Southern and Midwestern states—have resulted in 130 guilty pleas and 10 convictions, with maximum penalties of 1 million dollars for a corporation, $100,000 for each individual plus three years in prison. Federal investigators say the 14 states covered so far are only a starter.

MEETING THE CHALLENGE

Apart from eliminating waste and fraud, what will it take to rebuild the country's widely decaying public works?

Some authorities see no alternative but another huge spending program, perhaps rivaling President Franklin D. Roosevelt's Works Progress Administration and the Public Works Administration, during the Depression. John E. Jacob, president of the National Urban League, called on Reagan in early August to loosen his economic policy with a 100-billion-dollar public-works scheme. Jacob saw three major benefits from his plan: Renovating the infrastructure to set the stage for long-term growth, providing jobs for the nation's mounting unemployed and revitalizing sluggish industry.

In another throwback to the 1930s, Felix Rohatyn, a New York investment banker, urges revival of the Reconstruction Finance Corporation to provide federally backed loans to cities for public works. "The RFC of the 1930s," he recalls, "saved banks, some cities and many businesses, thus preventing much larger dislocations. What's more, it made money for the taxpayer. If we do not take some such step to break out of our present economic straitjacket, then our infrastructure and much of our banking and industry could face much deeper trouble."

Congress is coming up with other proposals to meet the mounting public-works crisis. Most important: A plan advanced by bills in both houses to create the national capital budget. Aimed at treating the infrastructure separately from other programs to guarantee regular attention and support, the proposal is seen by many infrastructure experts as "bringing coherence to a field in disarray."

Says Representative Bob W. Edgar (D-Pa.), cosponsor of the House bill: "The nation can no longer afford to rely on pork-barrel methods of deciding where to spend on public works. The time has come to introduce more order into the whole process, so as to spend where it can do the most good." Other sponsors range a political spectrum from liberal House Speaker Thomas P."Tip" O'Neill (D-Mass.) to Representative Jack Kemp (R-N.Y.), a leading fiscal conservative. Support is also found in business circles. David Mahoney, chairman and chief executive officer of the conglomerate Norton Simon, Inc., recently told a business group: "Without such planning, we may create a bottle neck that would limit growth and economic expansion in the future."

Such proposals for dramatic action by Washington have their critics, both in and out of government. They are called "inappropriate for what must be a long-term effort" by David A. Grossman, former New York City budget director and a public-works consultant. Others label them as inflationary and conflicting with the prevailing Reagan policy of reducing federal involvement and transferring more responsibility to the states.

Moreover, many economists say such a budget would further complicate overall policymaking, among other things, by adding another bureaucratic layer to the process. David Rusk, former Albuquerque mayor says: "Federal lawmakers cannot match state and local ones at knowing the problems of public works in the field. Wherever possible, more taxing authority should be transferred to local governments—along with such incentives to voters as tax credits to ease the job of local financing."

Some American communities are making headway with new initiatives. Baltimore, Pittsburgh and Dallas are pursuing renovation programs with broadened local support, including that of private enterprise. Many experts look at a Cleveland experiment of involving county and regional authorities—along with local banks and private companies—as a possible model for other cities. In the East and Midwest, many of these cities are suffering a decline in tax revenues because of the flight to the suburbs, yet are deprived of suburban-annexation rights enjoyed by sun-belt cities.

Galveston has embarked on a 10-year plan to deepen and widen its port, to be paid for with municipal revenue bonds. Cincinnati, to assure better upkeep of its infrastructure, now requires that every new project include financial arrangements for maintenance during its engineered lifetime. By close planning and budgeting, the New York Port Authority's well maintained bridges, tunnels and other facilities contrast sharply with New York City's many run-down works.

Still, funding problems for public works loom so large everywhere—along with technical and political obstacles—that many experts now agree on a need for far-reaching changes in the whole approach if America is to overcome this developing crisis. As one consultant puts it: "All we are really arguing about at this point are means, not ends."

One trend already under way is to reduce the existing infrastructure. Just as the airlines have cut out some routes as uneconomical, recently some federal, state and local authorities have called off a few projects as nonessential. Awaiting a decision is a set of options for curtailing the final stages of building the interstate-highway system, now 95 percent completed after 25 years. The bill for finishing the project is set at 38.8 billion dollars. To one analyst, such economy moves are simply a case of "lowering our sights and learning to live within our means."

Accordingly, some doubt the wisdom of pumping more money into water projects to make the barren Western plains bloom, which some critics say will only produce a further tax burden for subsidizing the increasing food surplus.

The trouble is, as many experts warn, vital hardware such as water, sewage and transportation systems cannot be cut back easily in a vigorous nation dedicated to long-term growth. America's competitiveness and economic well-being depend on an effective infrastructure.

After a decade and a half of neglect of public works, the U.S. thus appears to have no other course but a new and immensely expensive commitment over many years to rebuild its crumbling economic foundations—and then to see that these are kept in better shape as a prime policy concern.●

TRIBUTE TO PHILIP M. ZANNELLA

HON. MARY ROSE OAKAR

OF OHIO

IN THE HOUSE OF REPRESENTATIVES

Tuesday, September 21, 1982

● Ms. OAKAR. Mr. Speaker, I would like to take this opportunity to pay tribute to Mr. Philip M. Zannella, president of the International Association of Machinists and Aerospace Workers, District 54.

For almost 40 years Mr. Zannella has been an outstanding example of service to his fellow human beings.

Mr. Zannella began his distinguished labor career in 1946 when he joined the International Association of Machinists and Aerospace Workers Local Lodge 1363 as an auto mechanic in one of the Cleveland area's Ford dealerships. He was elected financial secretary and business representative of his local in 1949.

Mr. Zannella's dedication to improving the quality of life of working people and strengthening the labor movement brought him into positions of leadership. Along with serving as President of IAM&AW, District 54, Mr. Zannella is chairman of the Grand Lodge Law Committee, secretary-treasurer of the Ohio State Council of Machinists and vice president of the Ohio AFL-CIO and the Cleveland Federation of Labor.

Mr. Zannella has actively served the people of Cleveland, the Nation, and the people across the globe in Israel.

Mr. Zannella will be honored with a testimonial dinner on Saturday, September 25. The proceeds will go to the completion of a most noteworthy project. This project is the Carmiel Youth Center located in the Carmel Mountain Range, in Galilee, the northern part of Israel. The Carmiel Youth Center was established 3 years ago by the Cleveland Trade Union Council for Histadrut. The center serves the entire area consisting of Jewish, Arab, and Druze youngsters. It will contain three clubrooms, a multipurpose room, outdoor basketball court, and a shelter.

I congratulate Mr. Zannella on a lifetime of dedicated service, and ask the Members of the 97th Congress to join me in offering our heartfelt wishes for many years of continued success.

On a personal level, I want Phil Zannella to know how much I have appreciated his support and his eminent fairness to me. As the only female member of the Ohio delegation and a prolabor supporter, I have always valued his advice and assistance. Thousands of workers will always be grateful for his dedicated, tireless service to the labor movement.●

CARMAN PRAISES STAFF

HON. GREGORY W. CARMAN

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Tuesday, September 21, 1982

● Mr. CARMAN. Mr. Speaker, I rise on this occasion in praise of my Washington and district office staff. In my time here, I have come to know a number of congressional staff persons. I have found them all to be competent, dedicated, talented, hard-working individuals. Yet, I know of no Congressman as fortunate as I am when it comes to the first rate group of men and women who serve on my staff.

I have come to know each individual, both professionally and personally. Each has shown exemplary dedication both to the House of Representatives and to me. They have worked long, hard hours in support of my public and legislative activities, and I have come to value highly their depth of knowledge and useful counsel. They deserve a great deal of credit for the work I have been able to do well in this Chamber. I rise today to extend public recognition and my own deep personal gratitude to these individuals.

I have developed a deep respect for my Washington staff. Kate Caldwell, Jeff Craven, Lee Ann Frank, Steve Heminger, Jonathan Hill, Len Johnson, Andre LeTendre, Gene Meyer, Lois McKenna, John Palafoutas, and Felice Pelosi have accomplished every task I have given them with admirable diligence and dedication. They have displayed a true professionalism in their dealings with the offices of this House, with the interests and problems of my constituents, and the numerous governmental agencies both in and out of Washington with which I have worked.

Joan Camisa, Ethel Contogine, Larry Cregan, Anthony Fabrizio, Robert Mazze, Barbara Sposato, and Nancy Wohlsen on my district office staff have served ably and well. During the past 2 years, they have developed an excellent relationship with my constituents in the Third District of New York. As I am sure every Congressman ideally desires, my district office staff has served as a highly effective liaison between me, in my congressional work in Washington, and the good people of Long Island whom I represent.

I also have learned to respect and appreciate the contributions made by the interns in my office. Ginna Calcagnini, Paul Fishbin, Lori Harmon, Maria Humeres, Lois Mary McKenna, Patricia Roberts, and Robert Shea have performed consistently well in their service to the Congress and to my staff.

When I leave this Congress, my deepest and most lasting memories will be those of my staff. We have worked hard together; we have accomplished a great deal together; we have enjoyed the thrills and shared the sorrows of public life together; we are professional associates and dear friends.

As you and I have heard sung often, "It has been good to know you," and "May the good Lord bless and keep you until we meet again."●

LUDEN'S, INC.

HON. GUS YATRON

OF PENNSYLVANIA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, September 21, 1982

● Mr. YATRON. Mr. Speaker, I rise today to recognize the outstanding achievements of a vital company in my congressional district, Luden's, Inc. On September 30, 1982, an active street will disappear in Reading, Pa. In place of the street will be an avenue, 5th Street is being honorarily renamed to 5th Avenue to recognize Luden's, Inc. for their over 100 years of community service to the city of Reading, Pa. Luden's is the maker of the "crunchy" 5th Avenue candy bar.

The city of Reading can be very proud to be the home of this important company which also makes Luden's cough drops. It is indeed fitting that Luden's accomplishments are recognized in the U.S. Congress. I know that my colleagues will join me in saluting this company's noteworthy contributions to their community.●

ARTHUR CLARKE DISCUSSES WAR AND PEACE IN SPACE

HON. GEORGE E. BROWN, JR.

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, September 21, 1982

● Mr. BROWN of California. Mr. Speaker, last month I was honored to represent this Congress at the United Nations Conference on the Exploration and Peaceful Uses of Outer Space (Unispace 1982). Also held last month was a meeting of the United Nations Committee on Disarmament. At both of these meetings, Arthur C. Clarke, the noted British science fiction writer who is presently a leading citizen in Sri Lanka, made major addresses concerning the relationship between mankind's move into space and war on Earth. I found the contribution of

Arthur Clarke to be most refreshing and insightful.

Mr. Speaker, much has been said about extending the arms race into space, and much more can be said. It is my fervent hope that we do more than talk, and instead move to curtail our headlong race to militarize space. There are peace initiatives which can be taken, some of which are described by Arthur Clarke in the following address.

I urge my colleagues to give serious consideration to the constructive suggestions which follow:

WAR AND PEACE IN THE SPACE AGE

ADDRESS TO THE UNITED NATIONS COMMITTEE ON DISARMAMENT, GENEVA, AUGUST 31, 1982

(By Arthur C. Clarke, Chancellor, University of Moratuwa, Sri Lanka; Member, Sri Lanka Delegation)

Mr. Chairman, Distinguished Delegates: It is both an honour and a responsibility to appear before you today, to discuss military activities in the last and greatest arena of human affairs.

Although this meeting is concerned with the prevention of an arms race in outer space, prevention is only one aspect of the problem. As the mathematicians would say, it is necessary but not sufficient. I shall also discuss the positive uses of space technologies for strengthening international security.

Before doing so, may I very briefly give my qualifications for addressing you. I became a member of the British Interplanetary Society in 1934, and was later its Chairman. In 1951 I presided over the first London meeting of the International Astronautical Association, and I have known most of the leading figures in the field. Only two months ago, I had the privilege of being hosted at "Star Village" by my friend Cosmonaut Alexei Leonov and his colleagues. I have written more than thirty books on space, and this month spoke at Unispace '82 as a member of the Sri Lanka Delegation.

Back in 1945, as a Royal Force Officer, I wrote the paper that outlined the principles of satellite communications and the use of the geostationary orbit. A few months later, my essay 'The Rocket and the Future of Warfare' won first prize in a competition set by the Royal Air Force Quarterly. It has been a strange experience reading that paper again after almost 40 years, and I would like to quote the lines of Shelley with which the essay began:—

Cease! Drain not to its dregs the urn
Of bitter prophecy.
The world is weary of the past,
Oh, might it die or rest at last!

Nevertheless, "bitter prophecy" is indeed what we are concerned with today. So first, I must request you—if you have not already done so—to read Jonathan Schell's book, "The Fate of the Earth," which is the most convincing account yet given of the realities of nuclear warfare. It should be required reading for every statesman.

Any yet Carl Sagan has summed up the implications of this entire book in a single chilling sentence:—"World War Two once a minute, for the length of a lazy summer afternoon."

One other reference:—I hope that you can arrange to see the BBC's recent Horizon science programme, "The Race to Ruin", which showed the first test of laser weapons on airborne targets and interviewed both American and Russian scientists on the possibilities of war in space.

This month, at Unispace '82, there was some confusion as to precisely what is meant by the "militarisation of space". There are very few of men's artefacts which cannot be equally well used for peaceful or warlike purposes; what matters is the intention. It is impossible to define a class of devices and say that "These must not be developed, because they can be employed offensively."

Let me give an example: few things would seem more remote from military affairs than the Goedetic Satellite used to detect minute irregularities in the earth's gravitational field. At first sight, this would seem to be of interest only to scientists; nevertheless, these subtle variations are of vital concern to the designers of intercontinental missiles, because unless the earth's gravitational field is accurately mapped, it is impossible to target a missile with precision. Thus purely scientific satellites, by greatly increasing the accuracy of warheads, can have a major impact on strategy. Yet does anyone suggest that they be prohibited?

Even meteorological satellites, one of the most benign of all applications of space technology, because they have already saved thousands of lives, are of obvious military importance.

Similarly, communications satellites would play an absolutely vital role in military operations. Yet neither represents a direct threat to peace.

Just as military helicopters can be used for disaster relief work, so some military space systems can be positively benign. Indeed, we might not be alive today without the stabilising influence of the reconnaissance satellites operated by both the U.S. and the U.S.S.R.

Let me remind you of a piece of recent history: in the early 1960s, there was a vigorous campaign in the United States claiming that the U.S.S.R. was far in advance in the development of intercontinental ballistic missiles. The so-called "missile gap" was a major theme in the Kennedy-Nixon campaign, and millions of words were written urging that the United States start a crash program to overcome the Soviet Union's enormous lead.

That missile gap was a total illusion—destroyed when American reconnaissance satellites revealed the true extent of Soviet rocket deployment. President Johnson later remarked that reconnaissance satellites had saved the United States many times the cost of the space program, by making it unnecessary to build the counter-force originally intended.

By a fantastic coincidence, just yesterday—in fact, on my flight here!—I discovered President Johnson's actual words, and I quote:—

"We were doing things we didn't need to do, we were building things we didn't need to build; *we were harbouring fears we didn't need to harbour.*" (My italics)

However, in a sense, that information may have come too late. One can picture the feelings of the Soviet military planners when contemplating this American debate. They knew they did not have the weapons the United States claimed, so what was the purpose of the exercise? Were the Americans deliberately creating an excuse to rearm? That might have seemed the most plausible assumption—but in fact, ignorance rather than malice was the explanation. In any event, the Soviet Union decided it must produce the missiles which, at that time, existed only in the imagination of the Americans. So the seeds of a space arms race were planted, a quarter of a century ago.

It is possible to play a numbers game with payloads and launchings to prove almost anything. Statistics indicate that the Soviet Union has now launched about twice as many "military" payloads as the United States—by 1981, roughly 860 against 420. Does this mean that the Soviet Union is twice as agressive as the United States? Not at all, because the Soviet Union's reconnaissance satellites are planned to operate for only a few weeks whereas the much bigger American satellites remain in orbit for many months. So the quantity of American reconnaissance information is probably much greater than that of the Soviet Union, a point to which we will return later.

However, photographic or TV reconnaissance is limited by cloud conditions; only radar can give all-weather coverage. And only the U.S.S.R. has used radar satellites, powered by nuclear reactors to reconnoitre the movements of ships at sea, as was revealed when Kosmos 954 crashed in Canada in 1978.

Another area of confusion and controversy is that of Landsats or earth resources satellites, which give superb views of our planet, of enormous value to farmers, industrialists, city-planners, fishermen—in fact, anyone concerned with the use and abuse of Mother Earth. The United States has made its Landsat photographs, which have a ground resolution of roughly 80 metres, available to all nations. Not surprisingly, there has been some concern about the military information that these photographs inevitably contain. That concern will be increased now that Landsat D has started operations with a resolution of 30 metres; I was stunned by the beauty and definition of the first photographs when they were shown to us at Unispace a few weeks ago. The French SPOT satellite will have even better resolution (10-20 metres) and this is rapidly approaching the area of military importance, although it is nowhere near (perhaps by a factor of one hundred) the definition of the best reconnaissance satellites under favourable conditions.

There is a continuous spectrum between the abilities of the earth resources satellites and the reconnaissance satellites, and it is impossible to say that one is military and the other is not. What matters is, again, intention.

One may sum up the situation by saying that although these satellites may be annoying to some nations, they are not aggressive: and that is the essential factor.

More confusion has now been created by the American Space Shuttle, which has been heavily criticised in the Soviet Union. It is perfectly true that many of the Shuttle's missions will be military, yet it is as potentially neutral as any other vehicle.

The one new factor the Shuttle does introduce is that, for the first time, it gives a space-faring power the ability to examine, and perhaps to retrieve, satellites belonging to somebody else, thus opening up prospects of 'space piracy'—as the Soviet Union has put it. However, one cannot help thinking that fears on this score have been greatly exaggerated. If you do not want anyone to capture your satellite, it is absurdly simple to boobytrap it and thus destroy, with very little trouble, an extremely expensive rival space system.

From past experience, I would venture a prediction in this area. When only the United States possessed reconnaissance sat-

ellites, there was a great outcry in the Soviet Union about these 'illegal spy devices'. When the Soviet Union also possessed them, this cry was suddenly stilled. In the same way, when the Soviet Shuttle is launched, perhaps we will hear no more talk of space piracy.

The essential point is that all these systems—communications, meteorological, geodetic, reconnaissance, and the Shuttle itself—though they represent some degree of militarisation of space are still, for the moment, defensive or even benign. Some countries may be upset by certain applications, but they can all live with them, accepting their benefits as well as their disadvantages. The new factor which has now entered the discussion is that of deliberately destructive space systems, i.e. weapons.

It seems to have been forgotten that the first weapons were introduced into space almost twenty years ago by the United States, which exploded several nuclear warheads above the atmosphere in tests of a possible anti-satellite system. This approach was abandoned when it led to the discovery—only recently rediscovered, to the consternation of military planners—that a few nuclear blasts in space could knock out all satellites, simply by the intensity of the radiation pulse.

This fact hovers ominously over all discussions of space weapons systems. A desperate country could blind and cripple all its enemy's satellites—as well as everyone else's—by a few large nuclear explosions above the atmosphere.

Such lack of discrimination had led to a search for precision weapons. Since as far back as 1968, the Soviet Union has made more than 20 tests of a non-nuclear anti-satellite destroyer, or ASAT, which hovers near its victim and explodes in a shower of fragments. In June 1982, it tested this satellite system for the first time in conjunction with large scale ballistic missile launches from silos and submarines.

The interesting question arises—why are the Russians so concerned with developing an ASAT system, with its obvious destabilising implications? One can only assume that the Soviet Union, which is able to obtain a great amount of information about the U.S. military establishment by old-fashioned techniques (such as buying trade magazines on the news-stands) realizes that reconnaissance satellites are much more vital to the Americans than to itself.

Predictably, the United States has not been indifferent to this Russian lead. President Reagan has now announced the development of an ASAT system much more advanced than the Soviet satellite-killers; indeed, it introduces a new dimension into space warfare.

The American weapon is launched not from the ground, but from high-flying aircraft, thus jumping up out of the atmosphere to home on a satellite as it passes overhead. This makes it very flexible and extremely difficult to intercept, as it could be launched from any point on the earth at very short notice.

Doubtless, scientists in the Soviet Union are attempting to find a counter to this system and so the insane escalation of weapons will continue—unless something can be done to check it.

Neither the U.S. nor U.S.S.R. ASAT systems will be operational for some years, so perhaps there is a last chance to prevent the introduction of offensive (as opposed to defensive) systems into space. The importance of halting this arms race before it gets truly under way will be emphasized when one realises that these planned ASATs are only the primitive precursors of systems now being contemplated. For a horrifying description of the next phase of space warfare I refer you to the recently published "High Frontier" study directed by General Daniel O. Graham. This envisages building scores of orbital fortresses to intercept oncoming ICBMs before they could reach their targets. Such a system would cost not billions, but hundreds of billions of dollars and of course would only be a stepping stone to something even more expensive.

Which leads inevitably to the subject of laser and particle beam weapons. Now that the long-imagined 'death-ray' is technically possible, it has been seized upon as a solution to the problem of defense against nuclear missiles. A vigorous debate is in progress over the practicability of such systems and the consensus appears to be that although they are theoretically possible, it will be decades rather than years before they can become operational, except for relatively close-range purposes.

However, I am always suspicious of negative judgments, because I remember vividly the debate in the United States over the possibilities of long-range rockets in the late '40s. Let me quote again the notorious pronouncement made by the chief American defense scientist Dr. Vannevar Bush in 1945:

"There has been a great deal said about a 3,000 mile high-angle rocket. . . . I don't think anyone in the world knows how to do such a thing, and I feel confident that it will not be done for a long period time to come . . . I think we can leave that out of our thinking. I wish the American public would leave that out of their thinking."

The American public did; but the Russians didn't.

If a thing is theoretically possible, and someone needs it badly enough, it will be achieved eventually, whatever the cost. And when one side develops a new system, the other will try to outdo it. The two superpowers are both led by intelligent and responsible men, yet they sometimes appear like small boys standing in a pool of gasoline—each trying to acquire more matches than the other, when a single one is more than sufficient.

It is no longer true that wars begin in the minds of men; they can now start in the circuits of computers. Yet the technologies which could destroy us can also be used for our salvation. From their very nature, space systems are uniquely adapted to provide global facilities, equally beneficial to all nations.

As you are well aware, in 1978 the French Government proposed the establishment of an International Satellite Monitoring Agency to help enforce peace treaties and to monitor military activities. This has been the subject of a detailed study by a United Nations Committee (Ref. UN Document A/AC 206/14, 16.8.81) conducted by Dr. Hubert G. Bortzmeyer. The conclusion is that such a system could well play a major role in the preservation of peace.

The operational and political difficulties are obviously very great, yet they are trivial when compared with the possible advantages. The expense—one or two billion dollars—is also hardly a valid objection. It has been estimated that its reconnaissance satellites saved the United States the best part of a trillion dollars. A global system might be an even better investment; and who can set a cash value on the price of peace?

However, the United States and the Soviet Union, anxious to preserve their joint monopoly of reconnaissance satellites, are strongly opposed to such a scheme. The British government is also lukewarm, to say the least.

Nevertheless, we have seen that in matters of great, though lesser importance, such as international communications, it is possible to have extremely effective co-operation between a hundred or more countries, even with violently opposing ideologies. Intelsat is a prime example, as on a smaller scale is Intersputnik; and in the near future Arabsat will establish its regional space system.

I like the name Peacesat, and although that has already been pre-empted by the Pacific Radio Network using ATS 1, I will use the term, with due acknowledgement, for the remainder of this talk.

Reactions at Unispace 82 and elsewhere suggest that the Peacesat is an idea whose time has come. Those who are sceptical about its practicability should realize that most of its elements are present, at least in rudimentary form, in existing or planned systems. The French SPOT satellite, with a ground resolution of 10–20 metres, has already been mentioned. Whether the superpowers wish it or not, the facilities of an embryo Peacesat system will soon be available to all countries in the near future.

May I remind my Russian and American friends that it is wise to cooperate with the inevitable; and wiser still to exploit the inevitable.

Peacesats could develop in a non-controversial manner out of what Howard Kurtz, their long-time advocate, has called the Global Information Co-operative.

This could be a consortium of agencies for weather, mapping, search and rescue, resources and pollution monitoring, disaster watch, information retrieval and, of course, communications. No one denies the need for these facilities. If they were provided globally, they would inevitably do much of the work of a Peacesat system. The only extra element required would be the evaluation and intelligence teams needed to analyse the information obtained.

The organization, financing and operation of a Peacesat system has been discussed in the UN report, to which I refer you for details. It is not a magic solution to all the problems of peace: there is no such thing. But at least it is worthy of serious consideration, as one way of escape from our present predicament—all of us standing in that pool of gasoline, making our Mutual Assured Destruction ever more assured. To quote from General Graham of the High Frontier Project: "We should abandon this immoral and militarily bankrupt theory . . . and move from Mutual Assured Destruction to Assured Survival. . . . Should the Soviet Union wish to join in this endeavour . . . we would, of course not object. . . ."

I would like to end as I began, with the conclusion of my 1946 essay, "The Rocket and the Future of Warfare."

"The only defense against the weapons of the future is to prevent them ever being used. In other words, the problem is political and not military at all. A country's armed forces can no longer defend it; the most they can promise is the destruction of the attacker. . . .

"Upon us, the heirs to all the past and the trustees of a future which our folly can slay before its birth, lies a responsibility no other age has ever known. If we fail in our generation, those who come after us may be too few to rebuild the world, when the dust

of the cities has descended, and the radiation of the rocks has died away."●

REPRESENTATIVES RODINO AND FISH TO INTRODUCE COMPREHENSIVE VICTIM AND WITNESS PROTECTION AND ASSISTANCE ACT

HON. PETER W. RODINO, JR.

OF NEW JERSEY

IN THE HOUSE OF REPRESENTATIVES

Tuesday, September 21, 1982

● Mr. RODINO. Mr. Speaker, later this week my distinguished colleague from New York, HAMILTON FISH, will joint me in introducing legislation to provide additional protections and assistance to victims and witnesses in Federal criminal cases. This is much-needed legislation.

For too many years the criminal justice system has tended to neglect the needs of crime victims and witnesses. As Bertram Gross observed in an article in the Nation:

[A] crime victim often suffers triple jeopardy. The victim suffers at the hands of the burglar, mugger . . . or arson profiteer, he suffers when he loses wages (or even his job) because of the time he must spend in court, and he suffers a third time if his cooperation with the authorities brings retaliation by the accused.

The legislation that Representative FISH and I will introduce addresses the concerns of victims and witnesses in three areas: personal safety, fair treatment, and restitution.

PERSONAL SAFETY

The bill clarifies and strengthens present Federal offenses that prohibit the use of force or threats of force in order to intimidate or retaliate against victims and witnesses. The bill also deals with harassing conduct that does not involve the use of force or threats by authorizing Federal courts to issue, upon motion of the Federal prosecutor, a civil injunction preventing victim or witness harassment. Finally, the bill requires that there be an explicit condition of every release on bail that the person released not commit a victim or witness intimidation or retaliation offense.

FAIR TREATMENT

The bill contains two provisions intended to insure that victims and witnesses receive better treatment by the Federal criminal justice system. First, the bill requires that a Federal judge receive, before sentencing a convicted defendant, information about the impact of the crime upon the victim. The bill also directs the Attorney General, within 9 months, to formulate and implement guidelines insuring that victims and witnesses will be fairly treated at all stages of the Federal criminal justice process. These guidelines are to encompass such matters as seeing to it that victims and witnesses receive prompt notification of the scheduling of hearings and trials and that property held for evidentiary purposes is returned as promptly as possible.

RESTITUTION

The purpose of restitution in the criminal justice system is to restore the victim to the victim's financial status quo before the offense—to make the victim financially whole. The bill deals with restitution in two ways. First, and most importantly, the bill encourages greater use of restitution as a criminal penalty by making restitution a criminal penalty for all offenses defined in title 18 of the United States Code. Procedures are spelled out for determining in a particular case whether restitution is an appropriate penalty and, if so, what the amount of the restitution should be. In addition, the bill directs the Attorney General to report to Congress within a year on the need for legislation to assure that a Federal felon will not derive profit from books, articles, movies and the like about the offense.

Our bill was developed in consultation with victim advocacy groups—the National Organization for Victim Assistance, the American Bar Association, and the National Coalition Against Sexual Assault—the American Civil Liberties Union, and the Justice Department. We are unaware of any opposition to its provisions, which are similar to the provisions in the bill recently passed by the Senate. The Judiciary Committee will give expeditious consideration to the legislation, and we are hopeful that it can be enacted into law before the end of the 97th Congress.

Members who are interested in cosponsoring the legislation, or who would like additional information about it, are invited to contact Tom Hutchison (ext. 6-2406) or Deborah Owen (ext. 5-7087).●

THE REVEREND THEODORE GIBSON

HON. DANTE B. FASCELL

OF FLORIDA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, September 21, 1982

● Mr. FASCELL. Mr. Speaker, the country and south Florida have lost one of the shining lights of the civil rights movement and one of the community's outstanding civic leaders. The Reverend Theodore Gibson passed away yesterday after a long and painful illness. A spiritual leader of great respect, he served his church and followers with strong faith and unfailing dedication. He rose to become a canon of the Episcopal Church.

Father Gibson served for 9½ years on the Miami City Commission and was a strong and forceful leader in all matters of city government. However, he will be remembered primarily for his untiring convictions and efforts in behalf of improving conditions for minorities and in promoting brotherhood among all races and religions.

Today's Miami Herald notes that in his days as president of the Miami chapter of the NAACP, he broke the color bar at a local beach, leading a group of blacks on a swim-in in November 1959. The suit he filed in behalf of his son led to the integration of Dade County's public schools. He campaigned to open up jobs for blacks.

He was also a leading force on the Community Relations Board and the National Conference of Christians and Jews and did much to keep Miami calm during the very difficult days of the 1960's, when other cities were torn by racial strife.

Father Gibson was my friend and counselor throughout all the years I have been in public office, so I feel a special sorrow and loss.

He was beloved by south Floridians—black and white alike. He was their conscience and their teacher, as well as a dedicated spiritual leader. His wisdom and caring will be missed by us all. I join Father Gibson's legion of friends in extending condolences to his wife and family.●

TRIBUTE TO CALVIN SIMMONS

HON. RONALD V. DELLUMS

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, September 21, 1982

● Mr. DELLUMS. Mr. Speaker, it is with deep sorrow that I take this opportunity to share with my colleagues the passing of a talented and distinguished man, Calvin Simmons, the young conductor of the Oakland Symphony. His untimely death has been a tragic loss, not only to the music world, but to our entire community.

As an accomplished conductor, he brought his music to thousands but he was always a humanitarian, a man who cared deeply about the careers of young musicians and brought the arts within reach of many people. He spent much of his time and energy to enhance the lives of others. At this time I wish to express my heartfelt sympathy to his family and to his many friends and admirers.

I would like to insert this article from the August 23, 1982, edition of the San Francisco Examiner into the RECORD.

[From the San Francisco Examiner, Aug. 23, 1982]

SIMMONS: STORY ENDED TOO QUICKLY

THE OAKLAND SYMPHONY CONDUCTOR MADE A CAREER OF SURPASSING EXPECTATIONS

(By Allan Ulrich)

OAKLAND.—Oakland Symphony conductor Calvin Simmons' apparent death Saturday evening at the age of 32 wrote the final chapter to an agonizingly abbreviated American success story.

Given the ready supply of young conductors waiting in the wings for their chance at the big time, and the voracious need for their services, the musical world at large will doubtless absorb Simmons' loss soon enough.

But it will take much longer for anybody in the Bay Area to forget. For audiences who heard Simmons conduct on one of his great nights, it will take years. For anyone lucky enough to succumb to his personal magnetism, it will probably take a lifetime.

Calvin Simmons was the local boy who made good and made history, too. He was the devastatingly precocious black kid who was on a first-name basis with seemingly half the population of Northern California. He was the gangly youngster who came up through the ranks, who touched virtually every corner of the musical community and enriched all of them. The smart, sassy presence who untimely fooled even the skeptics with the one irresistible fact:

Talent is the only excuse.

Yet it was a talent still evolving, still finding new avenues, new ways and new heroes. You couldn't fix it. You couldn't categorize it. And almost every step Simmons took, every little triumph, etched in one more detail on a portrait that now will remain tragically incomplete.

It was a career of surpassing expectations and Simmons was a master at it.

When he was 10, he wanted to get into the San Francisco Boys Chorus so badly that he played the piano for his own audition. Former chorus director Madi Bacon thought he sang abominably, but he played the piano so well and was so engaging she just had to keep him. A couple of years later, after his voice changed, Bacon kept altering his title—anything to keep him on as coach and assistant conductor.

He was hooked on music as a career. He finished Balboa High School, went east to the Cincinnati College Conservatory and to Philadelphia's Curtis Institute, where he studied conducting under Max Rudolf and piano with Rudolf Serkin.

He turned his back on the glory and came home to the San Francisco Opera, to a coaching job for the Merola Training Program, to a conducting post for Western Opera Theater and to the man whom he often called "his adopted father," the Opera's former general director Kurt Herbert Adler. Simmons won the prestigious award that carries his mentor's name in 1972.

Edward Corn, current director of the Wolf Trap Foundation for the Arts in Virginia, administered Western Opera in the early '70s and spotted Simmons' gift even then:

"Underneath all that charm, all that game-playing, was an artist who was curious about everything, one who wanted to put life into whatever he touched," he said.

Simmons' career moved quickly. He was engaged as Zubin Mehta's assistant conductor at the Los Angeles Philharmonic but enthused most about his concurrent post, running the Young Musicians Foundation Orchestra.

Conductor John Pritchard, then the music director of England's tony Glyndeboune Festival, heard Simmons at the Opera House and hired him for the music staff. Simmons spent the next four summers amid the verdant hills of Sussex, moving up to the podium in 1976, the first American conductor so honored.

The engagements piled up. The Met, the New York Philharmonic, Mostly Mozart, back to the S.F. Opera for a couple of late season "Bohemes" in 1978, and a guest shot with the Oakland Symphony. When music director Harold Farberman announced his resignation at the end of the following season, the field was quickly narrowed to Simmons and five other hot prospects. It was no contest.

Simmons would have begun his fourth season and second three-year contract with the Oakland Symphony next month. He was given a demoralized organization with a diminishing audience, and he infused the playing with a vitality and a passion that frequently gave rival orchestras a run for their classical music dollar.

Certainly, Simmons appealed to the considerable black population of Oakland. But that novelty, according to the symphony's long-time concertmaster, Nathan Rubin, quickly passed. The community judged him on his musicianship alone and so did the players. He was not found wanting.

"Calvin handled the orchestra with an understanding of mastery and how to achieve it," recalls Rubin. "In rehearsal he always sensed how to increase tension and how to relax it."

(The Oakland Symphony's administrators are meeting today to discuss the orchestra's future. Insiders say that assistant conductor Kent Nagano will most likely start the season.)

Some observers, however, thought the opera pit was where Simmons really belonged. In September 1981, he returned to the War Memorial for the American premiere of Dimitri Shostakovich's long suppressed "Lady Macbeth of Mtsensk." The evening was an unqualified triumph, musical theater at its blazing best. It led Michael Walsh of Time magazine to call Simmons one of the five best young conductors in the country.

The assessment may well have been correct. Over the years, Simmons had slowly learned to associate himself with opera productions that bore a sense of allure and prestige. The San Diego Opera's world premiere of Gian Carlo Menotti's "La Loca" with Beverly Sills in 1979 may have been a failure. But this summer's "Cosi Fan Tutte," in St. Louis, which united Simmons with director Jonathan Miller and translator Andrew Porter, was a smashing success. Simmons was to have conducted Porter's new version of "The Magic Flute" at the New York City Opera in a few weeks.

So, too, did his attitude toward the orchestral repetoire change. Mozart remained his first love, but that composer scarcely predominated in his seasons at the Oakland Symphony. He was starting to explore.

There were the Brahms and Beethoven symphonies, of course, the staples of any subscription season. But the 1982-83 programs would have found him exploring new terrain, the symphonies of Bruckner and the operas of Wagner, Mahler never appealed to him.

So many others did. It is wrenching to think about the possibilities.

On the evidence of his torrential performance of the last season, Simmons might have been the conductor to give us a Shostakovich cycle at last. After a deeply moving performance of "Jephtha" last December, he contemplated an extended Handel oratorio series.

And 20th Century British music remained ever close to his soul. Sir Michael Tippett was both a household god and an intimate friend, and when Simmons gave the West Coast premiere of that noble composer's craggy fourth symphony two years ago, he covered himself with glory.

Style as much as taste separated Simmons from the herd. No other conductor ever evinced more passionate interest in the fledgling musician. No other conductor ever visited the schools in his town so frequently or cared so acutely about the fate of music education in an age of cutbacks. No other conductor ever brought the orchestra so vigorously into the community, or welcomed the minority musician so fervently into the orchestra.

Not every performance Simmons gave was unforgettable, as he, himself, would admit. But in all of them lay the possibility of greatness. Keys turning and doors opening.

Now they are locked forever, and the music world is a smaller, duller place to visit.●

"ROLL OUT THE STONEY'S" ECHOES AFTER 75 YEARS

HON. JOSEPH M. GAYDOS

OF PENNSYLVANIA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, September 21, 1982

● Mr. GAYDOS. Mr. Speaker, on Saturday, October 9, a musical jingle that has echoed off and on for 75 years through the rolling green hills of southwest Pennsylvania, will be heard again. If you are in the neighborhood of Smithton, Pa., with a taste for the hops, you are apt to hear:

"Roll out the Stoney's,
Fetch me my beer.
Roll out the Stoney's,
That's why I'm here!"

It is the lyrical logo of the Jones Brewing Co., and it has been brewed in Smithton, Pa., for three quarters of a century by the "House of Jones," the family of William B. "Stoney" Jones.

Founded by "Stoney" in 1907 with 10 employees, the company turned out approximately 5,000 barrels of beer a year. It has grown steadily without succumbing to the lure of fad or gadget beers. Today, still adhering to the traditions of personal contact, local areas concentration and the family concept, Jones Brewing Co. employees nearly 75 people and rolls out 150,000 barrels annually.

Initially, the company brewed "Eureka Gold Crown." The name was changed in a move indicative of "Stoney" Jones' feel for people. Immigrants in the area had trouble pronouncing the brand name in English and, instead, would ask for "one of Stoney's beers." The name stuck and today is the designation of the brewery's most popular product.

The founder of "The House of Jones" was a man far ahead of his time in using community involvement in service and ethnic groups as a tool for business. Among his many interests was the sponsorship of a company baseball team that posted wins over one of the greatest teams of the era, the Homestead Grays, champions of the National Negro Baseball League.

"Stoney" Jones later turned his business over to his four sons: William Jr., Paul (the father of Shirley Jones, the famed singer and actress), Hugh and David. In turn, they passed on the reins to William B. Jones III, who heads the company today.

The Jones Brewing Co., however, is more than just family-owned. It is family oriented! Many of its employees are following in the steps of fathers and grandfathers at the plant. The October 9 observance will be a sort of "open house" for the employees and their families.

Mr. Speaker, on behalf of my colleagues in the Congress of the United States, I extend our congratulations to the owners and employees of the Jones Brewing Co., on the 75th anniversary of the firm. They exemplify the spirit and the strength of small businesses throughout our Nation.

I sincerely hope the people of southwest Pennsylvania continue to sing "Roll out the Stoney's" for another three generations to come.●

UKRAINIAN AMERICAN VETERANS RESOLUTIONS

HON. BENJAMIN A. GILMAN

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Tuesday, September 21, 1982

● Mr. GILMAN. Mr. Speaker, I want to take this opportunity to inform my colleagues of a report I have recently received from Edward Zetick, national commander of the Ukrainian American Veterans. In it, Commander Zetick echoes the sentiments held by many of us, among them, "the need to protect our democratic system . . . our obligation not only to preserve but to promote the inviolate rights and ideals guaranteed in our constitution," and "the attainment of human rights for Ukraine and all other countries."

These words are his preface to the resolutions adopted by the Ukrainian American Veterans at their annual convention this past June. I believe, Mr. Speaker, that these resolutions, which I am inserting at this point in the RECORD, quite accurately and forcefully express the sentiments of Ukrainian Americans and the many other Captive Nation peoples residing in our land:

RESOLUTIONS ADOPTED AT THE ANNUAL CONVENTION OF THE UKRAINIAN AMERICAN VETERANS HELD ON JUNE 25, 26, 27, 1982 IN NEW BRITAIN, CONN.

With the escalation of the arms race by the USSR on the one hand and unverifiable hollow proposals of reduction on the other, we favor a strong military peace-through-strength posture to counter the expensive and aggressive stance propagated by the Soviet Union.

We recognize that the Soviet Union and its satellite countries respect strength as bargaining position. We therefore recommend that the United States continue to strengthen its military capabilities, both at home and abroad, to regain its prime military position in the world.

We support the position of the government of the United States to limit the sale of high technology to the USSR, and we further urge extreme caution in other trade agreements that could be used by the Soviet Union and its satellites to strengthen its position against the free world.

Having performed actively in the service of our country and experienced the horrors of wartime, we, as veterans, see the desirability for attaining a lasting peace. However, we are opposed to a nuclear freeze which would place the U.S. in a compromising position, thus leaving the free world vulnerable to nuclear blackmail by the USSR.

We support H. Con. Resolution 205, which was recently passed by both houses of the U.S. Congress, calling upon the President of the United States to proclaim November 9, 1982 as a day honoring the Ukrainian Helsinki Monitoring Group and to use all diplomatic means at his disposal to influence the Soviet government to release the incarcerated members of that group.

We support the efforts of the U.S. Congress in their defense of Ukrainian political prisoners in the USSR such as Yuriy Shukhevych (H. Con. Res. 111), Ivan Svitlychny (letter to Brezhnev signed by 106 legislators), and other political prisoners who, at great personal risk cite violations of civil rights against Soviet citizens.

We encourage continued cooperation with AHRU (Americans for Human Rights in Ukraine) and other organizations who are actively engaged in promoting national and human rights in Ukraine and to the enhancement of the image of Ukainians through the World Congress of Free Ukrainians.

We will continue to promote aspirations for the freedom of Ukraine and other captive nations of the world, and urge participation in the various Captive Nations Week programs that are being observed during the third week of July.

To commemorate the 50th anniversary of the artificial famine created by the Soviet government in 1932-33, we encourage everyone to take part in organized programs that will be held in 1983 to remember the 6 to 10 million Ukrainians who were forcibly starved to death and to inform the general public of this Ukrainian tragedy.●

THE FAIRCHILD REPUBLIC CO.: HELPING DEFEND AMERICA

HON. NORMAN F. LENT

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Tuesday, September 21, 1982

● Mr. LENT. Mr. Speaker, earlier this week I addressed my colleagues concerning the tremendous aerospace and electronics production of the many industries located on Long Island, N.Y. As a Representative of part of this important section of our Nation, I feel it is necessary that my colleagues become better informed as to the vital role these industries play in helping build the defenses of our country.

One of the largest aerospace industries on Long Island is the Fairchild Republic Co. of Farmingdale, N.Y., which has, since before World War II, produced some of the best aircraft in the world, particularly those used in close air support. Currently, Fairchild Republic is building the A-10 close air support aircraft (CAS) for the U.S. Air Force. The A-10 is recognized worldwide for its effectiveness in knocking out armored vehicles. Its nickname, "the tank killer" is well earned, and deserved.

Fairchild Republic has recently won an Air Force contract to build a new jet trainer for the Air Force (NGT), which will replace the aging jet trainer now in use. This contract is another indication of the high regard our Nation's defense planners have for the outstanding scientific, engineering, management and production teams available on Long Island. Fairchild Republic and its versatile and accomplished subcontractors have long demonstrated their ability to help our country meet its defense requirements.

Mr. Speaker, on August 11, 1982, the Heritage Foundation issued a study entitled "Close Air Support and the Soviet Threat" prepared by Dr. Jeffrey Barlow. It makes clear the need for additional purchases of Fairchild Republic's A-10 tank killer because "NATO does not have enough of these close air support fighter aircraft to blunt a Warsaw Pact invasion." This report by Dr. Barlow merits the close study of every one of my colleagues concerned with our Nation's defense. Dr. Barlow concludes that the A-10 is the best close air support aircraft in NATO's inventory, and can play a major role in event of a Soviet invasion of Europe during the next decade. In light of recent Air Force ambivalence about continuing purchases of the A-10, I encourage my colleagues to give close study to Dr. Barlow's report. I ask that highlights of the report be included in my remarks at this point.

CLOSE AIR SUPPORT AND THE SOVIET THREAT
DR. JEFF BARLOW, HERITAGE FOUNDATION

In sum, the A-10 is an extremely capable close air support (CAS) aircraft, well-suited to the vital role of engaging and killing Soviet first and second echelon armored vehicles. The problem is that there are not nearly enough aircraft available to NATO, which, like the A-10, are dedicated to the close air support and battlefield air interdiction missions and can be used in the early stages of a possible Warsaw Pact offensive to blunt the armored onslaught.

The planned size of the force currently envisioned by the Air Force will see peacetime attrition decrease before 1987 the available aircraft below the service's reduced Required Force Level. Once that point is reached, such attrition will begin eating away at the aircraft in the operational inventory at a gradual rate. The planned procurement level of 825 aircraft called for in the Carter FY 1981 Five Year Defense Program would have kept the A-10 force above the Required Force Level until 1993, given the continuance of the present attrition rate.

The Air Force's response to this situation recalls its earlier, pre-Vietnam views of the value of the CAS mission. Having decided that it has enough A-10 aircraft (given the tight budget situation), commanders have begun looking to the possibility of converting models of the more complex and much faster F-16 and F-15 into true multi-role aircraft, by equipping them for the long-range interdiction mission. The lure of F-15E Strike Eagles and F-16Es or XLs seems hard for senior Air Force generals to resist.

Although such aircraft would undoubtedly be capable of handling a variety of air superiority and interdiction missions, they could not handle the close air support mission nearly so well as could the A-10. For example, lethality studies conducted during the Carter Administration, comparing the A-10 with such aircraft as the A-7 and F-16, showed that the A-10 achieved almost three times the armored vehicle kill rate of the A-7 and F-16. And, it should be noted, neither the F-15 nor the F-16 has the level of armor protection in the A-10. Of equal import, the CAS and BAI missions will have a more significant impact in the early stages of a short-war-structured, Soviet combined-arms offensive.

CONCLUSION

In the short term, the Air Force should increase procurement of A-10s to the 825 level called for in 1980, even at the expense of additional fighter assets. This increase at least would provide a stable A-10 force until the mid-1990s. Fulfilling requirements for additional close air support squadrons or for bringing National Guard and Reserve squadrons up to full strength would necessitate increases above this minimum benchmark. Over the longer term, however, it is clear that a new CAS aircraft will be needed.

Precisely because such a new development project will be very prolonged, if past history is any judge, the Air Force should immediately begin increasing its procurement of A-10s to ensure an adequate close air support force until the mid-1990s. The A-10A is still the best CAS aircraft in the inventory and one that can have a major role in the event of a Soviet invasion of Europe during the next decade.

From the early days of its existence as a component element of the Army to times as recent as a decade ago, the U.S. Air Force has almost continually ignored the value of the close air support mission as a decisive factor in the land battle. Preferring to concentrate its efforts on loftier missions, such as strategic bombardment and deep interdiction, which promise an early end to wars, Air Force leaders have slighted those aspects of tactical aviation that hearken back to their Service's earlier subservience to the Army.

The changed Air Force thinking of the 1970s, which owed its rationale to the lessons of Vietnam and the emerging reality of the dangers facing NATO's Central Front and produced service support for the A-10, seems now to be reverting to traditional channels of thought. At a time when the gap between NATO's and the Warsaw Pact's deployed military power is growing larger, it is vital to maintain sufficient close air support assets to help reduce the disparities in the military capability now favoring the Soviets. This can be done only if the leadership of the Air Force reaffirms the essential nature of this long disparaged mission.

THE COMPREHENSIVE VICTIM AND WITNESS PROTECTION AND ASSISTANCE ACT OF 1982

HON. HAMILTON FISH, JR.

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Tuesday, September 21, 1982

● Mr. FISH. Mr. Speaker, this week, the chairman of the Judiciary Committee, PETER RODINO, and I will introduce the Comprehensive Victim and Witness Protection and Assistance Act of 1982.

The bill seeks to improve the treatment accorded crime victims and witnesses by the Federal criminal justice system. It was developed in consultation with victim advocacy groups—such as the National Organization for Victim Assistance, the American Bar Association, and the National Coalition Against Sexual Assault, the American Civil Liberties Union, and the Justice Department. The provisions of the bill are similar to those in the bill recently passed by the Senate.

The legislation addresses the concerns of crime victims and witnesses in three areas; personal safety, fair treatment, and restitution.

In the area of personal safety, the bill clarifies and strengthens present Federal offenses that prohibit the use of force or threats of force in order to intimidate or retaliate against victims and witnesses. It also deals with harassing conduct that does not involve the use of force or threats. Federal courts are authorized to issue, upon motion of the Federal prosecutor, a civil injunction preventing victim or witness harassment. Finally, the bill requires that there be an explicit condition of every release on bail that the person released not commit a victim or witness intimidation or retaliation offense.

The bill contains two provisions intended to insure that victims and witnesses receive fair treatment by the Federal criminal justice system. First, it requires that a Federal judge receive, before sentencing a convicted defendant, information about the impact of the crime upon the victim. The bill also directs the Attorney General, within 9 months, to formulate and implement guidelines insuring that victims and witnesses will be fairly treated at all stages of the Federal criminal justice process. These guidelines are to encompass such matters as seeing to it that victims and witnesses receive prompt notification of the scheduling of hearings and trials and that property held for evidentiary purposes is returned as promptly as possible. Victims would also be informed upon request of the defendant's release from custody.

The purpose of restitution in the criminal justice system is to restore the victim to the victim's financial status quo before the offense—to make the victim financially whole. The bill deals with restitution in two ways. First, and most importantly, the bill encourges greater use of restitution as a criminal penalty by making restitution a criminal penalty for all offenses defined in title 18 of the United States Code. Procedures are spelled out for determining in a particular case whether restitution is an appropriate penalty and, if so, what the amount of the restitution should be. In addition, the bill directs the Attorney General to report to Congress within a year on the need for legislation to assure that a Federal felon will not derive profit from books, articles, movies, and the like about the offense.

Mr. Speaker, I am confident that this legislation adequately addresses the deficiencies of the criminal justice system with respect to the victim.●

DANGERS TO THE NATO ALLIANCE

HON. RONALD V. DELLUMS

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, September 21, 1982

● Mr. DELLUMS. Mr. Speaker, on August 11, 1982, Ms. Regene H. Silver, of the Women's International League for Peace and Freedom, testified before the House Defense Appropriations Subcommittee.

In discussing the efforts to delete 1983 funding for the Pershing II and cruise missiles, Ms. Silver makes many very important remarks which I would like to commend to the attention of my distinguished colleagues.

The remarks of Ms. Silver follow:

TESTIMONY OF REGENE H. SILVER, WOMEN'S INTERNATIONAL LEAGUE FOR PEACE AND FREEDOM

Mr. Chairman and members of the committee: The Women's International League for Peace and Freedom was founded in 1915.

The League has sections in 25 countries and 130 branches in the United States. It works primarily through education and citizen action to achieve peace, freedom and justice by non-violent means. It has consultative status B at the United Nations. We are grateful to the House Appropriations Subcommittee on Defense for giving us this opportunity to express our point of view.

We are urging the deletion of fiscal year '83 funds for the Pershing II and Cruise missiles, scheduled to be deployed throughout Europe beginning in December of 1983. We believe it is critical that these weapons are not deployed for the following reasons:

First, the deployment of the Pershing II and Cruise missiles in Europe represents a major escalation in the arms race. These missiles are part of a new generation of nuclear weapons whose accuracy and speed increase the risk of nuclear war.

Second, there is a growing mass movement within both the United States and Europe to halt the arms race, and specifically the deployment of the Pershing II and Cruise missiles.

Third, there have been a myriad of problems reported in the production of the Pershing II and Cruise missiles. On July 22, during its first test run, the Pershing II exploded 17 seconds into its flight. In the last year, the General Accounting Office has issued several reports delineating problems with the Cruise missile, especially in regard to its TERCOM guidance system, the key to the Cruise's alleged precision. It appears unuse to continue funds for missiles which are reported to not work.

At this time, I would like to expand on these three points.

The Women's International League believes that the deployment of the Pershing II and Cruise missiles in Europe brings us precariously close to nuclear war. With the deployment of these two new missiles systems it appears that the United States is attempting to gain strategic superiority over the Soviet Union, and to use this superiority to frighten the Soviets into arms reductions. If it were possible to do this, the arms race would have ended 20 years ago when the United States did possess a nuclear arsenal superior to that of the Soviets. However, since the 1950s, the Soviet Union has emulated the United States in our escalation of the nuclear arms race, and promised to continue to keep up with us weapon by weapon.

In September of 1981, Soviet President Brezhnev said that the Reagan administration efforts to gain strategic superiority are doomed to failure, and that the Soviet Union would produce "a proper counterbalance" to any new weapons system developed by the United States. President Brezhnev stated: "I shall say with all responsibility that we shall not remain indifferent to the appearance of such weapons in the arsenals of the United States and other NATO members." As of December 1983, if the deployment of the Pershing II and Cruise missiles proceeds as scheduled, the Soviet Union will be faced with counterbalancing two new weapons systems which will dramatically alter the global balance of nuclear weaponry.

The Carter and Reagan Administrations have justified the deployment of the Pershing II and Cruise missiles as a means of countering Soviet SS 20 intermediate-range missiles. However, NATO already has thousands of nuclear weapons in Europe, both tactical and intermediate-range, which are designed to deter possible conventional or nuclear attack by the Soviet Union.

Once the Pershing II missiles are stationed in the Federal Republic of Germany, they will be able to reach and destroy Soviet cities and military installations within four to six minutes. The Soviets have said that they will retaliate in kind, placing missiles close enough to out shores to reach our cities and military installations within the same exceedingly brief flying time. Does this imply that we will be faced with another Cuban missile crisis? Can we survive another such missile Crisis? If not on land, the Soviets could station missiles on submarines as close to our shores as possible—an equally terrifying thought.

The Cruise missiles, scheduled to be deployed in Great Britain, the Federal Republic of Germany, Italy, Belgium and the Netherlands, do not have the speed of the Pershing II, but are equally provocative. The Cruise hugs the ground as it flies, so low that it cannot be detected by radar. It is less than 20 feet long, so small that it cannot be verified. It is also difficult to tell whether a Cruise missile is carring a nuclear or conventional warhead. It will make nuclear arms control impossible.

Because of the Pershing II's speed and proximity to the Soviet Union, and the Cruise's nondetectability, they are missiles that would eliminate the ability of the Soviet Union to retaliate effectively after an attack by the United States and NATO. Therefore, it is likely that the Soviets will adopt a launch on warning policy. In July of this year, Soviet Defense Minister Dimitri Ustinov wrote that "given the modern state of the detection systems and the combat readiness of the strategic nuclear means of the Soviet Union, the USA will not be able to deal a crippling blow against the Socialist countries." Experts are interpreting Ustinov's statement to mean that at the earliest signs of a United States first strike, the Soviets might proceed with a nuclear attack of their own. In today's world of constant international tension, crises and local wars, it seems suicidal for the United States to deploy new weapon systems that will cause an adversary to adopt a launch-on-warning policy.

Our second argument against funding the Cruise and Pershing II missiles is that the people—your constituents—are speaking out against the arms race in ever-increasing numbers. Never before in the history of the United States or Europe has there existed such a large public outcry to freeze the arms race. You yourselves have no doubt seen the media's accounting of millions of individuals demonstrating against nuclear armament, both in the United States and in Europe. On June 12, over a million and a half people congregated in New York, San Francisco, and cities throughout this country, to demand that you, our legislators, cut off funds for nuclear arms and instead fund human needs such as education, housing and better health care. Across the United States, local towns and cities are voting themselves nuclear free and passing referendums calling for a halt to the arms race. Labor unions, major church organizations, businessmen, physicians and educators have now joined with the peace movement in our efforts toward nuclear disarmament.

In Europe, over the past year, millions of people have demonstrated in every major city on the continent. They are demonstrating specifically against the Pershing II and Cruise, for they fear that these missiles signal the possibility of a limited nuclear war fought in Europe between the United States and the USSR, in which they will be the guinea pigs. For the last ten months, men, women and children in Great Britain and Sicily have camped out at the proposed Cruise missile sites, hoping that their protest will make a difference in stopping the deployment. To this day, the governments of the Netherlands and Belgium have not agreed to accept the missiles and Helmut Schmidt's government is in crisis over the deployment of the Cruise and Pershing II on FRG soil. It should also be noted that the Joint Chiefs of Staff and the CIA report that installations in western Europe used for storing American nuclear warheads are poorly protected, and vulnerable to attacks by terrorists and anti-nuclear demonstrators.

We urge you, as elected representatives of the People of the United States, to listen to your home towns and respond to your constituents. Find out how they feel about massive budget expenditures on new nuclear weapons that are only designed to destroy human life.

Finally, we are arguing against funding for the Pershing II and Cruise missiles because they appear, from your own Congressional reports, to not be the weapons they are cracked up to be by the companies who are manufacturing them.

The initial test of the Pershing II was postponed 3 times, and when it was finally tested last month, in blew up. The Pershing II's estimated total systems cost soared by over one billion dollars in three months time toward the end of last year. Neither the Army nor Martin-Marietta (the manufacturer of the Pershing II) have offered a full accounting for this huge cost jump. Problems have also been reported in the Pershing's guidance system and in changing the missile into one which can fly one thousand miles as opposed to its predecessor (the Pershing IA, already stationed in the FRG) which can only fly one hundred to four hundred miles. The problems with the Cruise as reported by the General Accounting Office include: "Engine problems, it may not be able to survive Soviet defenses, it cannot effectively attack certain kinds of targets, and it lacks the guidance system to attack most potential targets in certain geographical areas."

In closing, it seems clear that the deployment of the Pershing II and Cruise missiles in Europe will not offer us or the Europeans greater security. Rather, the deployment of these new weapon systems will bring us precipitously close to nuclear war. Their deployment will not close the supposed "window of vulnerability", nor deter the Soviets from producing new nuclear weapons systems of their own. Instead, the deployment will create greater edginess and distrust on the part of the Soviet leaders, which could lead them to adopt a launch-on-warning policy. The Women's International League suggests that the scheduled '83 deployment will escalate the arms race to an uncontrollable and possibly suicidal level.

This is why your constituents in the United States, and their allies in Europe, are calling for a freeze on the production and deployment of nuclear weapons. We urge you to listen to them. We urge you to fully scrutinize the Pershing II and Cruise missile programs, and to delete funds immediately for these new weapon systems. Thank you.●

CHESTER KOCH—GREAT AMERICAN PATRIOT

HON. RONALD M. MOTTL

OF OHIO

IN THE HOUSE OF REPRESENTATIVES

Tuesday, September 21, 1982

● Mr. MOTTL. Mr. Speaker, World War I veteran Chester Koch has spent over 40 years rallying Americans to embrace their patriotic ideals and obligations. At age 90, his body flamed by a heart full of devotion to his country, Koch continues his march in service to the Nation.

I read a report on my friend Chester in the Cleveland Plain Dealer which gives some insight to the driving spirit of the man. Following are some excerpts:

"If you love a parade, you"ll get into any parade you can," said Koch, Cleveland's coordinator of patriotic affairs since 1941. When a kidney operation forced him to miss Cleveland's 1954 Memorial Day parade—his first absence from that event since World War I—he directed it by phone from his hospital bed.

Koch began his "mission in life" one dreary winter day early in 1941 when, on his lunch break from his clerking job in the city's water department, he saw a group of dispirited men walking toward the train terminal.

"The thought struck me that they were going away to fight for their country and there was nothing set up to show our (Cleveland's) appreciation," he said. "Without patriotism and a respect for the men in the service, they are lost."

The alarmed Koch contacted high school bands, the Boy Scouts and veterans' groups to organize daily going-away ceremonies for the men. Koch, who had been a mess sergeant in the Army during World War I, missed lunches to appear at the ceremonies, and managed to shake hands and say a few words to every recruit.

Mayor Edward C. Blythin approved of his efforts. In April 1941, Koch was appointed to his present position. Since then, Koch has shaken the hands of an estimated 475,000 departing recruits.

During World War II, he delayed trains until each recruit had a place to sit and a berth in which to sleep. When one train started moving as he was shaking hands, he decided to jump off—and hit his head against a steel pole, which knocked him unconscious.

"I saw the stars and stripes forever," he told reporters.

He said he wishes a parade could have been thrown for returning Vietnam veterans, "but the military sneaked them home in small groups." Although Koch disapproved of the Vietnam war, he said it was his duty to support the men who fought it.

These excerpts from the Plain Dealer article show how the visionary man of 90 with such a strong sense of purpose realized the importance of answering the Nation's call to arms, no matter how much dissent and adversity is faced. Doctors have verified what Koch knew all along—lack of reinforcement from society for Vietnam veterans made readjustment to civilian life more difficult.

We should all share in the vision possessed by Koch and other true patriots and show the proper respect for the fighting men who put their lives on the line for all of us.

For Koch, every day is Veterans' Day. I wish to offer my own personal thanks and the appreciation of the 23rd District to this great man who helps us keep our priorities in order.

Without persons like him, we are lost.●

EDDIE DAVIS, MID-ATLANTIC COACH OF THE YEAR

HON. JOHN CONYERS

OF MICHIGAN

IN THE HOUSE OF REPRESENTATIVES

Tuesday, September 21, 1982

● Mr. CONYERS. Mr. Speaker, I have known Eddie Davis for over 10 years and watched his progression toward becoming the Middle Atlantic Coach of the Year. This award was recently bestowed upon him by the U.S. Professional Tennis Association, a national organization of tennis teachers. In the process, Eddie has assisted many of our young men develop into fine athletes, able to compete against the best of teams. He has accomplished this despite Howard University's lack of tennis facilities and other impediments which would have discouraged all but the most determined.

With the dim prospects awaiting our youth, especially minorities, it is crucial that they develop the skills through which they may channel their energies into productive outlets, thereby promoting an ability and strength to cope with the competition and trials they will face throughout their lives. As an excellent coach, Eddie Davis has helped to produce that kind of strength and determination in the young men at Howard. I would like to include an article from the Washington Post, August 23, 1982, which recognizes his fine achievements.

[From the Washington Post, Aug. 25, 1982]

HOWARD'S TENNIS COACH BEATS ODDS TO WIN

When Howard University tennis coach Eddie Davis and his 12-man squad geared up for their bi-conference season two years ago, the odds were stacked against them. Davis had been losing about half his team to academic ineligibility each year, he had no travel funds to help woo better players and, to top it off, the team didn't even have its own court.

So Davis hauled his players across Georgia Avenue to the Banneker Recreation Center every day where they tried to hone their backhands within the 45-minute practicing limit set by the D.C. Department of Recreation. As the Howard players practiced, area residents would stand anxiously on the sidelines, itching for their turn on the community courts.

"By the time we have to get off, we haven't even broken a sweat," said Davis, whose team, which ideally should practice three hours daily, still has to use public courts. "We might get one today and three tomorrow, but we make the best of what time we get."

Those previous few hours of practice, plus running four miles daily, lifting weights and "hitting a million tennis balls," added up to winning seasons and post-season championships in the Capital Collegiate and Mideastern Athletic conferences for the Howard team during the past two years. For Davis, it meant a Middle Atlantic regional coach-of-the-year award this year, bestowed by the U.S. Professional Tennis Association, a national organization of tennis teachers.

It was an unlikely laurel for someone who used to think of tennis as a "sissy sport."

That was back in the mid-1960s, when Davis was a high school football player at Cardinal Cushing Academy in Newburyport, Mass. "Tennis used to draw guys who couldn't make it in another sport," said Davis, whose muscular frame proves he was no athletic reject. "But I picked it up as something new, hacked around with it until I started getting really good at it."

Davis graduated from the academy in 1967, attended Morgan State College in Baltimore and graduated from Federal City College in 1973. He later taught science at Hart Junior High School in Southeast. All the while, with a steadily improving backhand, Davis was teaching tennis during the summer and, in 1976, landed a job as Howard's part-time tennis coach.

Only 27 at the time, Davis was often mistaken for one of his players. Even now, at age 33, he retains his youthful appearance and sometimes has difficulty convincing people he is the coach.

Just last year, the team traveled to the University of Miami but arrived late. A security guard at a gate peering into the bus and checking his watch, said, "All right, fellas, does your coach know you're out this late?"

"I *am* the coach," Davis answered.

"Sure you are, kid," sighed the security guard. "Let me see your I.D."

Davis reached for his wallet and soon afterward the bus rolled past the front gate.

If only his other tasks were as simple.

Between his full-time teaching job at Hart and his part-time coaching job at Howard, Davis works 14-hour days during peak season, which leave little time to spend with his wife and two children in their Forestville home.

Because he has no travel or recruiting budget, Davis said, "I've had to do a lot of extra dancing," referring to letter-writing and word-of-mouth efforts to lure better players. Some players come to the school with academic problems. "In the early years, I was losing three a semester and had to start two-hour study sessions," he said.

The most severe handicap, however, has been the lack of a university tennis court, which forces the team to jockey for the few available spots at Banneker Recreation Center.

"I know that people in the community think of us as a pain," he said. "We need to use the courts the same time they do—after work, after school. When our 45 minutes are up, we do some hitting on the side. There's talk of the university building its own courts, but the emphasis is not on tennis here. There's no big money changing hands at every match."

Davis said his is the only college tennis team in the area without its own courts. "Even George Mason and UDC—everybody we play has a court of their own," he said. "We may be the only team in the Eastern region without our own courts."

Davis maintains, however, that having to overcome these obstacles has made his team stronger and helped make him coach of the year. "We just try to work with the system and keep plugging," he said. "We play by the rules, and we *always* play to win."

But when he and his squad face national powerhouses such as Clemson and Villanova, which have five or six courts and can practice twice as long as Howard, he thinks back to his first day on the job and the words of wisdom from the outgoing tennis coach: "If you rub steel on rocks, it gets *stronger.*"●

LAWYERS ON THE DOLE

HON. WILLIAM E. DANNEMEYER

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, September 21, 1982

● Mr. DANNEMEYER. Mr. Speaker, being a lawyer myself, I regret that it is necessary to bring up a matter that does not reflect particularly well on either the Congress or the legal community. However, in the interests of fairness to the taxpayer and to the judges that are going to have to handle ever-increasing court backlogs, the question of Federal compensation for attorney's fees simply cannot be swept under the rug. The longer we continue to reimburse unsuccessful defendents for attorney's fees in cases involving the Federal Government, the more litigation we will encourage and the greater the burden we will place on the already overburdened American taxpayer.

Mr. Speaker, right now, at least 124 Federal laws provide for the award of attorney's fees. Fourteen major environmental laws, for example, allow the courts to award such attorney's fees "whenever the court determines that such award is appropriate." Some Federal courts have construed this overly broad language as permitting the award of attorney's fees even if the attorney's in question were not on the prevailing side of the case. And the fees awarded have often been generous, frequently in excess of $100 per hour.

There is a rationale, and a good one I might add, for awarding attorney's fees where the Government has brought an action against a party and has lost the case; fairness to the successful defendent suggests he should not have to suffer the attorney's fees as the price of innocence. And a case can be made, albeit not as strong a one, for compensating those who successfully sue the Government for their attorney's fee; sometimes filing suit is the only way to obtain redress. But to reimburse parties who have lost a Federal case, especially if they initiated the action, has just the opposite effect than compensating those who were sued by the Government and won. It encourages rather than discourages further litigation and it costs rather than saves the Federal Government money. Because the risk in filing suit is substantially reduced, parties have a far greater incentive to sue the Government. Indeed, public interest law firms, as well as independent attorneys, can keep themselves in business by suing. Why not, when they are effectively guaranteed payment of fees, win or lose.

This awarding of attorney's fees at taxpayers expense has been termed a "gravy train for lawyers" by the Wall Street Journal. So that my colleagues can have the benefit of reading how the Journal came to that conclusion, I ask unanimous consent that the Journal's September 8, 1982 editorial "Lawyers on the Dole" be inserted in the RECORD at this time.

[From the Wall Street Journal, Sept. 8, 1982]

LAWYERS ON THE DOLE

The Sierra Club last February lost a lawsuit it brought against the Environmental Protection Agency to tighten pollution controls on coal-fired power plants. Nonetheless, the court ordered the government to pay the club about $90,000 in attorneys' fees because it had "substantially contributed to the goals of the Clean Air Act." The case is only one of dozens every year in which the government pays for legal costs even when the plaintiffs lose.

"Public interest" groups and civil rights lawyers have built an industry out of suing the federal government and collecting as much as $20 million a year from the taxpayers. (The practice is so common that government accountants aren't sure of the exact amount.) What started out in the 1960s as a way of subsidizing civil rights cases has expanded to include the environment and "consumer protection." Moreover, the federal government isn't the only one that has to pay; under some federal legislation, state and local governments are also liable to pick up the legal tabs of plaintiffs, which can run into the millions of dollars.

The program has turned into quite a gravy train for lawyers. The Carter administration seemed particularly pleased to pay its favorite "public interest" groups especially high legal fees. Early last year, a host of groups organized the Alliance for Justice to help devise better ways of getting the taxpayers to underwrite their operations. One Washington firm, headed by two former Justice Department attorneys, has advertised its particular expertise in winning large awards from the government; in one case, it got a $90,000 award for the Environmental Defense Fund, amounting to $109 per hour.

The Reagan administration wants to cut off this dole. It has proposed legislation to limit awards to only those parties that "clearly and substantially prevail." In other words, if a "public interest" group loses a case, the taxpayers don't owe it a dime. If it wins, payments would be limited to fees paid government attorneys of around $50 an hour instead of some current awards of over $150 an hour.

The changes still would permit fee awards for individuals and businesses attempting to obtain relief from regulation and other burdens. An excellent case could be made for eliminating all awards in the interest of fair play and returning to the days when aggrieved parties hired their own lawyers and brought their own suits. But at least the legislation may reduce the number of suits designed to harass government or industry as part of campaigns that often are partly political in nature. People who hate nuclear power plants or superhighways should certainly be entitled to fight them in the legislatures and the courts, but it is hard to see why the taxpayers should finance their campaigns.

As readers may have noticed, we've always felt that "public interest" law is little more than a clever disguise for political activism. It's never easy to wean vocal and politically active groups away from the public trough but we're happy to see that the political process may have its own ways of dealing with this form of taxpayer-subsidized partisanship.●

1982 CALIFORNIA ENERGY CONFERENCE

HON. BILL LOWERY

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, September 21, 1982

● Mr. LOWERY of California. Mr. Speaker, it was my privilege to chair and moderate the 1982 California Energy Conference in San Diego, Calif., on June 28, 1982. The conference featured a distinguished group of speakers who provided current information on the global, national, and regional energy outlook and a diversity of perspectives on the options available to meet future energy needs.

The conference was coordinated by the Washington-based Columbia Institute for Political Research and attracted a large audience that included State and local government officials, representatives from labor and industry, community leaders, educators, and students.

A principal focus of the conference was on California and steps that must be taken to assure adequate—and affordable—energy supplies in the future. This need is particularly compelling in California where energy costs are among the highest in the Nation. At the present time, 64 percent of the electricity in the State is generated by expensive gas and oil. Future planning must include the development of lower costs alternatives that are less susceptible to a supply disruption.

Among the principal conference speakers was the Honorable Guy W.

Fiske, who has recently been confirmed as Deputy Secretary of the U.S. Department of Commerce. Mr. Fiske presented a clear and timely description of the underlying principles and goals of the Reagan energy policy and a summary of the accomplishments of the past 18 months. In order to share this information with my colleagues, I include, as a part of my remarks, the text of Mr. Fiske's address:

ADDRESS OF THE HONORABLE GUY W. FISKE

Good Morning. It is a pleasure to be here with you today. I have been asked to speak on the Reagan Administration's Energy Policy. As you know, I recently left the Department of Energy to become the Deputy Secretary of Commerce. I like it so much at Commerce that I've invited the rest of my former colleagues at Energy to come over and join me!

That refers, of course, to the Administration's proposal to merge the essential functions of the Department of Energy into the Department of Commerce. In essence, that proposal is symbolic of everything the Administration believes about energy policy.

I'd like to begin this morning by considering energy policy against the developments immediately preceeding this Administration.

By the time President Reagan took office, energy policy had evolved into a complex system of incentives and regulatory constraints. Their purpose was for the Federal Government to manage most aspects of our National system of energy production, delivery and use.

The government sought to create whole new energy industries, to control the old ones, and to direct the manner of energy conservation.

What did we learn from this experience?

First, energy cannot be viewed as a special case divorced from overall economic policy. Rather, the long-term solutions we seek for meeting energy needs must be developed in tandem with efforts to respond to broad economic trends and international trade patterns.

Second, the marketplace will give us the most efficient mix of energy production and consumption. This is so, even during occasional periods of energy supply imbalance. We learned that prudent planning will be discouraged if the public is led to believe that the government will always guarantee low-priced energy.

Third, we've learned that the best way the Federal government can achieve an orderly market environment is by removing regulatory obstacles, whenever this would not endanger public health and safety. We learned that controlled prices at a time of energy shortage, increase the demand for oil. This, in turn, leads to more shortages, to a bureaucratic gaggle of entitlements, to government decisionmaking on priorities, to distorted patterns of disruption, and to reduced incentives for the private sector to develop new energy forms and technologies.

Fourth, we learned that the system of conservation grants and regulations adopted was largely irrelevant. Studies show that only 5 percent of the conservation achieved since the 1973 Arab oil embargo is due to government conservation efforts.

It's against this background President Reagan proposed a national energy approach that relies on the dynamics of the marketplace.

The first step taken by President Reagan was to remove price and allocation controls on oil.

You may recall the warnings issued by the proponents of regulation when the President took that decontrol action. The price of oil would go sky-high, they said and production would not increase. The consumer would pay too much, and the oil companies would enjoy excessive profits.

Well, production has been up, prices have been down, and competition in the oil industry has been intense.

The decontrol of oil was merely the opening action in a cohesive energy approach.

A second action has been the proposed improvements to the government's management of its energy functions. The key rationale of this reorganization is to integrate energy policy with overall economic policy.

How better to achieve this than by shifting certain Department of Energy functions to the Commerce Department?

The Department of Commerce will assume responsibility for:

First, longer-term energy research for which private sector incentives are insufficient assure needed investment;

Second, the nuclear weapons program including weapons research, development, testing, production and surveillance, and the production of special nuclear materials;

Third, energy emergency preparedness including analysis and review of energy policy issues related to long-term global supply, emergency and contingency planning for supply disruptions, and responsibility for strategic and naval petroleum reserves;

Fourth, international energy responsibilities including U.S. representation in international programs, negotiations of bilateral agreements, and DOE's nuclear nonproliferation responsibilities; and

Fifth, the development of energy policy and the collection, analysis and dissemination of energy data to assist public and private decisionmakers.

Now, one might ask, "Why the Commerce Department?"

First, the basic premise of this reorganization is a reliance on the dynamics of the market place. This means that the agency responsible for energy must have a thorough understanding of how different sectors of the marketplace interact with each other.

Sound energy emergency planning, for example, requires a detailed understanding of the economy's resilience when faced with supply disruptions. This means an understanding of the economy as a whole, and assessment of the various industries within it.

Commerce has this knowledge.

Second, energy-related industries are rapid growth industries, and there is vast potential for increasing our exports of energy-related equipment and products. That, of course, means trade . . . the heart of the Commerce Department.

Third, the transfer reflects the President's view that the department which represents the business sector should play a greater role in shaping national and international economic policy.

In past years, Commerce's main role was to provide statistical and technical information. Today, we are doing that and much more. We have assumed new trade responsibilities. We are the Executive Branch focal point for industry policy. We are represented on every important Cabinet council . . . Secretary Baldrige is Chariman of the Cabinet Council on Commerce and Trade. Commerce today is the focal point of business in the Federal Government.

So the Department of Commerce is suited for these new energy responsibilities.

Three other elements to the Administration's energy policy should be mentioned.

First, nuclear energy.

President Reagan's nuclear policy underscores his commitment to the restoration of nuclear power as an energy option for this country.

The President asked the Department of Energy to work with the Nuclear Regulatory Commission to recommend improvements in the regulatory and licensing process. These recommendations are near completion;

The Administration wants to speed up construction of the Clinch River Breeder Reactor. After four years of delay we need to regain the world position the United States once had in breeder reactor technology;

President Reagan asked DOE to study ways of encouraging private sector reprocessing. It was discouraged by the last administration, and the utilities need this capability; and

We are working closely with industry and the states to develop safe disposal of high-level nuclear waste. We also expect a nuclear waste bill to be enacted by Congress.

The second area I would mention is natural gas.

Our natural gas market studies show that the real economic and social danger lies in prolonging controls. If we do not repair the Natural Gas Policy Act in the near future, the price of the 50-60 percent natural gas that will be decontrolled on January 1, 1985, will rise quickly from the equivalent of $16 per barrel to a much higher level.

The market will experience distortions. Those customers who retain access to natural gas that remains under the price controls will have an unfair advantage over those dependent on high-priced gas. Nor will continued subsidy of natural gas users through extension of price controls help matters. These subsidies are a disincentive to exploration. Oil well completions, for example, are up 40 percent since decontrol. Gas well completions are up only 6 percent as gas remains under controls.

The President wants government out of regulating the price of natural gas. Next year he will ask Congress for gas decontrol. His decontrol schedule will provide a smooth transition to the free market.

The third Administration energy action I want to mention, is the current study of the electric power industry. The Cabinet Council on Energy and Natural Gas is looking at the major issues confronting this industry.

Our chief concerns are: supply sufficiency and economic efficiency.

This task force has both a program to analyze the needs and problems and an outreach program to work with the states. We have no desire to preempt state responsibilities, so the states are fully included in this review.

The task force report, which is due in November, will provide a comprehensive look at the needs . . . and it will make recommendations as to what the Federal Government's role should or should not be.

One energy initiative I'm vitally interested in is the Heber Project. This is a large scale test of the potential of a geo-thermal binary 50 megawatt electric power plant.

Some of you here today are involved with this project.

The Administration is supporting completion of this project, and we look forward to its completion within the next few years.

The Heber Project will verify the possibility of producing economically competitive electricity from geo-thermal sources. After that, the electric power industry will be able to choose whether geo-thermal is a practical source.

Let me sum up a few of the energy-related highlights of the past 17 months; they are:

Oil has been decontrolled;

We saw the results of conservation take hold, with oil imports reaching an eleven-year low;

The share of non-OPEC oil has increased;

Domestic drilling and seismic activity have been substantially increased;

We saw an accelerated opening of the outer continental shelf and of public lands;

336,000 barrels of oil a day have been added to the strategic petroleum reserve. There are now some 265 million barrels of oil in the reserve;

1.1 million manhours of paperwork requirements and over 200 energy-related regulations have been eliminated;

Federal spending on energy is nearly eight billion dollars under the previous Administration's budget proposals;

Responsibility for energy commercialization projects has been shifted to the private sector. Government has restricted its R&D efforts to long-term, high-risk research; and

The President proposed and Congress passed a new tax law which should help industry and also make more capital available for energy development, and the President proposed improvements in Federal energy management.

All of what we've been discussing will be influenced by the Administration's basic program of restoring the economy to non-inflationary growth.

Whatever problems remain, consider the progress that has been made.

Remember 1980 and 18 percent inflation? The first four months of 1982 inflation ran at 1½ percent. I expect it to be around 6 percent for the year.

Due to the 1981 tax program business cash flow in 1982 will increase $10 billion! That's $10 billion the credit markets won't have to supply.

Growth in government regulation has been chopped 25 percent. That saves business $2 billion in operating costs, and nearly $5 billion in initial capital costs!!

The rate of government spending has fallen from 15 to 7 percent—a 50 percent drop in less than two years.

These are significant developments with long-term implications.

All of us in the Administration are extremely sensitive to the pain that has accompanied these gains. Unemployment, idle capacity, bankruptcies. These concern anyone who wants to see the full potential of our Nation used.

But the economic indicators are beginning to bear out what we've been saying all along . . . that the second half of the year will see the recession end and a gradual upturn take place. Purchasing power is up, real wages are rising, both personal income and retail sales rose in May, and preliminary data show that real GNP will be up slightly in the current quarter.

The encouraging fact is that the recovery we'll see in the coming months will be a real recovery based on sound market forces . . . not a bogus one force-fed by government spending and speeded by inflation.

In closing, I'd say we're at a critical turning point in America, with both the economy and energy.

The cost of energy has been put on a more realistic basis. The economy is being put on sound footing.

There are tough times ahead to make the structural changes America needs. But our chances for success have vastly improved in the last 17 months.

We're on a new road to the future, and I think there are some exciting times ahead.

Thank you.●

FISCAL YEAR 1983 TRANSPORTATION APPROPRIATIONS—EXPLANATION OF VOTES

HON. ROBERT W. DAVIS

OF MICHIGAN

IN THE HOUSE OF REPRESENTATIVES

Tuesday, September 21, 1982

● Mr. DAVIS. Mr. Speaker, because of a doctor's appointment earlier today, I was forced to miss three recorded votes on the fiscal year 1983 Transportation Appropriations bill, H.R. 7019. Had I been present, I would have voted for final passage of the bill and against the Coughlin and Obey amendments which proposed cuts in transportation funding. As a strong supporter of our Coast Guard, rural transportation programs, and the section 406 airline subsidy program, I believe the funding levels proposed by the Appropriations Committee represent a balanced, reasonable approach to providing for our transportation needs while maintaining fiscal restraint. I commend the committee for the attention and support it has provided these vital programs.●

CONGRESSIONAL ARTS CAUCUS' NEW CHAIRMAN

HON. JAMES M. JEFFORDS

OF VERMONT

IN THE HOUSE OF REPRESENTATIVES

Tuesday, September 21, 1982

● Mr. JEFFORDS. Mr. Chairman, as vice chairman of the Congressional Arts Caucus I am pleased to announce the election of Mr. TOM DOWNEY of New York as our new chairman. Mr. DOWNEY will fill the vacancy caused by the resignation of Mr. Fred Richmond from the House of Representatives.

Mr. Richmond was the founding member of the Congressional Arts Caucus. Back in December of 1980, he saw that there was a need to educate Members of Congress and the public on legislation and issues affecting the arts. As a result, he started in his personal office what is now known as the Congressional Arts Caucus.

At this point in time, the Arts Caucus has 164 members. Due largely to Mr. Richmond's tremendous enthusiasm and energy within the organization, the caucus has sponsored lunch meetings with celebrities such as Charlton Heston and Jean Stapleton, a home video recording debate between Jack Valenti and Charlie Ferris, and a national high school arts competition with the winning pieces of art displayed in the Cannon tunnel. All of us will be reminded each day we travel through this art gallery tunnel in days of inclement weather of Mr. Richmond's tremendous contribution in inspiring talented high school students. Perhaps this will help him through his stormy present. The caucus owes much of its success to the fine efforts of Mr. Richmond.

The torch has now been passed on to a new chairman. Mr. DOWNEY has expressed his desire to carry on the work of Mr. Richmond, and has ideas of his own that he will implement.

As one of the younger Members of the House of Representatives, I know that he will bring boundless energy and enthusiasm to the chairmanship. Mr. DOWNEY has a close relationship with many leaders in the arts world, and brings a thorough knowledge of current arts legislation and issues to the position.

It is with great pleasure that I look forward to working with Mr. DOWNEY, and on behalf of the membership of the Congressional Arts Caucus, I congratulate him and wish him the best of luck.●

FEDERAL GOVERNMENT AND EDUCATION

HON. BOB LIVINGSTON

OF LOUISIANA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, September 21, 1982

● Mr. LIVINGSTON. Mr. Speaker, since I became a representative of Louisiana and the First Congressional District of this great State, a chief concern of mine has been to assure the proper role of the Federal Government in the education of our citizens young and old alike. As a member of the House Appropriations Subcommittee on Labor, Health and Human Services and Education, I have been fortunate to work closely on many important education issues and programs. In addition, I have been able to draw upon the expertise of many education professionals and administrators on all levels throughout the State and the First District. One of these professionals, Dr. Rawlein B. Soberano, is director of continuing education at Our Lady of Holy Cross College in New Orleans. Recently Dr. Soberano was elected by his colleagues as chairman of the National Advisory Council on Adult Education. I have had the pleasure to read a position paper Dr. Soberano used as his platform. At a time when we face tough decisions on all fronts to cut the budget and reduce the deficit, I believe Dr. Soberano's message is very important for every

Member who is concerned about the Federal Government's role in education.

THE GOVERNMENT'S ROLE TOWARD ADULT BASIC EDUCATION

Illiteracy is a social cancer that should have no place in the United States. Our main concern, as members of NACAE, is how to combat or lessen the crippling consequences of illiteracy in this complex society, to enhance not only functionality, but also to promote productivity and self-respect as well as to remove humiliating dependence on Government handouts.

Literacy has been one of the major concerns of this country in the last 100 years. This concern was first manifested when, in the census of 1870, it was made clear that some people interviewed were unable to show reading and/or writing skills. This problem was made apparent during World War II when 600,000 were rejected from military service because of their inability to read or write. The Korean conflict saw 300,000 rejected for the same reason. This is a national problem that plagues the whole Nation with a low of 1.9 percent of its population in Iowa to a high of 13.1 percent in Louisiana.

This problem is a threat to our stability as a nation because it erodes productivity and endangers technological growth. As such, illiteracy is both a serious problem to the Nation and a debilitating handicap to the individual. This problem is further aggravated by the level of scientific advancement which makes illiteracy more severe when compared to a decade or two ago. One of the reasons for today's high unemployment can be traced to many adults' inability to complete job applications, learn new skills from written materials, or read employment want ads in the newspaper. It is a well-known fact that businesses are reluctant to hire individuals who are functionally illiterate, even for unskilled jobs.

It would seem reasonable to assume that society should provide enough jobs so that able-bodied people would be able to receive employment. This is a critical problem in the United States. The question is whether the Government should turn its back from these illiterates, leave them to a hopeless future and see unemployment rise further, or make adult literacy one of its national priorities by doing everything realistically possible and feasible to accomplish this goal. Commonsense tells us that in the long run, unemployment is the more expensive of the two options. The involuntary idleness of 10 million Americans requires taxpayers' subsidy of over $40 billion a year in unemployment compensation, welfare payments, food stamps, subsidized housing, and other benefits. Moreover, the economy loses about $16 billion a year for every million out of work, not to mention tax revenues lost through reduced payrolls in semiskilled and unskilled jobs. These statistics do not even delve into the correlation between crime and illiteracy.

In everyday living, illiteracy brings with it many other related headaches and heartaches. Modern medicine, food, and equipment that can prevent many diseases are not used by many Americans because of their inability to read. Persons who cannot read newspapers, magazines, or books are completely cut off from written communication in society. An illiterate wife and mother has a very difficult time because she cannot read price signs, can labels, cookbooks, or baby formula directions. Adults who lack the ability to use basic communication skills cannot participate in our system of government.

The current political mood in the United States is toward limiting the role of government at all levels. However, this is one area of social concern the Government cannot afford to leave to the States. The illiterates/functional illiterates, many of whom come from the ranks of the poor, minorities, and culturally disadvantaged, have no one to lobby for their interests. Their interests, because of their growing number, are closely tied to the general welfare of this country. If they are denied this opportunity of basic education by their own Government, they will be displaced in their own Nation. These economic considerations, while important, are not as crucial as humanitarian concerns. A nation that calls itself civilized must do everything it can to eliminate human misery which is the result of poverty, which in turn is a necessary byproduct of functional illiteracy.

Uprooting illiteracy is not a question of more money, but of better use of the money already allocated. With an approved budget of $770 billion for 1983, it includes approximately $325 billion in direct social aid payments to individuals. If 20 percent of our citizens are truly needy, either because they are illiterate, functionally illiterate, culturally disadvantaged, linguistically handicapped or marginally employed, this shows that the Government can send each of them, by eliminating the nonneedy, a check for $7,175—$28,700 for a family of four. An amount of $325 billion is more than adequate to meet the minimum needs of our needy people, but priorities have to be set on the national level. Bloated Federal welfare bureaucracies that have grown to such size under Reagan's predecessors—that they absorb most of the money that should go to the truly needy—have to be trimmed. In the end, a literate America is a strong America.●

A THOUGHT-PROVOKING PROPOSAL

HON. DAVID DREIER

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, September 21, 1982

● Mr. DREIER. Mr. Speaker, one of the major concerns of the people of my district has been, and continues to be, high interest rates. While we have seen a steady decline in these rates for the past several months, it is clear that interest rates will have to come down several more points before our economy can once again thrive.

Of course, many proposals have been offered in an attempt to lower these outrageous rates. The consensus in my district is that we have simply got to cut down on Government spending. For too many years now, the Federal Government has been crowding out the private borrower in the capital market. Until we reduce the deficit, this will continue to occur and interest rates will remain high.

One thought-provoking proposal for dealing with these high rates was outlined in an August editorial in Newsweek magazine by Chrysler Chairman Lee Iacocca. I must say that this article generated scores of letters from constituents who believe that America's economic health is far too important to be held hostage to partisan politics. For the benefit of those who have not had the opportunity to read this editorial, I am taking this opportunity to have it reprinted in the RECORD.

[From Newsweek, Aug. 16, 1982]

HOW TO CUT INTEREST RATES

(By Lee A. Iacocca)

We are fast approaching the third anniversary of that day of infamy—Oct. 6, 1979—when Paul Volcker and the Federal Reserve Board let the prime rate float. The tidal wave of economic destruction set off by that decision has been awesome.

First it hit Detroit, setting off the longest car-sales depression in 50 years. Then it hit the housing industry, collapsing that market. Now it's swamping everybody. And almost everybody has begun to see that the Fed has to be tamed and the deficit cut. Where have they all been? The economy has been sputtering like a wet fuse since 1979.

Before then the United States had seen prime interest rates as high as 12 percent only once—during the Civil War. In 1979 the rate shot up over 20 percent and since then has not been as "low" as 15 percent until last week.

But not only are the interest rates too high, they are too volatile. Since the Fed decided to let the rate float, the prime rate has changed 80 times! That's once every 14 days! Like a yo-yo on a short string, the prime has been jerked around so many times that no one can plan for the future.

Twelve thousand businesses have gone belly up this year—the worst rate of failure since 1933. In June we had a business failure every 20 minutes around the clock. There

have been 140,000 homes foreclosed in the first quarter of 1982, the highest number since they began keeping records. The steel industry is operating at 43 percent of capacity.

The worst of this interest-rate madness is the human pain it is causing. Officially, 10.8 million people—9.8 percent of the work force—are now unemployed. That's the largest number since 1938 and the highest rate since 1941!

FRUSTRATED

But the official government numbers don't include the 1.5 million people who have stopped looking for jobs, nor the 6 million who are employed in part-time work. That's 18 million people who are angry, desperate and frustrated. And they are scaring another 18 million who think they'll be fired next. People that insecure don't make purchases that create jobs.

Part of the problem is the premium we are paying for uncertainty—that's the difference between the prime rate and the inflation rate. It used to be that the prime rate was 2 to 4 points higher than the inflation rate. Now it's 8 to 12 points higher.

As a result, a lot of people are diverting a lot of money into short-term securities. On top of that, the federal government will use up 56 percent of all the credit available to finance its deficit.

But guess what! Those guys who have diverted all that credit upstream have not created one additional job! They're all making money on money. And those of us who *do* create jobs, who *do* make investments in productivity and who want to expand and pay taxes, end up downstream waiting for a few measly drops of credit to get through so we can put a few people back to work.

Well, back in the Old West when somebody upstream diverted all the water away, the guys downstream got together and formed a posse. They rode upstream and had a little showdown with the people who were taking all the water. I'm not advocating violence. But something has got to give!

You can't have a supply-side fiscal policy and a demand-side monetary policy at the same time. It just won't work. Part of the problem is that the Fed, which decides our monetary policy, is accountable to nobody. Paul Volcker has become a central banker who is usurping the power of the commander in chief. That's got to change. Everybody—the administration, the Federal Reserve and the Congress—has got to get on one team and carry out one game plan.

The administration says that all of these problems are the result of 40 years of profligate spending by the Democrats. But for 17 of those 40 years, the Republicans ran the executive branch and all its agencies. So let's admit that it was a bipartisan screw-up. Let's forget about finding scapegoats and develop a bipartisan plan to save America.

What needs to be done is simple. We have to bring down interest rates—and fast. And there is one good way to do that: cut the federal deficit in half and get the government out of the money market. That will show the money brokers that our government is serious about fiscal reform.

But how do you cut the deficit in half? You take 5 percent out of the defense budget and 5 percent out of social programs. That saves $15 billion out of the hide of the administration and a matching $15 billion out of the hide of the Democrats.

At the same time, let's recommit ourselves to energy independence. Raise $15 billion with a surtax on imported oil that equals the difference between the OPEC price and the world spot price for crude oil. Add another 15 cents to the tax on gas at the pump and you get another $15 billion.

Add all these measures together and you get $60 billion. You cut the federal deficit to half. The prime rate comes down by 4 points overnight. You begin to sell cars, houses, steel and lumber—the things that keep this country going and people working.

TRAGEDIES

Let's stop the talk that we're hearing from Washington that maybe a couple of big bankruptcies would be good for the country. Big bankruptcies lead to big tragedies for little people. Instead let's hear Washington talk about jobs for people and a working economy for the nation. That's where America's strength is.

In June, at budget-writing time, the Congress and the administration had the chance to cut the deficit and send a clear signal to the money markets of America that they were serious about lowering interest rates. They failed.

In September, at appropriations time, they will have one last chance to send that signal. Time is running out. The economy has two wheels over the cliff. I hope all Americans will write their president, their senators and their representatives to tell them to stop this economic nonsense and get interest rates down to where consenting adults can engage in commerce again.

Americans can get their leaders to make the system work again. We have done it in every crisis America has ever faced. And we can do it now.●

IN THE PUBLIC BENEFIT

HON. MARGARET M. HECKLER

OF MASSACHUSETTS

IN THE HOUSE OF REPRESENTATIVES

Tuesday, September 21, 1982

● Mrs. HECKLER. Mr. Speaker, today I introduced the Public Benefits Eligibility Verification Act of 1982. This measure mandates that all States conduct crossmatches of applicant and recipient social security numbers against records of wages, deposits, and accounts in financial institutions, and other public records, in connection with any public benefit or subsidy program administered by any State using Federal funds. This legislation also authorizes—at State option—interstate crossmatching of such records.

Prompt enactment of this bill is needed because ineligible individuals and families are collecting a variety of public assistance benefits in various States, and States with crossmatching systems have demonstrated that such systems are effective in discovering fraud. Extending such crossmatching to an interstate basis would significantly add to such discovery, thereby saving State and Federal dollars that can be directed to truly deserving recipients.

In Massachusetts alone, a limited sampling has turned up 3,345 cases of public assistance recipients who have assets in excess of the allowable limits. It is estimated that the total amount of such undisclosed assets is $25 million. Of this amount, $8.9 million may be collected from determinations of fraud, and $1.5 million may be saved from a reduction in caseload.

I have urged disclosure of assets for several years, beginning in 1977, when—as a member of the Agriculture Committee—I offered an amendment providing for disclosure of financial resources held singly or in joint ownership by food stamp recipients. This legislation represents a comprehensive approach to that initial concept, in that it requires crossmatches in connection with a full range of public benefits. I urge its speedy consideration and passage by this Chamber.●

THE 10TH ANNIVERSARY OF THE KAISER-GEORGETOWN COMMUNITY HEALTH PLAN

HON. MICHAEL D. BARNES

OF MARYLAND

IN THE HOUSE OF REPRESENTATIVES

Tuesday, September 21, 1982

● Mr. BARNES. Mr. Speaker, this year marks the 10th anniversary of the Kaiser-Georgetown Community Health Plan, a noteworthy occasion for thousands of residents of Maryland, Virginia, and the District of Columbia.

The Kaiser-Georgetown Community Health Plan, in association with the Capital Area Permanente Medical Group, provides and arranges health care services to approximately 75,000 people. Kaiser-Georgetown is a region of the Kaiser-Permanente medical care program, the Nation's largest nongovernmental prepaid group practice health care delivery system. Kaiser-Permanente provides and arranges health care services for 4 million people nationwide.

In August 1980, the Kaiser-Permanente medical care program acquired the Georgetown University Community Health Plan, which had been in operation since 1972. The health plan was renamed the Kaiser-Georgetown Community Health Plan, and since acquisition has grown to 75,000 from a membership of 52,000. Members are served at locations in Gaithersburg and Kensington, Md.; Reston and Springfield, Va.; and Northeast District of Columbia. A new medical facility will open this fall in Landover, Md.

Kaiser-Georgetown Community Health Plan's anniversary marks the maturity of a health care delivery program founded as a cost-effective and efficient alternative to traditional delivery modes. Here in the Nation's Capital, the Kaiser-Georgetown Community Health Plan is a successful example of prepaid group practice, also referred to as a type of health maintenance organization (HMO). The prepaid group practice concept has long been recognized by medical economists

and health policy experts for its ability to control costs, while providing quality health care. The concept was given formal endorsement with the passage of the Health Maintenance Organization Act of 1973 by the Congress.

Mr. Speaker, on this significant occasion I urge you and all of my colleagues to join me in commending the Kaiser-Georgetown Community Health Plan for a decade of community service providing quality health care to the citizens of Maryland, Virginia, and the District of Columbia.●

STATE PER CAPITA RECEIPT OF FEDERAL BUDGET OUTLAYS

HON. THOMAS E. PETRI

OF WISCONSIN

IN THE HOUSE OF REPRESENTATIVES

Tuesday, September 21, 1982

● Mr. PETRI. Mr. Speaker, I would like to insert in the RECORD a table compiled by the Tax Foundation showing the per capita receipt of Federal budget outlays by State. The table shows that my own State of Wisconsin ranks dead last among the 50 States and the District of Columbia.

MAJOR FEDERAL BUDGET OUTLAYS BY STATE,[1] FISCAL YEAR 1980

State	Total distributed			Per capita	
	Amount (millions)	Percent of total	State rank	Amount	State rank
Total	$528,687	100.0		$2,334	
Alabama	8,829	1.7	21	2,270	25
Alaska	2,124	.4	42	5,304	2
Arizona	6,217	1.2	29	2,287	22
Arkansas	4,506	.9	34	1,971	42
California	61,464	11.6	1	2,597	11
Colorado	6,950	1.3	26	2,408	14
Connecticut	8,906	1.7	20	2,866	8
Delaware	1,319	.2	49	2,217	26
Florida	22,822	4.3	6	2,343	16
Georgia	11,089	2.1	17	2,029	35
Hawaii	3,151	.6	38	3,266	3
Idaho	1,995	.4	43	2,113	33
Illinois	23,033	4.4	5	2,017	36
Indiana	9,260	1.8	19	1,687	50
Iowa	5,214	1.0	33	1,790	47
Kansas	5,419	1.0	31	2,293	19
Kentucky	7,210	1.4	25	1,969	43
Louisiana	7,799	1.5	23	1,855	45
Maine	2,577	.5	40	2,292	20
Maryland	13,419	2.5	13	3,183	6
Massachusetts	15,119	2.9	11	2,635	10
Michigan	16,108	3.0	9	1,740	48
Minnesota	8,089	1.5	22	1,984	40
Mississippi	5,456	1.0	30	2,165	29
Missouri	13,271	2.5	14	2,699	9
Montana	1,802	.3	46	2,291	21
Nebraska	3,568	.7	37	2,273	24
Nevada	1,857	.4	45	2,324	17
New Hampshire	1,973	.4	44	2,143	30
New Jersey	14,253	2.7	12	1,936	44
New Mexico	4,231	.8	35	3,255	4
New York	40,742	7.7	2	2,321	18
North Carolina	10,173	1.9	18	1,732	49
North Dakota	1,667	.3	47	2,554	12
Ohio	19,756	3.7	7	1,830	46
Oklahoma	6,560	1.2	27	2,168	28
Oregon	5,218	1.0	32	1,982	41
Pennsylvania	25,174	4.8	4	2,121	31
Rhode Island	2,164	.4	41	2,285	23
South Carolina	6,226	1.2	28	1,996	39
South Dakota	1,627	.3	48	2,357	15
Tennessee	11,571	2.2	16	2,521	13
Texas	29,331	5.5	3	2,061	34

CONSUMER ADVOCATE FOR NRC

HON. BENJAMIN A. GILMAN

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Tuesday, September 21, 1982

● Mr. GILMAN. Mr. Speaker, On Thursday, September 16, 1982, I introduced on behalf of myself and my distinguished colleague, Mr. FISH, House Resolution 589, calling for the creation of an Office of the Consumer Advocate in the Nuclear Regulatory Commission. Citizens in my district live near the Indian Point nuclear facility in Buchannan, N.Y. Hearings had been underway for a number of weeks on the safety of the Indian Point facility until recently when the Nuclear Regulatory commission modified its order limiting the scope of testimony allowed in the hearings. After this order was issued, the Chairman of the Atomic Safety and Licensing Board panel presiding over the hearings, Judge Louis Carter, resigned. The hearings have now been temporarily suspended. As a result of my involvement in these hearings and with the concerned citizens participating in them and the events leading up to the hearings, I have concluded that a consumer advocate is needed in the Nuclear Regulatory Commission (NRC).

In the kind of investigation like the one at Indian Point and in other dealings citizens have with the NRC, an adversary relationship tends to develop where a cooperative effort between parties would result in the most beneficial outcome. The private citizen must spend his or her own time and resources in delving into the complex, technical issues involved in nuclear power administration; it is only natural that these citizens believe they are at a considerable disadvantage in trying to tackle an issue with the NRC and with industry representatives who have extensive expertise and resources. A consumer advocate could help bridge this gap created by the disparity of knowledge and information access by assisting citizens in understanding NRC decisions and in preparing materials to allow their valuable input in any factfinding endeavor involving the Nuclear Regulatory Commission.

Since the incident at Three Mile Island, much of the public, and especially those living near nuclear power facilities, has become apprehensive about the safe use of nuclear power. An Office of the Consumer Advocate would contribute greatly to the perception of our citizens that their safety is of concern to the Federal Government and to the Nuclear Regulatory Commission. This should be the first consideration in the operation of any nuclear power facility.

Accordingly, I urge my colleagues to become cosponsors of House Resolution 589, and ask that the full text of the resolution be printed in the RECORD at this point.

H. RES. 589

Resolution expressing the sense of the House of Representatives that an Office of the Consumer Advocate be established within the Nuclear Regulatory Commission

Whereas the Nuclear Regulatory Commission is responsible for the licensing and regulation of nuclear power facilities in the United States and is responsible for promulgating rules and regulations and making decisions which vitally affect the public health and safety;

Whereas private citizens have a vested interest in assuring that nonmilitary nuclear power is utilized in the most efficient and safe way possible;

Whereas this goal should be one shared both by the Nuclear Regulatory Commission and the public, and there is a need for a cooperative effort between the Commission and the public for a maximum sharing of information and assistance in the understanding of nonmilitary nuclear power;

Whereas information involved in an investigation or study of the nuclear power industry or of a nonmilitary nuclear power facility is both highly complex and technical;

Whereas private citizens, due to time and monetary constraints, have limited access to the information necessary for a full understanding of the ramifications and problems involved in the operations and effects of nuclear power facilities;

Whereas Nuclear Regulatory Commission and nuclear power industry officials have greater knowledge and expertise in the field of nonmilitary nuclear energy than the public;

Whereas the public is lacking in both the expertise and the financial resources necessary to a thorough understanding of nuclear power issues, and the public needs expert assistance in preparing questions and responses required in investigations of the nonmilitary nuclear industry and in understanding Commission decisions; and

Whereas a consumer advocate within the Nuclear Regulatory Commission could promote the sharing of knowledge and a better understanding of the issues involved in nonmilitary applications of nuclear energy, which will lead to the best solutions to problems and disputes involving the nuclear power industry and the consumers it serves and will also assure the public that the Commission is committed to protecting the

public safety and health in the utilization of nuclear energy: Now, therefore, be it

Resolved, That it is the sense of the House of Representatives that an Office of the Consumer Advocate should be established within the Nuclear Regulatory Commission.●

NEW YORK STATE ASSEMBLY REAFFIRMS SUPPORT FOR SECTION 504

HON. MARIO BIAGGI

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Tuesday, September 21, 1982

● Mr. BIAGGI. Mr. Speaker, I was pleased to learn that the Assembly of my home State of New York has gone on record in strong support of section 504 of the Rehabilitation Act, which assures civil rights protections for our disabled citizens.

This resolution, Assembly Resolution 765, calls upon President Reagan to continue to our Federal commitment to equal rights for the handicapped and that any changes that are contemplated for regulations governing this program, be done so in a fashion that will not alter the original intent of the law.

Mr. Speaker, as one of the original authors of this legislation, I am in full agreement with the position advanced by the New York Assembly. We cannot allow nearly a decade of progress that has been made on behalf of the handicapped to be wiped out with a single stroke of a pen. I will actively fight any attempts to alter section 504 of the Rehabilitation Act which could result in the abrogation of our commitment to the disabled. For the benefit of my colleagues, I wish to include the text of Assembly Resolution 765 for the RECORD:

STATE OF NEW YORK LEGISLATIVE RESOLUTION

Legislative resolution memorializing the President of the United States and the United States Congress to maintain the current statutory and regulation priorities regarding Section five hundred four of the Rehabilitation Act nineteen hundred seventy-three

Whereas, Members of the racial and ethnic minorities, women and disabled persons have been struggling for decades to establish the right to equal protection in the work place, in school and in society; and

Whereas, The impact of Section 504 of the Rehabilitation Act of 1973 and the corresponding regulations guaranteed uniformity in Section 504 enforcement by all Federal agencies, ensuring civil rights protections for all disabled people; and

Whereas, Since an intent of the Congress in passing Section 504 was to provide employment rights to qualified handicapped persons, job opportunities have begun to become a reality; and

Whereas, The federal government is now in the process of rewriting portions of the regulations under Section 504 which represents an attempt on the part of the administration to strip disabled persons of their long overdue civil rights; and

Whereas, These suggested regulatory changes would have the effect of creating two classes of disabled peoples in addition to interjecting the concept of "substantially equal opportunity" resulting in less than the equal protection granted other minorities and women; and

Whereas, The proposed changes represent a most serious threat to the civil rights of persons with disabilities; now, therefore, be it

Resolved, That this Legislative Body pause in its deliberations to memorialize the Honorable Ronald W. Reagan and the United States Congress to maintain the current statutory and regulation priorities regarding Section 504 of the Rehabilitation Act 1973, and be it further

Resolved, That copies of this Resolution, suitably engrossed, be transmitted to the Honorable Ronald W. Reagan, President of the United States, the President Pro-Tem of the United States Senate, the Speaker of the House of Representatives of the United States, to each member of Congress from the State of New York and to the Attorney General of the United States.●

HONORING U.S. DISTRICT JUDGE MOREY L. SEAR

HON. BOB LIVINGSTON

OF LOUISIANA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, September 21, 1982

● Mr. LIVINGSTON. Mr. Speaker, I know my colleagues join me in rising to pay tribute to a distinguished jurist who has served his country well, both as a Federal judge in the U.S. District Court for the Eastern District of Louisiana and as a judge and Ambassador at Large in the Panama Canal Zone.

On March 31 of this year, the U.S. District Court for the District of the Canal Zone terminated its jurisdiction after 60 years of service. From May 1977 until its closing, 28 district judges and two circuit judges served in that district court, but only one judge, Morey L. Sear, was chosen by the U.S. Court of Appeals for the Fifth Circuit to administer the sensitive and difficult transition of zone jurisdiction to the Panamanian courts.

With his characteristic dedication and enthusiasm, Judge Sear brought a structure and direction to the court in its final years of authority that should be a model for judges everywhere. Over the course of the 30-month transition period, he completed a docket of some 800 cases, thereby allowing the United States to fully meet its international obligations.

Equally important, Mr. Speaker, Judge Sear was an outstanding representative of the United States during a rather difficult period. His deep and sincere interest in the affairs of the Canal Zone and his ability to interact harmoniously with Panamanian officials were important factors in maintaining smooth relations with our neighbors to the south.

I thank him for all of these contributions, and I am glad that the country continues to benefit from his service on the Federal bench in Louisiana.●

TRIBUTE TO DAVID HYATT

HON. BILL GREEN

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Tuesday, September 21, 1982

● Mr. GREEN. Mr. Speaker, today I would like to pay tribute to a man who for the past 30 years has fought to improve human relations through the elimination of prejudice and discrimination. The leadership and guidance Dr. David Hyatt provided the National Conference of Christians and Jews (NCCJ) for 28 years, the last 9 of which he was president, will indeed be missed when he retires today.

Dr. David Hyatt began his career with the National Conference of Christians and Jews in 1954 when he assumed the position of national director of public relations. In 1958, he was promoted to vice president of public information. Dr. David Hyatt became the fourth president of the NCCJ on January 1, 1973. In response to his excellent work for the organization, he was elected president of the International Council of Christians and Jews in 1978. Throughout his career with the NCCJ, Dr. Hyatt has worked to build better relationships among persons of all religions, races, and nationalities.

Dr. David Hyatt will always be remembered for his impassioned stance against violence, terrorism, poverty, and discrimination. He has constantly spoken out on problems of racial and religious prejudice to civil, business, and social groups all over the country. Dr. Hyatt has worked to solve these problems through both the NCCJ and other organizations he has been associated with.

Today, Dr. David Hyatt should also be praised for his commitment to the improvement of human relations worldwide. He is a founder-sponsor of the Inter-Religious Task Force on Soviet Jewry and a member of the executive board of the American-Israel Friendship League. In addition, he is a member of the board of directors of the United Nations Association. Truly, Dr. Hyatt has dedicated his entire career to the betterment of mankind.

Today, I take pride in paying tribute to someone who has worked so hard in his efforts to sensitize the American community to the destructiveness of prejudice. I wish Dr. Hyatt well in his future endeavors, which undoubtedly will continue to involve the improvement of human relations worldwide.●

89-059 O-86-24 (Pt. 18)

OPTION TO PURCHASE SURPLUS FEDERAL LAND ON GUAM SHOULD BE OFFERED TO ORIGINAL OWNERS

HON. ANTONIO BORJA WON PAT

FROM THE TERRITORY OF GUAM

IN THE HOUSE OF REPRESENTATIVES

Tuesday, September 21, 1982

● Mr. WON PAT. Mr. Speaker, as you know, my district is a small island, 35 miles long and 8 miles wide, with much of its 225 square miles uninhabitable because of steep mountains and dense jungle in deep ravines. Habitable land is a premium to say the least.

On July 21, 1944, U.S. Forces began the invasion of Guam which culminated a few weeks later in the liberation of our people from the occupying forces of Japan. Since the war was not over, the Department of Defense authorized the acquisition, through condemnation, of much of our flat usable land to begin the buildup of airstrips, port facilities, warehouses, and other support services. This was done to launch an all-out air and sea attack on the Japanese homeland. Many of you will remember that many of the B-29's that bombed Japanese factories and transportation centers took off from Guam.

Guamanians were paid a mere pittance for their land at the time, but we considered the loss of our land a small price to pay for our liberation. After the war, much of this land was incorporated into what is now an extensive naval air and sea base and a major Air Force, SAC base. Negotiations are now underway to determine if these people whose land was condemned and now is part of the military complex were paid a just amount back in the post World War II period.

But now a sizable amount of land has been declared surplus to the the needs of the military. Some of this land has been donated to the Government of Guam for facilities such as parks and schools. But the administration is clamping down on such donations and is determined to sell its surplus land all over the Nation in order to bring additional revenue into the Treasury. I think this program has some merit in instances where it does not work a hardship on local governments.

However, because of the scarcity of habitable land on Guam, this decision of the administration to increase its sales of surplus Federal land does in fact work an extreme hardship on many of those people whose land was literally grabbed in the name of defense 38 years ago. Many of these landowners have been unable to purchase replacement land because it was and still is scarce. Given the Guamanian custom of raising large families, many now find themselves unable to carry out the tradition of partitioning their land to give to children as they grow into adulthood.

Some surplus Federal land is located in areas ideally situated for commercial development, but when this comes up for sale, the original owner may not be able to afford the price of the highest bid. To him this would be his last chance to recoup some of the loss he suffered 38 years ago when his land was purchased for a paltry sum.

It strikes me as being only fair to these people that when their land turns up surplus and is about to be offered for sale to the highest bidder, that they be given the right to purchase this land for the same price as they were paid by the U.S. Government back when it was obtained through condemnation. If the original owner is now deceased, this land should be offered to his heirs or successors.

Today, I am introducing such legislation to rectify a situation that I feel has been unfair to these former landowners. To give them first crack at what was once forcefully purchased from them is the least we can do for those who contributed in no small way to America's victory in the Pacific in World War II. I ask your early consideration of this legislation.

The text of the bill follows:

H.R. —

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That the head of any department or agency having jurisdiction over land in Guam that was acquired by the United States after July 21, 1944, and that is declared to be surplus to the needs of the Government shall, before making any other disposition of the land, make such land available for purchase by the person from whom the United States acquired the land. The price for which such land is made available shall be the amount of compensation paid by the United States for the land. If the person from whom the United States acquired the land is deceased or otherwise not available, the land shall be made available to the heir or other successor in interest of that person.●

IN SUPPORT OF H.R. 7048, PROVIDING PELL GRANT ELIGIBILITY GUIDELINES

HON. BENJAMIN A. GILMAN

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Tuesday, September 21, 1982

● Mr. GILMAN. Mr. Speaker, I rise in support of H.R. 7408, which sets the family contribution schedule for the Pell grant program in place for the 1983-84 academic year and provides a fail-safe mechanism for the 1984-85 academic year if the Secretary of Education fails to publish the schedule for 1984-85 as mandated by the timetable set up in the Higher Education Act of 1965. The education and the peace of mind of millions of Americans is dependent on the orderly promulgation of the family contribution schedule by the Department of Education.

It is absolutely essential that these regulations be issued in sufficient time, not only for students and educational institutions to make their plans, but also for Congress to review the adequacy of the regulations in terms of budgetary constraints and other congressional restrictions. As a result of the hardship caused by the increasing delays by the Department of Education in issuing these regulations, the House Subcommittee on Postsecondary Education and its distinguished chairman, Mr. Simon, should be commended on their swift and thorough work to assure that the low- to middle-income students of this Nation are assured timely information on what rules will govern their eligibility for loans and under what terms. A delay in the publication of the rules governing the family contribution schedule at the Federal level delays the whole process of awarding moneys at the State and local level and of informing students and their families of eligibility standards in sufficient time before the academic year begins.

H.R. 7408 also contains an important provison affecting veterans, which I strongly support. In the 1982-83 family contribution schedule, veterans student benefits are considered as student assistance. This means that the majority of veterans are ineligible for Pell grant awards. H.R. 7408 would treat veterans' benefits as they had been treated in previous years, by counting one-half of the benefit as income and excluding the remaining benefits for 1983-84. For 1982-83 the bill instructs the Secretary of Education to use Pell grant funds appropriated in the supplemental to restore awards to veterans denied Pell grant moneys because of the 1982-83 family contribution schedule language. I congratulate the subcommittee for attempting to remedy a terrible hardship for veterans across the Nation. Hundreds of veterans discovered at the last minute this year that they were not entitled to educational assistance and thus were denied the hoped-for opportunity to pursue the education, which this country surely has a responsibility to assist them in getting, as they have served us so well in protecting this Nation. I urge my colleagues to support this important bill.●

BIG BROTHERS, BIG SISTERS

HON. CARROLL A. CAMPBELL, JR.

OF SOUTH CAROLINA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, September 21, 1982

● Mr. CAMPBELL. Mr. Speaker, the Citizens Stamp Advisory Committee is

presently considering recommending a commemorative postage stamp in honor of the Big Brothers/Big Sisters movement. I rise today in strong support of this proposal.

The Big Brothers/Big Sisters program has been filling a void in the lives of many children across the country. The volunteers in this movement have provided guidance and friendship to children from one-parent homes for nearly 80 years. Although the program currently serves approximately 100,000 children nationwide, there are nearly the same number of children on the waiting lists, due to a lack of volunteers. In my congressional district, the city of Greenville has 98 volunteers serving as Big Brothers or Big Sisters. However, there are also 88 children waiting to be assigned a volunteer.

During a time when the President is seeking an increase in volunteerism and private initiatives, I believe we must assist organizations such as the Big Brothers/Big Sisters in any way possible. Issuing a commemorative stamp would not only focus national attention on this organization and assist in the recruiting effort, it would also honor the thousands of present volunteers for their outstanding work and high ideals.

Mr. Speaker, it is my hope that the Citizens Stamp Advisory Committee will incorporate the Big Brothers/Big Sisters movement among those distinguished social service organizations that have received this recognition and distinction in the past. Issuing a commemorative stamp is the least we can do in honoring the dedicated Big Brothers and Big Sisters of America.●

THE 90TH ANNIVERSARY OF ABERDEEN'S INCORPORATION

HON. ROY DYSON

OF MARYLAND

IN THE HOUSE OF REPRESENTATIVES

Tuesday, September 21, 1982

● Mr. DYSON. Mr. Speaker, on Saturday, September 18, 1982, the city of Aberdeen, Md., hosted a day-long celebration of the 90th anniversary of the town's incorporation. The last 90 years in the history of Aberdeen have shown substantial development and progress to which well-deserved tribute should be paid.

The history of this thriving community began at the intersection of two major but primitive roads, the Philadelphia Post Road and Bush Neck Road, in the 1670's. Originally known as Hall's Cross Roads, the settlement of Aberdeen became firmly established with the construction of the Philadelphia, Baltimore, and Wilmington Railroad in 1835. During this construction, a Mr. Winston from Aberdeen, Scotland, built his home near the railroad right-of-way and later conducted all railroad business from his house in his capacity as first station agent. Through his influence, the station, and later the town, was named after his home in Scotland.

After the Civil War, Aberdeen grew into a sizable community of 600 people due to the foundation of a canned goods industry there and the extension of the Baltimore and Ohio Railroad through Aberdeen. The railroad greatly facilitated the transportation of the canned goods into the marketplaces of Baltimore, Washington, and Philadelphia. Later during World War I, the excellent railway and waterway facilities and the accessibility to Washington, D.C., made Aberdeen an ideal location for the Army's proposed testing site for large caliber guns, and thus Aberdeen Proving Grounds was established outside of the town. Aberdeen Proving Grounds was expanded during World War II to accommodate more testing facilities and was established as a training center for ordnance troops.

The town of Aberdeen has seen its most substantial growth since the turn of the century. As the railway and highway systems were improved, many industries found Aberdeen to be an excellent location for their facilities, with the benefit of low taxes and expenses and with easy access to several major cities. The number of small businesses grew to accommodate the influx of people attributed to industry and the proving grounds, and as Aberdeen Proving Grounds expanded to be a major testing base for the Army, the prosperity of the housing construction industry soared because of low building costs in the area.

The area has been benefited by two weekly newspapers, the Aberdeen Enterprise, which was first published in 1881, and the Harford Democrat, which has been published since 1868. These papers were later purchased and consolidated by J. Wilmer Cronin, a leading citizen of the community who has recently left the newspaper and his contributions to the community as his legacy.

As the citizens of Aberdeen celebrate the 90th anniversary of the town's incorporation, they pay tribute not only to progress and the development of a strong, viable community, but also to a history rich in tradition. One of the unique characteristics of Aberdeen is its ability to retain its small-town atmosphere in the midst of such great expansion. Not far from the industrialization that provides a strong economic base and the testing facilities of Aberdeen Proving Grounds that provide security to our national defense base, extensive farming and waterfowl hunting preside in the rural environment that still exists in the community.

It is with great pleasure that I join the citizens of Aberdeen in honoring this unique town. Despite its blossoming development, these citizens have perpetuated a close-knit community with the help of an effective town government and the sincere concerns of its residents. I am proud to represent this town as part of my district and to play a small part in its rich history.●

BRUTAL SUPPRESSION AND SERIOUS ABUSE OF HUMAN RIGHTS

HON. SAM GEJDENSON

OF CONNECTICUT

IN THE HOUSE OF REPRESENTATIVES

Tuesday, September 21, 1982

● Mr. GEJDENSON. Mr. Speaker, as a member of the House Foreign Affairs Committee, I have heard too many tragic stories of brutal suppression and serious abuse of human rights in countries of authoritarian, repressive rule. Some of the witnesses appearing before the committee escaped torture in South Africa, others indefinite detention in the Philippines, and still others fled certain death in El Salvador. The "crimes" they committed were those of political opposition to the regimes now in power. In fear for their lives these people fled to the United States, the traditional nation of refuge, to escape reprisal at the hands of their governments.

These witnesses, representative of many thousands, chose the United States for good reason. Since the 1600's when the Puritans settled at Plymouth, Mass., in their flight from religious persecution in England, to the Jews escaping Nazi Germany and today the Salvadorans, America's history is replete with stories of those who have found asylum here. Former freedom fighters from Afghanistan, critics of Chile, and even former officials of governments once supported by the United States such as Iran, find they must turn to the United States to escape the long arms of their nation's security forces.

In response, the United States has developed a noble tradition of sheltering the persecuted which has been written into U.S. extradition law, stating that foreign nationals cannot be extradited for "an offense of political character". Now, I fear, that noble tradition is to be tarnished by the introduction of new extradition legislation, S. 1940 offered by Senator THURMOND and its companion bill, H.R. 6046, in the House. These bills would allow up to 60 days detention without bail on the merest allegation of wrongdoing by a foreign government. Shockingly enough, suspension of the right of bail before a showing of probably cause is an integral part of this proposal to revise extradition law. As the Ameri-

can Civil Liberties Union (ACLU) recently noted, these provisions "erode the constitutional presumption of innocence", as men and women can be arrested without any proof that they are guilty of a crime.

What these changes in the law mean to those accused should be readily apparent; cases of authoritarian governments charging their political opponents with criminal law violations as a shadowy pretext for arbitrary detention are too numerous to mention here. Under current law, a U.S. court conducts an independent judicial review of the charges to assess whether they are genuinely criminal violations. If H.R. 6046 were to pass however, the courts would, in effect, be forbidden to examine whether a request for extradition by a foreign government is really a subterfuge for persecution. As Christopher H. Pyle, professor of constitutional law and civil liberties at Mount Holyoke College, noted recently in the New York Times, the courts would not "be allowed to hear evidence that the charges against the accused resulted from torture or to deny extradition on the grounds that the requesting regime is notorious for brutal interrogations, unjust trials or cruel punishment". In short, a country's "capacity for justice" would not have to be considered in extradition deliberations.

Who, then, would be charged with the responsibility of deciding proper grounds for extradition? A second provision of H.R. 6046 answers this by stipulating that extradition be taken out of the courts and put into the hands of the Secretary of State to be his exclusive domain, thus giving complete control of an essentially judicial question to the executive branch of our Government. This, I fear, would put the fate of foreign nationals, questionably accused by their governments, under the purview of the State Department, a bureau bound by foreign policy and diplomatic concerns that do not similarly constrain the judicial branch of Government. We have seen, for example, how the State Department has handled the question of political asylum for the Salvadorans. Political motives rather than objective consideration of the merits of the case govern State Department policy to deny refuge to the Salvadorans.

We cannot let the current wave of court-stripping and politicization of essentially judicial matters now color U.S. extradition law. The lives of many thousands are at stake in the maintenance of due process. I urge my colleagues today to reject the proposed changes in our extradition law as embodied in H.R. 6046.

NATIONAL NEWSPAPER CARRIER APPRECIATION DAY

HON. FRANK R. WOLF

OF VIRGINIA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, September 21, 1982

● Mr. WOLF. Mr. Speaker, I would like to bring to the attention of my colleagues a resolution which I am introducing today that will proclaim October 16, 1982, as "National Newspaper Carrier Appreciation Day."

It is important that we show our appreciation to the more than 1 million newspaper carriers in the United States. Too many times the efforts of newspaper carriers go unappreciated and unrecognized, with many people taking newspaper delivery for granted. Now is the time to recognize the devoted efforts of the many individuals who deliver the news of the world to our doorsteps and to let them know that we support their hard work and dedication.

Each day, more than 107 million Americans read one or more of the 9,396 daily, weekly, or other newspapers published in the United States and of that total, 83 percent are delivered to the homes of the readers. I believe it is also significant to point out that of the approximately 1 million newspaper carriers in the United States, 90 percent are 18 years of age or under.

Not only does newspaper delivery provide part-time employment for over 1 million people, it also provides the opportunity for young people to gain experience and confidence in what is many times their first job. It is an excellent way for them to learn how to earn and appreciate the value of money and to learn a sense of responsibility in knowing that others are depending on them daily. In short, for young people, a job as a news carrier builds character.

I hope my colleagues will join me in cosponsoring and supporting this resolution.●

JEWISH LEADERS HORRIFIED

HON. JOHN CONYERS, JR.

OF MICHIGAN

IN THE HOUSE OF REPRESENTATIVES

Tuesday, September 21, 1982

● Mr. CONYERS. Mr. Speaker, I commend the increasing number of American Jewish leaders who in good conscience cannot remain silent any longer. The Washington Post carried this report by Caryle Murphy:

The article follows:

U.S. JEWISH LEADERS EXPRESS HORROR AT KILLINGS IN WEST BEIRUT

(By Caryle Murphy)

American Jewish leaders yesterday generally welcomed the idea of returning U.S. troops to Lebanon and called for the speedy withdrawal of all foreign forces from the country. Some said Israel should withdraw immediately from Beirut as requested by President Reagan.

The Jewish leaders unanimously expressed horror and revulsion at what one group termed the "cold-blooded murder" of Palestinians in refugee camps in West Beirut over the weekend, and several said Israel bears some responsibility for the killings by failing to enforce law and order after occupying West Beirut.

Most Jewish spokesmen contacted expressed support for an investigation by the Israeli government into how the massacre took place and agreed that "those responsible be brought swiftly to justice," as the Union of American Hebrew Congregations put it in a statement.

Henry Siegman, national executive director of the 50,000 member American Jewish Congress, also demanded that Israel "sever all of its ties with the murderous Christian militias responsible for this outrage.

"If Israel's abhorrence of the Palestine Liberation Organization (PLO) is to continue to have moral credibility then it must treat those responsible for this atrocity with the same abhorrence," Siegman said.

Siegman was backed in this view by Alexander M. Schindler, president of the Union of American Hebrew Congregations, who said Israel must "sever relations with any Lebanese force found guilty of this foul deed."

Up to now Israel has seen the Christian militias as allies in its struggle to impose a stable, pro-Israel government in its northern neighbor.

Siegman, in the most critical remarks, said in an interview that he supported the return of U.S. troops to Beirut, and the withdrawal of Israel from that city because "Israel has no business playing the role of restorer of Lebanon's stability; they should not be the policemen of the Middle East."

While the Jewish community both in Washington and around the country appears divided over Israel's responsibility for the massacre of the Palestinian civilians, a number of spokesmen said yesterday that Israel could not avoid bearing part of the blame even if only by omission.

"All nations—Lebanese Christians, Lebanese Muslims, Palestinian terrorists, Syrians and Israelis, now embroiled in the conflict share a certain amount of guilt" for the massacre, said Rabbi Joshua O. Haberman, president of the Washington Board of Rabbis, which represents about 80 area Jewish rabbis.

"Because Israel assumed responsibility by moving into Beirut, therefore it owes an answer as to why it exercised such bad judgment in allowing Christian militias to enter the Palestinian camps," Siegman said. "It is important to distinguish between guilt and responsibility. I do not believe Israel shares in the guilt; however they do share in some responsibility."

Rabbi Arthur Hertzberg, a former president of the American Jewish Congress and long-time critic of the government of Prime Minister Menachem Begin, said, "It was at worst, carelessness or misunderstanding of the real nature of the situation." He called on Begin and Defense Minister Ariel Sharon to resign, adding: "They accepted the responsibility as policemen and they failed in responsibility. In any decent democratic society, if you fail in your responsibility, you resign."

Some Jewish leaders, however, denied that Israel bears any responsibility for the massacre.

Rabbi Joseph B. Glaser, the New York-based executive vice president of the Central Conference of American Rabbis, said, "It is a cruel, horrible and ironic thing that Israel should be weighed down with any kind of responsibility for this . . . I don't think that you can say that because Israel failed to close all the gaps and keep these people out, that they can be held responsible."

Glaser and Julius Berman, chairman of the Conference of Presidents of Major American Jewish Organizations, said the massacre was a result of the "epidemic nature of terrorism" and criticized Pope John Paul for receiving PLO chairman Yasser Arafat.

One leader of the Washington Jewish community who asked for anonymity said he believed the weekend killings will further contribute to the privately voiced sentiment among a section of Jewish leadership that "Menachem Begin may have one great service to perform for the Jewish people—to resign." However, he stressed that this sentiment is not widespread enough that spokesmen feel compelled to express it publicly.

B'nai B'rith's international president Jack Spitzer said his organization supports the "elimination of private militias and the withdrawal, as soon as possible, of all non-Lebanese forces" from Lebanon. Spitzer would not lay any blame on Israel for the massacre anymore than he would "blame a [city] police force for murder."

The American Jewish Committee said it was "shocked at the atrocities committed in Palestinian camps in Beirut over the weekend and we grieve for the victims." In a statement, it called upon the U.S. to speed the departure of all foreign armies and to work towards the restoration of civil order in Lebanon.

Hyman Bookbinder, the committee's Washington representative, added, "That would include the judicious use of American forces again."

Only a few Jewish leaders yesterday questioned the value of an investigation into how those who committed the slaughter were able to get past Israeli forces surrounding the camps. Haberman said his board feels "it is pointless to quibble about the exact proportion of responsibility" among all the feuding groups. And B'nai B'rith's Spitzer raised the issue of whether results of the investigation would be accepted.

"Would you accept as impartial and factual an investigation by the Israeli government?" he asked.

I ask my colleagues to join me to implement the following recommendations:

First. A cutoff of all military aid to all countries in the Middle East.

Second. A withdrawal of all troops save those sent under United Nations auspices.

Third. Increased supplies of medical assistance and food to both Lebanese and Palestinians in Lebanon.

Fourth. Withdrawal of our U.S. Ambassador from Israel.●

BUDGET COMMITTEE SCOREKEEPING ON AGRICULTURE, RURAL DEVELOPMENT AND RELATED AGENCIES APPROPRIATION BILL

HON. LES ASPIN

OF WISCONSIN

IN THE HOUSE OF REPRESENTATIVES

Tuesday, September 21, 1982

● Mr. ASPIN. Mr. Speaker, I am inserting in the RECORD a cost analysis of the Agriculture appropriations bill, prepared by the staff of the House Budget Committee using data supplied by the Congressional Budget Office. The analysis shows that the Agriculture Subcommittee at this point is billions of dollars under its targets—the subcommittee as a whole is $2,845 million in budget authority and $1,785 million in outlays under the subcommittee targets set by the Appropriations Committee pursuant to sec. 302(b) of the act.

However, it should be noted that the subcommittee identifies a variety of supplemental appropriations that will be necessary next spring—and these should be taken into account in assessing where the subcommittee stands. Specifically, the committee report states that the funding for WIC—the women, infants, and children feeding program—is intended to be sufficient only through May 15, 1983; that food stamps funding is sufficient only through July 15; and that child nutrition funding is sufficient only through August 15. If amounts were added for these programs to fund them for the full year at levels assumed in the budget resolution, the subcommittee would still be under target in budget authority but over target in outlays.

EARLY WARNING SUMMARY, H.R. 97-7072, AGRICULTURE, RURAL DEVELOPMENT AND RELATED AGENCIES APPROPRIATION, FISCAL YEAR 1983

Floor action: Tentatively scheduled for Tuesday, September 21, 1982.

Scorekeeping: The functional totals included in the First Budget Resolution conference report are allocated to the appropriate House committees in accordance with Section 302(a) of the Budget Act. Each committee then divides the 302(a) allocation among its subcommittees or programs and reports its subdivisions back to the House in a 302(b) report. It is this 302(b) report that the House Budget Committee uses to "score" a spending bill.

Scoring of this bill: Using the 302(b) report, the Budget Committee makes several comparisons to determine whether or not a spending bill is within the targets of the First Budget Resolution. In scoring a spending bill, the Budget Committee pays particular attention to programs over which a committee has funding discretion. For example, the Appropriations Committee is bound by existing law and generally cannot effectively reduce amounts required for the funding of mandatory programs. Many of these comparisons are for informational purposes only; the only procedural sanction is deferred enrollment which causes a conference report to be held at the desk if the discretionary budget authority exceeds its target.

(1) Discretionary programs in bill: The bill is under the subcommittee's total. This bill would not be subject to the deferred enrollment provisions of the Budget Resolution.

(2) Mandatory programs in bill: The bill is under the subcommittee's total.

(3) Overall bill total: The bill is under the subcommittee's total.

(4) Credit targets: The bill is under the subcommittee's totals for direct loans and primary guarantee commitments.

(5) Supplemental amounts which may be required: Future anticipated funding requirements also in this Subcommittee's jurisdiction if added to this bill should not breach this subcommittee's 302(b) budget authority target, but it would breach its outlay target by $234 million.

For additional details see the attached early warning report.

EARLY WARNING ADDITIONAL DETAIL, HOUSE BUDGET COMMITTEE

Bill: H.R. 7072, agriculture, rural development and related agencies appropriation, fiscal year 1983

STAFF ANALYSIS

Committee: Appropriations.

Subcommittee: Agriculture, Rural Development and Related Agencies.

Chairman: Mr. WHITTEN (Mississippi).

Ranking minority member: Mrs. SMITH (Nebraska).

Scheduled: Presently not scheduled.

I. Description of bill

This bill provides funds for the Department of Agriculture and related agencies for fiscal year 1983.

II. Comparison with target for discretionary appropriations action

Pursuant to the Budget Act and HBC scorekeeping, the subcommittee has two targets: one for discretionary programs and one for mandatory programs. Since the Appropriations Committee is bound by existing entitlement law, it generally cannot effectively change the amounts required for the funding of mandatory programs. The Subcommittee's target for discretionary programs is therefore the main focus for this Early Warning report. That target is specified in the report of the Appropriations Committee made pursuant to Sec. 302(b) of the Budget Act, in which the Appropriations Committee subdivided to subcommittees the amounts allocated to it in the First Budget Resolution for Fiscal Year 1983.

Further, if the conference report on this appropriation bill, combined with any other fiscal year 1983 appropriations that the subcommittee may have enacted this session, causes the target for discretionary budget authority to be breached, then the bill will be subject to the "deferred enrollment" provision of Section 4 of the Fiscal Year 1983 First Budget Resolution.

The summary table below shows that the subcommittee's possible full-year total is under its discretionary budget authority target and over its discretionary outlay target. Therefore, this bill is not subject to deferred enrollment. The numbers in the summary table would change only with floor amendments, Senate action, or conference action on this bill. Possible future supplements are discussed in Section IV below.

III. Summary table

[In millions of dollars]

	Budget authority	Outlays
The amounts shown below are only for discretionary 1983 spending by this subcommittee:		
1. Discretionary amounts in bill	22,500	16,103
2. Prior action		
3. Total action to date	22,500	16,103
4. 302(b) target	24,940	17,810
5. Over(+)/under(−)	−2,440	−1,707
6. Amounts assumed but not yet considered	1,956	1,901
7. Over(+)/under(−)	−484	+194
The amounts shown below are only for mandatory programs that are funded by this subcommittee:		
8. Mandatory amounts in bill	572	570
9. Prior action	2,645	3,723
10. Total	3,217	4,293
11. 302(b) target	3,622	4,370
12. Over(+)/under(−)	−405	−77
13. Supplemental amounts needed	430	118
14. Over(+)/under(−)	+25	+41
The amounts shown below include both discretionary and mandatory amounts:		
15. Total amounts in bill	23,072	16,672
16. Prior action	2,645	3,723
17. Total	25,717	20,395
18. 302(b) total target	28,562	22,180
19. Over(+)/under(−)	−2,845	−1,785
20. Supplemental amounts	2,386	2,019
21. Over(+)/under(−)	−459	+234

Note.—Detail may not add due to rounding.

IV. Explanation of over/under

Since the assumptions behind a committee's 302(b) subdivision are not required to be provided to the House, the House Budget Committee is unable to give a definitive answer to the question of where a particular bill is over or under a committee's 302(b) subdivision. The Budget Committee can only compare the items in the bill to the assumptions contained in the budget resolution. It is important to note that the line item assumptions in the budget resolution are not binding on a committee. A list of the major areas where there bill differs from the budget resolution follows:

Food stamps funding is $1,587 million in budget authority and $1,629 million in outlays below the resolution due to the bill assuming funding only through July 15, 1983.

Child nutrition funding is $428 million in budget authority and $115 million in outlays below the resolution due to the bill assuming funding only through August 15, 1983.

WIC funding is $312 million in budget authority and $216 milion in outlays below the resolution due to the bill assuming funding only through May 15, 1983.

CCC short term export credit is required to be funded by the administration at not less than $500 million in direct loans resulting in the bill being zero in budget authority and $413 million in outlays above the resolution.

V. Credit

The First Budget Resolution contains targets for credit program amounts. As with budget authority and outlays, the Appropriations Committee is allocated amounts for credit activities, and subdivides those amounts among subcommittees. For comparative purposes, the table below shows the bill and the credit subdivisions.

[In millions of dollars]

	Direct loan obligations	Primary guarantee commitments	Secondary guarantee commitments
1. Credit program limits in the bill	7,684	6,381	
2. Limits assumed in the budget resolution not acted upon in the bill and other amounts not subject to limit	14,091	−5,239	
3. Total in bill	21,775	1,142	
4. Credit subdivisions	23,250	1,500	
5. Over (+)/under (−)	−1,475	−358	

The Budget Committee can only compare the items in the bill to the assumptions contained in the budget resolution. It is important to note that the line item assumptions in the budget resolution are not binding on a committee.

The 302(b) allocation is $1,167 million in direct loans above the resolution and $92 million in primary loan guarnatees below the resolution. A list of the major areas where this bill differs form the budget resolution follows:

Direct Loans

The bill does not provide for moderate income housing loans; whereas, the resolution provided for $430 million.

The bill provides $1,460 million for farm operating, irrigation and drainage, grazing, and recreation loans, which is $120 million above the resolution.

Primary Guaranteed Loans

The bill provides REA with $5,950 million which is $450 million below the resolution.

VIII. Definitions of terms in summary table, section III

Line 1. Discretionary amounts in bill: discretionary fiscal year 1983 appropriations in H.R. 7072.

Line 2. Prior action: the fiscal year 1983 budget authority and outlays for this committee that were appropriated in prior bills this session.

Line 3. Total action to date: line 1 plus line 2.

Line 4. 302(b) target: the target for discretionary appropriations set by the Appropriations Committee pursuant to the Budget Act.

Line 5. Over (+)/Under (−): line 3 minus line 4.

Line 6. Amounts assumed but not yet considered: these are amounts assumed in the fiscal year 1983 budget resolution for which funding has been deferred by the Appropriations Committee, probably until next Spring's supplemental appropriations bill.

Line 7. Over (+)/Under (−): line 5 plus line 6.

Line 8. Mandatory amount in bill: funding for mandatory programs (entitlements).

Line 9. Prior action: outlays from budget authority enacted for years prior to fiscal year 1983, plus permanents and advance appropriations assigned to the Appropriations Committee.

Line 10. Total: line 8 plus line 9.

Line 11. 302(b) target: the target for mandatory amounts set by the Appropriations Committee. The target set by the Appropriations Committee includes the effect of assumed authorizing legislation that would change the level of mandatory programs.

Line 12. Over (+)/Under (−): line 10 minus line 11.

Line 13. Supplemental amounts needed: amounts for any new entitlement legislation assumed in the budget resolution and to fund mandatory items in the bill at the level estimated in the budget resolution.

Line 14. Over (+)/Under (−): line 12 plus line 13.

Lines 15 through 21. These lines equal the sums of lines 1 and 8, lines 2 and 9, etc., respectively.●

SENATE—*Wednesday, September 22, 1982*

(Legislative day of Wednesday, September 8, 1982)

The Senate met at 10 a.m., on the expiration of the recess, and was called to order by the President pro tempore (Mr. THURMOND).

PRAYER

The Chaplain, the Reverend Richard C. Halverson, D.D., offered the following prayer:

Loving Father in Heaven, we thank Thee that Thou hast given a remedy for anxiety * * * "Have no anxiety about anything, but in everything by prayer and supplication with thanksgiving let your requests be made known unto God. And the peace of God, which passes all understanding, will keep your hearts and your minds in Christ Jesus." (Philippians 4: 6–7)

Patient Father, no one who does not work here can possibly comprehend the unforgiving pressure under which the Senate operates: pressures from constituents, from lobbyists, from diverse self-interest groups; corrupting, seductive, destructive pressures of power, position, and prestige; the pressure of having to live in two cities with the travel demands. The awesome pressure of decisions involving nation and world and affecting millions. The relentless pressure of responsibility that will not go away and from which there is never an escape; financial pressure, family pressure, peer pressure.

Teach Thy servants, dear Lord, that they have recourse to Thy love and grace and peace. Cause them to turn to Thee in times of frustration, finding in Thee rest and refreshing. In the name of Him Who said, "Come unto Me all ye who labor and are heavy laden, and I will give you rest." Amen.

RECOGNITION OF THE MAJORITY LEADER

The PRESIDENT pro tempore. The majority leader is recognized.

THE JOURNAL

Mr. BAKER. Mr. President, I ask unanimous consent that the Journal of the proceedings of the Senate be approved to date.

The PRESIDENT pro tempore. Without objection, it is so ordered.

THE PACE OF LEGISLATIVE ACTIVITY

Mr. BAKER. Mr. President, I believe the phrase goes something like—"Yesterday all my troubles seemed so far away, now it looks as though they're here to stay."

Just 1 month ago, I was announcing to my colleagues the possibility of the Senate recessing no later than October 2 and returning in January. At home, my wife and I were making plans for after Thanksgiving. For once, my schedule did not read like a horror story.

But I should have known better than to plan ahead. Things changed for the worse faster than they had gone for the better. First, it became obvious that the Senate's pace of legislative activity was moving at a rate similar to that of the Shirley Highway during rush hour. Then, it became clear to the Speaker of the House and myself, after, I might add, it became clear to the President, that Congress would have to return after the November election to complete the appropriations process.

Now, Mr. President, I know what you are thinking. You are thinking, by gosh how could things get any worse, what more could go wrong? Well, it was not easy, but they did. For now, it appears that not only will we have to be in session for a good portion of the rest of the year, but we will not even be able to escape into the throes of a NFL game. We might as well stay in session on Sundays; we might as well throw out the TV's in the cloakrooms; we might as well give up trying to understand Howard Cosell; and we might as well just give up on the notion of being happy.

But, there may be some hope in sight.

SENATE AGENDA

PROSPECTIVE ELECTION RECESS—OCTOBER 1, 1982

Mr. BAKER. Mr. President, I am pleased to report this morning that in conference with the minority leader yesterday, it appears that our friend, the Speaker of the House of Representatives, may not be quite so adamant concerning the October 8 recess date as I had thought earlier and announced earlier. I am sure every Member of the Senate joins with me in expressing our appreciation to the minority leader, to the assistant minority leader, and the chairman of the Democratic conference (Mr. INOUYE), who I believe discussed this matter with the Speaker. I freely acknowledge they had a lot more success than I did.

In any event, I fully share the thought that October 1 is a good time for us to try to recess for the October period preceding the election. I would like to do that.

THE DEBT LIMIT BILL

Let me outline the items that I feel we must do in order to accomplish that recess time.

First of all, the pending business, the unfinished business, the debt limit, must be disposed of. There is a cloture vote today. A motion has been filed for a cloture vote tomorrow. There are a number of other amendments that I believe Senators may offer to this bill. I have represented on the floor a number of times that Senators be given an opportunity to offer other amendments, including nongermane amendments, to the debt limit bill.

Members should be reminded that I have also indicated that, we must pass this bill and we must do so in a timely way. What that means is that we have to do it this week, in my judgment. That may entail, if we cannot finish the bill otherwise, a motion to recommit the bill with instructions to report back forthwith a clean bill as passed by the House of Representatives so we can transmit that measure to the White House for the President's consideration and signature.

Mr. President, no one should be taken by surprise. I have said a number of times that at some point, if necessary, I would be willing to file a motion to recommit with instructions. I hope such a motion would pass and that the resolution would pass. But I once again state that we have to do the country's work and that is one of the urgent items that must be dealt with if we are to go out of here the 1st of October.

Mr. President, it is possible, and I have not yet discussed this with the Senator from North Carolina or others, that the time between noon today and sometime tomorrow, if cloture is not invoked today, might be a good time to take up those other amendments. It would, of course, require unanimous consent to do so. That is, unanimous consent to temporarily lay aside the pending amendment, which is the Baucus amendment, and permit other Senators to offer amendments. I will consult with, first, the minority leader and other Senators to see if there is a willingness to do that.

Once again, what I am suggesting is the possibility that if cloture is not invoked today against further debate on

the Helms amendment, we might create an opportunity, between, say, about 12:30 p.m. today, whenever the cloture vote is over, and sometime tomorrow, perhaps around noon tomorrow, for Members to offer other amendments to the debt limit bill.

Let me hasten to say that I am not encouraging other amendment. Indeed, I hope that Members will forbear to offer other amendments because we need to pass this debt limit bill. That request is not now made, Mr. President, but I wish to put Senators on notice of that possibility.

I have consulted with the minority leader, who has not agreed to that request, but I would like to consult with him further to see if we can expedite such a procedure or a similar procedure.

HUD, MILITARY CONSTRUCTION, TRANSPORTATION, AND AGRICULTURE APPROPRIATIONS

Mr. President, in addition to the debt limit, it is clear that we have to do as much of the appropriations process as possible. We have now from the other body the HUD and military construction appropriations bills.

I have asked the chairman of the Appropriations Committee to give me an estimate of how long these measures should take and to begin shopping for unanimous-consent agreements to limit the time for debate on those measures. I urge Senators to consider that if we are going to get out on October 1 we will have to have very short time limitations on the available appropriations bill. I am hopeful those two might not take very long.

In addition to those appropriations bills, Mr. President, we expect to receive from the House of Representatives the transportation and agriculture appropriations bills before this week is out. If that indeed materializes, then we will begin to shop for unanimous-consent agreements on them as well. I will consult with both the minority leader and the chairman of the Appropriations Committee in that respect.

There are a number of other appropriations bills that have been reported by the Senate Appropriations Committee. We have not yet come to terms on how we would deal with them. That is, bills which have not yet been received from the House. I will consult with the chairman, the ranking member and the minority leader on them as well.

At the moment, it seems to me that we need to be prepared to do the HUD and military construction appropriations bills as well as transportation and agriculture. There may be others, but those four, it seems, are most likely to mature for our consideration before we can go out on October 1.

CONTINUING RESOLUTION

It is apparent, Mr. President, that in addition to those four bills we will have to make arrangements for the operation of the Government from October 1 until after we return, which I now perceive to be November 29. Some Members are urging an earlier return than that. We have not yet fixed a date for return. But in any event, if we pass only four appropriations bills, it is obvious to every Senator that we will have to pass a continuing resolution for the balance of the process for those bills on which we have not completed action.

So the CR, the continuing resolution, must be added to that list of absolute must items.

By passing the continuing resolution, I do not mean just passing the measure in the Senate; I mean going through the entire legislative process and obtaining the signature of approval of the President of the United States or, in the alternative, passing such a measure over his objections.

So, Mr. President, to recap, we need to do the available appropriations bills—that appear to be four at the moment: HUD, military construction, transportation, and agriculture; do a continuing resolution for the balance; and do the debt limit.

I consulted with the distinguished President pro tempore (Mr. THURMOND) by telephone earlier today and I apologize to him for calling him out of an important meeting. Once again, I want to remark, in all sincerity, if I could be assured of the cooperation and the professionalism from every other Senator that the Senator from South Carolina, the President pro tempore, shows on every important issue and every major request that I make to him, it would be a delight to deal with the Senate in trying to establish schedules. The President pro tempore, the distinguished present occupant of the chair, has never failed to be understanding of the urgencies and pressures of scheduling and subordinate, in many cases, his own preference so the greater good of the Senate can be accomplished.

S. 995—CLAYTON ACT AMENDMENTS

In our conversation this morning, I put to him a question that I told him I knew he would not like. That is, in view of the possibility that we might now go out on October 1, would he relieve me of the promise I had made to him privately and on the floor publicly that after we finished the debt limit, we would take up S. 995, the Clayton Act amendments, in exchange for my commitment to take it up as soon as we return in November in the lame duck session. In the most characteristic way, the President pro tem did agree to that. I express now my deep appreciation to him and my apology to those who have a great interest in this measure, as I have a great interest in this measure. The pressure of doing the appropriations bills and the debt limit, to my mind, ranks ahead of the desirability of doing S. 995 until we return. S. 995, I believe, can wait without serious jeopardy. The appropriations bills cannot. I express my deep appreciation, and I think I am sure I speak for every Member of the Senate when I express their deep appreciation to the President pro tem for his unfailing cooperation that he continues to exhibit in this case.

AGENDA SUMMARY

Once again, Mr. President, let me try to summarize all this rambling presentation in one statement: It is my hope we can go out on October 1 instead of October 8, and I believe we have a chance to do that. In order to do so, we must finish the debt limit, the available appropriations bills, and a continuing resolution. There may be other bills we can do before we go out, on a catch-as-catch-can basis, if we can arrange it. Otherwise, they will have to wait until the lame duck session, which appears to be inevitable, when we shall also have to consider S. 995, and other matters which Senators have urged me to take up on the schedule before the end of the session.

Mr. President, I expect that, later today, there may be a unanimous-consent request to take up other amendments while we await a fourth cloture vote, if cloture is not invoked today against the Helms amendment, and the time between noon today approximately and noon tomorrow approximately will be available for other Members to offer amendments to the debt limit bill. Members should be aware that it appears likely that a motion to recommit with instructions to take all amendments of the bill and send a clean bill to the President is in prospect.

Mr. President, I hope my thoughts this morning are profitable so Members may take account of it from their own scheduling standpoint in terms of their own priority effort. I shall reiterate only two points: We are not now establishing October 1 as the date to go out. I am saying that it appears now that the Speaker is agreeable to that and that if we can do the things I have spoken of, it will occur. I hope it will.

THE CRIME PACKAGE

There is one item that has been brought to my attention that I omitted. We have a time agreement on the crime package. I add that to the list of items that should be done before we go out. I also hope that the time agreement on that bill, which runs to more than a full printed page, could be abbreviated, because it will take us hours and hours to dispose of this matter if we do all of the items listed.

All I can do at this point is to say, it is my intention to take up and dispose of the crime package before we go out October 1, if, in fact, we can make that date. I hope we can, I think we can.

I also hope Members will reconsider their request for time on the time

agreement which was entered into on July 1 and which is printed on pages 2 and 3 of today's Calendar of Business.

Now, Mr. President, I hope I have not overwhelmed Members with information. I felt an obligation to report at this point and I am prepared to yield to the minority leader or to yield the floor.

RECOGNITION OF THE MINORITY LEADER

The PRESIDING OFFICER (Mr. ABDNOR). The minority leader is recognized.

Mr. ROBERT C. BYRD. Mr. President, the distinguished majority leader has stated very accurately the situation insofar as it pertains to the efforts on the part of the minority, which includes myself and Mr. CRANSTON, and Mr. INOUYE, and our visit with the Speaker and the majority leader of the House and the majority whip there, the chairman of the Committee on Appropriations, and others in the leadership on the House side. The majority leader has also accurately stated the necessities insofar as the legislation that must be passed. I am not saying I shall support it, but it must be passed. I may or may not support it, but there must be a debt limit extension acted upon. There must be a continuing resolution acted upon, and we need to act on as many appropriations bills as possible before October 1.

I hope that the President will not veto any of those bills, and I shall be discussing this with the majority leader in the hope that, if we go out to come back on November 29, we get some assurances from the White House that there will be no vetoes of those appropriations bills or continuing resolutions, or that we go out on a pro forma basis so that we can call ourselves back if there is a Presidential veto and, if the House should override the veto, there is a necessity for the Senate to act.

The distinguished majority leader and I also discussed yesterday the crime bill. It is our desire on this side of the aisle, as I expressed to the distinguished majority leader, that we proceed with the consideration of the crime bill, on which there is a time limitation. I am glad that he has included that in his remarks this morning as being a part of his schedule insofar as he can personally see to it that that schedule is followed. I share with him the hope that the time on the agreement which, as he has indicated, covers more than a page in the Calendar of Business, can be abbreviated. Perhaps it can be. As most often is the case, the time required is not quite as long as that which is potentially available under a very complex and lengthy time agreement.

I share with him the interest in having some action on S. 995, at least during the lameduck session.

Mr. President, I shall be working with the majority leader in an effort to arrange time agreements, if at all possible, on the appropriations bills and on the other matters that have to be taken up and disposed of before the Senate goes out for the election.

I share with him in closing the warm affections that have been expressed for the distinguished President pro tempore, Mr. THURMOND. I have always found Mr. THURMOND to be a courageous fighter for a cause in which he believes. He is also a gentleman who treats his colleagues with courtesy and understanding, and I personally feel grateful to him for the cooperation that he has extended to me not only during the time that I been minority leader but also during the time that I was majority leader.

PENDING AMENDMENTS

As to the cloture motion, Mr. President, I make a parliamentary inquiry, that being: How many amendments are there at the desk which would be called up in the event cloture is invoked?

The PRESIDING OFFICER. One thousand four hundred fifteen.

Mr. ROBERT C. BYRD. One thousand four hundred fifteen. Has the Chair been able to ascertain how many of the 1,415 amendments at the desk would be automatically ruled out of order on their face by the Chair?

The PRESIDING OFFICER. Seventeen of the amendments would be ruled out of order automatically as nongermane and six would be ruled out of order because they are dilatory.

Mr. ROBERT C. BYRD. Seventeen and six. Twenty-three. Mr. President, I have voted against cloture because I have had the experience of dealing with postcloture filibusters which make the precloture filibuster look like nursery school. One has to keep in mind that the author of an amendment does not necessarily have to call up his amendment; any Senator can call up any other Senator's amendment, so I have voted against cloture for that reason, to avoid a postcloture filibuster, which is the real filibuster, as we saw in 1977 when the Natural Gas Deregulation Act was before the Senate, when we saw one or two Senators tie up the Senate for 13 days and 1 night and we saw the majority leader, ROBERT C. BYRD, having to take very strong actions in conjunction with the support of the then-minority leader, Mr. BAKER, and the Chair, the Vice President, in order to break that filibuster.

So having had that experience and the lashes that were laid on my back at that time still smarting from time to time, I have not voted for cloture in this event. If cloture were invoked, I would vote for the Helms amendment, so I make that statement for the record to be clear. I voted against cloture on the abortion amendment recently for the same reason, to avoid a postcloture filibuster, which could keep us here until after Christmas. I voted to table that amendment; in that case I was against the amendment. In this case I am for the amendment, but in both cases I am voting against cloture because I want to avoid a postcloture filibuster.

Mr. BAKER. Mr. President, will the Senator yield to me?

Mr. ROBERT C. BYRD. But any other Senator, of course, has his own reasons, and I respect them. But those are my reasons, and I want to make them clear in the record.

Yes; I yield.

Mr. BAKER. Mr. President, I am aware of the minority leader's concerns about both the filibuster and the substance. Indeed, he and I have discussed that matter before. I am also aware of the enormous political implications involved in votes of this sort. But I want to say for the record that I admire the minority leader and respect him for having done what was best for the Senate. Even though it might lend itself to a different interpretation, I can vouch for the fact that what he has said here on the floor publicly is what he has said to me privately.

The only other thing I would add to it is, I think the Senate has to address itself to the fundamental question of the postcloture filibuster. We are not going to do that today. I am not going to do it independently, but if I am majority leader in January I will consult with the minority leader on how we might adjust that rule to provide a realistic way for the Senate to resolve postcloture filibusters. If I am minority leader, I hope that the majority leader, Mr. ROBERT C. BYRD, would do the same. But at this time I wish to say publicly that I believe the time has come when we must address that issue because I think now we have made rule XXII a nullity.

Mr. ROBERT C. BYRD. Mr. President, I am glad to hear the majority leader make that statement. He would certainly have my support if he is majority leader, and if, as it is not inconceivable, I may be majority leader again, I would have his support in working together to deal with this postcloture filibuster. It is an abomination to the Senate and to the legislative process.

CLOTURE VOTES

Mr. President, let me tell you this. Senator's votes against cloture are sometimes used against them by their opposition. Opponents either do not understand the Rules of the Senate or they deliberately and maliciously attempt to mislead the people in a State as to the meaning of that or some other procedural vote. If I may just take a moment, I will give an example.

When Jimmy Carter was in his campaign, he promised to pardon Vietnam draft evaders. After he was elected and

prior to his inauguration, I talked with Mr. Carter and urged him not to carry out his campaign promise to pardon Vietnam draft evaders.

The Senate convened in early January, and the late Senator Jim Allen introduced a sense-of-the-Senate resolution which expressed opposition to a Presidential pardon of Vietnam draft evaders.

The sense-of-the-Senate resolution, of course, as all Senators know, has no legal or binding effect on anything or anybody.

A filibuster developed on that sense-of-the-Senate resolution. Mr. Carter was inaugurated on January 20, and on January 21 he carried out his campaign promise to pardon Vietnam draft evaders. On January 24 there was a vote to invoke cloture on that filibuster. I voted against that motion to invoke cloture because I knew that if there were ever a technician in the Senate who knew, who had perfected, and who had originated the postcloture filibuster, it was the late Senator Jim Allen, for whom I had a tremendous amount of respect. So I voted against invoking cloture. The next day I moved to table the resolution, saying at the time that I was 100 percent against the Presidential pardon and had so stated to the President but that the matter was moot because the President had taken his actions, and even if he had not taken his actions there was not a thing under God's great panoply of Heaven that the Senate could do about the constitutional power of pardon that flows only to the President of the United States.

I did not like it when President Ford pardoned Mr. Nixon, but there was not a thing I could do about it. There was not a thing the Senate could do about it. There was not a thing the Senate and the House could do about it. That is a constitutional power that flows only to the President of the United States.

I must make this point to say that one's votes against the invoking of cloture will be intentionally used against him in many instances in an election, and they are being used against me.

However, I am voting against cloture, and I am stating for the record why. It was on that occasion that I was concerned about a postcloture filibuster. We had a natural gas emergency facing this country, which threatened to close down industries and put West Virginians out of work. We had to confirm the nomination of Mr. Marshall, for Secretary of Labor. We had business to do, so I did what I thought I had to do as majority leader. The sense-of-the-Senate resolution was a futile gesture under the circumstances I have described.

We had six procedural votes. We had a motion to table the motion to proceed to take up the resolution and that failed. Then we had another motion to table the motion to proceed, by another Senator, and that failed. We had a motion to table a motion to send the measure to the Judiciary Committee. I supported referral to the Judiciary Committee for the reason that the resolution was futile under the circumstances.

A vote also occurred on the Allen motion to bring up the resolution, and I voted against the motion for the reasons I have stated.

On January 25, I successfully moved to table the Allen resolution so that the Senate could get on with other pressing business.

I will vote against cloture today. I voted against cloture yesterday. Votes for or against cloture and other procedural motions must always be viewed in the light of the accompanying circumstances at a given time.

I find no quarrel with any Senators who vote for cloture or who support or oppose the underlying amendment which is being clotured. But I simply state for the record that we often will have our votes misunderstood, misconstrued, misinterpreted, and, in many instances, deliberately falsified, as my vote on that occasion was, the falsification being, in the campaign back in West Virginia, that I "voted for" the Presidential pardon of Vietnam draft evaders.

The majority leader is wearing a heavy crown. He has responsibilities, and sometimes he has to take actions to get this process moving and keep it moving. I sympathize with him.

I have tried to show the kind of cooperation with him that I feel the minority leader should show. It is not my business always to cooperate. It is not my business always to support him. It is my function at times to oppose him. But, barring those situations, I feel it my duty to work with the majority leader, to cooperate with him. He carries a very heavy load, a very heavy burden.

I have a great deal of respect for the majority leader. He has been most considerate toward Members on this side in every way he can. He also has to consider the Members on his own side, and I am sure at times he will catch the dickens—for want of a better word—from his own side by accommodating the Members on this side.

So I will say for the record that I appreciate the way he has laid out the program, the way he is attempting to close down the Senate by the first, and that was what he and I assured the Senate several days ago we hoped to get done.

So I hope my visit to the Speaker yesterday was helpful and that we will be able to accomplish this. And I hope, indeed, that when we come back next year, the distinguished Senator from Tennessee will be the minority leader and that he will cooperate with me in working on rule XXII. [Laughter.]

Mr. BAKER. Mr. President, I say to my friend the minority leader, who has been unfailingly cooperative and who has been absolutely responsible in seeing that the Senate functions as a responsible constitutional body, that he was going pretty well until he got to that last remark. [Laughter.]

Mr. President, I am keenly aware of the frequent difference between a vote, the meaning of a vote on cloture versus a vote on the merits of the issue. That is so with every Senator, I suspect. It certainly was so with me before I became a part of the leadership, but it is particularly so since I have been privileged to serve first as minority leader and now as majority leader. Both the minority leader and majority leader have an historic, uninterrupted record from the beginning days of the Republic of assuming a special responsibility, and that is the responsibility of seeing that the Senate does not bog down and that it does the work of the country.

So, when one assumes that position as majority leader or minority leader or other positions in the leadership, there is a special danger that votes cast in order to move the Senate along and for the greater benefit of the Senate and of the country will be misconstrued. Procedural votes particularly lend themselves to that.

I am sympathetic to the statements made by the minority leader. I know how he feels. I recall that incident, and as I said earlier I know of the disparity that exists between his position on occasion and the procedural necessities of the leadership.

I offer this gratuitously to reinforce what he has said about that situation and to let him know that I too feel the lash and sting of criticism sometimes when I cast votes that are necessary in order to discharge my responsibility as majority leader.

Mr. NUNN. Mr. President, will the majority leader yield for a question?

Mr. BAKER. I yield.

THE CRIME PACKAGE—S. 2572

Mr. NUNN. I arrived in the Chamber after an announcement was made about the crime package, S. 2572, the so-called Thurmond-Biden crime package, which many of us have been talking about for a long time. Is my understanding correct that the majority leader has said that will be an item we will deal with before we recess?

Mr. BAKER. Yes, the Senator is correct. I also said that we have a page and a half of time agreements on it, and it will be virtually impossible to take all that time and finish it. So I hope that Senators who are favored with special orders on that measure will reconsider.

Mr. NUNN. There was an intention by the Senator from Florida and the Senator from Georgia to bring that up as an amendment to the debt ceiling

bill, since everything else was being brought up as an amendment to that bill. But, as I understand it, the majority leader said that will be brought up as a separate bill.

Mr. BAKER. As a separate, freestanding bill.

Mr. NUNN. The time agreement entered into before the August recess will still be applicable to that bill when it is the pending business?

Mr. BAKER. Yes; it was entered into in July. It is, of course, still applicable. But, as I said earlier, while I have not totaled the amount of time, it is a monumental order, and I hope it will be reduced so that we can deal with it in a much shorter time.

Mr. NUNN. Will the majority leader be opposed to having that brought up as an amendment to the debt ceiling bill?

Mr. BAKER. I guess I would prefer that it not be done, since we are going to schedule it separately. I do not object to it being done. But the Senator from Georgia should know, as I said before, that if we cannot pass this debt limit any other way, I plan, at some point, to make a motion to recommit, with instructions to report back forthwith, which would take all amendments off the bill, including the crime package, if it were adopted.

So it seems to me that the better opportunity might be to do it as a freestanding piece of legislation, instead of as an amendment to the debt limit bill.

Mr. NUNN. My frustration at this stage—and I am sure the majority leader has his frustrations—is that we have spent approximately 2 weeks on items that are very important to a large number of people. Yet, I think everyone knows, without any doubt, that none of these items has a chance of becoming law this year, no matter what we do in the Senate. The crime package legislation has the almost unanimous approval of the Senate Democratic Caucus, since back in the spring. I believe it has almost unanimous approval of the Republican Caucus, and it has been endorsed by the President of the United States. All the polls in the country show this to be one of the major issues of concern to the American people.

The Senator from South Carolina (Mr. THURMOND) has taken a real lead in this regard, and the Senator from Delaware has taken a real lead in this regard. We have a unanimous-consent request. Yet, we are going to be dealing with it so late that any opportunity for the House to pass it is considerably diminished.

That creates frustration with the legislative process in the scheduling, because we are not dealing with the crime problem when we have a reasonable opportunity to pass the bill. We are now in a debate on problems whose importance I acknowledge, but I think everyone will acknowledge that there is no possibility of their becoming law this year, no matter what the Senate does.

Mr. BAKER. Mr. President, I understand that, I say to the distinguished Senator from Georgia, and I am sympathetic to it. As he acknowledged, he understands my problems to a degree as well and for 1½ years I promised at some point during this session we were going to have a debate on the social issues, that is, on abortion and prayer, and perhaps others, and through a series of developments over a period of months in both years, 1981 and 1982, the principals involved chose this time for their debate and chose this vehicle, that is the debt limit, to carry it.

I am redeeming a pledge I made in a most solemn form to Senators in exchange for them relenting in their efforts to add abortion and prayer and other amendments to every other thing that came along, and I think it worked well. I think it materially expedited the work of the Senate.

I feel a heavy obligation to redeem the commitment I made to do that. We have done it. At this point we are coming down the homestretch. If cloture is invoked today, we will pursue it until it is finished. If it is not, at some point this week we have to pass the debt limit. Therefore, I will take measures to see that it is completed one way or the other to the extent that is possible.

I am perfectly happy to represent to the Senator from Georgia who has done an extraordinary job in keeping the Senate sensitive and aware of this issue, as I have previously made that representation to the Senator from South Carolina, that we will take up the crime package as a freestanding bill before we go out for the October break.

Mr. NUNN. I am grateful to the majority leader for his statement on that, and I also understand completely his position. But I do believe the American people in looking at the overall legislative process must ask the question at some point when we have a crime package that there is tremendous agreement on from the White House, the Democratic side, the Republican side. Why is it we cannot get it passed in time to become law? I think that is a legitimate question that the American people will pose to all of us in the Senate and in the House of Representatives.

I thank the majority leader for yielding.

Mr. THURMOND. Mr. President, will the majority leader yield?

Mr. BAKER. I am afraid I am out of time.

Mr. President, I ask unanimous consent that the time we are now utilizing as in leader time not be charged against the special orders previously entered.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. BAKER. Now I yield to the Senator from South Carolina.

Mr. THURMOND. Mr. President, I wish to thank the able majority leader and the able minority leader both for their kind remarks about my work in the Senate.

I realize the tremendous responsibility that is upon these two leaders and especially the majority leader in scheduling things, and when he said that he wanted to adjourn by October 1, I realized it would be impossible to properly consider S. 995, and I was very pleased to cooperate with him.

I am always glad to help him whenever I can because he does have an outstanding, tremendous responsibility to run this body.

I wish to say that I do appreciate his willingness to take up this crime package before we adjourn, and it is my opinion we can finish that in a day and a half or maybe a day. Some of the amendments will be accepted and others the staff has gotten together and I think we can shorten the time, if there is any way we can get that up as quickly as possible so it can be considered by the House of Representatives. I was told by the ranking member of the Judiciary Committee, the Senator from Delaware (Mr. BIDEN) that if we got it to the House of Representatives in a reasonable time they would act on it this year. He had talked to some of the people over there, and we had taken out the really controversial issues, such as insanity, the death penalty, the exclusion rule, habeas corpus, matters of that kind. But this crime package is important.

I am just wondering if the two leaders, either one of them, have any further suggestions on anything we could do to help to get this out as quickly as possible and to the House of Representatives.

Mr. BAKER. Mr. President, my suggestion would be that we try to abbreviate the time for debate on this issue and urge Senators not to offer amendments. I think that will expedite the passage of the bill and maybe improve the prospect for its consideration in the House of Representatives.

I will talk to Congressman MICHEL, the minority leader, and I will urge him to consider it before October 1, or in any event during the lameduck session.

We still have time to pass this bill. Clearly, we have time since we are coming back after the election anyway.

So I will pledge to the President pro tempore that I will do everything in my power to urge the leadership of the House of Representatives to take this matter up either before the 1st of October or when we return after the election.

Mr. ROBERT C. BYRD. Mr. President, the distinguished Senator from South Carolina also addressed part of his question to me I believe. I wish to respond.

I do so by saying that I will do what I can in conjunction with Mr. CHILES' efforts, Mr. NUNN's efforts, and others on this side to abbreviate the agreement as much as we can, if we can, and in addition, I will call on the Speaker and others in the leadership, the majority on that side, and see if they cannot assist us in getting this legislation acted upon in the House of Representatives promptly as well as its passage in the Senate.

I will work with the majority leader in that respect.

Mr. BAKER. I thank the Senator.

Mr. THURMOND. I wish to thank the able minority leader for that position.

Mr. President, with regard to S. 995, I do wish to say that this bill involves hundreds of millions of dollars. It is a very important bill, and I appreciate the statement by the majority leader that it would be taken up and we would have time to consider it carefully because that is the bill that really should pass also. If it does not pass this year, I am going to press again next year. I hope we can get it passed this year.

I wish to thank the majority leader.

Mr. BAKER. I thank the President pro tempore.

ORDER OF PROCEDURE

Mr. NUNN. Mr. President, is there a special order in the name of the Senator from Georgia?

The PRESIDING OFFICER. The Senator is correct.

RECOGNITION OF SENATOR NUNN

The PRESIDING OFFICER. Under the previous order, the Senator from Georgia (Mr. NUNN) is recognized for not to exceed 15 minutes.

Mr. NUNN. Mr. President, I thank the Chair.

THE CRIME CONTROL ACT OF 1982 TITLE IV—HABEAS CORPUS REFORM

Mr. NUNN. Mr. President, as I rise today to address my colleagues about the critical need for habeas corpus reform, I note that the season of fall is about to appear in its many-colored splendor. Beginning last spring and continuing throughout the summer, Senator CHILES and I have daily recounted the horrors of the present habeas corpus system. That system continues to inundate our courts with needless and time consuming petitions, making a mockery of what was once considered the "great writ of liberty" at common law.

Now in the waning days of this session of Congress, I remind you again of the need for reform in the habeas corpus petition. It is imperative that we act promptly on the crime fighting bills now on the Senate Calendar.

I am delighted the majority leader is going to call up S. 2572. I also hope this session or early next session or in the special session we are going to have after the elections, we will have a chance to deal with ending the rampant misuse of the habeus corpus petition by career criminals.

The abuses that Senator CHILES and I have discussed for the last 4 months are exemplified in the case of Joseph C. Frady, whose guilt was recently reconfirmed by the U.S. Supreme Court. On March 13, 1963, Frady and an accomplice brutally murdered Thomas Bennett in the front room of his Washington, D.C. home. As the Supreme Court noted, the evidence from his 1963 trial showed that the victim's head had been caved in by several blows from a blunt instrument. It was developed during the trial that Frady had battered the victim to death. In performing his bloody deed, Frady used both a broken piece of a table top and the metal heel plates of his leather boots.

Hearing the victim's screams for help during the struggle, which lasted for at least 10 minutes, a neighbor called the police. Covered with blood, Frady and his codefendant were captured as they left the scene of the killing. Subsequent investigation revealed that Frady had driven past the victim's house twice earlier on the day of the murder. When arrested, Frady was heard to exclaim "they've got us."

At trial, the defense was a complete denial of responsibility, suggesting through his attorney that another man had done the killing. Consistent with this theory. Frady did not raise any justification, excuse or mitigation. Moreover, Frady did not object to any of the lengthy and detailed instructions of law given by the trial judge. A jury convicted Frady and his accomplice of first-degree murder and robbery, and sentenced them to death by electrocution.

On direct appeal, the Court of Appeals for the District of Columbia Circuit upheld Frady's first-degree murder conviction by a vote of 8 to 1. They did, however, set aside his death sentence. Frady was then resentenced to a life term. Almost immediately, Frady began a long series of collateral attacks on his sentence. He filed four motions to vacate or reduce his sentence in 1965, and one each in 1974, 1975, 1976, and 1978.

Finally in 1979, 16 years after his bloody deed, Frady filed another habeas action complaining he was convicted by a jury erroneously instructed on the meaning of "malice." At his trial, however, Frady did not object to the instructions, nor did he raise the issue on direct appeal or in any of his prior eight petitions. The district court properly denied his attempt to pervert justice. Yet, the court of appeals reversed and overturned the 1963 conviction even though, as Justice O'Conner of the Supreme Court noted, the evidence that Frady and his accomplice beat his victim to death was "overwhelming."

Fortunately, the Supreme Court on April 5, 1982, reversed the erroneous court of appeals decision and reconfirmed Frady's guilt. I ask you, Mr. President, has justice been done? Can we say that justice is served when calculating criminals can tie up the court system with needless and repetitive attempts to subvert their guilty verdicts by the endless filing of habeas corpus petitions?

Indeed, the evidence in this case was overwhelming. As Justice O'Conner noted in her majority opinion:

> • • • the evidence of malice was strong enough that the 10 judges closest to the case—the trial judge and the nine judges who 17 years ago decided Frady's appeal en banc—were at the time unanimous in finding the record at least sufficient to sustain a conviction for second-degree murder—a killing with malice.

Nevertheless, Mr. President, Frady filed nine motions to overturn his 1963 verdict. These nine separate attempts had to be reviewed by an overworked judiciary. These nine separate attempts had to be reviewed and answered by the limited resources of the Government prosecutors.

Mr. President, all of this had happened because of the problems existing in the present habeas corpus law. All of this will happen again until we reform the current status of habeas corpus. I am certain we will hear from Mr. Frady and the people of his ilk again. To paraphrase the old adage, if they do not succeed the first or even the ninth time with their habeas, they will just file, file, file again.

Mr. President, the time has come for this Congress to decide that criminal cases cannot and should not be allowed to go on forever. I again call for the prompt consideration and adoption of the habeas corpus provisions which Senator CHILES and I have offered in S. 2543, the Crime Control Act of 1982.

Mr. President, I yield to the Senator from South Carolina.

Mr. HOLLINGS. Mr. President, I thank my distinguished colleague from Georgia, and I shall be very brief.

REBUILDING THE ROAD TO OPPORTUNITY

Mr. HOLLINGS. Mr. President, everyone knows that our country faces serious economic problems. But what we need to understand is just how fun-

damental these problems are. Even if we somehow managed to achieve a balanced budget and bring interest rates down to more viable levels, the country's future would still be far from guaranteed. Right to the point, we are not competing at the level necessary to sustain; nor are we producing enough real wealth to see America through. A nation built to greatness on smokestack industries like steel and automobiles today sees most of its workers producing services rather than basic goods. A nation built to greatness on sound and shrewd trading practices today see its competitive edge gone. And, saddest of all, a nation built to greatness on the combined work of labor, business, and Government sits stymied because of lack of leadership and coordination.

Some of us have been discussing these problems at length and making specific suggestions for meeting the many challenges confronting America. Over the weekend, a signal contribution was made to the national discussion of these issues by the special task force on long-term economic policy. Thanks to the leadership of Hon. GILLIS W. LONG, chairman of the House Democratic Caucus, and Hon. TIMOTHY E. WIRTH, chairman of the Long-Term Economic Task Force, and Hon. RICHARD GEPHARDT we now have the benefit of a most perceptive analysis of America's problems and some specific suggestions for meeting them and overcoming.

"Rebuilding the Road to Opportunity" focuses the Nation's attention on some of the most basic of these problems. And it posits solutions of the kind meriting the attention of us all. While the colleagues may have some different emphases to make, and perhaps might even include some areas not included in the study, I think we should express our thanks to the authors of this work for helping us focus on the real problems facing us. Here we have spent weeks addressing some of the so-called social issues, and while I would be the last to deny their importance, I think nevertheless that we do the country a disservice in not turning our attention to these fundamental problems which have just about stopped the economy dead in its tracks and threaten our very survival. Unless we get this country of ours building real wealth again—unless we become competitive in the international arena—and unless we get Government leading the effort for coordination and cooperation, instead of indulging in cheap rhetoric about getting rid of Government—then we are not going to be able to rescue our people from some of the most serious challenges which have ever confronted us.

So we are grateful to everyone who had a hand in preparing this fine study. And, in order to open up the widest possible audience for it, I ask unanimous consent that the text of the report be printed in the RECORD at the conclusion of my remarks.

The PRESIDING OFFICER. Without objection, it is so ordered.

[See exhibit 1.]

Mr. HOLLINGS. In closing, let me just add a quotation from the great Adlai Stevenson of Illinois. Asked once whether he was conservative or liberal, Governor Stevenson replied that was not the issue. The question, he said, is "Am I headed in the right direction?"

Mr. President, this report helps head us in the right direction, and that is not only a welcome—but a necessary—change.

Every Member may not agree with every facet. I regret, for example, that the report did not fully address how to get us onto a glide path toward Government in the black or how to satisfy our deficit problem. With that in mind I would hesitate to adopt some of the recommendations relative to, let us say, a gasoline tax, until the revenue hemorrhages can be arrested. But on balance the report, I think, is outstanding. It heads us in the right direction.

EXHIBIT 1

REBUILDING THE ROAD TO OPPORTUNITY: TURNING POINT FOR AMERICA'S ECONOMY

DEMOCRATIC CAUCUS,
U.S. HOUSE OF REPRESENTATIVES,
September 20, 1982.

Hon. THOMAS P. O'NEILL, Jr.,
Speaker of the House,
Washington, D.C.

DEAR MR. SPEAKER: We are pleased to forward to you the report of our Special Task Force on Long-Term Economics as approved by the Democratic Caucus Committee on Party Effectiveness.

Incorporated in the paper entitled, "Rebuilding the Road to Opportunity: Turning Point for America's Economy," are long-term Democratic alternatives for the nation's economic policy. The policies of the present Administration have caused hardship, self-doubt and fear among our citizens, and have precipitated a serious national economic crisis which must be stemmed.

We feel the recommendations set forth in our paper offer constructive, imaginative and workable alternatives and will serve as a foundation for legislative initiatives which will lead to sustained economic growth and opportunity for all Americans.

When the Task Force was chartered, it was specifically instructed to look beyond the problems of today. We, therefore, concentrated on charting a path which would lead this nation, over time, out of its economic slump and into a period of steady, non-inflationary growth—not with slogans and oversimplified quick fix remedies, but with a long-term vision which will insure that this nation's economy will never again falter so badly.

In developing the paper, the two of us and Representative Richard Gephardt of Missouri met with leaders of business, industry and labor. We consulted with economic experts and solicited recommendations from governors, legislators and mayors from across the nation. The breadth of the mission, the complexity of the issues, and the diversity of comments from those to whom we turned for advice necessitated more than a dozen drafts before the Party Effectiveness Committee began reviewing the paper. During the entire process, responses were positive and enthusiastic, indicating a shared concern to answer the question we are so often asked: what do the Democrats propose?

The Committee on Party Effectiveness, made up of more than 30 House Members representing a cross section of the institution, met many times over a period of months in fashioning the final product, and we thank them for their patience, dedication and contributions.

Implementing the recommendations will take time. But we believe that a comprehensive effort must be undertaken. We cannot afford to simply look at one segment of our economy; rather, we must recognize the interdependence and diversity of our geography, regional economies, history and increasingly international economy and begin to assemble an alternative program.

In a party as broadly based as ours, arriving at policy agreements is, of course, extremely difficult. However, after lengthy discussions, agreements were reached, and the document is much more than a conventional "platform." It is a recognition of the changing nature of our economy and the need to forge a strong partnership among all sectors of the economy. It is an acknowledgement that the economic success of our nation in the future depends on the investments we make today. And it is a commitment to promote those investments for the national good.

If we, as a country, can agree on future goals, then the public policy decisions we face today can be made in a more rational manner. The difficult decisions on defense spending, entitlements and revenues should be made within a broader, long-term context, and not be dictated by the political atmospheres of day-to-day crisis.

Fundamentally, investments in our future are wise, necessary and cannot be neglected if we are to fully regain our economic strength. Some are expensive, and all must be considered within the constraints of the federal budget. We feel they are the key to sustained, long-term economic recovery and deserve the highest priority.

We look forward to comment, discussion and input from citizens across the country.

Sincerely yours,

GILLIS W. LONG,
Chairman, House Democratic Caucus.
TIMOTHY E. WIRTH,
Chairman, Long-Term Economic Task Force.

1. REBUILDING THE ROAD TO OPPORTUNITY

Turning point for America's future

Ask Americans about their hopes for the future, and they will tell you largely what their parents said a generation ago.

A solid education, a fair chance to make good, a secure job, a decent home, a growing ability to provide comfort for one's family, an untroubled retirement: these hopes, born with post-World War II prosperity, have moved Americans to work and dream boldly.

Today, for too many Americans, these hopes are fading beyond reach:

For the nearly 11 million Americans who cannot find jobs.

For the countless families who cannot afford to buy homes or cars because interest rates are too high.

For the thousands of small businessmen and small farmers who face an imminent threat of bankruptcy.

For the untold numbers of students who can no longer afford the colleges of their choice.

For the working people who are told by their government they are better off going on welfare.

Reaganomic must—and will—be repealed. No nation can survive an economic policy that had produced such damaging results.

The long term

But after that damage is undone the job of renewing Americans' hopes for their future must begin.

This paper is a Democratic analysis of the underlying problems of our economy—and a plan to address them.

The Democratic Party believes that the American dream of work, fairness, betterment, and security can be renewed and expanded. We believe all Americans can continue to expect new economic opportunities and a rising standard of living. With planned recessions removed from the list of policy options, with a program that invests in the future, we can give our children—as our parents gave us—a life richer and more just than our own.

II. GROWTH AND FAIRNESS

Cornerstones of the Democratic vision

Renewing the American dream will require a steadily expanding economy that provides all Americans with the chance to improve their economic lot.

Those two elements—growth and fairness—are the cornerstones of the Democratic party's vision of an economically secure American future.

Achievement of growth and fairness lies at the very heart of our party. Our party has sparked economic progress that has brought unprecedented prosperity and opportunity to the American people. We have seized the future, kept alive the pioneer spirit—the willingness to invest and to take risks—in America.

In order to restore that economic progress, to put us back on the course toward even greater prosperity and opportunity in the 1980s, our party must once again promote bold approaches to gain control of our economic future. The Republicans have proven once again they are not up to the task. Once more they have chosen to pursue the discredited policies of "trickle down" economics. So, it is up to our party to rekindle the entrepreneurial spirit in American, to encourage the investment and the risk taking—in private industry and in the public sector—that is essential if we are to maintain leadership in the world economy.

The policies we will outline in this paper are vital to that task. They will spur sustained growth needed to create new jobs and raise our living standard. And they will be fair, providing all Americans with the opportunity to share in the prosperity they bring.

III. A GENERATION OF FUNDAMENTAL CHANGE

In three key ways, economic conditions today are different than just a generation ago; no strategy for future growth can succeed unless it takes into account these fundamental shifts.

Change No. 1: The internationalization of our economy

A generation ago, our country faced little economic competition. We were largely self-sufficient—the undisputed economic leader of the world. American money was spent on American goods manufactured from American resources using American energy. And strong American markets absorbed these American goods.

But that has changed during the last decade. Today we must operate in an international economy in which we are no longer the single dominant power. All around the globe are new, technologically advanced, aggressive centers of economic power and resources.

In the last decade, West Germany led the world in exports of manufactured goods; Japan's share of exports of manufactured goods to the less developed countries increased in the 1970s while the U.S. share decreased.

And today, we send $80 billion a year to foreign governments for oil; our economic strength is dependent on a vulnerable oil lifeline which begins virtually on the borders of the Soviet Union and threads its way through the most volatile region on the globe.

America today is still the strongest, most productive economic power in the world. But our preeminent position is no longer assured. And with further internationalization of the economy, we will continually confront new challenges to our economic leadership.

Change No. 2: The shifting nature of our economy

A century ago the industrial revolution transformed America from an agricultural to a manufacturing economy. Today, a technological revolution is again changing the nature of the American economy.

From hand-held calculators to telephone answering machines, from electronic bank tellers to man-made bacteria that can eat oil spills, from econometric modeling to national real estate data banks, from satellite-transmitted newspapers to laser-read videodiscs, our lives are being transformed by new technologies.

A generation ago, a relatively short list of traditional industries—steel, autos, textiles, machinery, mining, construction, and agriculture—alone accounted for more than half our nation's exports, a quarter of its output and a quarter of its jobs.

In the last generation, however, nine out of every ten jobs created have been in the service and information sectors. More than two-thirds of the rise in real GNP over that period was contributed by these new economic forces.

The worldwide demand for knowledge, and the advanced high technology which conveys it, has created burgeoning new markets in industries such as computers, communications, electronic components, aerospace, pharmaceuticals, materials science, energy, bioengineering, photosynthesis, fiber optics, international finance, and data management.

The success of these new industries—and the services to support them (production facilities, advertising agencies, consulting firms, accountants, construction workers, lab technicians, and clerical help)—has already created impressive new growth and job opportunities across the nation from the San Francisco Bay area through Denver and Dallas and the Research Triangle to Boston's Route 128. In the computer field alone, the number of jobs is expected to double in the next decade; similar opportunities will abound throughout the information sector.

Change No. 3: The rapidity of change

As significant as the change itself is the rapidity with which it is occurring in today's world economy.

Less than two decades ago we enjoyed the most advanced machinery and the greatest manufacturing potential of any nation on earth. Today, by world standards, our industrial facilities are, in large part, obsolete, and cannot compete with the state-of-the-art factories of our competitors.

Today state-of-the-art manufacturing processes are constantly changing and may become technologically obsolete before they become physically obsolete. New technologies are replaced regularly by newer technologies.

Even a generation ago, change, though considerable, came at a manageable pace. Today, change in our world economy comes at such a rapid-fire pace that it is no easy task to keep abreast of it.

IV. THE CHALLENGES WE FACE

If we adapt to rapidly changing economic circumstances, if we meet the challenges they pose, we can achieve the real economic growth necessary to secure America's economic future, to employ our people, and to improve our standard of living. There are four complex challenges that we must confront in the 1980s.

Challenge No. 1: Increasing investment in our economy

Increased investment in our economy is essential for sustained economic growth in the decades ahead.

We need increased investment both to retool our basic industries and to expand growing industries in the high technology and information sectors.

We must increase investment throughout our economy: create an economic environment for investment in plant and equipment; developing new technologies, educating and training our workforce, and rebuilding the public infrastructure.

Economic environment for investment

During the 1970s, the share of GNP we invested in plant and equipment put us last among all major industrial nations, and our productivity growth in manufacturing was less than half that of Japan or West Germany.

In the 1980s, we must reverse that trend. We must re-ignite the spirit of American enterprise—the willingness to take risks to invest for future payoffs.

To create a favorable climate for investment we need, in the 1980s, to control federal spending, to revise our tax laws and amend the regulations governing financial institutions.

Investing in the development of new technologies

In the 1980s, the ability of our economy to grow, create jobs, and compete will depend, in large part, on our continuing to discover and develop new technologies. Investing in new technologies is essential both to make our basic industries competitive and to expand opportunities in growth industries.

Discovering and fostering new technologies will require a considerable national investment, in basic and applied research and in developing brainpower—the scientists, engineers, and technicians—needed to generate technological innovation.

Investing in our people

Economic growth requires investment not just in bricks and machinery, but in our workforce as well. The failure to invest in people, our human capital, would be an obstacle to economic growth as formidable as a failure to invest in new plant and equipment or a failure to seek out and develop new technologies.

In the 1980s, assuring the workforce necessary for an expanding economy will require developing, in our colleges, the brainpower which is a pre-condition for innovation; providing new workers with a quality education and the technical skills for a sophisticated economy; providing the hard to employ with the basic skills and work habits to enter the job market; and enriching the quality of the workplace.

Investing in public infrastructure

A growing economy needs the highways and bridges and railroads and waterways and tunnels to move raw materials and goods, the ports to receive and ship them, the subways and water and sewer lines to serve our citizens.

Today, America's infrastructure is ailing. More than two out of five bridges need replacing. More than half the nation's roads are in disrepair. The need for water and sewer treatment facilities has exceeded localities' ability to finance them.

The United States has the potential to become the world's unchallenged leader in coal exports. In achieving this potential, we could create hundreds of thousands of jobs and get billions of American dollars back from overseas. Today, however, the rolling stock and railbeds to move coal are in shambles, and we lack even a single major port which can handle a 100,000-ton ship.

Rebuilding our infrastructure is essential to sustained economic growth.

Challenge No. 2: Managing the transition

In the past decade, the American economy has changed dramatically. In the next decade, it will change even more rapidly.

The application of new technologies will provide a means for our basic manufacturing industries to become competitive again in world markets. At the same time, restructured basic industries will provide markets for the new technologies, such as "smart" robots. As a result, the technological revolution will bring about substantial restructuring within basic manufacturing industries as well as enormous opportunities for expansion into new industries.

This transition in our economy will cause far-reaching changes in the workforce. Inevitably, there will be fewer workers in manufacturing industries, such as autos and steel, even as they are restructured. Simultaneously, there will be increasing demands for workers in expanding industries, with a particular need for specialists in fields such as engineering and computer technology.

The challenge, then, is to manage that workforce transition in such a fashion that workers who have gained experience in older industries can be placed in new, challenging jobs in prospering, competitive industries with a minimum of dislocation and disruption to family and community life.

Meeting that challenge will require a heavy emphasis on education, training and retraining for new jobs in restructured manufacturing industries or in new, high technology sectors. Meeting that challenge will also require incentives for new industries to locate where old factories are closing, such as along Rte. 128 in Massachusetts and in other areas around the country.

America has undergone such transitions before. They have led to a better life for our people and to more Americans being able to share our country's enormous wealth. Less than a century ago most Americans still worked on farms. Today, American agriculture is a highly productive, high technology industry, but fewer than one in 20 working Americans is a farmer. The farmers of the 19th century became the factory and office workers, the providers of services, the professionals, and the business people of the 1980s.

By investing in our people, we can assure that the assembly line workers of the 20th century will move on to better and more challenging jobs in a different, more prosperous economy—just as farm workers did a century before. Meeting that challenge will mean that more and more of our people can share in the Democratic vision of an economically secure America.

Challenge No. 3: Decreasing our dependence on foreign energy

No single factor had more impact on the American economy during the past decade than our dependence on imported energy.

OPEC's petrodollars and domination of world energy supplies have contributed as much to the rising cost of living and layoffs as have deficits and interest rates.

Since the first OPEC shock in 1973, the high cost of energy has drained billions of dollars away from desperately needed economic modernization.

With our economic security and national security at stake, we simply cannot allow that situation to continue. While the world oil glut and economic recession in many parts of the world have temporarily reduced OPEC's power and brought down energy prices, we cannot allow such a temporary respite to lessen our national resolve to decrease and ultimately to eliminate our dependence on imported energy.

Challenge No. 4: Developing a game plan to meet the foreign competition

For the rest of this century, we will confront rapidly changing economic circumstances and new economic challenges.

To meet current challenges in the most efficient way and to cope with new economic challenges, we need a national economic strategy that sets out our national economic goals clearly and allows us to adjust to changed economic circumstances. That is particularly important in an international economy.

Already, we have witnessed the devastating impact of international competitive challenges to our production industries such as steel, automobiles, shipbuilding, and consumer electronics. We can expect similar efforts in the high technology sectors from such nations as Japan and France.

These competitive challenges are not haphazard occurrences. They are calculated, planned, national efforts by our competitors to identify and capture specific markets from American industries. In virtually every case, our competitors have undertaken a national effort to formulate an economic strategy and marshal public and private resources to carry out its goals.

If we are to remain competitive in the international economy, we must respond in kind. We must develop, within the framework of our free enterprise system, an economic strategy of our own to identify opportunities for growth and to formulate the means of realizing those opportunities. We will need to monitor the vitality and changing nature of our domestic economy and the economic strategies of our major competitors.

In short, we have passed the point where we can compete internationally without proper economic intelligence or a general consensus as to where our economic opportunities lies and what will be necessary to take advantage of those opportunities.

V. THE MEASURE OF REPUBLICAN POLICY

To judge the Republican policy, we must assess how it has met the tests of growth and fairness.

The facts speak for themselves.

Recession, not growth

The Republican program promised growth but it has brought recession, with more people out of work than at any time since the Great Depression. Since it was enacted, more than two and one-half million workers have lost their jobs, bringing the number of unemployed to nearly 11 million.

The growth of this nation's GNP has been sluggish or in decline for most of the past year and gives little indication of the economic turnaround which the Administration predicted. Indeed, many industries—agriculture, steel, autos, housing—are in the midst of a depression. More than 17,000 businesses failed last year—a rate nearly as high as during the Great Depression.

A bonanza for the rich

The Republican program promised fairness, but it has brought a bonanza for the rich, and increased the burden on middle income Americans.

As a consequence of the Reagan tax policy, the wealthiest American households gained the lion's share of the benefits. High interest rates have excluded all but the well-established from home ownership. The programs designed to help workers who have been laid-off in the recession have been cut back or eliminated.

The reason the Republican policy has failed is that it neither comprehends nor addresses the most important economic problems our country faces.

Investment declines

The Republican program contains no formula for increased broad-based investment that will produce economic growth. Indeed, the Reagan program has resulted in a decline in investment in new plant and equipment. It advocates substantial decreases in the public investment necessary to develop new technologies, to educate and train a productive workforce, and to rebuild our industrial infrastructure.

It contains no strategy for managing a smooth transition of workers from old industries to new and no program for reducing our dependence on foreign energy; indeed, only a deep recession has cut energy demand.

And while our competitors have carefully crafted strategies for increasing their share of world markets, the Republicans have offered no strategy for reestablishing our competitive advantage against foreign competition, nor have they acted to stop unfair trade practices of our competitors.

VI. THE DEMOCRATIC WAY

Meeting the challenges of the 1980's

Despite the rapid erosion of our economic structure brought about by Reaganomics, we Democrats, believe that through a concerted and positive national effort, we can lead America to our goal of economic security with sustained economic growth. All Americans can again believe that they can share in renewed prosperity, can find a job and the opportunity for advancement, and can expect stable prices and lower interest rates.

In short, by meeting the challenges we have laid out, the American dream can be reborn in this decade. But before we can reach our goals, certain preconditions are necessary.

Precondition No. 1:

A PARTNERSHIP FOR GROWTH

Achieving economic growth will require a partnership among labor, small business, big corporations, universities, and government. Just as they have learned fom us, we should learn from other Western democracies which have proved that there are economic gains for everyone when everyone pulls together.

This need for partnership will require a lessening of the adversarial relationship between business and labor. Cooperation has always benefitted our country, from the building of the railroads to the success of the space program and is always more productive than confrontation.

Later in this paper we recommend the establishment of an Economic Cooperation Council to assist in bringing together the disparate institutions necessary to compete in a rapidly changing international economy.

On a more specific scale, recent cooperative experiments in workplace co-management and co-ownership have demonstrated that productivity improves when workers are given an opportunity to participate more directly in decisions affecting their work. In many of these cases, the earnings, job satisfaction and job security of workers have increased, as have the profit and competitive position of their firms. Accordingly, government should strive to encourage greater employee participation in management and ownership, particularly where management and labor are receptive to this goal.

Precondition No. 2:

AN IMPORTANT ROLE FOR GOVERNMENT

Government must play one of the leadership roles in this partnership.

Free-market capitalism is the basis of our economy, and remains the first and best hope for long-term growth and jobs.

But just as it has done throughout our history—in building the canals, in creating the land grant colleges, and in encouraging research in agriculture and in space—government must be a vital partner.

These two pre-conditions—a partnership for growth and a creative role for government—must be the starting point for meeting the economic challenges of today.

1. A BROAD-BASED INVESTMENT PROGRAM

A broad-based investment program is essential to meeting the first major economic challenge of the 1980s.

Investment is the key to future economic growth and to expanding economic opportunity throughout our society. For business, investment leads to greater competitiveness, more expansion, and higher profits. For workers, it leads to more, better and safer jobs.

Investment is also essential to help those who cannot work, particularly the disabled, the sick, and the elderly. As Democrats, we understand that a society cannot remain healthy and self-respecting while ignoring those who, through no fault of their own, need help. But we also understand that our ability to provide the resources necessary to help the helpless depends, in the long run, on a steadily growing economy. Without investment—both private and public—we cannot count on steady growth in our economic future.

The goals of our investment program are twofold—to retool our basic manufacturing industries and expand our high technology, growth industries in order to meet rapidly developing foreign competition. To achieve those goals, we call for:

Creating an economic environment conducive to investment.

A national research and development effort directed at discovering, developing and promoting new technologies.

A national effort to educate and train a productive workforce for a complex and rapidly changing economy.

A national commitment to rebuild the public infrastructure needed to move people, goods and services in a prospering economy.

Revitalizing basic industries

Nowhere is such a broad-based investment program more essential than in our national mission to restructure and revitalize our basic manufacturing industries.

During the decade of the 1970s, the American steel and auto industries came under severe pressure. Spirited foreign competition, lagging investment, inability to adust to changing markets caused by increasing oil prices, increased regulation, rising production costs, and slowed productivity growth all added to the economic problems of these major American industries. The problems of these industries have rippled throughout the entire economy.

We cannot turn our back on our basic industries. They are essential to our national security. They provide great econimic opportunity for millions of Americans and form the economic backbone of thousands of communities. They are important markets for a wide range of munufactured items and have been the proving grounds for a number of high technology products.

We must make our basic industries competitive again. That will require broad-based investment.

Expanding growth industries

A broad-based national investment program is equally important to expanding our high technology industries, growth industries critical to our economic security in the future.

Expanding manufacturing industries provided new jobs for Americn workers earlier in this century; expanding high technology industries willl provide new jobs for American workers in the years ahead.

The United States excels in high technology areas. But our competitors all over the globe have not allowed that leadership to go unchallenged. To assure that these new industries do not fall victim to the same forces that under-cut our basic industries in the past decade will require the broad-based investment program that we propose.

An environment for investment

Government must create an economic environment where constructive private investment is encouraged.

Controlling inflation is essential to creating an economic environment to encourage investment. Inflation has been our most persistent economic problem of the past 15 years. It has crippled economic expansion, undercut investment plans, and robbed consumers of purchasing power. There are no simple, overnight cures for inflation in an economy as complex as ours. The best long-term answer to inflation is a productive, steadily growing economy—exactly what the policies outlined in this paper are intended to bring about.

Even a highly productive economy cannot absorb unanticipated shocks such as oil or food shortages without some short-term increases in inflation. But the more productive our economy is, the smaller is the likelihood that outside shocks will result in permanent increases in prices.

Providing an economic atmosphere to encourage investment will require a successful balance of fiscal and monetary policy. The Republican program which combines loose fiscal policy and high deficits with tight monetary policy has caused high interest rates and discouraged investment in our economy. In short, the Republican policy is consuming the seed corn of our economic future.

We reject any economic program that projects annual federal budget deficits of $100 billion or more well into the foreseeable future. Such deficits will keep interest rates high, choke off investment and, over time, prove inflationary.

We believe that with the proper fiscal policy, the Federal Reserve Board can pursue a monetary policy that conserves those seeds, that spurs investment necessary to reduce inflation and bring about steady economic growth in the future.

Fiscal policy should be developed in accordance with the following principles:

Decisions must be made on our spending priorities. While it may have once appeared that the federal government could have been all things to all people, that time has passed. We must be willing to say no to particular interests in order to bring overall spending under control.

Achieving a balanced budget is very important to our economic future. We do not believe that the federal government should continue to spend an ever-increasing percentage of the nation's wealth. We need to limit spending and to set tax rates in order to generate a balanced budget during periods of sustained economic growth. To achieve the goal of a balanced budget, while limiting taxes, we must strengthen our Congressional budget process and we must constantly review existing government spending and tax programs, with an eye toward "sunsetting" those which are wasteful or have outlived their usefulness.

In making budget choices, we must give a high priority to programs which makes an investment in our economic future, such as research and development, education and training, and rebuilding our industrial infrastructure. In order to understand better how much of the federal budget is devoted to investment in the future, we should divide total federal spending into investment and operating expenditures. Our purpose in recommending such an investment budget is not to relieve pressure to reduce overall spending, but rather to allow Congress to determine how much spending it wants to devote to long-term investments which spur economic growth.

The seed for all capital formation—the determinant of industry's ability to build new plants and to buy equipment—is savings. The more people save, the more money becomes available for businesses to start or expand, or buy computers, or replace obsolete machinery.

We need to revamp our tax laws to encourage that saving and to do it in a way that apportions fairly the tax burden among our people. To that end, we propose the following actions:

An overhaul of our income tax laws to make them fairer and simpler, and to encourage savings rather than consumption. One approach, for example, could include lowering the rates for all taxpayers and eliminating many of the current special tax preferences—the write-offs, exemptions and deductions that favor the rich and encour-

age the use of unproductive tax shelters. Another approach is the so-called progressive consumption tax that would reward those who save. One approach that is not acceptable is to tax all taxpayers, no matter what their income, at the same rate. Such a tax would place too heavy a tax burden on middle and lower income taxpayers and too light a tax burden on the wealthy. Our taxable base must be broadened and the burden on middle income taxpayers must be lessened and spread fairly and progessively among all taxpayers.

We must revise our business tax laws to assure that profitable corporations cannot escape paying their fair share of taxes, to encourage productive investment, and to renew the entrepreneurial spirit in our economy. Recent revisions have taken a step toward simplifying business taxes and moved to offset the impact of inflation on business investment. More can and should be done. We should consider changing the business depreciation provisions in the current tax laws to allow businesses to recoup the cost of their investments in the year they are made. It is particularly important that revised tax laws take into account the special needs of small entrepreneurs who have produced so much innovation in our economy.

It is not enough simply to focus on raising captial, we must also examine how it is dispensed. Our financial institutions—the dispensers and investors of capital—operate under laws and regulations written in the shadow of the Great Depression. Changes in financial markets have outpaced the regulatory structure governing them.

We recommend that Congress create a Commission on Capital Formation, whose members will represent all appropriate interests and which will report to the appropriate committees of the Congress. Its agenda: to ask where the internationalization of capital markets, the development of new financial instruments, the creation of "nearly" financial institutions, and the new computer and communications technologies are taking us. Its task: to determine where we want to go, and to chart our course for getting there.

Investment in new technologies

New and applied technologies do not just happen. They are the product of basic research and development activities by business, enterprising people at our great universities, and in government. And they are the products of fertile minds, nurtured in our colleges and universities.

Unfortunately, the recent record of research and development leaves much to be desired. Between 1967 and 1978 the share of GNP we invested in research and development fell by 20 percent.

To reverse that trend and spawn the research and development necessary to keep our competitive edge in new technologies, we propose to:

Establish the national goal of a three percent annual commitment of GNP to research and development, with special emphasis on the federal government's need to invest in long-term basic research;

Restore the mission-directed R & D effort that was so successful in our space research and consider giving NASA a new high technology mission—such as renewable energy technology or bioengineering—which holds the promise of broad economic return;

Provide incentives to entrepreneurs who engage in high yield but risky research and development projects;

Help our great universities and federally-supported research and development centers improve and modernize their laboratories and instrumentation; and

Restore to the President's Science Advisor the stature and influence on White House policies he enjoyed before the Reagan Administration.

In addition, the government must help disseminate the benefits of new technologies just as it has helped spread the benefits of agricultural research in the course of the last century. For one example, a robot leasing program might be undertaken. With such a program, American industries could benefit from the newest and most productive technologies without having to incur the cost of purchase and run the risk of their becoming obsolete.

Investment in our people

In the future, a well-educated, well-trained workforce will be essential to sustained economic growth. The clearest feature of the emerging world economy is that the future will be won with brainpower.

The research we must undertake to produce new technologies requires talent—yet we are not graduating sufficient numbers of scientists, engineers, and technicians.

To reverse that trend and generate the brainpower needed to keep our economy competitive, we must:

Reaffirm our national commitment that no qualified student be barred from attending college for lack of ability to pay. We must develop the proper mix of loans, grants, and work-study programs to meet that national goal. As in the case of the GI Bill a generation ago, we must find a way to reward those who serve our country—in or out of the military—with the opportunity for advanced education;

Increase the supply of junior faculty in computer science and electrical, mechanical, and chemical engineering through a new public-private effort to make faculty salaries in these and other shortage areas competitive; and

Extend into higher education the new emphasis on broad computer literacy and language/area studies.

To improve the quality of elementary and secondary education and to endow workers entering the workforce with skills necessary to contribute productively in a rapidly changing economy, we must:

Provide every school with access to a computer within five years and make every student "technically literate" in computer-era basic skills by the end of this decade. To achieve this, we should resurrect the education division of the National Science Foundation, which so successfully developed science and math curricula in the post-Sputnik period and which has been crippled by Reagan budget cuts;

Make quality and excellence the only acceptable standards in our schools and target federal programs which support elementary and secondary education at mastery of language, mathematics, and science;

Establish incentive programs to attract to our school systems talented teachers in areas of special need such as science, mathematics, foreign languages and area studies and increase public appreciation for the profession of teaching through national awards and incentives for talented teachers, perhaps drawing on the successes of the current Teacher Center and Teacher of the Year efforts; and

Increase our investment in programs which help local schools to identify and encourage gifted and talented students from all economic backgrounds.

Investing in public infrastructure

Adequate public facilities are a necessary pre-condition for private sector investment and economic growth.

And the sad truth is that the economies of as many as three-fourths of our communities may not be able to grow simply because of the condition of their infrastructure.

There is overwhelming evidence that the nation's public capital facilities are wearing out considerably faster than they are being replaced; that our roads, bridges, ports, water and sewer systems in urban, suburban and rural areas show alarming deterioration.

The past decade and a half has been a period of massive underinvestment in public facilities. Since 1965, the percentage of the U.S. gross national product devoted to investment in public works has dropped from 3.6 percent to 1.7 percent, a 54 percent decline. The results are most visible in the older cities of the Northeast and Midwest, and the old Southern river towns such as New Orleans, but there is ample evidence of neglect throughout the nation.

The nation's 40,500-mile Interstate Highway System, with a quarter of it worn out, is deteriorating at a rate requiring reconstruction of 2,000 miles per year and the system has yet to reach completion.

Secondary roads off the interstates are often in much worse shape. In eastern Kentucky, where pockmarked roads are steadily pounded by overloaded coal trucks, drivers complain that their tires blow out before they wear out. Truckers traveling from Baton Rouge to Shreveport, Louisiana, drive 130 miles out of their way rather than take chances on the main road between these cities.

More than 100,000 bridges are officially listed as dangerous, and in need of replacement. Forty-five percent of the nation's bridges—248,500—are either obsolete or structurally deficient. In Ohio, 605 bridges have been blocked off, but 4,000 others are still in use despite severe deterioration. More than half of Louisiana's 14,800 bridges do not meet Federal and State standards.

Our ports need maintenance and deepening; our dams need replacement and repair; and our rivers are silting up and need constant attention. A limited number of ports should be dredged to 55 feet to accommodate the world's new-found interest in American coal.

Water systems in older cities throughout the Northeast and Midwest experience significantly higher levels of leakage then cities in other regions. Ten of 28 cities recently surveyed in this part of the nation were found to lose more than 10 percent of their treated water because of deteriorated pipes. And two cities with the biggest problems—Boston and New York—were not included in the survey.

Sewer systems are in equally serious states of disrepair.

Major cities have had to drastically curtail maintenance efforts on their full range of public capital, due to constrained budgets and competition for scarce funds.

The task of rebuilding America's public infrastructure is probably the most expensive challenge that the United States faces in the decade of the 1980s.

The glaring truth is that the need will greatly strain the nation's ability to pay. Yet we must begin, now, to accept the chal-

lenge, or face even greater bills in the future.

The nation clearly needs, and sorely lacks, an Infrastructure Investment Program to:

Inventory needs in every region and at all levels of government—Federal, State and local—now and in the future;

Set priorities to channel scarce resources into growth investments, and to assure that goals match resource realities;

Determine which level of government, or combination of governments or private initiatives are best suited to address the problems.

The current dominance of the Federal government in this area cannot be corrected by an abrupt abdication of responsibility. The Democratic Party is committed to fulfilling its obligations to the nation's citizens and State and local governments. However, states, local governments, and the private sector as well, must be partners in the rebuilding of America.

Restoring our nation's public capital and sustained economic growth must go hand in hand. Without adequate public infrastructure, we cannot have sustained economic growth. And the very economic growth that infrastructure investment will allow will, in itself, generate new resources to pay part of the cost of the rebuilding effort and provide needed jobs for America's workers.

Our infrastructure needs are great. Any number of infrastructure problems must be addressed. For example: our lack of capacity to export coal today costs us billions in potential exports; the market demand exceeds our supply. Instead of closing down major sections of our rail network, we should be upgrading and improving the lines serving domestic markets or terminating at export facilities. We should also be expediting coal port development—speeding up projects for dredging, entering into government-industry partnership where necessary to get the job done.

Additionally, as events of the past few summers have demonstrated, we are hovering at the brink of a water supply crisis in all regions of the country. Some of our major groundwater aquifers are depleting rapidly, and others are threatened with contamination. According to a recent study, almost two-thirds of our rural citizens drink water that could be unsafe. Potable water is our most precious and threatened natural resource. We must act now to begin implementing the long-range solutions to this problem.

Water development—in the broadest sense of the term—must be a national priority. We understand that cost-effective water development projects—for local flood protection, water supply, navigation or hydroelectric power—have national impacts, and are not just regional or local in scope. And we are ready to meet the water challenge of the 1980s and 1990s—the development of additional supplies of fresh, potable water—at the Federal, State and local levels.

Clearly, no single entity or level of government can finance such enormous undertakings as these and our other infrastructure needs. But the total cost must not deter us from undertaking the restoration of the nation's multibillion dollar public investment. The question of how best to finance these programs will have to be resolved in the future. For the moment, we propose this first step: an Infrastructure Investment Program to meet a necessary precondition for sustained economic growth.

2. STRENGTHENING AGRICULTURE

A rational economic policy must provide an environment in which family farmers have a reasonable chance of making a profit and of maintaining the strength of American agriculture. If the present severe cost-price squeeze on the farmer and in agriculture-related business is to be overcome and long-term prosperity and stability on the farm made possible, our policies must contain at least the following elements:

We must recognize that prices received by farmers must cover cost of production and allow a reasonable return on equity.

Our policies must encourage farmers to become better marketers, and to use rational and measured supply management techniques under the best principles of the free enterprise system, to enable them to survive economically.

The conservation of our soil and water resources must be a priority.

The commitment of government to agricultural research, one of the keys to our tremendous agricultural productivity and efficiency, must be strengthened.

Agriculture is an indispensable foundation for a strong America. One out of every five civilian workers is employed in some phase of our food and agricultural industry. American agriculture provides 20 percent of our total exports, accounts for 50 percent of the world's food and feed grain trade, and is so efficient that a single American farmer can feed 77 of the nation's people. A healthy, independent farm economy is therefore in the interest not only of farmers, but of all Americans.

3. MANAGING THE TRANSITION

As our economy undergoes transition, there will be fewer jobs in industries such as auto and steel. This will leave experienced workers in those industries stranded, while firms will be bidding aggressively for specialists in fields such as engineering and computer technology where there are manpower shortages.

Demographic factors will aggravate these imbalances. During the 1980s, the labor force generally will be growing more slowly than during the 1970s. As they reach maturity, the smaller generations which followed the post-war baby boom will contribute fewer new entrants to the job market.

However, the numbers of working age people in some categories will not be declining. There is likely to be an increase in unskilled workers who have typically been concentrated in the areas of the country experiencing the least job growth.

Well-designed policies to promote investment in people—their education, training, and even their health—must accompany the push to modernize and stimulate investment in plant and equipment. We cannot simply depend on general economic improvement to accomplish this upgrading of our human capital: we need a combination of measures that develop workers' skills and promote the movement of labor from constricting to growing industries. And we must call on the private sector—business and labor—to work with government in this effort.

To ease the transition of workers from old industries to new, we propose these policies:

Financial incentives to private employers and labor unions should be provided to help pay the costs of training or retraining, and to match training to actual skill requirements and employment needs. One approach worth careful exploration is a tax credit system for workers who lose their jobs because of technological advances or foreign competition in the industries in which they were employed. Such a tax credit would compensate a firm hiring such workers by paying a portion of their salary in their new jobs for a specified period—presumably long enough to cover retraining and to allow the workers to become productive employees in their new jobs.

Business-labor cooperative efforts, with government assistance, if necessary, should be expanded to relocate workers in new jobs. One such effort is being pioneered by the United Auto Workers and Rockwell International. The government must be a catalyst to get projects of this type off the ground.

Adjustment assistance—not just income maintenance—should be provided to workers to acquire new skills or to take other steps to improve their job prospects. Such a requirement could be added to unemployment insurance and other income support programs without undercutting their safety net features. Alternatively, a portion of employer payroll taxes might be channeled to a special account which would enable experienced workers to acquire education or training during major interruptions in their employment.

Clearly, improving the quality of basic education is a critical step toward improving job opportunities for unskilled workers. In addition, however, we propose three specific steps:

Information about existing training programs and experiments should be collected and disseminated to local communities, so that the most effective approaches can be duplicated elsewhere. Measures of success should include not only job placements but long-term gains in earnings, stability of employment, and reduced dependence on welfare.

Joint business, labor, and government efforts should be undertaken to train hard to employ youths. We should, for example, explore the value of encouraging coalitions of companies in a geographical area to operate training programs in the public schools. Teaching personnel could be supplied by the participating companies, and training equipment should be state-of-the-art.

Financial incentives should be used to expand opportunities for the hard-to-employ in private industry. The current Targeted Jobs Tax Credit program might be revised to facilitate the participation of greater numbers of employers, particularly small businesses. But whatever the precise structure of the incentive, the aim should be to open entry-level jobs to workers who would not ordinarily get them, without disrupting employers' normal procedures for hiring and training.

4. REDUCING OUR VULNERABILITY TO FOREIGN ENERGY SUPPLIERS

The energy crisis has not gone away, and we cannot relent in our effort to reduce our vulnerability caused by our excessive dependence on foreign energy.

Republican policy—best called the "last drop" philosophy—pretends that higher prices have solved everything, that government has no role, that the market will deal fairly with all Americans. This philosophy advocates no government involvement until the "last drop" of oil is taken from the ground, and promotes the belief that a free market operates even when no choices are available. This policy is a danger to our economy, a threat to our national security, and an economic disaster for our citizens.

Contrary to the Republican approach, the federal government must have a coherent, vigorous energy policy—a policy that builds on the strong advantages we enjoy today:

Coal—an abundant energy source awaiting the commitment to mine it in an environmentally sound way, the infrastructure to haul it, and the technology to burn it cleanly. We must make the commitment to all three.

Conservation—a proven success, from fuel-efficient cars and appliances, to insulated homes and offices, to factories where new technology has cut way back on consumption. We must not retreat from our efforts to conserve.

Alternative and renewable energy sources barely tapped—the solar, photovoltaic, geothermal, low-head hydro, tar sands, Devonian shale, biomass and other natural resources we possess so abundantly—must be opened to the new technologies which will permit these resources to be tapped in order to help us solve our long-term energy problem.

A resilient marketplace—a proven partner to government's efforts to exploit our advantages.

At the same time, national energy policy must confront our two undeniable liabilities:

Dependence on imported oil which will remain a reality until our transition to domestic and renewable energy has been accomplished.

Regional imbalances have created a disparity between states which underlines the need for an equitable and genuinely national energy policy.

An energy policy that builds on our energy advantages and compensates for our energy liabilities will also alleviate the impact that actions taken by other nations have on our domestic inflation rate. So long as we are dependent on foreign oil as a major source of energy, our economy will remain vulnerable to inflationary surges resulting from price hikes or supply cutoffs by energy producing nations.

These advantages and liabilities must be paramount considerations in our energy policy choices. We must continue to encourage conservation, to revitalize our coal industry, to promote solar and other renewable energy sources and redress regional and social inequities.

The United States should become a new energy exporter by the year 1990 by:

Creating a greatly expanding coal exporting industry;

Modernizing the nation's entire transportation system and infrastucture, from mines to railroads to sea lanes;

Inventing coal technology processes and pollution-control equipment to increase our productivity, protect our environment, and open new markets for international trade;

Building on our present international lead in solar technologies and conventional and unconventional drilling techniques;

Objectives, such as creating a vastly expanded coal exporting industry or retooling our automobile industry to produce more fuel-efficient cars, will be costly. It is possible, however, to raise revenues for these efforts and to promote our national conservation goals through a variety of energy revenue measures, such as oil import fee or gasoline pump tax, which should include provisions to equalize the special regional burdens they would cause.

5. AN ECONOMIC COOPERATION COUNCIL TO MAP LONG-TERM STRATEGY

The prescriptions we have just offered are, in our view, essential to meeting today's major economic challenges. But that alone will not be enough to insure our economic security. It will take time to solve the problems facing our nation. In the meantime, new challenges will have appeared. The one thing which is certain in today's international economy is change—change of a rapid order.

So as we work on putting those prescriptions into effect to rebuild our economy, we need the capacity to look ahead, to focus attention on emerging as well as present problems. We need the capability to develop a long-term economic strategy for attaining sustained economic growth—a strategy that anticipates economic trends and identifies potential problems and opportunities.

We propose an Economic Cooperation Council. The Economic Cooperation Council we propose is not the monolithic national planning agency found in many of our competitor's nations. Rather, it is a tool to help us bring together the disparate resources necessary to compete in an international economy. Our Economic Cooperation Council will have to address two very critical, but different tasks.

First, we need a national vantage point from which to measure the present and assess the future. We need a center of American expertise that will monitor carefully the changing nature of America's domestic economy and its capability to respond to international competition. We need an institution which will serve as an early warning system to detect flaws or weaknesses in our domestic enterprises before those weaknesses become debilitating or even fatal. And we need an institution which can evaluate global economic trends, identify markets and assess the strengths of our competitors in the international arena. We need the capability to forecast where we should be in three or six or ten years.

Second, America needs a national arena for clarifying complex economic choices and building broad support for public initiatives. The combined experience of the Great Depression and World War II helped build a broad political consensus that laid the basis for economic reconstruction abroad and economic prosperity at home.

The Economic Cooperation Council would combine the ability to assess future economic trends with a membership that would help build a partnership around solutions to major economic problems. That membership must be representative, distinguished, respected and influential. It must have top quality staff with the specialized talents that combine analytic skills with an understanding of the American political process.

Gathering the facts

The cutting edge of international competition is sharpened on the whetstone of intelligence. Our competitors understand this. The Council will give priority to gathering pertinent data, using existing sources of information within the government wherever possible. Where data does not exist, the Council will have to establish the machinery to develop them. A central part of the Council's task will be presenting the President, the Congress, and the country with a clear idea of where the United States economy is headed and where we stand in relationship to our competitors.

Linking domestic and international policy

A striking economic change in the 1970s was the internationalization of the United States economy. Today, two acres in five are planted for export and one industrial job in eight now depends on international trade. Accordingly, it is no longer wise, or in many cases possible, to divide U.S. policy arbitrarily into domestic and international categories. The Council will have to concentrate on the international consequences of U.S. policy and detail the implications of policies adopted in Europe, Japan, and the developing world, on our own economy.

Despite the growth in American exports, the United States remains an unaggressive exporter. The result of this is that thousands of small and medium sized businesses cannot penetrate the export market or simply don't try. For the most part, America does not make policy with international trade in mind. Neither overall economic policy nor individual trade regulations reflect the importance of making America competitive in international markets.

In forging a trade policy for the 1980's, the Economic Cooperation Council will have to look at a multitude of factors. A new trade policy should maintain and expand our existing markets and build on our unexploited strengths in high technology and small business. We must also realize that market demand in many areas of the world reflects needs for basic health, agriculture and education assistance, which are also fields of U.S. expertise.

Our trade negotiating strategy will have to be targeted on areas of potential gain for the United States, and policies will have to be developed to offset a variety of foreign export subsidies. We would expect that our foreign policy would spell out in the clearest of language our adherence to the spirit and the letter of our trade agreements. At the same time it must be made clear we will not tolerate any violations of these agreements from abroad. The respect which was associated with Yankee Traders in the last century should again be reflected in our foreign policy.

Anticipating problems

The Economic Cooperation Council will be in a position to direct national attention to emerging national problems. The shifting balance in international oil production had been developing for many years. Had we taken appropriate action in 1970, the whole course of economic history may well have been different. By acting in a timely fashion we could have avoided much of the economic distress that crippled the automobile and steel industries. The Economic Cooperation Council would serve as an early warning device to avert such disasters.

To be effective, the Economic Cooperation Council must have the confidence of a broad range of private sector groups and also reflect the geographic diversity of the country. It must be bi-partisan, enjoying the full confidence of the Congress. Above all it must have the unstinting support of the one person in the country who speaks on behalf of the entire nation: the President.

We do not need another commission whose statements and reports last no longer than a fleeting headline. The purpose of the Economic Cooperation Council is to establish our national economic goals, to map out a strategy, and to marshal our resources for meeting them.

* * * * *

As times have changed, so has our economy. The United States has built the most productive society the world has ever known through hard work and creativity. Despite our present economic problems, we have good reason to face the future with confidence, for the American genius for invention and innovation is stronger now than ever. But to meet economic challenges of the future, we must invest today.

Some are hesitant to acknowledge that changing times require new solutions. And

some will always be wary of those who propose change. To those among us who question new ideas, we say that we carry the same compass which guided our forefathers. And we journey toward the same goal—human dignity and opportunity for all Americans.

However, when new obstacles appear, we are not afraid to strike out onto new paths to reach our common goal.

Mr. NUNN. Mr. President, I yield back the remainder of my time and I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The assistant legislative clerk proceeded to call the roll.

Mr. BUMPERS. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

RECOGNITION OF SENATOR BUMPERS

The PRESIDING OFFICER. Under the previous order, the Senator from Arkansas is recognized for not to exceed 15 minutes.

NATIONAL PEACE DAY

Mr. BUMPERS. Mr. President, I will not take 15 minutes.

Today I am introducing a joint resolution that is cosponsored by the following Senators: Senators TSONGAS, BRADLEY, GORTON, DECONCINI, SPECTER, GLENN, PRESSLER, SASSER, HATFIELD, INOUYE, STAFFORD, NUNN, CHAFEE, RIEGLE, WEICKER, PRYOR, DANFORTH, CRANSTON, MOYNIHAN, DODD, HUDDLESTON, HART, DIXON, EXON, BURDICK, BAUCUS, FORD, HOLLINGS, and JACKSON.

Mr. President, this is a simple joint resolution that calls on the President to proclaim October 10, 1982, as a National Day of Peace.

I simply want to say that none of us has that part of the human personality of fully appreciating the things we enjoy until we lose them.

When the air-conditioner goes out we have a much keener appreciation of the value of electrical power, or when the dishwasher does not work we realize what a labor-saving device it is, and we reflect back on how our mothers and our grandmothers used to handle that.

We never really appreciate our good health. Many people, for example, will continue to abuse their health to demonstrate their indifference and insensitivity to good health until they lose it. I have heard I do not know how many people say they never realized how easy it would be to give up smoking until they got cancer.

And so it is with peace, Mr. President. Nobody ever really appreciates the incalculable benefits and values that we all derive from being at peace.

There is a world at war. Iraq and Iran; war all over Central America, especially El Salvador. The Middle East is literally aflame with unbelievable grief and trauma being experienced by the people of Lebanon. We have just finished the Falklands war, in which almost a thousand people gave their lives with a much larger number being injured and wounded.

And here in the United States we have enjoyed peace and our men and women have not been engaged in war since the end of the Vietnam conflict. But we constantly wonder, with all the hot spots of the world, will it spread and if it does spread will it bring the superpowers into confrontation with each other?

So, Mr. President, we have all waved the flag as we have sent our men off to war. I believe it is appropriate also to wave the flag on a day of peace and to set 1 day aside every year for the people of the United States to engage in such ceremonies and activities as they may choose simply as a reflective time to appreciate the value and the benefits to ourselves and future generations to remain at peace. Everybody is constantly conscious, and I believe now as never before, that with all the nuclear weapons that abound in the world, particularly in the hands of the United States and the Soviet Union, increasing numbers of people feel that the survival of man is threatened almost by the minute.

So I believe it is only appropriate that on Sunday, October 10—there is not anything sacred about that particular day, but it is a good fall day in most sections of the country—that the President proclaim that as a day for Government entities, organizations, interest groups, and all people to engage in ceremonies and activities and festivities and commemorate the tremendous benefits we enjoy by being at peace. And, while my resolution does not call for it, it would be appropriate for the President to also call on all nations and all people of the world to also do likewise.

Mr. President, I ask unanimous consent that the text of the joint resolution be printed in the RECORD.

There being no objection, the text was ordered to be printed in the RECORD, as follows:

S.J. RES. 251

Whereas, wars are raging in several parts of the world inflicting incalculable loss of human lives, and property, with unbearable human suffering and grief; and

Whereas, the presence of huge nuclear arsenals in the world present an ever present threat to the survival of mankind; and

Whereas, though war in a very troubled and divisive world is an ever present possibility and threat, the United States has been at peace since the end of the Vietnam conflict; and

Whereas, the benefits of peace and the value of life should be ever present in the thoughts of all people; and

Whereas, a day should be set aside for the American people to reflect on the values of peace and the horrors of war; and

Whereas, the President should proclaim a day of peace and call on the people of the country to commemorate it with such ceremonies and activities as are appropriate and in keeping with an expression of gratitude for living in a great, free nation at peace; Now, therefore, be it

Resolved by the Senate and House of Representatives of the United States of America in Congress assembled, That October 10, 1982, be designated as "National Peace Day" and that the President of the United States is authorized and requested to issue a proclamation calling upon Federal, State, and local government agencies, interest groups, organizations, and the people of the United States, to observe that day by engaging in appropriate activities and programs, thereby showing their commitment to peace.

TEMPORARY INCREASE IN THE PUBLIC DEBT

The PRESIDING OFFICER. The Senate will resume consideration of the unfinished business, which the clerk will report.

The legislative clerk read as follows:

A House joint resolution (H.J. Res. 520), to provide for a temporary increase in the public debt limit.

The Senate resumed consideration of the joint resolution.

BAUCUS AMENDMENT NO. 2040 TO WEICKER AMENDMENT NO. 2039

The PRESIDING OFFICER. Under the previous order, the Senator from Connecticut is recognized.

Mr. WEICKER. Mr. President, in somewhat less than an hour, the Senate will once again vote on the matter of cloture relative to the amendment before us by the distinguished Senator from North Carolina. And I would hope that, as in two times past, the Senate would reject cloture on this issue.

Now, the history of debate on the floor has been such that my very able and good friend from Montana, Senator BAUCUS, has led the fight in terms of the argument, constitutional argument, of three separate but equal branches of government or, to put it in its popular term, court stripping. I have tried to emphasize that aspect of the argument that relates to the first amendment of the Constitution of the United States, more specifically that which states the Congress shall make no law respecting an establishment of religion or prohibiting the free exercise thereof.

Now, I think it is important to review not just the history of this particular piece of legislation but all other attempts to bring about some very basic changes in our constitutional structure.

Mr. BUMPERS. Mr. President, will the Senator yield?

Mr. WEICKER. Mr. President, I yield to the distinguished Senator from Arkansas for the purpose of debate without losing my right to the floor and without this being consid-

ered as the end of a speech for the purposes of the two-speech rule. I ask unanimous consent that I might do that and that I might be recognized at the conclusion of the Senator's remarks.

The PRESIDING OFFICER (Mr. DENTON). Without objection, it is so ordered.

Mr. BUMPERS. Mr. President, I just want to make two or three comments which the Senator from Connecticut has made time and time again here but which still has not really been picked up by the national press and the electronic media and, therefore, the people of the country are still confused about why this debate is going on on this issue.

I wish to say, first of all, I do not know of anything that I have resented as much as the constant reference to the liberals who are opposed to this amendment. I cannot help but think about Sam Ervin, the distinguished constitutional scholar who was so recently a Member of this body and one of the most conservative Members of it. I promise you if Senator Ervin were in the body today he would be leading the fight against this.

The American Bar Association president, I do not know him personally but I know the American Bar Association certainly is no citadel of flaming liberalism, has called this approach to dealing with this issue the most serious threat to the Constitution since the beginning of the Republic.

Now you pit the emotionalism of a very significant majority of people in this country who want prayer in the school against an issue that is very difficult for laymen to understand, and that is this amendment effectively repeals the first amendment to the Constitution of the United States and would do so by a simple majority vote in the Congress.

When the Founding Fathers set up the methods for repealing or amending any part of the Constitution, they made it very difficult. The procedures are tedious, laborious, and they are long. But Thomas Jefferson and James Madison and the other brilliant men of that age knew exactly what they were doing, because they knew there would be these incessant attempts by people who had no keen appreciation for the fact that freedom can only be maintained under a sacred organic law which, in our country, is the U.S. Constitution.

This amendment says that the Supreme Court and none of the lower courts of the Federal judiciary may not consider, even entertain, an objection to any voluntary prayer in school that is mandated by any State or local subdivision, including school boards.

I do not care whether you are Protestant, Catholic, Jewish, whatever. But let us assume the school board hands a schoolteacher a prayer and says, "You and all of your students will repeat this prayer every morning at the beginning of class."

She looks the prayer over and she says, "That violates everything I believe in, everything I have been taught in my church since I was a little girl, and I refuse to do that."

They say, "You are fired."

There is a serious question as to whether or not she could even sue under the Civil Rights Act, if this amendment became law.

The proponents say, "Well, the State courts can handle this. Let us eliminate the Supreme Court, the circuit courts of appeal, and the district courts. Let the State courts handle it."

What does that lead us to? Chaos. Freedom of religion means one thing in Arkansas and something else in Connecticut, one thing in California, and something else in Florida. And if you can do it on freedom of religion you can do it on the invasion of privacy. You can eliminate the search and seizure laws by a simple majority of the Congress. You can eliminate freedom of the press. As a matter of fact, you can take the Constitution and make it a dartboard for all the effectiveness it will have if you start down this road.

So, Mr. President, I have not engaged in the filibuster, but I have admired those who have. I have certainly voted against cloture and will do so again today because I agree with the American Bar Association president. It is the most serious threat to constitutional government.

Maybe this is not the gravest crisis that has ever come before the Senate, but it is one of the gravest and the least understood. So I will continue to vote against cloture, and I will do everything I can to defeat this amendment and any other amendment that tries to repeal the Constitution of the United States by a simple majority vote, almost by whim and caprice.

I thank the Senator from Connecticut for yielding.

Mr. WEICKER. I thank my distinguished friend from Arkansas. I only wish that he would join in the extensive remarks which are being made out here. Indeed, his remarks this morning were very eloquent.

Mr. President, we have gone through this exercise not just once, but this now marks the third time we have tried to approach amending the Constitution by a simple legislative majority. It had no place on this floor when the subject matter was discrimination against the black schoolchildren and the remedies applied thereto by the courts in this country. It has no place on this floor when the subject matter is abortion, and more particularly the law of the land as set down by the Supreme Court in Roe against Wade.

Now we encounter it in terms of abridging the first amendment rights, specifically freedom of religion.

I first want to say this: The substance of what was attempted is, in this Senator's opinion, wrong. I have no qualms in debating any of these matters if indeed a constitutional amendment is to be proposed. I do not want to give the impression as the one who started the first fight on the busing issue, on the court-stripping aspects of the proposals. But I do not want to give the impression that I ducked behind court stripping as a way of being unwilling to challenge the substance of what is being proposed.

There are in every one of these cases before the Senate two constitutional arguments: Court stripping, doing an end around the Supreme Court of the United States, and then the actual substance of what is being proposed. In none of the two previous debates have I felt that the issue is so clearly set forth and determined by what is already in the Constitution and that if indeed we make this change then we take the first step toward a state religion and a state prayer. That is not the religious freedom that this Nation presently enjoys.

I will continue to leave the court-stripping arguments to my friends because they are valid and I join them 100 percent. Indeed, it was the essence of my arguments for many, many months. But I think it is terribly important that this Nation appreciate the full import both of what is in the first amendment to the Constitution of the United States now and what is being proposed in terms of changing that amendment.

This is not just some little harmful exercise which people are going to perform in the early hours of a school day. The principle being espoused applies to all of us. It in effect says the Government of the United States may dictate to its citizens a form of religious worship.

We do not make laws in this country for a portion of the populous. There is no such thing as a Constitution with an interpretation for those who are below age and those who are in their majority. The matter of religious freedom applies to all 250 million people in the country.

If the Senate of the United States can legislate what it is that a youngster is going to say in terms of prayer, then it may do so also with any of those who are beyond school age.

Right now in the United States there is total religious freedom. Right this minute, total religious freedom. No matter what your belief, you may practice it to the fullest extent. Indeed, I as one Senator urge everybody to do so. There is nothing outside of your faith by law, in terms of those

laws passed here on the Senate floor or by those laws that reside in the Constitution of the United States, that in any way restrict the practice of the faith of any American. Nothing.

What is being proposed is the first small step toward contracting that total freedom that we now enjoy.

But the ultimate argument also has to be made, as one who speaks for the Constitution.

That is that, assuming that a prayer may be devised that encompasses all beliefs in the Nation today—all beliefs in the Nation today—assuming that that can be accomplished, which I think everyone would agree is a practical impossibility, but assuming that, it has not made provision for the faith that is yet to be. So it becomes flawed, because the Constitution, unlike the laws which we write daily on the floor of the Senate, has to last from generation through generation.

It does not change with the Congress. It does not change with the new occupant of the White House. It does not change with the elections. It does not change with who might be in the majority, Republican or Democrat, in the House or the Senate. It lasts for all generations.

So, how is it possible to write a prayer today which does not foreclose that faith which has yet to be proclaimed in the future? You cannot do it. The Constitution is there so that, whatever happens in religion in this country, it will be heard. It will be heard. If nowhere else in the world, it will be heard in the United States of America.

The men who argue on this side of the issue are not atheists. We do not ascribe to some alien philosophy or political ideology. We are as committed to religion and religious freedom as those who try to impose this mandated piece of faith on some Americans.

Religious freedom, not a state religion. The minute the school board, the Senate, the President, the House of Representatives, the Governor—this is all civil authority—the minute it steps onto the field, no matter for how small a period of time, even if it is one word or two words, we have started the merger between religion and government. That is what has distinguished the United States of America, that that merger has never come to pass. Because of it, religions have thrived here where they had no place to grow anywhere else in the world.

People came to the United States of America specifically so they could worship—worship. It is hard to believe in this day and age. Everybody says people came to the United States because they wanted to make an easy buck, because they wanted to enjoy a better life. No; people came to the United States—and they still do—because they wanted to be able to worship.

When we define religion—and this certainly includes myself—I am inclined to define it as being either Protestant or Catholic or Jewish. That only scratches the surface. There are thousands of religions, thousands—almost all of which are here in the United States of America.

Mr. LEAHY. Mr. President, will the Senator yield?

Mr. WEICKER. I shall yield in a few minutes to my good friend from Vermont. I promised 15 minutes to the distinguished Senator from North Carolina (Mr. EAST).

I say that, just in my lifetime, as an example of what grows in the United States, as I said before, Protestantism was de facto, probably, the official religion of this country. Catholics and Jews were very much put upon. Not so today.

Look at the growth of the Catholic Church in America. Look at the growth of Judaism in America. That should continue to be for some faith that may only have 100 followers. Instead, we are going to take, this generation is going to impose some form of prayer according to the tenets and beliefs of this generation.

As I read the Constitution, very simply, there was more wisdom 200 years back than there is in this generation. If a job were going to be done, I probably would prefer that they did it. If they did not do it, I want to make damned sure we are not going to go ahead and do it.

Mr. President, I yield the floor to the distinguished Senator from Vermont for the purpose of debate without losing my right to the floor and without this being considered as the end of a speech for the purpose of the two-speech rule.

I also ask unanimous consent, in addition to that, that I be recognized at the conclusion of the remarks of the Senator from Vermont. I would appreciate it, since I have indicated to my good friend from North Carolina that, at 11:30, he might speak for 15 minutes, if the Senator would yield me back the floor in about 5 minutes.

The PRESIDING OFFICER. Is there objection? Without objection, it is so ordered.

The Senator from Vermont.

Mr. LEAHY. I thank my good friend from Connecticut. I applaud him for the work he has done on the floor on this issue.

Mr. President, I have spoken once on this before; in fact, a couple of times. I was not going to speak again on it, but I was troubled, riding into work this morning, when I started thinking about two things.

One was my own State of Vermont, a small State, a cautious State, a conservative State in the best sense of the word. Certainly, it is the most Republican State in the Union but, fortunately for me, with at least a latent streak of bipartisanship.

The other thing I thought about was when I was a law student here, at Georgetown. I used to spend the little free time one has as a law student in the galleries of the U.S. Senate. I would come here thinking what an honor it would be to serve in the Senate, because this was the body that was the conscience of a nation. This was the place with 100 people representing all the United States, who could stand up and say, whoa, to momentary passions, whoa to a passing fad.

This is the place where people would not be swayed, day by day, by pollsters, direct-mail appeals, or whatever, because this, by history, was where the conscience of our Nation spoke, and this is where people would stand up and speak to the long-term interests of the United States.

In Vermont, if you were to take a poll today, the vast majority of the people, if you simply asked the question, "Do you think school children should be allowed to pray?" would say, "Yes, of course." But if you asked Vermonters, "Shall we strip the courts, the third independent branch of Government, of its ability to protect your rights," there would be a resounding call from the Green Mountains of Vermont: No, no, no.

Mr. President, that is precisely what we have here today. Every single person in this country knows that at some time in their life, it is conceivable that their rights may be violated by somebody in Government, whether it be a sheriff or a mayor, a legislator or a Governor—whomever. Every time, they know that if that happens, they have one recourse left: They can go to the courts and ask to have their constitutional rights protected.

Are we going to say here today that we are going to start closing that door, inch by inch, foot by foot, yard by yard, against any one of us wanting to go back to our constituents and say, "We closed the door on your rights?"

This is in the matter of religion, Mr. President. My children have prayed in school because they went to parochial schools. I paid the tuition for them to go there. They went to the schools where they said the same prayers that we say at home. The Leahy family is a deeply religious family.

We pray at home and we pray at Mass on Sunday. But they said the prayers in the schools that we sent them to because we paid the tuition for that private parochial school. They are now down here with me in a public school system. I do not want the governing body of that public school system to tell my children what prayers they are going to say, no matter how they may differ from the prayers that we say at home. I do not

want the Government telling my children what their religious practices will be. I feel responsible as a parent to tell my children, to teach my children, and to bring my children up into the religion that my parents passed on to me and their parents on to them. That is where it should be, within the home, not the Government telling them.

I realize there are people on both sides of this issue who feel it very strongly, but I am also concerned when I hear people say, "Well, what is going to be the political fallout on this? What political group will gain advantage depending upon what these votes are?"

That is almost as though we Members of the Senate should act as though we own a seat in the Senate and we should be always looking over our shoulder making our decision based solely on whether it gets us reelected or not. That is why in the past few years the Senate has drifted further and further away from its role as the conscience of the Nation.

It is time for us to come back to being that and look at what is in the best interests of our Constitution, of our Nation, of the rights of our people and stop thinking simply of our own elections or reelections. This more than any other is that time.

I conclude only with this thought: Let us not start on that slippery slope of closing the doors to the one last place where the constitutional rights of our people can be protected without any fear or favor.

I yield back to my good friend from Connecticut, again applauding him for the work he has done in helping lead this fight.

Mr. WEICKER. I thank the distinguished Senator from Vermont for his very eloquent and articulate exposition of the issue before us.

Mr. President, I ask unanimous consent that I may yield the floor to the distinguished Senator from North Carolina (Mr. EAST) for the purposes of debate without losing my right to the floor, without this being considered as the end of the speech for the purposes of the two-speech rule; that I be re-recognized at the conclusion of the Senator's remarks.

The PRESIDING OFFICER. Without objection, it is so ordered.

The Senator from North Carolina.

Mr. WEICKER. I ask my distinguished friend from North Carolina, in that there are a few other Senators who care to speak, if I could yield for 15 minutes.

Mr. EAST. May I ask a point of clarification from the Senator. As I understand it, as a part of that unanimous-consent agreement, I would be allowed subsequent time to possibly speak on this measure; that is, the two-speech rule would not be held against me?

Mr. WEICKER. I have no difficulty with that.

Mr. EAST. I ask unanimous consent, Mr. President, that the two-speech rule not be held against me and, if the opportunity be appropriate, that I could later speak on this subject.

The PRESIDING OFFICER. Is there objection?

The Chair hears none and it is so ordered.

Mr. EAST. I wish to thank the distinguished Senator from Connecticut for his very generous cooperation in allowing me in the last part of this debate this morning to be given 15 minutes to make some remarks.

First, Mr. President, I do this hoping that I will be fully understood; one, I suppose, always is reluctant to praise publicly his own colleague lest it sound a bit self-serving, but I would like to thank the distinguished senior Senator from North Carolina, Senator JESSE HELMS, for getting out on the point on this issue and standing firm. I think he is right. I think he is right on the moral question. I think he is correct on the constitutional question. There is no question but what the majority of the people in this country support him on it. Every poll shows that. Interestingly, every vote that we have taken on the filbuster matter so far shows that a majority of the Senators agree with him.

What the filibusterers fear, with all due respect to them, is that this issue might get to a vote of the Senate and ultimately the House of Representatives and the measure would pass.

What we have witnessed over the last several days is an admitted obstruction of majority sentiment in the country and in the Senate, in a country founded and predicated upon the idea of representative government, democratic government. I think it violates a fundamental tenet of democratic political theory.

Mr. President, I should like to comment on two aspects of this problem. First, I should like to comment briefly upon the first amendment, and then I should like to comment briefly upon the jurisdictional question which goes at the heart of the Helms proposal.

The first amendment as envisioned by the framers of our Constitution was to do fundamentally two things: First, to prevent the establishment of a national religion. That was the purpose of the establishment clause. I do not know of anybody in this Chamber or probably well nigh in the country that would question but what that was a sound premise. We would not make any church the national religion. Congress shall make no law, it said. It left the issue of religion, state church, to the States, and you had great variety in the States back in that period. It was to leave the States as the deciders of this issue, a fundamental premise of federalism, a sound one. And that is all the Helms proposal would do, allow State and local government to decide if voluntary prayer is allowed in the schools of this country.

Does that offend your sensibilities? Do you think that would offend the sensibilities of the vast majority of the American people? No.

There is too much elitism in Washington today. The theory is you cannot trust the American people or the local school board to make any intelligent decision. Either we do it through the bureaucracy in Washington or we do it through the Federal courts, but heaven forbid that we should trust the American people at the local level to make any intelligent decision.

Too bad that that is the current theory. It looks very patronizingly at the good judgment and the commonsense of the American people. I would trust their judgment on this. If they wanted to have prayer, let them have it. If they did not, then do not have it. But I would not want to dictate to the cities in Connecticut or to the cities in Arkansas what they might do, or the State or local government. Let them decide. That is what James Madison, the father of the Constitution, had in mind. What Senator HELMS is talking about is as reasonable as anything can be. Turn it back to the State and local level and let the Supreme Court leave it alone.

That is what the framers had in mind in the first amendment. The main thing they were opposed to was the establishment of a national religion, and that is exactly what is occurring now, because every time any vestige of traditional religious belief is manifested in the public schools of this country it is struck down.

What is the national religion today? Secular humanism. And that violates everything they were talking about—no national religion. Now there is a national religion. You can do everything in the public schools today except show some genuine religious activity. You cannot read the Bible; you cannot pray because there is a chilling effect cast over it because of Supreme Court decisions, but apparently you can do everything else under God's sun from violence, drugs, and so forth. It is only when people begin to introduce a little religious value that all of a sudden the hue and cry goes up that, "Oh, my goodness, they are subverting the schools."

The American people in their commonsense know nonsense when they see it, and that is what this is. Strip it down to the bare bones and Senator HELMS is saying let State and local government decide. No wonder the filibusterers do not want this to get out to a majority vote on the Senate floor or the country at large.

On the jurisdictional question, there is no question but what we have the power to do that. The only matter is

would it be prudent to exercise it. I understand that, and I wish we could get on to a debate about it.

Article III clearly gives us the power to withdraw the appellate jurisdiction of the Supreme Court, to set its parameters. It gives us the power to create and to totally abolish the lower Federal courts. It states it. It is clear. It is explicit. The question is, Is it prudent to exercise it in a particular case? That is fair game and I am willing to debate it.

They talk about stripping the courts. They all voted for the Voting Rights Act. It stripped away the jurisdiction of the lower Federal courts in the South to hear voting rights cases.

The Senate is already on record as indicating taking away jurisdiction of Federal courts with regard to busing. There is a long history where Congress, under its power under article III, adjusted the jurisdiction of the Federal courts. There is nothing new or novel about it. We have that power. Again, the question is, in a particular context, Is it prudent to exercise it?

Mr. President, I should like to get down to what I think is a fundamental question in this country: Who ought to be making, as a matter of federalism and separation of power, the fundamental policy questions?

As the framers envisioned it under federalism and separation of powers, in this particular matter it would be of State and local concern. That is exactly what Senator HELMS is asking that we return to, and I support it, and I ask my colleagues to support him.

Senator HELMS is really raising the broader question which every American senses in his political bones, that somehow or other we no longer make policy decisions in this country. We do not do it on abortion. We do not do it on busing. We do not do it on prayer. We do not do it on a whole host of things. Do you know who does it? The elite in the Supreme Court, the Federal judiciary, with lifetime appointments, no accountability, moving ever and ever into the policymaking role.

It concerned the framers. That is why they gave us checks and balances—dealing with the jurisdiction of the courts, appointment to the courts, creation of the courts, the amending process. They gave us a whole range of processes.

They said to the legislative body, the principal policymaker, "Here are some tools you can use to maintain your prerogatives and powers as the principal policymakers."

The curious thing is that as the courts continue to encroach upon our power, the hue and cry goes up in the Senate, by this minority group, "Let them do it. There is nothing we can do about it."

I ask you the wholly platonic question: Who guards the guardians? The guardians are who in this case? Apparently, the Supreme Court. They know better than State and local government in these matters. But what if they overstep their bounds? What options do we have? None, we are told. I hate to use the word, but ultimately, I guess, we just pray, pray that they do it right—but do not pray in school for it, because that violates the Constitution, according to the elitists.

I think the American people know nonsense when they see it. That is one great and comforting thing in this country. If you let it get back to the American people and let them deliberate about it and use their commonsense, they would come up with a better answer than this.

That is the whole underlying theoretical premise of the U.S. Constitution—representative government. That is our great contribution to the political institutions of the world, in our time. That is why we are the envy of the world, because we have representative government. We are willing to trust the deliberative process to set fundamental policy course and direction in this country. We do not want elitists doing it—self-appointed, self-annointed, lifetime appointees. They have their role, but this does not happen to be one of them.

Mr. President, I know that my time is running out. I have said my piece, and I should like to conclude on this note, to remind my colleagues as they come up to vote in a few minutes on the matter of cloture: My distinguished colleague from North Carolina has been taking a lot of public abuse of late because of his willingness to stand firm. Certain provincial newspapers contend that he has lost his clout as he gets a majority vote in the Senate. But, more important, out in the land the people are with him. Those are the people who are with him, and in this artificial atmosphere of the Nation's Capital, sometimes it is hard to perceive that.

Senator HELMS is correct on the moral question. He is correct on the constitutional question. He has the support of the majority of the U.S. Senate on this issue, if it could ever get to a vote. I know down deep in my political bones that he has the support of the American people throughout the land.

It is a simple, elementary question: Do you trust State and local government to decide whether there ought to be voluntary prayer in the classrooms of this country? I opt for the latter, and happily and proudly so, and I salute my distinguished colleague from North Carolina for showing the leadership on this very important matter.

I thank the Senator from Connecticut.

The PRESIDING OFFICER. The Senator from Connecticut.

Mr. WEICKER. Mr. President, I should like to make one comment to my distinguished friend from North Carolina. I agree that he articulates the other side of the issue from this Senator very well, but he makes a statement about leaving this matter to State and local governments.

Just so that I not be accused of finger pointing on the Senate floor, I will use my own State of Connecticut as an example. When it was left to local and State governments, even after the Constitution had been written, we had a fusion of church and state.

For example, in Connecticut, Congregationalism was the official religion of the State of Connecticut, and it was disestablished in 1818. Indeed, it was Thomas Jefferson who wrote to a congregation of Baptists in Danbury, Conn., in 1802, and he said at that time:

LETTER BY THOMAS JEFFERSON TO A COMMITTEE OF THE DANBURY BAPTIST ASSOCIATION, JANUARY 1, 1802

The affectionate sentiments of esteem and approbation which you are so good as to express towards me, on behalf of the Danbury Baptist Association, give me the highest satisfaction. My duties dictate a faithful and zealous pursuit of the interests of my constituents, and in proportion as they are persuaded of my fidelity to those duties, the discharge of them becomes more and more pleasing.

Believing with you that religion is a matter which lies solely between man and his God, that he owes account to none other for his faith or his worship, that the legislative powers of government reach actions only, and not opinions, I contemplate with sovereign reverence that act of the whole American people which declared that their legislature should "make no law respecting an establishment of religion, or prohibiting the free exercise thereof," thus building a wall of separation between church and state. Adhering to this expression of the supreme will of the nation on behalf of the rights of conscience, I shall see with sincere satisfaction the process of those sentiments which tend to restore to man all his natural rights, convinced he has no natural right in opposition to his social duties.

I reciprocate your kind prayers for the protection and blessing of the common Father and Creator of man, and tender you for yourselves and your religious association, assurances of my high respect and esteem.

THOMAS JEFFERSON.

I do not think that it was contemplated by the Founding Fathers, that every State and locale should do its own thing; but, rather, that religious freedom was something which belonged to the whole Nation. It was a whole nation that opened its arms to the people of this world, as the only nation in the history of civilization to say there is no State religion. That means no national religion, no State religion, no municipal religion, no official religion period, no merging of the civil authority with the religious authority. That was what was intended.

so that religion in this Nation would always be a personal and not an official act.

Mr. EAST. Mr. President, will the Senator yield for a point I should like to make?

Mr. WEICKER. Without losing my right to the floor.

Mr. EAST. My answer to that is that at the time of the founding of this country and the first amendment, the purpose of the first amendment was to forbid the establishment of a national religion. But I remind the Senator that at the time of the founding of this country, we had a great variety or relationships between church and state, depending upon the particular colony.

In Massachusetts, for example, there was a very close fusion of church and state. In Rhode Island there was none at all. You had no officially established church.

In North Carolina and Virginia, for example, you had an official church that was Anglican, but other churches were allowed or formed.

So they had great diversity which reflects the great strength of the Federal system, and that is what Madison was defending.

The Senator from Connecticut was saying that he did not think the Connecticut solution was good, and ultimately the good people of Connecticut decided it was not, and so it is gone, and that is true in North Carolina.

But it evolved over time through decisions at the State and local level. That is what the framers intended by the first amendment, and all Senator HELMS is trying to do is shore that up again.

Mr. WEICKER. Mr. President, I ask unanimous consent that the Senator from North Carolina and I not be considered as violating the two-speech rule and that I do not lose my right to the floor, so we may debate this for 1 minute here.

The Senator then is saying that an official religion proclaimed by one of the States of the Union is all right; is that correct?

Mr. EAST. I think it would be very imprudent for them to do it, and I would not support it. Fortunately not 1 of the 50 States has done it.

So the distinguished Senator from Connecticut conjures up a chamber of horrors that simply does not exist.

Mr. WEICKER. But we both agree it did exist and the Senator is arguing for State and local government being able to establish their religion.

Mr. EAST. I am saying that is what was intended by the first amendment by the framers of the U.S. Constitution. If they had not meant that they would never have gotten it ratified because the State of Virginia, for example, would no more let this new Constitution dictate to them the relationship between church and state. All they were saying is we do not want any national church but we in Virginia will decide that relationship and North Carolina, Massachusetts, and Connecticut will also.

That is the fundamental point that has been completely lost in all of this discussion.

Mr. WEICKER. Is that the position of the Senator from North Carolina?

Mr. EAST. Pardon?

Mr. WEICKER. If the Senator will yield, is that the position of the Senator from North Carolina?

Mr. EAST. What position?

Mr. WEICKER. Is the position that the Senator just enunciated his interpretation of the position of the Founding Fathers and the Constitution?

Mr. EAST. Many of the individual statesmen have been opposed to a close relationship of church and state. Madison would be one. But Madison was willing to let the good people of Connecticut decide that, or Pennsylvania, or North Carolina. What he did not want is a national Congress dictating.

Now we have the irony of the Supreme Court dictating the national religion of secularism. They have turned Madison on his head.

Mr. TSONGAS. Mr. President, will the Senator yield?

Mr. WEICKER. I just wish to once again ask my good friend from North Carolina whether or not he believes this is a matter best left to the States and local governments.

Mr. EAST. Yes; that is what the framers intended and it has evolved over a period of time, and I am willing to do it today. I am willing to trust the people at the State and local level to decide if they want voluntary prayer in their schools. I am willing to trust their good judgment.

I might reserve the right to personally disagree with them, but I am willing to trust their good judgment. I have confidence in American grassroots democracy. I am very Jeffersonian, I guess, and I do not think I need to publicly apologize for it. But I am willing to defend the premise.

Mr. WEICKER. As I used the term "State religion," I mean by that any official fusion between the civil authority and religious authority. If a State chooses to do so by the Senator's words they should be permitted to do so.

Mr. EAST. The framers would be making the point at the State level. But the point is to have established an official church is one thing. I think there is universal opposition to that in America.

But to stamp out every vestige of traditional belief in the public institutions of America can virtually end in a national religion of secular humanism, and that goes contrary to everything the first amendment stood for.

Mr. WEICKER. I will conclude with these remarks. I am here arguing the first amendment.

I wish to make something clear. I think that is a slightly different case from the one the Senator cites in his last remark.

I am standing here for that first amendment which says not only that Congress shall make no law respecting the establishment of a religion—and this gets to the point the Senator must make—or prohibiting the free exercise thereof.

So let us make no mistake about what we are defending here. I am defending the first amendment freedoms in terms of religion. "Congress shall make no law respecting an establishment of religion or prohibiting the free exercise thereof."

But what is really very illuminating to this Senator is the remarks of the distinguished Senator from North Carolina which would permit the interpretation, and I will use the kindest words, insofar as State and local governments are concerned that in the strictest legal sense it is the position of the Senator from North Carolina that yes, indeed, they could establish a particular faith as being the official faith of that governmental entity.

I am sorry that I intruded on the good Senator from Massachusetts.

I yield the floor to the distingushed Senator from Massachusetts for the purpose of debate without losing my right to the floor and without this being considered as the end of the speech for the purposes of the two-speech rule, and I ask unanimous consent that I regain the floor 1 minute before the time for the cloture vote to take place.

The PRESIDING OFFICER. Without objection, it is so ordered.

The Senator from Massachusetts is recognized.

Mr. TSONGAS. Mr. President, as an increasingly disinterested observer of the last colloquy, I must say that the likelihood that the Senator from Connecticut is going to convince the Senator from North Carolina is equal to the likelihood that the Senator from North Carolina is going to convince the Senator from Connecticut.

I also point out, before I begin, that indeed if Thomas Jefferson had the sentiment and political position as ascribed to him by the Senator from Connecticut and if he were in the Senate today the Senator from North Carolina, Senator HELMS, would be raising money to defeat him.

So the Founding Fathers had a certain advantage of being alive when they were alive and not around today.

Can one imagine Thomas Jefferson, John Adams, and the great Founding Fathers engaged in the conversations we have had on this floor for the last 3

weeks? They would have gone back to their farms.

Mr. President, the issue before this body today, is not school prayer. This is not a school prayer debate. Rather, the real issue, the only isue, is whether, as a matter of policy and constitutional law, this "most deliberate body"—the U.S. Senate—is going to adopt a device whereby each time a decision of the Supreme Court and lower Federal courts offends a majority of both Houses of Congress the jurisdiction of the Federal courts to hear that issue will be stripped away by the Congress. I do not believe that is a system the framers intended nor one that we should strive to institute.

Supreme Court decisions interpreting the Constitution establish binding precedents which are subject to change by the people through the process of constitutional amendment. The framers provided in article V a means of changing the Constitution and deliberately made it difficult to achieve. Article V provides:

> The Congress, whenever two-thirds of both Houses shall deem it necessary, shall propose Amendments to this Constitution, or, on the Application of Legislatures of two-thirds of the several States, shall call a Convention for proposing Amendments, which in either Case, shall be valid to all Intents and Purposes, as Part of this Constitution, when ratified by the Legislatures of three-fourths of the several States or by Conventions in three-fourths therefore, as the one or the other Mode of Ratification may be proposed by the Congress * * *

It is central to our system of government that ordinary legislation can be changed through ordinary legislation, and the Constitution only through amendment.

Throughout our history there have been legislative attacks upon the power of the Supreme Court to protect constitutional rights. The Jeffersonian Democrats proposed to use impeachment as a vehicle for removing justices whose constitutional views were distasteful to the dominant party in Congress. In the 1920's, the proponents of State sovereignty sought to take away the power of the Supreme Court to review decisions by State courts on constitutional questions.

In 1937, President Franklin Roosevelt proposed legislation to pack the Supreme Court with new justices who agreed with his constitutional philosophy. The Court packing plan was defeated. The McCarthyites of the 1950's unsuccessfully sought to persuade Congress to limit Supreme Court jurisdiction over unconstitutional Federal and State programs aimed at alleged subversives. In 1964, some Senators and Congressmen attempted to eliminate Federal court jurisdiction over reapportionment.

In the past, despite the discontent with particular Supreme Court decisions, the Congress has wisely rejected these attempts to overturn constitutional decisions of the Supreme Court through legislative fiat.

If Congress had adopted these proposals, it would have radically altered our constitutional system of government. Thus, whenever a momentary majority in Congress disagreed with a Supreme Court decision, it could change that decision by simple statute. The Supreme Court would be the final arbiter of the Constitution, as the Founding Fathers contemplated, if and only if their decisions satisfied a momentary majority in Congress. If they did not, Congress would strip them of their authority to decide these issues.

The Helms amendment would strip the jurisdiction of the Supreme Court and lower Federal courts in school prayer cases. What is next? Tomorrow why not preclude the Supreme Court from deciding freedom of speech cases, or maybe freedom of the press, or the right of the people to peaceful assembly? Why not forbid the Supreme Court from hearing any claim asserted under the Bill of Rights or under any other provision of the Constitution? As you can see under this scheme, Congress could have unlimited authority to turn the Supreme Court and the Constitution upside down and inside out. It would represent an unparalled and unprincipled attack upon our Federal judicial system. There would be no boundaries or limits to Congress powers. This is not what the framers had in mind when they constituted our tripartite system of government.

Alexander Hamilton, in the Federalist Papers, declared that the Constitution is not only fundamental law, it is the will of the people, and the courts are its guardians. He said that the Constitution is the highest manmade law; any legislative act contrary to it must be held void by the courts, since "the interpretation of the laws is the proper and peculiar province of the courts." Hamilton denies that this makes the courts superior to the legislature. In fact it "only supposes that the power of the people is superior to both; and that where the will of the legislature, declared in its statutes, stands in opposition to that of the people, declared in the Constitution, the judges ought to be governed by the latter rather than the former."

We must not allow the passions of today to sweep under the rug the constitutional safeguards embodied in our Constitution. As the Supreme Court stated nearly 40 years ago in West Virginia State Board of Education against Barnette:

> The very purpose of the Bill of Rights was to withdraw certain subjects from the vicissitudes of political controversy, to place them beyond the reach of majorities and officials and to establish them as legal principles to be applied by the courts. One's right to life, liberty, and property, to free press, freedom of worship and assembly, and other fundamental rights may not be submitted to vote: they depend on the outcome of no elections.

The function of judicial review is allocated to an independent judiciary in order to prevent the accumulation of power in one department of the Government. As Hamilton wrote in the Federalist Papers, it could not be expected "that men who had infringed the Constitution in the character of legislators would be disposed to repair the breach in the character of judges." Thus, a constitutional system that imposes limitations on the authority of the legislative branch also requires an independent branch to determine whether legislation comports with the constitutional limitations; otherwise, the legislature would have the power both to enact and to judge the law, and there would be no check on its proper exercise of its powers.

This is exactly what the Helms amendment does. It allows the Senate to enact and judge its own laws—in this case, school prayer—without ever having to answer to Federal judicial review. This is exactly the opposite of what the Founding Fathers intended.

Further, without the ability of the Supreme Court to review the decisions of State and lower Federal courts there would be varying interpretations of the same Constitution, with no opportunity for resolution.

If Members of this legislative body and the people of the United States want prayer in public schools, the avenue for change is a constitutional amendment, not a change by statute.

Imagine, if you will, a wrecking ball slowly chipping away at a building. This is exactly what we would be doing to the foundations of the Federal judiciary by passing this ill-conceived legislative proposal. I remind my colleagues that those freedoms you cherish today could be canceled tomorrow if we allow constitutional decisions of the Supreme Court to be changed by simple statute rather than by constitutional amendment.

Mr. President, I would like to read into the RECORD letters and statements I have received from both religious and secular organizations opposing the school prayer amendment.

B'NAI B'RITH WOMEN,
Washington, D.C., September 1982.

Hon. PAUL E. TSONGAS,
U.S. Senate,
Washington, D.C.

DEAR SENATOR TSONGAS: As president of an organization of 120,000 women from all parts of the country, I am writing to express our opposition to the voluntary school prayer amendment to the debt ceiling bill.

Our members hold strong views on the subject of school prayer, views that for the most part were forged during their school years when such prayers were routinely said. They realize full well the pressures to conform to saying prayers that are not really reflective of their religious beliefs and they know from first hand experience the toll exacted from being perceived as "differ-

ent." We firmly believe that the place for prayer is not in the public schools. We have churches, synagogues, mosques and homes for prayer; we resist the notion that prayer belongs in public schools. As American women who belong to one of the largest non-Christian denominations in the country, we urge you to work toward defeat of the prayer amendment.

Sincerely,

DOROTHY BINSTOCK,
International President.

UNITED CHURCH OF CHRIST,
OFFICE FOR CHURCH IN SOCIETY,
Washington, D.C., August 16, 1982.

Hon. PAUL E. TSONGAS,
U.S. Senate,
Washington, D.C.

DEAR SENATOR: The Office for Church in Society of the United Church of Christ is opposed to the passage of school prayer legislation that will come up during senate consideration of temporary debt limit increase.

We are opposed to legislation permitting prayer as part of regular classroom procedure in public schools because such activity would blur the distinction between church and state functions and, it would overturn by statute the Supreme Court rulings on prayer. Further, the various proposed school prayer bills remove constitutional protections afforded to our citizens through the lower federal courts and Supreme Court.

We urge that you not attempt to pass legislation promoting prayer as part of regular classroom activity in public schools because such activity would violate the rights of those whose religious beliefs or non-beliefs are in the minority, and would promote state control over a function that rightfully belongs to religious groups and the family.

Sincerely,

CONSTANCE STREET,
Policy Advocate.

WASHINGTON, D.C.,
September 20, 1982.

To: Senator TSONGAS.
From: National Council of the Churches of Christ.
Subject: Opposition to Helms' prayer bill.

The National Council of Churches opposes the Helms amendment to the debt ceiling bill that would deny federal courts jurisdiction to hear cases involving school prayer.

The N.C.C. has testified that prayers in public school would force children of minority religions to choose between acceding to prayers of the majority that are in conflict with their own religious upbringing, and branding themselves as nonconformists by asking to be excused from such prayers.

Authorizing states and localities to institute school prayers would be unwise because it would tend toward fifty or more different meanings of the Religion Clauses of the First Amendment from one state to another.

Such authorization is unnecessary because children can pray in school now, anytime, anywhere. What they cannot do is to preempt a public institution for oral, collective prayers at the expense of children of minority or no religion.

Bar associations and legal scholars have denounced Senator Helms' efforts to make an "end run" around the proper process for amending the Constitution and for trying to "whittle away" the co-equal powers of the federal judiciary. Please do what you can to oppose such efforts.

Sincerely,

DEAN M. KELLEY,
Director,
Religious and Civil Liberty.

RESOLUTION ON PRAYER IN PUBLIC SCHOOLS

Whereas in a Policy Statement entitled "The Churches and the Public Schools," adopted June 7, 1963, the Governing Board of the National Council of the Churches of Christ in the U.S.A. said: "Neither the church nor the state should use the public school to compel acceptance of any creed or conformity to any specific religious practice . . .";

Whereas the same Policy Statement also stated: "The Supreme Court of the United States in the Regents' Prayer Case has rules that 'In this country it is no part of the business of government to compose official prayers for any group of the American people to recite as part of a religious program carried on by the government.' We recognize the wisdom as well as the authority of this ruling . . .";

Whereas the same Policy Statement continued: "We express the conviction that the First Amendment to our Constitution in its present wording has provided the framework within which responsible citizens and our courts have been able to afford maximum protection for the religious liberty of all our citizens . . .";

Whereas the President of the United States has recently announced his intention to propose to Congress a constitutional amendment which could lead to the reinstatement of group prayer in public schools;

Whereas the recitation of prescribed nondenominational prayer demeans true religion by denying the traditions of faith groups while imposing on some children religious practices which are offensive to them; and

Whereas there is a danger that the rights of members of minority religions would not be adequately protected: Therefore, be it

Resolved, That the Governing Board of the National Council of the Churches of Christ in the U.S.A.:

Reaffirms its belief, as set forth in the Policy Statement on "The Churches and the Public Schools" that "Christian nurture and the development and practice of Christian worship are unescapable obligations of the congregation and the family"; and

Reaffirms its support of the Supreme Court language describing the First Amendment as providing no role for government in prescribing or providing for prayer in public schools.

Policy Base: The Church and the Public Schools, adopted by the General Board, June 7, 1963.

UNITARIAN UNIVERSALIST ASSOCIATION,
Washington, D.C., September 21, 1982.

Hon. PAUL E. TSONGAS,
U.S. Senate,
Washington, D.C.

DEAR SENATOR TSONGAS: On behalf of the Unitarian Universalist Association of Churches, I am writing to ask that you oppose the Helms School Prayer Amendment to the debt ceiling legislation now pending in the Senate, H.J. Res. 520.

Our denomination considers participation in religious expression, or the choice not to engage in religious expression, a very private and personal matter. We do not believe that the public schools have any proper role to play in this area. At the 21st Annual General Assembly of our Association in June of this year, a Resolution was passed entitled, "Public Education, Religious Liberty and the Separation of Church and State." In pertinent sections, the Resolution voices support to:

"Uphold religious neutrality in public education, oppose all government mandated or sponsored prayers, devotional observances, and religious indoctrination in public schools; . . ."

"Uphold the principle of judicial review, and oppose all efforts to deny the federal courts jurisdiction over school prayer. . ."

"Uphold the principle enunciated by the United States Supreme Court that all levels of government must remain respectfully neutral with regard to all religions;"

We appreciate your consideration of our views on this matter.

Sincerely,

ROBERT Z. ALPERN,
Director.

AMERICAN BAPTIST CHURCHES, USA,
Washington, D.C., September 21, 1982.

DEAR SENATOR: American Baptists have a long-held historical belief in the right of individuals to freely practice their religion and to be free from state-imposed conformity of practice. We see that freedom challenged in Senator Helms' school prayer amendment to the debt limit bill. We urge you to defeat this amendment.

As Baptists, we believe that prayer is a vital part of the encounter between God and Man. But we believe that it is a personal encounter that is only trivialized when made part of a ritualistic group recitation.

Further, we believe that prayer is a subject to be taught in our homes and in our churches. We reject the view that a state, or any of its employees, by virtue of their status alone, are qualified to compose or lead a prayer acceptable to all faiths.

Finally, the separation of church and state mandated by the First Amendment prohibits the prescription of a religious practice by law. The rights protected by the Free Exercise clause are threatened when school children are expected to participate in a group prayer. The pressure to conform cannot be removed by a label of "voluntary" hung on a group prayer law.

We urge you to support religious liberty and oppose the Helms' school prayer amendment.

Sincerely,

BARRY SAWTELLE,
American Baptist Churches, USA, Office of Governmental Relations.

AMERICAN BAPTIST RESOLUTION IN SUPPORT OF HISTORIC BAPTIST PRINCIPLES AGAINST STATE MANDATED PRAYER

Baptists, both historically and presently, believe that religious faith must involve a vital encounter between persons and God, and no religious form should be substituted for this encounter. Thus, Baptists have long opposed any compulsion to conformity or coercion of conscience in religious belief or practice. While Baptists gather together in fellowship with other believers to pray and worship, we also affirm prayer to be a constant part of our individual lives which does not need a prescribed form, or official sanction to be real and vital.

Therefore the General Board of the American Baptist Churches, U.S.A.:

Reaffirms our historic Baptist belief that religion should not be mandated and that prayers and religious practices should not

be established or prescribed by law or by public policy or officials;

Supports the Supreme Court decision on prayer in the public schools and recognizes that it does not prohibit the free exercise of religion while sustaining the liberty of a free conscience;

Opposes any attempt through legislation or other means to circumvent the decision of the Supreme Court on mandated prayer in the public schools.

POLICY BASE

American Baptist Policy Statement on Human Rights, Adopted December, 1976.

"As American Baptists we declare the following rights to be basic human rights, and we will support programs and measures to assure these rights:

1. "The right of every person to choose a religion freely, to maintain religious belief or unbelief without coercion; the right for communities of faith to meet together to engage in public worship, to witness publicly to others, to speak prophetically from religious conviction to government and society, to live out religious beliefs, and to be free from governmental intrusion, coercion and control in the free exercise of conscience and religion;"

American Baptist Convention Resolution on Separation of Church and State, Adopted 1964:

"And we reaffirm our historic Baptist belief that religion should not be a matter of compulsion and that prayer and religious practices should not be prescribed by law or by a teacher or public school official."

Adopted by the General Board of the American Baptist Churches—June, 1980; 117 for, 2 against, 1 abstention.

BAPTIST JOINT COMMITTEE ON PUBLIC AFFAIRS: PRAYER IN PUBLIC SCHOOLS

Whereas the proper place of religion in public schools continues to be the subject of confusion among U.S. citizens, including our own Baptist people;

Whereas Congress continues to be pressured to act favorably on a proposed constitutional amendment calling for prayer in public schools;

Whereas Congress is likewise under severe pressure to pass bills seeking to remove challenges to state laws or local regulations returning prayer to public schools from the jurisdiction of federal courts;

Whereas the Baptist Joint Committee on Public Affairs has consistently supported the U.S. Supreme Court's historic 1962 and 1963 decisions striking down state-mandated prayer and Bible reading in public schools: Therefore be it

Resolved that the Baptist Joint Committee reaffirm its support of the Supreme Court's decisions; be it further

Resolved that the Baptist Joint Committee reassert its opposition to any and all proposed constitutional amendments which, under the guise of fostering "voluntary" prayer in public schools, would in fact undermine those decisions; be it further

Resolved that the Baptist Joint Committee oppose unalterably any and all legislative efforts to remove from federal court jurisdiction laws dealing with prayer in public schools; be it further

Resolved that we recommit the Baptist Joint Committee to exercise a leadership role in the effort to defeat constitutional amendments and jurisdictional bills dealing with prayer in public schools in Congress while at the same time asking Baptist leaders across the country to join us in seeking the defeat of such measures by communicating their opposition to members of the U.S. Senate and House of Representatives; be it further

Resolved that we call upon our denominational leaders to undertake a renewed effort to provide information to our Baptist people about the constitutionally appropriate place of religion in public schools and to educate our people about the dangers of any form of coerced religious exercises in said schools; and be it further

Resolved that we seek the widest possible distribution of the newly reprinted pamphlet, "Religion in the Public School Classroom" as one means of attaining the above-stated objective.

LUTHERAN COUNCIL IN THE USA,
Washington, D.C.

STATEMENT ON PRAYER IN THE PUBLIC SCHOOLS, SEPTEMBER 21, 1982

On behalf of the Lutheran Church in America, the American Lutheran Church and the Association of Evangelical Lutheran Churches, I would like to express our strong opposition to the Helms amendment, which would restrict the jurisdiction of the federal courts to hear cases involving "voluntary prayer" in public schools. These churches have consistently supported the position articulated by the Supreme Court in 1962 and 1963 prohibiting state-mandated prayer and Bible readings in public school classrooms. The churches' positions on school prayer has been determined in their national conventions at which congregational representatives gather, and subsequent implementation of this policy position has taken place according to the churches' constitutions and by laws.

The rationale for the churches' position is clearly articulated in the following excerpts of two church body statements:

"Reading of Scripture and addressing deity in prayer are forms of religious expression which devout persons cherish. To compel these religious exercises as an essential part of the public school program, however, is to infringe on the distinctive beliefs of religious persons as well as on the rights of the irreligious. We believe that freedom of religion is best preserved when Scripture reading and prayer are centered in home and church, their effects in the changed lives of devout persons radiating into the schools and into every area of community life."—Adopted in 1964 by the American Lutheran Church gathered in convention. This position was most recently reaffirmed by the Church Council of the American Lutheran Church in 1981.

"Parents, churches and school authorities would be better advised to direct their efforts to programs for study of religion and the Bible in the public schools and to the formulation of types of programs which coordinate the secular educational programs of the public schools with programs of a strictly religious nature conducted by the churches themselves, rather than to seek constitutional sanctions for devotional exercises in public schools that have at most a minimal religious value, which invite the intrusion of sectarian influences into the public school system, risk the violation of the rights of religious freedom and are a potential source of conflict in the community.—Adopted in 1964 by the Lutheran Church in America in convention; this position on school prayer was reaffirmed at the 1980 convention of the LCA.

Originally, these church bodies opposed proposed constitutional amendments on the school prayer issue. However, in recent years, these church bodies, which together count approximately six million members, have expressed their opposition to legislation which would strip the federal courts of jurisdiction in areas relating to "voluntary" prayer in public schools. In 1980, the Lutheran Council, acting on behalf of the ALC, LCA and AELC testified in the House opposing such a jurisdiction-limiting proposal. Such legislation could, in effect, set aside a nation-wide standard for religious freedom guaranteed by the Constitution and interpreted by the Supreme Court. We strongly maintain that the standard for determining which laws provide for truly "voluntary prayer" in public schools and which actually violate the First Amendment should be uniform throughout the United States. The proposal to limit court jurisdiction would result in individual states making final determinations on the school prayer issue—a situation which could lead to a "patchwork quilt" of interpretations as to what the First Amendment of the Constitution means in practice. Thus, we maintain that hearing cases involving voluntary prayers in public schools is not just a state or a local issue, but is properly within the jurisdiction of the Supreme Court.

The precedent this legislation could set makes it transcend the public policy implications of permitting prayer in public schools; it touches upon the proper relationship between Congress and the Supreme Court and also between the states and the federal government. Some have described the Helms proposal as a "backdoor" way of amending the Constitution, one which would bypass accepted procedures in an attempt to sanction certain practices likely to be ruled unconstitutional if reviewed by the Supreme Court.

We would maintain that the Helms amendment is an inappropriate and perhaps unconstitutional method for Congress to use to address the question of prayer in public schools. If implemented, this legislation could create new problems of interpretation and could lead to unsuspected results in areas vitally touching on religious liberty. Besides opening the door to divisiveness in the community, it could prove to be the forerunner of other attempts to circumvent the decisions of the Supreme Court on key issues. It would be possible for Congress to follow the precedent set by this bill and remove from the jurisdiction of the Court other practices which could more fundamentally threaten religious liberty and infringe upon constitutional rights.

In an election year, it may seem politically desirable to approve what may be popularly perceived as a "vote for morality and prayer." However, we perceive the Helms amendment to be unnecessary from a religious point of view and unwise from a public policy perspective; we urge the Senate to reject this proposal.

CHARLES V. BERGSTROM,
Executive Director, Office for Governmental Affairs, Lutheran Council in the U.S.A.

AMERICAN BAR ASSOCIATION,
Washington, D.C., August 18, 1982.

DEAR SENATOR: As the newly installed president of the American Bar Association, I write at this critical time to repeat, and reinforce strongly, the position of the ABA expressed by my predecessor, David Brink, opposing the many pending proposals to limit the ability of federal courts to act in abortion, school prayer and busing cases. I urge the Senate to reject any and all such

proposals offered as amendments to the debt limitation bill, H.J. Res. 520, currently under consideration.

These proposals have been perceived by many as involving only positions for or against prayer, abortion or busing. But the truth is that they are unabashedly court-stripping bills, and that is the reason that thoughtful Senators on both sides of the underlying controversial social issues should recognize these proposed amendments for what they really are and join in defeating them.

The present proposed amendments are offensive to our American governmental framework and processes on two grounds. First, the means by which these proposals attempt to change constitutional law derogate the Constitution, the separation of powers and the restraint that traditionally and uniformly has been observed among the three branches of government. Second, the amendment procedure being used circumvents the normal legislative process by coupling two unrelated measures of great importance that deserve separate consideration, by forcing uncritical consideration of both as a unit and by avoiding customary and appropriate advance study.

As you well know, the ABA takes no position on the issues of school prayer, abortion or busing, but is concerned that the pendency of another highly emotionally-charged debate over prayer or abortion will obscure the fundamental flaw in all these proposals. We emphasize again that the issue is not prayer, abortion or busing; the real issue is the integrity of our tripartite system of government. The ABA has long opposed any legislative attempt to alter constitutional law through means other than constitutional amendment. We believe that the enactment of any of these measures would constitute an unprecedented attack on the Constitution and the independence of the federal judiciary and establish unwise policy. Such proposals, if enacted, could be used in the future as precedents for effecting constitutional changes that would impair other rights of all Americans, including proponents of the present amendments. All such proposals should be vigorously resisted.

We also reiterate that the serious constitutional questions involved in these court limitation proposals deserve full consideration in committee. Avoiding the healthy public debate currently underway in the Judiciary Committee and injecting the unrelated court jurisdiction issue into the debate over the debt ceiling would do a grave disservice to both issues.

We strongly urge that the Senate permit the normal legislative process to continue uninterrupted and to oppose any court-stripping proposals. Consequently, we endorse adoption of the pending Weicker and Baucus amendments.

Sincerely,

MORRIS HARRELL.

AMERICAN FEDERATION OF LABOR AND CONGRESS OF INDUSTRIAL ORGANIZATIONS,
Washington, D.C., September 17, 1982.

LEGISLATIVE ALERT!

DEAR SENATOR: The Helms amendment (No. 2031), now pending to H.J. Res. 520, the public debt ceiling legislation, threatens to destroy the integrity of our system of checks and balances. The Helms amendment attempts to deny the federal judiciary its appointed role in interpreting the Constitution. It seeks to do indirectly what its sponsor and supporters cannot do directly: to overrule Supreme Court Constitutional decisions by a simple majority vote of Congress.

Thus the Helms amendment is a blatant attempt to avoid the amendment process specified in the Constitution for changing settled constitutional rules; that is, approval by a two-thirds vote in each House of Congress and ratification by three-fourths of the States. The unprecedented assertion of a Congressional power unilaterally to restrict constitutional guarantees through a statute poses profound risks to our most fundamental liberties.

Given the dangerous implications of the Helms amendment, the AFL-CIO urges your opposition.

Sincerely,

RAY DENISON,
Director,
Department of Legislation.

COMMON CAUSE,
Washington, D.C., September 17, 1982.

DEAR SENATOR: On Monday, September 20, the Senate will continue its consideration of Senator Helms' school prayer amendment to the debt ceiling bill. We urge your strong opposition to this amendment and to all attempts to limit the debate.

By removing lower and Supreme Court jurisdiction over cases of prayer in public schools, the Helms amendment attempts to alter and circumvent the Constitution and the fundamental precepts contained in the Bill of Rights.

Senator Helms' school prayer proposal would subvert and compromise the principle that there are fundamental human rights beyond the reach of any government—not just beyond any elected executive, but beyond any government, including majorities in a representative Congress or legislature. It compromises the principle because it presupposes a power in simple congressional majorities to nullify or partially frustrate constitutional rights recognized by the judiciary.

If Congress can deny those seeking to be free from "an establishment of religion" the usual right of access of the lower federal courts or to the Supreme Court on appeal from the highest State court, then majorities in the Senate and House can deny that access in cases seeking protection for all other constitutional rights, for example, freedom of the press.

In a May 6, 1982 letter to Senator Strom Thurmond, Chairman of the Senate Judiciary Committee, concerning this bill, Attorney General William French Smith stated that Congress may not "intrude upon the core functions of the Supreme Court." He further stated that on these First Amendment constitutional issues, Congress does not have "unlimited power over Supreme Court jurisdiction." The Conference of Chief Justices of the state Supreme Courts also passed a resolution opposing legislation to restrict the jurisdiction of the federal courts.

Common Cause has joined with numerous other national groups in publicly protesting these efforts. We ask your active support in rejecting the Helms school prayer amendment and all other legislation which threatens the independence and integrity of the courts.

Sincerely,

ARCHIBALD COX,
Chairman.

NATIONAL LEGAL AID AND DEFENDER ASSOCIATION,
Washington, D.C., September 21, 1982.

Hon. PAUL E. TSONGAS,
U.S. Senate,
Washington, D.C.

DEAR SENATOR TSONGAS: I am writing on behalf of the National Legal Aid and Defender Association (NLADA) to urge your continued strong opposition to the court-stripping school prayer amendment now pending to the debt-ceiling legislation, H.J. Res. 520. NLADA strongly opposes all legislation which would deprive the federal courts of jurisdiction over constitutional questions. While we take no position on the substantive question of school prayer, we believe that the pending amendment is both unconstitutional and extremely unwise as a matter of policy.

This amendment blatantly attempts to remove all federal court jurisdiction over the constitutional question of school prayer. This strategem represents a legislative attempt to statutorily amend the Constitution. It stands as an unconstitutional encroachment on the federal judiciary's power to make final determinations on the meaning of the Constitution. If enacted, it would enable a simple majority in Congress to change constitutional law whenever it wished to overturn an unpopular court decision. Thus, the most basic guarantees of the Constitution would become subject to the vicissitudes of prevailing political sentiment.

Most tellingly even the states, to whom final jurisdiction would be given, oppose this measure. The Conference of State Chief Justices condemned the courtstripping approach in a January 30, 1982 resolution as "a hazardous experiment with the vulnerable fabric of the nation's judicial systems." The Conference warned that, absent Supreme Court authority over constitutional questions, ". . . there will inevitably be divergence in state court decisions, and thus the United States Constitution could mean something different in each of the fifty states.

In an adversarial system of law there will always be parties dissatisfied with court decisions. But for those wishing to change the federal courts' constitutional interpretations, the Constitution already provides a remedy. It is the constitutional amendment process. While we express no opinion whatsoever on a possible school prayer constitutional amendment, we urge proponents of school prayer to pursue that route and to withdraw their misconceived challenge to the federal court system.

Thank you for your consideration of our views.

Sincerely,

ELLEN JOSEPHSON.

EQUAL JUSTICE FOUNDATION,
Washington, D.C., September 20, 1982.

Senator PAUL TSONGAS,
U.S. Senate,
Washington, D.C.

DEAR SENATOR TSONGAS: On behalf of the Equal Justice Foundation, I write to express opposition to the school prayer court-stripping amendment offered by Senator Helms.

The Equal Justice Foundation is a national organization of lawyers who commit one percent of their salaries to promote equal access to justice. The Foundation has no position on the substantive issue addressed by the proposed amendment. It is, however, opposed to any attempts to limit or deny access to the federal courts and Supreme

Court to hear any case arising out of a state school prayer law.

Congressional attempts to alter federal court procedure to attain substantive goals violate constitutional separation of powers principle and undermine the independence of the federal judiciary.

Attorney General William French Smith, four former attorneys general, former Supreme Court Justice Arthur Goldberg, and numerous constitutional law experts have expressed strong concerns over tampering with federal court jurisdiction through legislation. We share their concerns and urge you to oppose the proposed amendment.

Sincerely,

SUSAN KELLOCK,
Executive Director.

NATIONAL EDUCATION ASSOCIATION
LEGISLATIVE STATEMENT

SCHOOL PRAYER

NEA position

The National Education Association supports the 1962 Supreme Court decision in *Engel* v. *Vitale* on prayer in the public schools. In that decision and others since then, the Supreme Court ruled that the schools may not sponsor prayer, even that which attempts to be denominationally neutral in order to preserve the principle of separation of church and state. The Association believes the classroom is an inappropriate forum for religious instruction or the promotion of prayer which is better left to parents or the nation's churches, synagogues, mosques, and temples.

Discussion

The First Amendment to the Constitution states, "Congress shall make no law respecting an establishment of religion or prohibiting the free exercise thereof . . ." The Supreme Court and lower federal courts on numerous occasions since 1962 have ruled that required Bible reading or recitation of the Lord's Prayer or posting of the Ten Commandments in the public schools are unconstitutional. Despite rhetoric and myths, these decisions *do not mean* that a student is prohibited from saying a personal prayer in a public school building during schools hours or that a student is prevented from reading the Bible while on school grounds. School-sponsored religious exercises have been held to violate the Constitution as have requirements that students participate in religous activities.

In an effort to circumvent federal court jurisdiction over the issue of school prayer, proponents are advocating enactment of legislation to remove the issue from the jurisdiction of the Supreme Court and lower federal courts. The intent of such legislation is to undermine the Supreme Court rulings which prohibit school-sponsored prayer. Enactment of such legislation would run counter to American tradition and religious liberties.

Since no provision under current law regarding school prayer prohibits students from freely exercising their right, and since religious freedom and true voluntary prayer have never been outlawed in the public schools, legislation now pending in Congress is not only unconstitutional, but unnecessary.

Under current law the following activities are permissible.

Schools may use the Bible or other religious books as source books in religion classes.

Schools may offer a course in the Bible as literature and history.

Schools may offer instruction in comparative religion.

School facilities may be rented during off-hours to religious groups if there is a general policy of renting to non-school organizations.

Students may study the history of religion and its role in the story of civilization.

Students may be allowed to leave school premises to receive religious instruction.

References to faith in God in connection with patriotic or ceremonial occasions are permissible.

The Administration has proposed a Constitutional Amendment which states, "Nothing in this Constitution shall be construed to prohibit individual or group prayer in public schools or other public institutions. No person shall be required by the United States or by any state to participate in prayer." Such an amendment would permit group prayer and we ask, "Whose prayer?"

Conclusion

The National Education Association believes the public schools should remain neutral in the area of religious activities. The principle of neutrality simply means the public schools are neither religious nor nonreligious. Neutrality as used by the Supreme Court is a bit broader, meaning showing neither favoritism nor hostility toward religion. The Association is, therefore, opposed to attempts to thwart the Supreme Court rulings whether those attempts emanate from the Legislative Branch or the Executive Branch of government.

Mr. KENNEDY. Mr. President, I oppose the Helms amendment as an unconstitutional and unwarranted attack on the Supreme Court of the United States. The fundamental question we are facing in the Senate has nothing to do with the issue of school prayer. The sole question is whether the proper way for Congress to address the issue of school prayer is to enact legislation stripping the Supreme Court of jurisdiction to hear and decide cases on this issue. That is the wrong way to deal with the issue of school prayer, and I hope that the Senate will have the wisdom to reject this extremist attempt to deny the Supreme Court an important part of its constitutional jurisdiction.

In 1961, in his first formal address as Attorney General of the United States, Robert Kennedy emphasized America's historic debt to law as the source of freedom:

"Law is the link [to] freedom," he said. "We know that it is law which creates order out of chaos. And we know that law is the glue which holds civilization together."

The amendment now before us is an attempt to break that bond. It is an attack on our basic freedoms. It is an insult to the Supreme Court and an affront to the Constitution. What is at stake is the preservation of the rule of law, the foundation on which all our other liberties rest.

Despite suggestions to the contrary, there is no sound precedent for this scheme to abolish Supreme Court review of sensitive constitutional questions.

In the frequently cited case of ex parte McCardle in 1868, the Supreme Court acquiesced in congressional action removing one avenue of review in habeas corpus cases. But this legislation merely repealed a specific 1867 statute authorizing certain habeas corpus claims of unconstitutional imprisonment arising out of the Civil War to be appealed to the Supreme Court. As the Court made clear in its subsequent decision in ex parte Yerger in 1869, Congress had left intact the broad authority of the Supreme Court under the Judiciary Act of 1789 to review lower decisions on habeas corpus.

In a number of other circumstances, Congress has specified the particular methods by which judicial review can be sought. But Congress has never withdrawn the jurisdiction of the Supreme Court to decide constitutional issues.

The power of Congress to regulate the jurisdiction of the Supreme Court is thus extremely limited. It can be exercised only in a manner consistent with the other basic guarantees of the Constitution. For example, the Bill of Rights prohibits Congress from passing laws which violate freedom of the press and other fundamental civil liberties.

Surely, Congress could not pass a law permitting the Supreme Court to hear appeals brought only by white persons, or by Protestants, or by men. Such legislation would clearly violate the guarantees of equal protection or freedom of religion. Even Senator HELMS, I suspect, would agree that such laws would be unconstitutional and could not stand. How then can Congress constitutionally enact legislation preventing the American people from enforcing their religious freedoms under the first amendment in the highest court of the land?

As Oliver Wendell Holmes once wrote, the Supreme Court is a quiet place, but it is the quiet at the center of the storm.

Throughout our history, there have been repeated efforts by Congress to overturn unpopular decisions of the Supreme Court by removing its jurisdiction in certain types of cases or by other means of undermining the Court's integrity and independence. Each of these schemes has failed—in large measure because Congress and the American people saw the true danger in such schemes and rejected them—as we must do today.

As Members of the U.S. Senate, each of us took the following oath of office:

I do solemnly swear that I will support and defend the Constitution of the United States against all enemies, foreign and domestic; that I will bear true faith and allegiance to the same; that I take this obligation freely, without any mental reservation or purpose of evasion; and that I will well and faithfully discharge the duties of the

office on which I am about to enter, so help me God.

Today, we are called upon to live up to that oath and to defend the Constitution.

In "A Man for all Seasons," Sir Thomas More was urged by a well-meaning friend to bend the law to serve another end. Refusing, he asked:

What would you do? Cut a great road through the law to get after the Devil?

And his friend replied:

I'd cut down every law to do that.

And Sir Thomas More answered:

When the last law was down, and the Devil turned round on you—where would you hide, the laws all being flat? This country's planted thick with laws from coast to coast, and if you cut them down do you really think you could stand upright in the winds that would blow then?"

The same principle is at stake today. If we strike at the Supreme Court, we strike at the heart of the Constitution and the rule of law in America. That is why the Helms' court-stripping amendment must be defeated.

Mr. KASTEN. Mr. President, today I wish to take a few minutes to reflect on how far the Senate has come over the past 3 weeks in dealing with the school prayer issue.

Up to now, we have had 3 weeks of debate and two cloture votes. It is time to move forward on this issue.

America wants Congress to restore the right of individuals to participate in voluntary, nondenominational prayer in schools and other public facilities.

The Helms amendment currently being debated merely seeks to restore self-rule to the States with respect to school prayer—an autonomy reserved to the States from the very founding of our Nation.

In the two decades since the Supreme Court ruled that prayer in public schools is not constitutional, the Court has been denying students the opportunity of beginning each classroom day with a prayer. It is ironic to note that we here, in both the House and the Senate, start each day's work by asking God's blessing on our efforts. The past 3 weeks of debate have centered on the question of whether or not Congress will grant to school children the very same privilege we enjoy daily.

Since the beginning of the 97th Congress, we have made great strides in our effort to restore decisionmaking powers to the State and local level. This amendment would simply return the jurisdiction of school prayer decisions to the State courts where religious freedoms were protected for nearly two centuries. In keeping with our goal to restore local autonomy, let us not stop short of upholding this fundamental right of voluntary prayer in our public schools.

Mr. President, I stress that this is upholding the right to voluntary, not mandatory, prayer. This amendment does not require the States or local governmental agencies to author or require students to participate in prayers. I believe that this wording sufficiently addresses the concerns that have been raised in past congressional debate on the school prayer issue. Now, just as my colleagues who have made great efforts to protect the liberties of those who choose not to pray, we must protect the rights of those who choose to participate in prayer, and uphold the religious freedoms afforded under the Constitution.

Mr. President, in April 1979 this body twice passed legislation similar to that which we are considering today. Let us once again act according to the will of the American people by passing the Helms amendment and at last, resolving this issue.

The PRESIDING OFFICER. The hour of 12 noon——

Mr. WEICKER. Mr. President, I just ask for recognition from the Chair, reserving the right——

The PRESIDING OFFICER. The Senator from Connecticut.

Mr. WEICKER. I now yield the floor, but I ask unanimous consent that upon conclusion of the cloture vote that I be recognized.

Mr. BAKER. Mr. President, I wonder if the Senator will withhold that request? I have no problem with his seeking recognition.

Mr. WEICKER. I withhold.

Mr. BAKER. I thank the Senator.

CLOTURE MOTION

The PRESIDING OFFICER. The hour of 12 noon having arrived, the clerk, under the previous order, will report the motion to invoke cloture.

The bill clerk read as follows:

CLOTURE MOTION

We the undersigned Senators, in accordance with the provisions of rule XXII of the Standing Rules of the Senate, hereby move to bring to a close debate on amendment number 2031, as modified, to the committee substitute to House Joint Resolution 520, a joint resolution to provide for a temporary increase in the public debt limit.

Jesse Helms, John P. East, Roger W. Jepsen, Jeremiah Denton, Paul Laxalt, Paula Hawkins, Orrin G. Hatch, Bob Kasten, Harry F. Byrd, Jr., Steve Symms, S. I. Hayakawa, Don Nickles, Strom Thurmond, Charles E. Grassley, Jake Garn, Malcolm Wallop, and Howard Baker.

The PRESIDING OFFICER. By unanimous consent, the quorum call has been waived.

VOTE

The question is, Is it the sense of the Senate that debate on the Helms amendment No. 2031, as modified, shall be brought to a close? The yeas and nays are mandatory under the rule, and the clerk will call the roll.

The assistant legislative clerk called the roll.

The yeas and nays resulted—yeas 54, nays 46, as follows:

[Rollcall Vote No. 347 Leg.]

YEAS—54

Abdnor	Grassley	Pell
Armstrong	Hatch	Pressler
Baker	Hawkins	Proxmire
Bentsen	Heflin	Quayle
Boren	Helms	Randolph
Byrd, Harry F., Jr.	Huddleston	Roth
Cannon	Humphrey	Sasser
Chiles	Jepsen	Schmitt
Cochran	Johnston	Simpson
D'Amato	Kassebaum	Stennis
DeConcini	Kasten	Stevens
Denton	Laxalt	Symms
Dole	Long	Thurmond
Domenici	Lugar	Tower
East	Mattingly	Wallop
Exon	McClure	Warner
Ford	Murkowski	Zorinsky
Garn	Nickles	
	Nunn	

NAYS—46

Andrews	Eagleton	Melcher
Baucus	Glenn	Metzenbaum
Biden	Goldwater	Mitchell
Boschwitz	Gorton	Moynihan
Bradley	Hart	Packwood
Brady	Hatfield	Percy
Bumpers	Hayakawa	Pryor
Burdick	Heinz	Riegle
Byrd, Robert C.	Hollings	Rudman
Chafee	Inouye	Sarbanes
Cohen	Jackson	Specter
Cranston	Kennedy	Stafford
Danforth	Leahy	Tsongas
Dixon	Levin	Weicker
Dodd	Mathias	
Durenberger	Matsunaga	

The PRESIDING OFFICER (Mr. DURENBERGER). On this vote, the yeas are 54 and the nays are 46. Three-fifths of the Senators duly chosen and sworn having not voted in the affirmative, the motion is rejected.

Mr. MOYNIHAN addressed the Chair.

The PRESIDING OFFICER. The Senator from New York.

Mr. MOYNIHAN. Mr. President, this was a final rejection of the radical right in this Chamber. May we now go forward with the business of the Nation, the Constitution intact and our purposes clear? Thank you, Mr. President.

The PRESIDING OFFICER. The majority leader is recognized.

Mr. BAKER. Mr. President, if I could have the attention of the Senate, I will try to make arrangements for the remainder of this day.

The PRESIDING OFFICER. The majority leader has been recognized. Senators desiring to conduct business may do so in the cloakrooms.

The majority leader.

Mr. BAKER. Mr. President, the Senate is not in order.

The PRESIDING OFFICER. The majority leader is correct. The Senate is not in order. Will Senators desiring to conduct business retire to the cloakrooms to conduct their business so the majority leader may be heard? Can the Chair be heard?

Mr. BUMPERS. Mr. President, the Senate is still not in order. The majority leader is trying to tell us how we are going to proceed. Everybody wants to know. Let us have order.

The PRESIDING OFFICER. The majority leader.

Mr. BAKER. I thank the Chair and I thank the Senator from Arkansas. If I may have the attention of the Senate I want to restate the situation and make a proposal.

Mr. President, a cloture motion has been filed which will produce a vote tomorrow. I will consult with the minority leader and other principals involved in the debate to try to set a time. I am thinking of another 12 o'clock vote tomorrow. But I have a proposal to make in the meantime.

As I indicated earlier, I have represented on the floor of the Senate from time to time that not only would the debt limit serve as a vehicle for Members to offer amendments on abortion and prayer but other amendments as well. A number of Senators have indicated they wish to offer other amendments to this measure. We are coming down the home stretch. We have to finish this bill in some way, and I think we have to do it this week.

I would like to make the proposal, Mr. President, that we temporarily lay aside the pending question, which is the Baucus second-degree amendment, and that until we have the next cloture vote on the Helms amendment that other Senators may come to the floor and offer their amendments as they may wish on other subjects.

In order to facilitate that, Mr. President, I now ask unanimous consent that the pending question, the Baucus second-degree amendment, be temporarily laid aside. I ask unanimous consent that at 12 noon tomorrow, without the requirement for a mandatory quorum under the provisions of rule XXII, that the Senate proceed to vote on the cloture motion against further debate on the Helms amendment.

Mr. President, I also ask unanimous consent that during that period, from the time this order is granted, if it is granted, until the cloture vote tomorrow on the Helms amendment, that no amendment dealing with abortion or prayer will be in order.

Mr. LONG. I object.

The PRESIDING OFFICER. Objection is heard.

Mr. BAKER. Mr. President, I wonder if my friend from Louisiana can give me some indication whether or not all of my request, which I had hoped was persuasively presented, is objectionable to him or if only some is objectionable.

Mr. LONG. Mr. President, only some of the request is objectionable. Not all of it. Some of it would be very pleasing.

Mr. BAKER. It is with great fear and trepedation that I put the next question: Will the Senator from Louisiana share with me that part he finds objectionable?

Mr. LONG. The Senator from Louisiana has no objection whatsoever to someone offering an amendment that this Senator agrees with. [Laughter.] But he would be inclined to object to someone offering an amendment displacing an amendment that the Senator has voted for, such as on the prayer amendment. He objects to displacing this noble effort on the subject of school prayer with an amendment which the Senator from Louisiana disagrees with.

Mr. BAKER. Mr. President, as the Senator knows, I, too, voted for cloture. But the minority leader and I had a colloquy this morning discussing that at some point the Senate reaches that crossroad where it has to move ahead. I am determined, to the extent it is possible for me to do so, to redeem the commitment I have made that Senators will have a chance to offer other amendments. After we dispose of this issue there is still time, but, frankly, if we wait until we have disposed of the prayer amendment before other Senators have a chance to offer amendments on other subjects, we are going to run this Senate over the weekend, next week, and do great damage to the prospects of getting out of here on October 1.

Mr. JOHNSTON. Will the Senator yield?

Mr. LONG. Will the Senator yield?

Mr. BAKER. I yield first to the senior Senator from Louisiana.

Mr. LONG. The Senator from Idaho (Mr. SYMMS) just made a proposal in the Finance Committee, a very good suggestion. He has a revenue measure and an amendment he would like to offer. He is looking for a horse on which to put the rider. The Senator from Louisiana would be delighted to give consent that the Senator's amendment could be offered on the bill.

It all depends on what the amendment is. I would like to know what it is that I am going to agree to. If the Senator from Texas is placing before us an amendment that he supports, or if there was one he did not support——

Mr. BAKER. I wonder how the Senator would feel if I would tell him, as I have before, that when everyone has had their day in court it is my intention to move to recommit the bill with instructions to report back forthwith. Would that change the view of the Senator from Louisiana?

Mr. LONG. I would like to think about it.

Mr. BAKER. Mr. President, I really hope the Senator from Louisiana will think about it and that we can arrange it on this basis because we do need to commit the time of the Senate to the consideration of other amendments.

Mr. JOHNSTON. Will the Senator yield?

Mr. BAKER. I yield.

Mr. JOHNSTON. Is the Senator saying that at some point he is going to move to recommit the debt limit bill to come back with a clean bill?

Mr. BAKER. Yes; that is my present intention.

Mr. JOHNSTON. What are we doing all these amendments for if it is going to come back clean anyway?

Mr. BAKER. Mr. President, there are some questions I can answer and some questions I should not answer. [Laughter.]

Mr. JOHNSTON. If the Senator will further yield, does he mean to say we are going to stay here late into the night, maybe over the weekend, just to deal with a lot of amendments that are never going to see the light of day anyway?

Mr. BAKER. It depends on whether I get my way or not. [Laughter.]

As the Senator from Louisiana says, I have a great affection for those things that go my way.

A motion to recommit with instructions might not pass or indeed the bill might not pass clean. So I have two big hurdles to get over. But for weeks now I have indicated, so that nobody thought I was taking them by surprise, that at some point if we do not get this bill resolved we are going to have to pass a simple debt limit extension and it would be my intention to do that. I am reiterating now that it is my intention to do that if we do not deal with the question on its merits.

Mr. JOHNSTON. If the Senator will permit one further comment, as somebody who has voted for Senator HELMS on his prayer and abortion, and all of that, is it not really time that we do that now and save us all a lot of trouble and get on with the business of the Nation? Why not do it right now, this minute?

Mr. BAKER. I was engaged in a conversation with another Senator. I missed the first few priceless words.

Mr. JOHNSTON. I am saying as someone who has supported this prayer amendment and all of that, is it not really time to face up to the fact that it is not going anywhere? It has been a brave fight.

But it has been a losing battle and the battle is over with. Can we not now bring this matter to a close?

Mr. MATHIAS. Right on.

Mr. FORD. Mr. President, will the distinguished majority leader yield?

Mr. BAKER. I yield to the Senator from Kentucky.

Mr. FORD. Mr. President, I support the distinguished Senator from Louisiana. There are several amendments I could not tolerate. I would have to object. If the Senator wants to move on unanimous consent, I hope there may be some amendments that come up that we could debate. But there are several amendments I would have to object to. I now put the Senate on warning and I hope I can be here

when the unanimous-consent request is proposed.

Mr. BAKER. Mr. President, you can see where this leaves the majority leader. I regret it exceedingly. I do not criticize any Senator or even disagree with their point of view. I understand that there is here a device to prevent amendments from being added. There is jeopardy in temporarily laying this aside. That is an acceptable and honorable tradition. Where it leaves me is that it is becoming increasingly difficult, maybe even impossible, to fulfill the commitments I made that other Senators could offer amendments.

I recall discussing this with the junior Senator from Louisiana on the coal slurry amendment, I believe it was. I remember discussing with the distinguished senior Senator from Louisiana and the junior Senator from Indiana a sugar amendment. The list could go on and on. I told them we were going to make this a vehicle on which they could add these things.

If there is objection to this request, I may say it may not be possible to do that.

Now, Mr. President, I withdraw my request.

Several Senators addressed the Chair.

Mr. BAKER. Mr. President, let me first yield to the distinguished Senator from Montana (Mr. BAUCUS), then the Senator from Louisiana and then the Senator from Arizona.

Mr. President, the Senator from Arizona was seeking recognition first. Would the Senator from Montana allow me to yield to him?

Mr. BAUCUS. Yes, Mr. President.

Mr. BAKER. I yield to the Senator from Arizona.

Mr. GOLDWATER. Mr. President, I wonder if it is parliamentarily possible to suggest that we table the Helms amendment at this point?

Mr. BAKER. In answer to the Senator's question, it is possible to do that, as indeed, it was done.

Mr. GOLDWATER. I move to lay the Helms amendment on the table.

Mr. MATHIAS. I ask for the yeas and nays.

The PRESIDING OFFICER. The Senator from Tennessee has the floor. Does he yield for that purpose?

Mr. BAKER. I yield.

The PRESIDING OFFICER. The question is on agreeing to the motion to lay the amendment on the table. Is there a sufficient second? There is a sufficient second.

The yeas and nays were ordered.

The PRESIDING OFFICER. The clerk will call the roll.

The bill clerk called the roll.

The PRESIDING OFFICER. Are there any other Senators in the Chamber wishing to vote?

The result was announced—yeas 47, nays 53, as follows:

[Rollcall Vote No. 348 Leg.]

YEAS—47

Baucus	Glenn	Melcher
Biden	Goldwater	Metzenbaum
Boschwitz	Gorton	Mitchell
Bradley	Hart	Moynihan
Brady	Hatfield	Packwood
Bumpers	Hayakawa	Pell
Burdick	Heinz	Percy
Chafee	Hollings	Pryor
Chiles	Inouye	Riegle
Cohen	Jackson	Rudman
Cranston	Kassebaum	Sarbanes
Danforth	Kennedy	Specter
Dixon	Leahy	Stafford
Dodd	Levin	Tsongas
Durenberger	Mathias	Weicker
Eagleton	Matsunaga	

NAYS—53

Abdnor	Ford	Nickles
Andrews	Garn	Nunn
Armstrong	Grassley	Pressler
Baker	Hatch	Proxmire
Bentsen	Hawkins	Quayle
Boren	Heflin	Randolph
Byrd, Harry F., Jr.	Helms	Roth
	Huddleston	Sasser
Byrd, Robert C.	Humphrey	Schmitt
Cannon	Jepsen	Simpson
Cochran	Johnston	Stennis
D'Amato	Kasten	Stevens
DeConcini	Laxalt	Symms
Denton	Long	Thurmond
Dole	Lugar	Tower
Domenici	Mattingly	Wallop
East	McClure	Warner
Exon	Murkowski	Zorinsky

So the motion to lay the amendment (No. 2031, as modified) on the table was rejected.

Mr. WEICKER addressed the Chair.

The PRESIDING OFFICER. The Senator from Connecticut.

Mr. BAKER. Mr. President, will the Senator yield to me without losing his right to the floor?

Mr. WEICKER. I yield to the distinguished majority leader for the purpose of debate, without losing my right to the floor, without this being considered as the end of a speech for the purpose of the two-speech rule, and that I be rerecognized at the conclusion of the Senator's remarks.

Mr. RANDOLPH. Mr. President, I suggest order. I cannot see the majority leader. I enjoy both seeing him and hearing him.

The PRESIDING OFFICER. The Senate will be in order.

The Chair recognizes the majority leader.

Mr. BAKER. I thank the Senator from Connecticut for giving me this opportunity.

Mr. President, it is clear that we have a problem. The amendment was not tabled. We did not get cloture. There is another cloture vote set for tomorrow.

I regret that we were not able to temporarily lay aside this amendment and proceed, but I understand, and I will abide by that judgment, I have no alternative.

I remind Senators that we will be on this now for the remainder of the day and tomorrow, until 12 o'clock, if we can get that agreement.

CLOTURE VOTE AT 12 NOON TOMORROW

At this time, I ask unanimous consent that the vote on cloture tomorrow be at 12 noon, without the live quorum required by the rule.

The PRESIDING OFFICER. Is there objection? The Chair hears none, and it is so ordered.

Mr. BAKER. I thank all Senators.

Mr. President, if cloture is invoked tomorrow, we will continue to debate the amendment as the rule requires. If cloture is not invoked tomorrow, we will take another look at what we do next.

I remind Senators that we have to finish this bill, and I urge that we consider doing that this week.

Mr. President, will the Senator give me consent to yield to the Senator from North Carolina briefly, under the same terms and conditions?

Mr. ROBERT C. BYRD. Mr. President, after the Senator yields to the Senator from North Carolina, will he yield to me?

Mr. BAKER. May I yield to the minority leader first?

Mr. HELMS. Yes.

Mr. BAKER. I yield to the minority leader.

Mr. ROBERT C. BYRD. Mr. President, there are at least two amendments I should like to call up to this debt limit bill. One is the job training bill. The other is the unemployment compensation amendment.

I would be willing, after cloture tomorrow, to forgo calling up those amendments on this measure, if we could have an understanding—they are both on the calendar—that they would be called up; and I would work hard to get an agreement on my side, say, for an hour on each of those measures. Just call them up and have an hour of debate and vote.

I would hope I could work out other agreements similarly. Maybe we could or could not. Maybe we could not do that on those two. Following cloture tomorrow, if we could get some understanding such as that, I would be glad to support the majority leader's motion to recommit the bill and clear it of all amendments and get it back and have a vote on the passage of the debt limit bill, and dispose of it.

Mr. BAKER. I thank the Senator.

Mr. ROBERT C. BYRD. I offer that as food for thought for the majority leader, if he wishes.

Mr. BAKER. As the old saying goes, I thank the Senator—I think. [Laughter.]

I think the Senator knows that I cannot agree to that. There certainly would be an objection to it on our side.

Mr. President, I still hope that the minority leader and I could cooperate on getting this bill resolved; because, notwithstanding that possibly every Senator has something to offer, almost every Member of the Senate has something they do not want.

It may be that what we have done, unintentionally, is created a legislative

gridlock so that nothing can happen; and if that is so, that is just so. But at some point we will have to dispose of legislation on the debt limit, and we will have to address the questions as we proceed.

Mr. President, I understand that the Senator from North Carolina does not now seek recognition, so, under the order previously entered, I yield the floor; and I believe the Senator from Connecticut will be recognized again.

Mr. BUMPERS. Mr. President, will the Senator yield to me 1 minute under the same conditions?

Mr. WEICKER. Mr. President, I ask unanimous consent that I may yield the floor to the distinguished Senator from Arkansas for a query——

Mr. BUMPERS. For an inquiry of the majority leader.

Mr. WEICKER. Without losing my right to the floor, without this being considered as the end of a second speech for the purpose of the two-speech rule, and that I be rerecognized at the conclusion of the Senator's remarks.

The PRESIDING OFFICER. Without objection, it is so ordered.

The Senator from Arkansas is recognized.

Mr. BUMPERS. Mr. President, I really intended to direct this question to the Senator from North Carolina, but I will direct it to the majority leader.

I want you to know that I sympathize with your plight. I think I understand the reason why you cannot answer some questions being asked you.

My question to the Senator from North Carolina is simply this: He has all the Senators on record with three cloture votes and a motion to table. I understand that his presses are running, his letters are going out, and he is going to mention the names of all those in the Senate who he thinks are against prayer in the schools. We are not, by the way. But how many more times do we have to vote on this?

My question is simply this: What political advantage can there possibly be to getting everybody on record 10 times instead of 9 times? The die is cast on this, I believe. We have a lot of work to do. We have people on both sides of the aisle who want to get back to their States and campaign.

We have a very serious bill here, in the form of a debt ceiling bill. We have a continuing resolution that, in my opinion, will take us a minimum of a week, going late at night, to pass. So why would the Senator from North Carolina not let the majority leader do what he knows he will have to do, and that is to recommit this bill right now, bring it back, and let us pass it and let us get on with the things we have to do?

I really am pleading with the Senator from North Carolina.

Mr. HELMS. If the Senator will forbear, I will answer his question. He is not asking a question; he is making a speech.

Mr. BUMPERS. The question is there, Senator. Answer it.

Mr. HELMS. I think the majority leader will tell you that I have cooperated with him every step of the way. He is not dealing with just one Senator.

I understand that the Senator is against prayer in schools. That is your and Senator MOYNIHAN'S right. But when a majority of Senators vote in favor of school prayer, Senator MOYNIHAN nevertheless gets up and shouts, "The radical right has been defeated." Well, the Senator from North Carolina did not get up and shout, "The radical left has been defeated."

The Senator can play politics if he wishes with this issue, but the fact remains that the American people want prayer restored to their schools.

Mr. ROBERT C. BYRD. Mr. President, if the Senator will yield, I hope Senators——

Mr. BUMPERS. That is all right; leave him alone. I am still on my feet. I will be happy to engage in this debate.

Mr. HELMS. Mr. Minority Leader, I have sat silent in the face of all sorts of abuse directed to the people who are trying to restore prayer in the schools. Certainly, you are on record. But would you, as the minority leader, back up on something to which you are dedicated?

Mr. ROBERT C. BYRD. Mr. President, I do not know why the Senator is pointing his finger at me. [Laughter.]

I was simply going to suggest that Senators on both sides be careful with their statements.

Mr. HELMS. I am glad that point has finally been made, because throughout this debate——

Mr. ROBERT C. BYRD. If the Senator wants to point his finger at me, I will be glad to debate him, if he wishes to engage in some debate. But I have no intention of pointing my finger at him or any other individual in the Senate.

Mr. HELMS. I was in the same position some years ago when Senator Mansfield pointed his finger at me during a tense moment. I took no offense.

What is the Senator's question?

Mr. BUMPERS. The Senator's question is this: We have voted three times on cloture on this amendment. We have now voted on a tabling motion. All of us who opposed to this unconstitutional court-stripping measure are on record. Now, without disparaging the Senator from South Carolina, he has a right to do what he wants to do, but it is my subjective feeling——

Mr. HELMS. Now the Senator moved me across the line.

Mr. BUMPERS. I am sorry—North Carolina.

My point is this: We are on record. It is my belief that this is all political and has been since the first cloture vote. But whether it is or not, I am not attempting to substitute my judgment for yours. Surely, the Senator has everybody on record enough. Why will he not let the majority leader ask for unanimous consent right now or just say that he acquiesces in the majority leader's moving to recommit this bill?

Mr. HELMS. The majority leader does not take his instructions from me, and I will say that if the majority leader wishes to proceed, that is a judgment uniquely his to make.

Mr. BUMPERS. If he moves to recommit this bill right now and it comes out without amendment, are you saying that the Senator from North Carolina has no objection?

Mr. HELMS. I have no objection to any decision that the majority leader wishes to make. I may not like it, or agree with it, but he after all is the majority leader. The Senator from Arkansas is not the majority leader, nor is the Senator from North Carolina.

I have not attempted at any step of the way to dictate to the majority leader. That would be presumptuous.

Mr. BUMPERS. Was not a deal cut that all these social issues would be put on this bill?

Mr. HELMS. What is the Senator talking about when he says "a deal cut"?

Mr. BUMPERS. Did not the majority leader suggest at the very beginning of this session that these issues should be put on the back burner until the eocnomy and other matters the Senate had to consider were in fact considered? Was that not a concession the majority leader made to the Senator from North Carolina?

Mr. HELMS. The majority leader, to my knowledge, never said "put them on the back burner." Those are the Senator's words.

Mr. BUMPERS. I am just characterizing that.

Mr. HELMS. That was the Senator's characterization.

Mr. BUMPERS. I am not saying the majority leader used the precise words.

Mr. WEICKER. Mr. President, a parliamentary inquiry.

The PRESIDING OFFICER. The Senator will state it.

Mr. WEICKER. My inquiry is whether or not the Senator from Connecticut has the floor. I yielded for the purpose of a query of the Senator from Arkansas. I was wondering whether or not I still have the floor.

The PRESIDING OFFICER. The Senator from Connecticut is correct. He does have the floor.

Mr. WEICKER. Mr. President, I do not mean to cut off the Senators. I am

only trying possibly to get into the time. I might be helpful in the situation. I do not wish to cut off my good friend from Arkansas or my good friend from North Carolina.

So I will be glad to yield to both if they care to go ahead. I thought it was at an end. That is all. If he wishes to go ahead I will yield further.

Mr. BUMPERS. It is at an end. I do not care to pursue it any further.

Mr. HELMS. That may be the best judgment the Senator will make all day.

Mr. WEICKER. Mr. President, I ask unanimous consent that I may yield the floor to the distinguished Senator from Rhode Island (Mr. CHAFEE) for the purpose of debate without losing my right to the floor and without this being considered as the end of a speech for the purpose of the two-speech rule, that I might be rerecognized at the conclusion of the Senator's remarks, and that I be allowed to leave the Chamber while I have so yielded.

The PRESIDING OFFICER (Mr. HUMPHREY). Without objection, it is so ordered.

Mr. CHAFEE. Mr. President, I thank the distinguished senior Senator from Connecticut for the excellent job he has done in explaining this legislation and the effect that it has.

Mr. President, I wish to continue discussing and quoting from the very apt and able testimony given by Prof. Lawrence H. Tribe, of the Harvard Law School, before the House Judiciary Committee in June 1981.

In that testimony, which was directed against court-stripping efforts of several pieces of legislation that were before the House subcommittee, Professor Tribe had discussed Marbury against Madison, of course, the landmark 1903 decision of the U.S. Supreme Court, where he quoted frequently the statements wherein the Court said:

• • • and certainly cannot be forced to "close their eyes on the constitution, and see only [Congress'] law."

He then went on to state:

That Congress may control the timing and the context for federal judicial review of its own statutes does not imply that Congress may place its favorite laws behind a shield wholly impenetrable by federal judicial review. For Congress to do so would impermissibly condemn those federal judges before whom such enactments become relevant in pending cases to serve as instruments of constitutional disregard and defiance. Authorized to decide a case, an Article III court must decide it constitutionally—or not at all.

This came up in United States against Nixon in 1974:

Beyond this internal requirement of adjudication according to a court's best effort to address all questions necessary to decision, to do so in accord with law, and to regard the Constitution as the "supreme law of the land"—beyond this, both the Supreme Court and all inferior courts created pursuant to Article III are charged to resolve only *actual cases or controversies*, and are concomitantly barred from merely offering "opinions in the nature of [legal] advice."

In other words, you cannot go to a Federal court and seek advice as you can in some State courts.

This came up particularly in *Muskrat* v. *United States*, 219 U.S. 346, 362 (1911). *See also* Correspondence of the Justices, Letter from Chief Justice John Jay and the Associate Justices to President George Washington, August 8, 1793.

What is a proper controversy? It is stated:

To "constitute a proper 'controversy,'" an "asserti [on] [of] a right [must be] susceptible of judicial enforcement." *Maryland* v. *Louisiana*, 49 U.S.L. Week 4562, 4565 (U.S. Supreme Court, May 26, 1981).

It follows that Congress may not so truncate—so cut off the jurisdiction of an article III court.

Mr. President, mind you, an article III court we are referring to those courts in the Constitution set up by article III including the Supreme Court and such lower courts as Congress shall establish.

It follows that Congress may not so truncate the jurisdiction of an Artile III court as to empower it to "decide" a legal controversy while denying it any means to effectuate its decision—or even, as in the ordinary declaratory judgment, at least to alter the concrete situation of the parties or the range of options open to them.

Obviously, it is ridiculous to say that the court can decide a legal controversy but has no means to effectuate its decision.

Congress' broad authority to regulate the panoply of available remedies, in others words, stops short of the power to reduce an Article III court to a disarmed, disembodied oracle of the law lacking all capacity to give concrete meaning to its decision that one party won and the other lost.

You can do this. This much at least is implicit even in article III's bar to adjudication at the behest of the party lacking any concrete standing in the outcome of the proceeding.

This much, at least, is implicit even in Article III's bar to adjudication at the behest of a party lacking any concrete stake in the outcome of the proceeding. For a party advancing a legal argument in a court that has been rendered impotent in any meaningful degree to remedy the wrong complained of lacks, by definition, any stake beyond a citizen's purely theoretical curiosity about how the case turns out.

What Professor Tribe is saying here is that the courts are not set up for people to come before them and say how would this come out? There is a theoretical curiosity about how this case might be decided. That is not what the courts are for. The courts are for to render a decision in which one party wins and another party loses and then to execute that judgment in some fashion to remedy the wrong that is complained of and after that the courts are impotent and are useless.

Professor Tribe then goes on and discusses two pieces of legislation that stripped the courts of their power that were being considered by the House Judiciary Committee.

In those pieces of legislation, both of which would unconditionally deprive the inferior article III courts, that is the district and the circuit courts, of authority to issue—they would not have the authority to issue any restraining order or temporary or permanent injunctions or in the case of one of the pieces of legislation any authority to issue any declaratory judgment as well in any case arising out of a law restricting abortions. To do that was inconsistent with article III.

Now, in that particular instance he was not discussing the prayer amendment, but they are all the same. The thrust is absolutely the same. There is no difference. One dealt with abortion, and the one before us today deals with prayer.

For an Article III tribunal thus defanged, but nonetheless seized of jurisdiction to "decide" a pregnant woman's anticipatory challenge to the validity of an abortion ban under which she is threatened with a criminal fine if she exercises her rights as defined by *Roe* v. *Wade*, 410 U.S. 113 (1973), is reduced to whistling in the wind: if it rules the ban invalid and the threat unconstitutional, as it should, it might as well send the woman its regrets. For the tribunal is forbidden to come to her aid in an anticipatory way—while there is still time—even without any showing that the state courts would, or even might, provide timely relief in proceedings of their own. On the contrary, the expectation quite clearly is that the states will not do so—even though the pending statutes, H.R. 73 and H.R. 900, would at least leave open the possibility of the Supreme Court's appellate review of such state court refusals. The point, it should be emphasized, is not that H.R. 900 and H.R. 73 guarantee that the pregnant woman's rights will be rejected in every court to which she goes for preventive relief; the point is that these restrictions would leave Article III tribunals with no way to compel the timely vindication even of the rights such tribunals find to be unconstitutionally jeopardized; and they in no way link this power vacuum to grounds for suppossing that state courts will vindicate the rights on their own or will be forced to do so by the Supreme Court before it is too late. A federal court placed in such a predicament has been emptied of the essential attributes of judicial power contemplated by Article III: "[For] Congress . . . to confer the jurisdiction and at the same time nullify entirely the effects of its exercise are not matters heretofore thought, when squarely faced, within its authority."[7]

Then Professor Tribe goes on to discuss the effect of those proposed laws that were being considered by the House Judiciary Committee. He says:

Similarly, H.R. 869, H.R. 1079, and H.R. 1180 would purport to strip all Article III

[7] *Schneiderman* v. *United States*, 320 U.S. 118, 168-69 (1943) (Rutledge, J., concurring). Cf. *Sterling* v. *Constantin*, 287 U.S. 378, 403 (1932) (Hughes, C.J.)

courts of jurisdiction to "require the attendance at a particular school of any student because of race, color, creed, or sex," and H.R. 761 would extend this ban to an ouster of jurisdiction "to make any decision, or issue any order, which would have the effect of requiring any individual to attend any particular school"—evidently for any reason.

Now, obviously, the proposed legislation that was being considered dealt with school busing and the integration of the schools.

This latter provision, insofar as it tells federal courts what "decision[s]" they may and may not make regardless of their view of the applicable law and facts, plainly contravenes *United States* v. *Klein, supra.* And all four provisons, insofar as they purport to rule out various pupil-assignment remedies regardless of whether any other decree could give effect to the court's constitutional determination,[8] appear to violate the requirement that decisions made by Article III tribunals not be doomed to futility from the start.

Mr. President, what he is talking about here is not what specifically is sought in the law, the proposed law, dealing with attendance in schools, with school busing or abortion or whatever it might be—in this case it is prayer—but what he is talking about is the ability to reduce the article III courts of this country to a nullity, that they are doomed to futility from the start. There is no point in their wasting any time on a case because they cannot do anything about it. Thus we are engaged in this theoretical business of deciding cases with no results.

The same may be said with respect to H.R. 114, which attempts to strip all inferior federal courts of jurisdiction, directly or indirectly, to "modify" the effect of any state court order so long as that order is or was reviewable by the state's highest judicial body. If a federal court concludes that such an order was entered in violation of the Constitution; that opportunities to challenge and modify it within the state's judicial system were and remain constitutionally inadequate; and that the individual whose rights the order violated, now a party properly before the federal court, will continue to be unconstitutionally prejudiced by the order unless it is promptly modified by that federal court, then following the mandate of H.R. 114 would render the court powerless to give its conclusion any effect whatever.

The view has at times been expressed that Congress is beyond not only to equip whatever federal courts it creates with subject matter and remedial jurisdiction sufficient to satisfy the implicit demands of Article III but also to create such lower federal courts in the first instance (how many? where?) and to vest them with all the jurisdiction that Article III allows, *see Martin* v. *Hunter's Lessee,* 14 U.S. at 330-31, at least to the degree that the effective protection of constitutional rights under modern conditions so requires.[9] The consistent rejection of this position—a position perhaps rendered more plausible by the Civil War Amendments than it was when Justice Story announced it in *Hunter's Lessee*—might be thought to preclude its adoption now. But such rejection of the Story view should not be permitted to obscure the underlying principle—one never rejected by any court—that no Article III tribunal that Congress elects to create, whether under constitutional compulsion or otherwise, may be crippled from birth with a defect of design fatal to the tribunal's capacity to fulfill a function indispensable to the "judicial power of the United States."

I must say Professor Tribe is not a master of clarity. However, his points are well taken. Basically what he is saying, as I have said before, is that we did not set up these article III courts to cripple them from birth with a defective design fatal to the court's capacity to fulfill a function indispensable to the judicial power of the United States.

Mr. MOYNIHAN. Mr. President, will the Senator yield for a question?

Mr. CHAFEE. Yes; I would for a question.

Mr. MOYNIHAN. This seems to me to be with respect to the central historical and constitutional question that we deal with, to wit, did the exceptions clause extend to the vital functions of these tribunals which Justice Marshall said that "The province of the court is to declare what the law is?"

Do I take it to be the judgment of the distinguished Senator from Rhode Island that courts in order to be courts had to have that function, and no group of American lawyers, who were in the main at Philadelphia, would have conceived of the court in any other role?

Mr. CHAFEE. I think the Senator is absolutely right in his question. I mean this is ridiculous. What were the courts for? Why are we setting them up? Why are we paying them? Why do we have a system of review when a court is merely to declare the law, announce it, and that is it? It cannot do anything about it; no injunctive powers, no powers of review, nothing. It is an absurdity, and that, of course, as the distinguished senior Senator from New York has mentioned, is way beyond—it was never in—the dreams of those distinguished citizens present in Philadelphia in 1788 and 1789.

Of course, we have quoted extensively here from the Federalist Papers of Alexander Hamilton and he makes that very, very clear.

I noticed, and the distinguished Senator was here earlier, perhaps, when somebody charged someone as being against school prayer. Wonderful. What a charge. Send the person away in shame, he is against prayer.

Well, that is not the subject in this matter at all. And the Senator from New York has mentioned that many times. The subject has nothing to do with prayer. It has to do with the powers of the courts.

If we were to have a discussion on prayer, if we want to bring forward a constitutional amendment that would permit prayer in schools under the Constitution, then that would be a discussion on school prayer. Are you for it or against it? Compulsory prayer or some substitute or some alternative. That is where you get to discussing the gist of prayer or nonprayer, but not under that measure that is before us today and that has been bedeviling us for these past 2 weeks.

So the Senator is absolutely right in his suggestion that it deals with the capacity of a court to fulfill a function indispensable to the judicial power of the United States.

Mr. MOYNIHAN. Will the Senator allow me to address him just this point? In other words, the issue, as he sees it, is it cannot be confined to prayer because if the principle applies to any aspect of the Constitution it must apply to all of them. So the freedom of the press may be at issue and habeus corpus may be at issue and the right to bear arms may be at issue.

Mr. CHAFEE. The Senator has struck a telling blow there.

Mr. MOYNIHAN. The right to bear arms.

Mr. CHAFEE. The right to bear arms. Imagine this Congress, this body saying that the courts will have no authority to enforce the constitutional provision that says a citizen's right to bear arms shall not be abridged. I wonder how that would go over with some of the proponents of this legislation if we extended it. Maybe we ought to have a substitute and substitute the right to bear arms for prayer. Maybe the sides would be reversed.

Mr. MOYNIHAN. May I just intervene to say that the Senator from Rhode Island will stand by his principles whatever the policy is.

Mr. CHAFEE. I was going to say that there is no question that that was said facetiously. And I know I speak for the Senator from New York and the Senator from Connecticut that regardless of what it is, it is wrong to proceed in this way and that is why we are carrying this on. That is why we are going into extended debate. That is why we have been through three cloture votes and presumably there is one set up, as I understand it, for 12 o'clock tomorrow.

I wish to thank the Senator from New York for his contributions.

Mr. MOYNIHAN. I thank the Senator.

Mr. CHAFEE. Mr. President, continuing quoting Mr. Tribe's testimony:

[8] Cf. *North Carolina* v. *Swann,* 402 U.S. 43 (1971) (invalidating state statute that rules out busing remedy even where needed to correct *de jure* segregation).

[9] *See* Eisenberg, "Congressional Authority to Restrict Lower Federal Court Jurisdiction," 83 Yale L.J. 493 (1973).

EXTERNAL LIMITS

That Congress' jurisdiction-defining powers—in common with all other powers entrusted by the Constitution to the National Legislature—are limited externally as well as internally may at times be forgotten, or obscured by sweeping dicta about plenary authority, but is undeniable all the same.

"[T]he Constitution is filled with provisions that grant Congress or the States specific power to legislate in certain areas; these granted powers are *always* subject to the limitation that they may not be exercised in a way that violates other specific provisions of the Constitution."[10]

Thus, whatever its "power to give, withhold, and restrict the jurisdiction of [federal] courts . . ., [Congress] must not so exercise that power as to deprive any person of life, liberty or property without due process of law or to take private property without just compensation," *Battaglia* v. *General Motors Corp.*, 169 F.2d 254, 257 (2d Cir. 1948), cert. den., 335 U.S. 887 (1948) (footnote omitted), or to contravene any other provision in the Bill of Rights, or in the Bill of Attainder Clause or the Ex Post Facto Clause of Article I, Section 9, or in any other independent limitation or constraint imposed by the Constitution or its amendments upon affirmatively authorized federal legislation. Were the law otherwise, Congress could freely deny access to federal courts to all but white Anglo-Saxon Protestants, or to all who voted in the latest election for a losing candidate.[11] If such consequences are to be prevented, it must be the case that Acts of Congress are accorded no special immunity from independent constitutional limits on national legislation simply because such Acts are cast in jurisdiction-defining terms; the power to define and control the jurisdiction of federal courts is no talisman, somehow dissolving otherwise fatal constitutional limit on what Congress has chosen to do.

As with the internal limit upon the power of Congress to control jurisdiction, these external limits may derive from the interstices and implications of the text, structure, and history of the Constitution as well as from its explicit terms. Ex parte Garland shows as much,[12] and nothing in the logic of the situation counsels a more restrictive canon of constitutional interpretation here than in the identification of internal limits.

Among the external constraints the Constitution imposes upon all federal legislation, including legislation that regulates judicial authority, is the principle that no law may unjustifiably deter or disadvantage the exercise of a constitutional right. The Supreme Court recognized decades ago that constitutional rights could be jeopardized and ultimately destroyed not only by laws directly forbidding or penalizing their exercise but also by laws making their exercise the occasion for withholding or withdrawing benefits or privileges that would otherwise be available.[13] "It is inconceivable that guaranties embedded in the Constitution of the United States may . . . be manipulated out of existence," [14] by using the invocation of such guarantees as a trigger for suspending access to a valued service that government would otherwise have extended. The fact that the service is one government could have chosen to abolish altogether is immaterial; it is the choice to withdraw something selectively when particular constitutional rights are exercised that marks a law as an indirect burden upon such exercise. And whenever a law has this character, it automatically becomes constitutionally suspect. Such a law is per se void to the extent it is intended to prevent or penalize the exercise of a constitutional right.[15] And, to the extent the law's tendency to deter or disadvantage such a right is but an unintended and incidental consequence of the measure, the law is valid only if demonstrably necessary to the attainment of a compelling governmental purpose—a purpose with respect to which the law is neither underinclusive nor overinclusive.[16]

One particularly pernicious device through which a law might deter or disadvantage the exercise of a right is the technique of making the right's exercise ineligible for a generally available form of governmental protection.

The kind and degree of protection to provide—the combination of executive and judicial enforcement authority to confer—is left, in the first instance, to the judgment of the legislature. But so fundamental is "the right of every individual to claim the protection of the laws, whenever he receives an injury." [17] that such protection cannot be suspended or reduced so as to abandon the enjoyment of selected rights to a jeopardy from which others are shielded. Government even bears responsibility for the private intimidation or harassment of citizens that it invites, whether directly [18] or indirectly [19]—including the abuse that it encourages by suspending or withholding ordinarily available devices of law enforcement.[20]

And then Professor Tribe cites some examples that we are talking about here, where he is saying that Government even bears responsibility for the private intimidation or harassment of citizens that it invites, whether directly or indirectly, including the abuse it encourages by suspending or withholding the ordinarily available devices for enforcement. It gives as an example the law that compels the disclosure of membership lists.

This is an example where Government could be responsible, indeed the Government was responsible, for predictable private abuse that would result. You compel the NAACP in Alabama, going back to the early days of civil rights, to disclose its membership lists. The law says all membership lists have to be disclosed.

That is an invasion of privacy because the State government knew that predictable private abuse would result.

Even more plainly, the Federal Government is accountable for the *public* harassment or persecution of citizens that predictably results when it declares open season on them by placing the rights they seek to exercise in a "free-fire" zone, one that is expressly ineligible for the usual panoply of executive and judicial mechanisms for enforcing such rights through making state and local officials civilly and criminally liable for their abridgment. At least when surrounding rights are fully protected through such mechanisms, "denying the equal protection of the laws includes the omission to protect, as well as the omission to pass laws for protection." *United States* v. *Hall*, 26 Fed. Cas. 79 (C.C.S.D.Ala. 1871).

Congress' sweeping authority to define federal torts and crimes, for example,[21] would confront an insuperable constitutional obstacle were that authority to be deployed in such a way as to protect from hostile state and local governmental activity only such constitutional rights as might meet political favor with the electorate at any given time. Thus, 42 U.S.C. § 1983 currently subjects to civil liability in federal court all who, under color of state law, deprive individuals of their constitutional rights; and 18 U.S.C. § 241 now makes criminal the willful deprivation of such rights by state and local officers, among others, who "threaten or intimidate any citizen in the free exercise or enjoyment of any right or privilege secured to him by the Constitution . . ., or because or his having exercised the same."

Such harassment is not immunized from federal prosecution by the theoretical existence of state remedies against it.[22] Nor is such harassment immunized by the fact that it takes the form of arrests, searches, seizures, or interrogations under a patently void statute—one that could not possibly lead to a valid conviction; indeed, precisely such harassment is currently subject to preventive relief by federal injunction. See *Younger* v. *Harris*, 401 U.S. 37, 47-49 (1971).

Now imagine what would happen if Congress were to amend 18 U.S.C. § 241 to make it inapplicable, or to limit its punishment to nominal fines, whenever the "right or privilege" that had been subjected to threat or

[21] See, e.g., *United States* v. *Hudson & Goodwin*, 11 U.S. (7 Cranch) 32 (1812) (federal courts have no authority to punish conduct without congressional enactment specifically defining the conduct as criminal).

[22] See *Screws* v. *United States*, 325 U.S. 91 (1945) (state police who beat black suspect to death may be federally prosecuted under 18 U.S.C. § 242 for willful deprivation of suspect's constitutional rights under color of law notwithstanding possible state prosecution for murder).

intimidation was the right to an abortion, or the right not to have even "voluntary" prayers conducted in one's public school, or any other of a short list of rights of which a majority in Congress happened to disapprove. It is unthinkable that such a law would, and unimaginable that it should, be upheld—not because Congress' reach in enacting it would have exceeded its grasp (Congress' power to define federal crimes and to regulate their punishment is at least as "plenary" as many of its other powers and is, if anything, broader than its power to control federal judicial jurisdiction) but because in its reach Congress would have collided with the rights that it had selectively sought to disadvantage.[23]

The same would follow if Congress were to withdraw from the reach of 42 U.S.C. § 1983 the right to bring up one's children without undue public intrusion, or the right to end a pregnancy, or indeed any other specific right, thus subjecting to federal civil remedies at law and equity all actions under color of state law depriving citizens of their constitutional rights—except for the rights thereby left by Congress to fend for themselves. The fact that Congress' exclusion of selected rights might involve a limit on the judicial branch rather than, or in addition to, the executive branch, obviously makes no constitutional difference so far as the external constraints on Congress' powers are concerned.

Mr. President, I ask unanimous consent that I may yield the floor to the distinguished Senator from Connecticut without this being considered as the end of a speech for the purpose of the two-speech rule.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. WEICKER. I thank the distinguished Senator from Rhode Island, both for his yielding and for the excellence of his comments. I believe efforts such as his have indeed reacquainted a Nation with the Constitution of the United States, and efforts such as his that have preserved some very basic freedoms that have been under attack here on the floor.

Now, Mr. President, I would like to read a commentary which ran in the Sunday Express-News in San Antonio, Tex., on May 16, 1982. The column is entitled "State Approved Religion Just Will Not Work." It is written by a gentleman by the name of Maury Maverick.

It starts off quoting the first amendment of the U.S. Constitution, that "Congress shall make no law respecting the establishment of religion * * *"

You Presbyterians, Lutherans, Quakers, Methodists and Baptists deserve a pat on the back. It was your religious predecessors who saved our country one time long ago from having a state religion. Now the living must again save the country, but this time from the crazies of the Moral Majority who would have a football coach tell your kid how to pray.

Presbyterians, Lutherans, Quakers, Methodists and Baptists flocked behind the banner of Thomas Jefferson and James Madison and were responsible for the enactment of the famous "Virginia Bill for Religious Liberty." From that great document came the First Amendment of the Bill of Rights. In the face of the current threat against religious liberty, Jews with the vision of Leo Pfeffer of the American Jewish Congress, and Catholics with the courage of Father Robert Drinan will join in the fight for the continuation of separation of church and state. So will blacks. These three minorities will be the first to suffer.

The idea of having a government-sponsored period for prayer finds its roots in the Book of Common Prayer of the Anglican church. That religious body persuaded Parliament to pass acts in 1548 and 1549 making the Anglican way of prayer the official and proper way to pray. Because of this, England was disrupted, and it became worse and worse as each new king or queen struggled to impress his or her viewpoint upon the government on how to pray.

Minorities in England, outraged by the Anglicans, came to these shores and, becoming the majority in certain areas began periods of religious tyranny of their own.

Justice Hugo Black, in the landmark case of Engel vs. Vitale, the decision Reagan and the other people of limited vision are now trying to overturn, caught the spirit of religious liberty by writing:

"By the time of the adoption of the Constitution, our history shows that there was a widespread awareness among many Americans of the dangers of a union of Church and State. These people knew, some of them from bitter personal experience, that one of the greatest dangers to the freedom of the individual to worship in his own way lay in the Government's placing its official stamp of approval upon one particular kind of prayer. . . . They knew the anguish, the hardship and bitter strife when zealous religious groups struggled with one another to obtain the Government's stamp of approval from each King, Queen or Protector. . . ."

"But, Maverick," I can hear the innocents say who do not know their history, "all we want is a neutral prayer."

A neutral prayer? Man alive, we already tried that and it didn't work!

In Engel vs. Vitale and the State of New York caused the following "neutral prayer" to be read aloud: "Almighty God, we acknowledge our dependence upon Thee, and we beg Thy blessings upon us, our parents, our teachers and our country."

To this state-devised "neutral prayer" the Supreme Court declared, ". . . it is no part of the business of government to compose official prayers for any group of Americans to recite as a part of a religious program carried on by government." In other cases of the Supreme Court in situations where children ostensibly could refuse to participate, the result was to demean and intimidate those refusing.

Whenever in this world there is state-approved, regimented and official religion, there is trouble, be it in Iran, Israel—where a reform rabbi is a lesser person than an orthodox rabbi—France, Spain or Roman Catholic South Ireland sitting next to Anglican North Ireland. In our own century it has been the Jewish students who have, generation after generation, suffered at schools by being forced to participate in the Christian exercise of religion. How would you like a Jewish principal of a public school telling your Christian kid to pray a Jewish prayer?

Priests, preachers, rabbis and mullahs can be tyrants just like anyone else. When our Texas ancestors signed the Declaration of Independence of the Republic of Texas, they understood how abusive clergymen can be and specifically described them in that great document as the ". . . eternal enemies of civil liberty, the ever ready minions of power, and the usual instruments of tyrants." There ain't nothing mushmouth about that language.

But our brave forefathers didn't stop with the Declaration. They wrote into the Constitution of the Republic of Texas, "Ministers of the gospel, being by their profession dedicated to God and the care of souls, ought not to be diverted from the great duties of their functions: therefore no minister of the gospel, or priest of any denomination whatever, shall be eligible to the office of the Executive of the Republic, nor to a seat to either branch of the Congress of the same."

Our present Texas Constitution reads, "No money shall be appropriated or drawn from the treasury for the benefit of any sect or religious society; nor shall property belonging to the State be appropriated for any such purpose." The latter phrase means you don't turn a government funded public school over to the pope or a football coach for the purpose of student praying.

Writing to John Adams, my hero Thomas Jefferson stated, "I never told my religion, nor scrutinized that of another. I never attempted to make a convert, nor wished to change another's creed. I have ever judged of others' religion by their lives . . . for it is from our lives and not from our words, that religion must be read."

Don't you see the danger in the proposed constitutional amendment urged by the lunatics and as now adopted by President Reagan? What the goofy crowd wants to do is to take away the right of the federal judiciary to protect you or me if the state does violate religious liberty.

Years ago I wrote to a famous jurist and asked him to inscribe on the flyleaf of a book those words about liberty which he had written and which he considered his best comment on the subject.

The judge was a deeply religious man, but he knew the state ought to keep its nose out of prayer and the courts should be available to prevent state abuse of religion. From a chamber of the Supreme Court, the jurist took pen in hand and wrote these words back to me, words that can make your spine tingle, and even weep.

"Under our constitutional system, courts stand against any winds that blow as havens of refuge for those who might otherwise suffer because they are helpless, weak, outnumbered, or because they are non-conforming victims of prejudice and public excitement."

Then he concluded with a personal note, "In love of freedom and country. Washington, D.C. 1962. Sincerely, Hugo Black."

Mr. President, there you have in very succinct form one of the aspects of the argument being made here, on the Senate floor. My good friend, the Senator from Montana (Mr. BAUCUS), will surely be here to argue the three separate but equal branches of Government in opposition to this amendment, that is, we should not strip the courts of their function to protect us

[23] Whatever such a law's other aims, it would fit too poorly (to pass muster under strict scrutiny) any objective other than the forbidden one of deterring or penalizing the rights excluded.

should the legislative and executive branches fail to do so. I prefer to come at this head-on in substance as being a violation of the first amendment of the Constitution. I do not want anybody's nose in the religious affairs of my family—not my children, not me, not my wife; nobody. It is nobody's business. It is a matter between me and the Creator.

I ask those of adult age, if this is such a good idea, why not impose it on all 232 million Americans? That would include all those of voting age. Why shuffle this off to be practiced upon the children? How about all 232 million having to stand up and recite a state prayer?

I think we know what would happen. Whoever made that suggestion would not last very long on the local school board. They would not last very long if they were a Governor. They would not last very long if they were a Senator. Kids cannot vote. We are going to tell them what is best for them. Why not teach them the Constitution of the United States because, indeed, the whole country has forgotten that. That is what the trouble is.

I remember, around the time of Watergate, several enterprising young reporters that worked for one of the networks going into a supermarket in Miami, Fla. I remember this as if it were yesterday. They had the Bill of Rights on a clipboard, not one word changed, as if it were a petition. They would ask people coming in if they would sign this petition, the Bill of Rights of the Constitution of the United States. Do you realize that over 75 percent would not sign it? And when they were asked why they would not sign it, over 50 percent said it was a Communist document.

Now, that is how far we have come in understanding the origins of our own Government and in failing to understand our greatness.

The United States is not No. 1 because of the number of its citizens. If that were the case, China, Russia, India, many other nations, would be preeminent in the world.

We are No. 1 because of what emanates from the mind. The reason why this Nation is No. 1 is that, we do have total freedom to think. Religious freedom is not a partial matter; it is a total freedom.

That is what is at issue here.

This is one of the moments in American history when American people are becoming reacquainted with their Constitution and what it stands for. Do not forget the men and women who wrote that document came off some very harsh experiences.

Even with the proximity in time of their having been exiled or their having left persecution and death, they were bound to forget very quickly. Certainly we can be forgiven as a generation when earlier generations of Amercians, much closer to the time period of the Revolution, killed those who believed in the Mormon faith as they trecked West. Certainly we can be forgiven for not understanding what that document said when residents of Salem, Mass., put to death 19 of their own in the name of religion. And they were only a few years away from their own persecution.

But because we have that excuse does not permit us to forget that great law of the land which is the Constitution and which is just that, the law of the land.

And so we become reacquainted with the first amendment and we become reacquainted with the reasons for its passage:

> Congress shall make no law respecting an establishment of religion or prohibiting the free exercise thereof.

Suppose, for instance, my faith prohibits me from hearing any words except those that are proscribed by my faith. What if that is a basic tenet of my religious faith? What is my child supposed to do? What is my child supposed to do when this voluntary prayer routine is being gone into? Leave? Protest? Get into a constitutional court case?

It seems to me that that is prohibiting the free exercise thereof. There is not a list of exceptions in the first amendment. There is not a footnote to the Constitution listing exceptions. It means just that, "shall make no law respecting an establishment of religion." That is everything. "Or prohibiting the free exercise thereof." No exceptions.

Madison, Jefferson, all of these men who wrote the Constitution, came off an experience of tyranny and of state religion. I think it is great that we have this rich religious heritage in this country. I am proud of the fact that my great uncle was the Archbishop of Canterbury, Randel Davidson. I am proud of that fact. But I also have to point out, as an American who knows his history, that the Archbishop of Canterbury back in the 1600's was not on the Mayflower and for very good reason: Because the people on that ship were fleeing from the Archbishop of Canterbury and his partner, the King of England, because they had successfully merged the civil and the religious authority of that nation.

The greatest mischief throughout history has been conceived by the merged authorities, civil and religious.

Now, before I yield to my good friend from Montana, people will say:

> Well, that can't happen here. We are not talking about people being burned at the stake or martyred, exiled or thrown into prison.

Well, then, you better read your history to find out how the intolerance and persecution did start. Somebody did not just get up in the morning, grab his neighbor and tie him to a stake.

These matters of intolerance and of visiting death on one's neighbor in the name of the Almighty start with little works and little deeds that are innocuous, that are neutral—like a little neutral prayer.

If you really believe in your particular faith, you should not accept anything that is neutral.

I do not accept these little neutral acts. These little neutral acts have a way of building up. All you have to do is tell how testy people get in the Senate when the business of religion comes up.

Mind you, we have some pretty well established rules as to how we treat each other, and even those become strained. What do you think happens out there in the streets? When we go to people's homes, we are not in the habit of getting into religious debates, for good reason.

This Constitution is a piece of genius, and it is something that has been left to us intact. If anything, I would say that the words written in there have expanded our liberties; but never, as far as I know, have they been contracted.

Take a look at all these amendments. Tell me which amendments—with the exception of prohibition, when others were trying to moralize in another day and age—tell me what in here contracts our liberties. Nothing.

This is going to be the first generation to do that? We have spent everything else around here. We have burned up the air; we have contaminated the water; we have just about laid waste to every other heritage, every other piece of capital given to us. Now this goes? Oh, no. Not as long as this Senator and other Senators can stand and defend it.

If anybody thinks the future of the United States is in a weapons system or is in the gross national product or is in our personal income statistics or anything else, it is not. It is right here in the Constitution. In this resides our greatest strength, but only if it is left alone.

Mr. President, I yield the floor to the distinguished Senator from Montana (Mr. BAUCUS) for the purpose of debate, without losing my right to the floor, without this being considered as the end of a speech for the purpose of the two-speech rule; and I ask unanimous consent, also, that at the end of the Senator's remarks, or remarks of Senators to whom he yields, I be recognized, and that I be allowed to leave the Chamber while so yielding.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. BAUCUS. Mr. President, first, I thank the Senator from Connecticut and give him my appreciation and respect. The Senator once again, as he

has done many times before on the floor of the Senate—and in other locations, in public forums—has eloquently and courageously defended the Constitution. I thank the Senator for his efforts here today in defense of the Constitution.

Mr. President, I support the pending amendment. For those who have forgotten in this debate what the pending amendment is, let me explain.

The pending amendment to the bill very simply states that Federal courts must remain open to those citizens who wish to litigate their constitutional rights. That is the pending amendment. One might ask, "Why is that the pending amendment?" And I answer that it is the pending amendment because court shipping is the issue before us.

The debate today and yesterday and for the last month has been over the Helms amendment. The Helms amendment, too, is pending. That is the first-degree amendment to the committee substitute.

The Helms amendment has been characterized as a school prayer amendment, but it is not a school prayer amendment. It is not a voluntary prayer amendment. It is not even an amendment which deals with religion. It is a court stripping amendment. That is why the pending amendment, the amendment which declares that Federal courts must remain open to those citizens who wish to litigate their constitutional rights, is before us today.

The real issue before us is whether or not the Senate is willing to set the vicious and pernicious precedent of removing the Supreme Court's power and right to enforce the Constitution. That is the issue before us. The Helms amendment is a court-stripping amendment. That is what it is all about. It is a court-stripping amendment that the Weicker amendment addresses; and the amendment offered by the Senator from Montana is now pending because we are dealing here with the proposed court stripping in the Helms amendment. The ongoing debate is about court stripping.

Today's procedural vote was about court stripping, and I am here because I am concerned about court stripping.

The American Bar Association opposes the pending amendment—that is, the Helms amendment—because it is court stripping. The Attorney General of the United States has not endorsed the Helms amendment because it is court stripping. The President of the United States has not endorsed the Helms amendment because it is court stripping. The President favors the right process, the correct process, to resolve this issue—the constitutional amendment process. The Senator from Montana favors that process. I would be pleased if the Senate would call up the constitutional amendment so that we could fully debate it. That is the process set forth in our Constitution for resolving constitutional issues.

That is why the President submitted the constitutional amendment, and that is why the President of the United States has not endorsed the Helms amendment. He has not endorsed the Helms amendment because the Helms amendment is a court-stripping amendment.

What is involved in this ongoing dialog is an attempt to explain to the American people and to the press that we are not talking about school prayer. We are not talking about religion in our schools. We are talking about court stripping.

When I say court stripping, Mr. President, I mean prohibiting the U.S. Supreme Court from hearing virtually any issue regarding prayer in the public schools.

Someone may well say: "Fine, the issue is court stripping. What difference does that make? Why does this issue deserve any more discussion than, say, a tax bill or an appropriations bill or, for that matter, any other bill before the Senate?"

My response is quite simple. What is being proposed on the Senate floor by the Senator from North Carolina is a totally radical departure from the way we have protected constitutional rights for nearly 200 years in our country's history.

It may seem on its face like a simple, substantive vote on an issue that concerns some constituents—maybe some more than others. But, in effect, if the principle before us is enacted and withstands court challenges, from that moment on, the Supreme Court will be able to protect only those constitutional rights that Congress permits it to protect.

Mr. President, I hope my fellow Senators fully appreciate what that means. I hope the press covering this debate fully appreciate what that means.

What this bill would mean to Americans, to citizens of the United States of America, to all residents of the United States of America, whether citizens or not, is that if this bill passes and is upheld by the courts, Congress would then be free to deny citizens any constitutional right by a simple majority vote.

Congress would be free to take away personal property from individuals without due process of law. Think of that. Think of what a radical departure that is from our form of government—Congress taking personal property away from individual citizens without due process of law.

Congress would be free to authorize searches of individual homes without a search warrant.

Mr. President, unreasonable searches and seizures are prohibited by the fourth amendment, part of the Bill of Rights, one of the reasons our Founding Fathers left continental Europe to come to our country to form a new country, and a new government. They wanted to set up a government where they could be free from unwarranted searches and seizures and to establish a system by which a search warrant would be necessary before the Government could intrude and search one's home.

Congress, would also be free to close down the Nation's press rooms. Think of that. Congress could eliminate the first amendment, one of the most vital and important portions of the Bill of Rights.

And Congress would be free to establish a national religion.

These were the very abuses of Government from which those who founded our country were seeking refuge. These were the abuses they were trying to prevent when they came to our country and framed our Constitution. They established a judicial branch and a Supreme Court to assure that the constitutional protections that they placed in the Constitution would be honored by the other branches of Government.

Mr. President, that is a very, very fundamental point. The framers of the Constitution knew that if citizens of the United States of America are going to enjoy those constitutional protections, that is if they are going to keep those constitutional protections and withstand the whimsical majority that sometimes flames the passions of legislators in the U.S. Congress, they had to set up a judicial branch of government and Supreme Court and other Federal courts to insure that those constitutional rights would be guaranteed to individual citizens.

I am convinced that if the average American knew that the pending amendment before us was a court-stripping amendment, an amendment prohibiting Supreme Court review of a Federal constitutional issue, in this instance school prayer, that American would agree with me that this is not the way to go about responding to an unpopular or inappropriate decision of the U.S. Supreme Court.

If this Helms provision is passed by Congress and upheld as constitutional, each of our constitutional rights would be hanging on the very slenderest of threads.

If freedom of the press in no longer the order of the day, let us pass a statute and get the President to sign it. That is all it would take—and the Supreme Court could no longer enforce the constitutitonal guarantee of freedom of the press.

If freedom of religion is no longer the order of the day, let us pass a statute as the Helms amendment purports to provide, and get the President to

sign it. That is all it would take—and the Supreme Court could no longer enforce the constitutional guarantee of freedom of religion.

If the Government decides that citizens can now have the privacy of their homes invaded by Government officials operating without a warrant, let us pass a statute and get the President to sign it. That is all it would take—and the Supreme Court could no longer enforce the constitutional protection against unwarranted search and seizure.

The pattern is clear. What is being proposed here is a fundamental change in the rules by which constitutional protections are guaranteed. And what is more--this can happen here on the floor of the Senate by simple majority vote. That is all it takes—a majority, 51 percent of those present and voting to undermine, to prohibit, to eliminate a Federal constitutional guarantee.

If the proponents of these measures want us to begin to dismantle the Constitution by simple majority vote, then let them put together a national consensus of two-thirds of the Congress and three-quarters of the States to permanently alter the rules by which constitutional protections are guaranteed.

That is, let them propose a constitutional amendment in the same way that our framers intended for our country to address constitutional changes.

But let us not let them make the kind of fundamental change in our form of government they are seeking by simple majority as this school prayer amendment by the Senator from North Carolina contemplates.

We should keep in mind that this administration has been unwilling to endorse the pending Helms amendment. The President wants to restore voluntary prayer to the schools. You bet he does. He said so in his radio address to the Nation just last Saturday. But he is not advocating that we strip the Supreme Court of its jurisdiction to hear school prayer cases.

Mr. President, I have been addressing the question of the administration position on this pending court-stripping amendment, and, as I indicated earlier, the President himself is not in favor of the pending Helms amendment. In fact, in a radio address to the Nation Saturday he said he favors the constitutional amendment to address the question, but he sidestepped very definitely any support for the pending amendment, that is the Helms amendment.

He wants us to vote on his proposed constitutional amendment, not only because he supports it but because he knows that it is the constitutional amendment process that is the correct way for us to address constitutional decisions of the U.S. Supreme Court.

I challenge the President to speak out and help get the Senate off the track that it is now headed down. I will join with him to have us address the school prayer issue in the context of the constitutional amendment, but I urge him to join me in rejecting the course of attempting to strip the Supreme Court of its jurisdiction over school prayer cases.

While some may disagree with the substance of the President's proposed constitutional amendment, all of us can agree that it is the proper way for addressing the school prayer issue.

As stated today, and as stated yesterday, and I have stated on previous occasions, I believe the amendment process is the proper process in which the Senate can address the question of school prayer. But I am not in favor of prohibiting Supreme Court review over school prayer as proposed by the Senator from North Carolina.

Mr. President, I would also like to make one additional point about the manner in which this amendment is being raised. I do not think this proposal should be before us in the context of a debt limit bill. No issue of such great magnitude as a school prayer issue should be considered as a rider to a money bill of this nature. It should be processed and called up as a freestanding piece of legislation.

Let me make this point clear. We are now considering a debt limit bill, a bill which has to be passed if the Nation is to pay its bills, and here we are today being asked to pass an amendment as a rider to the underlying debt limit bill, stripping the U.S. Supreme Court of jurisidiction over school prayer.

Mr. President, that to me is not the proper way to conduct our business here. Rather we should debate school prayer either in the context of a constitutional amendment or in some other context so that we should air the issue fully and not just bring up the school prayer amendment to the debt limit bill.

Let me point out one other thing. There has not been one single witness to testify on the underlying Helms legislation in the Senate in this Congress or any other Congress. The original Helms proposal is S. 481 and is pending before the Separation of Powers Subcommittee, of which I am a member. That is an important point. Not one single witness has appeared on the underlying Helms legislation that is causing this delay; not one single witness has ever testified before a Senate committee in this Congress or any prior Congress on the Helms amendment.

The chairman of the appropriate subcommittee, the other Senator from North Carolina, Senator EAST, who is a supporter of this proposal, has not had the opportunity of 1 day of hearings on S. 481. I might add S. 481 is essentially the Helms amendment. The subcommittee has not been asked to vote on this amendment and the subcommittee and the full committee have not been asked to have hearings on it as of this date. Rather the entire subcommittee and the committee process has been totally end run. This Helms amendment is here without any serious Senate consideration.

I should also note the other body has had extensive hearings on this proposal in the last Congress. In fact, Mr. President, there is a full volume of hearings before the House Judiciary Committee here on my desk, and I believe it is no small coincidence that the House of Representatives has not favorably responded to court-stripping proposals simply because the House has studied them. The House has held hearings, the House has extensively debated the issue and, in my judgment, that is the reason why the House has not responded favorably to court-stripping proposals.

We in this body have not had any hearings; not one witness has testifed. I believe, Mr. President, perhaps presumptuously, that if the Senate of the United States were to have hearings, if witnesses were called to testify on the underlying Helms amendment, the result would be the same in this body. And the Senate, too, would understand the full import of the court-stripping bills and would not report them favorably.

I might further add that the House opposition to court stripping is bipartisan. Both parties are opposed to court stripping. The House opposition crosses ideological lines, and I believe the depth of sentiment in the Senate against court stripping would be just as bipartisan, would be similar, if the Senate were willing to study the proposal and would permit it to come up through the traditional committee process.

I ask each of my colleagues to assess what is at stake. We can address the school prayer issue, but let us do it in the manner prescribed in our Constitution, through the amendment process. Let us not forsake our Constitution in an effort to cast politically popular votes. To do that is to ignore our obligation to our oath of office to uphold the Constitution. We should not lose sight of that, Mr. President.

Each of us here, each of us in the Senate, took an oath of office to uphold the Constitution of the United States. What is more fundamental in our Constitution than the separation of powers, three branches of Government, coequal branches of Government; checks and balances so that one branch does not have the power to usurp or swallow up the other?

The underlying Helms amendment, which prohibits the Supreme Court from hearing any case involving school prayer, is the first step down the road

to prohibiting Supreme Court jurisdiction over any Federal constitutional issue, any Federal constitutional claim, and that violates the fundamental doctrine of separation of powers, coequal branches of Government, and checks and balances, all of which are written into our Constitution.

If we are to uphold the Constitution of the United States, an oath which we swore, then I think, Mr. President, we should resoundingly reject the Helms amendment because to support the Helms amendment is to obliterate one of the three coequal branches of Government.

I do not think that is what the framers had in mind, and I also do not think that is what the American people would want us to do if they understood the issue before us.

Mr. President, I would now like to read an article which appeared in the Washington Post of May 17 of this year. It is a column that I authored, in which I commend the administration for selecting the route of a constitutional amendment to address the school prayer issue. Let me read that column. As I say, Mr. President, in this column I commend the President. The reason I commend the President is he realizes that the proper way to meet and address the question of school prayer is by amending the Constitution and not by prohibiting the Supreme Court from reviewing issues arising from school prayer claims.

As I said, this article appeared on the op-ed page of the Washington Post on May 17 of this year. The title of the article is "The President Strikes a Blow for the Courts":

[From the Washington Post, May 17, 1982]

THE PRESIDENT STRIKES A BLOW FOR THE COURTS

(By MAX BAUCUS)

President Reagan's recent endorsement of a constitutional amendment that would allow voluntary school prayer has been characterized mainly as a gesture to restless conservatives.

But viewing the president's announcement only as a political story misses much of its significance.

Buried in many reports of the president's statement was the fact that the administration also refused to endorse "New Right" legislation that would strip the federal courts of jurisdiction over school prayer.

By choosing a constitutional amendment, the administration is acknowledging that fundamental constitutional principles must not be sacrificed on the altar of political appeasement.

For three years, some proponents of school prayer have advocated legislation that would strip the Supreme Court and lower federal courts of their jurisdiction to hear school prayer cases.

This bill was seen as a way to address the Supreme Court's 1962-63 school prayer decisions. Such a statute, if passed by a majority of Congress and signed by the president, would free state courts to overturn (or leave alone) previous court rulings on school prayer.

Such legislation presents a radical threat to the Constitution. Since 1803, when the Supreme Court ruled in *Marbury v. Madison*, the court has determined what is constitutional. Unpopular decisions can be overturned if two-thirds of Congress and three-fourths of the states agree to a constitutional amendment, according to Article V of the Constitution.

The court-stripping legislation before Congress would made an end run around this process.

In his analysis of the court-stripping approach, Attorney General William French Smith stated:

"Congress may not . . . consistent with the Constitution, make 'exceptions' to Supreme Court jurisdiction which would intrude upon the core functions of the Supreme Court as an independent and equal branch in our system of separation of powers . . . The integrity of our system of federal law depends upon a single court of last resort having a final say on the resolution of federal questions."

I applaud President Reagan and Attorney General Smith for rejecting the court-stripping approach and endorsing a constitutional amendment.

The administration's position is clear: fundamental constitutional values must take precedence over the interests of single-issue groups, whether from the right or left of the political spectrum.

The Senate soon may be asked to vote on the "Human Life Statute," legislation that would overturn the *Roe v. Wade* abortion decision.

The Reagan administration's analysis of the school prayer issue should be a message to those who support the Human Life Statute. Those in the "New Right" who support the proposed statute should be seeking a constitutional amendment.

There will never be complete agreement on social issues such as abortion, school prayer and busing. But we should agree that Article V of the Constitution provides the framework for us to resolve these public policy disputes.

Mr. President, I would like now to speak more generally on this issue facing us, court stripping.

Mr. President, the issue before us is profound, and I do not use that word lightly. Efforts in the Helms bill are an assault on the independence of one of our three branches of our Federal Government—the Federal judiciary. Recent developments have convinced me that the judicial branch is facing an attack of major proportions:

In April of 1979, the then democratically controlled Senate voted 51 to 40 in favor of an amendment, offered by Senator JESSE HELMS of North Carolina, to a Supreme Court jurisdiction bill. The amendment would have eliminated Supreme Court and lower Federal court jurisdiction over the issue of school prayer. Identical legislation is currently pending on the Senate calendar, that is the bill before us, which is no longer on the calendar but which is one of the pending issues.

Last year, subcommittees of both House and Senate Judiciary Committees held hearings on the overall issue of congressional attempts to limit the Federal courts.

On July 10 of last year, the Separation of Powers Subcommittee of the Senate Judiciary Committee favorably reported legislation that would eliminate lower Federal court jurisdiction in certain abortion cases. Identical legislation is pending on the Senate Calendar.

Last fall, the Separation of Powers and the Constitution Subcommittees reported legislation designed to prevent lower Federal courts from issuing any busing orders. Those bills have been disposed of one way or the other at this point but they are still before us if not in letter, certainly in spirit.

The entire Senate recently completed a prolonged debate on an amendment to the Department of Justice authorization bill which would severely limit those instances in which a Federal court could issue a busing order.

At last count, there are approximately 30 separate pieces of legislation pending in the House and the Senate that would limit the jurisdiction of the Federal courts.

Clearly, the issue of congressional control over the Federal courts is not merely an academic exercise. Rather, the issue may be the single most important item on our Nation's noneconomic agenda in the 1980's. In my view, the outcome of this debate will fundamentally and profoundly determine the status of individual rights and liberties in this country for decades to come.

I might add, Mr. President, that I think the country would rather that we address economic issues than the noneconomic issues—that is, get on with the debt limit bill, do what we can here in the Congress to lower interest rates, lower deficits, lower unemployment, pass legislation that would effectively allow Americans to compete with overseas countries and companies, find some ways to restore some stability to our international monetary system and address the questions that have been facing Americans in the most direct and fundamental areas, the pocketbook issues—jobs, income, inflation, interest rates—rather than devote time on the issue before us which, as we all know, is one that the Congress should not pass because it so adversely alters our form of government.

The framers of our Constitution, I think, 200 years ago designed a judicial branch intentionally to protect the integrity of the Constitution. For example, Mr. President, Alexander Hamilton stated in Federalist Paper No. 78 that it is the duty of the courts "to declare all acts contrary to the manifest tenor of the Constitution void. Without this," he observed, "all reservations of particular rights or privileges would amount to nothing."

Let us dwell on that for a moment. Alexander Hamilton, in Federalist Paper No. 78, stated that it is the duty of the courts—he is then referring to

the Federal courts—"to declare all acts contrary to the manifest tenor of the Constitution void. Without this, all reservations of particular rights or privileges would amount to nothing."

What did he say? He said it was the duty of the Federal courts to examine assaults on the Federal Constitution, the U.S. Constitution, and to declare void all acts which are contrary to the manifest tenor of the Constitution, the essential core of the Constitution, the essential meaning of the Constitution. Without this, all reservations of particular rights or privileges would amount to nothing.

This concept of the judicial branch was reaffirmed and expanded in one of the most celebrated U.S. Supreme Court cases Marbury against Madison. Until recently, the role of the Supreme Court as the final arbiter over the terms of the Constitution has not been seriously challenged, except by the traditional constitutional amendment process.

During the past 200 years on four different occasions, our Nation has responded to controversial Supreme Court decisions by the constitutional amendment process.

Even in the wake of the infamous Dred Scott decision, which held black Americans were not citizens, it was recognized that the proper way to alter that decision was not to have Congress pass a statute prohibiting Supreme Court review. Rather, the proper way was by the constitutional amendment process. And that is just what happened. A constitutional amendment was proposed and passed, adopted.

But today several single issue constituencies have failed to mobilize sufficient support to pass constitutional amendments to overturn constitutional decisions with which they disagree. Instead, they have begun to advocate a series of proposals that would permit Congress, by a mere majority, by a simple statute to overturn Supreme Court decisions. These constituencies would have Congress respond to a court decision it disagreed with by stripping the courts of the power to hear that category of cases.

The proponents of these bills argue that the "exceptions clause" in article III, section 2 of the Constitution provides Congress with the authority to enact these bills.

However, if the framers—that is, our Founding Fathers—were trying to provide a significant legislative check on the judicial branch, it is most unlikely that they would have designed a check like the "exceptions clause." Robert Bork, President Reagan's nominee to the District of Columbia Court of Appeals has commented on this. This is Robert Bork, the person nominated to the Court of Appeals for the District of Columbia by the President of the United States. Here is what he says about the exceptions clause and the meaning of it:

> Literally, that language of the "Exceptions Clause" would seem to allow this result.
>
> That is, allow the Congress by simple statute to except the Supreme Court from certain categories of cases.
>
> I think it does not allow this result because it was not intended as a means of blocking a Supreme Court that had, in Congress' view, done things it should. * * * The reason I think it was not intended is that clearly in the most serious kinds of cases, where the Supreme Court might do something that the Congress regarded as quite improper, the "exceptions clause" would provide no remedy.
>
> For example, if the Supreme Court should undertake to rule upon the constitutionality or the unconstitutionality of a war, and the Congress was quite upset, thinking that is not the Supreme Court's business, as indeed I agree it is not, to use the "exceptions clause" to remove Supreme Court jurisdiction would have the result not of returning power to the Congress but of turning the question over to each of the State court systems. We could not tolerate a situation in which 50 States were deciding through their own judges the constitutionality of a war. * * *
>
> I think the answer is that the Framers would not have devised a check upon the judiciary which does not return power to the Congress but returns power to the State judiciary systems, from which it probably cannot be removed. When one perceives that it is the result, then I think one has to say the Framers did not intend this as that kind of a check upon the Court.
>
> This perspective on the exceptions clause is most instructive. The glaring deficiencies of the clause are an effective retort to the argument that was intended to be used as a significant check on the judicial branch.

Let me just restate what Robert Bork has said. Robert Bork is pointing out very clearly that if the Helms amendment passes, and if Congress does have the authority, by a simple majority, to prohibit Supreme Court review over Federal constitutional issues, the result is this: First of all, individual Americans would no longer have the right to go to Federal courts to protect their constitutional rights.

Second, individual State courts, the highest State courts in each of the various States, would then be left to interpret Federal constitutional rights. That would mean 50 different, 50 separate, 50 overlapping, 50 inconsistent, 50 duplicative decisions respecting a single Federal constitutional right. That certainly, Mr. President, is not what the framers of our Constitution had in mind. They did not intend, as Judge Bork, points out, for each of the 50 States to declare whether or not an act of Congress to declare war is constitutional or not. They did not intend for each of the 50 States, with inconsistent decisions, overlapping decisions, contradictory decisions, to decide whether or not a certain effort violates freedom of speech, freedom of religion, freedom of assembly, the right to bear arms. Our Founding Fathers wrote one Constitution.

It seems to me, Mr. President, that it is clear our Founding Fathers wanted one supreme judiciary, and also wrote into the Constitution a check against that supreme judiciary. That check is the constitutional amendment process where the Congress and the States, by two-thirds and three-fourths majorities, can overturn Supreme Court decisions or alter the Constitution.

Another point is a check on the President. The President has, as the Chief Executive, the right to appoint people he wants to the Supreme Court when vacancies occur. That, too, is a check on the Federal judiciary. There are many others, too. But certainly the Founding Fathers did not want a check so great such as allowing the Congress by a simple majority or a simple statute to overturn the Supreme Court, a check so great that it would swallow up, it would usurp, it would overwhelm one of the three coequal branches of Government.

As we all know, as we learned in civics classes, as we learned in our earliest years when we began to study our form of government, our framers intended a system of checks and balances. Each of the three branches of government would be coequal.

Mr. President, it is clear, so eminently clear, it is so clear I do not know why we are addressing this issue. If the Helms amendment passes, the precedent is set not only for undermining the Supreme Court but also for undermining the Constitution itself and obliterating it so we have only two branches of government left. At that point, the American people will be subject to the whims and majorities our Founding Fathers tried to protect.

Mr. President, I ask unanimous consent that I may yield the floor to the distinguished Senator from New York for the purpose of debate only without losing my right to the floor and without this being considered as an end of a speech for the purpose of the two-speech rule, and that I be re-recognized at the conclusion of the Senator's remarks.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. BAUCUS. Mr. President, before I yield, I want to commend the Senator from New York for his efforts in this regard. He is a stalwart defender of the U.S. Constitution, and I might say, Mr. President, that means a lot to this Senator, as I know it does to each and every American citizen who understands what this matter is all about and how profoundly this underlying amendment will upset individual constitutional rights if adopted.

Mr. MOYNIHAN. If the Senator from Montana could linger here for just a moment before attending to

other matters which will take him away, it is important for all of us in this Chamber who understand the gravity of the matter before us to thank the Senator from Montana and to express our confidence that history will record what possibly the press does not—although I think we have no objection at least to the way in which the press has reported the substance of our argument, which has nothing to do with school prayer but everything to do with protecting the Constitution.

Mr. President, a parliamentary inquiry.

The PRESIDING OFFICER. The Senator will state it.

Mr. MOYNIHAN. A number of distinguished Senators have asked that their comments not be subsumed under the two-speech rule of the Senate when in cloture. It is my understanding that we are not now in cloture and there would be no such applicable limit. Am I wrong in that?

The PRESIDING OFFICER. The two-speech rule, which is to be found in paragraph 1a of rule XIX, applies regardless of whether the Senate is operating in cloture.

Mr. MOYNIHAN. But as long as one subject is under debate. It could be reasonably true if it were a single subject.

The PRESIDING OFFICER. The two-speech rule applies to the pending question.

Mr. MOYNIHAN. In that case, Mr. President, I ask unanimous consent that my remarks not be held subject to that ruling.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. MOYNIHAN. I thank the Chair.

Mr. President, I would like to speak at this point in our debate to the subject of the McCardle decision, ex parte McCardle, to be precise, which was handed down in 1868, and which is frequently and properly cited as the one occasion on which the Court seems to have a knowledge of the possibility that the exceptions clause of article III could be directed at core functions of the Court, the term "core functions" being the term Attorney General Smith used in his statement to us several months ago saying that the exceptions clause could not.

Here I rely extensively and properly on the Committee on Federal Legislation of the Association of the Bar of the City of New York in a study it has made entitled "Jurisdiction-Stripping Proposals in Congress: the Threat to Traditional Constitutional Review."

The committee notes that those who urge that the exceptions clause gives Congress plenary power to divest the Supreme Court of appellate jurisdiction most often cite ex parte McCardle as the leading authority for this view.

I think I would like to be precise in this matter and note that this is done, for example, in Van Alstyne's "General Review of the Appeal at Question," which is the basic text.

The circumstances of the case are ironic in the extreme, if you will accept that term.

In 1867, Mr. William H. McCardle, who was a newspaper editor in Mississippi, had been arrested by the Army pursuant to the Military Reconstruction Act, which had been passed in that same year, 1867, that subjected the South to Federal military command.

Based upon antireconstructionist editorials that McCardle had published, he was charged with libel, with disturbing the peace, with inciting insurrection, and impeding Reconstruction. He petitioned the Federal circuit court for a writ of habeus corpus, challenging the constitutionality of the Military Reconstruction Act under a Habeus Corpus Act passed by the same Reconstruction Congress in 1867.

To repeat and to cite the committee's report, there is some irony. The 1867 Habeus Corpus Act was passed for the purpose of advancing Reconstruction by expanding the Federal courts to release former slaves and others who were being unlawfully held prisoner by the Southern States. But the terms of the statute were not confined to prisoners in State custody. McCardle, as an antireconstructionist, was using it as a device to challenge the very reconstruction that the act was intended to promote.

The circuit court denied McCardle's petition. He appealed to the Supreme Court under a provision of the 1867 act.

Now, the Government moved to dismiss the appeal and the Supreme Court denied the motion. The Government then faced the prospect that the Supreme Court, on reaching the merits, might declare one of the cornerstones of Reconstruction policy to be unconstitutional—to wit, the Military Reconstruction Act. To avert this threat while McCardle's appeal was still pending, Congress—Congress in this Chamber—repealed the provision of the 1867 Habeas Corpus Act that allowed a direct appeal to the Supreme Court.

In light of that repeal, the Supreme Court dismissed McCardle's appeal in a terse opinion, which, as the committee of the New York Bar Association notes, proponents of the current bills rely upon. When you read the opinion, you will see, in fact, how tenuous the proponents' argument really is. The Court says:

> The provision of the act of 1867, affirming the appellate jurisdiction of this court in cases of habeas corpus is expressly repealed. It is hardly possible to imagine a plainer instance of a positive exception.
>
> We are not at liberty—
>
> Said the Court—
>
> to inquire into the motives of the legislature. We can only examine into its power under the Constitution; and the power to make exceptions to the appellate jurisdiction of this court is given by express words.
>
> What, then, is the effect of the repealing act upon the case before us? We cannot be in doubt as to the answer. Without jurisdiction the court cannot proceed at all in any cause. Jurisdiction gives power to declare the law, and when it ceases to exist, the only function remaining to the court is that of announcing the fact and dismissing the cause.

Mr. President, in reading ex parte McCardle, it must be borne in mind that the opinion was written under the most intense pressure imaginable at the peak of radical reconstruction. As one commentary has noted—and recall that the Justices were meeting just down the hall and one floor below us, in that intense atmosphere of radical reconstruction—

> With troops in the streets of the Capitol and the President of the United States on trial before the Senate, a less ideal setting for dispassionate judicial inquiry could hardly be imagined.

Indeed, as Mr. Justice Douglas once observed, "There is a serious question whether the McCardle question could command a majority today."

We do note at the end of that case the statement:

> Counsel seem to have supposed, if effect be given to the repealing act in question, that the whole appellate power of the court, in cases of habeus corpus, is denied. But this is an error—

Said the very Court sitting not 100 yards away with respect to this Chamber in which a President was being impeached:

> This is an error. The Act of 1868 does not except from that jurisdiction any cases but appeals from Circuit Courts under the Act of 1867. It does not affect the jurisdiction which was previously exercised.

Now, what can that mean, Mr. President? It can mean only that the right of the Court to hear habeus corpus appeals, as it had existed prior to 1867, continued unabated during the period that the act of 1867 was in effect.

I repeat, "The Act of 1868 does not except from that jurisdiction any cases but appeals from Circuit Courts under the Act of 1867."

Mr. President, in other words, the Court said you cannot deny the Supreme Court jurisdiction over a whole class of constitutional issues. You cannot do it. The Court said that in 1868, even as it acknowledged the validity—or so it seemed—of a particular act with respect to a particular case and in the context of the most unusual and troubled constitutional crisis of our history.

(Mrs. KASSEBAUM assumed the chair.)

Mr. MOYNIHAN. Madam President, I am happy to see my distinguished and learned friend from Hawaii on the floor. I know he shares many of my views in this matter—our views in this

matter. I share his, he being the senior member of our friendship.

Mr. MATSUNAGA. Madam President, if the Senator from New York will yield——

Mr. MOYNIHAN. I am happy to yield.

Mr. MATSUNAGA. I congratulate him for the most illuminating statement he has been making on the floor. I think by sitting here, or listening to him over the monitor system in the office, one can really learn history. An important thing is that he places such great stress upon the importance of protecting the basic law of this land, the Constitution of the United States.

It is because the Helms prayer amendment would completely violate the basic precepts on which the founders of our country based and wrote the Constitution that I am with the Senator from New York 100 percent. I thank the Senator for yielding.

Mr. MOYNIHAN. Madam President, it is I who wish to be with the Senator from Hawaii in this matter because, as he says, we are not discussing school prayer. Were a Senator to come to this floor propose that the Senate approve an amendment to allow school prayer, send it to the House, and then refer it to the States as provided by the Constitution, I am certain that the Senator from Hawaii would not for a moment object to the procedure—not one bit. He might vote yes. I might vote no, but he would not think the lesser of any Member who voted the other way. We would be following a procedure that George Washington commended to us in his farewell address in our Chamber down the hall.

But this is stripping the Constitution of fundamental elements. It denies the equal and separate power of the Supreme Court as a branch of our Government.

We have been, through all our history, a government of mixed principles as the founders said. They established a principle of majority rule, and it is embodied in the Congress. And then they established the principle of minority rights, and they are embodied in the Supreme Court—equal justice under law, not to the majority but to the last person in this Nation, who may disagree with every other of the 232 million Americans but has the right to do so and can go to the Court and have that right affirmed.

That is what America is about. That is what McCardle was about. The whole effort of Reconstruction was to give rights to people, not to take them away. The Court in the McCardle decision in its very last words—I wish I could have them reproduced in the RECORD to get the feeling of the type face and the paper and the page size—says of the 1868 act, "It does not affect the jurisdiction which was previously exercised."

Whatever power of habeas corpus the Court had previously exercised, it continued to exercise.

Madam President, I observe that the distinguished Senator from Illinois has come to the floor in a matter of urgent business, and I would respectfully request that I may be allowed to yield to him such time as he requires without losing my right to the floor.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. PERCY. Madam President, I thank my distinguished colleague for yielding at this time, without losing his right to the floor.

Mr. MOYNIHAN. Madam President, I amend my request; and without violating the two-speech rule.

The PRESIDING OFFICER. Without objection, it is so ordered.

URGENT NEED TO END RAIL STRIKE

Mr. PERCY. Madam President, I strongly supported the legislation passed by the Senate last night to end the current rail strike, and urge the House of Representatives to act on the emergency legislation today.

Illinois has been hard hit by the strike. At the crossroads of the Nation, Chicago remains—as it has since the beginning of the industrial age—as the hub of the Nation's rail network. In Metropolitan Chicago alone there are 30,000 railroad workers. Many thousand additional workers are employed elsewhere in the State.

According to the last Census of Transportation, railroads in the Chicago area accounted for the shipment of 25 million tons of manufactured goods; more than any other area of the Nation.

Downstate, railroads move both coal and agricultural commodities. We are fast approaching the harvest, and any lengthy delay in restoring rail service would severly injure Illinois farmers and processors, already weakened by historically low farm prices.

Bulk commodities destined for export through the Port of New Orleans or Great Lakes ports should not be delayed.

With predictions of a cold winter, it is important for utilities to begin stocking up on Illinois-basin coal in the event adverse winter weather slows deliveries.

The commerce of Chicago is dependent on good commuter rail service, now disrupted by this strike. Over 100,000 commuters have been forced to experience lengthy delays by seeking alternative modes of transportation.

Commuters have been forced aboard overcrowded Chicago Transit Authority trains and buses. Certain expressways have become clogged with additional automobiles.

Unlike most cities, retailers in Chicago depend on many of their customers arriving by public transportation. Millions of dollars in sales may be lost, as consumers postpone travel to retail shopping areas downtown and in outlying areas.

Amtrak service west of Chicago has been halted, inconveniencing thousands of travelers who have discovered the comfort of new ultra-modern bilevel coaches and sleeping cars. The Chicago Tribune editoralized yesterday that:

> The general harm the strike inflicts is all out of proportion to what the engineers themselves suffer. To the hundreds of thousands of people across the country who had to face an adventure in commuting Monday, the issue that the union walked out over must seem absurd.

Madam President, the unions only have a right to bargain for whatever benefits they can achieve. That bargaining process has been going on for a long time. But when the engineers, making an average salary of $38,000, try to enrich that after 12 unions have agreed in the rail strike, and there is only one union that remains, if they take into account the price that people pay who are out of work or who will be put out of work, they should think twice about it. I certainly commend them for the testimony that they gave that if the House and the Senate do act—and the Senate did promptly act last night—they will go back to work.

A General Motors plant has been closed in St. Louis as a result of the strike. It is estimated that $80 million are lost per day, and we will increase those losses unless we resolve this problem immediately.

I know that members of the Brotherhood of Locomotive Engineers would disagree with the editorial. But with unemployment in my own State at over 11 percent, with many factory workers and miners working shortened weeks, and others anxious about holding on to their jobs, the continuation of this strike is intolerable.

With the average annual wage for engineers at $38,000, as I have said, these serious economic times demand some sacrifice—particularly by those still fortunate enough to hold well-paying jobs.

I am certainly a strong believer in the principle that the best service Government can render to labor-management relations is to stay out of the collective bargaining process, to the greatest extent possible. In this instance, however, the public interest in maintaining a functioning rail system both for the civilian economy and defense purposes is clearly overriding and there is no alternative but for the Government to act swiftly to bring this strike to an immediate end.

The Senate Labor and Human Resources Committee hearing brought out numerous examples of worker lay-

offs. In my own State of Illinois, more than 500 miners near Sesser were furloughed because of a shortage of rail cars at Old Ben coal mine No. 21.

Illinois has been one of the hardest hit by the recession and unemployment—4 of 10 cities in the country with the highest unemployment rates are in my State—and every effort must be made without further delay to assure that no additional injury be done to the State's economy and work force.

I supported the recommendations of the Labor Committee and was pleased to see that my colleagues agreed.

I ask unanimous consent to have printed in the RECORD an editorial from yesterday's Chicago Tribune calling for swift congressional action to end this unjustified strike.

There being no objection, the editorial was ordered to be printed in the RECORD, as follows:

[From the Chicago Tribune, September 21, 1982]

A STRIKE THAT CHOKES THE ECONOMY

If you are fortunate enough to have a job, you probably had trouble getting to it Monday. The railroad engineers have gone on strike during a recession that has put unemployment rates higher than at any time since the Great Depression. The strike threatens to hurt an economy that is making the first steps toward recovery, and that may be the very thing that emboldened the engineers to walk out. The general harm the strike inflicts is all out of proportion to what the engineers themselves suffer.

To the hundreds of thousands of people across the country who had to face an adventure in commuting Monday the issue that the union walked out over must seem absurd. The engineers want to retain the current difference in wages between themselves and all other rail workers. And they are striking now to retain the right to strike later if the railroads offer other workers a pay increase without providing them one that is proportional.

This is the issue on which the engineers are willing to stagger the economy and hassle commuters in order to prevail. But the railroad unions have made themselves a reputation for behaving badly over trifles and antiquities in their contracts. The engineer's timing might be bad, but they are acting completely in character.

Because the engineers truculence threatens to cause such a great problem for the economy and because the rail unions have such a chokehold on the country, the Reagan administration has taken an active role in the negotiations. Because of the negotiating impasse, it has been forced to go to Congress for legislation empowering it to order the engineers back to work.

Congress may very well be in the mood to take strong action against the striking engineers. At a time when unions in most other industries—with the exception, perhaps, of some public employee unions—have been willing to settle for much less than anyone would have expected just a year or so ago, for the engineers to walk out over such a minor point is simply outrageous.

The engineers are betting on the suffering they can cause to the country by their strike, but his may boomerang, just as another strike did when the air controllers defied President Reagan and walked out of the towers. Public sentiment in these hard times is not with those who are willing to imperil everybody just to squeeze a little more money from their employer.

Mr. PERCY. Madam President, I thank my distinguished colleague for yielding to me. I realize that he was engaged in a project of which I have been supportive, and I wish him Godspeed in this effort. I trust that he shall prevail.

Mr. MOYNIHAN. Madam President, I thank my friend from Illinois for his generous remarks.

ORDER FOR REFERRAL OF H.R. 7019 AND H.R. 7072 TO THE COMMITTEE ON APPROPRIATIONS

Mr. BAKER. Mr. President, the request I am about to make has been cleared with the minority leader, I am told, and I now ask unanimous consent that once the Senate receives from the House of Representatives H.R. 7019, the Transportation appropriations bill, and H.R. 7072, the Agriculture appropriations bill, that they be referred to the Committee on Appropriations.

The PRESIDING OFFICER. Without objection, it is so ordered.

TEMPORARY INCREASE IN THE PUBLIC DEBT

The Senate continued with the consideration of the joint resolution.

Mr. MOYNIHAN. This is an important issue. The one and only instance in which the court has expressed an opinion on this issue occurred in 1868, not the most settled moment in the history of this Republic. This if nothing else suggests the singularity of the issue before us now.

These decisions were made while, on the floor of the Senate, a President was being impeached for having done no wrong but, rather, for merely having had a view different from that of a majority. A true constitutional crisis.

It is with some measure of gravity that the president of the American Bar Association last year, addressing himself to the chairmen of the two committees of the Judiciary, said that the issue we debate on this floor today was the most grave constitutional crisis since the Civil War. I will read his comment in order that the record should be precise. The president of the American Bar Association, on behalf of the Bar Association, wrote the Judiciary Committees of Congress to state, "We confront at this very moment the greatest constitutional crisis since the Civil War."

We confront it in an atmosphere different from, but reminiscent of, the extraordinary emotions that swept across this very Chamber in 1868, when a President was on trial, being impeached not for any scintilla of wrongdoing as such but merely for having held wrongful opinions, in the minds of the majority. That great issue of majority rule but minority rights was then settled by one vote in this Chamber—one vote by a man who returned to his home, I think in Kansas, although I do not remember exactly, and never saw a moment of public life again. He saved the Constitution and destroyed his own career.

Madam President, I see my friend, perhaps the most learned of the many distinguished attorneys in this Chamber, the former attorney general of the State of Missouri, who has come to the floor. I am happy to yield to him such time as he may require.

Madam President, with the Senator from Missouri present, I will now desist in my comments on ex parte McCardle, save to note that later in the same year, 1868, the Supreme Court made the distinction even plainer—the distinction it made between the restrictions placed upon it by the act of 1868 and by its previous and plenipotentiary powers.

It said in ex parte Yerger that the Court considered another appeal by another anti-reconstructionist newspaper editor held in military custody under the Military Reconstruction Act. Like McCardle, Yerger was charged with impeding reconstruction. Like McCardle, he petitioned a circuit court for a writ of habeas corpus under the Habeas Corpus Act of 1867. The circuit court denied Yerger's petition, and Yerger sought review by the Supreme Court. But unlike McCardle, Yerger invoked the Supreme Court's appellate jurisdiction under the procedures provided by the Judiciary Act of 1789, not the repealed provision for direct appeals of the Habeas Corpus Act of 1867. The Supreme Court held, over objection by the Government, that it had appellate jurisdiction under the prior law.

That seems to be the compelling conclusion to those unhappy events of 1867.

Madam President, I ask unanimous consent to yield to the distinguished and learned Senator from Missouri, the former attorney general of that great State, without violating the two-speech rule.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. DANFORTH. Madam President, I thank the Senator from New York for yielding to me and for his effusive comments about me.

Mr. MOYNIHAN. My chaste characterization.

Mr. DANFORTH. Madam President, the issue before the Senate is the separation of church and state. That is an issue with a very long history in America. Thomas Jefferson, the author of our Declaration of Independence and of Virginia's Statute of

Religious Freedom, advocated a "wall of separation" between church and state when writing to a Baptist association in rural Connecticut. Now it is argued by some that this wall of separation should be breached.

While there have been repeated efforts to chip away at the wall of separation, it has stood the test of time. Indeed, it has served as a strong foundation of American liberty. Liberty must include the right to worship freely, and worship freely we do. Thousands of churches and scores of denominations across our land testify to that.

The framers of our Constitution were well aware of Europe's long history of intolerance which resulted from the close association of Government and religion. Indeed, it would be little exaggeration to say that the entire history of the Europe our forefathers fled was one of religious persecution and war. This history, with its torrents of blood, was one we Americans were determined not to repeat. The genius of our form of government was to take the energy out of the struggle between church and state by concentrating on the goals of liberty, prosperity, and peace—goals on which all people can agree. Religious sects were neither to be obstructed nor aided by the Federal Government. This is the meaning of the first amendment: "Congress shall make no law respecting an establishment of religion, or prohibiting the free exercise thereof."

The benefits of this separation of government and religion are manifest and manifold. One only has to ponder the religious aspects of the continuing violence in Ireland or the Middle East to realize what a blessing we have inherited.

From our own experience in the Senate we know that the Founding Fathers were right in their concern over divisiveness. Religion, which in doctrine is a reconciling factor, so often acts as a wedge when politicized. Surely this was obvious when school prayer was debated on the floor of the Senate last fall. At least two things were interesting about that debate. The first was that for reasons I do not understand, Senators who took part felt compelled to identify for the Senate their own religious affiliations. It was, to say the least, an unusual spectacle. In the course of that debate, one Senator after another was constrained to tell the Senate that he was a Baptist, or a Lutheran, or a Presbyterian. And the interesting thing was that no one ever asked.

Madam President, this strange phenomenon does not occur when we debate tax bills or defense bills or energy bills. But when Senators debate the question of prayer, suddenly they are no longer Senators from the several States. They are Baptists or Episcopalians or Catholics or Mormons.

The second point of interest about that debate will receive only a brief reference, because I am concerned about opening old wounds. It was the remarkable colloquy then held between the junior Senators from South Carolina and Ohio. Suffice it to say that it was the ugliest exchange I have heard since I have been in the Senate, and ironically, the subject of the exchange was prayer.

The point is surely this. The subject of so-called voluntary prayer has been extremely divisive when debated by mature people in the restrained setting of the U.S. Senate. It would be even more divisive among 10-year-old children in the schoolroom.

It is argued that what is at issue is only voluntary prayer and that there is nothing threatening or devisive about allowing a child to pray on a voluntary basis. I would agree with this conclusion if school prayer were truly voluntary. Indeed, that is the whole point of an amendment I will offer to the Helms amendment if the Senate proceeds that far. Of course a child may pray by volition. Indeed, any child who so desires can today find numerous daily opportunities to offer prayer to God. There is no constitutional or practical way to prevent such prayer. What is at issue today is not voluntary prayer, but rather organized prayer—prayer which would be held at times and places determined by school officials, prayer of a content and form to be determined by school teachers and administrators.

In summary, Madam President, the Helms amendment concerns Government sponsored and supervised prayer for schoolchildren. There is nothing voluntary about it. In the first place, school attendance is compulsory. It is required of all children by statute. A child who wishes not to participate in school sponsored prayer would be compelled to be present at the school by force of law. Second, a child in elementary school feels tremendous pressure not to make a spectacle, but rather to conform. When prayers are being said, few youngsters would have the strength to excuse themselves and to endure the inevitable abuse from other children. Third, I do not think it is possible to devise a prayer which would be voluntarily accepted by all and rejected by none. Prayer that is so general and so diluted as not to offend those of most faiths is not prayer at all. True prayer is robust prayer. It is bold prayer. It is almost by definition sectarian prayer. Yet such geniune prayer would offend children of other faiths.

In considering the issue of school prayer, it is important to examine the first amendment to the Constitution and the deliberations at the time it was adopted. The debates over the first amendment show that the participants largely shared a fundamental assumption: namely, that the freedom of individual conscience and the free exercise of religion should be insisted upon. In fact, the only mention of religion in the U.S. Constitution apart from the first amendment occurs in article VI: "No religious test shall ever be required as a qualification to any officer or public trust under the United States." Contrast this with the Massachusetts constitution of 1780, which declared it to be the duty of the "towns, parishes, precincts and other bodies politic" to support and provide funds for "public worship of God."

Religion, a source of civil war and sectarian strife, of qualifications for enjoying basic civil rights, of revolutions and oppression, was to be kept apart in a separate sphere. The laws of the land were to apply to all citizens, regardless of their religious views. James Madison, who, as a Member of the House of Representatives, was so influential in the shaping of the first amendment, forcefully spoke of the danger religion and Government posed to each other. The Constitution would put away the danger, as he explained it in Federalist No. 10. There, Madison argued that factions pose the most serious danger to liberty. Based on history, Madison believed that religious sects would be sources of factionalism, endangering the liberty of the citizenry as a whole. The religious factions were to be rendered harmless by tolerating a multiplicity of religious sects, thereby dividing their power; this would protect both the sects themselves and liberty as a whole.

Just as it is not the intention of opponents of state-sponsored prayer to downgrade the role of religion, so that was not the intention of Madison. It was James Madison who spoke so persuasively of the positive good done on behalf of religion by the enforced separation of church and state. I refer, of course, to his 1785 "Memorial and Remonstrance" to the General Assembly of the State of Virginia. The Remonstrance is among the fundamental American texts setting out the importance of religious liberty. The Supreme Court has turned to it again and again for guidance about the meaning of the establishment clause. In 1785, Madison found it necessary to oppose the eloquent Patrick Henry, who had introduced a bill in the Virginia General Assembly to establish public support for teachers of religion. In the Remonstrance Madison argued strenuously against the bill, and he ultimately prevailed. But his line of argument against that legislation is unusually instructive in the present debate over school prayer.

Because religious duties have such a high priority in the lives of men, said Madison, religion in our country is left

without secular direction or governmental interference. Therefore even the smallest breach of religious liberty is to be resisted. The public support of religion would enable public officials to use religion politically, thus contaminating the purity of religion. Pious men in Europe struggled for centuries to protect religion from oppression by civil governments. Official support for religion inevitably would mean preferring one sect over another and, thus, would engender violent animosity among the sects. Finally, Madison concluded, because "the equal right of every citizen to the free exercise of his religion according to the dictates of conscience" is a fundamental right, legislatures have no right to abridge it.

The advocates of the Helms amendment point out that several of the States at the time of the adoption of the bill of rights had established churches. That is certainly undeniable. They go on to say that the first amendment prohibits only the establishment of a national church. But that is the utmost oversimplification. The Constitution is the living charter of our Government. It cannot be interpreted only by looking at the circumstances of the time at which particular constitutional language was adopted. Because established state churches existed in 1789 does not mean that the principles embodied in the first amendment were meant forever to support established state churches. This is a point that must be returned to later.

The same dangers Madison feared, animosity among religious sects and the infringement of free conscience, are being promoted by the advocates of state-sponsored prayer in the public schools. Even if we should restrict ourselves to the Judeo-Christian tradition, upon which Bible should prayers be based? The Hebrew Bible? Not for Christians. Even Protestants and Catholics recognize different versions of the Bible.

When Madison was waging the struggle for religious freedom, he enjoyed the strong support of Virginia Baptists. For the Baptists allied with Madison, state interference with religion was "repugnant to the Spirit of the Gospel." I note that over 200 years later Baptists, together with other denominations, have strongly opposed the present attempt to tamper with the separation of church and state.

The "Resolution on Voluntary Prayer in Public Schools" adopted by the Southern Baptist Convention in June 1980 put the issue well.

Whereas, the Supreme Court has not held that it is illegal for any individual to pray or read his or her Bible in public schools,

Be it resolved, That this convention records its opposition to attempts, either by law or other means to circumvent the Supreme Court's decision forbidding government authorized or sponsored religious exercises in public schools, and

Be it further resolved, That we hereby affirm our belief in the right to have voluntary prayer in the public schools.

The Southern Baptist Convention recognized the critical facts that, first, the Supreme Court has not proscribed genuinely voluntary prayer in the schools, and second, circumventing the jurisdiction of the Supreme Court will bring about religious exercises authored or sponsored by Government.

I would be remiss not to point out that the Southern Baptists, in their 1982 convention, altered their previously clear position somewhat. They endorsed the President's proposed constitutional amendment on school prayer. In so doing they stated that the "proposed amendment does not constitute a call for Government-written or Government-mandated prayer."

Unfortunately, I cannot believe that that is the case. As sent to the Congress, the proposed constitutional amendment opens the door to prayers composed by State and local school officials. The separation of church and state as presently understood would be endangered by reestablishing such a practice.

In May of this year, I received a letter from Mr. James Dunn, the executive director of the Baptist Joint Committee on Public Affairs. His letter puts it well. He writes:

All prayer is free and voluntary or it's not prayer. Because the Supreme Court rulings did not ban truly voluntary prayer in schools, the current debate is about what Mr. Justice Stevens calls "compelled ritual."

We hope that you'll not be caught up in an election year tidal wave of cheap political demagoguery. Prayer is too sacred, too intimate, too personal, to be prostituted by government involvement.

After the 1982 Southern Baptist Convention, Mr. Dunn, in a June 24 letter to the editor of the New York Times, wrote the following:

The Baptist Joint Committee on Public Affairs, which has fought constitutional amendments on prayer in schools for nearly 20 years will continue to do battle with those who would turn 200 years of constitutional history on its head. And at the same time it will seek to re-educate its Southern Baptist constituency that government can neither grant nor refuse the right of anyone to prayer.

This agency will also remind lawmakers and Baptists alike that, in the words of the late former president of the Southern Baptist Convention, Dr. George W. Truett of Dallas, "Christ's religion needs no prop of any kind from any worldly source, and to the degree that it is thus supported is a millstone hanged about its neck."

In November 1981, the North Carolina Baptist Convention was explicit in reaffirming its judgment that the current efforts to deny the Federal courts jurisdiction over school prayer cases violate the separation of church and state. The North Carolina Baptist resolution states:

Whereas, there are pending proposed amendments to the Constitution of the United States whose effect would be to authorize state and local governments once again to provide for religious services, to require "voluntary" and/or "nondenominational" prayers, and to determine the content of prayers, the time the prayers are said, and the place where they are said, and

Whereas, there are also bills pending in Congress which would deny to the federal courts jurisdiction over cases involving government sponsored religious exercises in the public schools, and

Whereas, prayer is a personal communication between an individual and God and does not depend on either the permission or sponsorship of government or its agents, and

Whereas, the Supreme Court did not rule out purely voluntary individual prayers in the public schools, and

Whereas, Baptists of America have long struggled for a strict separation of church and state,

Be it therefore resolved, that the North Carolina Baptist State Convention . . . reemphasizes its support of the principles of religious liberty and of the separation of church and state.

Also, earlier this year, I received a letter from Mr. Grady C. Cothen, the president of the Sunday School board of the Southern Baptist Convention, headquartered in Nashville. He enclosed an article he authored in 1980 entitled "The Confusion Concerning Prayer in Public Schools." Commenting on the 1979 Helms amendment that sought to strip jurisdiction over prayer cases from the Federal courts, Mr. Cothen points out the problems that led him to oppose the amendment. If the Federal courts were forbidden to hear such cases, he suggests, control of the entire matter would devolve upon the State legislatures and courts. Statehouses and State courts almost invariably are connected with the majority religions of those States, so that those in a religious minority would have a difficult time seeking relief from the majority religious practices that would be reestablished in the public schools. As he points out, this religious influence might please Baptists in Mississippi or Georgia but frustrate them in Utah, where the dominant influence would be Mormon, or in New Orleans, where it might be Catholic. In short, local governments would be needlessly entangled with religion, making the violation of the rights of minorities all too easy. The surest route to preserve religious liberty, he concludes, is to leave the Federal courts alone. I believe we should heed Mr. Cothen's advice.

In a similar vein, an editorial from the December 3, 1981, Baptist Messenger, the newspaper of Oklahoma Baptists, points out that "the church always has been the primary channel for biblical instruction." The editor puts it well when he argues that:

Christian prayers and readings from the New Testament are offensive to Jews, Mus-

lims and other non-Christians, Nondenominational or interfaith prayers would sound empty and strange to most evangelical Christians. Certain versions of the Bible are offensive to Catholics and others are offensive to fundamentalist Christians. Who is to choose?

The editor believes that voluntary prayer means prayer "free from interference from any other person, especially one who could be considered an authority figure." He continues:

I am uncomfortable at the prospect of any school official or teacher setting a time for Bible reading and prayer, or choosing a passage for Bible reading. As a parent, I don't want someone whose religious beliefs I don't know teaching my children the Bible. That's why I exercise care in choosing a church to attend. I would rather teach the Bible at home and at Church than risk the confusion that can result from some of the cults and strange doctrines being pushed on the pliable minds of children and youth today.

The Messenger editorial worries, as we in the Senate should, about the impressionability of elementary and secondary students. The editor observes:

If adult behavior is determined so much by peer pressure, how much more are children and young people programmed by their peers to think, act, and dress alike. How can we expect him or her to act differently from the majority when he must choose whether to participate in Bible study or prayer.

The Baptists, while often the first of American churches to recognize and oppose dangers to church-state separation, are far from alone. Listen to the formal statements by these other churches:

The Lutheran Church, Missouri Synod:

The Board of Parish Education of the Lutheran Church—Missouri Synod, feels that the . . . (prayer) Amendment fails to recognize fully the religious pluralism of the American scene. We believe that Christians cannot join with non-Christians in addressing God in circumstances that deny Jesus Christ as Savior and Lord. We believe that non-Christians should neither be expected to participate in Christian prayer nor should they expect Christians to join them in prayer that deny Christ.

The concept of voluntary participation in prayer provides either a coercive force or an embarrassing situation for both Christians and non-Christians. Under these circumstances we believe that it is best for the public school not to engage in prayer or other religious worship exercises.—The Board of Parish Education, July 29, 1966.

The Presbyterian Church in the United States:

We hold that the state should not impose religion in any of its expressions upon its citizens. The recent Court decisions overruling state laws requiring Bible reading and the Lord's Prayer are therefore in our judgment theologically sound.—General Assembly, 1964.

The Seventh-day Adventist:

Under the Helms Amendment, which would prohibit the Supreme Court from ruling on the issue or prayer in schools—the very body, it should be noted, that our forefathers determined should survey fidelity to the First Amendment—a Baptist child might be asked to recite a Buddhist prayer in Hawaii, and a Buddhist child might be asked to recite a Christian prayer in Mississippi. Such ought not to be. To call such a prayer "voluntary" is to play not only with words but with the spiritual sensitivities of our children. It would be a travesty of our First Amendment indeed should each state be free to determine what constitutes religious freedom.—June 1980.

The Episcopal Church:

Resolved, That this Executive Council encourages the use of prayer in connection with all aspects of daily life while at the same time strongly opposing all attempts by the state to establish when or how people shall pray, and thus opposing all government legislation which would prescribe means or methods of prayer in public schools or which is designed to encourage local authorities to prescribe such means or methods of prayer.—The Executive Council of the Episcopal Church, 1981.

Many churches, then, are united in their opposition to legislative proposals which would undermine the 1962 and 1963 decisions of the U.S. Supreme Court prohibiting State-sponsored prayer in public school classrooms. Let us turn to these famous decisions. What has the Supreme Court held?

Appreciation of the Supreme Court opinions treating prayer in the schools must begin, of course, with a recognition of why the Federal Government finds itself concerned with actions of local school boards and State legislatures. After all, the first amendment says that "Congress shall make no law respecting an establishment of religion." But after the ratification of the 14th amendment in 1868, the Court found itself compelled to protect the rights guaranteed in the first amendment against State action as well. This application followed from section 1 of the 14th amendment, which reads:

Section 1. All persons born or naturalized in the United States, and subject to the jurisdiction thereof, are citizens of the United States and of the State wherein they reside. No State shall make or enforce any law which shall abridge the privileges or immunities of citizens of the United States; nor shall any State deprive any person of life, liberty, or property without due process of law; nor deny to any person within its jurisdiction the equal protection of the law.

Thus we find the three branches of the Federal Government worrying over what transpires in every school building in every school district of the country. To complain that this task is too burdensome or too instructive on our part does not excuse us from our duty.

In 1962 the Court handed down Engel against Vitale. The case centered on the brief prayer composed by the N.Y. Board of Regents and recommended by them to local school boards for use in morning exercises. The prayer read: "Almighty God, we acknowledge our dependence upon Thee, and we beg Thy blessings upon us, our parents, our teachers, and our country." The use of the prayer was challenged as a violation of the first amendment by Mr. and Mrs. Steven Engel, parents of children in the New Hyde Park, N.Y., public schools. The case began in the State court, with New York's highest court upholding the power of State schools to use the prayer so long as it was voluntary—that is to say, so long as pupils were not compelled to join in the prayer when parents objected. Students who so wished could remain silent or be excused from the room.

The U.S. Supreme Court agreed to hear the case on appeal from the New York courts and in a 6 to 1 decision overruled the previous rulings. In Engel the Court said:

. . . the constitutional prohibition against laws respecting an establishment of religion must at least mean that in this country it is no part of the business of government to compose official prayers for any group of the American people to recite as a part of a religious program carried on by government.

Furthermore, that the Regent's Prayer was considered voluntary by its proponents did not make any difference. In the words of the Court:

. . . The . . . argument . . . that the program . . . does not require all pupils to recite the prayer but permits those who wish to do so to remain silent or be excused from the room, ignores the essential nature of the program's constitutional defects . . . . The Establishment Clause does not depend upon any showing of direct governmental compulsion . . . . When the power, prestige and financial support of government is placed behind a particular religious belief, the indirect coercive pressure upon religious minorities to conform to the prevailing officially approved religion is plain.

The Court made clear in its opinion that its interpretation of the first amendment operates to the benefit of religion. Commenting on the foremost purpose of the first amendment, the Court observed:

It has been argued that to apply the Constitution in such a way as to prohibit State laws respecting an establishment of religious services in public schools is to indicate a hostility toward religion or prayer. Nothing, of course, could be more wrong. The history of man is inseparable from the history of religion. And perhaps it is not too much to say that since the beginning of that history many people have devoutly believed that "more things are wrought by prayer than this world dreams of." It was doubtless largely due to men who believed that there grew up a sentiment that caused men to leave the crosscurrents of officially established state religions and religious persecution in Europe and come to this country filled with the hope that they could find a place in which they could pray when they pleased to the God of their faith in the language they chose.

This last quoted passage from Engel against Vitale is especially significant to today's debate. It would seem at first blush that a vote against the Helms amendment is a vote against religion, and no Senator would want to

be in a position of voting against religion. In fact, however, it is not a vote against religion at all. If it were, Baptists, Lutherans, an other denominations would not oppose the Helms position. On the contrary, opposition to the Helms Amendment, at least in its present form, is opposition to the trivializing of religion and to the coercion of children who take their own religious traditions seriously.

The 1963 decision of the Supreme Court, Abington School District against Schempp, focused on the required reading of verses from the Bible and the recitation of the Lord's Prayer following the reading. Again, the State statute allowed students not to participate or to excuse themselves from the schoolroom. Here the Court, by a vote of 8 to 1, found that the Pennsylvania statute required religious exercises directly in violation of the establishment clause of the first amendment. Citing the previous opinion in Engel, the Court said:

> Nor are these required exercises mitigated by the fact that individual students may absent themselves upon parental request, for that fact furnishes no defense to a claim of unconstitutionality under the establishment clause.

Again, the Court's careful scrutiny of the Pennsylvania prayer requirement reveals that such a regimen is anything but voluntary. The recitation of the Lord's Prayer was required by school officials at the beginning of the day; the observance was a part of the curricular activities of students required to attend school, held in school buildings under the supervision of teachers. Rather than being the setting for voluntary prayer, the Pennsylvania statute was a veritable recipe for compulsion.

To repeat, the main focus of the Court in both Engel and Abington was the prohibition of State sponsorship of religion or religious exercises. In Abington the Court found the establishment clause forbids State actions which either advance or inhibit religion:

> . . . to withstand the strictures of the Establishment Clause there must be a secular legislative purpose and a primary effect that neither advances nor inhibits religion. 374 U.S. 203, 222 (1963)

In a concurring opinon in Abington, Justice Brennan addressed the changes in the United States since 1789. The opinion is important for the argument over the meaning of the words of the first amendment. At the time the Bill of Rights was ratified, established State churches were in existence. This leads some supporters of the Helms amendment to say that the first amendment was meant only to forbid the establishment of a national church. In answer to this argument, Justice Brennan in Abington replies:

> A too literal quest for the advice of the Founding Fathers upon the issues of these cases seems to me futile and misdirected. . .

I do not denigrate the need to try to recover the original meaning of the words of the first amendment. But I do believe that life in our democratic land is in constant flux. The great genius of our Constitution is that it can encompass these changes. Consider the fact that the United States of 1789 was a land of 13 States, almost exclusively agrarian, with a population of only 3 million.

Justice Brennan sets out four reasons why the first amendment needs to be seen in a larger context than the one urged on us by advocates of the Helms amendment. First, the debate in the first Congress on the establishment clause is ambiguous at best. That debate gives guidance but not definitive guidance. Madison himself preferred an absolute separation of church and state, as demonstrated by his struggles in Virginia and by his "Memorial and Remonstrance," which I already mentioned. As Brennan says:

> If the framers of the Amendment meant to prohibit Congress merely from the establishment of a "church" one may properly wonder why they didn't so state. That the words church and religion were regarded as synonymous seems highly improbable.

Second, at the time of the founding, public schools were practically nonexistent. Education for the most part was confined to private, sectarian schools. Therefore, the authors of the first amendment obviously do not speak to the practice of prayer in the public schools. A later Supreme Court had to face the question. Third, our country is much more religiously diverse today than in 1789. No exception can be taken to this fact. Primarily Protestant in character in the late 18th century, the United States is more and more an amalgam of faiths. The fourth of Justice Brennan's reasons is that the development of free public education was spurred by that religious diversity. In his words:

> It is implicit in the history and character of American public education that the public schools serve a uniquely public function: the training of American citizens in an atmosphere free of parochial, divisive, or separatist influence of any sort—an atmosphere in which children may assimilate a heritage common to all American groups and religions.

The absence of religion from the public school classroom is therefore a protection both for the common heritage that every schoolchild shares and for the numerous religious beliefs held by our children.

Now let me return to the Supreme Court's decisions subsequent to Abington. Following the Court's landmark decision in the early sixties, lower Federal courts and State courts began applying the principles laid down to a number of different situations. The Supreme Court itself has not comprehensively addressed the question of prayer in elementary and secondary public schools since that time. Nevertheless, on several occasions the Court has denied certiorari or declined to review the lower court's decisions. We are then left to conclude that the lower court decisions have correctly interpreted the mandate of Engel and Abington.

While I think it unnecessary to go through each of these cases, I do wish to remark on their general character. Arising out of the States of Florida, New Jersey, Massachusetts, Illinois, New York, and Texas, each decision turned finally on the question of State sponsorship. In each case, the State's purported effort to achieve voluntariness was not sufficient to pass the tests required by the establishment clause. In several of these cases, required Bible reading and unison prayers were involved. In several, school officials were directed to organize devotional periods on school property. In one of the most recent instances, school officials in Guilderland, N.Y., would have been required to supervise student-initiated devotional activities on school property.

In emphasizing what is constitutionally prohibited, let us not overlook what the first amendment does allow. Thirty years ago the Supreme Court ruled that the wall of separation was not breached by public schools permitting children so desiring to leave the school premises during the day for religious instruction or worship. Such arrangements continue to operate across the country. Also, a period for silent meditation is a practice that has been recognized repeatedly. Although the Supreme Court has never expressly addressed silent meditation, Justice Brennan's concurring opinion in Abington indicates his belief that "reverent silence" could not jeopardize "either the religious liberties of any members of the community or the proper degree of separation between the sphere of religion and government."

Now, let us pause and consider again what the Senate's advocates of prayer in the public schools would actually bring about.

Earlier in this debate I asked the Senator from North Carolina whether he would object to a public schoolteacher, who happens to be a devout Roman Catholic, putting up the text of the Hail Mary on the blackboard and announcing to her students that they would now voluntarily recite the prayer. He replied, in effect, that it would not bother him in the least if his grandchildren were in that class. Yet I suspect that many people would have difficulty sharing the Senator's enthusiasm for this situation.

Or consider the Jewish child from an orthodox household in an elementary school classroom where the Lord's Prayer is recited daily. Even if the child may remain silent or be ex-

cused from the room, imagine what a spectacle is made and what potential there is for abuse from the other children. The Jewish children in such a setting are immediately divided from their fellow students, and to what end? The Lord's Prayer is not voluntary to them. And, in the truest sense, it is not a voluntary prayer at all. It is not a prayer literally arising from the will of the individual student. It is, instead, a prescribed form of prayer, to be delivered at a time and place specified by Government officials.

What about the public high school student from a devout Christian family who finds himself in a class where a strictly nondenominational prayer is recited at the beginning of the day, a prayer that makes no mention of Jesus Christ? If the student believes that prayer is to be offered through the mediation of Christ, then such an exercise, repeated every day of the school year, would not be true prayer to that student. To him it would be a mockery of prayer.

What of the devout Roman Catholic student in a public junior high? Here is a student whose religious training has taught him to believe in the hierarchy of bishops and priest headed by the Pope in Rome, whose authority descends from the apostle Peter. To such a student a highly individualistic prayer suggested by a Protestant teacher and removed from the body of Catholic doctrine would be foreign to the child's religious tradition.

By these examples I am trying to illustrate the plain truth that prayer, by its very nature, must recognize theological difference. Prayer must, in the words of a priest, "respect the Jewish reverence for God the Father, it must recognize the Christian belief in the Trinity, and it must see the need for Christian Catholics to include the Trinity, Mary and the saints." No single prayer can achieve these ends without offending many devout people. No lowest common denominator of prayer can achieve these ends without offending all devout people.

(Mr. ABDNOR assumed the chair.)

Mr. DANFORTH. The Statistical Abstract lists about 90 religious bodies in this country with more than 50,000 members each. One of those is the Buddhists. Imagine a recently arrived Vietnamese child who is a Buddhist, a fourth grader, in a classroom of students who were raised in the Judeo-Christian tradition. That child is guaranteed his religious rights under the Constitution as much as any child. A refusal to join prayers led or, at any rate, supervised by school officials would surely result in embarrassment for this child, and I cannot conceive that such embarrassment would serve the purpose of either religion or America.

There are other examples along this line. The Muslim population of the United States is increasing. For Muslim, a follower of Islam, prayer involves a detailed ritual of turning to Mecca and prostrating oneself. The prayer itself is a simple adoration of Allah, and does not involve requests or any asking of a blessing, as most Christian prayers by contrast do.

As these hypothetical situations illustrate—and it would not be difficult to multiply them—the United States is more and more a religiously diverse Nation. The free exercise of religion is a guarantee to all citizens of all faiths. The suggestion that a period for voluntary prayer would bring religion into public schools raises the question: What is sufficient to pass for religion? For those within a religious tradition, it simply is not true that one prayer is as good as any other. Prayer arises from the content of the faith, and it is the job of the churches, not the Government, to describe what that content is. Any thought that the form of prayer is of no matter to the various denominations should be put to rest by considering the enormous controversies triggered by recent liturgical reform in the Roman Catholic and Episcopal Churches.

In addition to the wording of prayer, the time and place of public worship is of great concern to religious denominations. The time of worship; for example, the Sabbath, the Day of Resurrection, and days of obligation. And the place—its religious art and architecture—both point to the content of the underlying faith. No denomination would be willing to delegate the organization of public worship to a school board, and it is unlikely that any worship organized by a school board would bear any relationship to religion.

In a time of weakened public values, it is not surprising that many Americans are hoping that religion will save the day. This is perfectly appropriate and understandable. But the real question is whether the sort of prayer contemplated for public schools is authentic religion, rooted in tradition and practiced in all its richness, or whether it only bears the label of religion affixed to it by well-meaning politicians.

The point I am stressing is not lost on some of the key supporters of the Helms prayer amendment. Jerry Falwell, the founder of the Moral Majority, knows the difficulty of asking men and women of diverse faiths to join in prayer. In a meeting with the Religious Newswriters Association in New Orleans, Mr. Falwell is quoted as observing that:

> If we ever opened a Moral Majority meeting with prayer, silent or otherwise, we would disintegrate.

Pressed for an explanation of this remark, Mr. Cal Thomas, director of communications for the Moral Majority said, according to the New York Times, that meetings of the organization were not opened with prayer because it is a political organization that includes Jews, Catholics, Mormons, Protestants, and even "nonreligious" members. Mr. Thomas put it well when he asked: "What kind of prayer would we use?"

Now I ask the Senate: If Mr. Falwell and Mr. Thomas understand the divisiveness of questions over prayer in the context of Moral Majority meetings, how could they possibly miss the same point when the question over prayer in public school classrooms arises? Mr. Thomas says that prayers are not said at meetings of the Moral Majority because it is a "political organization" rather than a religious one. Then what would Mr. Falwell and Mr. Thomas consider a room full of public school children to be? The children of the various religious faiths in this Nation's public schools would feel the same unease and disquiet over prayer that adult members of the Moral Majority would were prayer to open their meetings. Perhaps Mr. Falwell thinks that young children do not have the same sensibilities that adults do on questions of religion. To some extent a difference in sensibility is obvious. But it is just as obvious that children are even less understanding of differences between them than are adults. As I observed earlier, even in the restrained setting of the U.S. Senate, Senators cannot refrain from referring, in offensive terms, to the religious faith of other Senators. Imagine the scenes we can expect in public school classrooms.

The advocates of State-sponsored school prayer betray, it seems to me, a view that the churches, the church schools, and the homes of our land, can no longer do the important work of promoting religious faith, can no longer bring to the content and conduct of our children's lives the moral framework of religion. It is as though we are told that religion is too important to be left to the church and the home, and that here too, there must be a role for Government. I do not share this lack of confidence in church and home, nor do I share the view that urges Government to enter every aspect of American life. The home and the church and the private church school are precisely the places where attentive, reverent, and humble prayer can be practiced, where religion can be embraced in its fullness.

During the course of last autumn's debate on this bill, the senior Senator from North Carolina asked me if I could think of any circumstance when prayer could do a student any harm. At the time of that question, I was not sufficiently quick to come up with an example. Soon thereafter, however, examples came readily to mind. Now, I would like the Senate to consider one of my concerns before voting on the Helms amendment.

In recent years, a phenomenon has developed in America. A number of cults, purporting to be religious, have sprung up throughout the country. These cults have included the Scientologists, and Hare Krishnas, and the group known as the Moonies. Much of the work of these cults has been aimed at winning converts from the ranks of younger people, luring them away from the influence of their families and from the religious traditions in which they were raised. It is reported that the methods used by the cults in the conversion of young people are carefully developed and involve a highly sophisticated use of psychology. The young people are said to be brainwashed, or by some descriptions, turned into zombies.

Cultists have made concerted efforts to pursue their causes. Visitors to many airports can attest to the cultists' determination and to their commitment to follow the course laid out for them. Suppose that the strategy of the cultists involved not peddling in airports but teaching in schools. A cult might easily reason that teachers have a profound influence on the way children think, and that, through the insertion of religion in the classroom, a child could be converted to the cult.

In the event that cultists otherwise are qualified to teach in public schools, they could not, under the Constitution, be excluded by reason of their religious affiliation. Therefore, if a concerted effort were made by, say, Scientologists, to train their members for teaching and to place them in public schools, school boards could not exclude them on the basis of religion. They would have the same right to employment in public schools as Protestants, Catholics, and Jews.

The sole protection that now exists against the use of the schools by the cults is that whatever religious affiliation teachers may have, they may not now use the classroom as a place to practice religion. If Scientologists were to gain employment in our public schools, they would be compelled to maintain strict separation between religious and classroom activities.

Mr. President, let us suppose that the Helms amendment were adopted in its present form. The cultist teacher could then invite the class to observe a voluntary period of prayer. If the teacher is trained in sophisticated psychological methods of indoctrinating children, one wonders how long voluntary prayer would remain voluntary. In any event, the practices of the teacher could be easily fashioned to escape the reach of the courts.

We think of the practice of religion as benign, and it usually is. But one need only review history from the crusades and the inquisition through the burning of witches at Salem, from the pogroms to Jonestown, to discover that there are many perverse exceptions to the rule. The Constitution was written with the exceptional circumstances in mind. My concern is simply this: If Congress were to restrict the courts in school prayer cases, the classroom could be used by malevolent forces as a place to alter the minds of children, and the courts would not interfere.

The amendment to the debt limit bill before us would strip jurisdiction over prayer cases from the Federal courts. There is a wide divergence of opinion over the constitutionality of the Helms amendment. But I will leave that argument to others. I want to emphasize that it would be unwise to do so even if Congress has the power. Religious belief and its protection by the Constitution is not something with which to tamper lightly. The Federal courts have been a bulwark against the corruption of religion by politics, and against the domination of one religion over others. The effort of the Helms amendment to weaken that bulwark should be resisted.

In light of that fact, if the Senate proceeds to vote on the Helm amendment, I shall offer an amendment to define voluntary prayer. It is straightforward:

The term "voluntary prayer" shall not include any prayer composed, prescribed, directed, supervised, or organized by an official or employee of a State or local government agency, including public school principals and teachers.

The purpose of my amendment would be to assure that any prayers allowed in the public schools are truly voluntary, free of coercion, overt or subtle, from school teachers or school officials. The purpose of this amendment, in other words, would be to make clear that the Senate takes religious freedom seriously, that the Senate does not accept the concept of State-sponsored school prayer. My amendment should be supported by those Senators who want to go on the record for voluntary prayer. I believe my amendment would be compatible with the interpretation of the first amendment and its establishment clause put forward by the Supreme Court. By adopting my amendment, the Senate would resist the efforts of those who wish to authorize State-sponsored school prayer.

I urge the Senate, in the name of religious liberty and constitutional principle, to resist a blatant attempt to violate the great principle of separation of church and state. We must uphold the time-honored tradition that promotes the free exercise of religion and that keeps that hand of Government from abusing the freedom of conscience. Our Nation needs to hold steady to the course of religious toleration, to the principles of government established by our forefathers, and perpetuated and extended to the present hour. Let us turn away from the divisiveness and ugliness of spirit sure to befall us should our resistance fail.

In voting on this question, it falls to our part, I believe, to affirm the wisdom of centuries as against the passions of a season. It is our obligation to affirm the scope of religious liberty marked out by the Constitution. It is our obligation to the children of every faith to preserve the guarantee of religious liberty extended by the first amendment.

Mr. President, the floor was yielded to me by the Senator from New York, who asked unanimous consent that the yielding of the floor not be considered to violate the two-speech rule. I in turn yield the floor with the same unanimous-consent request.

The PRESIDING OFFICER. Without objection, it is so ordered.

AN APPEAL FOR PEACE

Mr. CRANSTON. Mr. President, earlier today my office delivered the following letter to Israeli Prime Minister Menachem Begin to the Israeli Embassy in Washington:

DEAR MR. PRIME MINISTER: For almost two generations, my country has joined with yours to build an Israel which can provide its people with increasing opportunities for human fulfillment within peaceful borders, and to work for a peace and a stability in the Middle East that will benefit your people, our people, all people.

This history does not permit Americans to direct Israel's actions. However, our share in the chronicle of your country does entitle us to be known as your friend. And the truest mark of friendship is not flattery or unquestioning support, but honest counsel. Indeed, it would be a betrayal of friendship to conceal criticism of actions we think likely to defeat the goals we have shared for so long.

As you well know, the State of Israel has no stronger supporter in the U.S. Congress than I.

Repeatedly through the years, during both Democratic and Republican Administrations, I have helped lead battles in the U.S. Senate to defend the mutual interests of our two countries, to augment Israel's strength and security, and to oppose the enhancement of the military power of Arab nations hostile to Israel.

I do not doubt that the root cause of all the violence in the Middle East lies in the Arab holy war against Israel, lies in the refusal of so many Arab nations to recognize the right of Israel to exist and in their refusal to make peace with her, and lies in PLO terrorism.

I do not believe that the United States would sit idly by if Cuban forces defied one of our neighbors and massed thousands of armed guerrillas on one of our borders, commenced transforming them into military units replete with increasing supplies of Soviet equipment, including tanks, rockets, and artillery, and proceeded to wound and kill Americans in terrorist attacks launched across our border upon our communities and our citizens.

After all, we sent U.S. trained forces into hostile action at the Bay of Pigs, and we risked a nuclear confrontation because of our concern over military developments in

Cuba—an island 90 miles off our shore—that we considered a threat to our national security.

Even now, every Soviet infant, child, woman, and man is targeted by American nuclear missiles. They are held hostage, threatened with instant death if those who rule the Soviet Union attack us or our allies. And every American, in turn, is targeted and held hostage by Soviet nuclear weapons. Indeed, every human on God's earth is held in thrall by this threat of the holocaust of all holocausts, one that would consume Jew and Gentile alike, one that would not discriminate between faiths and races. There is no longer any exodus to a place which cannot be reached by the missiles of man. Until the United States moves with more resolution, determination and creativity than we are now displaying to terminate this threat to each and all of us, our own hands are not clean.

Isreal is not alone in its use of military force to defend its perceived interests. There is a terrible global drift toward war. Violence is endemic in the world.

The U.S. has itself resorted to force to advance its perceived interests. In Vietnam, we too suffered the harsh consequences of overestimating the utility of force. We learned in Vietnam that violence begets violence; that expanding force has an impulse of its own, beyond the control of those who sit in government offices; that the unleashed beast of brutality cannot separate the innocent and the helpless from the armored enemy.

I did not condemn Israel's initial move into Lebanon for the avowed purpose of protecting Israeli citizens against repeated PLO attacks launched from that country.

And I refrained, despite deep misgivings, from commenting publicly on your siege of Beirut and your entry into its western section. I am reluctant to criticize a treasured friend and ally—especially when that friend and ally is in the midst of a military struggle.

But the massacre of hundreds of men, women and children is another matter. It will be some time before we accurately know who was to blame for the massacre. We may never know.

The question of responsibility is easier to answer. By moving Israeli forces into West Beirut for your declared purpose of restoring stability and preventing bloodshed, your government took on certain responsibilities.

You assumed responsibility for preserving order and protecting human life in Beirut—in this you failed.

Mr. Prime Minister, the recent behavior of your military forces in Beirut is causing deep concern and expressions of outrage among many of Israel's friends. This concern threatens to erode support for Israel in the United States and among the American people. As a matter of conscience, I, too, must now speak out.

I am troubled by the methods you are employing for the apparent purpose of controlling the destiny of Lebanon. To critics and friends of Israel alike, it increasingly appears that you and General Sharon have substituted naked military force for a balanced foreign policy which should reflect a decent respect for the opinion of mankind.

Moreover, however justified your original goals, the horror of Lebanon is now harming the security of Israel. It is repelling your friends and strengthening your enemies. In Biblical times, a handful of the righteous could stand against the world. In our more secular times, however, no country can stand alone, or with but a handful of allies. How can Israel think to increase its safety through self-inflicted isolation?

The people of Israel have always been known for their deeply ingrained reverence for human life and for the dignity of the individual, a reverence born of the great historical suffering of the Jewish people. Lesser nations have allowed war to harden them, and have permitted prolonged war to erode their reverence for justice, no matter how virtuous their cause may have been.

But Israel was born out of centuries of hope and struggle and an eternity of faith. It is my hope and my prayer that this faith and reverence can now manifest itself in courageous initiatives to help bring peace to Lebanon and then to provide an enduring solution for the West Bank and Gaza.

I believe that Israel should take the following initiatives:

1. I urge your government to withdraw Israeli forces from Beirut immediately upon arrival of the multinational forces who are to assist the Lebanese Army in assuming security responsibilities.

2. I urge your government to cooperate in achieving the swift withdrawal of all foreign forces from Lebanon—Syrian, PLO, and Israeli. And I urge that your government exercise the utmost restraint in the use of your superior military strength against Syrian and PLO forces still in Lebanon until such an agreement is reached.

3. I urge your government to return to Israel's traditional concern over only immediate threats to its own borders and that your government abandon its reliance on military force for the solution of essentially diplomatic problems.

4. Finally, though I myself have reservations about elements of President Reagan's proposed peace plan, I urge your government to reconsider promptly its outright, precipitous rejection of his entire proposal.

Perhaps the most somber consequence of the current strife in Lebanon is the dimming of the inspiring moral beacon which has shone so brightly from beleaguered Israel.

Some day the turmoil and the killing in Lebanon must end. Israel will still be surrounded by hostile neighbors. Will you then be more secure if you have dissipated the moral strength which armed your people and enlisted your friends?

A bold vision of peace and reconciliation is essential in the days ahead if we are to leave a safer world for our children.

Yours in peace,

ALAN CRANSTON.

Mr. BAKER. Mr. President, if the Senator will yield to me without losing his right to the floor, I would like to make one announcement.

Mr. DANFORTH. Yes, Mr. President.

ORDER FOR RECESS UNTIL 10 A.M. TOMORROW

Mr. BAKER. Mr. President, I ask unanimous consent that when the Senate completes its business today, it stand in recess until the hour of 10 a.m. tomorrow.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. BAKER. Mr. President, it is anticipated that shortly after 10:30 a.m., tomorrow after the recognition of the two leaders under the standing order and any special orders, we shall resume the consideration of the unfinished business. A cloture vote is scheduled for noon tomorrow under the provisions of rule XXII.

Mr. WEICKER. Will the Senator yield for a question?

Mr. BAKER. Yes.

Mr. WEICKER. Will the Senator include in that request a recognition of this Senator upon resumption of House Joint Resolution 520?

Mr. BAKER. I am inclined to think there will be an objection to that, Mr. President.

Mr. HELMS. Will the Senator yield to me with his right to the floor protected?

Mr. WEICKER. Yes.

Mr. HELMS. Mr. President, I have not objected for days on end to the repeated request that various Senators be accorded the right to the floor undisputed. This has served to discourage some of us who might want to speak on the other side of this issue. I hope that my friend from Connecticut will understand the friendliness with which I say I think we ought to put the recognition up for grabs, so to speak. Or, if he wishes recognition, he may have it provided he accords me, say, no more than 15 minutes, including in the request that he will regain the right, or something like that. I hate to be foreclosed.

Mr. WEICKER. To my good friend from North Carolina, let me say that is exactly what I did this morning with his colleague from North Carolina (Mr. EAST). I would be happy to give him 15 minutes or whatever time. The point is not to foreclose the Senator from North Carolina from being able to expose his point of view. I would be happy to concede whatever time the Senator from North Carolina wants for himself or whatever Senator wishes to speak to his point of view.

Mr. HELMS. Just so it is recognized that the Senator from North Carolina or Alabama or whoever may wish to speak has that right.

Mr. WEICKER. I think the Senator should know that this morning, in order to do exactly what the Senator intends, I had a schedule laid out for those who wanted to speak on my side of the issue. I dumped it the moment the Senator from North Carolina (Mr. EAST) came to the floor.

Mr. HELMS. The Senator is always graciously kind, and I appreciate his doing that this morning.

I will ask the distinguished majority leader, under those conditions, if I may be recognized for no more than 15 minutes tomorrow morning.

Mr. WEICKER. Whatever the Senator desires.

Mr. HELMS. Very well.

Mr. BAKER. I am not sure that is left to me, Mr. President. I believe I understand now that there will be no objection to a unanimous-consent request that when we resume consider-

ation of the unfinished business the Senator from Connecticut will be recognized, but at his request sometime during the morning the Senator from North Carolina would be recognized.

Mr. WEICKER. Any time for whatever period of time.

Mr. BAKER. Mr. President, I think the best way is to have no agreement at all if the parties are in agreement themselves.

Mr. HELMS. Mr. President, if the Senator will yield, the relationship of Senators is such that we do not really need to lock this in because the word of the Senator from Connecticut is certainly good enough for me. Having that understanding with him, informal as it is, I will certainly agree to his recognition.

Mr. BAKER. I thank the Senator.

Ali right, Mr. President, as I say, I am prepared to do the wrapup as soon as we put the Senate in morning business, but I express my gratitude to the Senator for permitting me to make this announcement at this time. I believe consent has already been granted that no interruption will appear in his presentation, is that correct?

The PRESIDING OFFICER. The Senator is correct.

Mr. BAKER. I thank the Chair.

Mr. President, I yield.

Mr. WEICKER. Mr. President. I commend the distinguished Senator from Missouri, who is certainly one of the great Members of this Chamber in terms of his contributions to it and to the Nation. Also, if this is not known by all who have heard his words, I believe he is an ordained minister in the Episcopal faith, my faith.

I know that the words he has spoken here this afternoon will go down in the annals of this Nation as being astute and feeling and courageous. He has brought a sense of history, a sense of love, and a sense of duty to the argument against the amendment before this body.

I want to tell him that I was very moved by his words, and I am sure that many other people over the ages will be reading these comments.

Mr. President, it is my understanding that the majority leader cares to bring matters to a close for the day. I am more than glad to continue to address the subject before this body.

I ask unanimous consent that I be permitted to put in a call for a quorum, without losing my right to the floor, and that I be rerecognized at the conclusion of said quorum call or at the time that the order for the quorum call is rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. WEICKER. Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The bill clerk proceeded to call the roll.

Mr. BAKER. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

ORDER FOR THE RECOGNITION OF SENATOR CHILES ON TOMORROW

Mr. BAKER. Mr. President, I ask unanimous consent that on tomorrow after the recognition of the two leaders under the standing order the Senator from Florida (Mr. CHILES) be recognized on special order of not to exceed 15 minutes.

The PRESIDING OFFICER. Without objection, it is so ordered.

ROUTINE MORNING BUSINESS

Mr. BAKER. Mr. President, I ask unanimous consent that there now be a brief period for the transaction of routine morning business to extend not past the hour of 5 p.m. today in which Senators may speak.

The PRESIDING OFFICER. Without objection, it is so ordered.

ORDER HOLDING H.R. 7065 AT THE DESK

Mr. BAKER. Mr. President, there is at the desk I believe a bill from the House of Representatives H.R. 7065 a bill to amend the Community Services Block Grant Act to clarify the authority of the Secretary of Health and Human Services to designate community action agencies for certain community action programs administered by the Secretary for fiscal year 1982, and for other purposes; is that correct?

The PRESIDING OFFICER. The Senator is correct.

Mr. BAKER. Mr. President, I ask unanimous consent that that measure be held at the desk until the close of business on Thursday, September 23.

The PRESIDING OFFICER. Without objection, it is so ordered.

DIRECTION TO SENATE LEGAL COUNSEL

Mr. BAKER. Mr. President, there is another matter that I believe has been cleared on the other side, a resolution dealing with direction of the Senate legal counsel. I send the resolution to the desk and ask for its immediate consideration.

The PRESIDING OFFICER. The resolution will be stated by title.

The assistant legislative clerk read as follows:

A resolution (S. Res. 477) to direct the Senate Legal Counsel to represent Senate parties in *W. Henson Moore, et al.* v. *The United States House of Representatives, et al.* and in *Ron Paul* v. *The United States of America, et al.*, Civil Action Nos. 82-2318 and 82-2353, respectively.

The PRESIDING OFFICER. Is there objection to the present consideration of the resolution?

There being no objection, the Senate proceeded to consider the resolution.

Mr. BAKER. Mr. President, on August 19, of this year, the Senate and the House passed H.R. 4961, the Tax Equity and Fiscal Responsibility Act of 1982. The President signed the bill into law on September 3, as Public Law 97-248. Two lawsuits have been brought by Members of the House of Representatives in the U.S. District Court for the District of Columbia seeking a declaratory judgment that passage of H.R. 4961 by the Houses was in controvention of article I, section 7, clause 1 of the Constitution and that the Tax Equity and Fiscal Responsibility Act of 1982 is null and void.

The complaints name the U.S. Senate, the President of the Senate, and the Secretary of the Senate as defendants.

The following resolution would direct the Senate legal counsel to defend the Senate parties in these cases.

The PRESIDING OFFICER. The question is on agreeing to the resolution.

The resolution (S. Res. 477) was agreed to.

The preamble was agreed to.

The resolution, with its preamble, reads as follows:

S. RES. 477

Whereas, in the cases of *W. Henson Moore et al.* v. *The United States House of Representatives, et al.* and *Ron Paul* v. *The United States of America*, Civil Action Nos. 82-2318 and 82-2352, respectively, pending in the United States District Court for the District of Columbia, the constitutionality of the Tax Equity and Fiscal Responsibility Act of 1982, Public Law 97-248, has been challenged as having been enacted in violation of Article I, Section 7, Clause 1 of the United States Constitution;

Whereas, the complaints in these actions name the United States Senate, the Honorable George Herbert Walker Bush, in his capacity as President of the Senate, and William F. Hildenbrand, Secretary of the Senate, as parties defendants;

Whereas, pursuant to section 703(a) and 704(a) of the Ethics in Government Act of 1978, 2 U.S.C. §§ 288b(a) and 288c(a) (Supp. IV 1980), the Senate may direct its counsel to defend the Senate, its members and officers, in civil actions relating to their official responsibilities: Now, therefore, be it

Resolved, That the Senate Legal Counsel is directed to represent the United States Senate, the Honorable George Herbert Walker Bush, in his capacity as President of the Senate, and William F. Hildenbrand, Secretary of the Senate, in the cases of *W. Henson Moore, et al.* v. *The House of Representatives, et al.* v. *Ron Paul* v. *The United States of America, et al.*

Mr. BAKER. Mr. President, I move to reconsider the vote by which the resolution was agreed to.

Mr. HEFLIN. Mr. President, I move to lay that motion on the table.

The motion to lay on the table was agreed to.

PENALTIES FOR CRIMES AGAINST CABINET OFFICERS, SUPREME COURT JUSTICES, AND PRESIDENTIAL STAFF MEMBERS

Mr. BAKER. Mr. President, I ask the Chair to lay before the Senate a message from the House of Representatives on S. 907.

The PRESIDING OFFICER laid before the Senate the following message from the House of Representatives:

Resolved, That the bill from the Senate (S. 907) entitled "An Act to amend sections 351 and 1751 of title 18 of the United States Code to provide penalties for crimes against Cabinet officers, Supreme Court Justices, and Presidential staff members, and for other purposes," do pass with the following amendment:

Strike out all after the enacting clause and insert: That (a) subsection (a) of section 351 of title 18 of the United States Code is amended to read as follows:

"(a) Whoever kills any individual who is a Member of Congress or a Member-of-Congress-elect, a member of the executive branch of the Government who is the head, or a person nominated to be head during the pendency of such nomination, of a department listed in section 101 of title 5 or the second ranking official in such department, the Director (or a person nominated to be Director during the pendency of such nomination) or Deputy Director of Central Intelligence, or a Justice of the United States, as defined in section 451 of title 28, or a person nominated to be a Justice of the United States, during the pendency of such nomination, shall be punished as provided by sections 1111 and 1112 of this title.".

(b) Section 351 of title 18 of the United States Code is amended by adding at the end the following:

"(h) In a prosecution for an offense under this section the Government need not prove that the defendant knew that the victim of the offense was an official protected by this section.

"(i) There is extraterritorial jurisdiction over the conduct prohibited by this section.".

SEC. 2. (a) The section heading of section 351 of title 18 of the United States Code is amended to read as follows:

"§ 351. Congressional, Cabinet, and Supreme Court assassination, kidnaping, and assault; penalties".

(b) In the table of sections at the beginning of chapter 18 of title 18 of the United States Code, the item relating to section 351 is amended to read as follows:

"351. Congressional, Cabinet, and Supreme Court assassination, kidnaping, and assault; penalties.".

(c) The chapter heading of chapter 18 of title 18 of the United States Code is amended to read as follows:

"CHAPTER 18—CONGRESSIONAL, CABINET, AND SUPREME COURT ASSASSINATION, KIDNAPING, AND ASSAULT".

(d) The table of chapters at the beginning of part I of title 18 of the United States Code is amended so that the item relating to chapter 18 reads as follows:

"18. Congressional, Cabinet, and Supreme Court assassination, kidnaping, and assault ..... 351".

(e) Subsection (c) of section 2516 of title 18 of the United States Code is amended by striking out "(violations with respect to congressional" and all that follows through "assault)" and inserting in lieu thereof the following: "(violations with respect to congressional, Cabinet, or Supreme Court assassinations, kidnaping, and assault)".

SEC. 3. (a) Subsection (a) of section 1751 of title 18 of the United States Code is amended to read as follows:

"(a) Whoever kills (1) any individual who is the President of the United States, the President-elect, the Vice President, or, if there is no Vice President, the officer next in the order of succession to the Office of the President of the United States, the Vice President-elect, or any person who is acting as President under the Constitution and laws of the United States, or (2) any person appointed under section 105(a)(2)(A) of title 3 employed in the Executive Office of the President or appointed under section 106(a)(1)(A) of title 3 employed in the Office of the Vice President, shall be punished as provided by sections 1111 and 1112 of this title.".

(b) Subsection (e) of section 1751 of title 18 of the United States Code is amended to read as follows:

"(e) Whoever assaults any person designated in subsection (a)(1) shall be fined not more than $10,000, or imprisoned not more than ten years, or both. Whoever assaults any person designated in subsection (a)(2) shall be fined not more than $5,000, or imprisoned not more than one year, or both; and if personal injury results, shall be fined not more than $10,000, or imprisoned not more than ten years, or both.".

(c) Subsection (g) of section 1751 of title 18 of the United States Code is amended by striking out "this section" and inserting in lieu thereof "subsection (a)(1)".

(d) Section 1751 of title 18 of the United States Code is amended by adding at the end the following:

"(j) In a prosecution for an offense under this section the Government need not prove that the defendant knew that the victim of the offense was an official protected by this section.

"(k) There is extraterritorial jurisdiction over the conduct prohibited by this section."

SEC. 4. (a) The section heading of section 1751 of title 18 of the United States Code is amended to read as follows:

"§ 1751. Presidential and Presidential staff assassination, kidnaping, and assault; penalties".

(b) In the table of sections at the beginning of chapter 84 of title 18 of the United States Code the item relating to section 1751 is amended to read as follows:

"1751. Presidential and Presidential staff assassination, kidnaping, and assault; penalties.".

(c) The heading of chapter 84 of title 18 of the United States Code is amended to read as follows:

"CHAPTER 84—PRESIDENTIAL AND PRESIDENTIAL STAFF ASSASSINATION, KIDNAPING, AND ASSAULT".

(d) The table of chapters at the beginning of part I of title 18 of the United States Code is amended so that the item relating to chapter 84 reads as follows:

"84. Presidential and Presidential staff assassination, kidnaping, and assault ..... 1751".

(e) Subsection (c) of section 2516 of title 18 of the United States Code is amended by striking out "(Presidential assassinations, kidnaping, and assault)" inserting in lieu thereof "(Presidential assassinations, kidnapping, and assault)" and inserting in lieu thereof "(Presidential and Presidential staff assassination, kidnapping, and assault)".

Mr. BAKER. Mr. President, I move that the Senate concur in the House amendment.

The PRESIDING OFFICER. The question is on agreeing to the motion of the Senator from Tennessee.

The motion was agreed to.

Mr. BAKER. Mr. President, I am prepared on this side to proceed to the consideration of two measures by unanimous consent.

DESIGNATION OF MARY McLEOD BETHUNE COUNCIL HOUSE AS A NATIONAL HISTORIC SITE

Mr. BAKER. Mr. President, with respect to Calendar Order No. 772, S. 2436, if there is no disagreement on the part of the acting minority leader, I ask the Chair to lay that before the Senate at this time.

Mr. HEFLIN. There is no objection.

Mr. BAKER. Mr. President, I ask that the Chair lay before the Senate S. 2436.

The PRESIDING OFFICER. The bill will be stated by title.

The assistant legislative clerk read as follows:

A bill (S. 2436) to designate the Mary McLeod Bethune Council House in Washington, District of Columbia, as a national historic site, and for other purposes.

The Senate proceeded to consider the bill, which had been reported from the Committee on Energy and Natural Resources with amendments, as follows:

On page 4, strike line 9, through and including "that" on line 14, and insert the following:

The Secretary will provide technical assistance to mark, restore, interpret, operate, and maintain the historic site and may also include provisions by which the Secretary will provide financial assistance to mark, interpret, and restore the historic site (including the making of preservation-related capital improvements and repairs but not including other routine operations). Such agreement may also contain provisions that—

On page 5, after line 17, insert the following:

SEC. 5. Beginning after September 30, 1983, there is authorized to be appropriated $100,000 to provide financial assistance under section 3 of this Act. There is also authorized to be appropriated for purposes of making grants to the National Council of Negro Women for purposes of this Act an additional $100,000 to be provided, as may be agreed to by the Secretary of the Interior and the National Council, on a fifty-fifty matching basis to the extent that funds or

services are contributed by the National Council for such purposes. Sums authorized to be appropriated under this section shall remain available until expended.

So as to make the bill read:

S. 2436

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,

CONGRESSIONAL FINDINGS AND PURPOSE

SECTION 1. (a) FINDINGS.—The Congress finds and declares that—

(1) the Mary McLeod Bethune Council House was the residence in Washington, District of Columbia, of Mary McLeod Bethune, renowned educator, national political leader, and founder of the National Council of Negro Women;

(2) it was at this location that Mary McLeod Bethune directed activities that brought her national and international recognition;

(3) this site was significant as a center for the development of strategies and programs which advanced the interests of black women and the black community;

(4) it was at this location that Mary McLeod Bethune as the president of the National Council of Negro Women received heads of state, government officials, and leaders from across the world;

(5) the Mary McLeod Bethune Council House was the first national headquarters of the National Council of Negro Women, and is the site of the Mary McLeod Bethune Memorial Museum and the National Archives for Black Women's History;

(6) the archives, which houses the largest extant manuscript collection of materials pertaining to black women and their organizations, contains extensive correspondence, photographs, and memorabilia relating to Mary McLeod Bethune; and

(7) the museum and archives actively collect artifacts, clothing, artwork, and other materials which document the history of black women and the black community.

(b) PURPOSE.—It is the purpose of this Act—

(1) to assure the preservation, maintenance, and interpretation of this house and site because of the historic meaning and prominence of the life and achievements of Mary McLeod Bethune, an outstanding leader in the areas of housing, employment, civil rights, and women's rights; and

(2) to assure the continuation of the Mary McLeod Bethune Memorial Museum and the National Archives for Black Women's History at this site, the preservation of which is necessary for the continued interpretation of the history of black women in America.

ESTABLISHMENT OF HISTORIC SITE

SEC. 2. In order to further the purpose of this Act and the Act of August 21, 1935 (16 U.S.C. 461-7), the Mary McLeod Bethune Council House at 1318 Vermont Avenue Northwest, in the city of Washington, District of Columbia, is hereby designated as a national historic site (hereinafter in this Act referred to as the "historic site").

COOPERATIVE AGREEMENT

SEC. 3. In furtherance of the purposes of this Act and the Act of August 21, 1935 (16 U.S.C. 461-7), the Secretary of the Interior is authorized and directed to enter into cooperative agreements with the National Council of Negro Women. Such agreements may include provisions by which the Secretary will provide technical assistance to mark, restore, interpret, operate, and maintain the historic site and may also include provisions by which the Secretary will provide financial assistance to mark, interpret, and restore the historic site (including the making of preservation-related capital improvements and repairs but not including other routine operations). Such agreement may also contain provisions that—

(1) the Secretary of the Interior, acting through the National Park Service, shall have right of access at all reasonable times to all public portions of the property covered by such agreement for the purpose of conducting visitors through such properties and interpreting them to the public; and

(2) no changes or alterations shall be made in such properties except by mutual agreement between the Secretary and the other parties to such agreements.

No limitation or control of any kind over the use of such properties customarily used for the purposes of the National Council of Negro Women shall be imposed by any such agreement.

ANNUAL REPORT

SEC. 4. The National Council of Negro Women shall, as a condition of the receipt of any assistance under this Act, provide to the Secretary of the Interior and to the Congress of the United States an annual report documenting the activities and expenditures for which any such assistance was used during the preceding fiscal year.

SEC. 5. Beginning after September 30, 1983, there is authorized to be appropriated $100,000 to provide financial assistance under section 3 of this Act. There is also authorized to be appropriated for purposes of making grants to the National Council of Negro Women for purposes of this Act an additional $100,000 to be provided, as may be agreed to by the Secretary of the Interior and the National Council, on a fifty-fifty matching basis to the extent that funds or services are contributed by the National Council for such purposes. Sums authorized to be appropriated under this section shall remain available until expended.

Mr. THURMOND. Mr. President, I rise today in support of S. 2436, a bill designating the Mary McLeod Bethune Council House in Washington, D.C., as a national historic site, which I cosponsored.

Ms. Bethune was born near Mayesville, S.C., 1 of 17 children of Sam and Patsy McLeod. She attended elementary school in Mayesville, residing with her parents until the age of 13, when she left for boarding school in North Carolina.

As an adult, Ms. Bethune founded and was first president of both Bethune-Cookman College and the National Council of Negro Women. While in Washington, she resided in the Council House, from which she directed her many activities on behalf of black women.

Mr. President, I take pride in cosponoring this bill in honor of a distinguished South Carolinian. I call on my colleagues in both Houses of Congress to insure its swift passage.

The PRESIDING OFFICER. The bill is open to further amendment. If there be no further amendment to be proposed, the question is on agreeing to the committee amendment in the nature of a substitute.

The committee amendment was agreed to.

The bill was ordered to be engrossed for a third reading and was read the third time.

The PRESIDING OFFICER. The bill having been read the third time the question is, Shall it pass?

So the bill (S. 2436) was passed.

Mr. BAKER. Mr. President, I move to reconsider the vote by which the bill was passed.

Mr. HEFLIN. Mr. President, I move to lay that motion on the table.

The motion to lay on the table was agreed to.

ANTI-ARSON ACT OF 1982

Mr. BAKER. I ask that the Chair lay before the Senate a message from the House of Representatives on H.R. 6454.

The PRESIDING OFFICER. The bill will be stated by title.

The legislative clerk read as follows:

A bill (H.R. 6454) to amend title 18, United States Code, to clarify the applicability of offenses involving explosives and fire.

The PRESIDING OFFICER. Is there objection to the present consideration of the bill?

Without objection, the Senate proceeded to consider the bill.

UP AMENDMENT NO. 1265

Mr. HEFLIN. Mr. President, on behalf of Senator ROBERT C. BYRD, I propose an amendment which Senator GLENN has requested him to propose at this time.

The PRESIDING OFFICER. The clerk will report the amendment.

The assistant legislative clerk read as follows:

The Senator from Alabama (Mr. HEFLIN) on behalf of Mr. GLENN proposes an unprinted amendment numbered 1265.

Mr. BAKER. Mr. President, I ask unanimous consent that further reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

At the end of the bill add the following new section:

"SEC. 3. The Director of the Federal Bureau of Investigation is authorized and directed to classify the offense of arson as a Part I crime in its Uniform Crime Reports. In addition, the Director of the Federal Bureau of Investigations is authorized and directed to develop and prepare a special statistical report in cooperation with the National Fire Data Center for the crime of arson, and shall make public the results of that report.

The PRESIDING OFFICER. The question is on agreeing to the amendment of the Senator from Alabama.

The amendment (UP No. 1265) was agreed to.

● Mr. GLENN. Mr. President, I am pleased that the Senate has begun

consideration of H.R. 6454. Although there is still a very long way to go in our fight against arson, consideration of this antiarson legislation today is an indication that Congress is finally starting to become serious about this deadly, billion dollar crime.

Each year arson kills 1,000 people; injures in excess of 3,000 people; causes direct property losses of at least $1.7 billion; and results in indirect losses estimated at up to $15 billion.

The result has been that the United States has the highest rate of arson in the world; arson is this Nation's fastest growing crime, quadrupling during the last decade and increasing tenfold in dollar losses; and that arson represents 25 percent of all fires and also 25 percent of our fire insurance premiums.

H.R. 6454 is virtually identical to S. 2438 which I introduced in April of this year to clarify that arson involving property used in or affecting interstate or foreign commerce is a violation of the Federal law. Like S. 2438, H.R. 6454 would accomplish this objective by adding the words "or fire" to the Federal Explosive Statute, title 18, United States Code, section 844.

This legislation would enhance the effectiveness of Federal investigations and prosecutions of arson by eliminating the necessity of proving that substances, such as gasoline, were in an "explosive state" at the time an arson was committed. (See my remarks on S. 2438 which were reprinted in the April 27, 1982 CONGRESSIONAL RECORD.) Under current law, satisfying this element of proof is quite often an onerous task requiring considerable investigative time and effort. Moreover, an estimated 30 percent of the arson investigations of the Bureau of Alcohol, Tobacco, and Firearms are dropped because of insufficient evidence that a fire has been caused by means of an explosive. Eliminating this requirement of proof will also avoid prolonged trial-delaying testimony concerning the nature of incendiary material used to commit arson.

This legislation will also close a loophole in the law which allows arsonists in certain jurisdictions to escape Federal prosecutions and convictions. Recent court decisions in the ninth circuit and elsewhere have held that the Federal Explosive Statute was not intended to apply to arson cases. For example, based on this interpretation of the statute, the U.S. Court of Appeals, in *United States* v. *Gere*, 622 F 2d. 1291 (9th Cir., 1981), reversed the conviction for arson under 18 U.S.C. 844(i) in a case in which a Los Angeles firefighter lost his life, 24 others were injured and property damage totalled approximately $1.5 million. (Also see *United States* v. *Cornett* (W.D.N.C., Aug. 19, 1982)). By clarifying that arsons affecting interstate commerce are covered by this statute, the legislation will preclude further unfortunate decisions based on this interpretation of the statute.

During the consideration of H.R. 6454 on the House floor, it was stated that:

> Criminals who callously pose a risk of death to others while committing the crime of arson and who profit by the destruction of property must not be allowed to escape the punishment which justice requires through a loophole in the Federal law.

The legislation that we are considering today will also include the Anti-Arson Act of 1982—S. 294—as recently passed by the Senate Committee on Governmental Affairs by a unanimous vote. I introduced S. 294 on January 27, 1981; its provisions will be offered as an amendment to H.R. 6454. My amendment would permanently elevate arson to "Part I" or major crime status for purposes of the Federal Bureau of Investigation's (FBI) Uniform Crime Reports (UCR). It would also require the FBI to study the crime of arson and prepare a special statistical report and make public the results of that report.

In the past, according to the U.S. Fire Administration, it has been "impossible to accurately measure the arson problem and its various components." This has contributed to a wide variation of statistics on arson. To overcome this problem, I introduced legislation to make arson a "Part I" crime. Since 1978, the FBI has been required to classify arson as a "Part I" offense. However, this is only a temporary requirement and has been continued each year only by virtue of being included as part of annual Department of Justice authorization bills.

The purpose of the FBI's uniform crime reporting program is to generate reliable criminal statistics for use in law enforcement administration, operation, management, and research. In order to provide nationwide uniformity in the reporting of data, the system utilizes standardized definitions to overcome the variances in definitions of criminal offenses in different sections of the country. When implemented in 1930, seven offenses were selected to serve as an index for evaluating fluctuations in the volume of crime. These "crime index offenses" or "Part I" crimes are murder, rape, robbery, aggravated assault, burglary, larceny, and motor vehicle theft. As previously mentioned, arson was added to the index in 1978.

The permanent classification of arson as a "Part I" offense will provide the accurate reliable statistics that are necessary to combat the crime of arson for several reasons.

First, it will require local police departments to become more directly involved with the crime of arson. This in turn would require them to work more closely with fire departments in order to obtain the necessary information. Cooperation between police and fire departments is crucial if we are to obtain accurate, reliable statistics on arson. Testifying before the Senate Judiciary's Subcommittee on Crime in 1980, Mr. Paul Zolbe of the FBI stated:

> . . . With the full cooperation of the fire services and law enforcement throughout the Nation, information on the crime of arson will enjoy the same level of credibility as that of other crimes which have historically comprised the Crime Index.

Second, it will encourage local law enforcement agencies to comply with the arson reporting requirement. Fearing that the requirement would not become permanent, many of the more than 15,000 agencies voluntarily participating in the UCR program have been reluctant to assume the added responsibility and cost of complying with the requirement. In 1979, only 8,528 fully or partially complied with the requirement, 11,500 in 1980, and 11,048 in 1981. Without substantial compliance, we will not be able to obtain complete, reliable data.

Third, it will add stability to the collection of information on arson by guaranteeing that no disruption will occur in the arson data collection effort. The FBI, for example, estimates that it will take 5 years of uninterrupted arson data collection before we begin to obtain accurate, reliable data.

Further, the permanent classification of arson as a "Part I" crime will reflect the very serious nature of this crime. In addition to the arson death toll, arson is America's costliest crime. In 1981, the average loss per incident for arson was $9,399. This amount is nearly double the combined average loss per incident for the remaining "Part I" offenses. In 1981, the average loss for auto theft was $3,173, for burglary $924, for robbery $665, and for larceny $340. Accordingly, it would be anomalous to classify arson as a minor offense. For example, prior to 1978, if a person torched the World Trade Center in New York City and killed 1,000 people in the process, it would be considered a minor crime along with such crimes as drunkenness and loitering. However, if the same person stole a car in front of the trade center and went joyriding across the river into New Jersey, it would be considered a "Part I" offense or a major crime.

Viewing arson as a serious crime will help focus public attention on this burgeoning problem. Increased public awareness will in turn put pressure on legislators, officials, the insurance industry and others to develop effective solutions to the arson epidemic that plagues our Nation.

Finally, the permanent classification of arson as a "Part I" crime will result in more useful statistics. Under this classification, information on volume,

trend, rate, clearances, persons arrested and the nature of the offense will be gathered. Only arrest information is gathered for "Part II" offenses. The more in-depth information is needed to better understand and assess the scope of the arson problem, shape antiarson programs and direct an adequate flow of dollars to our antiarson efforts.

My amendment would also require the FBI to conduct a study on the crime of arson and prepare a special statistical report. The study would determine the nature, extent, and seriousness of arson. Similar studies have been conducted by the FBI in the past where problems in the criminal statistics area could not be efficiently addressed by the basic UCR program. The study and report are necessary because reliable arson statistics will not be available for several years, notwithstanding the permanent classification of arson as a "Part I" crime.

In addition to the statistical aspects of the report, the study could examine: Arson in housing supported by programs of or owned by the Department of Housing and Urban Development; the reasons for noncompliance with the arson reporting requirements by many local law enforcement agencies; the scope of the problem between local police and fire departments concerning the crime of arson; and whether or not there is an adequate level of Federal antiarson assistance to States and localities.

S. 2438 and H.R. 6454 are supported by the firefighting community and the insurance industry. Resolutions in support of this legislation have been recently adopted by the International Association of Arson Investigators, Inc., and the National Association of Attorneys General. I ask that the resolutions be included in the RECORD at the conclusion of my remarks. The measures follow the recommendation of the Attorney General's Task Force on Crime, and the aim of the legislation is supported by the administration.

S. 294, as originally introduced, has 23 Senate cosponsors and has enjoyed wide support from the firefighting community, the insurance industry, the American Bar Association, and others. Resolutions in support of S. 294 were adopted by numerous groups, including the ABA, the Virginia General Assembly and the National Association of Attorneys General.

Mr. President, the passage of the antiarson legislation today is a significant first step in our battle against arson. I pledge to continue the battle, and I hope my colleagues will join me.

The resolutions follow:

RESOLUTION

Whereas, the International Association of Arson Investigators, Inc., is a not for profit association composed of more then 6000 members from the fire service, law enforcement and the private sector engaged in the control of arson, and

Whereas, arson is recognized as the fastest growing crime in the United States, causing loss of life, injury and destruction of property in the billions of dollars yearly, and

Whereas, the IAAI encourages the task force concept of arson investigation and

Whereas, the IAAI encourages the application of Federal explosives statutes to address an element of arson-related criminal activity that warrants federal attention, and

Whereas, because some Federal courts are reluctant to support the prosecution of certain arson crimes that fall within the "Explosives" definition as contained in Title 18, United States Code, Section 844 (j): Therefore, be it

Resolved, That the Officers and Board of Directors of the IAAI support legislation introduced by Senator John Glenn in S. 2438 that would amend certain subsections of 18 U.S.C. 844 to include the phrase "or fire".

RESOLUTION OF THE NATIONAL ASSOCIATION OF ATTORNEYS GENERAL—EXPANSION OF FEDERAL ARSON STATUTE

Whereas, federal jurisdiction over arson is limited to cases involving explosions that are not defined to include fires started by gasoline; and

Whereas, arson cases often include organized criminal elements that travel quickly between state lines making state enforcement of some arson cases exceedingly difficult; and

Whereas, some federal enforcement of arson cases, whether started by fire or otherwise, is necessary in order to reduce the incidence of arson; and

Whereas, legislation is pending in the Congress, H.R. 6454 and S. 2438, which would expand federal jurisdiction over arson to include fires started by gasoline: Now, therefore, be it

Resolved, That the National Association of Attorneys General supports H.R. 6454 and S. 2438, that would expand federal jurisdiction over arson to include fires started by gasoline; and be it further

Resolved, That the General Counsel of this Association is authorized to transmit these views to the Congress, the Administration, and other appropriate individuals.●

The PRESIDING OFFICER. If there be no further amendments to be proposed, the question is on the engrossment of the amendment and third reading of the bill.

The amendment was ordered to be engrossed and the bill to be read a third time. The bill (H.R. 6454) was read the third time, and passed.

Mr. BAKER. Mr. President, I move to reconsider the vote by which the bill was passed.

Mr. HEFLIN. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

DISTRICT OF COLUMBIA GOVERNMENT

Mr. BAKER. Mr. President, I ask the Chair to lay before the Senate a message from the House of Representatives on S. 2457.

The PRESIDING OFFICER laid before the Senate the following message from the House of Representatives:

Resolved, That the bill from the Senate (S. 2457) entitled "An Act to amend the District of Columbia Self-Government and Governmental Reorganization Act to increase the amount authorized to be appropriated as the annual Federal payment to the District of Columbia", do pass with the following amendment:

Strike out all after the enacting clause, and insert: That section 502 of the District of Columbia Self-Government and Governmental Reorganization Act (D.C. Code, sec. 47-3406) is amended by striking out "and for the fiscal year ending September 30, 1982, and for each fiscal year ending after September 30, 1982, the sum of $336,600,000" and inserting in lieu thereof "for the fiscal year ending September 30, 1982, the sum of $336,600,000; and for the fiscal year ending September 30, 198-, and for each fiscal year ending after September 30, 1983, the sum of $361,000,000." Of any funds appropriated for the fiscal year ending on September 30, 1983, under the authorization contained in this section, not less than $14,300,000 must be paid to the District of Columbia Retirement Board to eliminate any deficits in the District of Columbia Teachers' Retirement Fund and the District of Columbia Police Officers and Fire Fighters' Retirement Fund.

Mr. BAKER. Mr. President, I move that the Senate disagree to the House amendment, that the Senate request a conference with the House of Representatives, and the Chair be authorized to appoint conferees on the part of the Senate.

The motion was agreed to; and the Presiding Officer appointed Mr. MATHIAS, Mr. RUDMAN, and Mr. EAGLETON conferees on the part of the Senate.

NASA AUTHORIZATIONS, 1983

Mr. BAKER. Mr. President, I ask the Chair to lay before the Senate a message from the House of Representatives on H.R. 5890.

The Presiding Officer laid before the Senate a message from the House of Representatives announcing its disagreement to the amendment of the Senate to the bill (H.R. 5890) to authorize appropriations to the National Aeronautics and Space Administration for research and development, construction of facilities, and research and program management, and for other purposes, and requesting a conference with the Senate on the disagreeing votes of the two Houses thereon.

Mr. BAKER. I move that the Senate insist upon its amendment and agree to the request of the House for a conference on the disagreeing votes of the two Houses thereon, and that the Chair be authorized to appoint the conferees on the part of the Senate.

The motion was agreed to; and the Presiding Officer appointed Senators PACKWOOD, SCHMITT, GOLDWATER, CANNON, and RIEGLE conferees on the part of the Senate.

H.R. 6872 HELD AT THE DESK UNTIL CLOSE OF BUSINESS ON SEPTEMBER 23, 1982

Mr. BAKER. Mr. President, I believe this request has been cleared as well. I now ask unanimous consent that H.R. 6872 be held at the desk until the close of business on tomorrow.

The PRESIDING OFFICER. Without objection, it is so ordered.

H.R. 5154 HELD AT THE DESK PENDING FURTHER DISPOSITION

Mr. BAKER. Mr. President, I ask unanimous consent that the bill H.R. 5154 be held at the desk pending further disposition.

The PRESIDING OFFICER. Without objection, it is so ordered.

ORDER FOR STAR PRINT OF S. 2907

Mr. BAKER. Mr. President, I ask unanimous consent that S. 2907 introduced by the distinguished Senator from California (Mr. HAYAKAWA) be star-printed to reflect the proper spelling of the beneficiary, which I send to the desk.

The PRESIDING OFFICER. Without objection, it is so ordered.

EXECUTIVE CALENDAR

Mr. BAKER. Mr. President, on today's Executive Calendar I am prepared to proceed to the consideration of those items listed under Department of State, on page 5, through U.S. Arms Control and Disarmament Agency, all of the nominations on page 6, on page 7, on page 8, on page 9, and on page 10 are nominations placed on the Secretary's desk in the Foreign Service.

I will inquire of the acting minority leader if he is in position to consider all or part of the nominations just identified?

Mr. HEFLIN. Those nominations have been cleared on this side of the aisle and I am in position to so agree.

Mr. BAKER. I thank the acting minority leader.

EXECUTIVE SESSION

Mr. BAKER. Mr. President, in view of that, I ask unanimous consent that the Senate now go into executive session for the purpose of considering the nominations just identified.

The PRESIDING OFFICER. Without objection, it is so ordered.

The nominations previously identified by the majority leader are considered and confirmed en bloc.

Mr. BAKER. Mr. President, I thank the Chair.

The nominations considered and confirmed en bloc follow:

DEPARTMENT OF STATE

Fernando E. Rondon, of Virginia, a career member of the Senior Foreign Service, class of counselor, now Ambassador Extraordinary and Plenipotentiary of the United States of America to the Democratic Republic of Madagascar, to serve concurrently and without additional compensation as Ambassador Extraordinary and Plenipotentiary of the United States of America to the Federal and Islamic Republic of the Comoros.

Kenneth W. Dam, of Illinois, to be Deputy Secretary of State, vice Walter J. Stoessel, Jr.

Henry Allen Holmes, of the District of Columbia, a career member of the Senior Foreign Service, class of minister-counselor, to be Ambassador Extraordinary and Plenipotentiary of the United States of America to Portugal.

Rozanne L. Ridgway, of the District of Columbia, a career member of the Senior Foreign Service, class of career minister, to be Ambassador Extraordinary and Plenipotentiary of the United States of America to the German Democratic Republic.

W. Allen Wallis, of New York, to be Under Secretary of State for Economic Affairs, vice Myer Rashish, resigned.

U.S. ARMS CONTROL AND DISARMAMENT AGENCY

William Robert Graham, of California, to be a member of the General Advisory Committee of the U.S. Arms Control and Disarmament Agency, vice McGeorge Bundy, resigned.

Colin Spencer Grey, of New York, to be a member of the General Advisory Committee of the U.S. Arms Control and Disarmament Agency, vice Bert Thomas Combs, resigned.

Roland F. Herbst, of California, to be a member of the General Advisory Committee of the U.S. Arms Control and Disarmament Agency, vice Lawrence Owen Cooper, Sr., resigned.

Francis P. Hoeber, of Virginia, to be a member of the General Advisory Committee of the U.S. Arms Control and Disarmament Agency, vice Paul Mead Doty, resigned.

Charles Burton Marshall, of Virginia, to be a member of the General Advisory Committee of the U.S. Arms Control and Disarmament Agency, vice Harry Arthur Huge, resigned.

Jaime Oaxaca, of California, to be a member of the General Advisory Committee of the U.S. Arms Control and Disarmament Agency, vice Joseph Lane Kirkland, resigned.

Shirley N. Pettis, of California, to be a member of the General Advisory Committee of the U.S. Arms Control and Disarmament Agency, vice Arthur B. Krim, resigned.

John P. Roche, of Massachusetts, to be a member of the General Advisory Committee of the U.S. Arms Control and Disarmament Agency, vice Wolfgang Kurt Hermann Panofsky, resigned.

Donald Rumsfeld, of Illinois, to be a member of the General Advisory Committee of the U.S. Arms Control and Disarmament Agency, vice Harold Melvin Agnew, resigned.

Harriet Fast Scott, of Virginia, to be a member of the General Advisory Committee of the U.S. Arms Control and Disarmament Agency, vice Jane Cahill Pfeiffer, resigned.

Laurence Hirsch Silberman, of California, to be a member of the General Advisory Committee of the U.S. Arms Control and Disarmament Agency, vice Brent Scowcroft, resigned.

Elmo Russell Zumwalt, Jr., of Virginia, to be a Member of the General Advisory Committee of the U.S. Arms Control and Disarmament Agency, vice George M. Seignious II, resigned.

Eli S. Jacobs, of California, to be a member of the General Advisory Committee of the U.S. Arms Control and Disarmament Agency, vice Thomas John Watson, Jr., resigned.

Robert B. Hotz, of Maryland, to be a member of the General Advisory Committee of the U.S. Arms Control and Disarmament Agency, vice Margaret Bush Wilson, resigned.

U.S. ADVISORY COMMISSION ON PUBLIC DIPLOMACY

Edwin J. Feulner, Jr., of Virginia, to be a member of the U.S. Advisory Commission on Public Diplomacy for a term expiring July 1, 1985, vice Jean McKee.

U.S. INFORMATION AGENCY

W. Scott Thompson, of Massachusetts, to be an Associate Director of the International Communication Agency, vice Robert John Hughes.

UNITED NATIONS

The following-named persons to be representatives and alternate representatives of the United States of America to the 37th Session of the General Assembly of the United Nations:

Representatives: Kenneth L. Adelman, of Virginia; J. Bennett Johnston, U.S. Senator from the State of Louisiana; Robert W. Kasten, Jr., U.S. Senator from the State of Wisconsin; Jeane J. Kirkpatrick, of Maryland; John Davis Lodge, of Connecticut.

Alternate Representatives: Charles M. Lichenstein, of the District of Columbia; Gordon C. Luce, of California; Hernan Padilla, of Puerto Rico; William Courtney Sherman, of Virginia; Jose S. Sorzano, of Virginia.

INTERNATIONAL ATOMIC ENERGY AGENCY

The following-named persons to be the representative and alternate representatives of the United States of America to the 26th Session of the General Conference of the International Atomic Energy Agency:

Representative: W. Kenneth Davis, of California.

Alternate Representatives: Richard T. Kennedy, of the District of Columbia; Roger Kirk, of the District of Columbia; Thomas Morgan Roberts, of the District of Columbia.

THE JUDICIARY

Edward Rafeedie, of California, to be U.S. district judge for the Central District of California vice David W. Williams, retired.

David D. Dowd, Jr., of Ohio, to be U.S. district judge for the Northern District of Ohio vice Leroy J. Contie, elevated.

COPYRIGHT ROYALTY TRIBUNAL

Edward W. Ray, of California, to be a Commissioner of the Copyright Royalty Tribunal for a term of 7 years from September 27, 1982. (Reappointment.)

NOMINATIONS PLACED ON THE SECRETARY'S DESK IN THE FOREIGN SERVICE

Foreign Service nominations beginning Herbert A. Cochran, and ending Michael J. Mercurio, which nominations were received by the Senate on August 31, 1982, and appeared in the CONGRESSIONAL RECORD of September 8, 1982.

Foreign Service nominations beginning Michael Hayden Armacost, and ending E. William Tatge, which nominations were received by the Senate and appeared in the

CONGRESSIONAL RECORD of September 13, 1982.

Foreign Service nominations beginning Robert L. Barry, and ending Emmett N. Wilson, Jr., which nominations were received by the Senate and appeared in the CONGRESSIONAL RECORD of September 17, 1982.

Mr. BAKER. Mr. President, I move to reconsider the vote by which the nominees were confirmed en bloc.

Mr. HEFLIN. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

Mr. BAKER. Mr. President, I ask unanimous consent that the President be immediately notified that the Senate has given its consent to these nominations.

The PRESIDING OFFICER. Without objection, it is so ordered.

LEGISLATIVE SESSION

Mr. BAKER. I ask unanimous consent that the Senate now return to legislative session.

The PRESIDING OFFICER. Without objection, it is so ordered.

PUBLIC LOSING LANDS TO OUTLAWS

Mr. HAYAKAWA. Mr. President, Marihuana is grown in every State of these United States. And nowhere is it a greater threat to the public than in our national forests and parks. Our public lands are becoming treacherous as marihuana growers protect their high-valued crops (which are worth up to $6,000 per plant) from thieves, law enforcement officers, and innocent members of the public, including loggers, cattlemen, and recreationalists. The U.S. Forest Service reports that 80 percent of the growers are armed during the growing season and virtually all are armed at harvest time. Crimes against visitors in the national forests have tripled and assaults have increased by 400 percent since 1969. Much of this violence is linked directly to the cultivation of marihuana. In addition, arson of Forest Service buildings, sabotage of Forest Service vehicles, poisoning of livestock, civil disobedience, and campaigns to prevent the application of herbicides, booby-traps designed to maim or kill visitors, and threats against Forest Service employees and their families are all becoming commonplace in marihuana cultivation areas.

In order to bring this matter to the attention of the public and Congress, I will be holding a hearing in the Forestry, Water Resources and Environment Subcommittee of the Senate Agriculture Committee on September 30. I hope to accomplish several things with the hearing: First, to gain a clear understanding of the current situation; second, to learn the extent of related criminal activities on public lands; and third, to gain a better understanding of the lines of responsibility between Federal, State, local, and community law enforcement officials in dealing with the problem. In addition, by drawing attention to this matter, I hope to place it on the agenda of the next Congress.

Until now, Congress has taken little notice of this pervasive illegal activity, and I feel strongly that we must begin to understand and deal with the matter. In the past we have viewed marihuana as an international problem, but the Drug Enforcement Agency has been so effective in curbing imports of marihuana that the profits from domestic cultivation have increased. Today it is a major commerical crop in numerous States and ranks just behind corn, soybeans, and wheat in cash value. Without a doubt, if left unchecked, the increased cultivation of marihuana on public lands will create a wholly unacceptable threat to the public safety of our citizenry. Our efforts to eliminate overseas production of dangerous drugs must not be hampered just because some believe we can't even clean up our own backyard.

I request unanimous consent that the five-part series of articles which appeared in the Sacramento Bee, be printed in the record. Titled "The New Lawless," this series paints a frightening picture. I commend the article to my colleagues, and trust that they, too, will share my deep concern on this matter.

There being no objection, the material was ordered to be printed in the RECORD, as follows:

[From the Sacramento Bee, Sacramento, Calif., June 20, 1982]

PUBLIC LOSING LANDS TO OUTLAWS

(By Jim McClung)

Well-armed modern outlaws have taken from the public the use of thousands of square miles of California's foothills, mountain valleys and national forests.

Through terror, intimidation and murder they have created back-country enclaves where there is no law but their own.

Vast areas, particularly in Northern California, are no longer safe for loggers, forest rangers, recreation-seeking city dwellers and residents of rural hamlets. With rare exception, local law enforcement and the state Department of Justice have simply given up trying to police them.

Law officers say the sites range from the Mexican border into Oregon and beyond. A four-month investigation by The Bee found scores of these areas under the control of a dangerous breed of rural gangsters, The New Lawless.

Who are they? Some, but by no means all, are high-stakes marijuana growers whose financial interests are large enough to ensure that their illegal enterprise is surrounded by violence.

Some are superannuated flower children of the '60s who gave up weaving god's eyes on the Telegraph Avenue sidewalks in favor of poaching and living off welfare in another kind of jungle in the remote ridges of Humboldt or Nevada counties.

Some are back-to-nature psuedo-pioneers who masquerade as gold miners to legitimize squatting on U.S. public lands.

Some are survivalists, commandos of catastrophe in camouflage uniforms who enforce their claim to what used to be the public's land with submachineguns and semiautomatic rifles while preparing for the nuclear Armageddon.

One thing they have in common is contempt for the law. They pay no income taxes, acknowledge no hunting restrictions, observe no penal code but their own, have no building standards and recognize no right to use the land but theirs.

They are also exceedingly well-armed, able to mount more firepower than the thin ranks of rural lawmen who attempt to keep them in check. The Colt Frontiers and the Winchester lever-actions that legend has won the West have been replaced by Israeli-made Uzis, Soviet AK47 assault rifles, American AR-15 semiautomatic rifles, TNT and plastique explosives.

For example, just last month Trinity County miner Brian Hill and two companions were ambushed on State Route 96 between Willow Creek and Orleans in Humboldt County. Highwaymen armed with a Uzi and a .30-caliber machine gun blasted out the windshield and windows of the sedan and took several hundred dollars from the occupants. They overlooked $14,000 in cash in the trunk.

They practice their own brand of civil and criminal justice. One "defendant was James Leroy Jamison, 33," who was forced to his knees on State Route 32 six miles northeast of Chico last October for one violation or another and was killed by nine bullets fired into his head and face.

His was one of a dozen murder cases in Butte County in the last few years suspected of being connected to drug traffic.

Sources told The Bee that survivalist John Satkofsky of the Berry Creek region of Butte County took direct action to close down a methamphetamine laboratory bordering his ranch last summer: He opened fire on the makeshift building with a .243 caliber rifle. It sent the illegal chemists scurrying out, fearful of an explosion.

Satkofsky feared the refuse from the lab would poison his well. When the lab operators learned of his grievance, they brought in a "mediator" who represented the Laguna Beach investors in the project. The problem was resolved as tidily as any Superior Court judge might have done—the operators moved the lab site and paid Satkofsky $5,000 for any potential damage to the well.

Where do The New Lawless reign? In Northern California The Bee identified lawless enclaves scattered throughout the coastal mountain ranges from Monterey north, in the Sierra Nevada. Salmon-Trinity Alps and the Siskiyous. There is a well-established marijuana-growing belt that rings the Sacramento Valley from El Dorado County in the east to Lake County in the west.

Marijuana is grown commercially in 43 of California's 58 counties and in all of the 17 national forests within the State. The focus in this series will be on Northern California.

In most cases, sheriffs officers, forest rangers and Forest Service firefighters prudently stay out of the danger areas. The lawmen who do go in first send in special weapons teams to protect narcotics officers who move in to clean out the cannabis weed.

The Bee investigation concluded that marijuana cultivation—and the violence

that accompanies those who deal in the profitable trade—flourishes largely unchecked in Northern California.

Moreover, the combined state, federal and local marijuana eradication effort called "Operation Sinsemilla" has not been effective. (Sinsemilla—"without seeds" in Spanish—is the top-of-the-line product, made from the unfertilized female flowers of the plant, high in potency and with a sweet and mild smoke.)

The U.S. Drug Enforcement Agency initially provided $140,000 in financial aid, advice and aircraft, and the California Bureau of Narcotics Enforcement provided $200,000 and supervisory officers to help county sheriffs' narcotics officers.

Instead of being eradicated, the illicit $1 billion-a-year crop has become "a significant contributor to the financial health of the counties," said U.S. Attorney Joseph P. Russoniello of San Francisco.

To protect their illegal crops, armed and unruly growers intimidate legal residents, threatening to burn homes, shoot their cattle or destroy their businesses on the slightest provocation.

"The hippies don't want a shooting war with me, and vice versa," one rancher said "None of the ranchers snitch on growers because it would lead to a war that the rancher would lose."

Another rancher, who owns property in the Sierra foothills, told The Bee he has simply given up using part of his range because it is too dangerous.

Intimidation also comes in secreted explosive devices, bear traps and camouflaged Vietnam-style pits with needle-sharp bamboo punji-sticks on pathways. Vicious dogs and gunshots also warn strangers away.

With one showy but ineffective exception, the state Justice Department has done little to hinder the pot growers. County sheriffs departments are often too restricted by low budgets to amount a serious deterrent program.

For instance, the Butte County Board of Supervisors rejected federal grants for eradication last year. Hilda Wheeler, board chairman, said the supervisors thought Sheriff Larry Gillick had enough money in his own budget to do that.

Now, because of 1982-83 budget cuts, the Butte sheriff is being forced to lay off 31 officers from the 52-person department as of July 1. He lost six jobs the year before.

The exception, as far as state interest goes, was in 1979 when Attorney General George Deukmejian donned flak jacket and cap to accompany officers on a Mendocino County marijuana raid.

That was the same year that Deukmejian's Department of Justice in a confidential narcotics bulletin to law enforcement agencies reported that the marijuana crop in Humboldt, Mendocino, Lake and Del Norte counties was replacing the Mexican product as the major source for California users.

The war on pot was short-lived. It was the last such raid Deukmejian ventured out on. Recently Regina McGuiness, speaking for the attorney general's office, said that marijuana is now grown on small plots on hillsides, adding, "If we knew where it was, we'd get a warrant and go in and burn it."

Last year a confidential state narcotics report addressed the enforcement failures: "In some counties as much as 50 percent of the crops were not seized for a variety of reasons. The most common is the lack of manpower devoted to narcotics enforcement."

Deukmejian's press secretary, Tony Cimarusti, defended the state's inaction.

"What about the local sheriffs?" Cimarusti asked. "They have the jurisdiction. The state doesn't have the budget or the jurisdiction—unless they let the state know they have a problem they can't handle."

The attorney general was not available for comment.

Said one federal official in discussing the lack of performance by state and federal officers, "I think a lot of people took the ostrich approach—stuck their heads in the sand and hoped it would go away next year."

In the war against authority, aircraft are frequent targets because aerial surveillance is the primary tool to discover marijuana gardens. The U.S. Forest Service has discovered "The Fishline Alliance," a shadowy organization thought to be comprised of growers from San Diego to Canada. It exists primarily to combat the Forest Service herbicide spraying program, officials said.

The Alliance has circulated a crude two-page flier entitled "Helicopter Trap," which describes a method of building a trap to down helicopters. Using dynamite, TNT, plastique or other explosives, it is designed to detonate from the force of the downdraft from helicopter rotor blades as the aircraft hovers for spraying.

Many state and federal firefighters are so fearful of provoking the marijuana growers that they often will not man firelines until growers have been routed by lawmen.

Some of the foresters refused to talk to reporters. "When I'm in the woods. I don't see anything, hear anything or find anything." said one. "I just do my job and ignore everything else. To talk about those things would be placing myself in jeopardy."

Glenn Bradley, deputy Forest Service supervisor in the Shasta-Trinity National Forest, dates the problem back to the unrest on college campuses in the early 1960s.

"The thinking was that these are some of the flower kids from the city who are going to come up here and find the winters are pretty cold and miserable and they are probably going to go back to the city the next spring." Bradley said.

"So, there was not a whole lot of concern until it became apparent that these folks were here to stay.

"Then we started having friction between them and the other national forest users. In 1974-75 it became apparent it was a problem that either had to be dealt with or it would result in a takeover of a portion of the national forest."

The takeover has occurred in some areas of the 17 national forests in California. Nowhere has it been so complete and violent as in the Denny area on New River in the Big Bar District of the Shasta-Trinity National Forest.

There, a group of people who describe themselves as miners—but who are described by law enforcement officers as marijuana growers and squatters—live in tents, old cabins and houses.

Big Bar District Ranger Dave Wright says that portions of the national forest around Denny are going unmanaged because the Denny residents would endanger the lives of his rangers if he sent them into the area.

On the other side of the Northern Sacramento Valley, near Oroville in Butte County, Sheriff Larry Gillick ordered his deputies into a marijuana eradication program last summer. The effort has resulted in exchanges of gunfire between marijuana growers and deputies, arson to a sheriff's vehicle and persuasion applied to a local television station by growers seeking air time to tell their side of the story.

In nearby Nevada County, sheriff's deputies report numerous complaints by residents and visitors about savage-appearing people brandishing weapons at them and complaints of public roads being blocked with makeshift barricades. Marijuana growers are the offenders, deputies say.

Last year, when summoned to investigate, an apparent murder on San Juan Ridge, Nevada County deputies discovered a 100-plant marijuana garden near the body of "Levi" Larry.

Zachari Harmony, accused of the killing, won a self-defense verdict.

In another incident last year, a female clerk in the Brass Rail saloon was seriously wounded by a shot fired by a grower who drove through the town of North San Juan shooting a pistol into buildings.

The shooter was Leroy H. Yeoman, 32, who attempted to defend his conduct by saying he was stoned on marijuana. He was sentenced to one year in jail and five years on probation.

In El Dorado County, where the top marijuana-producing areas are near Swansboro, Georgetown and Somerset, reports of harassment and violence are beginning to surface. Sheriff Richard F. Pacileo employs an attack force of heavily armed deputies along with his narcotics squad when raiding a marijuana patch.

The U.S. General Accounting Office took notice of the problems in a report published last March for Agriculture Secretary John Block and Interior Secretary James Watt.

"During our review in California and Oregon of the federal role in providing outdoor recreation, we noted that field officials at selected locations of the Bureau of Land Management, Department of the Interior and the Forest Service, Department of Agriculture, were not always effectively enforcing laws relating to illegal and unauthorized activities on public lands," the report said.

To correct those deficiencies, the U.S. Department of Justice has launched a new attack on growers, using tried and proven methods—confiscation of property and the income tax laws.

Joseph P. Russoniello, U.S. attorney for the Northern District of California, is spearheading the effort in California.

Russoniello said his is a two-pronged attack: eradication of marijuana through confiscation of the land upon which it is grown, and identifying growers and landowners who are evading payment of taxes to the Internal Revenue Service.

The law provides for confiscation of personal property when the property is "instrumental" to the commission of a crime. The law is applicable to real estate just as it is to boats and aircraft used in smuggling, Russoniello said.

Some growers agree. They told The Bee the two things they fear most are the FBI's assuming control of the Drug Enforcement Agency and the new interest in them from the IRS.

TRIGGER-HAPPY GROWERS MAKE THEIR OWN LAWS

(By Jim McClung)

CHICO.—On Oct. 29, 1981, James Leroy Jamison, 33, was forced to his knees on State Route 32 six miles northeast of Chico and, for some violation of the outlaw's code, exe-

cuted with nine shots into his head and face.

Jamison, homicide investigators said, was one of a dozen suspected drug-related murder victims in rural Butte County since 1978.

All were involved in or somehow associated with the booming marijuana cultivation and drug manufacturing industry that is turning the foothills of the Sierra Nevada into an inhospitable shooting gallery.

Utility company employees are fearful for their safety as they tend gas and telephone lines. U.S. Forest Service employees fear for their lives when they stumble onto marijuana gardens guarded by hostile caretakers.

And local law enforcement is turning to military-like tactics and weapons in efforts to enforce the much-violated drug laws.

Ron Chaplin, a Butte County sheriff's sergeant working to eradicate marijuana, told The Bee, "The main problems (with the growers) are the violence and hostile attitudes directed toward recreation seekers. This is our biggest concern."

Chaplin said that 90 percent of the reports about pot growers come in anonymous calls from victims of harassment.

In El Dorado County, Sheriff Richard F. Pacileo sends in a special weapons team to capture suspected growers before allowing his narcotics officers to harvest, then destroy, targeted marijuana crops.

Undersheriff Don McDonald told The Bee that before making a raid his department performs a background investigation on each suspect to gauge the level of violence the arresting officers may expect. So far, no one has been hurt.

A narcotics officer for the Nevada County sheriff's office described the approximately 100 marijuana cultivators and drug lab operators arrested by his agency in the 1980-81 seasons as ranging from "outlaw biker types to Ph.D.s and everything in between." Ninety percent of those arrested were carrying weapons for the protection of their crops.

The officer said there are about 500 marijuana growers in Nevada County who are primary responsible for the numerous complaints about people brandishing weapons, public roads being closed off, and destruction of road markers. Roads are closed and markers obliterated in an effort to keep people from finding marijuana fields.

"These people are totally violating the rights of citizens to travel the roads in this county," the deputy said.

In Yuba County, a sheriff's deputy describes the growers as "really desperados—on welfare and public assistance who take more out of the community than they put into it. They take their grass money and run."

Placer County Sheriff Donald J. Nunes told The Bee that outlaw motorcycle gangs in the Iowa Hill and Foresthill areas, gold snipers in illegal homesteads on the Middle and North Forks of the American River, and foothills marijuana growers comprise the outlaw element in his county.

Nunes said a woman whose body was found near Iowa Hill two years ago probably was murdered by motorcycle gang members. Her killing and the double murder of an Ophir couple at about the same time were both narcotics-related, the sheriff said.

"What I want to do is monetarily break their backs here in this county," Nunes said. "I don't want Placer County to turn into another Mendocino or Siskiyou County. I'm going to break their damn backs and I want them to know it."

Nunes said growers even use geese as watchdogs to guard their crops. Growers also have used fishhooks hung from trees at eye level to ward off thieves or lawmen, Nunes reported.

Most of the shootings on public lands in Placer County occur near the forks of the American River where visitors may stumble across illegal homesteads maintained by gold snipers who dredge the river for nuggets. The sheriff and the U.S. Bureau of Land Management are evicting squatters through court proceedings.

Nunes said legitimate farmers in the foothills are a major source of information on marijuana growers. Fourteen marijuana gardens were harvested by Placer deputies last fall.

The sheriff views the cultivation of marijuana as a serious social problem because it represents "big money." "Because of the monetary value of the crops," said Nunes, "the growers will kill for it."

Ray Johnson, La Porte District ranger for the Plumas National Forest in Plumas County, told The Bee it costs some $5,000 a year just to replace road signs removed or destroyed in his district.

"Every year it is the same areas and the same signs," said Johnson. "We know who does it. It is done to make it harder for visitors to find out-of-the-way places.

"More than half of the problems we have in the forest are generated by these people . . . who have total disregard for laws, game regulations or anything.

"We are talking about a low-life individual that has no respect for law enforcement."

Johnson points to Strawberry Valley as one community on the 10-mile-long North San Juan Ridge which is home to marijuana growers.

Chaplin of Butte County says Berry Creek, Concow Lake, Lake Madrone, Feather Falls, Challenne and Forest Ranch are the communities which generate the most marijuana and violence in the marijuana belt which runs through his county.

About 10 persons who generally described themselves as survivalists lived in the Berry Creek area until last fall. They wore camouflage clothing, carried AR-15 semi-automatic rifles, lived off the land and grew marijuana.

Chaplin, accompanied by a Special Weapons and Tactics (SWAT) team, raided a survivalist from New York last summer and took his marijuana plants without firing a shot. "The guy taken down (raided) praised the SWAT team for their professional performance," said Chaplin.

Some of the survivalists have fled Butte County, but the The Bee found one remaining soldier of Armageddon who agreed to talk. He asked anonymity, expressing fear that his family might be hurt by other growers if he were identified.

The survivalist said a lot of violent people have moved into Berry Creek in the last few years, changing the character of the community. He said most growers are now armed to the teeth to combat marijuana thieves in the late summer and fall as the crops mature.

When he moved into Berry Creek in the 1970s violence was a rarity, the survivalist said.

He estimated there are about 100 growers in Berry Creek. Half of them grow enough to add $10,000 to the family coffers each year.

"About 25 percent of the growers are successful enough to make $40,000 to $50,000 a year," the source said. "They ski, do cocaine and Hawaii, and are broke and back on welfare by spring."

The source said the other 25 percent of the growers are backed by investors, mainly from the Laguna Beach area, who hire them as sharecroppers.

Most of the large marijuana sales in Butte County are to wholesaling syndicates from the Los Angeles area, he said. He added that only about 500 pounds of Berry Creek "kush" reached the market this year because of Chaplin's repeated raids.

"Only two patches got through," the source declared. "Berry Creek was totally wiped out by Chaplin in the 1981 season." Chaplin harvested 24 marijuana crops in Berry Creek last fall.

One of the wiped-out growers was a fellow survivalist, the source said. "Tom wanted one good crop so he could dig in and wait for Armageddon—when the Russians bomb Beale Air Force Base," said the source. "Chaplin got that crop. Tom is now in New York working for a television studio."

Last July when another Berry Creek survivalist, John Satkofsky, opened fire with a .243-caliber rifle on a laboratory next door to his 40-acre ranch off Raccoon Road and Rockefeller Drive, he brought to a halt the manufacture of methamphetamine by bikers from the Los Angeles area.

The cookers running the laboratory used a 100-kilowatt portable generator for power. They planned to operate from daylight to dark for 20 days to produce an estimated $1 million worth of speed.

The Bee's informant said Satkofsky feared that refuse from the lab would poison his well. His gunshots into the lab sent the cookers scurrying from the makeshift building for fear of an explosion of the methamphetamine ingredients.

When the cookers heard Satkofsky's grievance they set up a meeting with a "mediator" representing their Laguna Beach investors. The lab operators offered to move their operation and pay Satkofsky $5,000 for any potential damage to his well. Satkofsky accepted the proposal and the incident was closed.

The source said other landowners in Berry Creek were paid $20,000 to $30,000 to allow the operation to continue for the 20-day project. The entire incident occurred with little public notice, according to the source, and only rumors of the drug lab reached law enforcement officers.

LAWLESSNESS WORST IN DENNY AREA

(By Jim McClung)

DENNY.—In a California dotted with encampments where the New Lawless survivalists, marijuana growers and squatters reign through terror, the little community of Denny is in a class by itself.

Denny, on the New River in western Trinity County, is the most lawless rural community in the state.

Dave Wright, Big Bar District manager for the Shasta-Trinity National Forest, said candidly, "We do not have control over the management of the Denny area."

Small guerrilla bands of well-armed outlaws have claimed huge portions of the Shasta-Trinity and Klamath National Forests through violent confrontations with the U.S. Forest Service and state and local law enforcement officials.

Federal officials say they have lost control of some 100,000 acres of the Shasta-Trinity National Forest around Denny.

In addition, management of more than a million acres of public land is severely, restricted at the Forks of the Salmon River,

Orleans in Humboldt County, Seiad on the Klamath River and in Mad River country in southern Trinity County.

"It is a hell of a predicament that the Forest Service is in," said manager Wright. "More and more we are becoming a law enforcement agency whether we like it or not," he lamented, seeing the role of the Forest Service changing from the benign Smokey the Bear wilderness caretaker to that of a machine-gun-wielding police agency.

The Forest Service is in the forefront of the battle to prevent the outlaws from taking over. The outlaw population has intimidated the California Department of Fish and Game into abandoning enforcement responsibilities in many areas of Northern California during late summer and fall when the marijuana crop matures.

Said Trinity County Undersheriff Dave Laffranchini. "They basically are pot growers operating under the guise of gold miners.

"I've been through the back country and lower country there and I've seen a heck of a lot more Acapulco gold than mineral gold."

Brian Hill, a former New York City college teacher and "media coordinator" for the Denny area miners, contested that characterization.

The small miners here are as much of a melting pot as America is," Hill declared. "There are rightwingers, left-wingers. conservatives, radicals . . . and people fed up with the system.

"They are self-sufficient, rugged individuals with a great respect for nature and each other who want to be left alone."

Hill was himself a victim of violence last month. The miner and two men he describes as claim buyers from Concord were driving to a Klamath River claim when they were robbed by bandits on State Route 96 between Willow Creek and Orleans in Humboldt County.

The highwaymen, using an Uzi and a .30-caliber machine gun, blasted the windows out of the sedan the trio occupied. The robbers took several hundred dollars but overlooked $14,000 in the trunk when scared off by a motorist.

The Bee has learned the case is being investigated as a drug-related robbery. Investigators suspect the $14,000 was buy money for a marijuana transaction.

Hill said the $14,000 belonged to one of his companions who earned it on a deepwater diving job in Scotland.

Mike Ulberg, a resident of the Denny community, told the Bee, "We all live up here because we choose to live here. We're miners. This is our way of living."

Ulberg and the other self-described miners denied any involvement in marijuana farming, although they admit the illegal weed is grown along the New River.

They say the Forest Service is using the marijuana issue and the government code on illegal occupancy of public lands to put them out of business.

The miners contend they are guaranteed under the Constitution and the 1872 Mining Law the right to file a claim and live on that claim.

Forest Service officials say they have no quarrel with legitimate mining operators—but add that some of the small dredge operators like those in Denny use mining law as a guise to appropriate a piece of public land to live on while prospecting for gold in the river and drawing public assistance.

Confrontations over illegal occupancies in the Denny area go back for more than a decade. In 1971, resource officer Chuck McFadin was hit in the neck by a ricochet bullet fired near him while he conducted a mineral examination on a questionable mining claim. The wound was minor.

Documents obtained by The Bee chronicle assaults on federal officers over an 11-year period. They disclose a pattern of vocal and physical intimidation, threats against the lives of rangers and their families, shooting high-powered rifles into and over the Denny guard station, vandalism and burglary and theft of ranger station equipment.

Other acts include pistol-whipping a ranger and arson at two Denny area guard stations. The fires were in retaliation for Forest Service destruction of crude cabins that the court had found to be illegally on public land.

"When I came to the district in 1974, one of the primary tasks was to resolve the illegal occupancies," said Wright. He has been under gunfire 13 times.

"It was shots not fired directly at me, but over my head or beside me . . . the kind that make your knees knock," said Wright. Wright was given a "superior performance" award this year for his courage and perseverance in fighting illegal occupancies.

"The thing that bothers me the most is the blatant disregard for any regulation in any way, shape of form," said Wright. "The average citizen cannot use the Denny area because of it."

The outlaw lifestyle prompted the Trinity County Board of Supervisors to adopt an ordinance that allowed Weaverville welfare office workers to exclude from their office persons wearing guns and knives as they arrive to collect assistance checks.

One man with high visibility even in this community is Edward James "Zeke" Isaacs, 41, a one-time minister who is described as the unofficial mayor of Denny.

"That guy has been run through the mill," said-Denny miner Dory Rititavato, referring to Isaacs. "He has put out an effort to stop what is going on and they (the Forest Service) literally drove the man to drink."

Rititavato is no fan of the Forest Service. Federal officers burned down his cabin last Jan. 27 after successfully completing an illegal occupancy case against him.

Isaacs has survived numerous violent encounters with the Forest Service and local law enforcement.

Said the grizzled Isaacs: "The government establishes illegal occupancy by a phony validity test and the Forest Service has been screwing the small miner ever since I can remember. They cheat, lie, make phony tests and make promises they won't keep.

"And I don't think anybody has been as bad as (Dave) Wright."

As for weapons, Isaacs said, "Everybody up here packs a gun for hunting purposes and protection. If you are going into the back country, you would be foolish not to carry a gun. Guns are just part of living here."

Guns also are a big part of Isaacs' extensive problems with the law.

When two Humboldt County sheriff's deputies arrested Isaacs in Willow Creek in 1980 on a Trinity County warrant charging assault with a deadly weapon, Isaacs was less than cooperative.

Isaacs, leaving his 12-guage shotgun on his car seat, kicked one of the officers in the groin, hit the other in the head with his fist and attempted to take one deputy's revolver. After the deputies wrestled him into handcuffs and put Isaacs into the rear of their patrol car, Isaacs proceded to kick the back windows out.

On July 18, 1980, Isaacs was convicted of assaulting the deputies and sentenced to 90 days in jail, ordered to make restitution for the damaged patrol car and ordered not to possess a concealable firearm.

On Oct. 26, 1981, Isaacs again went to jail, charged with brandishing a shotgun at a sheriff's deputy in Trinity County.

Denny area violence was fatal Feb. 21, 1978. On that night, following an argument which began over the sale of a mining claim, according to lawmen, Edwin Lee Irvin, 49, of Denny and Dana Ray E. Humphrey, 19, of Eureka were shot to death in a gunbattle that left two other men wounded on a bluff above the New River.

Mayor Isaacs was a bystander in this shoot-out, deputies said, and acted as a medical corpsman in getting the wounded across the river in a crude tram.

Michael Edwin Smith, 44, a new resident of Denny, was convicted of the Irvin murder and is serving a term in Folsom Prison. Smith killed Irvin in Doug McGimsey's cabin with McGimsey's shotgun.

Two years earlier, McGimsey had pointed the same loaded shotgun at Forest Service Special Agent Jim Listoe while the officer was inspecting the McGimsey cabin for compliance with its "special use residence" permit.

As violent as the "miners" are, marijuana farmers currently represent a more widespread threat to the safety of citizens visiting the Klamath or Shasta-Trinity national forests, officers said.

Hikers on the Sierra Trail through the Marble Mountain Wilderness Area are threatened and run out by gun-toting marijuana growers, while deer hunters are reporting shots fired over their heads while hunting in the Salmon River country.

Marijuana farmers are placing shotgun shell booby traps around the perimeter of their gardens, the shells rigged to fire when trip wires are disturbed. They also place bear traps on paths leading to the fields. Some maintain roving guard dogs and employ armed guards to protect their crops from armed robbers.

In Siskiyou County near Happy Camp, growers are the victims of outlaw motorcycle gangs who demand extortionate protection payments, The Bee was told. Forest officials said the gangs are attempting to organize the growers so the bikers can control major marijuana cultivations in California and southern Oregon.

Growers are not the only victims of extortionists. A well established logger said that while he was logging in the Denny area, Chick Bryant, a "miner" now said to be in Idaho, approached him and offered to protect his equipment for a fee of $500 a week.

After a week of negotiation, the logger and Bryant agreed on $250 per week payments. The logger completed the job without vandalism to his equipment.

The previous logger on the same Denny area timber sale was not so lucky. He refused to pay protection money and suffered cut hydraulic lines, dirt poured in radiators and fuel tanks, slashed tires and other acts of vandalism which drove him from the job.

The Bee's logger source asked not to be identified by name or his crew could not last three days on any logging job in Northern California, he said.

"These people are terrorists in every sense of the word," said the logger.

OUTLAW POT GROWERS OUTGUN, OUTRUN LAWMEN

(By Jim McClung)

EUREKA.—Last spring, at the start of the 1982 marijuana growing season in Humboldt County, there was not one sheriff's deputy assigned to narcotics law enforcement.

Now, as the cannabis crop begins to develop, there is still no one assigned to that duty.

It is one more bit of evidence of the fact that outlaw marijuana growers and hoodlums in the $1 billion industry are in control of vast rural areas in the North Coast counties of Sonoma, Mendocino and Humboldt.

Through terror, intimidation and force of arms, The New Lawless are denying the public the right to use its own land, effectively sealing off thousands of acres of Northern California's most spectacular scenery from the law-abiding.

"We're not afraid of the cops," a marijuana grower told The Bee one evening in the Blue Circle tavern in Garberville. "Even if the cops see something when they come in here ('here' being the grower's turf between Garberville and Shelter Cove in Humboldt County) they don't report it. They're scared of us."

There is reason to be scared in the North Coast counties. Machine guns chatter in the heavily timbered canyons, tourists unearth murder victims on Pacific beaches, gunfights erupt and synthetic drug labs explode in fireballs.

So languid has been the federal and state law enforcement effort against growers that in southern Humboldt County, west of Garberville, they have not been molested since 1979. That territory, from Garberville west, is unequivocally the worst of the coastal outlaw havens.

The source at the Blue Circle described a chilling new use for illegal Mexican immigrants. He said growers hire them to perform many of the daily chores, including guard duty, for two reasons: they work cheap and at the end of the season they are "expendable."

"Who cares if a Mexican is killed and buried?" said the grower. "Nobody misses them. Nobody reports them missing and probably very few know where they are."

The grower knows that he and his industry are an economic boon to the depressed North Coast. "Everybody owes their living to marijuana," he said. "Without pot, Garberville would be a ghost town."

In Whitehorn, a community just above the Mendocino County line, The Bee found the toughest-looking marijuana growers encountered while seeking out The New Lawless.

They were dirty, tattooed, bearded and often accompanied by vicious-looking pit bulls. Guns and knives were commonplace.

Asked to talk about the violence surrounding the marijuana industry, one Whitehorn dweller said, "That's a touchy subject, man. No one wants to talk to you about that. You better get on down the road."

In Garberville, another grower said, "It's stupid for you to go out and try to talk to these hippies because they'll kill you if they decide that's what they should do."

A veteran police officer said of the reporter's visit to Whitehorn: "It's just like the Indians. They believe you can't kill an insane man because he's protected by the gods. I think they put you in the same light."

U.S. Attorney Joseph P. Russoniello of the Northern District told The Bee, "That's one of the side effects of fairly widespread avoidance of the law.

"You develop an atmosphere of lawlessness . . . such as bringing a bunch of Mexicans up and using them on the harvest and then murdering them. That's really insane, but when they have so little contact with law enforcement they can talk that way."

There is abundant irony in the fact that the U.S.-Mexican program to eradicate marijuana south of the border with the herbicide paraquat in 1976-77 led ultimately to Northern California's dope and violence problems. Mexico was the major producer for U.S. Markets until paraquat killed the weed and the market.

As quickly as the Mexican weed expired in the sun, the hippies of the 1960s who by then were ensconced in communes and crude dwellings on the northern coast recognized the marketability of their already reputable "California homegrown."

By 1979, the state Department of Justice recognized that Humboldt, Lake, Del Nort and Mendocino counties had replaced Mexico as the primary supplier to domestic users. And lawmen also realized that hoodlums were replacing hippies as cultivators of the commercial product.

As the California home-grown market expanded, so did crop size. As the price escalated, so did the level of violence which growers were willing to use to protect their crop.

Today, say law enforcement sources, the emerging commercial marijuana industry has expanded into 43 of the 58 California counties and into 19 Western and Southern states.

Intimidation of the U.S. Forest Service, California Division of Forestry, California Department of Fish and Game and of lawmen has made them abandon some of their responsibilities.

The intimidation is intense in Whitehorn, Honeydew, Alderpoint and Orleans in Humboldt County; from Willets north in Mendocino County; and in northwestern Sonoma county.

Humboldt County District Attorney Bernard C. DePaoli said, "It certainly has contaminated the northeastern part of the county, including the youngsters on the (Hoopa Indian) reservation, and it certainly has contaminated the southern part of the county—Garbervill, Blocksburg and Briceland."

DePaoli estimates commercial cultivation of marijuana has increased the level of violence by 200 percent in the last two years. He said the problems of violence have not been faced by the Legislature and county board of supervisors.

"I see Humboldt County becoming more of a battleground, more of a violent atmosphere," said the district attorney.

DePaoli pointed to a recent murder: "The case could have been solved in probably 36 hours. Instead no one even reported the guy dead for two months because it happened right in the middle of harvest.

"All the players in this action were non-Humboldt County people, including the deceased, and it was all over marijuana. In fact, the guy was killed by his own bodyguard."

Another example occurred last summer: "In three days we indicted something like 24 people . . . for violent acts over who's going to control marijuana traffic on the (Hoopa Indian) reservation.

"What we had was a bunch of doped up Native Americans . . . who were shooting at each other in downtown Hoopa, in the middle of the day . . . with the tourists driving by."

DePaoli predicted that outlaw violence is reaching such levels that, "I think you are going to find armed establishment reaction and resistance in the future—and I'm not an alarmist."

Election Day in Humboldt County indicated that marijuana carries political as well as economic clout. DePaoli said his hard-line stance on the issue cost him his job in the primary. Both DePaoli and Eureka Police Chief Ray Shipley, candidate for county sheriff, lost to candidates with a more liberal stance on the marijuana issue.

"I think what happened in both the race for sheriff and district attorney is that the public made a statement about its desire to allow marijuana a relatively healthy chance at physical and financial survival in our county," said the prosecutor.

"It seems as though in those areas where marijuana is more frequently grown, I received less than 10 percent of the vote—as did Shipley, who took a strong stand against marijuana. People out in the woods say that's what did it."

Humboldt County Sheriff Gene Cox said his department did not field a narcotics deputy because the Board of Supervisors stripped his budget of all narcotics enforcement funds and has repeatedly turned down sizable federal grants for marijuana eradication programs.

Cox said that areas like southwestern Humboldt have escaped raids because there is no money available to launch a respectable anti-marijuana effort.

A veteran narcotics officer told The Bee that there is only "selective enforcement" of narcotics laws in Humboldt. The officer pointed to an aerial surveillance flight last fall in which 80 marijuana gardens were spotted on a 4-mile-long stretch of hillside.

All but three of the 80 gardens were left to ripen and be harvested because the sheriff could not finance raids on them.

No one has more of a potential for conflict with marijuana growers than cattle ranchers. There is an uneasy standoff between the two.

"The hipples don't want a shooting war with me and vice versa," a rancher told The Bee. He added that identifying him as a source could lead to his ranch being burned, his cattle shot or his family assaulted.

"None of the ranchers snitch on growers because it would lead to a war that the rancher would lose."

He explained that ranchers have real estate investments, machinery, buildings and crops to protect, while the outlaw growers usually have nothing but old vehicles and promising gardens.

"Cows can't eat black grass," the rancher said, referring to a grower who during the 1981 season set more than 20 fires in the Alderpoint area.

The fires were in retaliation for a police raid on a pot patch. The grower believed someone in the forestry department had reported his marijuana crop.

In the nearby Mad River country in the 1980 season, growers set range fires in retaliation for each raid on their gardens. The fire-setting subsided, however, when the growers discovered that more patches were being found and reported by firefighters sent in to tend the blazes.

South of Humboldt County is Mendocino County, an estimated 1,700 commercial marijuana growers practice their trade. Arrest data and information gathered from growers reflect the grower lifestyle:

Of the 69 arrests on cultivation charges in Mendocino County between June 1 and Aug.

10, 1981, all but one suspect was drawing welfare payments or food stamps to live on while their valuable crops matured.

One narcotics agent told The Bee that in three years of marijuana eradication work in Mendocino county, he had arrested only one grower who was not on welfare, drawing food stamps or in the Medi-Cal program.

In Mendocino County the concern about violence is also increasing. Lt. Max Anglin of the Mendocino sheriff's office said, "Under normal circumstances I will not send a lone deputy into the northwest area of the county. There you are too far from help and the potential for violence against our deputies is definite."

As to visitors in the same area, Anglin said, "As long as travelers stay within 50 feet of the roadway they will be safe. the ones we worry about are the deer hunters and hikers—they are candidates for booby traps and shootings."

The officer said the No. 1 dope-growing community is Laytonville. Willets is second.

He pointed to the double murder of a Ukiah couple last October as one of the more brutal examples of increased violence linked to the narcotics trade.

In that case, Larry Cape, 39 and Venita Cape, 33, were killed with multiple gunshots to their heads and dumped on Cow Mountain. No charges have ever been filed.

Mendocino County District Attorney Joe Allen, sponsor of a ballot measure to legalize cultivation of marijuana for personal use, credits commercial cultivation for substantial increases in homicides, kidnapping, armed robbery and attempted murder.

Explaining his stance on cultivation for personal use vs. commercial use, Allen said, "It is like the difference in a bear cub and a full-grown grizzly. The one is not very dangerous and the other is."

Allen said this of The Lawless: "I think we have a pattern of outlaws of one kind or another taking to the hills. That was true in the Old West—the Hole in the Wall Gang, the Wild Bunch.

"What you did when you organized an outlaw gang was move off into some box canyon 40 miles from the county seat on the theory that you would be safer from law enforcement. . . . Today that is untrue . . . but the myth lives on."

In Sonoma County, also, cultivation of marijuana abounds, but the quality of the product has increased. Last fall, Sonoma County sheriff's officers flew with a San Francisco television crew to assist in spotting patches of marijuana.

The helicopter crew found a 300-plant marijuana garden on the 315-acre Wheeler Ranch, a highly publicized hippie commune from the early 1960s.

The find caused one lawman to observe that the only thing time had changed was the evolution of cheap hippie pot of the '60s into the high quality sinsemilla of today.

The residents, as did those of 20 years earlier, lived in shacks, lean-tos, tents and other non-code residences scattered about the property. However, unlike crops of the 1960s, that 1981 crop, had it been left unmolested to harvest, would have been worth in excess of $300,000.

FOLLOWING THE MARIJUANA CONNECTION

(By Jim McClung)

Connoisseurs of the fine marijuana in every major U.S. city will accent Christmas dinner this year with a joint of California homegrown, signaling a major marketing success for a highly illegal and in most cases inferior product.

The smoker may be in Houston, Dallas, Cleveland, Atlanta, Chicago, Boston and New York City. His marijuana may be from Humboldt, Trinity, Butte, Mendocino, Shasta, Placer and Monterey counties in California, and Josephine, Jackson and Douglas counties in Oregon.

The smoker and his weed will be together because the California wholesalers, middlemen and financiers trafficking in all lines of illegal narcotics have forged a public relations success that is to be envied.

"It's a fad Smokers in Cleveland can't get enough of California homegrown because it's the thing to do. Connoisseurs everywhere but California are smoking California homegrown," a wholesaler told The Bee.

"California smokers generally are more sophisticated and prefer Thai weed, Mexican red hair and a few lesser known exotics, all of which are better products than most of the California homegrown," the drug merchant told The Bee.

"The marijuana scene is like the wine scene in that the same standards apply. Not everybody can manufacture Dom Perignon just because they may be able to grow grapes. There are a lot of people growing cannabis indica in the state, but only a very few are producing stuff like premium 'Mad River Skunk,' " one source explained.

In the middle 1970s, the United States and Mexican governments launched a marijuana eradication effort that consisted of spraying paraquat, a herbicide, on the large Mexican plantations of marijuana that supplied the insatiable U.S. appetite. The foreign eradication effort spawned a California marijuana cultivation industry that first surfaced in counties from Monterey north and today produces a significant portion of the illegal weed marketed in the United States.

Commercial crops of cannabis indica sinsemilla are grown in 43 of California's 58 counties and in 19 Southern and Western states. Federal studies suggest that the California crop alone produces $1 billion in tax-free revenue for those in the trade.

To determine how homegrown finds its way from the fields in Northern California into the rosewood boxes of marijuana connoisseurs in the East, The Bee interviewed growers, dealers and wholesalers.

The Bee learned that there are thousands of persons, young and old, educated and not, violent and nonviolent, farming the illegal weed in Northern California and feeding their families from the profits.

There are thousands more who add to their annual income from legal jobs by growing a few plants of marijuana. And, there are those who operate plantation style with multiple gardens scattered over many acres.

A source in the California Bureau of Narcotics Enforcement told The Bee that "Operation Sinsemilla," an eradication effort using the combined forces of federal, state and local law enforcement agencies, had proven effective. He said that the size of the marijuana gardens in the state had been reduced from several thousand plants to a few hundred because the strike force uses aerial surveillance as its primary tool.

However, people in the trade say that the reduction in the size of the marijuana gardens is a result of growers learning that they can make as much money from 20 to 40 pounds of premium "skunk weed" as they can from 200 pounds of of marijuana of varying and lesser quality.

"The guys who grow weight get a cheaper price every year, while the small gardener who comes up with 20 pounds from 50 plants and takes his time to cure it properly will get top dollar. Dealers will seek him out for his crop, while the bulk farmers have to search for a buyer," a source told The Bee.

Much of the homegrown is produced on small ranches in the rural mountainous regions of Northern California. It is planted in March and April and requires about one full-time farmer for every 100 plants. It is harvested in the late fall and undergoes a curing process that may take several weeks.

The established farmer will have verbal contracts to place his weed in a marketing cooperative with other farmers or have previous arrangements with individual wholesalers. He will usually have to "front" his crop to the wholesaler and wait until the wholesaler gets paid before getting his money.

Many of the growers try to circumvent the middlemen by marketing their products through relatives and friends who generally sell to unsophisticated street dealers and users.

The homegrown leaves the rural drying houses in car trunks, pickup trucks, rental trucks and airplanes. It is repackaged by dealers, depending upon the quality and the ultimate target buyer.

"The secret to getting the top tag for premium dope is to get your product into 'the flow' that spreads across the country and supplies all kinds of narcotics to every major city," says a source.

Premium homegrown dope, getting into "the flow" as it fans out from San Francisco, will get the top dollar because "the people with the big bucks will stand in line to get it," a source told The Bee.

The top homegrown like "Mad River Kush," "Humboldt Skunk," and "Hoopa Kush," goes to the wealthy in cities like San Francisco, Los Angeles and Cleveland. Rock stars are the first targets of dealers with top-of-the-line produce.

California homegrown is one item in a whole line of produce that keeps the narcotics dealers jumping all year long.

Homegrown, going into "the flow" at premium prices of about $1,600 a pound, competes with Mexican red hair that enters the flow at $575 and Thai weed at $1,200 a pound.

Mexican red hair, grown in Mexico under the supervision of U.S. farmers, generally is of far greater quality than homegrown.

Thai weed, which is the most popular smoke in California, generally is also of higher quality than homegrown.

But by the time the homegrown hits East Coast users, the price may have swollen to $3,200 a pound or $250 an ounce. "East Coast smokers seek out and pay that high tab even for low quality California homegrown because it is the thing to smoke. You can sell that stuff in the trendy places where people can afford fads," said the source.

Sources told The Bee that reputable wholesalers and dealers operate in existing and well-established channels that protect them from law enforcement. These connections are the most important thing for any grower.

"A respectable dealer or middleman knows where to sell 'skunk weed' and just as easily knows where to unload 'shake,' (a lowgrade smoking material), a source said.

"The last thing a reputable dealer or middleman wants to do is sell a load as top quality when, in fact, it may be so poor that it will damage his reputation. In this business, like many others, if you burn somebody

with inferior product, it will come back to haunt you," a dealer said.

The Bee sources said there are families of dealers with access to "the flow" in every major California city. "It is like the Laguna Beach crowd, which consists of an old group of hash smugglers and big-time dealers who have such established connections that they can easily move the multi-ton loads.

"They answer to about six guys who call all the shots. They are dependable and everybody is screened off to ensure that nobody kicks some bad money up the street.

"A safe deal requires established guys operating inside the established flows. A lot of guys, like the Laguna Beach bunch, make a lot of money in the flow without ever seeing the product. They just 'middle' the deals, never touching anything but money."

The term "middling" refers to a person who arranges the transfer of money and marijuana between parties who never see one another.

The flow in and out of San Francisco is in the hands of a few financiers, some of whom are so competitive that they engage in a game of seeing who can put together the largest shipments from Thailand. Some of the shipments exceed 100,000 pounds of marijuana.

"These rich dudes snort China white heroin from the Golden Triangle just to prove they are at the top," said a source.

In contrast, a successful dealer who beefs up his line of imported dope with California homegrown may be hesitant to go into the farming business himself in spite of huge profits that may be made.

"A dealer may finance a homegrown operation or several of them in order to pick up an unusually large input of cash, but it is a very risky business because of the exposure it requires," sources told The Bee.

"Setting up a plantation requires land, land ownership, workers, buildings, irrigation systems and that the financier trust his freedom to a person who has expertise at growing and curing marijuana. It is a far riskier task than middling a load here and there," the source said.

In addition, the source said, to run a successful farming enterprise would require a dealer to mix and mingle with common criminals and people who live and think like animals.

"It all goes to the company you keep. If you run around with ex-convicts you soon will be one of them," a source said.

"If you just peddle prime stuff to executives, rock stars and judges, or people who do, you can bet they are taking care of you, to take care of themselves," the source said.

But, there are thousands of marijuana growers toiling in their gardens today, looking toward the end of the growing season and financial reward.

Many of them are on their own 40- to 120-acre ranchettes, while others tend gardens on federal lands.

One grower with 31 acres, paid for with the first-year profits, is building himself a ranch house in southern Humboldt County and looking toward a banner year.

He said he expects to net some $35,000 to $45,000 from 100 plants and lives pretty well off the tax-free income. His goal is maintaining his property and income for 10 to 15 years and going into early retirement.

The grower scoffed at a reporter's salary, asking, "After taxes, what do you have left?"

ACID RAIN

Mr. MITCHELL. Mr. President, the environmental phenomenon of acid rain has already resulted in significant environmental degradation of the water resources of the eastern United States. The Senate Committee on Environment and Public Works approved last month a comprehensive acid rain mitigation strategy to alleviate the damage to out lakes and streams that is now occurring.

I would like to call to the attention of my colleagues two recent occurrences outside of this country which relate to the acid rain issue. They illustrate the growing international consensus about the severity of the acid rain threat, and the extent to which the view of the Reagan administration has isolated the United States from the mainstream of scientific and political thought.

The first illustration occurred this summer, when an international conference attended by 27 countries and international organizations in Stockholm concluded that "further concrete action is urgently needed * * * to reduce air pollution" to combat acid rain. The official conference was preceded by a meeting of international experts who reported that enough is known in order to reduce damages caused by acid rain.

The official conference conclusions states that the "acidification problem is serious and even if deposition remains stable, deterioration of soil and water will continue and may increase unless additional control measures are implemented and existing control policies are strengthened." The conference report found "the establishment and implementation of the concerted programs for the reduction of sulphur emissions to be a matter of urgency. Similar action should be taken as soon as possible for reducing emissions or nitrogen oxides."

The conference, sponsored by the Swedish Government, was held in Stockholm on the 10th anniversary of the 1972 U.N. Conference on the Human Environment at which Sweden first raised its concerns about acid rain. In contrast to that first conference, the meeting last month demonstrated a universal agreement among all countries that acid rain is a serious problem affecting both Europe and eastern North America. There was nearly unanimous agreement that action is needed now to reduce emissions. Only the United States and Britain argued that controls should be delayed until more research is completed. However, neither Britain nor the United States, represented by Kathleen Bennett of the U.S. Environmental Protection Agency, dissented from the conference conclusions that more controls are urgently needed.

The United States and British positions were contradicted by the report from the meeting of international acid rain experts which preceded the governmental conference. The experts found that sensitive lakes and streams in Europe and eastern North America are now receiving three to six times more acidic deposition than they can tolerate; that reductions in emissions will result in equivalent reductions in deposition over the industrialized regions where the damage is occurring; and that each reduction in deposition will result in an improvement in sensitive lakes and streams.

The experts also concluded that control techniques to reduce sulfur emissions were available and that possible future improvements in control techniques did not justify delaying emission reduction programs now.

The second illustration was a speech by the Honorable John Roberts, Canadian Minister of the Environment, on September 11, 1982. It is yet another reminder of the importance of the acid rain issue to our relationship with our most important ally.

The Canadian Government continues to express its concern that the United States has no intention of implementing its commitment in the Memorandum of Intent entered into with Canada on the issue of acid rain in 1980.

In his speech, Mr. Roberts expressed his frustration over the "disappointing lack of action toward resolving the acid rain problem." He cited language from the Memorandum of Intent, which indicates a high degree of commitment toward resolution of the problem:

> The Government of Canada and the Government of the United States of America:
>
> Share a concern about actual and potential damage resulting from transboundary air pollution, (which is the short and long range transport of air pollutants between their countries), including the already serious problem of acid rain; and
>
> Recognize this is an important and urgent bilateral problem as it involves the flow of air pollutants in both directions across the international boundary, especially the long range transport of air pollutants . . .

The memorandum also commits both countries to specific actions. It states that:

> To combat transboundary air pollution both Governments shall: develop domestic air pollution control policies and strategies, and as necessary and appropriate, seek legislative or other support to give effect to them; and promote vigorous enforcement of existing laws and regulations as they require limitation of emissions from new, substantially modified and existing facilities in a way which is responsive to the problems of transboundary air pollution; . . .

President Reagan has also made verbal commitments to deal with the problem of acid rain to Prime Minister Trudeau on two separate occasions.

But there has been little movement in the negotiations between Canada and the United States on a bilateral

air pollution treaty. Mr. Roberts described the situation as follows:

Over two years ago several scientific work groups were set up under the Memorandum of Intent to gather and interpret all of the available scientific information on acid rain and to prepare findings and conclusions to allow our two countries to map out precise strategies and plans of attack. Many of the best U.S. and Canadian scientists and experts were assigned to these work groups. We had anticipated that by now the work groups would have completed their tasks and we would be discussing and negotiating the actions our two countries needed to implement to achieve environmental needs and fulfill our international responsibilities. Instead, virtually every step of progress we thought we had made has been countered with a response that we return to first principles. We have only recently reached agreement on the final report on one work group. That is the first of five.

His conclusion is that:

Despite the very plain language of the Memorandum of Intent and all the fine statements that have been made since, very little has actually been accomplished. There seems to have been actual foot-dragging in some quarters.

The Canadian Government is now reappraising the usefulness of continuing the negotiations, as a result of the less than enthusiastic approach of the Reagan administration to the problem.

This country does not make casual commitments to another country, particularly our most important trading partner, in a negotiated Memorandum of Intent. Yet in the past 2 years, the Reagan administration has only obstructed useful dialog in the acid rain negotiations. For example, when Canada made an offer to reduce its sulfur emissions by 50 percent if the United States would do the same, our negotiators never even responded.

I understand and share the frustration that must be felt by the Canadians. As the scientific evidence of acid rain damage to water, crops and forests grows, and as the international community grows more united in the conviction that action must be taken now, the Reagan administration grows more adamant in its position that we just study the problem some more.

At the same time that the administration is demanding more study on acid rain, it has rejected a plan by the National Academy of Sciences for a joint review by the NAS and the Royal Society of Canada of scientific information that would form the basis of a United States-Canadian treaty to deal with acid rain on a bilateral level.

The administration not only rejected the NAS proposal, but has also cut off funds to this eminent scientific body for further research on acid rain, for the reason that the NAS lacks objectivity.

It is uncertain that the Reagan administration could be persuaded by any amount of scientific evidence that acid rain is a serious environmental problem. Notwithstanding the administration position, I call to the attention of my colleagues the recent findings by the international community, and the concerns expressed by Canada. I hope when the acid rain issue is debated by the Senate that this body will pay heed to the opinion of the American scientific community, the international scientific community, the Government of Canada, and the other 19 governments in attendance at the 1982 Stockholm conference.

The Committee on Environment and Public Works of this body has done so, by adopting a strong acid rain proposal which is a slightly modified version of the legislation I introduced a year ago. We examined the facts, and acted in the only responsible way possible—our strategy will reduce sulfur emissions in the United States by 8 million tons over the next 12 years. Enactment of this strategy would implement our commitment to the Canadians. They have taken the committee action as a heartening sign, notwithstanding contrary signals from the executive branch.

The United States has always been a leader in responding to environmental problems. Our 1970 Clean Air Act was a landmark law not only in this country but internationally as well. It has been the blueprint for the subsequent enactment of air pollution control laws throughout the industrialized world. Yet on the acid rain issue, we are becoming not just followers but obstructionists unwilling to acknowledge reality.

I hope we in the Senate will not abdicate our leadership role when this body has the opportunity to consider the issue of acid rain.

I ask unanimous consent that the conclusions and recommendations of the Stockholm 1982 Conference on Acidification of the Environment and the statement of the Honorable John Roberts be printed in the RECORD at this point.

There being no objection, the material was ordered to be printed in the RECORD, as follows:

THE 1982 STOCKHOLM CONFERENCE ON ACIDIFICATION OF THE ENVIRONMENT: CONCLUSIONS AND RECOMMENDATIONS

1. The Conference noted that 13 countries had ratified the Convention on Long-Range Transboundary Air Pollution and urgently appealed to the remaining signatories to expedite their ratification so that the Convention formally can enter into force in the course of 1982. The participating Ministers and Heads of delegation reconfirmed the commitment to the full implementation of, and active contribution to, the work within the Convention.

2. The Conference took note of the progress made under the provisional implementation of the Convention.

3. It was noted that in North America the governments of Canada and the United States are developing a bilateral agreement which will reflect and further the development of effective domestic control programmes and other measures to combat transboundary air pollution and are taking interim actions available under the current authority.

4. The Conference considered that the signing of the Convention and the adoption of the Resolution on Long-Range Transboundary Air Pollution, in November 1979, was a clear recognition that acid deposition from air pollution, including long-range transboundary air pollution, is one of the major environmental problems, requiring policies for further urgent action at the national level and concerted international efforts.

5. The Conference recognized the value of developing a continuing public dialogue and the role of non-governmental organisations in this regard in order that scientific information is made available in an appropriate form.

6. Estimates indicate that in recent decades acid deposition has increased significantly, due primarily to increases in emissions of SO_x and NO_x through the combustion of fossil fuels. During the 1970's emissions increased in some countries, while others kept emissions of SO_x at stable levels or even reduced them. This can largely be explained by energy conservation measures, by reduced economic activities and by effects of emission controls.

7. An assessment of trends over the next 20 years indicates a stabilization of emissions and possibly a reduction. There are signs, however, that emissions in some countries are not going to follow the downward trend exhibited by those in some other countries. In addition it was recognized that downward trends in SO_2 emissions might be reversed if countries failed to comply with the obligations contained in the Convention.

8. Through various monitoring programmes, especially the European Monitoring and Evaluation Programme (EMEP), it has been confirmed that in most ECE countries a large part of acid deposition is of foreign origin.

9. The acidification problem is serious and, even if deposition remains stable, deterioration of soil and water will continue and may increase unless additional control measures are implemented and existing control policies are strengthened.

10. Based inter alia on the report from the preceding Expert Meetings, which is annexed to these conclusions and recommendations, the Conference agreed that further concrete action is urgently needed within the framework of the Convention to reduce air pollution, including long-range transboundary air pollution. Such action should include:

(a) Consultations within the framework of the Convention with the purpose of establishing concerted programmes for the reduction of sulphur emissions taking into account environmental needs, socioeconomic priorities and energy considerations. The Conference considered that the establishment and implementation of the concerted programmes for the reduction of sulphur emissions to be a matter of urgency. Similar actions should be taken as soon as possible for reducing emissions of nitrogen oxides;

(b) The use of best available technology which is economically feasible for the reduction of sulphur emissions. Flue gas desulphurization (FGD) has been proven as a main SO_x control strategy. Alternative technologies like the use of clean fuels, fuel cleaning and process modification are also

applied. In new and, where practicable, rebuilt installations, such as power stations, the above mentioned technologies should be introduced. Due to the consequences for transboundary pollution high stacks in place of emission control devices must today be considered an obsolete abatement mechanism for sulphur emissions. Best available technology which is economically feasible should also be applied to reduce NO_x emissions from both stationary and mobile sources;

(c) In applying these technologies account should be taken of the need to minimize waste products and polluting discharges to other environmental media;

(d) The support for research and development of advanced control technologies, appropriate for reducing emissions of SO_x and NO_x as well as the use and transfer of such technologies;

(e) The further development and implementation of energy conservation measures;

(f) The further development of the North American monitoring programmes as well as the European Monitoring and Evaluation Programme (EMEP), inter alia through better geographical coverage; improved emission data; standardization of sampling and measurement methods and improved modelling.

STATEMENT OF HON. JOHN ROBERTS, MINISTER OF THE ENVIRONMENT, CANADA

I'm honoured to be here today, and to have this chance to speak to the members of the Vermont Natural Resources Council. This must be a unique opportunity for you Vermonters too. Here it is an election year, you're being addressed by a federal politician, and he isn't asking you to vote for him.

While I'm not asking for your vote, I am asking for your support on an issue that is of great concern to me as a Canadian, and which should be of equal interest to you here in the Green Mountain State: the menace of acid rain.

I've seen back issues of your excellent newsletter, the "Vermont Environmental Report," so I know that you're all aware of what acid rain is, and that the threat that it poses to our lakes, streams and forests is all too genuine. It seems incredible to me that there are still people around today who are seriously advancing the argument that the case against acid rain is as yet unproven. Over 3,000 scientific studies have already been done on the subject. One recent Norwegian project alone is a compilation of over 100 papers describing the environmental impact of acid rain over an eight-year period.

In Canada we know that, of the 2,600 lakes sampled thus far in my home province of Ontario, 48 percent were identified as being very sensitive to acid rain. The United States National Academy of Sciences, the United States/Canada Research Consultation Group, the National Research Council of Canada—all argue that acid rain is a genuine threat, that it is caused by the long-range transport of sulphur dioxide and nitrogen oxides, and that emission controls are the best means of dealing with the problem.

I would like to emphasize that acid rain isn't something that threatens only Canadian resources. The evidence indicates that areas of the United States, especially here in new England, are also in jeopardy. A study, prepared for your Senator Stafford by the Office of Technology Assessment, found that one out of every four streams in the northeastern United States has already been damaged by acid rain. In the larger 27-state region covered by the study, one out of five streams has been harmed by acid rain.

The report indicated that in the northeast and upper midwest up to 80 percent of the lakes and streams are at risk. It held that there would be no hope of reversing possible damage to those bodies of water unless steps are taken to reduce the air pollution that causes acid rain.

I know that your reaction to these distressing findings will be like mine—one of shock, sadness and alarm. We have already lost many lakes to acid rain. They have been rendered fishless. A staggering tens of thousands of our lakes are in danger.

Frankly, I am discouraged that I have to go around from place to place reciting this grim litany in order to make the point that the case against acid rain has already been amply demonstrated. In fact, the validity of the arguments against acid rain has been accepted at the highest levels.

The United States and Canada signed a Memorandum of Intent on Transboundary Air Pollution on August 5, 1980. The preamble of that document stated:

"The government of the United States and government of Canada share a concern about actual and potential damage resulting from transboundary air pollution, including the already serious problem of acid rain."

The memorandum continues that both countries: ". . . reocognize that this is an important and urgent bilateral problem, as it involves the flow of air pollutants in both directions across the international boundary, especially the long-range transport of air pollutants."

President Reagan put it this way when he addressed our House of Commons on March 11, 1981: "We want to continue to work cooperatively to understand and control the air and water pollution that respects no borders."

Two months ago, at the June, 1982, Stockholm Conference on the Acidification of the Environment, a report was released that was endorsed and approved by all participating countries, including the United States. Paragraph eleven of the ministerial statement read:

"The acidification problem is serious and, even if depositions remain stable, deterioration of soil and water will continue and may increase unless additional control measures are implemented and existing control policies strengthened."

Let me reiterate: these statements about the reality and pressing urgency of the acid rain problem were endoresed and approved by representatives of the United States at a ministerial conference just this past June.

However, I reluctantly have to concede that there has been a disappointing lack of action toward resolving the acid rain problem. Indeed, despite the very plain language of the memorandum of intent and all the fine statements that have been made since, very little has actually been accomplished. There seems to have been actual foot-dragging in some quarters.

For instance, over two years ago several scientific work groups were set up under the memorandum of intent to gather and interpret all of the available scientific information on acid rain and to prepare findings and conclusions to allow our two countries to map out precise strategies and plans of attack. Many of the best U.S. and Canadian scientists and experts were assigned to these work groups. We had anticipated that by now the work groups would have completed their tasks and we would be discussing and negotiating the actions our two countries needed to implement to achieve environmental need and fulfill our international responsibilities. Instead, virtually every step of progress we thought we had made has been countered with a response that we return to first principles. We have only recently reached agreement on the final report on one work group. That is the first of five.

It was the lack of progress in our negotiations of a transboundary air pollution agreement that led me to the decision earlier this year to undertake a reappraisal of the usefulness of continuing the negotiations. This reappraisal is still going on.

Canadians, and people from Vermont too, are not interested in lip service and fine statements. We want action, before it's too late.

At the same time that bilateral action on acid rain has been stalled, a disinformation campaign on the subject seems to have started, and what one of my Canadian colleagues has called an "information haze" has been created. I've heard that the acid rain debate is really a Canadian conspiracy to force controls on American power plants, and thus make Canadian power exports more attractive. The following statements have actually been seriously advanced:

"There are a host of natural as well as man-made sources of these compounds (sulphates and nitrates), including lightning, volcanoes, sea spray and the organic decay of vegetation."

Or:

"It is not surprising to find that tomatoes are acidic, but most people are surprised to learn that a delicious pear can be more acidic than a tomato, or that bananas and carrots are nearly as acidic. All these have pH values that are well within the range of the rain that is the subject of scare headlines in the media."

The latter of these two imaginative statements can be credited to the Consolidation Coal Company; the former to the Edison Electric Institute in a brochure foisted upon an unsuspecting public entitled "Update on Acid Rain."

This is the level of the so-called serious debate that purports to show the "other side" of the acid rain question. Actually, it is not at all uncommon to record rain that is as acidic as, or more acidic than vinegar. It makes no difference at all to what fruit we compare acid rain; if it is acidic enough to kill a lake, it will. Certainly SO_2 and NO_x can be present in the atmosphere from natural sources. But in North America, over 90 percent of the sulphur in the air comes from man-made sources.

The Wall Street Journal recently published an editorial saying that the acid rain question calls for more research, that as yet too many unproven variables enter the equation, and that controls might prove to be ineffective, costly and inflationary. By a very strange coincidence, the impetus of that editorial seems to have come from information produced by the National Coal Association.

However, listen to what a responsible industry spokesman has to say.

S. David Freeman is the director of an enormous public utility, the Tennessee Valley Authority. According to Mr. Freeman, in a speech given to the Georgia Conservancy on June 24, 1982, by the mid-70s, the TVA had become the largest single source of atmospheric sulphur pollution in the entire United States, spewing out over 2.4 million tons of sulphur dioxide a year.

He admitted that cheap electricity was being subsidized by unacceptable air pollution.

Three short years ago, only five of TVA's 63 coal-fired plants met the Environmental Protection Agency's sulphur dioxide standards. Today, 49 of those plants are in full compliance with emission standards, and the authority is well on its way to compliance at the other 14. Through the increased use of low sulphur coal and various pollution control devices, the TVA is advancing on a rapid timetable and will achieve total compliance within the next year. At that time, it will have cut its pollution in half.

I was trememdously incouraged by Mr. Freeman's statements. As he put it, the TVA was merely facing the ecological facts of life. He bluntly stated that cheaper power prices at the cost of dirty air was simply not a bargain for the people of the Tennessee Valley. If the Tennessee Valley Authority can do it, why not other utilities?

Or take the example of the greatest single Canadian source of SO_2 emissions, the International Nickel Company smelter at Sudbury, Ontario. By the end of this year, INCO will have reduced SO_2 emissions to about one-third of what they were the peak years of the sixties.

Canadians aren't asking Americans to do anything that we aren't willing to do ourselves, or, for that matter, that isn't already being done by the TVA. We have determined and agreed to an environmental objective, a target loading for sulphate deposition, that would protect moderately sensitive lakes and streams from acidification. We want you to agree to that environmental objective. We will each have to take different actions to achieve it, and the design of these actions is a legitimate domestic right and reponsibility of each of our two countries. We have committed ourselves to a 50 percent reduction on SO_2 emissions east of the Saskatchewan-Manitoba border by the year 1990 if you take a parallel course of action east of the Mississippi River.

We are not seeking from you the same levels of emission reduction from the same types of sources as we might act upon in Canada. We are seeking a course of action that, in concert with our proposal, would achieve the environmental objective, that would protect moderately sensitive lakes and streams in our two countries from transboundary acidification. These parallel courses of action might not solve the entire acid rain problems, but they would certainly alleviate it, and they would buy us some much needed time. The TVA is reducing its SO_2 loadings by half without too much trouble, why can't the rest of us do it too?

Now, I'm not so naive as to think that this can be done without spending money. In the U.S., emission controls to attain these ends might lead to an average increase in the utility rate to consumers of about two percent, though this might be reduced by improvements in technology. In Canada, given the population differential—we have about one-tenth the population you do—the burden on individual citizens would be three to four times as great as on Americans. We would gladly pay it, and I don't say this merely as a matter of rhetoric; poll after poll has indicated readiness for Canadian consumers to safeguard the environment, even though the cost will come out of their own pockets.

The question we must ask ourselves is can we afford not to pay for controls. Fishing, tourism, the lumber industry—literally billions of dollars are at stake here. If we do not act now to stop acid rain, we are risking the economic and environmental prosperity of our own future generations.

Yet if I speak out on the subject as I am doing today, I know that I will be accused of interfering in American internal affairs. Nonsense. The long-range transport of air pollutants is by definition a bilateral issue. Some of your pollution comes from Canada; some of our pollution comes from the United States. Neither country can solve this problem on its own.

When Canadian experts provided information on acid rain in Washington, they did so at the express invitation of your senators and representatives; I do not call this interference. When our House of Commons passed a resolution congratulating your Senate Environment and Public Works Committee for voting favourably on a bill to reduce U.S. SO_2 emissions by 10 milion tons within the next 10 years, as it recently did, I don't call this interference.

If Canada were to drop out of the race entirely, Vermont would still have an acid rain problem to face. Nutrients would still leach from your soil, the loss of which would still jeopardize your forests and possibly agriculture. Your lakes and streams would still be dying, your trout and other fish still be disappearing. You would still have to combat the campaign of disinformation which holds that we don't yet have enough scientific information to justify acting against acid rain.

I say we do have enough information to act; it's not a matter of science any longer, it's a matter of political will. We have reached the point where a decision to stall and drag our feet on the pretext that more research is needed is, in fact, a political decision to do nothing. How much more honest it would be if the naysayers would simply come out and say, "No, the lakes simply aren't worth saving." We then could at least publicly debate the issue in an honest and open manner.

Our two nations have a long and fruitful history of working together to solve our mutual problems. Look at the excellent job we have just done to clean up phosphorous pollution in the Great Lakes. You know we can work together; we must work together. It is within our power to overcome the menace of acid rain. I fervently hope we can do so before it is too late. If not, if we fail, Canadians will not be the only ones to suffer. The lakes of Vermont will be as dead as the lakes in Ontario.

This is why I have spoken to you today. I want to enlist your help to fight the acid rain battle, for I know what valuable allies you will be. I know that you love your beautiful state as much as I love Canada. Let us hope that on both sides of the border we will be able to pass on the full richness of our environmental heritage to our descendants.

MESSAGES FROM THE PRESIDENT

Messages from the President of the United States were communicated to the Senate by Mr. Saunders, one of his secretaries.

EXECUTIVE MESSAGES REFERRED

As in executive session, the Acting President pro tempore laid before the Senate a message from the President of the United States submitting a nomination which was referred to the Committee on the Judiciary.

(The nomination received today is printed at the end of the Senate proceedings.)

MESSAGES FROM THE HOUSE

At 2:03 p.m., a message from the House of Representatives, delivered by Mr. Berry, one of its reading clerks, announced that the House has passed the following bill and joint resolutions, without amendment:

S. 215. An act for the relief of Lourie Ann Eder; and

S.J. Res. 165. Joint resolution authorizing and requesting the President to proclaim 1983 as the "Year of the Bible"; and

S.J. Res. 174. Joint resolution to authorize and request the President to designate October 16, 1982, as "World Food Day"; and

S.J. Res. 186. Joint resolution to authorize and request the President to designate the week of September 19 through 25, 1982, as "National Cystic Fibrosis Week"; and

S.J. Res. 193. Joint resolution designating the week of November 7 through November 13, 1982, as "National Respiratory Therapy Week"; and

S.J. Res. 205. Joint resolution to designate September 1982 as "National Sewing Month"; and

S.J. Res. 250. Joint resolution to provide for resolution of the single outstanding issue in the current railway labor-management dispute, and for other purposes.

The message also announced that the House has passed the following bills, in which it requests the concurrence of the Senate:

H.R. 1524. An act to amend the Internal Revenue Code of 1954 to provide that certain procedures and adjustments shall be treated as inconsistent with the normalization method of treating public utility property; and

H.R. 4948. An act to amend the Internal Revenue Code of 1954 to provide for the application of cash or deferred arrangement rules to money purchase plans; and

H.R. 5154. An act to amend the Lanham Trademark Act to prohibit any State from requiring that a registered trademark be altered for use within such State, and to encourage private enterprise with special emphasis on the preservation of small business; and

H.R. 5204. An act to authorize and direct the Secretary of the Interior to accept certain lands for the benefit of the Sycuan Band of Mission Indians; and

H.R. 6005. An act to discontinue or amend certain requirements for agency reports to Congress; and

H.R. 6055. An act to revise subchapter S of the Internal Revenue Code of 1954 (relating to small business corporations); and

H.R. 6458. An act to amend the Public Health Service Act and related laws to consolidate the laws relating to the Alcohol, Drug Abuse, and Mental Health Administration, the National Institute of Mental Health, the National Institute of Alcohol Abuse and Alcoholism and the National Institute on Drug Abuse, and for other purposes; and

H.R. 6794. An act to amend title 38, United States Code, to improve job training and job placement programs and educational assistance programs for veterans; and

H.R. 6872. An act to provide greater discretion to the Supreme Court in selecting the cases it will review to extend to all Federal jurors eligibility for Federal worker's compensation, to provide for the taxing of attorney fees in certain actions brought by jurors, to authorize the service of jury summonses by ordinary mail, to permit courts of the United States, to establish the order of hearing for certain civil matters, and for other purposes; and

H.R. 6875. An act to provide financial assistance to the Wolf Trap Foundation for the Performing Arts for reconstruction of the Filene Center in Wolf Trap Farm Park, and for other purposes; and

H.R. 6976. An act to amend title 28, United States Code, to require the Attorney General to acquire and exchange information to assist Federal, State, and local officials in the identification of certain deceased individuals and in the location of missing persons (including unemancipated persons); and

H.R. 7019. An act making appropriations for the Department of Transportation and related agencies for the fiscal year ending September 30, 1983, and for other purposes; and

H.R. 7065. An act to amend the Community Services Block Grant Act to clarify the authority of the Secretary of Health and Human Services to designate community action agencies for certain community action programs administered by the Secretary for fiscal year 1982, and for othr purposes; and

H.R. 7072. An act making appropriations for Agriculture, Rural Development, and Related Agencies programs for the fiscal year ending September 30, 1983, and for other purposes; and

H.R. 7093. An act to amend the Internal Revenue Code of 1954 to reduce the rate of certain taxes paid to the Virgin Islands on Virginia Islands source income; and

H.R. 7094. An act to amend the Internal Revenue Code of 1954 to impose a tax on failures to adhere to conditions of existing determination letters relating to independent management of the assets of multiemployer plans; and

H.J. Res. 568. Joint resolution to provide for the designation of October 5, 1982, as "Dr. Robert H. Goddard Day"; and

H. Con. Res. 407. Concurrent resolution to express thanks to former First Lady Betty Ford.

The message also announced that the House has passed the following bill, with amendments, in which it requests the concurrence of the Senate:

S. 1872. An act to amend the act establishing the Capitol Reef National Park in the State of Utah to provide for a grazing phaseout schedule, and for other purposes.

The message further announced that the House has passed the following joint resolution, with an amendment, in which it requests the concurrence of the Senate:

S.J. Res. 101. Joint resolution designating "National High School Activities Week."

ENROLLED BILL SIGNED

At 2:51 p.m., a message from the House of Representatives, delivered by Mr. Gregory, one of its reading clerks, announced that the Speaker has signed the following enrolled joint resolution:

S.J. Res. 250. Joint resolution to provide for resolution of the single outstanding issue in the current railway labor-management dispute, and for other purposes.

The enrolled joint resolution was subsequently signed by the President pro tempore (Mr. THURMOND).

At 4:14 p.m., a message from the House of Representatives, delivered by Mr. Gregory, announced that the Speaker has signed the following enrolled bill and joint resolution:

S. 215. An act for the relief of Lourie Ann Eder.

S.J. Res. 186. Joint resolution to authorize and request the President to designate the week of September 19 through 25, 1982 as "National Cystic Fibrosis Week"; and

S.J. Res. 205. Joint resolution to designate September 1982 as "National Sewing Month".

HOUSE BILLS REFERRED

The following bills and joint resolution were read the first and second times by unanimous consent, and referred as indicated:

H.R. 1524. An act to amend the Internal Revenue Code of 1954 to provide that certain procedures and adjustments shall be treated as inconsistent with the normalization method of treating public utility property; referred to the Committee on Finance.

H.R. 4948. An act to amend the Internal Revenue Code of 1954 to provide for the application of cash or deferred arrangement rules to money purchase plans; referred to the Committee on Finance.

H.R. 5204. An act to authorize and direct the Secretary of the Interior to accept certain lands for the benefit of the Sycuan Band of Mission Indians; referred to Select Committee on Indian Affairs.

H.R. 6005. An act to discontinue or amend certain requirements for agency reports to Congress; referred to the Committee on Governmental Affairs.

H.R. 6055. An act to revise subchapter S of the Internal Revenue Code of 1954 (relating to small business corporations); referred to the Committee on Finance.

H.R. 6976. An act to amend title 28, United States Code, to require the Attorney General to acquire and exchange information to assist Federal, State, and local officials in the identification of certain deceased individuals and in the location of missing persons (including unemancipated persons); referred to the Committee on the Judiciary.

H.R. 7019. An act making appropriations for the Department of Transportation and related agencies for the fiscal year ending September 30, 1983, and for other purposes; referred to the Committee on Appropriations, by unanimous consent.

H.R. 7072. An act making appropriations for Agriculture, rural development, and related agencies programs for the fiscal year ending September 30, 1983, and for other purposes; referred to the Committee on Appropriations, by unanimous consent.

H.R. 7093. An act to amend the Internal Revenue Code of 1954 to reduce the rate of certain taxes paid to the Virgin Islands on Virgin Islands source income; referred to the Committee on Finance.

H.R. 7094. An act to amend the Internal Revenue Code of 1954 to impose a tax on failures to adhere to conditions of existing determination letters relating to independent management of the assets of multiemployer plans; referred to the Committee on Finance.

H.J. Res. 568. Joint resolution to provide for the designation of October 5, 1982, as "Dr. Robert H. Goddard Day"; referred to the Committee on the Judiciary.

HOUSE CONCURRENT RESOLUTION REFERRED

The following concurrent resolution was referred as indicated:

H. Con. Res. 407. Concurrent resolution to express thanks to former First Lady Betty Ford; referred to the Committee on the Judiciary.

HOUSE BILLS PLACED ON THE CALENDAR

The following bills were read the first and second times by unanimous consent, and placed on the calendar:

H.R. 6458. An act to amend the Public Health Service Act and related laws to consolidate the laws relating to the Alcohol, Drug Abuse, and Mental Health Administration, the National Institute of Mental Health, the National Institute of Alcohol Abuse and Alcoholism, and the National Institute on Drug Abuse, and for other purposes; and

H.R. 6794. An act to amend title 38, United States Code, to improve job training and job placement programs, and educational assistance programs for veterans; and

H.R. 6875. An act to provide financial assistance to the Wolf Trap Foundation for the Performing Arts for reconstruction of the Filene Center in Wolf Trap Farm Park, and for other purposes.

HOUSE BILLS HELD AT THE DESK

The following bill was ordered held at the desk by unanimous consent:

H.R. 5154. An act to amend the Lanham Trademark Act to prohibit any State from requiring that a registered trademark be altered for use within such State, and to encourage private enterprise with special emphasis on the preservation of small business.

The following bills were ordered held at the desk until the close of business on Thursday, September 23, 1982, by unanimous consent:

H.R. 6872. An act to provide greater discretion to the Supreme Court in selecting the cases it will review to extend to all Federal jurors eligibility for Federal worker's compensation, to provide for the taxing of attorney fees in certain actions brought by jurors, to authorize the service of jury summonses by ordinary mail, to permit courts of the United States, to establish the order of hearing for certain civil matters, and for other purposes; and

H.R. 7065. An act to amend the Community Services Block Grant Act to clarify the authority of the Secretary of Health and Human Services to designate community action agencies for certain community action programs administered by the Secretary for fiscal year 1982, and for other purposes.

ENROLLED BILLS SIGNED

The PRESIDENT pro tempore (Mr. THURMOND) announced that on today, September 22, 1982, he signed the following enrolled bills, which had been previously signed by the Speaker of the House of Representatives:

S. 1628. an act to amend the Emergency Fund Act (Act of June 26, 1948, 62 Stat. 1052); and

H.R 5288. An act granting the consent of Congress to the compact between the States of New Hampshire and Vermont concerning solid waste.

ENROLLED BILLS AND JOINT RESOLUTIONS PRESENTED

The Secretary of the Senate reported that on today, September 22, 1982, he presented to the President of the United States the following enrolled bills and joint resolutions:

S. 215. An act for the relief of Lourie Ann Eder; and

S. 1628. An act to amend the Emergency Fund Act (Act of June 26, 1948, 62 Stat. 1052); and

S.J. Res. 186. Joint resolution to authorize and request the President to designate the week of September 19 through 25, 1982, as "National Cystic Fibrosis Week"; and

S.J. Res. 205. Joint resolution to designate September 1982 as "National Sewing Month"; and

S.J. Res. 250. Joint resolution to provide for resolution of the single outstanding issue in the current railway labor-management dispute, and for other purposes.

EXECUTIVE COMMUNICATION

The following communication was laid before the Senate, Tuesday, September 21, 1982, together with accompanying papers, reports, and documents, and was referred as indicated:

EC-4245. A communication from the Secretary of Transportation transmitting a draft of proposed legislation to provide for the resolution of the single outstanding issue in the current railway labor-management dispute; to the Committee on Labor and Human Resources.

EXECUTIVE AND OTHER COMMUNICATIONS

The following communications were laid before the Senate, together with accompanying papers, reports, and documents, which were referred as indicated:

EC-4246. A communication from the President of the National Railroad Passenger Corporation transmitting, pursuant to law, a report on progress in completing the Northeast Corridor Improvement Project; to the Committee on Commerce, Science, and Transportation.

EC-4247. A communication from the Comptroller General of the United States transmitting, pursuant to law, a report entitled "Runways at Small Airports are Deteriorating Because of Deferred Maintenance; Action Needed by FAA and the Congress"; to the Committee on Commerce, Science, and Transportation.

EC-4248. A communication from the Comptroller General of the United States transmitting, pursuant to law, a report entitled "Changes to the Motor Vehicle Recall Program Could Reduce Potential Safety Hazards"; to the Committee on Commerce, Science, and Transportation.

EC-4249. A communication from the Under Secretary of the Interior transmitting pursuant to law, a report on a decision made to change the holding of oil and gas lease sale No. 71 in the Diapir Field, Alaska to October 1982; to the Committee on Energy and Natural Resources.

EC-4250. A communication from the Director of Minerals Management Service of the Department of the Interior transmitting, pursuant to law, a report on a refund of an excess royalty payment to Shell Oil Company, Conoco Inc., and Cabot Corp.; to the Committee on Energy and Natural Resources.

EC-4251. A communication from the Director of the Office of Management and Budget transmitting, pursuant to law, the cumulative report on rescissions and deferrals as of September 1, 1982; to the Committees on Agriculture, Nutrition, and Forestry; Appropriations; Armed Services; Banking, Housing, and Urban Affairs; the Budget; Commerce, Science, and Transportation; Energy and Natural Resources, Environment and Public Works; Finance; Foreign Relations; Judiciary; Labor and Human Resources; Small Business; and Veterans Affairs.

EC-4252. A communication from the Secretary of State transmitting, pursuant to law, a report on payments made by the United States to private individuals or corporations in satisfaction of loan guarantees and assurances made with respect to credits extended to the Polish People's Republic in the absence of a default declaration by Poland; to the Committee on Appropriations.

EC-4253. A communication from the Deputy Assistant Secretary of Defense transmitting, pursuant to law, a report on contracts under sections 2304(a)11 and 2304(a)16 of title 10, United States Code October through March 1982; to the Committee on Armed Services.

EC-4254. A communication from the Chairman of the Interstate Commerce Commission transmitting, pursuant to law, a report on the effects on small communities of trucking regulatory reform; to the Committee on Commerce, Science, and Transportation.

EC-4255. A communication from the Deputy Assistant Secretary of Defense for Administration transmitting, pursuant to law, a report on an altered Privacy Act system of records; to the Committee on Governmental Affairs.

EC-4256. A communication from the Deputy Assistant Secretary of Defense for Administration transmitting, pursuant to law, a report on a new Privacy Act system of records; to the Committee on Governmental Affairs.

EC-4257. A communication from the President of the United States transmitting a draft of proposed legislation to utilize the proceeds from the sale of Federal real property to retire the national debt; to the Committee on Governmental Affairs.

REPORTS OF COMMITTEES

The following reports of committees were submitted:

By Mr. COCHRAN, from the Committee on Appropriations, with amendments:

H.R. 7072. An act making appropriations for Agriculture, Rural Development, and Related Agencies programs for the fiscal year ending September 30, 1983, and for other purposes (Rept. No. 97-566).

By Mr. ANDREWS, from the Committee on Appropriations, with amendments:

H.R. 7019. An act making appropriations for the Department of Transportation and related agencies for the fiscal year ending September 30, 1983, and for other purposes (Rept. No. 97-567).

By Mr. McCLURE, from the Committee of Conference on the disagreeing votes of the two Houses thereon, on the amendment of the Senate to the amendment of the House to the bill (S. 1409) to authorize the Secretary of the Interior to construct, operate, and maintain modifications of the existing Buffalo Bill Dam and Reservoir, Shoshone project, Pick-Sloan Missouri Basin program, Wyoming, and for other purposes (Rept. No. 97-568).

By Mr. HELMS, from the Committee on Agriculture, Nutrition, and Forestry, without amendment:

H.R. 2035. An act to authorize certain employees of the United States Department of Agriculture charged with the enforcement of animal quarantine laws to carry firearms for self-protection (Rept. No. 97-569).

H.R. 3881. An act to direct the Secretary of Agriculture to release on behalf of the United States a reversionary interest in certain lands conveyed to the Arkansas Forestry Commission, and to direct the Secretary of the Interior to convey certain mineral interests of the United States in such lands to such Commission (Rept. No. 97-570).

H.R. 6422. An act to direct the Secretary of Agriculture to release on behalf of the United States a reversionary interest in certain land previously conveyed to the State of Connecticut (Rept. No. 97-571).

By Mr. LAXALT, from the Committee on Appropriations, with amendments:

H.R. 6968. An act making appropriations for military construction for the Department of Defense for the fiscal year ending September 30, 1983, and for other purposes (Rept. No. 97-572).

By Mr. MATTINGLY, from the Committee on Appropriations, with amendments:

S. 2939. An original bill making appropriations for the legislative branch for the fiscal year ending September 30, 1983, and for other purposes (Rept. No. 97-573).

INTRODUCTION OF BILLS AND JOINT RESOLUTIONS

The following bills and joint resolutions were introduced, read the first and second time by unanimous consent, and referred as indicated:

By Mr. DeCONCINI:

S. 2937. A bill to amend the Internal Revenue Code of 1954 to extend certain energy credits; to the Committee on Finance.

By Mr. BENTSEN:

S. 2938. A bill to amend the Internal Revenue Code of 1954 to treat as medical care the expenses of meals and lodging of a parent or guardian accompanying a child away from home for the purpose of receiving medical care, and the expenses of meals and lodging of a child away from home for the purpose of receiving medical care on an outpatient basis; to the Committee on Finance.

By Mr. MATTINGLY:

S. 2939. An original bill making appropriations for the legislative branch for the fiscal year ending September 30, 1983, and for other purposes; from the Committee on Appropriations; placed on the calendar.

By Mr. BUMPERS (for himself, Mr. TSONGAS, Mr. BRADLEY, Mr. GORTON, Mr. DECONCINI, Mr. SPECTER, Mr. GLENN, Mr. PRESSLER, Mr. SASSER, Mr. HATFIELD, Mr. INOUYE, Mr. STAFFORD, Mr. NUNN, Mr. CHAFEE, Mr. RIEGLE, Mr. WEICKER, Mr. PRYOR, Mr. DANFORTH, Mr. CRANSTON, Mr. MOYNIHAN, Mr. DODD, Mr. HUDDLESTON, Mr. HART, Mr. DIXON, Mr. EXON, Mr. BURDICK, Mr. BAUCUS, Mr. FORD, Mr. HOLLINGS and Mr. JACKSON):

S.J. Res. 251. Joint resolution authorizing and requesting the President to designate October 10, 1982, as "National Peace Day"; to the Committee on the Judiciary.

By Mr. DURENBERGER:

S.J. Res. 252. Joint resolution authorizing and requesting the President to issue a proclamation designating the period from October 3, 1982, through October 9, 1982, as "National Schoolbus Safety Week of 1982"; to the Committee on the Judiciary.

SUBMISSION OF CONCURRENT AND SENATE RESOLUTIONS

The following concurrent resolutions and Senate resolutions were read, and referred (or acted upon), as indicated:

By Mr. BAKER (for himself and Mr. ROBERT C. BYRD):

S. Res. 477. Resolution to direct the Senate legal counsel to represent Senate parties in *W. Henson Moore, et al.* v. *The United States House of Representatives, et al* and in *Ron Paul* v. *The United States of America, et al.*, Civil Action Nos. 82-2318 and 82-2353, respectively; considered and agreed to.

By Mr. DODD (for himself, Mr. KENNEDY, Mr. TSONGAS, Mr. CHAFEE, Mr. HATFIELD, Mr. PACKWOOD, Mr. INOUYE, Mr. RANDOLPH, Mr. WEICKER, Mr. RIEGLE, Mr. BURDICK, and Mr. HOLLINGS):

S. Res. 478. A resolution expressing the sense of the Senate with respect to the need to maintain guidelines which insure equal rights with regard to education opportunity; to the Committee on Labor and Human Resources.

STATEMENTS ON INTRODUCED BILLS AND JOINT RESOLUTIONS

By Mr. DECONCINI:

S. 2937. A bill to amend the Internal Revenue Code of 1954 to extend certain energy credits; to the Committee on Finance.

SOLAR ENERGY TAX CREDIT ACT OF 1982

Mr. DECONCINI. Mr. President, I am today introducing legislation which would extend the termination date of both the business and residential energy tax credits for solar, wind, geothermal, and ocean thermal energy systems—at least until December 31, 1995. These incentives were originally enacted as part of the Crude Oil Windfall Profit Tax Act of 1980, and are currently scheduled to expire at the end of 1985. Similar but not identical legislation has been introduced in the House of Representatives by Congressman FUQUA, of Florida, and Congressman FISH, of New York.

Mr. President, we are now in the depth of the most severe national recession since the Great Depression of five decades ago. Of course we hear a lot of hope expressed every day about "recovery" and "upturns," but economic recovery depends, to the greatest extent, on the willingness of the American people to invest in their own country. Investment decisions are not made frivolously. Any decision to order new equipment, to increase inventories, or to otherwise make a major commitment of capital must be a result of long range projections and careful planning.

The same is especially true of the manufacturers and potential customers of solar energy equipment. This industry is new, and the technology is new to the consumer. But we have come a long way in a short period of time. Up to this year sales within the solar industry grew an average of 25 percent annually.

Frankly, this has been accomplished only because there was a strong and determined national effort. Congress took the lead in solar policy formation in 1974 because the administration did not have a coherent energy policy, and, because this country stood at the edge of disaster in the face of the OPEC oil embargo. It has been this national effort which has created energy out of dreams and technologies out of mere concepts. But let us not forget that the energy crisis is not over. Petroleum imports still account for a quarter of our consumption and we, in turn, will export billions of our dollars to the OPEC nations again this year.

We have a national interest in energy independence and a national interest in the development of renewable energy technologies. And what is more, the money stays right here in this country.

The administration will argue that the solar tax credits constitute an unwarranted subsidy by the Federal Government. That simply is not so. In fact, it has been calculated the Treasury will achieve net revenue gains from the reduced number of deductions taken as business fuel cost write-offs. Companies that rely upon fossil fuels and electricity for their energy needs are allowed to deduct the costs of these fuels as a business expense. For every new solar installation, the Treasury receives income it would have lost if conventional fuels had been used.

Mr. President, I believe a great majority of my colleagues will agree with me that the solar energy tax credits should be extended beyond 1985. Earlier in this session Senate Resolution 232 was introduced to express the Senate's support for the energy tax credits and had at least 64 cosponsors. I offered the same resolution as an amendment to an appropriations measure and it was accepted and passed by both Houses of Congress.

So, I believe the only question about extending the credits might be: Why now? Why do we not wait until next year or until when the credits are due to expire? Well, Mr. President, as I have pointed out, this is a critical decisionmaking period for all businesses—but especially for the fledgling solar industry. It has been hit hard by the recession and by the abandonment of almost all support by this administration. Financial recovery has to be projected over an extended period of time. This act would give the industry and the financial community some confidence for at least 10 more years. It may very well be that we might want to increase or expand the tax credits in some way. That, of course, would probably require a good deal of consideration and that should be a priority for the next Congress.

We can now, however, extend the tax credits for 10 years and help assure the venture capital, or third-party financing, which is necessary for the planning of commercial projects.

If there is not sufficient time to properly consider this legislation, then it will at least serve notice that this matter will indeed be a priority early in the next Congress. And, that congressional attention is being brought to bear on this country's determination to develop its' solar energy potential.

I ask unaninous consent that the text of the bill be printed in the RECORD in its entirety.

There being no objection, the bill was ordered to be printed in the RECORD, as follows:

S. 2937

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That this Act may be cited as the "Solar Energy Tax Credit Act of 1982".

SECTION 1. EXTENSION OF CERTAIN ENERGY CREDITS

(a) RESIDENTIAL ENERGY CREDIT.—

(1) IN GENERAL.—Subsection (f) of section 44C of the Internal Revenue Code of 1954 (relating to termination of residential energy credit) is amended by striking our "1985" and inserting in lieu thereof "1995".

(2) CONFORMING AMENDMENT.—Subparagraph (B) of section 44C(b)(6) of such Code is amended by striking out "1987" in the text and capiton thereof and inserting in lieu thereof "1997".

(b) INVESTMENT TAX CREDIT.—

(1) IN GENERAL.—Clause (i) of section 46(a)(2)(C) of such Code (relating to the energy percentage) is amended by striking out "December 31, 1985" each place it appears and inserting in lieu thereof "December 31, 1995".

(2) CONFORMING AMENDMENT.—Clause (iv) of section 46(a)(2)(C) of such Code (relating to longer period for certain hydroelectric gen-

erating property) is amended by striking out "property, 'December 31, 1988,' shall be substituted for 'December 31, 1985" and inserting in lieu thereof "property, 'December 31, 1998,' shall be substituted for 'December 31, 1995".

SEC. 2. EFFECTIVE DATE

The amendments made by this act shall take effect on December 31, 1985.

By Mr. BENTSEN:

S. 2938. A bill to amend the Internal Revenue Code of 1954 to treat as medical care the expenses of meals and lodging of a parent or guardian accompanying a child away from home for the purpose of receiving medical care, and the expenses of meals and lodging of a child away from home for the purpose of receiving medical care on an outpatient basis; to the Committee on Finance.

CHILD CARE MEDICAL EXPENSE DEDUCTION ACT

● Mr. BENTSEN. Mr. President, today I am introducing legislation which expands the medical expense deduction to include costs incurred by a parent or guardian who must accompany a child away from home for the purpose of receiving outpatient medical care.

Expenses for health care in the United States increased by almost 20 percent last year—that is more than double the rate of this country's inflation during the same period. I know how difficult it is for many families to obtain the necessary health care when confronted by these costs. Yet, America prides itself on having the best medical facilities and most skillful doctors in the world. In the past, Congress has recognized the need to encourage adequate and effective health care for Americans by providing them a tax deduction for many expenses incurred in receiving health care. Under current law certain expenses related to physician care, medicine, and transportation are deductible. For example, if a parent must take a child to an area that specializes in the particular care that child needs, the transportation expenses incurred in going to that doctor, hospital, or clinic are tax deductible. The law does not apply to the cost of meals and lodging that a parent also must confront when a child is receiving outpatient care away from home.

The purpose of this legislation, Mr. President, is to expand the medical deduction provision to include those living expenses such as meals and lodging that parents must pay so that their children can receive needed medical treatment that is not obtainable in their hometown. This expansion would lift an economic burden from many families who need to concentrate their energies on a child who suffers from a serious illness.

In Texas, we are blessed with some of the finest medical facilities in the world. Many parents take their children to medical facilities in Houston to receive cancer treatment, including chemotherapy and radiation. Since the treatment often is handled on an out-patient basis, parents and children frequently are away from home for extended periods of time. A recent University of Texas System Cancer Center survey indicated that 43 percent of its patients over a 1-month period required housing accomodations. Of these visits, which generally included one parent and child, 79 percent were return visits and each visit averaged 5 days. It does not take long to realize that in this situation the housing expenses, the absence from home and job, and the uninsured portion of expensive medical treatment can create an astronomical financial burden on families.

There is no doubt that these parents need to be with their children during these difficult times to comfort them and assist with their healing. My bill amends the Internal Revenue Code to provide families with realistic help during this critical time when they are under intense psychological stress because of a seriously ill child. Mr. President, this legislation addresses those lodging and meal expenses that are necessary solely because of a child's medical needs. These expenses certainly meet the criteria for which the medical deduction tax provision was designed to assist.

In closing, I urge my Senate colleagues to approve this measure so that a parent or guardian can deduct reasonable living expenses incurred when accompanying an ill child to out-of-town medical treatment. I ask unanimous consent that a copy of the bill be printed in the RECORD at the closing of these remarks.

There being no objection, the bill was ordered to be printed in the RECORD, as follows:

S. 2938

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,

SECTION 1. TREATMENT OF CERTAIN MEALS AND CERTAIN LODGING EXPENSES OF A PARENT AND CHILD AS MEDICAL CARE IN THE CASE OF A CHILD AWAY FROM HOME FOR PURPOSE OF RECEIVING MEDICAL CARE.

(a) IN GENERAL.—Paragraph (1) of section 213(d) of the Internal Revenue Code of 1954 (defining medical care) is amended—

(1) by striking out "or" at the end of subparagraph (B),

(2) by striking out the period at the end of subparagraph (C) and inserting in lieu thereof ", or", and

(3) by adding at the end thereof the following new subparagraph:

"(D) for the meals and lodging of—

"(i) one parent or guardian of a child when—

"(I) such child is away from home for the purpose of receiving medical care, and

"(II) such parent or guardian is away from home and accompanies such child, and

"(ii) a child when he is away from home for the purpose of receiving medical care as an outpatient.".

(b) CHILD DEFINED.—Subsection (d) of section 213 of such Code is amended by adding at the end thereof the following new paragraph:

"(7) The term 'child' means an individual who has not attained the age of 18 before the close of the taxable year.".

SEC. 2. EFFECTIVE DATE.

The amendments made by section 1 shall apply to amounts paid in taxable years beginning after December 31, 1982.●

By Mr. BUMPERS (for himself, Mr. TSONGAS, Mr. BRADLEY, Mr. GORTON, Mr. DECONCINI, Mr. SPECTER, Mr. GLENN, Mr. PRESSLER, Mr. SASSER, Mr. HATFIELD, Mr. INOUYE, Mr. STAFFORD, Mr. NUNN, Mr. CHAFEE, Mr. RIEGLE, Mr. WEICKER, Mr. PRYOR, Mr. DANFORTH, Mr. CRANSTON, Mr. MOYNIHAN, Mr. DODD, Mr. HUDDLESTON, Mr. HART, Mr. DIXON, Mr. EXON, Mr. BURDICK, Mr. BAUCUS, Mr. FORD, Mr. HOLLINGS, and Mr. JACKSON):

S.J. Res. 251. Joint resolution authorizing and requesting the President to designate October 10, 1982, as "National Peace Day"; to the Committee on the Judiciary.

(The remarks of Mr. BUMPERS on this legislation and the text of the legislation appear earlier in today's RECORD.)

By Mr. DURENBERGER:

S.J. Res. 252. Joint resolution authorizing and requesting the President to issue a proclamation designating the period from October 3, 1982, through October 9, 1982, as "National Schoolbus Safety Week of 1982"; to the Committee on the Judiciary.

NATIONAL SCHOOLBUS SAFETY WEEK

● Mr. DURENBERGER. Mr. President, the safety of our Nation's students should be one of our highest priorities. In 1980, schoolbus transportation accidents killed about 180 persons, including 90 students, 5 busdrivers, and 85 other people. The National Safety Council reports that of the 90 students killed, 75 were pedestrians either approaching or leaving the bus. In addition, about 4,600 students were injured in schoolbus-related accidents.

It is imperative that we increase public awareness of this problem by establishing a "National Schoolbus Safety Week" from October 3, 1982 through October 9, 1982. This week will provide an opportunity for schools and communities to plan activities related to schoolbus safety and will increase the awareness among our Nation's drivers that there are 22 million students transported to and from school each day.

Summer is over and schools are back in session. Now is a particularly good time for us to be alert to the deaths and accidents that occur each year during the fall when traffic increases and students are using schoolbuses. I

hope all my Senate colleagues will join in cosponsoring this important and timely resolution.●

ADDITIONAL COSPONSORS

S. 27

At the request of Mr. DOLE, the name of the Senator from Texas (Mr. BENTSEN) was added as a cosponsor of S. 27, a bill to amend the Internal Revenue Code of 1954 to make permanent the allowance of a deduction for eliminating architectural and transportation barriers for the handicapped and to increase the amount of such deduction from $25,000 to $100,000.

S. 1018

At the request of Mr. CHAFEE, the name of the Senator from Iowa (Mr. GRASSLEY) was added as a cosponsor of S. 1018, a bill to protect and conserve fish and wildlife resources, and for other purposes.

S. 2918

At the request of Mr. CHAFFEE, the names of the Senator from Montana (Mr. BAUCUS), and the Senator from Minnesota (Mr. DURENBERGER) were added as cosponsors of S. 2918, a bill to permit the investment of employee benefit plans in residential mortgages.

S. 2919

At the request of Mr. LUGAR, the names of the Senator from New York (Mr. MOYNIHAN), the Senator from Rhode Island (Mr. PELL), and the Senator from Maryland (Mr. MATHIAS) were added as cosponsors of S. 2919, a bill to help insure the Nation's independent factual knowledge of Soviet bloc countries, to help maintain the national capability for advanced research and training on which that knowledge depends, and to provide partial financial support for national programs to serve both purposes.

S. 2930

At the request of Mr. ROBERT C. BYRD, his name was added as a cosponsor of S. 2930, a bill to provide for the protection of migrant and seasonal agricultural workers and for the registration of contractors of migrant and seasonal agricultural labor, and for other purposes.

SENATE JOINT RESOLUTION 178

At the request of Mr. HATCH, the names of the Senator from Wisconsin (Mr. KASTEN), and the Senator from Arkansas (Mr. PRYOR) were added as cosponsors of Senate Joint Resolution 178, a joint resolution to authorize and request the President to proclaim the second week in April as "National Medical Laboratory Week."

SENATE JOINT RESOLUTION 215

At the request of Mr. HATCH, the name of the Senator from Massachusetts (Mr. KENNEDY) was added as a cosponsor of Senate Joint Resolution 215, a joint resolution to provide that the week beginning March 6, 1983, shall be designated as "Women's History Week."

SENATE JOINT RESOLUTION 234

At the request of Mr. GOLDWATER, the name of the Senator from Oklahoma (Mr. NICKLES) was added as a cosponsor of Senate Joint Resolution 234, a joint resolution to provide for the designation of the week commencing with the third Monday in February 1983 as "National Patriotism Week."

SENATE JOINT RESOLUTION 241

At the request of Mr. HUMPHREY, the name of the Senator from Pennsylvania (Mr. HEINZ) was added as a cosponsor of Senate Joint Resolution 241, a joint resolution to provide for the designation of the week of December 12, 1982 through December 18, 1982 as "National Drunk and Drugged Driving Awareness Week."

SENATE JOINT RESOLUTION 242

At the request of Mr. JEPSEN, the name of the Senator from Minnesota (Mr. DURENBERGER) was added as a cosponsor of Senate Joint Resolution 242, a joint resolution designating September 22, 1982, as "American Businesswomen's Day."

SENATE CONCURRENT RESOLUTION 123

At the request of Mr. HART, the name of the Senator from Nevada (Mr. CANNON) was added as a cosponsor of Senate Concurrent Resolution 123, a concurrent resolution expressing the sense of the Congress with respect to a means test for the medicare program.

SENATE RESOLUTION 477—RELATING TO SENATE LEGAL COUNSEL REPRESENTATION

Mr. BAKER (for himself and Mr. ROBERT C. BYRD) submitted the following resolution; which was considered and agreed to:

S. RES. 477

Whereas, in the cases of W. Henson Moore, et al. v. the United States House of Representatives, et al. and Ron Paul v. The United States of America, civil Action Nos. 82-2318 and 82-2352, respectively, pending in the United States District Court for the District of Columbia, the constitutionality of the Tax Equity and Fiscal Responsibility Act of 1982, Public Law 97-248, has been challenged as having been enacted in violation of Article I, Section 7, clause 1 of the United States Constitution;

Whereas, the complaints in these actions name the United States Senate, the Honorable George Herbert Walker Bush, in his capacity as President of the Senate, and William F. Hildenbrand, Secretary of the Senate, as parties defendants;

Whereas, pursuant to section 703(a) and 704(a) of the Ethics in Government Act of 1978, 2 U.S.C. §§ 288b(a) and 288c(a) (Supp. IV 1980), the Senate may direct its counsel to defend the Senate, its members and officers, in civil actions relating to their official responsibilities: Now, therefore, be it

Resolved, That the Senate Legal Counsel is directed to represent the United States Senate, the Honorable George Herbert Walker Bush, in his capacity as President of the Senate, and William F. Hildenbrand, Secretary of the Senate, in the cases of W. Henson Moore, et al. v. The House of Representatives, et al. and Ron Paul v. The United States of America, et al.

SENATE RESOLUTION 478—RELATING TO EQUAL RIGHTS UNDER TITLE IX OF THE EDUCATION AMENDMENTS OF 1972

Mr. DODD (for himself, Mr. KENNEDY, Mr. TSONGAS, Mr. CHAFEE, Mr. HATFIELD, Mr. PACKWOOD, Mr. INOUYE, Mr. RANDOLPH, Mr. WEICKER, Mr. RIEGLE, Mr. BURDICK, and Mr. HOLLINGS) submitted the following resolution, which was referred to the Committee on Labor and Human Resources:

S. RES. 478

Whereas education is the backbone of American democracy and shapes the minds and spirits of our future generations;

Whereas extensive inequities based on sex, such as discrimination in admissions, vocational education and counseling, continue to exist in education communities;

Whereas in a time when the average working woman earns only 59 cents for every dollar that her male counterpart receives, we cannot deny women equal access to education programs, and thus the opportunity for career advancement and economic equity;

Whereas title IX of the Education Amendments of 1972, which provides that "no person shall, on the basis of sex, be excluded from participation in, be denied benefits of, or be subjected to discrimination under any education program or activity receiving Federal financial assistance", has proven to be effective in providing women with equal education opportunities; and

Whereas while many sectors of our society need relief from overly burdensome regulations, corrective action to reduce that burden must not be taken at the expense of women who are, as a result of established guidelines for protection, at long last realizing equal opportunities in education: Now, therefore, be it

Resolved, That it is the sense of the Senate that guidelines relating to title IX of the Education Amendments of 1972 should not be repealed or altered in a manner which will deny any person equal access to education.

Mr. DODD. Mr. President, I am submitting this resolution today for myself and Senators KENNEDY, TSONGAS, CHAFEE, HATFIELD, PACKWOOD, INOUYE, RANDOLPH, WEICKER, RIEGLE, BURDICK, and HOLLINGS.

This resolution expresses the sense of the Senate that it is essential to maintain guidelines insuring equal rights in educational opportunity.

Identical legislation, House Resolution 268, has been submitted in the House of Representatives by Congresswoman CLAUDINE SCHNEIDER, where it currently has 150 cosponsors.

Since title IX took effect, the record shows, female students have scored dramatic gains. The enrollment of women in vocational courses traditionally dominated by men has more than

doubled and the share of professional degrees earned by professional women has quadrupled.

In 1972, women were only 11 percent of the students in medical schools, 10 percent of law school students, and 2 percent of those in dental schools.

In 1980, the proportion of women in medical school and law school had tripled—up to 26 percent and 34 percent, respectively. Women constituted 17 percent of dental schools students that year, a 1,011-percent jump.

Graduate degrees earned by women in male-dominated fields have also risen dramatically. Women awarded doctorates increased from 16 percent in 1972 of the total to 30 percent in 1980.

One area in which women have made exceptionally large gains, thanks to title IX, is athletics, termed the "most visible and familiar" aspect of title IX by the National Advisory Council on Women's Educational Programs. Under title IX the number of females involved in interscholastic high school athletic programs has increased by 527 percent. By 1980, there were 36 female athletes for every 100 male athletes, compared with 1972 when there were only 18 female athletes for every 100 male athletes.

Before title IX was passed, virtually no college or university offered scholarships to talented women athletes—of every 100 such scholarships awarded in 1974, only 1 went to a woman. Today the ratio is 22 out of every 100.

In my State, the number of female athletes at the University of Connecticut has jumped from a total of 50 in 1974 to 250 in 1982. Likewise, there are now 11 full-time and 8 part-time coaches to train these athletes, while in 1974 there were only 4. And the number of athletic scholarships awarded to women at the University of Connecticut has climbed from 1 in 1975 to 74 in 1982.

Thus, title IX has wrought dramatic changes in my State. And what title IX has done in Connecticut, it has done in the other 49 States as well.

Close to one-third of the Nation's professional women work in the field of education, and title IX is designed to protect their rights too. Women still continue to trail men in salaries and tenure as well as in chances for career advancement, but it can be said the most impressive change in this particular area is in the number of women heading colleges and universities. Over the past 6 years, the number rose from 149 to 219.

Mr. President, it is obvious that, despite the gains that women have made since 1972, there is still a long road ahead with much catching up to do, and title IX is needed more than ever.

I have outlined for you today just a few examples of how title IX has been instrumental in effecting positive change in the education arena. Despite various attempts to weaken these much-needed regulations, the record makes it clear that they have a necessary and vital role to play in the education process.

Title IX is not an example of good intentions gone awry. It is instead an example of how equal treatment of the sexes in college admissions, athletic programs, and education employment can improve the skills and resources of American women to help serve the American future.

The changes which have already occured have been positive and substantial; with our support they can continue to provide equal educational opportunities, advancements, and improvements in the years ahead.

It is my hope today that my colleagues in the Senate will act promptly to approve this resolution and reaffirm our commitment to a policy of equality in providing educational opportunities to all Americans.

Mr. KENNEDY. Mr. President, I am pleased to join my colleagues in the Senate today in cosponsoring a resolution reaffirming the commitment of Congress to equal opportunity in education and urging that title IX of the 1972 educational amendments not be weakened.

In the decade since title IX was enacted, we have made tremendous progress in the elimination of sex discrimination in schools which receive Federal financial assistance. In 1979, for the first time since World War II, women college students outnumbered men students; 5.9 million of the 11.6 million undergraduates enrolled in this Nation's colleges and universities were women. Significant gains also have been made in the number of degrees awarded to women in customarily male fields such as agriculture, architecture, and business and management. And participation by female athletes in interscholastic high school sports increased by 527 percent in the last 10 years, as many athletic programs previously limited to male students were opened to students of both sexes.

As supporters of equal educational opportunities for women, we use these statistics with pride to mirror the years of progress we have made. We must prevent these figures from being misused as an excuse for weakening enforcement of title IX.

Despite the gains we have made, we still have miles to go to achieve truly equal educational opportunities for women. In 1980, of some 16,000 district school superintendents, only 154 were women. Women head only 6 percent of coeducational institutions of higher education, compared to 67 percent of women's colleges. And, despite gains by women in traditionally male fields, the proportion of women in some of these areas, such as engineering, remains very small.

The need for title IX is as strong now as it was in 1972. Only by continued implementation of title IX will we guarantee women their right to equal educational opportunity.

Mr. TSONGAS. Mr. President, since title IX was passed in 1972, this legislation has made a substantial difference in the quality and quantity of educational opportunities for women. I oppose any effort on the part of the administration, the Department of Education, and Members of Congress to weaken this vital legislation.

Any form of discrimination is unacceptable, and title IX must remain the viable tool it has been in combating sex discrimination in education.

Title IX of the Education Amendments of 1972 should not be repealed or altered in a manner which will deny any person equal access to education.

I join Senator DODD and my other colleagues in introducing this resolution today.

AMENDMENTS SUBMITTED FOR PRINTING

CAPITAL ASSISTANCE ACT OF 1982

AMENDMENTS NOS. 3614 THROUGH 3616

(Ordered to be printed and lie on the table.)

Mr. CHAFEE submitted three amendments intended to be proposed by him to the bill (S. 2879) to provide flexibility to the Federal Deposit Insurance Corporation, the Federal Savings and Loan Insurance Corporation, and the Federal supervisory agencies to deal with financially distressed depository institutions, to enhance the competitiveness of depository institutions, to expand the range of services provided by such institutions, to protect depositors and creditors of such institutions, and for other purposes.

COMMITTEE MEETINGS

Mr. BAKER. Mr. President, I have a collection of unanimous-consent requests in respect to committees meeting tomorrow. I believe they have all been cleared by the minority or the acting minority leader.

COMMITTEE ON FINANCE

Mr. BAKER. Mr. President, I ask unanimous consent that the Committee on Finance be authorized to meet during the session of the Senate on Wednesday, September 22, to hold a markup of subchapter S, technical corrections to past tax bills.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. BAKER. Mr. President, I ask unanimous consent that the Committee on Finance be authorized to meet during the session of the Senate on

Thursday, Septemer 23, to meet to consider miscellaneous matters.

The PRESIDING OFFICER. Without objection, it is so ordered.

SELECT COMMITTEE ON INDIAN AFFAIRS

Mr. BAKER. Mr. President, I ask unanimous consent that the Select Committee on Indian Affairs be authorized to meet during the session of the Senate on Wednesday, September 22, at 9:30 to hold a hearing on S. 2847, the Indian Housing Act of 1982.

The PRESIDING OFFICER. Without objection, it is so ordered.

SUBCOMMITTEE ON PUBLIC LANDS AND RESERVED WATER

Mr. BAKER. Mr. President, I ask unanimous consent that the Subcommittee on Public Lands and Reserved Water, of the Committee on Energy and Natural Resources, be authorized to meet during the session of the Senate on Thursday, September 23, at 9 a.m., to hold a hearing to consider S. 2801, the Wilderness Protection Act of 1982.

The PRESIDING OFFICER. Without objection, it is so ordered.

SUBCOMMITTEE ON INTERNATIONAL ECONOMIC POLICY

Mr. BAKER. Mr. President, I ask unanimous consent that the Subcommittee on International Economic Policy, of the Committee on Foreign Relations, be authorized to meet during the session of the Senate on Thursday, September 23, at 11:30 a.m., to receive a secret CIA briefing on the world debt.

The PRESIDING OFFICER. Without objection, it is so ordered.

ADDITIONAL STATEMENTS

RECENT STUDIES ANALYZE LEFTIST VIEWS HELD BY MEDIA "ELITE"

● Mr. HELMS. Mr. President, for decades the American people have been subjected to a daily barrage of biased news coverage in our Nation's print and electronic media. Sometimes subtle, more often blatant, this constant flow of distorted information is undermining our cultural foundations as well as deforming our political process.

Recently, two studies have appeared which analyze the political and social views of the so-called media elite. Allan Brownfeld, a syndicated columnist, in an article appearing in the Washington Times of September 21, 1982, has focused attention on these two studies.

In a study by S. Robert Lichter and Stanley Rothman under the auspices of the Research Institute on International Change at Columbia University a number of significant facts relating to the values held by the media elite were uncovered. For example, only 8 percent of those polled attend church or synagogue weekly and 86 percent seldom or never attend religious services. The poll indicated further that 50 percent do not have any religious affiliation.

It is certainly in order to ask whether or not this ostensible secularist bias affects reporting on major national issues such as school prayer and abortion. According to the study, "Fifty-four percent place themselves to the left of center, compared to only 19 percent who choose the right side of the spectrum."

According to Brownfeld's review of the study:

On social issues their views are similarly liberal. Ninety percent of the media elite believe in freedom of choice with regard to abortions and only 25 percent think that homosexuality is wrong. Only 3 percent strongly agree that homosexuals should not teach in public schools and only 15 percent strongly agree that adultery is wrong.

Mr. President, not only has media bias affected coverage of family issues, but it has also affected coverage of matters related to our foreign policy and national defense. Who can forget the massive attack on our foreign policy during the Vietnam war years when our boys were fighting to defend freedom in Southeast Asia? Who can deny the bias of the establishment media elite regarding events in Central America today?

Brownfeld cites another study be Prof. Stanley Rothman of Smith College,. entitled, "The Mass Media in Post Industrial Society" which concludes that the media demonstrates a bias against patriotism and a strong defense policy. Rothman is quoted as concluding that the media demonstrates:

A generalized distrust of the American military, of people who are "overly patriotic," of the policy and of the working class and lower middle class Americans who do not share cosmopolitan lifestyles.

Mr. President, back in the sixties the media developed a slogan about a credibility gap between the Government and the American people. I submit that the American people can justly raise the question as to whether or not there is a credibility gap between what the establishment media elite has been feeding the public and reality. These two studies certainly provide food for thought on this important matter.

Mr. President, I ask that the article by Mr. Brownfeld be placed in the RECORD at this time.

The article follows:

[From the Washington Times, Sept. 21, 1982]

IS THE LIBERAL MEDIA BIAS REAL OR IMAGINED?

(By Allan Brownfeld)

In recent years there has been much discussion about the alleged liberal bias of the media—at least the "elite media," which reaches a national audience and sets the agenda for the American political discussion and debate. Included in this "elite media" are newspapers such as *The New York Times* and *The Washington Post*, news magazines such as *Time* and *Newsweek*, and the major television networks, NBC, CBS and ABC.

Some of the criticism of the media has been narrowly partisan. Republicans objected to news reports about Watergate, for example, largely because their party had been caught in an act of wrong-doing. The media, accordingly, dismissed most of the criticism aimed at it as simply self-serving. Former Vice President Spiro Agnew was vocal in his criticism of the media. His criticism was, in the eyes of many, largely discredited when Agnew himself admitted to serious violations of trust which led to his resignation.

Still, recognizing that it is easy to blame the messenger of bad news for the substance of his report, the charges of media bias turn out, upon careful examination, to be quite correct.

An interesting study was recently directed by S. Robert Lichter and Stanley Rothman under the auspices of the Research Institute on International Change at Columbia University. The media elite was polled about their political and social views and these views were then compared with a larger sample. By its own responses to questions the media elite paints a picture of itself as quite liberal.

The authors note that, "Substantial numbers of the media elite grew up at some distance from the social and cultural traditions of small town 'middle America.' Instead, they were drawn from big cities in the northeast and north central states. Their parents tended to be well off, highly educated members of the upper middle class, especially the educated professions . . . Only 8 percent go to church or synagogue weekly, and 86 percent seldom or never attend religious services. Exactly 50 percent eschew any religious affiliation . . . Ideologically, a majority of leading journalists describe themselves to the left of center, compared to only 19 percent who choose the right side of the spectrum."

Consider the voting patterns of the media elite. In 1964, 94 percent voted for Lyndon Johnson and only 6 percent for Barry Goldwater. In 1978, when Richard Nixon was carrying the country, 87 percent of the media elite voted for Hubert Humphrey and only 19 percent for Nixon. In the Nixon landslide of 1972—when George McGovern carried only one state, Massachusetts, and the District of Columbia, 81 percent of the media elite voted for McGovern and 19 percent for Nixon. In 1976, when the country was almost evenly dividing its vote between Gerald Ford and Jimmy Carter, the media elite voted 81 percent for Carter and 19 percent for Ford. By any standard, this is a one-sided political record.

Authors Lichter and Rothman point out that, "Over the entire 16 year period, less than one-fifth of the media elite supported any Republican presidential candidate. In an era when presidential elections are often settled by a swing vote of 5 to 10 percent, the Democratic margin among elite journalists has been 30 to 50 percent greater than among the entire electorate. These presidential choices are consistent with the media elite's liberal views on a wide range of social and political issues. They show a strong preference for assistance to the poor in the form of income redistribution and guaranteed employment . . ."

On the social issues their views are similarly liberal. Ninety percent of the media

elite believe in freedom of choice with regad to abortions and only 25 percent think that homosexuality is wrong. Only 3 percent strongly agree that homosexuals should not teach in public schools and only 15 percent strongly agree that adultery is wrong.

In fact, state the authors, the media elite has something of a Third World mentality: "In most instances, majorities of the media elite voice the same criticisms that are raised in the Third World. Fifty six percent agree that American economic exploitation has contributed to Third World poverty. About the same proportion 57 percent, also find America's heavy use of natural resources to be 'immoral.' By a three-to-one margin, leading journalists soundly reject the counter-argument that Third World nations would be even worse off without the assistance they've received from Western nations. Indeed, precisely half agree with the claim that the main goal of our foreign policy has been to protect American business interests . . ."

In another study, "The Mass Media In Post Industrial Society," Professor Stanley Rothman of Smith College, who co-authored the Columbia study, concludes that "pivotal members of the elite media share a 'paradigm,' which tells them what the world should be like and which leads them to deal with events in certain ways." This paradigm, for example, dictates that:

Groups calling for radical change are generally described as humanitarian. If their programs show few signs of success, patience is urged.

Groups calling for a conservative change generally are treated as if their only conceivable motivation is narrow self-interest or psychological malfunction.

Social problems are assumed soluble by a combination of good will and rational management. If injustice persists, then it is not because the solutions are lacking but because self-interested, powerful individuals and groups are blocking reasonable policies.

In addition, writes Rothman, the elite media evince "a generalized distrust of the American military, of people who are 'overly patriotic,' of the police and of the working class and lower middle class Americans who do not share cosmopolitan lifestyles."

Media bias, it is clear, is not a figment of the imagination of those who have been on the receiving end of press criticism. It is institutional, it is pervasive, and it has distorted our political discourse. Only by recognizing its reality will we be able to take the next step of taking action to blunt its effect and influence.●

UKRAINIAN INSURGENT ARMY DAY

● Mr. D'AMATO. Mr. President, on Friday, September 17, 1982, I introduced Senate Joint Resolution 248, a joint resolution to proclaim October 14, 1982, Ukrainian Insurgent Army Day. At this time I would ask unanimous consent that Senate Joint Resolution 248 be printed in the RECORD in its entirety.

The joint resolution follows:

S.J. RES. 248

Whereas on June 30, 1941, Ukraine, a nation of over fifty million people, proclaimed the reestablishment of its national independence and statehood, and

Whereas, after the Proclamation of Independence, the Ukrainian people launched a war of liberation without any external support on two fronts against Nazi Germany and Bolshevik Russia, two of the largest, totalitarian, imperialist military powers in history, in defense of the principle of national independence and basic human liberties, and

Whereas, on the initiative of the revolutionary Organization of Ukrainian Nationalists (OUN), Ukrainian self-defense and insurgent detachments were formed to fight the occupying German National-Socialist and Russian Communist forces in Ukraine, employing insurgent-guerrilla means of warfare, and

Whereas these units were later transformed into a Ukrainian Insurgent Army (UPA), founded forty years ago on October 14, 1942, and placed under the command of General Roman Shukhevych-Taras Chuprynka, and

Whereas the UPA organized an all-national uprising and fought for over a decade first against Nazi Germany and Bolshevik Stalinist Russia, and later against the tripartite pact of the U.S.S.R., CSR, and Communist Poland established in 1947, and

Whereas in November 1943, in the forests of central Ukraine, on the initiative of the UPA and OUN, a conference of subjugated nations was held, attended by the representatives of 13 subjugated nations, culminating in the establishment of a common front against Hitler's Nazi Germany and Stalin's Bolshevik Russia, known as the Antibolshevik Bloc of Nations (ABN), and

Whereas the valor and herosim of the freedom-fighters of the UPA and of the entire Ukrainian nation, which sacrifices innumerable lives in the struggle against both totalitarian systems and in defense of national independence and democracy for all nations and individuals, attest to the unconquerable spirit of a subjugated nation in its quest for freedom, and

Whereas in 1982, the Ukrainian nation and the Ukrainian community in the United States will be commemorating the fortieth anniversary of the founding of the Ukrainian Insurgent Army (UPA) and call upon the American people to join with them in honoring the memory of the UPA and the martyrs who laid down their lives in their sacred mission: Now, therefore, be it

Resolved by the Senate and House of Representatives of the United States of America in Congress assembled, That the Congress of the United States of America by joint resolution proclaims October 14, 1982, Ukrainian Insurgent Army Day, authorizing and requesting the President of the United States to honor the memory of the valiant heroes of the Ukraine, the freedom-fighters of the UPA and its commander-in-chief General Roman Shukhevych-Taras Chuprynka, who fell in battle with Russian MVD forces on March 5, 1950, as well as the entire Ukrainian nation, which fought and continues to struggle for its national independence and statehood, and for freedom and justice for all the enslaved and oppressed peoples of the world, by issuing an appropriate Presidential proclamation in this regard.●

WHAT KIND OF JOURNALISM IS THIS?

● Mr. HELMS. Mr. President, I suppose by now all of us should be immune to the outrageous conduct of some of the so-called major media in this country who apparently have no shame in coloring and distorting the news. There is a growing apprehension that somewhere down the road, the American people may be so misled that they will tolerate an overthrow of our system of government.

That would be tragic, and I pray that it never happens. Everybody's freedom will go down the drain—and the first to go, if history teaches us anything, will be freedom of the press.

I was appalled this past Sunday, September 19, to note a quote attributed to Secretary of Agriculture John Block—a quote that was 180 degrees from what Jack Block actually had said.

The quote emerged from a September 13 address made by Secretary Block in Nebraska. What he said, and the record is clear, was: "European agriculture has been a pampered, spoiled child." I will discuss the basis for that remark in a moment, but first let us note what the Washington Post quoted Secretary Block as having said:

American agriculture has been a pampered, spoiled child.

Secretary Block said nothing of the sort in Nebraska, or anywhere else. And while the Washington Post now lamely "explains" that its mistake was sombody else's, the fact remains that any responsible reporter, particularly one who knows Jack Block, would surely have checked on the accuracy of such a quote attributed to a Secretary of Agriculture who has demonstrated his complete dedication to the American farmers.

But the Washington Post did not check the accuracy of the quote. And, what is even worse, the day after having published the false quote, the newspaper ran a few obscure lines on an inside page blaming somebody else for an error that was unmistakably that of the reporter who wrote the story.

Bear in mind, Mr. President, that the reporter had 6 days in which he could have checked his "facts." But he did not check. As a result, a canard was published not only in the Washington Post but presumably in many other newpapers which subscribe to the syndicated service of the Washington Post.

As I mentioned earlier, Mr. President, Secretary Block spoke in Nebraska, at Omaha, on Monday, September 13. His audience was the Agricultural Subcommittee of President Reagan's Export Council. He described the problems our Nation is encountering with excessive subsidization of agricultural exports by the European Community (EC).

The EC has subsidized its internal production to such a degree that the member nations have generated oversupplies of several commodities. While this is an internal matter for the EC, it also becomes a concern for the United States when these oversupplies

spill over into our markets. The EC disposes of its surpluses by subsidizing exports of these products.

Export subsidies by the EC are displacing American exports and depressing American farm prices. Such action should not be tolerated. The Reagan administration, including Secretary Block and Ambassador Brock, have taken a firm stance against these practices of the EC, and I commend them for it.

So, Mr. President, Secretary Block was describing and explaining this issue to the President's Export Council. To emphasize the point, he made the analogy that "European agriculture has been a pampered, spoiled child."

A reporter covering the event incorrectly reported the quote. Later that same day, United Press International ran a retraction. The Associated Press and UPI both ran stories later in the week correcting and explaining the quote.

Yet, 6 days after the fact, the Washington Post ran its article claiming that Secretary Block had said "American agriculture has been a pampered, spoiled child."

Not only was the false quote included in the Post article—it was prominently printed in large type in the center of the page. Then on September 20, the Post printed its small correction stating that they were "not aware" that UPI had run a retraction of the original quote.

However, further compounding the error the theme of the article was based on that incorrect quote, falsely implying that the administration is somehow deliberately punishing "spoiled" American farmers with low prices and distressed times.

The Post stated in its "correction" that they were "not aware" of the retraction. The fact is that at least four different stories were run on the news wires correcting the quote prior to the Post article. Did the Post reporter, and its editors just happen to miss all four corrections?

One final question: Would not a responsible newspaper have expressed its regrets in a manner that would have absolved Secretary Block?

Mr. President, Secretary Block has issued a public statement presenting the facts of this matter in a forthright and accurate way. But the Washington Post refused to print the Secretary's statement. So that Senators may have access to Secretary Block's perspective, I ask unanimous consent that his letter to me and the text of his statement be printed in the RECORD at the conclusion of my remarks.

The letter follows:

DEPARTMENT OF AGRICULTURE,
OFFICE OF THE SECRETARY,
Washington, D.C., September 20, 1982.

Hon. JESSE HELMS,
U.S. Senate,
Washington, D.C.

DEAR SENATOR: American farmers and I have been dealt a major injustice by a misquotation.

In Omaha on September 13, I stated that the European Common Market is unfairly subsidizing its agricultural exports in competition with American farmers. This has been going on for a score of years and has pitted the treasuries of the Common Market against the American farmers. This is unfair, and I said in Omaha, "European agriculture has been a pampered, spoiled child."

This statement was misquoted to indicate that I said, "American agriculture." This news account was corrected, but the situation was compounded yesterday when the Washington Post used the incorrect quote in large bold type.

I wanted you to know the background, and I hope that you will join me in correcting this injustice to American farmers and to me.

Sincerely,

JOHN R. BLOCK,
Secretary.

Attachment.

STATEMENT BY SECRETARY OF AGRICULTURE JOHN R. BLOCK

Today's Sunday edition of The Washington Post either engaged in a deliberate, partisan, irresponsible act of journalism at my expense, or it demonstrated shamefully inept journalistic procedures at the Post.

In two columns of large, black, bold type, the Sunday Washington Post quoted me as saying, "American agriculture has been a pampered, spoiled child."

Six days earlier in Omaha, Neb., when I criticized the European Common Market for unfairly subsidizing its agricultural exports in competition with American farmers, I said: "European agriculture has been a pampered, spoiled child."

At that time, United Press International first wrote that I had said "American agriculture," but then printed a correction. Later in the week, the Associated Press ran an article about the UPI error. AP pointed out that the erroneous quote has shocked members of the Nebraska Wheat Board into calling for my resignation until they discovered the UPI error.

Still, The Washington Post on Sunday chose to run the erroneous quote, "American agriculture has been a pampered, spoiled child," as if I had said it. Further, the Post lifted the quote from the text, ran it in two columns of heavy type, and placed black lines around the quote in the center of the page so that it would catch any reader's eye who leafed through the newspaper.

The Post also used the erroneous quote as a theme in the article, suggesting that pampered, spoiled children must be disciplined and that the tough times that farmers are having in 1982 is the farmers' equivalent of being sent to their rooms in punishment.

That attitude and the quote are so completely at odds with my known position and my statements on American agriculture that a responsible newspaper that has covered my statements as thoroughly as the Post would have had such disbelief it would have checked with me to see if the quote could possibly be true. The Post did not check with me or with my office.

It is hard to believe that The Washington Post could have been so completely out of touch that it was not aware of the UPI correction, of the AP article about the error, and the fracas that the error caused.

Thus The Washington Post article today was either a deliberate, partisan, irresponsible attack, or it demonstrated a shabby, inept journalistic procedure for determining the truth.

On Monday, September 20, 1982, The Washington Post corrected its Sunday edition misquote, but the correction was presented in a much less conspicuous manner than the error which appeared the previous day. Also, the Post failed to run the above statement which was filed with it on Sunday, September 19.●

THE NATIONAL CONVENTION OF THE MILITARY ORDER OF THE WORLD WARS

● Mr. GOLDWATER. Mr. President, a short time ago, the National Convention of the Military Order of the World Wars was held in Portland, Oreg. As usual, this excellent organization came up with some suggestions in the form of resolutions which were designed to improve our Nation's status in the world and to provide some consistency in terms of foreign policy and national strategy.

Repeatedly, I have stated that we do not have a true national strategy. The Military Order of the World Wars has proposed in their first resolution that a new grand global strategy is needed. I concur completely. In their other resolutions, they address such important issues as prisoners of war, registration for selective service, Reserve officer training programs, chemical and biological warfare, and terrorism. All of these issues are vitally important to the future of our Nation. The Military Order of the World Wars and its members believe deeply in this Nation and they have clearly expressed their genuine dedication toward our Nation and its security.

Mr. President, I ask that the resolutions passed by the National Convention of the Military Order of the World Wars be printed in their entirety and I commend these thoughts to my colleagues for their careful study.

The resolutions referred to are as follows:

RESOLUTIONS PASSED AT NATIONAL CONVENTION

Excerpts from Resolutions passed at the National Convention follow.

Resolution No. 1 urges the members of Congress

(1) To accept the fact that the security of the United States, its people, and its allies, is in real and dire jeopardy;

(2) That a new grand global stategy is essential to assure our defense while maintaining a policy of helping our allies and other non-Communist countries to defend themselves against internal and external Communist takeover;

(3) That our government do all in its power to re-educate our people to the real truths before them, in the full knowledge

that an educated people will remain a free people;

(4) In furtherance of all the foregoing, that the Senate reject any unilateral disarmament or other scheme placing us in an inferior military position to the Warsaw Pact nations, and act with resolution to restore a balance of power with the Soviets and their vassal states; and

That we can accept arms reduction only in the framework of free visible scrutiny, and the prior redress of the current power imbalance.

Resolution No. 2 resolves that the national policy of the United States, morally and justly, should be never to abandon or fail to support any service man of our Nation, and to commit this country to unending and vigorous hostility toward any Nation which holds Americans prisoner for doing their duty and being loyal citizens.

Resolution No. 3 resolves that the Congress and Administration of this Nation do forthwith pass and enact all necessary laws denying to all who unlawfully fail to register for selective military service, or who thereafter unlawfully fail to serve if called upon, any and all federally-funded benefits to which they might otherwise be entitled, in addition to other penalties provided by law.

Resolution No. 4:

(1) Reaffirms our longstanding support for the ROTC programs of our Nation;

(2) Calls upon Congress to enact all necessary laws to assure the preservation of these programs, including the dignity of their instructor personnel by equalizing their status in all particulars with the other faculty members at the institutions where they serve; and

(3) Urges that this form a part and parcel of a program for enactment by the Congress of United States Universal National Service of some significant and practical form, including qualified military service in the Armed Forces of the United States for all of its young citizens.

Resolution No. 5 calls upon the Congress to immediately require the development by and for our Armed Forces and the production of full defenses, plans and countermeasures against chemical and biological weapons needed for the protection of our people and those of our allies.

Resolution No. 6 resolves that the Congress of the United States and the President be urged to re-establish, with sufficient operational support, adequate intelligence and combating antiterrorist forces, specializing in these areas and applicable to both domestic and international terrorism, which forces, when implemented, will defeat the purposes of those terrorists and render decent and law-abiding persons secure in their persons and properties and safe once again; and further that local law enforcement organizations be encouraged and assisted in the support of such national efforts; and

Further resolves that the President urge other governments to promulgate and publish like antiterrorist policies, and cause the United States to enter into agreements with other such countries for mutual operations and coordination of operations in the interests of world peace and safety.

Resolution No. 7 extends our thanks to the host Portland Chapter, and to the citizens of Oregon and particularly of the beautiful city of Portland and all of their officials for hosting a most successful convention.●

TRIBUTE TO JOHN M. OLIN

● Mr. GOLDWATER. Mr. President, I believe it is fitting that a tribute should be given in the Senate to the memory of one of this country's great industrialists and philanthropists, John M. Olin, who died several days ago at the age of 89.

John Olin was one of the most articulate spokesmen in the Nation for the free enterprise system during his long and fruitful life. He believed in this country and was responsible for the education and development of many of our economists in Government and industry today.

John gave of himself to insure that our free enterprise system would survive. To that end, he established the John M. Olin Foundation which is dedicated to the preservation of a free society.

He was a trustee for many years at his alma mater, Cornell University. He also served on the boards of John Hopkins in Baltimore and Washington University in St. Louis.

John was an inventor, philanthropist, industrialist, conservationist, and sportsman. His efforts to save the North Atlantic salmon will forever be appreciated by this country and Canada. His love of black Labrador retrievers was well known. His favorite dog, King Buck, won the National Field Trial Championship in 1952 and 1958.

John Olin was a friend of mine. He was one of that group of rugged individualists who always put principle and honesty above all else. He shall be missed.●

1982 SCHOLASTIC APTITUDE TESTS

● Mr. JEPSEN. Mr. President, USA Today, the new national newspaper, as well as other newspapers, ran articles today on the results of the 1982 scholastic aptitude test released by the college board.

For the first time since 1962, high school seniors showed improvement in their scores on mathematics and language college entrance tests. In all, approximately 1 million seniors took the tests on which the report is based.

It comes as no surprise, at least to this Senator, that Iowa ranked No. 1 in the Nation. That ranking again underscores the quality education for which Iowa is known.

Iowa students and their teachers deserve the highest praise. In Iowa, education is taken seriously.

I ask that the article from USA Today, headlined "Nation's Report Card; SAT Scores Up," be inserted in the RECORD. I also ask that an accompanying State-by-State tally be placed in the RECORD.

The information follows:

[From the USA TODAY, Sept. 22, 1982]

NATION'S REPORT CARD: SAT SCORES UP

(By Saundra Keyes)

For the first time in 19 years, American high school seniors this year improved their scores on math and language college entrance tests.

Results released by the College Board Tuesday revealed that about 1 million seniors who took the 1982 Scholastic Aptitude Test nudged the average score up two points on the verbal section and one point in the math category.

It was the first time since 1962 that both scores have increased.

But the new scores of 467 in math and 426 in verbal remain far behind the lofty 502-478 averages that prevailed in 1963 before the downward spiral began. Information was not available on the number of students who took the test that year.

The SAT is scored on a scale of 200 to 800.

The College Board, a non-profit organization that sponsors the exam, and educators have warned that results should not be considered the barometer of American education.

That admonition is generally ignored, and reported declines in SAT scores are widely bemoaned as signs of deterioration in American schools.

The steady decline was even mentioned in the 1980 Republican platform, which blamed federal intervention in the schools for eroding standards.

College Board executives issued the familiar warning Tuesday in announcing the new scores, but gave the figures a roseate glow anyway.

The 1 million seniors who took the SAT represent only a third of their class, but two-thirds of those go directly to college.

In any analysis of the state-by-state scores, cautioned testers, the greater the number of students taking the test in a state, the lower the score in that state.

Board officials found other evidence that students are hitting the books harder.

Scores on achievement tests in 15 specific subjects rose 5 points to 537, the highest level since 1976.

Scores improved on the Test of Standard Written English for the first time since the introduction of the test in 1975.

The tests are required of applicants at most colleges.

SAT SCORES: A STATE-BY-STATE TALLY

The College Board Tuesday released a state-by-state breakdown of student scores on the Scholastic Aptitude Test.

These are the state averages for 1982. They are followed by the percentage of SAT-takers among high school seniors in 1980, the latest year that figure was available.

The number in the last column refers to the percentage of students in each state taking the test. Where fewer students took the tests the scores tended to be higher state-wide.

State	Verbal	Rank	Math	Rank	Total	Rank	Percent

INVESTIGATION OF THE MASSACRE IN BEIRUT

● Mr. LEVIN. Mr. President, last week various individuals whose identities are still unknown, entered two Palestinian refugee camps in Beirut, Shatila, and Sabra. There, under circumstances which at best are unclear and at worst are unthinkable, they murdered an uncounted number of innocent men, women, and children. The full dimensions of the tragedy are not yet known; nor are all the factors which led up to it or all the circumstances which contributed to it.

It is that uncertainty which is so destructive. Without firm data, speculation has poisoned the environment and polluted our discussions of these tragic events. There is no evidence—no evidence—suggesting that Israeli troops participated directly in the slaughter. But there are questions—questions—about the extent of the foreknowledge which those troops may have had about the plans of the forces they permitted to enter the camps and there are questions about how promptly they responded once they became aware of what was taking place.

Mr. President, those questions need to be answered. They need to be answered clearly and decisively. I believe that our best hope of getting those answers would be for the Government of Israel to initiate a complete and independent investigation of the chain of events which led to the massacre. Such an investigation ought to examine the events which took place in the camps, as well as the rationale for the initial decision to enter West Beirut—including claims that armed PLO terrorists remained in the city in violation of the withdrawal agreement. The President of Israel has called for such an investigation but the Prime Minister—and now the Knesset—has declined to approve such a plan. They appear to prefer a proposal which would allow the Cabinet to conduct an inquiry. I do not believe that will be sufficient and I do not believe its conclusion will be as readily accepted. The events in those two camps have had immense human and international consequences. The people of the world, no less than the people of Lebanon and Israel, are entitled to a full and fair appraisal of what took place there. I do not believe they will settle for less.

Accordingly, I call on the Government of Israel to reconsider its decision and approve an open and independent investigation of these tragic events.●

AN ASSESSMENT OF REAGANOMICS

Mr. BAUCUS. Mr. President, all of us remember the joyful days of 1981 when President Reagan's economic program moved through Congress. The future was rosy. Reaganomics was going to get America moving again, rekindling our Nation's productivity and spurring a new era of prosperity.

But today, that hope has faded. Record unemployment together with persistently high interest rates has driven many parts of this Nation into the depths of a depression. For the victims of this plight, Reaganomics is another broken promise.

Recently, Bob Phillips, editor of the Western News in Libby, Mont., wrote a poignant and blunt assessment of Reaganomics—1 year later. This editorial captures the frustrations felt by the thousands who remain jobless in an economy that continues to sink lower and lower.

Unemployment in the Libby, Mont., and surrounding Lincoln County reached 36 percent earlier this year. This editorial, which I ask to have printed in the RECORD, reflects the lost hope felt by those who have to suffer day to day from the economic depression. I urge my colleagues to read and consider these views.

The editorial follows:

REAGANOMICS A FORMULA FOR GREED AND DISASTER

It has been evident to some people for a good while that, not only are Ronald Reagan and company's economic policies going to fail to restore economic prosperity to this country, they are quite likely to bring on the greatest disaster since the Great Depression.

Even worse, there are undoubtedly many within the administration who have realized this fact all along. Their silence on the matter can be attributed only to some deep, sinister motive among the wealthy and powerful of this country to use presidential power in order to increase their own wealth and power.

Paranoia! some will shout. But the facts speak for themselves. Reagan came into office with grandiloquence, speaking of the need to "make America great again." Then, inheriting a tax system that was already inherently unfair, one that overtaxed the middle class and granted privilege to wealthy individuals and corporations, the administration immediately moved to give even greater tax breaks to the rich.

At the same time—even in the midst of a deep and worsening recession—Reagan insisted on the largest peacetime military increase in history. Claiming that peace depended on military strength, be brought on some of the worst Soviet-American relations ever. Advocating an end to the nuclear arms race, he immediately increased funding for construction of those very weapons.

Reaganomics does not work. "Trickle down" economics does not work. Any theory that assumes that by giving the rich more money, it will help the middle and lower classes, is not only naive, it is downright corrupt.

Why is it that Americans can so easily be deceived by pompous and clever rhetoric? For more than two years now, we have been hearing about how high interest rates have finally succeeded in bringing down inflation, and how it is now necessary to lower interest rates to stimulate the economy.

All the while, the filthy rich of this country have been lending out money at insane interest, getting wealthier and wealthier while the average American has often been barely able to make a living. And still it goes on. And still many Americans are unaware of the tremendous, predatory greed that is at the heart of this nation's economic problems.

Perhaps all this is nothing new under the sun. Perhaps, as some will say, there has always been—and will always be—greed, government corruption, and a economic and military establishment that is unresponsive to public criticism. But surely the problem is worse today than ever before, because today the stakes are much higher than in the past.

The point is not that Ronald Reagan is a bumbler, or uninformed, or perhaps even somewhat dishonest. The point is that he is not really in charge of the government at all, but merely a figurehead mouthpiece for those behind the scenes. He is a tragic, sadly comical figure who finally realized his ambition of becoming president, only to preside over one of the most corrupt and destructive administrations in history.

And the American people put him in office because they thought he was going to clean up government. That is what is sad. The gullibility of the American people is what is sad.

And the question remains, amidst all the political accusations and election-year politicking, amidst a growing crisis that threatens the gravest of consequences—who really is in charge of America?

SEC GOVERNMENT-BUSINESS FORUM ON SMALL BUSINESS CAPITAL FORMATION

● Mr. NUNN. Mr. President, tomorrow in a Washington suburb, a not-very-well publicized, but nevertheless very

important conference is taking place. Beginning tomorrow, and for the next 3 days, approximately 200 individuals from around the Nation, representing business, government, and the professions will meet in the first annual Securities and Exchange Commission sponsored Government-Business Forum on Small Business Capital Formation.

This forum, which is being held pursuant to the requirements imposed by Congress through amendments to the securities laws in the "Small Business Investment Incentives Act of 1980," will focus on the current status of problems and programs relating to small business capital formation. The objective of the forum will be to identify securities, tax, credit, and other significant problems encountered by small business in their efforts to obtain, and retain, capital.

Mr. President, in January 1980, over 2,000 small business men and women came to Washington to participate in the first White House Conference on Small Business. That conference developed an agenda of 60 items that, in their opinion, would significantly improve the climate for the creation, growth, and development of the small business community. Among the concerns raised by the delegates was the extensive regulation and cost in attempting to raise capital through stock issues. In part in response to those concerns, and under the leadership of Senator NELSON, the former chairman of the Senate Small Business Committee, and the Senator from Maryland, Senator SARBANES, who was then the chairman of the Senate Banking Committee's Securities Subcommittee, the Senate expeditiously considered, and succeeded in enacting, the "Small Business Investment Incentives Act of 1980." Senator SARBANES remains active in the issues of small business, and in insuring that the legislation passed is fully implemented.

The centerpiece of the legislation contains amendments to the Investment Company Act of 1940 which recognizes the unique "business development company" functions of venture capital investment companies. The law puts these business development companies under different, and a more relaxed set of securities regulations more compatible with the nature of the venture capital industry. That law also directed the Securities and Exchange Commission to develop a uniform exemption from registration for small issuers, and where possible, to simplify the issuance of securities for smaller issuers.

While there have been some problems that will need to be clarified in the statute, the SEC has moved expeditiously to adopt "Regulation D" to implement the registration exemptions, and to promulgate the simplified reporting requirements for securities registration.

While Congress recognized that the amendments incorporated in this statute could be extremely useful to the entire small business community, a beneficial side bar to the development of the legislation was the close working relationship that developed between the SEC, the professions representing small businesses in need of capital, and the small business community. In an effort to capitalize on that relationship, Congress directed the SEC to conduct an annual forum between business and Government to continually assess the capital needs of the small business community. The forum which will be conducted over the next 3 days, under the leadership of SEC Commissioner Evans, and the SEC's Officer of Small Business Policy, will focus on four major issues:

First, access to investors, including reviewing incentives for institutional investors to invest in small businesses, and the impact of ERISA on investment opportunities;

Second, capital formation, including reducing cost associated with securities regulation and the desirability of a uniform Federal-State securities regulation;

Third, taxation, including changes in corporate tax rates, and the tax treatment of captial gains; and

Fourth, credit, including a review of the impact of Federal credit assistance program.

Mr. President, this is an important conference. Its recommendations could serve as a further agenda for action and should bolster the 1980 White House Conference on Small Business recommendations, and the recommendations made by the American Bar Association in its 1979 Small Business Securities Conference in Snowmass, Colo., and the 1980 Small Business Tax Conference in The Homestead, Va. As the ranking Democratic Member of the Senate Small Business Committee, I look forward to reviewing the results of this first SEC forum on the capital formation requirements on small business.●

PROGRAM

Mr. BAKER. Mr. President, on tomorrow the Senate will convene at 10 a.m. After the recognition of the two leaders under the standing order, the distinguished Senator from Florida (Mr. CHILES) will be recognized on special order for not to exceed 15 minutes.

It is anticipated that on tomorrow provision will be made for the transaction of routine morning business after the execution of the special order.

Sometime prior to the hour of 12 noon, Mr. President, the Senate will resume consideration of the unfinished business, at which time the Baucus second-degree amendment will be the pending question.

A cloture motion has been filed pursuant to the provisions of rule XXII, and by unanimous-consent the vote on cloture will occur at 12 noon without the intervention of a mandatory quorum as required by the rule.

It is hoped by the leadership on this side that we can complete this bill tomorrow. I realize that I have expressed that hope previously, as long as a week ago. But this time, Mr. President, I must urge Members to consider that we have to dispose of this matter, and it may be necessary to use heroic measures to do so.

So no one should be surprised, Mr. President, if we proceed to try to dispatch the business of the country and of the Senate during the course of tomorrow and complete the enactment of the debt limit bill.

RECESS UNTIL 10 A.M. TOMORROW

Mr. BAKER. Mr. President, if there is no other Senator seeking recognition, and I see none, I move, in accordance with the order just entered, that the Senate now stand in recess until the hour of 10 o'clock a.m. tomorrow morning.

The motion was agreed to; and at 4:44 p.m., the Senate recessed until Thursday, September 23, 1982, at 10 a.m.

NOMINATIONS

Executive nominations received by the Senate September 22, 1982:

THE JUDICIARY

George G. Fagg, of Iowa, to be U.S. circuit judge for the eighth circuit vice Roy L. Stephenson, retired.

CONFIRMATIONS

Executive nominations confirmed by the Senate September 22, 1982:

DEPARTMENT OF STATE

Fernando E. Rondon, of Virginia, a Career Member of the Senior Foreign Service, class of Counselor, now Ambassador Extraordinary and Plenipotentiary of the United States of America to the Democratic Republic of Madagascar, to serve concurrently and without additional compensation as Ambassador Extraordinary and Plenipotentiary of the United States of America to the Federal and Islamic Republic of the Comoros.

Kenneth W. Dam, of Illinois, to be Deputy Secretary of State.

Henry Allen Holmes, of the District of Columbia, a Career Member of the Senior Foreign Service, class of Minister-Counselor, to be Ambassador Extraordinary and Plenipotentiary of the United States of America to Portugal.

Rozanne L. Ridgway, of the District of Columbia, a Career Member of the Senior Foreign Service, class of Career Minister, to be Ambassador Extraordinary and Plenipotentiary of the United States of America to the German Democratic Republic.

W. Allen Wallis, of New York, to be Under Secretary of State for Economic Affairs.

U.S. ARMS CONTROL AND DISARMAMENT AGENCY

William Robert Graham, of California, to be a Member of the General Advisory Committee of the U.S. Arms Control and Disarmament Agency.

Colin Spencer Grey, of New York, to be a Member of the General Advisory Committee of the U.S. Arms Control and Disarmament Agency.

Roland F. Herbst, of California, to be a Member of the General Advisory Committee of the U.S. Arms Control and Disarmament Agency.

Francis P. Hoeber, of Virginia, to be a Member of the General Advisory Committee of the U.S. Arms Control and Disarmament Agency.

Charles Burton Marshall, of Virginia, to be a Member of the General Advisory Committee of the U.S. Arms Control and Disarmament Agency.

Jaime Oaxaca, of California, to be a Member of the General Advisory Committee of the U.S. Arms Control and Disarmament Agency.

Shirley N. Pettis, of California, to be a Member of the General Advisory Committee of the U.S. Arms Control and Disarmament Agency.

John P. Roche, of Massachusetts, to be a Member of the General Advisory Committee of the U.S. Arms Control and Disarmament Agency.

Donald Rumsfeld, of Illinois, to be a Member of the General Advisory Committee of the U.S. Arms Control and Disarmament Agency.

Harriet Fast Scott, of Virginia, to be a Member of the General Advisory Committee of the U.S. Arms Control and Disarmament Agency.

Laurence Hirsch Silberman, of California, to be a Member of the General Advisory Committee of the U.S. Arms Control and Disarmament Agency.

Elmo Russell Zumwalt, Jr., of Virginia, to be a Member of the General Advisory Committee of the U.S. Arms Control and Disarmament Agency.

Eli S. Jacobs, of California, to be a Member of the General Advisory Committee of the U.S. Arms Control and Disarmament Agency.

Robert B. Hotz, of Maryland, to be a Member of the General Advisory Committee of the U.S. Arms Control and Disarmament Agency.

U.S. ADVISORY COMMISSION ON PUBLIC DIPLOMACY

Edwin J. Feulner, Jr., of Virginia, to be a Member of the U.S. Advisory Commission on Public Diplomacy for a term expiring July 1, 1985.

U.S. INFORMATION AGENCY

W. Scott Thompson, of Massachusetts, to be an Associate Director of the U.S. Information Agency.

UNITED NATIONS

The following-named persons to be Representatives and Alternate Representatives of the United States of America to the 37th Session of the General Assembly of the United Nations:

Representatives:

Kenneth L. Adelman, of Virginia.

J. Bennett Johnston, U.S. Senator from the State of Louisiana.

Robert W. Kasten, Jr., U.S. Senator from the State of Wisconsin.

Jeane J. Kirkpatrick, of Maryland.

John Davis Lodge, of Connecticut.

Alternate Representatives:

Charles M. Lichenstein, of the District of Columbia.

Gordon C. Luce, of California.

Hernan Padilla, of Puerto Rico.

William Courtney Sherman, of Virginia.

Jose S. Sorzano, of Virginia.

INTERNATIONAL ATOMIC ENERGY AGENCY

The following-named persons to be the Representative and Alternate Representatives of the United States of America to the 26th Session of the General Conference of the International Atomic Energy Agency:

Representative:

W. Kenneth Davis, of California.

Alternate Representatives:

Richard T. Kennedy, of the District of Columbia.

Roger Kirk, of the District of Columbia.

Thomas Morgan Roberts, of the District of Columbia.

The above nominations were approved subject to the nominees' commitment to respond to requests to appear and testify before any duly constituted committee of the Senate.

THE JUDICIARY

Edward Rafeedie, of California, to be U.S. district judge for the central district of California.

David D. Dowd, Jr., of Ohio, to be U.S. district judge for the northern district of Ohio.

COPYRIGHT ROYALTY TRIBUNAL

Edward W. Ray, of California, to be a Commissioner of the Copyright Royalty Tribunal for a term of 7 years from September 27, 1982.

FOREIGN SERVICE

Foreign Service nominations beginning Herbert A. Cochran, and ending Michael J. Mercurio, which nominations were received by the Senate and appeared in the CONGRESSIONAL RECORD on September 8, 1982.

Foreign Service nominations beginning Michael Hayden Armacost, and ending E. William Tatge, which nominations were received by the Senate and appeared in the CONGRESSIONAL RECORD on September 13, 1982.

Foreign Service nominations beginning Robert L. Barry, and ending Emmett N. Wilson, Jr., which nominations were received by the Senate and appeared in the CONGRESSIONAL RECORD on September 17, 1982.

HOUSE OF REPRESENTATIVES—*Wednesday, September 22, 1982*

The House met at 10 a.m.

The Chaplain, Rev. James David Ford, D.D., offered the following prayer:

Almighty God, we ask Your blessing upon this assembly and upon all who seek to use their abilities in service to others. Encourage men and women to see in their daily tasks opportunities to fulfill the divine commission of love. Forgive us when we fail to stand for truth, to do the deeds You would have us do, and to be the people You would have us be. Support and inspire people of good will everywhere that Your will may be done on Earth, even as it is in Heaven. Amen.

THE JOURNAL

The SPEAKER. The Chair has examined the Journal of the last day's proceedings and announces to the House his approval thereof.

Pursuant to clause 1, rule I, the Journal stands approved.

MESSAGE FROM THE SENATE

A message from the Senate by Mr. Sparrow, one of its clerks, announced that the Senate had passed a bill and a joint resolution of the following titles, in which the concurrence of the House is requested:

S. 2405. An act to further amend the boundary of the Cibola National Forest to allow an exchange of lands with the city of Albuquerque, N. Mex.; and

S.J. Res. 250. Joint resolution to provide for resolution of the single outstanding issue in the current railway labor-management dispute, and for other purposes.

ELECTION OF MEMBERS TO STANDING COMMITTEES

Mr. LONG of Louisiana. Mr. Speaker, as chairman of the Democratic Caucus and at the direction of that caucus, I send to the desk a privileged resolution (H. Res. 599) and ask for its immediate consideration.

The Clerk read the resolution, as follows:

H. RES. 599

Resolved, That the following-named Members be, and are hereby, elected to the following standing committees of the House of Representatives:

Appropriations Committee: William R. Ratchford, Connecticut.

Armed Services Committee: Marilyn Lloyd Bouquard, Tennessee.

The resolution was agreed to.

A motion to reconsider was laid on the table.

ANNOUNCEMENT BY THE SPEAKER

The SPEAKER. Pursuant to the provisions of clause 5, rule I, the Chair will now put the question on each motion to suspend the rules on which further proceedings were postponed on Monday, September 20, 1982, in the order in which that motion was considered.

Votes will be taken in the following order;

H.R. 3581, by the yeas and nays;
H.R. 4577, de novo;
H.R. 5573, de novo;
H.R. 6867, de novo;
H.R. 6317, de novo; and
H.R. 7048, by the yeas and nays.

The Chair will reduce to 5 minutes the time for any electronic votes after the first such vote in this series.

TAX TREATMENT OF DIVIDENDS RECEIVED BY CERTAIN CONTROLLED FOREIGN CORPORATIONS

The SPEAKER. The unfinished business is the question of suspending the rules and passing the bill, H.R. 3581, as amended.

The Clerk read the title of the bill.

The SPEAKER. The question is on the motion offered by the gentleman from Illinois (Mr. ROSTENKOWSKI) that the House suspend the rules and pass the bill, H.R. 3581, as amended, on which the yeas and nays are ordered.

The vote was taken by electronic device, and there were—yeas 113, nays 274, answered "present" 1, not voting 44, as follows;

[Roll No. 350]

□ 10:15

Messrs. ZEFERETTI, BINGHAM, BONIOR of Michigan, SOLARZ, PASHAYAN, ASPIN, TRIBLE, ALBOSTA, HEFNER, GUNDERSON, GORE, GRAY, SWIFT, JONES of Tennessee, KAZEN, WOLPE, PRICE, and DUNN, Mrs. ROUKEMA, Messrs. STUDDS, CLAY, JONES of Oklahoma, DWYER, PATTERSON, HOLLENBECK, BROWN of Colorado, WALGREN, and DELLUMS, changed their votes from "yea" to "nay."

Messrs. O'BRIEN, MONTGOMERY, and GEPHARDT, Mrs. KENNELLY, Messrs. STOKES, ARCHER, HANSEN of Idaho, PHILIP M. CRANE, DANIEL B. CRANE, MADIGAN, and FINDLEY, Mrs. MARTIN of Illinois, and Mr. GOODLING, changed their votes from "nay" to "yea."

So (two-thirds not having voted in favor thereof) the motion was rejected.

The result of the vote was announced as above recorded.

□ 1030

ANNOUNCEMENT BY THE SPEAKER PRO TEMPORE

The SPEAKER pro tempore (Mr. MURTHA). Pursuant to the provisions of clause 5, rule I, the Chair announces that he will reduce to a minimum of 5 minutes the period of time within which a vote by electronic device may be taken on all the additional motions to suspend the rules on which the Chair has postponed further proceedings.

APPLICATION OF SECTION 252 OF ECONOMIC RECOVERY TAX ACT OF 1981 TO CERTAIN TRANSFERS IN 1973

The SPEAKER pro tempore. The unfinished business is the question of suspending the rules and passing the bill, H.R. 4577, as amended.

The Clerk read the title of the bill.

The SPEAKER pro tempore. The question is on the motion offered by the gentleman from Illinois (Mr. ROSTENKOWSKI) that the House suspend the rules and pass the bill, H.R. 4577, as amended.

The question was taken; and (two-thirds having voted in favor thereof) the rules were suspended and the bill, as amended, was passed.

The title of the bill was amended so as to read: "A bill to provide that the provisions of section 252 of the Economic Recovery Tax Act of 1981 (relating to transfers of property to employees subject to certain restrictions) shall apply to certain transfers occurring during 1973."

A motion to reconsider was laid on the table.

COMPUTER EQUIPMENT CONTRIBUTION ACT OF 1982

The SPEAKER pro tempore. The unfinished business is the question of suspending the rules and passing the bill, H.R. 5573, as amended.

The Clerk read the title of the bill.

The SPEAKER pro tempore. The question is on the motion offered by the gentleman from Illinois (Mr. ROSTENKOWSKI) that the House suspend the rules and pass the bill, H.R. 5573, as amended.

The question was taken.

Mr. CARNEY. Mr. Speaker, on that I demand the yeas and nays.

The yeas and nays were ordered.

The vote was taken by electronic device, and there were—yeas 323, nays 62, not voting 47, as follows:

[Roll No. 351]

So (two-thirds having voted in favor thereof) the rules were suspended and the bill, as amended, was passed.

The result of the vote was announced as above recorded.

The title of the bill was amended so as to read: "A bill to amend the Internal Revenue Code of 1954 to encourage contributions of computer equipment to elementary and secondary schools."

A motion to reconsider was laid on the table.

(Mr. GIBBONS asked and was given permission to speak out of order for 1 minute.)

MISCELLANEOUS TARIFF AND CUSTOMS AMENDMENTS

Mr. GIBBONS. Mr. Speaker, I yield half of my time to the gentleman from Minnesota (Mr. FRENZEL), a member of the Subcommittee on Trade of the Committee on Ways and Means.

Mr. Speaker, I hope the House will pass this bill because it is noncontroversial. We have had the debates on the floor last Monday—we have had it in the committee for about 6 months. We found no opposition to it when it was in committee. It has been requested by a great number of industries in this country and covers fish nets, Fourdrinier wire, toy figures, casein button blank products, items for NASA, cantaloupes, fur hats, needlecraft display models, disposable gowns, couplers and color intermediates, and a whole host of other material that is important to American industry.

One recent thing occurred about mink, when the mink people were before the subcommittee and they said they did not care about the mink as far as China was concerned, but they did worry about mink from Russia. This has nothing to do with the mink from Russia. If you wish further information I will be glad to respond.

The CHAIRMAN. The time of the gentleman has expired.

The Chair recognizes the gentleman from Minnesota (Mr. FRENZEL).

Mr. FRENZEL. Mr. Speaker, this bill does include an item on mink that apparently some Members object to. However, we do not reduce the tariff on mink. We simply eliminate an embargo which is illegal under our present arrangement with the People's Republic of China.

In my judgment, this will not change the mink business a bit. We still have a 15-percent tariff, which is 3 times as high as the average tariff in this country.

I think the bill should be supported.

MISCELLANEOUS TARIFF AMENDMENTS OF 1982

The SPEAKER pro tempore. The unfinished business is the question of suspending the rules and passing the bill, H.R. 6867, as amended.

The Clerk read the title of the bill.

(Mr. GUNDERSON asked and was given permission to speak out of order for 1 minute.)

NATIONAL FUR PRODUCERS OPPOSED TO TARIFF AMENDMENTS

Mr. GUNDERSON. Mr. Speaker, I will not take the full minute.

I do appreciate the opportunity to indicate to the House that there is a controversial section in this bill. It is not unanimous. There was testimony at the hearing before the Ways and Means Subcommittee by the National Fur Producers in this country. They are opposed to the bill. They are opposed to the particular section that lifts the embargo which allows the mink from China to come into this country.

Now, as the gentleman from Minnesota said, yes, the tariff is still there, but it is a significant change in public policy.

No one in this House should believe that this bill is not controversial, because it is.

Mr. GIBBONS. Mr. Speaker, will the gentleman yield 15 seconds?

Mr. GUNDERSON. I yield to the gentleman from Florida.

Mr. GIBBONS. I thank the gentleman for yielding.

Mr. Speaker, when the gentleman's mink people appeared before the subcommitee they said they did not care about the bill as long as it did not include Russian mink.

□ 1045

The SPEAKER pro tempore. The question is on the motion offered by the gentleman from Illinois (Mr. ROSTENKOWSKI) that the House suspend the rules and pass the bill, H.R. 6867, as amended.

The question was taken.

RECORDED VOTE

Mr. GUNDERSON. Mr. Speaker, I demand a recorded vote.

A recorded vote was ordered.

The vote was taken by electronic device, and there were—ayes 267, noes 125, answered "present" 1, not voting 39, as follows:

The Clerk announced the following pairs:

Mr. Stratton and Mr. Addabbo, for, with Mr. Washington against.

□ 1100

Messrs. SABO, EDGAR, HUCKABY, LaFALCE, DOWNEY, LUKEN, OBERSTAR, LUNGREN, VOLKMER, TRAXLER, and NEAL, Mrs. COLLINS of Illinois, Messrs. SAVAGE, CONYERS, CLAY, WALGREN, MARRIOTT, LEWIS, HAMMERSCHMIDT, SNYDER, DYMALLY, and SCHULZE, Mrs. SNOWE, Messrs. BARNES, HOYER, SHUSTER, LELAND, ANNUNZIO, SYNAR, and FINDLEY, Mrs. HECKLER, Messrs. ANDERSON, DeNARDIS, CLAUSEN, KEMP, MICHEL, McKINNEY, SHARP, APPLEGATE, BINGHAM, WOLF, EVANS of Delaware, BETHUNE, O'BRIEN, MINISH, GRAY,

COUGHLIN, HAGEDORN, RATCHFORD, DAVIS, GUARINI, RODINO, RINALDO, and FARY, Ms. OAKAR, and Messrs. GOLDWATER, QUILLEN, PORTER, MORRISON, COURTER, SAWYER, SHAW, GINGRICH, ROE, McCOLLUM, PHILIP M. CRANE, DANIEL B. CRANE, LENT, ALEXANDER, and PASHAYAN changed their votes from "aye" to "no."

Messrs. JENKINS, EMERSON, FOUNTAIN, ANNUNZIO, SYNAR, GUARINI, NEAL, McCURDY, BINGHAM, WATKINS, FARY, LONG of Maryland, and DINGELL changed their votes from "no" to "aye."

Mr. GONZALEZ changed his vote from "present" to "aye."

So (two-thirds not having voted in favor thereof) the motion was rejected.

The result of the vote was announced as above recorded.

□ 1115

PELL GRANT MODIFICATIONS

The SPEAKER pro tempore. The unfinished business is the question of suspending the rules and passing the bill H.R. 7048, as amended.

The Clerk read the title of the bill.

The SPEAKER pro tempore. The question is on the motion offered by the gentleman from Illinois (Mr. SIMON) that the House suspend the rules and pass the bill, H.R. 7048, as amended, on which the yeas and nays are ordered.

The vote was taken by electronic device, and there were—yeas 381, nays 19, not voting 32 as follows:

[Roll No. 354]

Mr. LUNGREN changed his vote from "yea" to "nay."

Mr. FIELDS and Mr. HANSEN of Idaho changed their votes from "nay" to "yea."

So (two-thirds having voted in favor thereof) the rules were suspended and the bill, as amended, was passed.

The result of the vote was announced as above recorded.

A motion to reconsider was laid on the table.

Mr. SIMON. Mr. Speaker, I ask unanimous consent to take from the Speaker's table the Senate bill (S. 2852) to amend section 439 of the Higher Education Act of 1965 to make a technical amendment relating to priority of indebtedness, to provide for the family contribution schedule for student financial assistance for academic years 1983–84, and 1984–85, and for other purposes, and ask for its immediate consideration.

The Clerk read the title of the Senate bill

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Illinois?

There was no objection.

The Clerk read the Senate bill, as follows:

S. 2852

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That this Act may be cited as the "Sallie Mae Technical Amendments Act of 1982".

STUDENT LOAN MARKETING ASSOCIATION

SEC. 2. The last sentence of section 439(l) of the Higher Education Act of 1965 is amended by striking out "September 30, 1982" and inserting in lieu thereof "September 30, 1984".

MAXIMUM PELL GRANT

SEC. 3. Notwithstanding section 41(a)(2) of the Higher Education Act of 1965, the maximum Pell Grant a student may receive for academic year 1983–1984 under such Act shall be $1,800 or 50 percent of the cost of attendance (as defined under section 7 of this Act for academic year 1982–1983) at the institution at which the student is in attendance.

DECOUPLING PELL GRANT FAMILY CONTRIBUTION SCHEDULE FROM CAMPUS-BASED PROGRAMS

SEC. 4. The Secretary of Education shall establish or approve separate systems of need analysis for academic year 1983–1984 and for academic year 1984–1985 for the

programs authorized under subpart 2 of part A, and part C, and part E of title IV of the Higher Education Act of 1965.

PELL GRANT FAMILY CONTRIBUTION SCHEDULE FOR ACADEMIC YEAR 1983-84

SEC. 5. (a) Except as provided in subsections (b) and (c), the family contribution schedule for academic year 1982-1983 for Pell Grants under subpart 1 of part A of title IV of the Higher Education Act of 1965 shall be the family contribution schedule for such grants for the academic year 1983-1984.

(b) Each of the amounts allowed as an offset for family size for dependent and independent students in the family contribution schedule for academic year 1983-1984 shall be computed by increasing the comparable amount (for the same family size) in the family contribution schedule for academic year 1982-1983 by 7.3 percent, and rounding the result to the nearest $100.d

(c) For purposes of subsection (a), the family contribution schedule for academic year 1982-1983 shall be modified by the Secretary of Education for use for academic year 1983-1984—

(1) to reflect the most recent and relevant data, and

(2) to comply with section 482(b)(3) of the Higher Education Act of 1965 with respect to the treatment of payments under title 38 of the United States Code.

(d) The modified family contribution schedule under this section shall be submitted not later than 15 days after the date of enactment of this Act.

PELL GRANT FAMILY CONTRIBUTION SCHEDULE FOR ACADEMIC YEAR 1984-85

SEC. 6. (a)(1) The family contribution schedule for academic year 1984-1985 for Pell Grants under subpart 1 of part A of title IV of the Higher Education Act of 1965 shall be established by the Secretary of Education, if the Secretary publishes a proposed schedule in the Federal Register by March 1, 1983, and submits it to the President of the Senate and the Speaker of the House of Representatives not later than the time such schedule is so published.

(2) The proposed schedule shall be subject to public comment for 30 days. The Secretary shall publish and submit to the President of the Senate and the Speaker of the House of Representatives a final family contribution schedule not later than April 15, 1983, for the academic year 1984-1985.

(3) If the Secretary does not so publish and submit such schedule as required by paragraphs (1) and (2), the family contribution schedule in effect for academic year 1983-1984 shall be the family contribution for academic year 1984-1985, except as provided in subsections (c) and (d) of this section.

(b) If the Secretary publishes and submits the final family contribution schedule as required by subsection (a) such schedule shall take effect unless, on or before June 1, 1983, either House of Congress adopts a resolution of disapproval of such schedule. In such event, the Secretary shall publish a new proposed family contribution schedule in the Federal Register and submit it to the President of the Senate and the Speaker of the House of Representatives not later than 15 days after the date of the adoption of such resolution of disapproval. Such new schedule shall take into consideration such recommendations as may be made in either House of Congress in connection with such resolution. Such new schedule shall be effective (for academic year 1984-1985) on July 1, 1983, unless, prior to that date, either House of Congress adopts a resolution of disapproval of such new schedule. It the new schedule is also disapproved, the family contribution schedule in effect for academic year 1983-1984 shall be the family contribution for academic year 1984-1985, except as provided in subsections (c) and (d) of this section.

(c)(1) Each of the amounts allowed as an offset for family size for dependent and independent students in the family contribution schedule for academic year 1984-1985 shall be computed by increasing (or decreasing) the comparable schedule for academic year 1983-1984 (as set by section 5(b) of this Act) by a percentage equal to the percentage increase (or decrease) in the Consumer Price Index published by the Department of Labor, and rounding the result to the nearest $100.

(2) For purposes of paragraph (1) of this subsection, the percentage increase (or decrease) in the Consumer Price Index is the change, expressed as a percent, between the arithmetic mean of the Consumer Price Index for April, May, and June of 1982 and the arithmetic mean of such Index for April, May, and June of 1983.

(d) If, under subsection (a) or (b), the family contribution schedule for academic year 1983-1984 is required to be the family contribution scehdule for academic year 1984-1985, the family contribution schedule for academic year 1983-1984 shall be modified by the Secertary of Education for use for academic year 1984-1985 to reflect the most recent and relevant data.

(e) The modified family contribution schedule under this section shall be published in the Federal Register not later than July 15, 1983.

COST OF ATTENDANCE

SEC. 7. Notwithstanding any other provision of law, the cost of attendance criteria used for calculating eligibility for and the amount of Pell Grants for academic years 1983-1984 and 1984-1985 shall be the same as those criteria in effect for academic year 1982-1983.

INFORMATION CONCERNING FAMILY SIZE OFFSET

SEC. 8. The Secretary of Education shall publish in the Federal Register the changes in amounts allowed as an offset for family size as a consequence of the requirements of section 6(c) of this Act immediately after publication by the Secretary of Labor of the Consumer Price Index for June 1983.

GUARANTEED STUDENT LOAN FAMILY CONTRIBUTION SCHEDULE FOR THE PERIOD JULY 1, 1983, THROUGH JUNE 30, 1984

SEC. 9. (a) Except as provided in subsections (b) and (c) the family contribution schedule for the period of instruction from July 1, 1983 through June 30, 1984 for loans made, insured, or guaranteed under part B of title IV of the Higher Education Act of 1965 shall be the family contribution schedule for such loans for the period of instruction from July 1, 1982 through June 30, 1983.

(b) For purposes of subsection (a), the family contribution schedule for the period of instruction from July 1, 1982 through June 30, 1983 shall be modified by the Secretary of Education for use for the period of instruction from July 1, 1983 through June 30, 1984 to reflect the most recent and relevant data.

(c) The modified family contribution schedule under this section shall be submitted not later than March 1, 1983, and shall otherwise be subject to the provisions of section 482(a) of the Higher Education Act of 1965.

SUPPLEMENTAL EDUCATION OPPORTUNITY GRANT APPORTIONMENT FOR FISCAL YEAR 1983 AND 1984

SEC. 10. (a) Notwithstanding section 413D of the Higher Education Act of 1965, the Secretary shall apportion the sums appropriated pursuant to section 413A(b) of the Higher Education Act of 1965 for each of the fiscal years 1983 and 1984 among the States so that each State's apportionment bears the same ratio to the total amount appropriated as that State's apportionment in fiscal year 1981 bears to the total amount appropriated pursuant to section 413A(b) for the fiscal year 1981.

(b) The Secretary shall allocate sums appropriated pursuant to section 413A(b) of the Higher Education Act of 1965 for each of the fiscal years 1983 and 1984 to institutions in each State without regard to section 413(D)(b)(1)(B)(ii)(I) of that Act.

COLLEGE WORK-STUDY ALLOTMENT FOR FISCAL YEARS 1983 AND 1984

SEC. 11. Notwithstanding section 442 of the Higher Education Act of 1965, the Secretary shall allot the sums appropriated pursuant to section 441(b) of the Higher Education Act of 1965 for each of the fiscal years 1983 and 1984, among the States so that each State's allotment bears the same ratio to the total amount appropriated as that State's allotment in fiscal year 1981 bears to the total amount appropriated pursuant to section 441(b) for the fiscal year 1981.

NATIONAL DIRECT STUDENT LOAN APPORTIONMENT FOR FISCAL YEARS 1983 AND 1984

SEC. 12. Notwithstanding section 462 of the Higher Education Act of 1965, the Secretary shall apportion the sums appropriated pursuant to section 461(b)(1) of the Higher Education Act of 1965 for each of the fiscal years 1983 and 1984, among the States so that each State's apportionment bears the same ratio to the total amount appropriated as that State's apportionment in fiscal year 1981 bears to the total amount appropriated pursuant to section 461(b)(1) for the fiscal year 1981.

LOAN REPAYMENT DISCLOSURE

SEC. 13. (a)(1) Section 433A of the Higher Education Act of 1965 is amended by inserting "(a)" after the section designation and by adding at the end thereof the following new subsection:

"(b) Each eligible lender shall enter into an agreement with the Secretary under which the eligible lender will, prior to the start of the repayment period of the student borrower on loans made, insured, or guaranteed under this part, disclose to the student borrower, clearly and conspicuously in writing, and in a form that the student may keep, the information required under this subsection. The disclosures required by this subsection shall include—

"(1) the itemization of and the total of amounts financed, calculated by adding all amounts borrowed by the student borrower under this part, and subtracting all charges, including any origination fee or insurance premium, paid by the student borrower;

"(2) the dollar cost to the student borrower of the amount borrowed;

"(3) the dollar amount of total scheduled payments, calculated by adding the amounts in clauses (1) and (2); and

"(4) the repayment schedule of the student borrower, including the number, amounts, and frequency of payments.".

(2) The second sentence of such section is amended by striking out "section" and inserting in lieu thereof "subsection".

(b)(1) Section 463A of the Higher Education Act of 1965 is amended by inserting "(a)" after the section designation and by adding at the end thereof the following new subsection:

"(b) Each institution of higher education, in order to carry out the provisions of section 463(a)(8), shall, prior to the start of the repayment period of the student borrower on loans made under this part, disclose to the student borrower, clearly and conspicuously in writing, and in a form that the student may keep, the information required under this subsection. The disclosures required by this subsection shall include—

"(1) the itemization of and the total of amounts financed, calculated by adding all amounts borrowed by the student borrower under this part, and subtracting all charges, including any origination fee or insurance premium, paid by the student borrower;

"(2) the dollar cost to the student borrower of the amount borrowed;

"(3) the dollar amount of total scheduled payments, calculated by adding the amounts in clauses (1) and (2); and

"(4) the repayment schedule of the student borrower, including the number, amounts, and frequency of payments.".

(2)(A) The first sentence of such section is amended by striking out "section 463(a)(7)" and inserting in lieu thereof "section 463(a)(8)".

(B) The second sentence of such section is amended by striking out "section" and inserting in lieu thereof "subsection".

CONSOLIDATION OF LOANS BY STATE GUARANTY AGENCIES

SEC. 14. Section 428 of the Higher Education Act of 1965 is amended by adding at the end thereof the following new subsection:

"(j)(1) Each—

"(A) State agency and nonprofit private institution or organization with which the Secretary has an agreement under subsection (b) of this section, and

"(B) eligible lender in a State described in section 435(g)(1) (D) or (F) of this Act,

or its designated agent may, upon the request of a borrower who has received loans under this title from two or more programs or lenders, or has received any other federally insured or guaranteed student loan make, notwithstanding any other provision of this part limiting the maximum insured principal amount for all insured loans made to a borrower, a new loan to the borrower in an amount equal to the unpaid principal and accrued unpaid interest on the old loans. The proceeds of the new loan shall be used to discharge the liability on such old loans.

"(2) Loans made pursuant to this subsection shall be insurable by the State or nonprofit private institution or organization with which the Secretary has an agreement under section 428(b). The terms of loans made under this subsection shall be such terms as may be agreed upon by the borrower and the State agency and nonprofit private institution or organization, or eligible lender in a State described in section 435(g)(1) (D) or (F), and meet the requirements of section 427, except that (A) the ten-year maximum period referred to in section 427(a)(2)(B) may be extended to no more than twenty years, and (B) clause (ii) of section 427(a)(2)(B) shall not be applicable.

"(3)(A) Notwithstanding any other provision of this part, the State agency and nonprofit private institution or organization, or eligible lender in a State described in section 435(g)(1) (D) or (F), with the agreement of the borrower, may establish such repayment terms as it determines will promote the objectives of this subsection including, but not limited to, the establishment of graduated, income sensitive repayment schedules.

"(B) For any borrower who has received two or more loans under this part bearing interest at the rate of 9 per centum per annum on the unpaid principal balance of the loan and who requests a new loan under this subsection for the purpose of consolidation on a date after the date on which the Secretary has made a determination under section 427A(b), the rate of interest on such new loan shall not exceed 8 per centum per annum on the unpaid principal balance of such new loan.

"(4) The State agency and nonprofit private institution or organization, and eligible lender in a State described in section 435(g)(1) (D) or (F), shall develop a program to ensure the dissemination of information to students, lenders, and institutions of higher education regarding the loans authorized by this subsection.".

LINEAR REDUCTION OF PELL GRANTS

SEC. 15. Section 411(b)(3)(B) of the Higher Education Act of 1965 is amended to read as follows:

"(B)(i) If, for any period of any fiscal year, the funds appropriated for payments under this subpart are insufficient to satisfy fully all entitlements, as calculated under subsection (a)(2)(B)(i), the amount paid with respect to each entitlement shall be—

"(I) the full amount for any student whose expected family contribution is $200 or less, or

"(II) a percentage of that entitlement, as determined in accordance with a schedule of reductions established by the Secretary for this purpose, for any student whose expected family contribution is more than $200.

"(ii) Any schedule established by the Secretary for the purpose of division (i) of this subparagraph shall contain a single linear reduction formula in which the percentage reduction increases uniformly as the entitlement decreases, and shall provide that if an entitlement is reduced to less than $100, no payment shall be made.".

HIGHER EDUCATION SURVEY DATA

SEC. 16. The National Center for Education Statistics shall collect and publish for academic years (1982 through 1985, tuition and fees data, and room and board charges for institutions of higher education included in the Higher Education General Information Survey. The surveys required by this section shall be consistent with prior surveys of data described in this section.

MOTION OFFERED BY MR. SIMON

Mr. SIMON. Mr. Speaker, I offer a motion.

The Clerk read as follows:

Mr. SIMON moves to strike out all after the enacting clause of the Senate bill (S. 2852) and to insert in lieu thereof the provisions of the bill, H.R. 7048, as passed by the House.

The motion was agreed to.

The Senate bill was ordered to be read a third time, was read the third time, and passed.

The title of the Senate bill was amended so as to read: "A bill to require a separate family contribution schedule for Pell Grants for academic years 1983–1984 and 1984–1985, to establish restrictions upon the contents of such schedule, and for other purposes."

A motion to reconsider was laid on the table.

A similar House bill, H.R. 7048, was laid on the table.

APPOINTMENT OF CONFEREES ON H.R. 7048

Mr. SIMON. Mr. Speaker, I ask unanimous consent that the House insist on the provisions in the House bill and request a conference with the Senate thereon.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Illinois? The Chair hears none, and without objection, appoints the following conferees: Messrs. SIMON, ANDREWS, PEYSER, WEISS, GAYDOS, PERKINS, ECKART, COLEMAN, ERLENBORN, ERDAHL, DENARDIS, and BAILEY of Missouri.

There was no objection.

□ 1130

INTRODUCTION OF LEGISLATION DIRECTING THE PRESIDENT TO DECLASSIFY AND MAKE AVAILABLE INFORMATION ON SOVIET MILITARY BUILDUP

(Mr. BADHAM asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. BADHAM. Mr. Speaker, today I am introducing a resolution which, if passed by the Congress, would direct the President to declassify and make available to the American people information about the present and ever-growing threat to their freedom posed by the military buildup of the Soviet Union.

The perception 2 years ago by the American people that the United States had lost much of its standing in the eyes of the world and that the balance of power was shifting to the advantage of the Soviet Union led, in large part, to the election of Ronald Reagan.

Since then, with President Reagan's leadership, we have undertaken the task of reordering our national priorities so that America will be equal to the challenges of the 1980's and beyond.

However, this is a long, arduous task that requires consistency and steadfastness of purpose, and one that cannot be accomplished without the conscious backing of those whose liberty it is intended to insure.

That a public consensus on national security is essential was underscored recently by the fact that it was the theme of the annual conference of the International Institute for Strategic

Studies held this month at The Hague.

An article in the New York Times about the conference got right to the heart of the matter with the statement:

> The meaning of the institute's them (Defense and Consensus: The Domestic Aspects of Western Security) is that the experts acknowledge that democratic countries can't successfully plan for their security without broad public support and that such support can no longer be taken for granted.

Given what is at stake and that we simply cannot assume a public consensus exists in favor of a stronger defense posture, those of us elected to provide for the security of the Nation must do all we can to see that the people at home know what the Soviets are doing and how their actions endanger the security of the free world. Without sufficient knowledge of the threat, Americans cannot be expected to support policies to counter it. Thus, it is essential that a concerted effort be made to bring to the attention of the American people evidence of the peril to our country and our allies inherent in the ongoing escalation of Soviet military power.

The resolution I am introducing at this time would help accomplish this, and I ask my colleagues to join me in this attempt to make more information on the scope and nature of the Soviet threat available to the American public.

EXPRESSING THE SENSE OF CONGRESS THAT FEDERAL SUPPORT FOR CHILD NUTRITION PROGRAMS SHOULD BE MAINTAINED

(Mr. WAMPLER asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. WAMPLER. Mr. Speaker, I recently joined as a cosponsor of House Concurrent Resolution 384, which expresses the sense of the Congress that Federal involvement in and support for child nutrition programs should be maintained.

Food assistance programs play an integral part in feeding the needy people in this country and represent an investment in the well-being of the needy elderly, disabled, and children who rely on these programs. The food stamp program, as well as child nutrition programs such as the school lunch program and the WIC program, are examples of these programs. These programs were initiated to address the problems of hunger and poor nutrition that existed. While many of these problems have been reduced—the continuing need for these programs still exists.

This resolution expresses the sense of Congress that child nutrition programs should continue as they are now administered. I support that concept and until a better proposal is submitted to Congress I will continue my strong support for programs that contribute to improved nutrition among needy people in our country.

I might take this opportunity to mention another phase of this issue that goes hand in hand with food asistance programs. This is nutrition education. Food assistance programs, while an integral part of any nutrition policy, are not the entire solution to the problem of poor diets. Education programs are needed to help low income families acquire the knowledge and skills necessary to improve their diets.

I urge Members to support House Concurrent Resolution 384.

EMERGENCY RAILROAD STRIKE LEGISLATION

(Mr. WEBER of Ohio asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. WEBER of Ohio. Mr. Speaker, I want to commend the leadership on both sides of the aisle on bringing legislation to the floor of the House today, House Joint Resolution 600, that will bring an end to the railroad strike that threatens to cripple this Nation.

The estimates of the cost of this strike now reach $80 million a day. Without prompt action, this country will see another 450,000 workers on layoffs.

Mr. BROYHILL. Mr. Speaker, will the gentleman yield?

Mr. WEBER of Ohio. I yield to the gentleman from North Carolina.

Mr. BROYHILL. Mr. Speaker, it is my understanding that $80 million a day is just the cost to the railroads alone. The cost to the national economy is closer to half a billion dollars a day.

Mr. WEBER of Ohio. I thank the gentleman for adding to my statement.

Mr. Speaker, this legislation is vital so that the rail strike does not choke off the economic recovery that is beginning, and it is vital, therefore, for this body to act today. We have to demonstrate that the Congress of the United States can act quickly and responsibly, closing ranks in a bipartisan manner to do what is required to serve the best interests of this country.

A COURAGEOUS DECISION

(Mr. DORNAN of California asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. DORNAN of California. Mr. Speaker, I rise today in support of our President and his most, most difficult but responsible decision to send U.S. Marines into the war-torn area of Beirut, Lebanon.

The Soviet Union is consistent. It always fulfills its evil responsibility to make sure that oppressed nations stay oppressed. The United States is the leading Nation of the free world. Are we going to shirk the moral responsibility to further democracy wherever or whenever we can? With leadership comes the difficult responsibilities of a great nation to help small nations that are trying to build democratic institutions. Lebanon is suffering greviously. We cannot turn our back.

Israel, a loyal ally for decades, is in a most difficult situation at the conclusion of their "Operation: Peace in Galilee." They have developed a dilemma similar to the one the United States found itself entraped by in Southeast Asia. While trying to end terrorism and support the formation of a democratic government, the United States was viciously criticized for every move we took without any regard for the alternative nightmare—the nightmare that exists in Vietnam today.

Israel wants to maintain peace and to see Lebanon turned again into a stable nation, but they are too close to the bloodshed and fighting, too entwined in the deep passions of the area. Israel needs our stabilizing influence, so, therefore, I think the President has made a courageous decision. I give him my wholehearted support with full knowledge that it is a dangerous decision, and that it does place our fine marines in jeopardy.

Those officers and men on their way back to Lebanon know the risks and fully expected, when they joined the corps, to occasionally be ordered to go in harm's way.

May God watch over them.

EMERGENCY RAILROAD STRIKE LEGISLATION

Mr. DINGELL. Mr. Speaker, pursuant to a previous order of the House, I call up the Senate joint resolution (S.J. Res. 250) to provide for resolution of the single outstanding issue in the current railway labor-management dispute, and for other purposes, and ask for its immediate consideration in the House.

The Clerk read the title of the Senate joint resolution.

The Clerk read the Senate joint resolution, as follows:

S.J. RES. 250

Whereas the labor dispute between the carriers represented by the National Carriers' Conference Committee of the National Railway Labor Conference and certain of their employees represented by the Brotherhood of Locomotive Engineers threatens essential transportation services of the Nation;

Whereas it is essential to the national interest, including the national health and defense, that essential transportation services be maintained;

Whereas all the procedures for resolving such dispute provided for in the Railway

Labor Act have been exhausted and the parties have resorted to self help;

Whereas the Congress finds that emergency measures are essential to security and continuity of transportation services by such carriers;

Whereas all of the other negotiations for a national agreement by the rail carriers and the representatives of other railroad employees have been successfully completed, including the negotiations of the carriers and the United Transportation Union that were resolved through the Report and Recommendations of Presidential Emergency Board Numbered 195; and

Whereas the recommendations of Presidential Emergency Board Numbered 194 for settlement of this dispute have led to agreement of the parties on all but a single issue, and the recommendation on that issue would preserve the employees' collective bargaining rights within the peaceful procedures of the Railway Labor Act: Now, therefore, in order to preserve the national interest in essential transportation services, be it

Resolved by the Senate and House of Representatives of the United States of America in Congress assembled, That, consistent with the purposes of the Railway Labor Act to avoid any labor dispute that threatens substantially to interrupt interstate commerce to a degree such as to deprive any section of the country of essential transportation service—

(1) the parties to the dispute between the carriers represented by the National Carriers' Conference Committee of the National Railway Labor Conference and certain of their employees represented by the Brotherhood of Locomotive Engineers shall take all necessary steps to restore service, and the status quo of the parties shall return to that which was in effect prior to 12:01 antemeridian of September 19, 1982, which status shall remain in effect through June 30, 1984, and which status shall be subject to the provisions of paragraph (2) of this joint resolution; and

(2) the Report and Recommendations of the Presidential Emergency Board Numbered 194, dated August 19, 1982 (including the recommendations regarding Moratorium issues), shall be binding on the parties and shall have the same effect as though arrived at by agreement of the parties under the Railway Labor Act (45 U.S.C. 151 et seq.), and shall be effective for the period from April 1, 1981, through June 30, 1984: *Provided,* That nothing in this joint resolution shall prevent any mutual agreement by the parties to implement the terms and conditions established by this joint resolution.

SEC. 2. This resolution shall take effect immediately upon enactment.

The SPEAKER pro tempore. The gentleman from Michigan (Mr. DINGELL) is recognized for 1 hour.

Mr. DINGELL. Mr. Speaker, I yield myself 5 minutes.

Mr. Speaker, this legislation passed the Senate by a voice vote. It had the support of such philosophically diverse Members of that body as the distinguished Senator from Massachusetts, Mr. KENNEDY, the ranking Democrat on the Labor Committee, and the chairman of that committee (Mr. HATCH).

I would observe to the Chair that the economic situation in this country is the worst since 1929. It is not pleasant for me to bring forward legislation that would inject the Congress into the dispute that has caused the rail strike, but the legislation before us is absolutely necessary in view of the magnitude of the economic crisis confronting the Nation and in view of the fact that no viable alternative to this legislation exists.

Today we have 9.8 percent of our people out of work. Today the deficits are at a record level. Today hardship, hunger and misfortune stalks the land, and this country simply cannot tolerate a railroad strike which would bring all of our major economic activity either to a total halt or to a state of substantial impairment.

The strike which has been in effect since early Sunday morning threatens to shut down every major railroad across the Nation, preventing transportation of products and materials essential to the continued operation of such rail-dependent industries as autos. A number of auto plants have already closed, causing massive layoffs. The rest will be closed by Thursday night. The entire steel industry will virtually be shut down by Friday, and coal and a number of other industries, including the electrical generating industry, will soon follow. Chemicals and timber are also in severe straits.

At harvest time this will bring to a virtual halt rail traffic in grains, perishable commodities and agricultural produce. The economic consequences to the Nation will be exacerbated by the loss of ridership of some 18,000 Amtrak passengers and over 140,000 rail commuters today and each and every other day.

Information received by the committee indicates that a number of railroads are now operating at less than 25 percent of normal capacity due to the strike. The economic consequences are that there will be a loss of hundred of millions of dollars a day to the economy. Better than $2 billion a month will be lost in economic activity in the country. And worse than this, within 30 days 1.4 million Americans will be out of work, stemming directly from the strike, and will be added to better than 10 million Americans who are now pounding the streets looking for jobs.

Mr. Speaker, the legislation simply legislates into place the recommendations of the Presidential Emergency Board with respect to the sole issue in the negotiations between the Brotherhood of Locomotive Engineers, the union which first struck and the National Railway Labor Conference, the negotiating arm of almost every major railroad. That issue is the sharing of productivity payments stemming from the elimination of one brakeman which was agreed in crew consist agreements with individual railroads by the other operating union, the United Transportation Union. The locomotive engineers would be able to negotiate this issue on a carrier-by-carrier basis under the peaceful procedures of the Railway Labor Act. All other rail unions, including the UTU, have agreed to similar moratorium provisions in their national agreements with the railroads.

I would observe that the United Transportation Union has solved its strike and has solved its differences with management and that the only remaining issue remains between the Brotherhood of Locomotive Engineers and rail management.

In passing this resolution, this body will be exercising its responsibility to pursue a reasonable and expeditious course of action to prevent further exacerbation of the national economic crisis now stalking the land.

I urge my colleagues to carry forward this responsible policy, to support the legislation to get the trains rolling again and do everything possible to see that the Nation's economy is not further impaired.

Mr. GONZALEZ. Mr. Speaker, will the gentleman yield?

Mr. DINGELL. I yield to the gentleman from Texas.

Mr. GONZALEZ. I thank the distinguished gentleman for yielding.

I have a question to ask, and that is the only reason I rise. One of the first issues when I came to the Congress was that first congressional intervention in the collective bargaining process, in 1963, I believe, or 1962.

I understood that the President could have acted under the Taft-Hartley cooling off period; is that correct?

Mr. DINGELL. No.

Mr. GONZALEZ. Why are we asking for this legislation?

Mr. DINGELL. Railway labor matters are handled under the Railway Labor Act. Two 30-day cooling off periods are available to the President during which factfinding boards act. Those 30-day periods have expired. Recommendations of the boards have come in. One union has accepted them without going out on strike, the UTU. The other union, BLE, has not been able to resolve its differences over the last point, which is the sharing of productivity stemming from the lay-off of one brakeman, a member of the UTU, pursuant to agreements negotiated by that union with individual railroads. That difference is legislated away by the legislation before us.

Mr. GONZALEZ. I thank the gentleman.

Mr. DINGELL. Mr. Speaker, I yield 2 minutes, for purposes of debate only, to my distinguished friend, the gentleman from North Carolina (Mr. BROYHILL).

Mr. BROYHILL. Mr. Speaker, the chairman of the committee has explained the purposes of this resolution. I must emphasize the national

urgency of this situation. The national rail strike which has been called by one of the railway unions, one of the 13, is causing untold damage to the national economy. Each day that the strike is permitted to continue is at a cost of approximately $500 million to the economy. We are told that already some 300,000 people are out of work. By week's end that figure could be some three-quarters of a million and could be over a million by the end of 2 weeks. We are also getting by the minute news of impending plant closings. Farmers are quickly beginning to feel the impact of this strike as their products cannot be shipped to market.

The gentleman from Michigan has explained the basis for this strike. It is simply the desire of one union, the Brotherhood of Locomotive Engineers, to be able to retain a wage differential over the members of another union, and I would point out that we received testimony in the committee yesterday that the members of this union are presently averaging about $37,000 a year. Under terms of the agreement that were tentatively agreed to, the Emergency Board recommendations, they would be receiving $45,000 per annum on the average at the end of this contract. The UTU has tentatively agreed to continue negotiating productivity issues with the carriers in a peaceful way, that is, to have a moratorium on a strike for the remainder of the contract. The BLE, on the other hand, has refused to resolve the productivity issues in a peaceful way and would insist upon their right to strike during the life of the contract, and that is what the strike is all about, that very narrow issue.

If we do not adopt Senate Joint Resolution 250 without amendment this issue will not be resolved because it is an interunion issue, an attempt by one union to leapfrog another in addition, the adverse impact on the economy will continue.

There is ample precedent for the House to take this action. On several occasions between 1963 and 1971 this House has acted to resolve similar disputes in the rail industry.

The Senate acted on Senate Joint Resolution 250 last night by voice vote. We must adopt Senate Joint Resolution 250 without amendment so that we can have it sent to the President for his signature. I believe any delay is unwarranted. I urge my colleagues to defeat the Florio amendment, which is not the proper approach and to vote yes on the adoption of Senate Joint Resolution 250.

Finally, Mr. Speaker, I would like to clarify one technical matter with respect to the committee's intent with respect to the language in paragraph (1) of the joint resolution presently under consideration. It is my understanding, which I believe is shared by all the members of the Energy and Commerce Committee, that the effect of the first paragraph of the joint resolution would be to impose the status quo described herein, subject to paragraph (2) of the resolution, as if the parties had entered into an agreement under the Railway Labor Act.

Mr. DINGELL. Mr. Speaker, I yield 15 minutes for purposes of debate only to the gentleman from New Jersey (Mr. FLORIO), and I yield 21 minutes for the purposes of debate only to the gentleman from North Carolina (Mr. BROYHILL).

The SPEAKER pro tempore. The Chair recognizes the gentleman from New Jersey (Mr. FLORIO).

Mr. FLORIO. Mr. Speaker, I thank the gentleman for his generosity in yielding such time.

This is a very complex issue and, therefore, I think it is appropriate that we understand what it is that is involved in this debate. There is agreement on a number of points by proponents and opponents of the resolution that we have here.

□ 1145

There is agreement that there is need for immediate action to end the strike and to resolve this dispute. There is agreement that the strike is causing great disruption to an already depressed economy.

There is agreement, at least on my part, that the issue that has precipitated this strike is a minor issue of no great economic consequence; and in my opinion, the strike never should have taken place.

There is not agreement as to the desirability of this particular method of resolving the problem, because one idea that is embodied in this resolution is the rather radical new initiative of having the Government dictate the terms of a private, collective bargaining agreement between two private parties and then having it imposed by operation of law by this Congress. That is a very dramatic departure from the way we conduct business in this Nation.

As I have said earlier, I am convinced this is a matter that can be resolved by the parties if we put the focus of public attention on them very dramatically. The old question of wage differentials between two particular crafts, what the percentage should be, if any percentage, is almost a mathematical computation. Certainly that is the essence of what collective bargaining is supposed to be about.

As I say, I am convinced that that can be resolved. I have difficulty with this particular proposal coming from this administration, ironically a conservative administration that usually talks about keeping the Government out of the marketplace, which talks about keeping the Government off the back of business people. I have difficulty with this administration now advocating the imposition of a governmentally dictated agreement in the private sector.

Management and even parts of labor that may be the beneficiaries of this particular agreement may very well rue the day when we established this principle that Government can dictate the terms of these agreements because next year or the year after when the same principle is invoked to impose a different agreement, they may decide and learn that they are on the wrong side of the governmental wisdom—or lack thereof—in imposing these types of understandings.

If this approach is accepted as the normal course of business, I can conceive of a situation within a matter of weeks when we have the National Football League strike going on, and we are all incensed that we cannot watch football on Sunday, and the President may very well be called upon and may convene a special advisory commission—as he did in this case—and that commission comes back and says, "Well, we think the players are right, they are entitled to 55 percent of the gross revenues of the team; that is our recommendation; we want to see football." Someone then introduces legislation such as this. We then pass the resolution, and the Congress has set the terms of that collective bargaining agreement. It is not inconceivable.

I will, in light of my concerns—which I think are legitimate—in light of my awareness that this strike should be stopped, in light of the fact that I believe that the parties should resolve in the normal way this minor issue, as soon as we conclude the debate, I have the concurrence of the chairman to offer an amendment which will do the following:

Stop the strike; prohibit further work stoppages for a 140-day period; resume obviously rail service to the Nation, immediately; and then direct the parties to go back to the table and resolve this particular problem. We will then preserve the principle that private parties rather than the Government are to dictate, are to take part in determining the terms of the collective bargaining agreements.

Mr. DINGELL. Mr. Speaker, will the gentleman yield?

Mr. FLORIO. I yield to the gentleman from Michigan.

Mr. DINGELL. I thank the gentleman for yielding.

To what unions would the gentleman's amendment apply? Would it apply solely to the Brotherhood of Locomotive Engineers or would it apply also to the UTU?

Mr. FLORIO. This would apply to both of the brotherhoods that are currently in the process of negotiating agreements, neither of which has finalized their contract terms.

Mr. DINGELL. But the UTU has agreed and is in the process of ratification, so the gentleman's amendment would order the UTU which is not on strike and is in the process of ratifying the agreement to go back to work and would order also the BLE, which is on strike, to go back to work. So one union, which has agreed to its contract and is ratifying that contract now, would be ordered back to work and be compelled to work even though the ratification process might be jeopardized by the other agreement?

Mr. FLORIO. If the chairman would yield back the time so I could respond to the gentleman's—I am sure—inadvertent, incorrect statement that the ratification is going forward, the ratification specifically is not going forward pending the outcome of these deliberations between the various parties, namely the three parties, industry as well as the two Brotherhoods; so there will be no disruption. The implementation of my amendment will insure that there is no disruption, and that the whole process can be terminated and finalized at the end of the period.

Mr. BROYHILL. Mr. Speaker, will the gentleman yield?

Mr. FLORIO. I will be happy to yield for a brief period.

Mr. BROYHILL. I thank the gentleman for yielding.

Is it not a fact the Congress since 1963 has intervened, has passed legislation to settle railway labor disputes or to provide for the settlement on several different occasions?

Mr. FLORIO. The gentleman is correct, that Congress has intervened in the way that I am advocating intervention, to provide for an extended period of time beyond the statutory allowed cooling-off period to allow the parties to conclude their negotiations.

I must reclaim my time to yield 2 minutes to the gentleman from Texas (Mr. LELAND).

Mr. LELAND. Mr. Speaker, I appreciate the gentleman from New Jersey allowing me the time to agree with him in terms of the action the gentleman is offering in this body. I feel it is only fair that indeed we have the opportunity to vote on a piece of legislation that would provide an alternative to the Congress intervening into the affairs between management and labor.

I think it sets a really bad precedent for us to engage in that kind of an intervention at this time in view of the economic circumstances that we are faced with. I am very reserved about my involvement in this debate in the first place against the proposal offered by the chairman of my committee, the gentleman from Michigan (Mr. DINGELL).

But I think that in the long term, we will be much better off and will find what it is that we are debating today will set the kind of precedent we will very definitely regret.

I would like to do as much as I can to help the gentleman from New Jersey pass his alternative. I think that is the only way we can realize the kind of justice and the kind of option that will give us the opportunity to work out some kind of reasonable—reasonable—means to solve this problem.

Mr. Speaker, I rise, after considerable thought and with some reservations, in opposition to this resolution. I believe that the House has before it a matter not only of considerable economic import but one involving an essential principle of the American workplace.

We are being asked here today to deny the Brotherhood of Locomotive Engineers the right to strike. The principle involved is that simple. Let no one tell you otherwise. The principle involved is clearly not whether we should allow—and "allow" is the key word—a strike with considerable economic impact to continue over the question of wage differential for engineers. The wage differential is the central concern of the BLE but it is not the central issue before this House.

The administration wants us to take from this union its lawful right to strike, to exercise the only real leverage it has to enforce its bargaining demands. The administration wants Congress to do what it has done before, and force a settlement, against which the BLE stands alone, on this small union. Secretary of Transportation Lewis is correct when he says there is "ample precedent" for such congressional action. But the question we face is one of "ample justification," not only for the action called for in this resolution, but for deepening the precedent to which the Secretary refers.

The justification the administration offers is substantial and ominous. The assessments of economic dislocation which have already occurred, and the dire predictions of what may yet lie ahead of us and the economy if the strike continues, are deeply disturbing to everyone in this Chamber. My concern takes form as a deep reservation about the course of action the engineers have chosen. Had the decision been mine to make, given the history and specifics of the negotiations over the last 18 months and the concessions made on all sides in this dispute, I do not believe I would have counseled the engineers to strike. But that was not my decision to make, and more importantly, it is not ours to make.

The administration says, and many of you agree, the economic disruption, the loss of jobs, the loss of productivity, justify our moving to end this strike. But there is a much larger question involved in assessing that economic impact, and though there may be few of you who join me in this regard, the question must be raised.

If as Secretary Lewis and the administration believe, no strike affects the economy and the country like a rail strike and that economic impact justifies our action to deny a rail union the right to strike, then the administration should, regardless of the out come of our debate here today, send to this Congress, and defend, legislation eliminating the right of railway unions to strike nationwide, or on any substantial scale. That is the concept which the economic impact directs us to. Instead, this administration joins other administrations past in asking Congress to abridge the right to strike on a piecemeal basis, but a permanent basis nonetheless. The assurance you have heard that all this legislation does is extend the cooling-off period for 21 months, after which time the BLE will have the right to strike to support its demands, is naive at best and clearly misleading. If the contention is valid that a strike with this impact calls for congressional action to bring it to an end, then the future, by concept and precedent, is one that takes from all rail unions the right to strike. If we approve this legislation and BLE or any other rail union feel strongly enough about any bargaining issue that they strike at some point in the life of the next contract period, we could very well be asked to repeat the action we consider here today. And I suspect there is not a single Member in this Chamber today who has any doubt about the future impact of this resolution.

The central point is this: To strike is to disrupt. If there were no economic impact, no disruption, no dislocation from a strike, there would be no strikes. It is their impact that makes them a tool of leverage in the collective bargaining process. If you disagree with that process, if you do not believe in the right to strike, this resolution will accommodate those points of view. If you believe in the collective-bargaining process and the right to strike, and I most emphatically do, this legislation is disturbing.

We will do further damage to the right to strike if we approve this legislation. We will further the environment, which this administration has sought to create, in which strikes are an iffy business indeed. We will send a clear message to working men and women across America that their fundamental right—to withhold their services to affect the nature and the conditions of the workplace—may not be fundamental at all. If a case can be mounted based on the economic impact of that strike, if a union can be isolated from its fellow unions, if a strike is unpopular enough, the Congress can be persuaded to abridge that right. If that is the message you want

to send to rank-and-file union members across this country, your choice is clear.

If you are concerned about protecting the right to strike, for the BLE and for all unions, your choice is a much more difficult one. You will be asked, if you oppose this resolution, to justify that opposition in the face of severe economic dislocation.

For my part, I do not believe we have exhausted our ability to resolve this dispute without resorting to congressional action to force a settlement and deny the BLE its lawful right to strike. I believe that if it were the decision of this House to disapprove this resolution, we would in fact put considerable pressure on the BLE to find an accommodation and end its strike and on the other rail unions to hold their positions and keep the agreement together. That may very well be an optimistic point of view, but it is an option that a belief in the collective bargaining process ought to push us to consider.

This is a matter that defies easy solutions. It is emotionally charged. The administration, which is in large measure responsible for the dark economic circumstances and unemployment to which this strike so direly adds, has been quick to seize the moment, to ask Congress to do its handiwork. As the concern in this country grows over recession and joblessness, the architects of this economic policy certainly do not want anyone to add more fuel to that fire; a fire which is already making them uncomfortably warm. I suspect history, and their future actions in such situations, will amplify and clarify their motives and the depth of their support for the collective bargaining process.

But I must say, Mr. Speaker, that many, or perhaps I should say most, of my colleagues will disagree and will support this resolution. The circumstances are very grave and the choice is difficult for those who believe in the perpetuation of unions and collective bargaining. I will respect their decisions, because they will be arduously reached. But I also believe that while the circumstances immediately before us are very serious, so are the future implications of what we are being asked to do.

Mr. FLORIO. Mr. Speaker, I yield 1 minute to the gentleman from New York (Mr. PEYSER).

Mr. PEYSER. Mr. Speaker, I have listened very carefully to the debate at this point. There is no question of the concern of this country or the concern of the gentleman from Michigan (Mr. DINGELL) or the gentleman from New Jersey (Mr. FLORIO). It is very clear that the role of the Congress is to get the railroads back to work and get the people back to work. There is no question of that; it seems to me there is a severe question over whether Congress wants to dictate the final results of this labor dispute; for that reason, I believe the gentleman's amendment—the gentleman from New Jersey (Mr. FLORIO)—is one that should be seriously considered in order to get the railroads running again, but still letting the private sector and labor work out their problem.

It is my hope that one of these pieces of legislation should be acted on to get this country moving again without sacrificing a very basic principle of the opportunity of collective bargaining in this country.

Mr. BROYHILL. Mr. Speaker, I yield 3 minutes to the gentleman from New York (Mr. LENT).

Mr. LENT. Mr. Speaker, I rise in support of this legislation and in opposition to the amendment to be offered by the gentleman from New Jersey (Mr. FLORIO).

We are faced with a most serious situation, the cessation of all rail service throughout the Nation affecting not only the shipment of freight but commuter and passenger operations; and this situation has resulted from the inability of the Brotherhood of Locomotive Engineers and the railroads, represented by the National Railway Labor Conference, to reach agreement after all peaceful means under the Railway Labor Act have been exhausted.

The continuation of this rail strike will have a devastating impact upon the economy. Witnesses who testified before the Energy and Commerce Committee yesterday confirmed that the strike is costing the American people approximately $80 million per day and, should the strike continue, will result in hundreds of thousands of nonrailroad employees becoming unemployed. Layoffs in the auto industry have already begun. The steel industry will follow soon.

Admittedly, this remedy is a drastic step. But this type of legislation is not unique. There is ample precedent for Congress to intervene where the public interest is at stake as it is here.

This nationwide rail strike was precipitated after failure of the parties, the Brotherhood of Locomotive Engineers and the National Railway Labor Conference, to settle their differences through the collective bargaining process, even after consideration of the recommendations of Presidential Emergency Board No. 194. Negotiations have gone on for 18 months on a labor contract. The parties are at an impasse. The one unresolved issue between the Brotherhood of Railway Engineers and the National Railway Labor Conference that resulted in the BLE action relates to the wage differential between the engineers represented by BLE and other train crew members represented by the United Transportation Union (UTU). As the Washington Post correctly pointed out in this morning's editorial, this is essentially a jurisdictional dispute. The UTU testified yesterday it was not opposed to this legislation.

I am concerned, as I believe all Members should be, with the impact that any resolution to the present strike will have upon the tentative agreement that was worked out between the NRLC and the UTU. Further delay could jeopardize that argeement according to the testimony yesterday by Fred Hardin, the president of the UTU.

I believe that Secretary Lewis quite appropriately indicated that the President, based upon a careful weighting of the countervailing considerations, made a judgment call to recommend the specific approach set forth in Senate Joint Resolution 250. I believe it is the proper judgment call.

Therefore, I urge my colleagues to support Senate Joint Resoultion 250 and oppose the amendment to be offered by the gentleman from New Jersey (Mr. FLORIO).

The Washington Post editorial follows:

LOCOMOTIVE ECONOMICS

The Brotherhood of Locomotive Engineers is providing the Reagan administration with a small but useful lesson in the realities of labor economics. The engineers' strike is not really against management, but against other unions whose members have won supplemental pay in a deal to reduce the size of train crews. The engineers' position is a simple one. They have always been the best-paid men on the train, by a certain differential hallowed by tradition. With clenched teeth and white knuckles, they declare that they want their differential, and they are prepared to keep their industry—and many others—shut down until they are assured of it.

When Mr. Reagan came to office, he made it clear that he intended to keep his administration out of labor negotiations. The general thought was that the free market was to operate unimpeded, in labor as in everything else. Some of the administration's economists felt that unions would see the tight restraint of the money supply, expressed in the weekly figures for M-1, and perceive that the day of the inflationary wage increase was over. Other economists thought that unions probably would not moderate wage demands until unemployment began to rise. But then, surely, wages would hold to the noninflationary trend.

As things are working out, it seems that the locomotive engineers have not been following M-1 as carefully as they were supposed to. Certainly they have not taken its austere message to heart. That will be a deep disappointment to the economists of the rational-expectations school. There seems to have been a collision between rational expectations and the engineers' expectations.

Nor has the thought of unemployment deterred the strike. The country is now in the 15th month of a severe recession, and the unemployment rate is nearly 10 percent. In railroading, the number of jobs has been falling for a generation. But the engineers want their differential.

Sometimes, in a situation like this, a union's leadership understands perfectly well that a large raise is out of the question. But the members, not all of whom follow economic policy closely, do not necessarily understand it. They pursue their traditions, and traditions are slow to bend. That's why, throughout the national economy as a whole, wages are still rising at an average rate of about 7 percent a year.

That's why President Reagan was right to rise above principle, as the late Sen. Everett Dirksen used to say, and intervene in the engineers' strike. And that's why Congress, rather than the free market, is probably going to have to produce a settlement.

Mr. BROYHILL. Mr. Speaker, I yield 1 minute to the gentleman from Pennsylvania (Mr. MARKS).

Mr. DINGELL. Mr. Speaker, I also yield 1 minute to the gentleman from Pennsylvania (Mr. MARKS).

Mr. FLORIO. Mr. Speaker, I likewise would yield 1 minute to the gentleman from Pennsylvania (Mr. MARKS).

Mr. MARKS. Mr. Speaker, I thank all three gentlemen for yielding time to me.

Mr. Speaker, this is a rather historic day in spite of the fact that the floor is not what you would call crowded.

This is a day, Mr. Speaker, where this administration—a rightwing, conservative administration, a Republican administration, which supposedly believes in the free enterprise system and has suggested publicly that they believe in free collective bargaining—is coming before the Congress of the United States and saying to the Members, "The Congress must destroy what this country has known for many, many years as collective bargaining."

That is what we are asked to do by this administration. We are told that a union which legally is on strike for a very important issue—they consider it very important, it is an issue of wage—we are told that we should destroy their right to negotiate a settlement in the same fashion as we permit every other union in this country to negotiate with management.

There is another way that this strike could have been avoided. That is that management could have conceded the issue to the union or the Emergency Board could have come back and said, "No, we will not put the burden on the union, we will put the burden on management and say to management, 'You must concede to the union.' "

□ 1200

May I suggest to my colleagues today that to ask of us the destruction of the collective bargaining agreement or the collective bargaining process is wrong.

The gentleman from New Jersey has suggested that this matter can be—and by the way, yesterday while he and the chairman, the gentleman from Michigan (Mr. DINGELL) and I sat for 7½ hours listening to the testimony, the unions agreed and management agreed that they would sit down together. They said that openly, publicly, on the record.

If the amendment of the gentleman from New Jersey (Mr. FLORIO) is passed, the strike will end. The people will go back to work. The hardship now being caused across the country will no longer be caused and the collective bargaining system will go on.

I beg of you, all of you, to consider the issue. This is an issue far beyond this single case. It is an issue as to whether or not the laws of this land that provide for collective bargaining between management and labor may continue and that the Congress shall not be a dictator, shall not be a dictatorship, shall not demand of either the union or business that they concede one way or the other.

I beg of you again to consider before you vote today that it is needless to put us in that position—and by the way, you will note that our comrades in the other body were so cowardly that they did not even have a recorded vote on it last night.

I ask of you, please, to consider that the amendment of the gentleman from New Jersey (Mr. FLORIO) is the answer to this problem.

Mr. BROYHILL. Mr. Speaker, I yield myself 1 minute.

Mr. Speaker, I yield myself this 1 minute for the purpose of correcting a misstatement that the gentleman from Pennsylvania has made. The dispute is not over wages, because the Emergency Board's recommendations on wages have been accepted by both sides. One union has agreed for the rest of the life of the contract to continue negotiating on productivity issues with the carriers and that they would continue negotiating in a peaceful way, that is, they would not strike during the life of the contract.

The BLE insists that it must preserve the means to protect the traditional differential in pay between the engineers and other train crews and they cannot accept the moratorium. It is the moratorium issue that this is all about.

The BLE insists that they have the right to strike during the life of the contract and, of course, it is over this very narrow issue. It does not have anything to do with the wage part of the Board's recommendations.

Mr. DINGELL. Mr. Speaker, I yield myself 3 minutes for the purposes of speaking against the amendment which will be offered by my dear friend and colleague, the gentleman from New Jersey (Mr. FLORIO).

Mr. Speaker, the amendment which will shortly be offered by our valued and esteemed colleague, the gentleman from New Jersey (Mr. FLORIO) is supposed to avoid substantive interference by the Government in the collective bargaining process by ordering a union which is now on strike back to work and by ordering a union which is not on strike back to work. If you object to governmental interference, then you should object twice to the amendment which will be offered by my dear friend, the gentleman from New Jersey (Mr. FLORIO), because his amendment would order not one union back to work, but two unions back to work, for 140 days, at which time the underlying problem in the BLE-railroad dispute would still not be solved. One union, the Brotherhood of Locomotive Engineers is now on strike, and the other the United Transportation Union is not now on strike and is in the process of convening its 250 general chairmen for purposes of ratifying its collective bargaining agreement which adopts the recommendations of the Presidential Emergency Board.

The bill before us will legislate into place only one of the Emergency Board's recommendations not agreed to by the parties and will, of course, end a strike, instead of possibly creating two strikes as the amendment of the gentleman from New Jersey would do. This would result because at the end of 140 days under the amendment offered by the gentleman from New Jersey (Mr. FLORIO), we will have seen the time during which the two unions, one on strike and one not on strike, will then be free to strike and at which time both unions will probably be on strike by reason of the fact that the gentleman will have effectively terminated the UTU ratification process which is soon to go forward. Mr. Fred Hardin, the president of the UTU presented clear and uncontroverted testimony yesterday before the Committee on Energy and Commerce on this very point.

I would point out, thus the Congress would legislatively require nonstriking railworkers who are shortly scheduled to vote on a peacefully negotiated collective bargaining agreement, executed by their leadership, to continue working in anticipation of a rejection of that agreement by the membership of that union.

I suggest that this is a precedent which is vastly more destructive than any which might be complained of here today by those who support the Florio amendment and is far more sweeping and far more radical than any precedent that has ever been set by any legislation dealing with rail labor matters during the 27 years that I have served in this body.

The amendment offered by my good friend, the gentleman from New Jersey (Mr. FLORIO) clearly illustrates the unique nature of the dilemma before us. His amendment would, as I have indicated, bring about a situation where we would have a potential at the end of 140 days, not for one strike, but for two, and would impose a statu-

tory period of settlement on not one union, but two, and would leave us with a set of circumstances where we would probably be back to discuss this same issue involving not one union, but two at the end of 140 days. I urge the Members to reject the Florio amendment.

Mr. Speaker, may I have a statement of the time remaining?

The SPEAKER pro tempore (Mr. ANNUNZIO). The gentleman from Michigan (Mr. DINGELL) has 13 minutes remaining.

Mr. DINGELL. And the time remaining for my colleagues, Mr. Speaker?

The SPEAKER pro tempore. The gentleman from North Carolina (Mr. BROYHILL) has 16 minutes remaining, and the gentleman from New Jersey (Mr. FLORIO) has 4 minutes remaining.

Mr. BROYHILL. Mr. Speaker, I yield such time as he may consume to the gentleman from Texas (Mr. PAUL).

Mr. PAUL. Mr. Speaker, as so often is the case in times of national emergencies, there is a careless sacrifice of individual freedom. Today we have before us a proposal to force men to work although they have chosen not to do so. It seems everyone agrees the procedure is "distasteful," but the "national interest" demands it. I believe our responsibility here in Congress is to support the Constitution and protect individual freedom. The phrase "national interest" is vague and means whatever anyone wants it to mean. Justifying actions on such an arbitrary objective is not acceptable.

One of the main reasons that expedient and admittedly distasteful solutions are tolerated and pushed through is that some short-term benefits are derived and these are traded off for the long-term tragic consequences.

Inflation is an evil and has driven our economy to its knees, yet it has been popular because it gives a false sense of prosperity even as the foundations of the capital markets are destroyed. The short-term "benefits" compel Congress to pursue deficits and money creation just as an alcoholic seeks out another wonderful evening with a fifth of liquor.

Compelling workers to work and legislating compulsory arbitration accepts the same fallacy. Rather than question the laws that grant monopoly powers to unions and eliminate the right of an employer to draw up a completely voluntary contract and fire employees at his discretion, we continue the process of Government intervention into the affairs of the private citizen in economic matters. The problems coming from previous Government intervention cannot be solved with more Government intervention. The problems will get worse on the long run, and freedom will be further diminished.

Compulsory arbitration mandated by legislation contradicts the entire notion of a free market and flagrantly violates the concept of individual liberty. The right of free people to organize, negotiate voluntary contracts, and to withhold its labor must be protected. This is the foundation on which our country was built and is the theme of the entire Constitution. This does not mean that naturally occurring events in a free market would ever have brought us to the labor crisis and the inflationary crisis we are facing today. Quite the contrary: A free market in labor and voluntary contracts would have prevented it and preserved freedom as well.

Unfortunately, though, in the past 40 to 50 years the only proposals that have ever come before the Congress are proposals on how Government force will be used to bring about some economic plan dreamed up in the heads of politicians and bureaucrats. The question is never raised of whether or not Government should be using force to give leverage to labor or business. Why must we feel compelled to use Government power to grant a privilege which otherwise would not have been achieved in the free market?

The tragedy that unions have not yet realized is that the powers granted by the labor legislation of the 1930's is the very reason they will now lose their right to strike. If governments can now compel union contracts to preclude the right of businessmen to hire and fire on an individual basis, they can compel men to work. The loss of freedom, whether it be the businessman's or the workingman's, is identical. If Government can compel a minimum wage and a prevailing wage, it gains the power to impose strict and unfair wage controls at the other end of the spectrum. But the beneficiaries of the Government legislation fail to look into the future when the loss of freedom for his adversary will then be applied to him as well. If unions accept Government power to get a closed union shop, they have sealed their fate in losing their right to withhold their labor when they desire. That is the tragedy of it all. And today we are only confirming this loss of freedom. It is time we decided to quit using Government for special interests and accept the notion that the proper role of Government is to protect liberty and guarantee the right of truly voluntary contracts. This is the only way freedom will survive, and fortunately the only way a thriving economy can be achieved—a goal we all seek. Legislation of this sort will only compound our problems, diminish our freedoms, and enlarge Government coercive powers.

The problem of compulsory unionism will never be solved by compulsory labor. Ultimately our economic problems will be solved by rejecting the concept of economic intervention. We must reduce taxes dramatically and eliminate abusive regulations. Compelling men to work against their will reinforces the philosophy of economic intervention in the worst way, and at great sacrifice of individual freedom. This form of central planning, although some will argue that great economic benefits to be achieved for a week or two are worth it, is just more of the same but only worse.

Also, to achieve true economic growth we must eventually face up to the issue of establishing sound money. The inflation caused by Congress and the Federal Reserve System will only be interrupted when we challenge the Federal Reserve System, its monopoly power over paper money, and establish a real 100-percent gold standard. Deficits need to be eliminated, monetization of the debt stopped, and trust restored with a 100-percent convertible dollar—a dollar defined as a precise weight of gold.

The free market in labor and wages must be established to prevent the tragedy we face today. Wages must be set in the marketplace, without the use of coercive labor practices, and without allowing closed union shops by legislation. This is the surest road to full employment. In a free market, closed shops are never made illegal but must only be permitted to come about voluntarily. No one should be forced to participate in a labor contract merely by a majority vote of other workers. Where did we ever get the idea that the rights of a minority in the labor market can be eliminated by a vote of the majority? This is hardly my understanding of liberty as fought for by our forefathers. The right to contract one's services at one's own discretion is not a negotiable right. Any labor law that prevents the individual from negotiating his own contract must be repealed if we expect to achieve full employment.

The battle of special interests must stop. Intervention always leads to the conflict of these special interests. The fight to use Government either for labor's benefit or for business' benefit becomes the only issue, rather than the issue of whether or not we should be using Government power to help either group.

Government should be used to protect rights and enforce contracts and should never be used by one group against another. The friction that results always leads to economic problems, as we are witnessing today, and political battles, as we are seeing with the political action committees, creating strong resentment and antagonism between the political factions. Only a free market with sound money and completely voluntary contracts in labor can solve our problems. Forcing

men to work against their will violates the concept of liberty in a most fundamental way and should not be used as a solution of expediency. This legislation should be rejected for economic, constitutional, and moral reasons.

Mr. BROYHILL. Mr. Speaker, I yield 3 minutes to the gentleman from Kansas (Mr. ROBERTS).

Mr. ROBERTS of Kansas. Mr. Speaker, I appreciate the gentleman yielding. I will not take the 3 minutes.

Mr. Speaker, this is not an issue of whether or not we are destroying the right of a union to settle or to bargain. The issue is time and the issue is effect. I must tell you that our Nation cannot afford a rail strike and agriculture cannot afford a rail strike at this time.

I say that because in our country throughout the Great Plains and throughout the Midwest, we have tremendous crop storage problems now. We have no room for our crops. I was recently in my district visiting 74 small communities. At the local elevators, they are full. We must export this grain. Two-thirds of our grain crop nationally must be exported. Without rail transportation, we are talking about an additional cost of 20 or 30 cents per bushel for my farmers and for farmers all across this country at a time when they cannot afford it.

The issue is not, I repeat again, any kind of loss of collective bargaining. The issue is time. We must settle this now and we must do it on an immediate basis.

Mr. HAGEDORN. Mr. Speaker, will the gentleman yield?

Mr. ROBERTS of Kansas. I will be happy to yield to my colleague, the gentleman from Minnesota.

Mr. HAGEDORN. Mr. Speaker, I want to compliment the gentleman and share in the concern that my friend, the gentleman from Kansas, has about the urgency of this situation.

We had a grain millers' strike just 3 years ago that backed up our grain supplies from the port of Duluth-Superior all the way back to farms, that has led up partially to this crisis we face today.

Today we have a crop coming in that we do not even have a place to store and to see our railroads sitting idle for potentially days or even weeks to me is a shocking disregard for the public interest of this Nation's economy.

We can no longer afford to allow a few thousand or a few hundred people hold the productive goods that are produced by America's farmers and industry hostage for their own economic gain.

I strongly support the legislation that is going to be before us for final passage. I strongly reject the Florio amendment, and I thank the gentleman for yielding me the time.

Mr. ROBERTS of Kansas. Mr. Speaker, I appreciate my colleague's comments.

I yield to my colleague and good friend, the gentleman from Virginia (Mr. WAMPLER).

Mr. WAMPLER. Mr. Speaker, I rise in support of House Joint Resolution 600, to provide a swift resolution of the current labor-management dispute in the rail industry.

While I find it unfortunate that such action is necessary, I believe the seriousness of the situation caused by the rail strike demands congressional action. If this dispute is not resolved quickly, the continuing effects on the economy and unemployment could be disastrous to our recovery efforts. The magnitude of the value of commodities normally hauled by the railroads, as well as the numbers of rail workers and workers in related and dependent industries that are being affected makes this matter one of vital national interest.

The effect of the rail strike is widespread, and the very nature of this industry makes it difficult to estimate its total effect on the Nation. A conservative estimate by Secretary Lewis noted that about $15 billion worth of freight would be halted per month by the strike. Other estimates predict that the strike could cost about $80 million per day including related costs. Employment affected by the strike is estimated at between 400,000 and 1 million persons, depending upon how quickly the strike is settled.

The remaining dispute which caused the rail strike is an interunion matter, and while it is unfortunate that Congress must intercede, the national interest demands that we bring an end to this dispute.

We must act today to forestall the disastrous effects this rail strike will have on our economy.

Mr. ROBERTS of Kansas. Mr. Speaker, I thank my colleague.

Mr. Speaker, this is not a time to talk. It is not a time to bargain. It is not a time to delay. It is a time to end the strike.

Mr. FLORIO. Mr. Speaker, I yield 1 minute to the gentleman from Texas (Mr. GONZALEZ).

Mr. GONZALEZ. Mr. Speaker, I rise in support of the amendment offered by the gentleman from New Jersey (Mr. FLORIO) and take this opportunity to thank him for upholding the most serious responsibility that bears on us as policymakers on a congressional level.

The Congress ought to remember, and sometimes it seems to lapse in forgetting this, that a working man has only one real power and that is all: That is the power to grant or withhold his labor, the right to strike. When a free nation, for whatever proper reason, defines the boundaries of that fundamental power, it has to be awfully careful, because in the absence of the Florio amendment being approved, what we will be doing in adopting the resolution already adopted by the Senate in the terms it has been couched, will be to risk placing our society on the basis of the closed societies, the authoritarian societies. We could create a situation no different from that facing Solidarity in Poland—that is, if we legislate a particular wage, we legislate away free bargaining. We must look beyond this dispute and consider what could happen if the pendulum swung the other way. We might soon find ourselves legislating prices, legislating work rules, and generally substituting the will of Government in place of the free play of economic forces. Certainly there is a crisis here, and certainly we are obliged to act in the national interest, but we should be reluctant, more than reluctant, to intrude so deeply into the historic right of free bargaining. That is what is really at stake here. We can, if we adopt the Florio amendment, serve the national interest, without trammeling the bargaining process.

Mr. BROYHILL. Mr. Speaker, I yield 2 minutes to the gentleman from Kentucky (Mr. ROGERS).

Mr. ROGERS. Mr. Speaker, I thank my colleague for yielding.

Mr. Speaker, I rise in strong support of this bipartisan resolution which would put our Nation's railroads back to work.

I want to congratulate the leadership on our committee and the subcommittee for bringing this matter to the floor as expeditiously as they have.

The Nation is confronted with a work stoppage which is having the effect of bringing our Nation to its knees. Shipment on America's vital rail arteries has been virtually halted. All across the land commerce is stopped, causing agriculture, mining, manufacturing, steel, retail trade, and all other industries to come to a virtual halt, not to even mention the hundreds of thousands of commuters who are denied the use of our Nation's railroads.

□ 1215

I would like to speak briefly about the impact on America's coal industry, because I am privileged to represent one of the largest producing areas.

Despite the efforts of the railroads to continue service during this strike, the Louisville & Nashville Railroad is now loading fewer than one-third of their normal unit trains in my district. They are loading no individual cars. That means the smaller coal companies are being put under.

In Harlan County alone, the Coal Operators' Association estimated that yesterday only three trains moved.

That is one of the biggest coal-producing counties in the entire country. About 2,000 jobs alone in the mines in that one county are at stake here.

About two-thirds of the southeast Kentucky coal industry has come to a virtual standstill. Why? Because of a relatively insignificant dispute amongst the personnel of the train crews.

The recession compounds the impact even more.

Finally, regarding the amendment for a further cooling-off period, I believe it would be fruitless and even possibly damaging. Yesterday in committee, in response to my question to each party to, and the mediator of the dispute, all parties to the dispute said that there is no hope that further time would be useful or helpful in solving this dispute.

In fact, one of the unions which had reached an agreement, testified that if a further cooling-off period were passed, his agreement very well might unravel, subjecting us to not one, but two railroad strikes, with much more complex issues.

I urge that my colleagues join me in voting down the Florio amendment and passing this urgent resolution.

The SPEAKER pro tempore. The time of the gentleman from Kentucky (Mr. ROGERS) has expired.

Mr. BROYHILL. Mr. Speaker, I yield 2 minutes to the gentleman from Pennsylvania (Mr. RITTER).

Mr. RITTER. I thank the gentleman for yielding this time to me.

Mr. Speaker, this is a debate to some extent between pragmatism and purism. There are many of us on both sides of the aisle who are supporting this legislation and who are opposing the amendment not because we are opposed to collective bargaining—we strongly support collective bargaining. The problem is that 18 months have already been expended in bargaining in trying to reach an agreement plus 60 days of bargaining during a cooling-off period, without reaching an agreement and there is real consensus that an added 140 days will not bring the situation any closer to solution, indeed the opposite is expected.

One out of 13 unions involved has not agreed and so we have the amendment of the gentleman from New Jersey (Mr. FLORIO) to extend the cooling-off period another 140 days.

Fred Hardin, president of the UTU, 156,000 members stated flatly to the Energy and Commerce Committee that his agreement would no longer hold and he could not in good conscience go to his membership and ask for ratification of that agreement, if there was a 140-day extension, at which point a far greater chaos exists after the Florio amendment is passed, than exists today.

The unraveling of the UTU agreement, involving some 136,000 workers, arrived at to date is the most serious impact of the Florio amendment.

Previously, the gentleman from New Jersey called this resolution an unprecedented action. I would like to point out that in 1963, under the terms of Public Law 88-108, a seven-member board was established and did render an award binding on both the carriers and parties to the dispute. That was congressional action. Since 1963, a good half dozen other rail settlements also involved congressional action.

While it would be well to reduce the interference of Government in many areas, this is clearly a case where, after all else has failed, the Government must act.

Mr. FLORIO. Mr. Speaker, I yield 1 minute to the gentleman from Louisiana (Mr. ROEMER).

Mr. ROEMER. I thank the gentleman for yielding me this time.

Mr. Speaker, I rise in support of the Florio amendment for the very reason that my good friend, the gentleman from Pennsylvania (Mr. RITTER) just stated in opposition to the amendment. This is a question of purist and practical approaches.

The Florio amendment allows both. The practical approach is that it puts people back to work immediately; the purist approach is that it allows the parties involved to bargain collectively in good faith without the Government of these United States stepping in and dictating the circumstances of that settlement.

After consideration of the Florio amendment, I, like the vast majority of the House, will be forced to vote for the resolution to end the strike. The economic situation in our country demands a "yes" vote on the resolution. But it will be a practical "yes" not a proud one. The Florio amendment would combine the practical—the need for rail transportation to resume, with the philosophical—the forebearance because of the Federal Government in dictating labor settlements in the marketplace.

So I rise in strong support of the gentleman's amendment and I applaud him for giving the House a chance to combine a purist philosophy with a practical approach.

Mr. BROYHILL. Mr. Speaker, I yield 1 minute to the gentleman from Arkansas (Mr. BETHUNE).

Mr. BETHUNE. I thank the gentleman for yielding this time to me.

Mr. Speaker, I rise because I am not a member of the committee and there is one particular point that I think is dispositive of this question that needs to be developed by the members of the committee who have worked closely on the issue.

All of us want to preserve the right of free collective bargaining. At the same time, we want to end the problem that we have with our national economy. I am listening carefully because I want to know whether or not the existing agreements between the other unions will be prejudiced if we follow the Florio approach. In other words, would we be getting out of the frying pan into the fire with the Florio approach?

Mr. FLORIO. Mr. Speaker, if the gentleman would yield to me, I would respond to his question.

Mr. BETHUNE. I yield to all Members who have knowledge of the issue and ask them to bring this point out because I think it is dispositive of the issue.

Mr. BROYHILL. Mr. Speaker, will the gentleman yield to me?

Mr. BETHUNE. I yield to the gentleman from North Carolina.

Mr. BROYHILL. I thank the gentleman for yielding.

Mr. Speaker, first I ask unanimous consent at this point to put into the RECORD recent congressional action affecting railway labor disputes, for the perusal of the Members.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from North Carolina?

There was no objection.

The material follows:

RECENT CONGRESSIONAL ACTION AFFECTING RAILWAY LABOR DISPUTES

(Exhibits not included.)

Since the enactment of P.L. 88-108, on August 23, 1963, Congress has passed legislation to assist in the settlement of railway labor disputes or to provide for the settlement of such disputes, on four subsequent occasions.

P.L. 88-108 (Exhibit 1) was the Congressional response to the failure of the recommendations of the Presidential Railroad Commission and Emergency Board No. 154 to resolve certain manning issues between the carriers and the operating organizations. Under the terms of P.L. 88-108 a seven member board was established and did render an award "binding on both the carrier and organization parties to the dispute."

THE SHOP CRAFT DISPUTES

P.L. 90-10 was enacted on April 12, 1967, (attached hereto as Exhibit 2) in order to avoid a strike by the shop craft unions after the recommendations of Emergency Board No. 169 failed to resolve the dispute. The sole purpose of P.L. 90-10 was to extend the status quo provisions of the final paragraph of Section 10 of the Railway Labor Act for an additional 20 days in which the parties might be able to reach settlement. When no settlement was forthcoming, Congress enacted P.L. 90-13 (attached hereto as Exhibit 3), extending the negotiating period and the status quo provisions for an additional 47 days. When negotiations still failed to resolve the issues, and it appeared that a nationwide railroad strike was imminent, Congress enacted P.L. 90-54 on July 17, 1967 (attached hereto as Exhibit 4).

P.L. 90-54 provided for a "Special Board" of five members who were to "mediate" the dispute. If agreement could not be reached within 30 days, the board was to hold hearings concerning the proposal of a Special Mediation Panel previously appointed by the President which was designed to imple-

ment the recommendations of Emergency Board No. 169, to determine whether the proposal "(1) is in the public interest, (2) is a fair and equitable settlement within the limits of the collective bargaining and mediation efforts in this case, (3) protects the collective bargaining process, and (4) fulfills the purposes of the Railway Labor Act."

If the parties had not reached agreement within 60 days after the enactment of P.L. 90-54, the Special Board was to incorporate the proposals of the Special Mediation Panel, with such modification as it found necessary, and transmit a "determination" to the Congress and the President. If the parties had not reached agreement within 90 days after enactment, the determination of the Special Board would take effect and continue in effect for two years from January 1, 1967, unless the parties reached agreement sooner. Lastly, P.L. 90-54 extended the thirty day status quo period of the final paragraph of Section 10 of the Railway Labor Act for an additional 90 days after enactment of the law. Since the parties were unable to reach agreement, the Special Board was forced to issue an award which served to resolve the dispute.

THE 1970 SHOP CRAFT DISPUTE

Public Laws 91-203 and 91-226 evolved from the shop crafts dispute which arose as a result of the failure of the Sheet Metal Workers International Association to ratify the Memorandum of Understanding of December 4, 1969, between the carriers and the shop craft unions, even though it had been ratified by the other railroad shop craft unions which had jointly participated in collective bargaining negotiations.

P.L. 91-203, enacted on March 4, 1970 (attached hereto as Exhibit 5), provided for the extension of the status quo provisions of the final paragraph of Section 10 of the Railway Labor Act, for an additional 37 days. P.L. 91-226 was enacted on April 9, 1970 (attached hereto as Exhibit 6), when the extended time limits of P.L. 91-203 did not result in a settlement and the Congress was again faced with a nationwide railroad strike. P.L. 91-226 resolved the dispute by requiring the parties to accept the Memorandum of Understanding of December 4, 1969, and treat it as "though arrived at by agreement of the parties under the Railway Labor Act."

THE 1970-71 FOUR UNION DISPUTE

P.L. 91-541 was enacted on December 10, 1970 (attached hereto as Exhibit 7), after the recommendations of Emergency Board No. 178 did not result in a settlement between the carriers and the Brotherhood of Railway, Airline and Steamship Clerks; Brotherhood of Maintenance of Way Employes; Hotel and Restaurant Employees and Bartenders International Union and the United Transportation Union. P.L. 91-541 also provided increases in the rates of pay of affected employees by 5% as of January 1, 1970 and by 32 cents per hour effective as of November 1, 1970. These pay increases were the equivalent of the pay increases provided for in the pattern wage settlements of that round of negotiations covering the period of time up to the enactment of P.L. 91-541.

P.L. 91-541 extended the status quo provisions of the final paragraph of Section 10 of the Railway Labor Act for an additional 80 days. If no settlement had been reached within 65 days, the President was to have submitted a report to Congress regarding the progress of negotiations, together with recommendations for a proposed solution of the dispute. Settlements were reached with all but one organization during this time period. The dispute with that organization, the UTU became the subject of litigation and was not resolved until August 1971. No report was submitted by the President.

THE 1971 SIGNALMEN DISPUTE

P.L. 92-17 was enacted on May 18, 1971 (attached hereto as Exhibit 8), after Emergency Board No. 179 failed to secure a settlement between the carriers and the Brotherhood of Railroad Signalmen. P.L. 92-17 extended the status quo provisions of the final paragraph of Section 10 of the RLA for approximately 4½ months. The Secretary of Labor was directed to submit a report on the progress of negotiations and to make recommendations not later than September 20, 1971. The Secretaries of Labor, Transportation, and Defense were directed to submit reports on the impact of the dispute by July 31, 1971. Additionally, P.L. 92-17 provided for retroactive wage increases in accordance with the recommendations of Emergency Board No. 179. The parties were able to resolve the dispute without further Congressional assistance.

Since the passage of P.L. 92-17, there have been no further Congressional actions to assisting in or providing for the resolution of railway labor disputes.

Mr. BROYHILL. Mr. Speaker, there is ample precedent for it.

The SPEAKER pro tempore. The time of the gentleman from Arkansas (Mr. BETHUNE) has expired.

Mr. BROYHILL. Mr. Speaker, I yield 1 additional minute to the gentleman from Arkansas.

Mr. BETHUNE. I thank the gentleman for yielding.

Mr. BROYHILL. Mr. Speaker, will the gentleman yield further to me?

Mr. BETHUNE. I yield to the gentleman from North Carolina.

Mr. BROYHILL. Mr. Speaker, the fact is, I hold in my hand the recommendations of the President's Emergency Board. The parties negotiated for some 18 months. The Emergency Board was created, made its report, and all of the various points and the various recommendations of this Board were agreed to, except one union would not agree to the very narrow point of a moratorium on strikes as they continued to negotiate on productivity gains during the life of the contract.

The other union agreed to that. If the Florio amendment is adopted, it means that all of these issues go back to the table, every issue unravels. So we are going to have this dispute right back before us within just a short while. I can guarantee it.

Mr. FLORIO. Mr. Speaker, if the gentleman would yield to me, I would respond.

Mr. BETHUNE. I yield to the gentleman from New Jersey.

Mr. FLORIO. I thank the gentleman for yielding.

Mr. Speaker, the gentleman's point is correct in all respects but one, which is a very important one: There is no agreement on the part of the two unions involved. The agreement has not even been submitted for ratification.

The SPEAKER pro tempore. The time of the gentleman from Arkansas (Mr. BETHUNE) has once again expired.

Mr. DINGELL. Mr. Speaker, I yield myself 1 minute for the purpose of responding to the question raised by the gentleman from Arkansas.

If Members like rail strikes, they will love the Florio amendment because at the end of the 140-day growing period we are going to have two rail strikes on our hands instead of one.

The reason is that the Florio amendment effectively terminates the ratification process which is about to start by the UTU, whose 250 general chairmen will shortly convene for purposes of ratifying the agreement which the leadership of the United Transportation Union has executed with the railroads and which agreement has adopted the recommendations of the Presidential Emergency Board.

That process will be stopped by the Florio amendment. Eloquent and uncontroverted testimony by the president of the UTU in the 7-hour emergency hearing before the Committee on Energy and Commerce yesterday leaves no doubt whatsoever on that point.

The Florio amendment will stop the strike by the Brotherhood of Locomotive Engineers; it will also anticipate a strike by the UTU due to termination of the ratification process and assure that all of the issues now settled by the UTU with management in its collective-bargaining agreement will be reopened.

The SPEAKER pro tempore. The time of the gentleman from Michigan (Mr. DINGELL) has expired.

Mr. DINGELL. I yield myself 30 seconds in addition.

The consequences of this will be that in exactly 140 days, we will be back to deal not with one strike, but with two, and not with one issue in dispute between the engineers and the railroads, but potentially with every one of the issues which have now been resolved both with regard to UTU and with regard to the Brotherhood of Locomotive Engineers.

Mr. BETHUNE. Mr. Speaker, will the gentleman yield to me?

Mr. DINGELL. I yield to the gentleman.

Mr. BETHUNE. Mr. Speaker, I thank the distinguished leaders on the committee for responding. I hope this will continue to be developed as the debate goes on. I do think it is the dispositive issue.

Mr. FLORIO. Mr. Speaker, I yield myself the balance of my time in order to conclude on this portion of the debate.

The SPEAKER pro tempore. The gentleman from New Jersey (Mr. FLORIO) is recognized for 2 minutes.

Mr. FLORIO. Mr. Speaker, I would like to express my admiration for the very artful and creative interpretation of my amendment that has been offered by the distinguished chairman of the full committee. Unfortunately, it bears no relationship to the merits of the amendment.

The idea of two strikes being promoted is really obfuscating the basic issue. What we are talking about is a proposal that came from the administration's commission that both brotherhoods are in agreement on all points but one minor point with regard to wage differential.

Neither brotherhood has submitted the agreement or the parts of the agreement to their members.

What we are saying now is that we would not impose this agreement on the brotherhoods and management. What we are saying is that they should go back and try to resolve this one remaining portion of the total contract agreement.

For 140 days, there would be no strike by any of the parties. If, in fact, there were no agreement at the end of 140 days, we would be in no worse position than we are right now, there would be no strike, the Congress, if it wants to come forward with this rather radical approach of imposing collective-bargaining agreements on private parties, could do that.

I am convinced we will not be in that position because I am convinced that this minor point in this agreement can be resolved with no detriment to the other brotherhood, and I think we can go forward in that way.

I think that is much better policy, not only for this particular dispute but for the longtime economic health of this Nation. To go off into a direction where Government dictates the terms of private contracts is to go down a road where we do not know where we are going to end, and I suspect we will end at some place where none of us want to be.

So I would ask for the support of this body for the amendment that I will offer immediately after the conclusion of debate. I thank the body for its support.

The SPEAKER pro tempore. All time of the gentleman from New Jersey (Mr. FLORIO) has expired.

Mr. BROYHILL. Mr. Speaker, I yield such time as he may consume to the gentleman from Illinois (Mr. O'BRIEN).

Mr. O'BRIEN. I thank the gentleman for yielding.

Mr. Speaker, I rise in support of the resolution, against the amendment. I also believe the gentleman from Michigan does not obfuscate; he clarifies. I ask unanimous consent to revise and extend my remarks.

Mr. BROYHILL. Mr. Speaker, I yield 2 minutes to the gentleman from Texas (Mr. GRAMM).

Mr. GRAMM. Mr. Speaker, I would like to review what is at issue here and what the choices are.

We have a dispute under way here between two unions and a company. The dispute really boils down to one point, and that is wage differential.

The locomotive engineers are demanding a wage differential, not in average wages but in absolute terms. As I understand it from attending the hearings and from having read the statements, there is not a real dispute about the offer of $45,000 a year under the new contract for locomotive engineers. The dispute centers around the fact that as a result of "lonesome pay," a carryover from our effort to try to eliminate featherbedding, and because of differences in seniority, there may be other members of the crew that have long seniority and because we are eliminating a position on the train and paying "lonesome pay" as a price to get that featherbedding ended, there may be some relatively junior engineers who will make less than other members of the crew who may be quite senior.

This is not an uncommon practice. A senior noncommissioned officer will make more money than most captains, all first lieutenants, all second lieutenants, because of seniority; something the unions have fostered over the years.

The question we face is: Are we going to allow a dispute between unions about differentials in wages to cost the economy a million jobs in 2 weeks, to cost the economy $15 billion a month, to cost the Federal Treasury $3 billion a month in lost revenues, to take an economy that is stumbling into a recovery and force that economy back into a deep recession?

I say no. I say that is something that we cannot allow.

Do we prevent collective bargaining from continuing by passing the Broyhill-Dingell resolution? The answer is no. We simply ask that the parties go back to work and that this very small and narrow wage differential dispute be negotiated during the period that they are working.

I think that is a reasonable approach. I support the Dingell resolution and oppose the amendment.

□ 1230

Mr. DINGELL. Mr. Speaker, I yield 2 minutes to my good friend and colleague, the gentleman from Texas (Mr. DE LA GARZA), the chairman of the Agriculture Committee.

Mr. DE LA GARZA. Mr. Speaker, I thank my colleague, the chairman of the Committee on Energy and Commerce. My responsibility as chairman of the Committee on Agriculture is to advise the Members of the terrible impact that the stoppage of the railways would have on agriculture and on the consumers—the housewives, the homemakers, those who consume the produce and vegetables, the products of the farm.

It comes at a very difficult and devastating time for agriculture, to say the least, when income is at its lowest since the Great Depression. A large percentage of the fruit and vegetables that come out of Florida, to the West and Midwest, and from California east, and on a smaller percentage from Texas come by rail. The greater amount, most of the grains, come by rail and barge or rail and/or barge, and a stoppage would be very, very devastating and would cause untold suffering to all of those who work in all of those endeavors, beginning with the initial producer and eventually in having an increased cost to all consumers.

I feel that I should in a responsible way state that I would allow the technical aspects to the members of the committee and to the House to decide on the philosophical or technical aspects of the amendment and the resolution, but I had hoped that this problem would reach this stage that there would have been some accord reached. I think now, that our responsibility is to the security of the Nation. However the Members do it technically, I would leave that to the House and members of the committee who are most knowledgeable in this respect.

My intent here is to tell the Members and, in effect, to warn the Members of the possible tremendous dollar impact it can have on the American producers and the consumers.

Mr. DINGELL. Mr. Speaker, I yield 3 minutes to the distinguished gentleman from Washington (Mr. FOLEY).

Mr. FOLEY. Mr. Speaker, I rise in support of the committee bill and in opposition to the amendment. In opposing this amendment, I do so with some serious personal reservations because the gentleman from New Jersey (Mr. FLORIO), is one of the most knowledgeable and able Members ever to sit on the Committee on Energy and Commerce. Because his reputation for ability and fairness is so well regarded on both sides of the House, I find myself in a strange position opposing any amendment he proposes.

However, I believe this is a situation where we are faced with a most pressing national emergency and that the amendment, merely puts off and would perhaps exacerbate a crisis which will only occur again if it is not addressed today.

We are dealing here today with a very small part of an otherwise collectively negotiated agreement. The overwhelming number of issues have been resolved between the union and the railroads. Only one issue remains in dispute and unfortunately there are no indications that agreement can be reached if more time is allowed.

Should the amendment prevail, the trains would be back on schedule for 4 months and then we would face another crisis, and perhaps one that would then involve the very large United Transportation Union as well as the Brotherhood of Railway Engineers.

The committee is to be commended for its judgment of how to avoid what otherwise will be a disastrous economic consequence. Should this strike continue, we can anticipate the possibility of our economy losing $80 million a day which could amount to over $2 billion in 30 days. It could mean that 1.5 million uninvolved workers would be unemployed.

The railway transportation system is so basic to the national needs of the country that it is an unusual circumstance where the Congress must intervene, but I think it must. I think the decision that has been made by the committee is wise. I think it meets with the ends of justice and stays with the tradition of collective bargaining. I think in this case the amendment is not wise and should be rejected; the bill should be adopted, by an overwhelming vote on both sides of the aisle that I believe will carry not only the conviction of this Congress, but will commend itself to all the parties and the country as a whole.

Mr. BROYHILL. Mr. Speaker, I yield such time as he may consume to the gentleman from Virginia (Mr. BLILEY).

Mr. BLILEY. Mr. Speaker, I rise in support of House Joint Resolution 600. This resolution would end the unnecessary railway labor strike and remove the threat of shutdowns and layoffs for millions of American workers.

In my own area of Richmond, Va., and in many other places across the country, factory managers are already making plans for shutdowns if they continue to be unable to ship their products. Such economic idiocy would be inexcusable under any circumstances, but in the present conditions it is even more appalling than usual.

This strike is not a question of underpaid workers fighting management for fair wages and better working conditions. It amounts to an internecine squabble between two rail labor unions with the management, railroad customers and our national economy and defense held hostage. Working conditions and wage rates are not in dispute. The only outstanding issue is a demand by the railway engineers that they remain the highest paid members of a train crew, no matter what.

Even more importantly, the effect of a train strike, given the present state of the Nation's economy, would be particularly devastating. Unemployment is over 9 percent. Unnecessarily throwing millions of more Americans out of work would certainly lead to even greater economic problems, ending jobs and denying products to customers.

Mr. Speaker, no group should be allowed this kind of power over the economy. We must not allow this petty spat to ruin the lives and jobs of millions of Americans. I urge my colleagues to support this resolution.

Mr. BROYHILL. Mr. Speaker, I yield the balance of my time to the distinguished minority leader, the gentleman from Illinois (Mr. MICHEL).

Mr. MICHEL. Mr. Speaker, first I want to congratulate the gentleman from Texas (Mr. GRAMM) for putting the argument so succinctly just a few moments ago as to why we ought to support the legislation reported from the committee; and also the gentleman who just preceded me, the gentleman from Washington (Mr. FOLEY), for setting forth the good reasons why we ought to reject the Florio amendment and stay with what the committee originally did.

Seldom in the deliberations of this body are the lines of controversy so clearly drawn. On the one side we are faced with a serious threat to the national economy and the national defense. On the other side is the unresolved issue of those pay differentials for the operating engineers. The legitimacy of the engineers' case is not at issue. The health of our national economy is the issue, and this legislation provides ample opportunity for the engineers to resolve their disagreements through negotiation.

The legislation simply requires that vital rail service is provided while those negotiations are in progress. We in this Congress, it seems to me, have an obligation to act in the best interests of the country as a whole and not put it off for some later date when it may or may not be more convenient. We have an obligation to insure the flow of the $15 billion worth of essential commodities each month, particularly now during this harvest season so important for the agricultural community. We have an obligation to maintain employment for the more than 1 million workers who ultimately will be laid off should the strike persist.

We also have an obligation as well to those untold thousands of people who depend on the rails for transportation or depend upon the rails for the delivery of vital goods and services.

This legislation, in my own mind, in no way jeopardizes or threatens the collective bargaining process, nor does it establish precedent on which other labor negotiations or strikes can be subjected to unwarranted interference by this Congress. The situation, no question about it, is unique. All these other major unions have reached agreement, and we do not find one union pitting itself against another in a situation like this when we really get down to the bottom line.

It has reached the point where we do have to intervene in this very unique situation and make that ultimate decision. All the other major issues between labor and management have been resolved. We have already exhausted all the means of resolving the dispute. What we have left before us is a really legitimate and dangerous threat to the Nation at a time, frankly, when every job counts, at a time when we must squeeze from our economy every single bit of productive energy we have. This is the time, and these are circumstances which demand decisive, responsible action from this Congress for the sake of the public good. It is a time to act, and so let us do it right here and now without any further delay.

Mr. DINGELL. Mr. Speaker, I yield 6 minutes to my distinguished friend, the majority leader, the gentleman from Texas (Mr. WRIGHT).

Mr. WRIGHT. Mr. Speaker, I rise in support of the bill. I think it is the clear responsibility of the Congress to act and to act decisively today.

This strike is costing the American economy about $80 million every day it continues. This means, if it were to continue a week, it would inflict a blow equivalent of about $560 million, more than half a billion dollars, on our ailing economy. If it went on for a month, the cost to all of us as Americans would be $2.5 billion.

One of the automobile plants already has been closed by reason of the strike, and I am advised that if it were to continue through Thursday of this week, the rest of them would be closed and idled because materials and equipment are unable to move into the plants and finished automobiles are unable to be moved out of the plants.

If this strike were to continue for 3 weeks, an additional 1,400,000 Americans would be thrown out of work. Most of these people are not parties to the strike, but they would join that enormous number, probably 12 million, already out of work, and become innocent victims of the Government's unwillingness or inability to act.

American agriculture, already reeling from the effects and the frustrations of the recession, would be dealt a devastating blow by continuation of this strike. Think. At this moment it is harvesttime in much of the country. In the next few weeks the harvest will be ripe in most of the country. A continuation of this strike would mean that at this particular moment the movement of perishable goods would be retarded and they doomed to rot by railroad sidings. Grain, at the time it is coming ripe, when hard-hit grain farmers of the Midwest have their only opportunity of the entire year to recoup a year of losses, would be unable to be moved from the farms to the grain elevators. That which had

reached the grain elevators could not be moved from the grain elevators to the markets of the country and abroad.

Coal would be stopped from movement, and still more coal miners would be thrown out of work. Exports of all kinds would fall precipitately, and our balance-of-payments position would suffer further. When that happens, all Americans suffer.

The movement of 30 to 40 percent of our vital defense commodities goes by rail. The continuation of the strike would stop the movement of that 30 to 40 percent of our defense commodities.

It is true that a free government composed of free institutions honors free choice and exhibits restraint. This Government certainly cannot be accused of doing otherwise in this instance. Government-sponsored mediation has been in process for 18 months, and I want to congratulate those, both of labor and of management, for their earnest attempts to solve this problem during those 18 months of peaceful negotiation.

The solution for the most part has been agreed to. The big issues have been resolved. All issues have been agreed to so far as most of the workers are concerned, and most of the management.

And so, while government in a free nation must exhibit restaint, it must not exhibit paralysis. For us to fail today to stop this strike and get America's rails moving again in the national interest would be for us as a nation to exhibit paralysis. It would be for the Congress to be guility of a dereliction to the American economy and the innocent Americans who would suffer further in this already severely damaged economy if we were to allow this strike to continue.

Therefore, in the interests of the country I think we have the opportunity and the responsibility today to demonstrate the will and the capacity to act decisively and immediately, and to put these Americans back to work before the damage that is inflicted becomes irreparable.

● Mr. MOFFETT. Mr. Speaker, I will support passage of this legislation which directs the Brotherhood of Locomotive Engineers to return to work, and which requires the union to do so under the terms dictated by the President's Emergency Board. I support the legislation, but do so reluctantly.

Clearly, this strike must not continue. The data show that the strike is costing us about $80 million a day. And, information submitted to the House Energy and Commerce Committee—my committee which produced this resolution—indicates that if the strike continued, we would see 1 million workers layed off. Thus, the issue before us is not whether we want to see the strike end. The real question involves whether this is the best way to proceed: Should Congress intervene by legislation in the collective bargaining process convened by management and labor?

Since 1960, Congress has acted in only six labor disputes where it was deemed that the national interest was at stake. But it is unprecedented for Congress to dictate to a union the terms under which it would return to work. The prior legislative efforts either mandated a cooling-off period within which the parties in dispute would negotiate; or, it required the parties to submit to binding arbitration. In these instances, the legislation provided that the decisions of the mediating boards were final.

This dispute is particularly knotty. Twelve of thirteen railroad crafts have agreed to a contract. One union, the Brotherhood of Locomotive Engineers, has not. Secretary Lewis told our committee, in hearings convened yesterday, that a further cooling off period might put the other crafts in the position of vetoing the agreements which their union representatives accepted. Because it would shake the economy to act in such a manner as to terminate all 13 agreements, our committee was advised to accept the administration's proposal and pass this legislation.

It is difficult to forecast whether this assessment is correct. It would be consistent with our experience during the prior work stoppages, addressed in the years since 1960, to mandate a cooling-off period. This would have the effect of returning the engineers to work and continuing the negotiations. Congress could pass such a resolution and we could revisit this issue next year if the negotiations are unsuccessful. However, the Senate has acted to order the engineers back to work under the terms dictated by the Emergency Board; our committee voted today in favor of an indentical resolution; and, it appears likely that we will approve the legislation without adding the cooling-off period. As I said earlier, given the dire state of our economy, this is a decision which I support.

Nevertheless, I find this process somewhat troubling. In the case of PATCO, and in the case here today, our Government has made the policy decision to deprive labor of its right of self-help. We have decided that the needs of the economy outweigh completely the rights which we, as a free society, have accorded to labor. Clearly, we have to draw the line somewhere. But it is not in the ultimate best interests of this country to make industrial policy, through Government intervention, only in crisis circumstances. Can we say with complete accuracy that a rail strike requires more Government attention than a string of corporate takeovers which tie-up billions of dollars in credit? Can we make the claim that Government intervention in a labor dispute is more appropriate than emergency planning to guard the economy against an oil shock? This is a decision which the Reagan administration has made. Can we justify doing nothing about the penetration of imported automobiles—as the administration asserts we must when a legislative solution is available—and act decisively in this instance to block a rail strike? How do we decide in each of these instances where to draw the line?

We have a free enterprise system which we all support. And all of us here today take this action with some reservations. We face a crisis; and, clearly Congress should act. But when our economy is suffering as it is, our industrial policy needs to be somewhat broader than merely passing bills which return labor unions to work.

There are alternatives.

For months, I have advocated an economic summit to be called at Camp David by the President. In such a setting, labor, management, expert economists, small businessmen, and business women, and Members of Congress could meet and agree on positive policies, arrived at on a nonpartisan basis. The Economic Policy Task Force of the Democratic Caucus has made a similar recommendation in terms of the establishment of a coordinating council. Recently, I was joined by our colleagues JOHN DINGELL and PETER RODINO in introducing legislation to establish a Select Committee on Reindustrialization. This would be an appropriate forum for the House to arrive at consensus policies for an economic alternative to the President's program. There is no shortage of alternatives, no shortage of energy, and certainly tremendous need for us to work cooperatively on solutions to our economic distress.

Regardless of whose proposal we adopt, I think it is clear—in light of the debate taking place here today—that we need more assertive leadership in the formulation of economic policy. Further, we need to avoid legislating in the midst of a crisis, particularly when the crisis calls for us to intervene in the collective bargaining process. We can, we must, do better.●

● Mrs. COLLINS of Illinois. Mr. Speaker, today I am supporting House Joint Resolution 600, the Emergency Railroad Strike Act, with guarded reservation. I am not now, nor have I ever been in favor of interfering with or infringing upon the basic legitimate right of unions to engage in collective bargaining activities. However, in today's depressed economy, a broader issue comes to the fore: That of how this strike will affect millions of persons across the Nation. Already as an immediate result of this strike, coal mines, and autoplants have begun to

shut down. Inasmuch as trains carry almost all grain and produce, as well as coal, steel, and other basic heavy industrial materials, a prolonged strike will have disastrous effects upon the Nation's economy and exacerbate the critical unemployment situation this country now faces.

In the Chicago area alone, 6 of the 7 rail commuter lines were shut down Monday and about 120,000 commuters were left looking for alternative means of transportation. According to Tuesday's Chicago Sun Times and Chicago Tribune, the situation was not much better the next day. If the strike were allowed to continue, the Department of Transportation estimates that unemployment for the State of Illinois will reach 20,000 in the first 2 weeks and will total a staggering 45,000 at the end of 4 weeks. The steel industry in Illinois is expected to layoff 1,600 within the first 2 weeks and an additional 3,600 during the first month.

In light of the precarious position facing the auto, steel, and construction industries, the least desirable event would be the continuation of a massive railroad strike which threatens to halt the flow of $15 billion worth of commodities and other goods shipped by rail each month and would take our faltering economy further downhill. In the interest of putting America back to work, and keeping Americans working, I am supporting the Emergency Board's recommendation to end the strike. However, it should be made clear that this extreme measure, sought solely because of the compelling circumstances and unique nature of the dispute, should not set a precedent for future intervention into the collective bargaining process by this or any other administration.●

● Mr. WIRTH. Mr. Speaker, in consideration of the Florio amendment, the House is considering legislation that puts most Members between the proverbial "rock and a hard place." I am personally sympathetic to the rights of workers to strike, and so I support the right of the engineers in taking the only recourse they feel is available to them. They did not take this action casually. It is a painful decision, but it is their right.

The strike, however, has serious implications for our already battered economy. The Reagan economic program has given us record deficits and brutal unemployment rates. A rail strike aggravates these problems—witnesses testified yesterday that the strike could cost our economy anywhere from $80 to $1 billion per day. As industrial plants close around the Nation unemployment would spread widely. A long strike could devastate our Nation.

Compounding the problem is the consensus of the parties involved that an additional cooling off period would accomplish little. Witnesses before the Energy and Commerce Committee seemed to agree that another 60 or 100 days of negotiation would not resolve the pay differential issue.

My reluctant decision is to support Senate Joint Resolution 250. In taking this course I fear the effect this might have in setting a precedent in future labor controversies. I fear the effect this action might have on management—if Congress is willing to intervene on their behalf in this instance, perhaps management will be more willing to play negotiations to the last dollar in other instances. Yet, the economic stakes are too high here, and despite my serious reservations I see no alternative but to support Senate Joint Resolution 250 and oppose the Florio amendment.●

Mr. DINGELL. Mr. Speaker, pursuant to the previous order of the House, I yield to the gentleman from New Jersey (Mr. FLORIO), whom I designate to offer the amendment which was set forth in the previous order of the House.

AMENDMENT IN THE NATURE OF A SUBSTITUTE OFFERED BY MR. FLORIO

Mr. FLORIO. Mr. Speaker, I offer an amendment in the nature of a substitute to end the strike and preserve the integrity of the collective bargaining system.

The Clerk read as follows:

Amendment in the nature of a substitute offered by Mr. FLORIO: Strike out all after the resolving clause and insert in lieu thereof the following:

That, to provide additional time for the parties to resolve a labor dispute that threatens substantially to interrupt interstate commerce to a degree such as to deprive any section of the country of essential transportation service—

(1) the parties to the dispute between the carriers represented by the National Carriers' Conference Committee of the National Railway Labor Conference and certain of their employees represented by the Brotherhood of Locomotive Engineers shall take all necessary steps to restore service, and the status quo of the parties shall return to that which was in effect prior to 12:01 antemeridian of September 19, 1982, and the parties shall continue such status quo until at least 140 days after the effective date of this joint resolution; and

(2) any rail labor union which is operating under collective bargaining agreement with the carriers represented by the National Carriers' Conference Committee of the National Railway Labor Conference, and with respect to which the 30-day period described in the last sentence of section 10 of the Railway Labor Act has expired after September 1, 1982, shall take all necessary steps to maintain service as in operation prior to 12:01 antemeridian of September 19, 1982, and the parties to such agreement shall maintain, until at least 140 days after the effective date of this Joint Resolution, the status quo as in effect prior to 12:01 antemeridian of September 19, 1982.

SEC. 2. This resolution shall take effect immediately upon enactment.

1245

Mr. FLORIO (during the reading). Mr. Speaker, I ask unanimous consent that the amendment in the nature of a substitute be considered as read and printed in the RECORD.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from New Jersey?

There was no objection.

The SPEAKER pro tempore. Pursuant to the order of the House of September 21, 1982, the previous question is considered as having been ordered.

The question is on the amendment in the nature of a substitute offered by the gentleman from New Jersey (Mr. FLORIO).

The question was taken; and the Speaker pro tempore announced that the noes appeared to have it.

Mr. FLORIO. Mr. Speaker, I object to the vote on the ground that a quorum is not present and make the point of order that a quorum is not present.

The SPEAKER pro tempore. Evidently a quorum is not present.

The Sergeant at Arms will notify absent Members.

The vote was taken by electronic device, and there were—yeas 37, nays 361, not voting 34, as follows:

Mrs. FENWICK, Mr. TAUKE, and Mr. DREIER changed their votes from "yea" to "nay."

So the amendment in the nature of a substitute was rejected.

The result of the vote was announced as above recorded.

The SPEAKER pro tempore. The question is on the third reading of the Senate joint resolution.

The Senate joint resolution was ordered to be read a third time, and was read the third time.

The SPEAKER pro tempore. The question is on the passage of the Senate joint resolution.

The question was taken; and the Speaker pro tempore announced that the ayes appeared to have it.

RECORDED VOTE

Mrs. MARTIN of Illinois. Mr. Speaker, I demand a recorded vote.

A recorded vote was ordered.

The vote was taken by electronic device, and there were—ayes 383, noes 17, not voting 32, as follows:

[Roll No. 356]

Mr. DANIEL B. CRANE and Mrs. ASHBROOK changed their votes from "aye" to "no."

So the Senate joint resolution was passed.

The result of the vote was announced as above recorded.

A motion to reconsider was laid on the table.

GENERAL LEAVE

Mr. DINGELL. Mr. Speaker, I ask unanimous consent that all Members may have 5 legislative days within which to revise and extend their remarks on the Senate joint resolution just passed.

The SPEAKER pro tempore (Mr. MURTHA). Is there objection to the request of the gentleman from Michigan?

There was no objection.

PERSONAL EXPLANATION

Mr. HANSEN of Idaho. Mr. Speaker, I was inadvertently detained on constituent business during rollcall No. 356 on Senate Joint Resolution 250. Had I been present, I would have voted "aye."

PERMISSION FOR COMMITTEE ON THE JUDICIARY TO SIT TOMORROW DURING 5-MINUTE RULE

Mr. MAZZOLI. Mr. Speaker, I ask unanimous consent that the Committee on the Judiciary may be permitted to sit tomorrow during the 5-minute rule to mark up the bill, H.R. 6514.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Kentucky?

There was no objection.

CONTINUING APPROPRIATIONS, 1983

Mr. FROST. Mr. Speaker, by direction of the Committee on Rules, I call up House Resolution 596 and ask for its immediate consideration.

The Clerk read the resolution, as follows:

H. RES. 596

Resolved, That upon the adoption of this resolution it shall be in order to consider the joint resolution (H.J. Res. 599) making continuing appropriations for the fiscal year 1983, and for other purposes, in the House, and the previous question shall be considered as ordered on said joint resolution to final passage without intervening motion except (1) one amendment only to change the date on page 7, line 20, and on page 8, line 13, to another date certain, and said amendment shall not be subject to amendment or to a demand for a division of the question and (2) one motion to recommit.

The SPEAKER pro tempore. The gentleman from Texas (Mr. FROST) is recognized for 1 hour.

Mr. FROST. Mr. Speaker, I yield 30 minutes, for purposes of debate only, to the gentleman from Tennessee (Mr. QUILLEN), pending which I yield myself such time as I may consume.

Mr. Speaker, House Resolution 596 provides for the consideration of House Joint Resolution 599, making continuing appropriations for fiscal year 1983. As my colleagues are aware, none of the regular 13 appropriations bills have been sent to the President for his signature and the new fiscal year begins next Friday. As a consequence, the Congress again finds itself in the position of having to adopt a continuing appropriation in order to keep the Government functioning after the beginning of the new fiscal year.

Because it is imperative that some funding mechanism be in place by next Friday in order to prevent the chaos we experienced last year, the Committee on Rules has granted a rule that expedites the consideration of the continuing appropriation. Mr. Speaker, House Resolution 596 is a relatively straightforward rule. It provides for the consideration of the joint resolution in the House. The previous question is considered as ordered on the joint resolution to final passage without intervening motion except for the offering of one amendment to change the termination date of the continuing resolution and a motion to recommit. The Committee on Appropriations reported House Joint Resolution 599 with an expiration date of February 28, 1983; it is anticipated that the minority may offer an amendment to the continuing resolution that will continue it only until the 97th Congress adjourns sine die.

The procedure for consideration of the continuing appropriation, under the rule, will be as follows: The joint resolution will be considered in the House under the 1-hour rule. During that hour an amendment to change the termination date could be offered. At the conclusion of debate a motion to recommit could also be offered. At that time a vote on passage of the resolution would occur. There could, of course, be votes on both the amendment to change the termination date and the motion to recommit.

Mr. Speaker, House Joint Resolution 599 as reported, provides continuing funding authority through February 28, 1983, for the agencies and departments which will not have had their regular appropriations bills enacted into law by October 1. The resolution sets the funding levels for the programs funded under the appropriations act for Agriculture; Commerce-Justice-State; District of Columbia; energy and water development; HUD-independent agencies; Transportation; and Treasury as follows:

For House-passed appropriations bills, the level would be set at that in the House bill or the fiscal year 1982 level, whichever is lower;

For bills that have passed both Houses, the level would be set at the lower of the two bills;

For bills that have passed both Houses but only one House has funded a particular program, the level for that program would be that contained in the bill, or the fiscal year 1982 level, whichever is lower.

The resolution provides continuing authority for the programs funded by the Labor, Health and Human Services, and Education and Interior appropriations bills at the fiscal year 1982 level.

The resolution provides continuing appropriations for defense programs at the fiscal year 1982 level until the House Appropriations Committee reports the defense bill, at which time the level would be adusted to reflect the House-reported bill and subsequent House action.

For foreign aid, the funding would be the fiscal year 1982 level in the Foreign Assistance Appropriations Act (Public Law 97-121) or at the level requested by the administration, whichever is lower, except for assistance to Israel which would be the level set in Public Law 97-113.

In the area of military construction, the resolution provides funding at the level in H.R. 6968, as passed by the House. Finally, the resolution funds the legislative branch at the level contained in the bill, H.R. 7073, as reported from the House Appropriations Committee.

Mr. Speaker, a number of Members would have liked to have had the opportunity to amend the continuing resolution. However, the Committee on Appropriations requested this rule and it was the consensus of opinion in the Committee on Rules yesterday that allowing other amendments would not serve the purposes of the House at this time. In the interest of continuity of the Federal Government, the Committee on Rules has granted the request of the Appropriations Committee. I would urge my colleagues to adopt this rule so that the House can expeditously consider the continuing appropriation.

Mr. QUILLEN. Mr. Speaker, I yield myself such time as I may use.

Mr. Speaker, we all know that the Congress is going to recess in a few days until after Thanksgiving, or at least that is the word I have. And we all know that the various agencies and departments of Government must continue operating until we come back and finish the appropriation bills. Therefore, the continuing resolution is absolutely necessary, and I support it.

I support the rule and I ask for a favorable vote.

A number of opponents to certain provisions in the continuing resolution came before the Rules Committee and wanted a separate vote on this or that. I urge the Members to vote for the previous question, should a fight be made to defeat it. If the legislation should be opened up to amendment, we would be here until Christmas.

Mr. Speaker, I yield 4 minutes to the gentleman from Massachusetts (Mr. CONTE), the distinguished ranking minority member of the Committee on Appropriations.

Mr. CONTE. Mr. Speaker, I do not support closed rules except in the most extraordinary circumstances. But continuing resolutions are, by definition, extraordinary.

The resolution that we will consider here today is an appropriation bill for virtually the entire Government. I cannot believe that this House will open the resolution up to amendment, tie itself up in knots for weeks with amendments on every controversial issue under the Sun while funding for nearly all of the Government stops dead. And that is what will happen, Mr. Speaker, make no mistake about it. The Government is going to stop dead.

Many Members have talked to me. All have amendments that are truly important to them. Many have amendments I would vote for. My good friend, BOB EDGAR, has one on the Tennessee Tombigbee. I join with him every time on that amendment. My friend, LARRY COUGHLIN, and others, have one on the Clinch River, and I support that one. The gentleman from Michigan has a housing amendment; the gentleman from California (Mr. MCCLOSKEY) has an amendment to the foreign aid section. I have had dozens of Members come up to say they have an amendment to the continuing resolution. It reminds me a little of the fellow in Italy, who lived in Sicily. He saved all of his money all of his life to go to Rome. He saved all of his money, bought a donkey, and started traveling through all the little towns on his way toward Rome. In every town he would pass through someone would stop him and ask, "Where are you going?" He would say, "I am going to Rome." They would say, "Will you take this little package to Rome, to my aunt and uncle, and give it to them when you get there?" He was a good-hearted guy, and he said, "Yes." And he put that gift on the donkey. That happened in every town. By the time he got to the outskirts of Rome, his donkey was so weighted down that it dropped dead. And the poor guy had to turn around and go home.

That is what is going to happen to this continuing resolution. If we permit all these possible amendments to be added here, it is going to sink by its own weight, and we will not have a measure completed in time to keep the Government running.

We could have had this rule yesterday, when the chairman, my good friend from Mississippi, asked for unanimous consent, but the gentleman from Pennsylvania (Mr. WALKER) saw fit to object to it. That is why we have this trouble today. And that is why we will be in big trouble if the previous question is knocked down. As worthwhile as these amendments may be, and I favor many of them, they are going to kill this continuing resolution, and we will find ourselves here at midnight on September 30 with another crisis on our hands.

These amendments have a place and a time, but not on this resolution.

The committee will do its best to bring the general appropriation bills to the floor, either before the election, or during the special session.

Amendments can and should be offered to those bills, not to this continuing resolution.

Some Members think the rate for defense is too high. Some Members—including this Member—think the funding for health and education is too low.

But if we open this resolution for amendment, as sure as I am standing here, there will be no funds for these programs on October 1.

There will be no funding for education programs, or health programs, or the Department of Defense, or for food stamps, or for the child nutrition programs. There will be no veterans benefits, and no social security, because the administrative costs and funds for mailing checks are provided by this continuing resolution.

Think about it.

It is an election year, and I know that many Members truly believe that an amendment to this resolution would help them politically.

But if this rule is defeated, and the resolution is open for amendment, on October 1 the people will not remember that little amendment when the Government closes, and the social security checks stop.

I know it is difficult for Members to look beyond the resolution before us, but I truly believe that in this case the right thing for the country is also the right thing politically. Support the rule.

□ 1330

I hope, I truly hope, the Members will see the wisdom of leaving this continuing resolution the way it is, not offering any amendments, and voting for the previous question.

There will be one amendment which I will offer as a motion to recommit. That will be to change the expiration date of the continuing resolution. The chairman has put the expiration date at February 28. I will move to change it to sine die, 97th Congress. That will give all the Members who have amendments an opportunity to do two things: First, to propose their amendments to the regular appropriations bills that will be becoming to the floor; and if those regular bills are not brought up, then there will be a second opportunity to propose those amendments on a further continuing resolution.

With respect to the Members who had wanted to offer amendments pertaining to the energy and water section of this resolution, I stand before them and I promise that if we have another continuing resolution and we do not have that energy and water bill out here before that, I will not support another continuing resolution unless the Members have the opportunity to offer amendments on Clinch River and Tennessee-Tombigbee.

I think this is a fair bargain.

Mr. FROST. Mr. Speaker, I yield 3 minutes to the gentleman from Pennsylvania (Mr. EDGAR) for purposes of debate only.

Mr. EDGAR. Mr. Speaker, I rise with a great deal of uncertainty about this rule and about the continuing resolution.

As I testified yesterday before the Committee on Rules, we are coming up to the pressure point in Congress where all of the appropriations bills are backed up; and there is some indication that some of those appropriations bills may never become law.

Those of use who are strong advocates of having an opportunity or a right to vote on individual amendments in some of those appropriations bills are attempting in some meager way to protect our rights.

Yesterday we tried to convince the Rules Committee that it was important to have certain amendments offered, particularly those that came within a few votes last year of either eliminating a project or reducing the funding for that project.

I wonder if the chairman of the Energy and Water Development Subcommittee of the Committee on Appropriations might answer a question relating to the uncertainty that we have about this rule and about the whole continuing appropriations process.

Mr. BEVILL. Mr. Speaker, will the gentleman yield?

Mr. EDGAR. I yield to the gentleman from Alabama.

Mr. BEVILL. Mr. Speaker, I would be glad to point out that the energy and water development appropriations bill for 1983 has been reported from the full committee; and we would try to be ready when the leadership finds the time to bring it to the floor.

Mr. EDGAR. If the gentleman would comment further, does the gentleman have any indication that the leadership plans not to bring the

energy and water bill up prior to the 8th of October when the House is supposed to adjourn?

Mr. BEVILL. I have no information on that. As I say, this is a matter the leadership will control. I can say this: Our bill, every year, has been one of the first appropriations bills to reach the President's desk. That is without exception. It is one of the first.

Mr. EDGAR. The gentleman sees no reason why prior to the election of this year or prior to our lame duck session we could not complete action on the gentleman's bill?

Mr. BEVILL. Whenever the leadership finds time on the calendar, we will do our best to be ready to go.

Mr. EDGAR. I would ask the gentleman for one additional assurance so we could end some of the confusion on whether to support the rule and support the continuing resolution.

It is not the gentleman intention to ask the Rules Committee for a rule prohibiting an up or down vote on either the Tennessee Tombigbee Waterway or the Clinch River breeder reactor?

Mr. BEVILL. We have never asked that. As the gentleman knows, the gentleman has been attacking those projects for years. I do not think a few weeks are going to make much difference. The gentleman will have an opportunity; and we have never asked for a closed rule that would prohibit amendments on the energy and water development appropriation bill. Certainly we have no plans to do so.

Mr. EDGAR. I thank the gentleman for responding to my questions.

Mr. Speaker, I yield back the balance of my time.

Mr. QUILLEN. Mr. Speaker, I yield 5 minutes to the gentleman from Pennsylvania (Mr. COUGHLIN).

Mr. COUGHLIN. Mr. Speaker, as the members of the Rules Commitee know, some 102 Members of this body wrote to the chairman of the Rules Committee asking for a chance on the continuing resolution to have a vote on the Clinch River breeder reactor. That is not permitted by the rule that was put out by the Rules Committee, and I am not going to fight this rule based on the assurances that I have received from the distinguished chairman of the Energy and Water Subcommittee of the Appropriations Committee, the gentleman from Alabama (Mr. BEVILL), in his colloquy to the gentleman from Pennsylvania (Mr. EDGAR) and also to me that the bill is ready for consideration by this House.

I assume that is the case in connection with Clinch River. The bill is ready to be brought to the floor and the gentleman is prepared to ask the leadership to bring the bill to the floor before the election recess.

Do I understand that is correct?

Mr. BEVILL. Mr. Speaker, will the gentleman yield?

Mr. COUGHLIN. I yield to the gentleman from Alabama.

Mr. BEVILL. As I have pointed out, we would not make any effort to deny the gentleman the opportunity to have a vote or to offer an amendment on any appropriation in the bill.

Certainly we stand ready. When the leadership decides they want this bill on the floor, we will be here ready to take it up. The bill was filed last night.

Mr. COUGHLIN. The bill is ready now to be brought to the floor for consideration?

Mr. BEVILL. That is right. We will, of course, have to proceed through the Rules Committee because as you know certain authorizing legislation has not yet been enacted this year.

Mr. WOLPE. Mr. Speaker, will the gentleman yield?

Mr. COUGHLIN. I yield to the gentleman from Michigan.

Mr. WOLPE. I thank the gentleman for yielding.

I want to associate myself with the gentleman's remarks.

I, too, welcome the assurances of the subcommittee's chairman, of the gentleman's willingness to take the bill to the floor prior to the recess, if that is the leadership's desire.

I think it is important to reinforce the importance of that timing, because the Clinch River breeder reactor project is a very large ticket item. We are talking about possible expenditures just between now and December 15 of about $50 million. So the earlier we can bring this issue to final resolution, the better.

I think it is the kind of issue that the public and Members of Congress alike have a reasonable expectation to be on record in advance of that election.

I thank the gentleman for raising this issue and again I thank the subcommittee chairman for his assurances in that regard.

Mr. COUGHLIN. I also discussed this question with the distinguished ranking minority member of the Energy and Water Subcommittee, the gentleman from Indiana (Mr. MYERS). I believe I am correct in saying that the gentleman also feels the bill is ready to be brought to the floor before we recess for the election period and would seek to do that, to bring it to the floor before the recess for the election period.

Mr. MYERS. Mr. Speaker, will the gentleman yield?

Mr. COUGHLIN. I yield to the gentleman from Indiana.

Mr. MYERS. Mr. Speaker, I will be happy to respond to the gentleman's question.

First, it has been suggested here, remarks have been made to the chairman of our subcommittee, the gentleman from Alabama (Mr. BEVILL), and members of the committee, that we are dragging our feet. That is not the case and has not been the case of this committee in any instance in the 12 years I have on the subcommittee. Then there is the suggestion that we might ask for a closed rule. In the years I have been on the subcommittee we have never asked for a closed rule.

So I do think it has been an unkind, unnecessary, and unwarranted swing at our subcommittee to suggest we might drag our feet, because that is not the case.

I do not know how many times we have to tell the Members, "We love you."

We have told everyone here not once, not twice, but a dozen times there will be no effort by our subcommittee, nor to my knowledge by the full Appropriations Committee to make any attempt not to bring this bill to the floor as expeditiously as possible.

As the chairman has said, everything is ready except the rule. As far as I know, we will be requesting a rule very soon now and hopefully we can bring the bill to the floor.

As the gentleman knows, and everyone here knows, we on the committee do not dictate when that bill may come to the floor. But everyone has had many votes on these issues. The gentleman from Pennsylvania (Mr. EDGAR), how many votes has the gentleman had on Clinch River?

Not once, not twice, but as long as the gentleman has been in Congress, every year. I think it is unkind to suggest that we have tried to defeat those attempts or in any way be obstructionist.

Mr. COUGHLIN. There is certainly no intention to be unkind to the very distinguished subcommittee. That is not intended; the gentleman is very kind to give us the assurance that he will seek to bring the bill to the floor as expeditiously as possible. We hope that will be before the recess for elections.

Mr. FROST. Mr. Speaker, I yield 5 minutes to the gentleman from California (Mr. PANETTA), for purposes of debate only.

Mr. PANETTA. Mr. Speaker, I appreciate the difficulty that faces the appropriations process. I think all of the Members recognize that these difficulties are due to a number of factors, both political and institutional. So we face the challenge then of having to adopt another continuing resolution in the process.

I know the chairman and members of the Appropriations Committee would prefer consideration and passage of separate bills, but I think we have to recognize the reality that we pass on a regular basis massive continuing resolutions; and whether we like it or not, these continuing resolutions set national priorities. They send

signals. They lock us into the future in one way or the other.

This continuing resolution, House Joint Resolution 599 before the House, sets what I think are two bad precedents. The first is that it treats defense spending and domestic spending in two very different ways. It states that with regard to defense the higher amount will be taken. If the House subcommittee reports a higher mark out, that that will be the figure that will be adopted as part of the continuing resolution.

On domestic spending, it says that the lower amount will be taken regardless of what the House mark is, regardless of what the House does on individual appropriations bills, that the 1982 level will be the level adopted.

It essentially, in my opinion, reverses the basic message that was contained in the veto override which is that we ought to balance these interests out of fairness and in the interests of considering both domestic and defense spending in the same manner.

The second problem I see with the continuing resolution is that it undermines the incentive to do any individual appropriations bills except defense. We know that defense needs more; we understand that; and there clearly will be a defense bill up on the House floor. That will set the number.

We also know that there are domestic areas that will need more spending and some less. That ought to be considered in the individual appropriations bills that are reported out of these committees.

But the point is that in those instances we are going to simply say take the 1982 spending figure, whatever that is, and we will disregard the work of that particular appropriations committee.

The point, is, it seems to me, if we care about an appropriations process in this House, if we respect it, then we ought to recognize the work of the individual subcommittees on the Appropriations Committee and the work of the House in adopting or revising those particular marks.

Unfortunately, what I see this process leading to is that there will be one defense appropriations bill that will be passed by the Congress and everything else will be put into a large continuing resolution.

Mr. CONTE. Mr. Speaker, will the gentleman yield?

Mr. PANETTA. I yield to the gentleman from Massachusetts.

Mr. CONTE. Mr. Speaker, I would like to say two things: First, I hope the gentleman joins me in my crusade to repeal the Budget Act. Then we would not have so many bills in this continuing resolution. We would have many of these bills passed, like in the good old days.

Second, I do not like this procedure. I fought it in the full committee and lost. I tried to put HHS in the same formula as defense; but let me say that the gentleman does not have much faith in his Democratic controlled committee. The Democrats control the Defense Subcommittee three to two. They control the full committee three to two. So they are the majority party. I hope that they have the wisdom to cut down on defense, which I am all for.

Mr. PANETTA. My point is at the very least I think we ought to treat all of the House marks in the same fashion. We passed a military construction bill, we passed Transportation, we passed Housing, we passed Agriculture. Those marks ought to be recognized as the number we ought to adopt as part of the bill.

I do not intend to oppose the rule because I do not believe we ought to open up this rule in terms of the number of amendments. But I do intend to vote against the continuing resolution because I think it recognizes the wrongs priorities, it undermines the appropriations process, and it does continuing damage to the Constitution and our responsibilities in implementing the Constitution.

□ 1345

Mr. EDGAR. Mr. Speaker, will the gentleman yield?

Mr. PANETTA. I yield to the gentleman from Pennsylvania.

Mr. EDGAR. Mr. Speaker, I would like to compliment the gentleman for his analysis of the unfairness and untargeted nature of the continuing resolution and I thank the gentleman for his comments.

Mr. MITCHELL of Maryland. Mr. Speaker, will the gentleman yield?

Mr. PANETTA. I would be pleased to yield to the gentleman from Maryland.

Mr. MITCHELL of Maryland. Mr. Speaker, I, too, want to associate myself with the gentleman's remarks.

There are those of us who tried to go along with the will of the House time and time again and cut social programs.

I think the gentleman is right. I will vote against the continuing resolution.

Mr. QUILLEN. Mr. Speaker, I yield myself such time as I may consume.

Mr. Speaker, I have noticed a certain amount of generosity in remarks of the chairman of the subcommittee and the ranking minority member by agreeing that whenever the appropriation bill is brought up, it will be under an open rule procedure with everybody having a chance to vote either for or against their pet projects. I would hope that we keep an open mind about Clinch River or Tombigbee or any other project. I think we should make up our minds when that bill is debated on the floor of the House, and hold the fight until then.

I urge adoption of the rule.

Mr. Speaker, I yield to the gentleman from Indiana (Mr. MYERS).

Mr. MYERS. Mr. Speaker, I thank the ranking Republican member of the Rules Committee.

I do not think the bill will come as an open rule. It will be a modified open rule is my understanding, because there are some provisions in here that will have to be protected because they are not provided by authorizations yet; but as far as trying to preclude these amendments, somebody maybe will come forth and say that back on such and such a day you said it would be an open rule and now you have a modified rule protecting points of order.

We will have to provide for those points of order, but certainly it will not be to preclude anyone from offering these selected amendments that you are talking about. That will not be the intent. There will have to be a modified rule, not an absolutely open rule, I am sure.

Mr. QUILLEN. Mr. Speaker, I thank the gentleman. I appreciate that.

Mr. EDGAR. Mr. Speaker, will the gentleman yield?

Mr. QUILLEN. I would be happy to yield.

Mr. EDGAR. Mr. Speaker, I thank the gentleman for his comments.

I think that the chairman of the subcommittee and the ranking member on that subcommittee clarified it very clearly. The intention is, the bill is ready, it should be before the House before the 8th. We will have that opportunity.

The reason the gentleman is suggesting the need for a modified closed rule, as I understand, there may be as many as 14 new projects in the legislation, but we will deal with that when the bill comes up for consideration.

Mr. MYERS. Mr. Speaker, will the gentleman yield further?

Mr. QUILLEN. I yield.

Mr. MYERS. Mr. Speaker, there are not 14 new projects. As far as the Corps of Engineers projects that the administration recommended, they did have nine, and there are two others which are high in benefit-cost ratio. We have cited those in the report, but we do not provide funds for them. We have not authorized these constructions, because they do come under a different payment plan of costs and so forth; so the authorizing committee has asked the committee not to appropriate money for these or provide for starts, because they want to consider these new funding programs. For that reason they are not in this bill that we now have ready to come to the floor. I think that should be brought to our attention.

Mr. EDGAR. Mr. Speaker, I thank the gentleman for his comments.

Mr. QUILLEN. Mr. Speaker, I yield 3 minutes to the gentleman from Pennsylvania (Mr. WALKER).

Mr. WALKER. Mr. Speaker, I thank the gentleman from Tennessee very much for yielding me the time.

I rise in opposition to this closed rule. Let us make it very clear that this is a closed rule. We are making major economic decisions within the bill that we are going to consider under this rule, with no chance to offer amendments—oh, wait a minute, I should not say no chance to offer amendments. There was a chance to offer an amendment in here. The gentleman from Massachusetts, who rose in favor of this rule, indicates that he has a chance to offer an amendment. He gets to offer his amendment on something that he regards as important in the bill. What the others of us do not get a chance to do is offer the things that we think are important in the course of the consideration of this appropriation.

I think that is a pretty bad way for the people's body of government to work.

The gentleman from California (Mr. PANETTA) has pointed out that we have gotten ourselves into a place where the appropriations process has made major economic determinations for the fiscal year. That is the problem that we face. We are faced with a situation where we are making these decisions and now we are doing it under closed rules where we cannot offer amendments to correct things that we might believe are wrong; so we will not be able to work our will here. We are going to be asked to accept, lock, stock, and barrel, the will as expressed by a fairly small band of our colleagues.

I think that does not fit the best interests of the Nation. As a matter of fact, I think in many instances what we will have is the national interest ignored.

So if we adopt this rule, what we are going to do is go about ignoring a number of matters that many people across this country think are important and a lot of matters that Members of this House think are important.

I would hope that Members would vote against this closed rule procedure.

Mr. QUILLEN. Mr. Speaker, I yield 1 minute to the gentleman from Massachusetts (Mr. CONTE).

Mr. CONTE. Mr. Speaker, a motion to recommit is given to the minority to offer the motion for the most important issue that is in contention between the majority and the minority.

My President says that he wants this continuing resolution to end sine die 97th Congress and the majority want it to end on February 28. That is the only bone of contention. I only have one President.

Furthermore, we would not be on this continuing resolution if people would not call for votes day in and day out, whether we should go into the Committee of the Whole House, costing the taxpayers thousands and thousands of dollars for these rollcalls.

Mr. FROST. Mr. Speaker, I yield 2 minutes, for purposes of debate, to the gentleman from Texas (Mr. PICKLE).

Mr. PICKLE. Mr. Speaker, I am not as concerned about the pending rule as I am about the process that we are establishing by passing or probably passing yet another continuing resolution.

Over the years the use of the continuing resolution has become the general rule, rather than the exception. This is bad policy. It is an attack against the committee process. It weakens the Congress.

We are set up on an authorizing and an appropriation basis and when we fail to act during the year and then simply fall back on a continuing resolution, we are not facing our responsibility.

Last November, I introduced a bill, H.R. 5102, which would have said that it would require a two-thirds vote by both bodies before you could have had a continuing resolution. At least it would make it more difficult to come by and not give us the easy way out.

Now, during debate on the bill I am going to talk further on it. I am going to reintroduce this measure again the first of the next session. I ask Members to join me in cosponsorship.

The Congress must get away from the fact that we pass yet another continuing resolution, year after year—toward the close of the session. It is bad policy for us. It destroys the committee system and I hope that we will do something about this bad practice.

Mr. QUILLEN. Mr. Speaker, I yield 3 minutes to the gentleman from New York (Mr. GREEN).

Mr. GREEN. Mr. Speaker, I rise in opposition to the rule. At the Rules Committee, the gentleman from Iowa (Mr. SMITH) and I sought a rule which would permit us to challenge on the floor of the House the discriminatory treatment between defense and the other parts of this bill.

I think it is wrong, for the reasons that have been very ably set forth by the gentleman from California (Mr. PANETTA), as a matter of national priorities and as a matter of procedure within this House, that the continuing resolution contains that discrimination and that this rule will prevent us from having such a fundamental policy decision dealt with by the amendment process on the floor of this House.

I wish to raise one further issue. I think there is a serious constitutional issue with respect to the continuing resolution. That issue is that, I think in violation of article I of the Constitution, which delegates legislative powers to the House and to the Senate, not to any committee, this bill is in essence providing for the delegation of legislative powers to the Appropriations Committee. The bill provides that if the defense appropriation bill is reported by the Appropriations Committee, even if that bill is not acted on by the full House, the increased spending level it surely will contain will become the level at which funds are appropriated during the time this continuing resolution is in effect.

Now, no one will know today when we vote on this continuing resolution at what level the Appropriations Committee will provide for defense spending in that appropriations bill before we recess for the election. So in essence this House is saying that we are going to delegate to the Appropriations Committee the right to set the level of defense spending without any action on our part in the Whole House and without any knowledge in advance as to what that level of spending will be. It seems to me that is certainly not what article I of the U.S. Constitution demands of the Congress of the United States and that the bill is, therefore, unconstitutional.

I therefore expect to vote against the rule, because it does not give us the opportunity to cure that defect by amendment, and against the bill itself, because of that defect.

Mr. QUILLEN. Mr. Speaker, I yield 1 minute to the gentleman from Pennsylvania (Mr. WALKER), after which I yield 2 minutes to the gentleman from Minnesota (Mr. WEBER). Following that, I have no further requests for time.

Mr. WALKER. Mr. Speaker, I realize that there are a number of Members around this floor who do not believe that one of the things the taxpayers pay for is to come to this floor and vote.

I happen to think that one of the main things the taxpayers do pay us to do is to be over here voting and recording our presence; but what I was really disappointed by was the fact that the gentleman evidently has not read the rule to which he refers, because what the rule says is that one amendment is going to be allowed to be offered. It had nothing to do with a motion to recommit, which is a separate part of this rule and it does specifically state that the gentleman can offer an amendment.

Mr. CONTE. Mr. Speaker, will the gentleman yield?

Mr. WALKER. The gentleman did not yield to me. I am trying to make a point.

Mr. CONTE. The gentleman did not ask me to yield. I would have yielded.

Mr. WALKER. Could we have order, Mr. Speaker?

The SPEAKER pro tempore. The gentleman from Pennsylvania has the floor.

Mr. WALKER. The point I am trying to make is that the rule as reported from the committee has in it one amendment and that one amendment could be offered by the gentleman from Massachusetts. That is what I was referring to in my speech.

I think it is entirely in order with the language of the rule and I think that this gentleman has a proper interpretation of the rules.

Mr. QUILLEN. Mr. Speaker, I yield 1 minute to the gentleman from Massachusetts to close this particular part of the debate.

Mr. CONTE. Well, Mr. Speaker, the rule says that one amendment is in order changing the date to another date certain. Changing the date certain to sine die 97th Congress would not be in order as an amendment under the rule. The only way you could do that is by putting in another day certain, and the gentleman has that right to offer that amendment. Under the rule, anybody has that right to offer that amendment.

I have a motion to recommit. In the motion to recommit I can put anything I want.

The only thing the administration opposes on this continuing resolution is that they want this termination date of sine die 97th Congress.

Mr. WALKER. Mr. Speaker, will the gentleman yield?

Mr. CONTE. Oh, I would be glad to yield.

Mr. WALKER. I thank the gentleman for yielding.

The point being that the rule expresses that one amendment to change the date is in order.

Mr. CONTE. That is right.

Mr. WALKER. That is exactly what the gentleman from Pennsylvania referred to. It was my understanding from our leadership that the gentleman from Massachusetts was going to offer that amendment.

Mr. CONTE. No.

Mr. QUILLEN. Mr. Speaker, I yield 2 minutes to the gentleman from Minnesota (Mr. WEBER).

Mr. WEBER of Minnesota. Mr. Speaker, I would like to associate myself with the remarks of the gentleman from Pennsylvania (Mr. EDGAR) and the other gentleman from Pennsylvania (Mr. COUGHLIN) in rising to express my concern and opposition to this closed rule.

I listened carefully in the Rules Committee yesterday to the testimony of the distinguished chairman and ranking member of the Appropriations Committee and their arguments that a closed rule was necessary to protect the traditions and precedents of the House of Representatives, which dictate that we neither initiate nor terminate legislation on a continuing resolution.

□ 1400

While that may be a pertinent argument, I think it ignores another argument, another consideration which is the reputation of this entire body in this year in which we are making some very basic decisions about the country's economic policies.

Mr. Speaker, we have made basic decisions in this last year in terms of reducing spending on social programs and in terms of raising taxes on the American people in an effort to close this very large deficit.

I think our reputation as an institution would be ill served if the appearance is given to the American people that we are trying to put off votes on what are largely regarded as pork-barrel subsidies to vested interests in this energy and water appropriation bill, because of a technicality or because of tradition and precedent of the House.

So I rise in opposition to the closed rule. I am hopeful that the assurances we have been given will hold true and that we will be given a vote on the energy and water appropriations bill prior to adjournment on the 8th. In my judgment, the reputation of the Congress will be dealt yet another blow, if consideration of that bill is put off until after the election.

Mr. QUILLEN. Mr. Speaker, I yield 2 minutes to the gentleman from California (Mr. MCCLOSKEY).

Mr. McCLOSKEY. Mr. Speaker, responding to the gentleman from Indiana about the "combat zone" here, I would like to raise a matter on this rule and on the bill that follows it with reference to the combat zone in West Beirut into which our marines are going to be introduced the day after tomorrow.

If I could have the attention of the gentleman from Massachusetts, I would like to direct a question to him.

The gentleman from Massachusetts just stated that the administration has no opposition to anything in this continuing resolution except the one matter that the gentleman mentioned.

Am I not correct that in this continuing resolution we increase the forgiveness for military assistance to Israel by the sum of $50 million above what the administration wanted?

Mr. CONTE. Mr. Speaker, will the gentleman yield to me?

Mr. McCLOSKEY. I yield to the gentleman from Massachusetts.

Mr. CONTE. I thank the gentleman for yielding.

Mr. Speaker, the answer is yes, the administration would prefer a lower amount of forgiven foreign military sales credits.

Mr. McCLOSKEY. Then if we pass this rule and we pass this continuing resolution we do so at a time when our marines are going into West Beirut to defend the Palestinian refugee camps because it was a condition of getting the Palestinians to withdraw from West Beirut, that we would assure the safety of the civilians in those camps. We specifically assured the Palestinians that we would prevent the Israelis or the Christian Militia from going into West Beirut. The Israelis gave us assurances that they would not go into West Beirut. They did go into West Beirut.

We were told by the State Department yesterday that not only did they plan to go into West Beirut and take it over; they planned to invite and they did invite the Christian Militia into those camps. Everyone in Lebanon, whether Syrian, Lebanese, Palestinian, or Israeli, could have predicted the massacre that occurred if those militia were allowed into those camps. There had been three separate massacres between the PLO and the Christian Militia in years past.

For what the Israelis did, they are now being held accountable around the world and properly so for complicity in the massacre itself.

The SPEAKER pro tempore. The time of the gentleman from California (Mr. MCCLOSKEY) has expired.

Mr. QUILLEN. Mr. Speaker, I yield 1 additional minute to the gentleman from California.

Mr. McCLOSKEY. I thank the gentleman for yielding.

Mr. Speaker, to the rest of the world, particularly the Arab world and particularly the people in Lebanon, the press in the past few days has said that the United States also shares a complicity in that massacre because we have continued to send arms to Israel and the Israelis are using those arms in violation of their agreement with us that they be used only in self-defense.

The end result, if we pass this continuing resolution, is that we are sending marines in to defend the camps, yet we are continuing to increase the military arms supply which, to the rest of the world, is deemed to make us partly responsible for the massacre that has occurred.

I think marines can die in Lebanon if Lebanese choose to exercise their anger against the continuing flow of American arms to Israel by taking action against the marines that are there. As a former marine, I think the Commander in Chief is right in sending the marines to Lebanon to seek to reestablish our credibility in our promise to protect the Palestinian refugees. However, I also believe that it would be deadly wrong for the Congress, immediately before the marines go in, to increase the free delivery of arms to Israel, as this bill does.

And my question to the gentleman: Does the administration agree?

The SPEAKER pro tempore. The time of the gentleman from California (Mr. MCCLOSKEY) has again expired.

Mr. QUILLEN. Mr. Speaker, I yield 1 additional minute to the gentleman from California.

Mr. CONTE. Mr. Speaker, will the gentleman yield to me?

Mr. McCLOSKEY. I yield to the gentleman from Massachusetts.

Mr. CONTE. I thank the gentleman for yielding.

Mr. Speaker, I think we ought to set the record straight. What you say is partially right. Here is what happened:

The continuing resolution provides for $2.185 billion for economic support and foreign military credit sales to Israel. That is $300 million less than the President's request for fiscal 1983.

Of this total of $2.185 billion, $1.4 billion is for foreign military sales credits. The committee under the continuing resolution is forgiving $550 million of those credits, of which the administration agreed to $500 million.

Mr. McCLOSKEY. If I am correct, the gentleman from Maryland (Mr. LONG), in the Appropriations Committee, offered an amendment to increase the forgiveness of $50 million to Israel; am I not correct in that?

Mr. CONTE. It is $50 million more in forgiveness for Israel; yes, bringing the total amount forgiven to $550 million, the same as fiscal 1982. It is not an increase over the current rate.

Mr. McCLOSKEY. In that case, I think we owe the marines going into Lebanon on Friday a vote against this rule and against this bill, to return it to the Appropriations Committee, to reduce that forgiveness to Israel, lest it be taken as a signal of our support for what Israel did last Thursday in entering West Beirut and creating the circumstances which led directly to the massacre.

Young marines may well die if we do otherwise.

Mr. FROST. Mr. Speaker, we are now about to vote on the rule that is before us.

I appreciate the statements by the gentleman from California (Mr. PANETTA) and by others, also, on the minority side that even though they may have some reservations about the resolution itself, that they intend to support the rule.

Mr. Speaker, we have a clear choice before us, whether we are going to have an orderly process, whether we are going to be able to pass a continuing resolution or not.

I urge the adoption of this rule and move the previous question.

The SPEAKER pro tempore. Without objection, the previous question is ordered on the resolution.

There was no objection.

The question is on the resolution.

The question was taken; and the Speaker pro tempore announced that the ayes appeared to have it.

Mr. WALKER. Mr. Speaker, I object to the vote on the ground that a quorum is not present and make the point of order that a quorum is not present.

The SPEAKER pro tempore. Evidently a quorum is not present.

The Sergeant at Arms will notify absent Members.

The vote was taken by electronic device, and there were—yeas 280, nays 120, not voting 32, as follows:

□ 1420

Mr. EVANS of Iowa and Mr. MOORE changed their votes from "yea" to "nay."

Ms. FERRARO and Mr. BUTLER changed their votes from "nay" to "yea."

So the resolution was agreed to.

The result of the vote was announced as above recorded.

A motion to reconsider was laid on the table.

Mr. WHITTEN. Mr. Speaker, pursuant to the rule just adopted, I call up the joint resolution (H.J. Res. 599) making continuing appropriations for the fiscal year 1983, and for other purposes, and ask for its immediate consideration in the House.

The Clerk read the joint resolution, as follows:

H.J. RES. 599

Resolved by the Senate and House of Representatives of the United States of America in Congress assembled, That the following sums are hereby appropriated, out of any money in the Treasury not otherwise appropriated, and out of applicable corporate or other revenues, receipts, and funds, for the several departments, agencies, corporations, and other organizational units of the Government for the fiscal year 1983, and for other purposes, namely:

SEC. 101. (a)(1) Such amounts as may be necessary for continuing projects or activities (not otherwise specifically provided for in this joint resolution) which were conducted in the fiscal year 1982 and for which appropriations, funds, or other authority would be available in the following appropriations Acts:

Agriculture, Rural Development, and Related Agencies Appropriation Act, 1983;

Departments of Commerce, Justice, and State, the Judiciary, and Related Agencies Appropriation Act, 1983;

District of Columbia Appropriation Act, 1983;

Energy and Water Development Appropriation Act, 1983;

Department of Housing and Urban Development—Independent Agencies Appropriation Act, 1983;

Department of Transportation and Related Agencies Appropriation Act, 1983; and

Treasury, Postal Service and General Government Appropriation Act, 1983.

(2) Appropriations made by this subsection shall be available to the extent and in the manner which would be provided by the pertinent appropriations Act.

(3) Whenever the amount which would be made available or the authority which would be granted under an Act listed in this subsection as passed the House as of October 1, 1982, is different from that which would be available or granted under such Act as passed by the Senate as of October 1, 1982, the pertinent project or activity shall be continued under the lesser amount or the more restrictive authority: *Provided,* That where an item is included in only one version of an Act as passed by both Houses as of October 1, 1982, the pertinent project or activity shall be continued under the appropriation, fund or authority granted by the one House, but at a rate for operations of the current rate or the rate permitted by the action of the one House, whichever is lower, and under the authority and conditions provided in applicable appropriation Acts for the fiscal year 1982: *Provided further,* That for the purposes of this joint resolution, when an Act listed in this subsection has been reported to the House but not passed by the House as of October 1, 1982, it shall be deemed as having been passed by the House.

(4) Whenever an Act listed in this subsection has been passed by only the House as of October 1, 1982, the pertinent project or activity shall be continued under the appropriation, fund, or authority granted by the House, but at a rate for operations of the current rate or the rate permitted by the action of the House, whichever is lower, and under the authority and conditions provided in applicable appropriation Acts for the fiscal year 1982.

(5) No provision which is included in an appropriation Act enumerated in this subsection but which was not included in the applicable appropriation Act of 1982, and which by its terms is applicable to more than one appropriation, fund, or authority shall be applicable to any appropriation, fund, or authority provided in the joint resolution unless such provision shall have been included in identical form in such bill as enacted by both the House and the Senate.

(b) Such amounts as may be necessary for continuing the following activities, not otherwise provided for, which were conducted in the fiscal year 1982, under the current terms and conditions and at a rate to maintain current operating levels:

activities under the purview of the Departments of Labor, Health and Human Services, and Education, and Related Agencies Appropriation Act, 1982, as provided for in Public Law 97-92; and

activities for which provision was made in the Department of the Interior and Related Agencies Appropriation Act, 1982: *Provided,* That no programs or facilities funded therein may be terminated unless such termination is specifically approved in the appropriations process, including reprograming.

(c) Such amounts as may be necessary for continuing activities which were conducted in the fiscal year 1982, for which provision was made in the Department of Defense Appropriation Act, 1982, under the current terms and conditions and at a rate for operations not in excess of the current rate until such time that the Department of Defense Appropriation Act, 1983, is reported in or subsequently passed by the House of Representatives, whereupon such amounts as may be necessary shall become available at a rate for operations or activities and under the terms and conditions as provided for in such appropriation Act for the fiscal year 1983, as reported in or passed by the House of Representatives: *Provided,* That no appropriation or fund made available or authority granted pursuant to this paragraph shall be used to initiate or resume any project or activity for which appropriations, funds, or other authority were not available during the fiscal year 1982 until such time that the Department of Defense Appropriation Act, 1983, is reported in or subsequently passed by the House of Representatives: *Provided further,* That no appropriation or fund made available or authority granted pursuant to this paragraph shall be used to initiate multiyear procurements utilizing advance procurement funding for economic order quantity procurement unless specifically appropriated later except for the following programs and amounts: AN/ALQ-136 Radar Jamming Systems, $14,500,000; NATO Seasparrow Ordalt Kits, $33,000,000: *Provided further,* That none of the funds appropriated or made available pursuant to this paragraph shall be obligated or expended for a special classified program authorized in section 109 of the Department of Defense Authorization Act, 1983 (Public Law 97-252): *Provided further,* That none of the funds appropriated or made available pursuant to this paragraph for the pay of members of the uniformed services shall be available to pay any member of the uniformed services a variable housing allowance pursuant to section 403(a)(2) of title 37, United States Code, in an amount that is greater than the amount which would have been payable to such member if the rates of basic allowance for quarters for members of the uniformed services in effect on September 30, 1982, had been increased by 8 percent on October 1, 1982: *Provided further,* That none of the funds appropriated or made available pursuant to this paragraph shall be available for the conversion of any full time positions in support of the Army Reserve, Air Reserve, Army National Guard, and Air National Guard by Active or Reserve Military Personnel, from civilian positions designated "military technicians" to military positions.

(d) Such amounts as may be necesssary for continuing the activities of the Foreign Assistance Appropriations Act of 1982, Public Law 97-121, under the terms and conditions, and at the rate, provided for in that Act or at the rate provided for in the budget estimates, whichever is lower, and under the more restrictive authority, notwithstanding section 10 of Public Law 91-672, and section 15(a) of the State Department Basic Authorities Act of 1956, or any other provision of law: *Provided,* That amounts allocated to each country under this paragraph shall not exceed those provided in fiscal year 1982 unless submitted through the regular reprogramming procedures of the Committees on Appropriations: *Provided further,* That economic and military assistance shall be available to Israel at the rate provided by, and under the terms and conditions of, Public Law 97-113.

(e) Notwithstanding the provisions of section 102 of this joint resolution, such amount as may be necessary for continuing projects and activities under all the conditions and to the extent and in the manner as provided in H.R. 7073, entitled the Legislative Branch Appropriation Act, 1983, as reported September 9, 1982, and the provisions of H.R. 7073 shall be effective as if enacted into law; except that the provisions of section 307 (a), (b), and (d) of H.R. 7073 shall apply to any appropriation, fund or authority made available for the period October 1, 1982, through February 28, 1983, by this or any other Act. Notwithstanding any other provision of this joint resolution, for payment to Patricia Ann Benjamin, wife of Adam Benjamin, Junior, late a Representative from the State of Indiana, $60,663.

(f) Such amounts are available as may be necessary for projects or activities provided for in H.R. 6968, the Military Construction Appropriations Act, 1983, as passed the House on August 19, 1982, at a rate for operations and to the extent and in the manner provided for in such Act.

SEC. 102. Appropriations and funds made available and authority granted pursuant to this joint resolution shall be available from October 1, 1982, and shall remain available until (a) enactment into law of an appropriation for any project or activity provided for in this joint resolution, or (b) enactment of the applicable appropriation Act by both Houses without any provision for such project or activity, or (c) February 28, 1983, whichever first occurs.

SEC. 103. Appropriations made and authority granted pursuant to this joint resolution shall cover all obligations or expenditures incurred for any project or activity during the period for which funds or authority for such projects or activity are available under this joint resolution.

SEC. 104. Expenditures made pursuant to this joint resolution shall be charged to the applicable appropriation, fund, or authorization whenever a bill in which such applicable appropriation, fund, or authorization is contained is enacted into law.

SEC. 105. Any appropriation for the fiscal year 1983 required to be apportioned pursuant to section 665 of title 31, United States Code, may be apportioned on a basis indicating the need (to the extent any such increases cannot be absorbed within available

appropriations) for a supplemental or deficiency estimate of appropriation to the extent necessary to permit payment of such pay increases as may be granted pursuant to law to civilian officers and employees and to active and retired military personnel. Each such appropriation shall otherwise be subject to the requirements of section 665 of title 31, United States Code.

SEC. 106. In accordance with Public Law 97-257 of September 10, 1982, not to exceed an annual rate of $13,500,000 from the fees collected and credited to the "Salaries and Expenses" appropriation of the Federal Bureau of Investigation to process fingerprint identification records for noncriminal employment and licensing services, shall be available for salaries and other expenses incurred in providing such services.

SEC. 107. Notwithstanding any other provision of this joint resolution except section 102, funding for Department of Energy, National Security Programs (formerly Operating Expenses and Plant and Capital Equipment, Atomic Energy Defense Activities), Bonneville Power Administration Fund (Borrowing Authority), Department of Defense—Civil, Department of the Army, Corps of Engineers—Civil, Operation and Maintenance, General, and the operation and maintenance activities funded in Flood Control, Mississippi River and Tributaries, shall be at the same levels and subject to the same conditions specified for these activities in the Energy and Water Development Appropriations bill for fiscal year 1983 and accompanying report, as reported to the House.

SEC. 108. Notwithstanding any other provision of this joint resolution, the New England Division of the United States Army Corps of Engineers shall be maintained as a Division with all of the duties and functions of a Division retained and shall not be redesignated a District or any other type office, other than Division.

SEC. 109. Of amounts appropriated for the Water Resources Council, Water Resources Planning, for preparation of assessments and plans, in Public Law 97-88, not more than $195,000 shall remain available until expended and shall be available to pay for work performed prior to fiscal year 1982 in support of the Columbia River Estuary Data Development Program, if such work is accepted by the Water Resources Council.

SEC. 110. (a) Notwithstanding any other provision of law, no part of any of the funds appropriated for the fiscal year ending September 30, 1983, by this Act or any other Act, may be used to pay any prevailing rate employee described in section 5342(a)(2)(A) of title 5, United States Code, or an employee covered by section 5348 of that title, in an amount which exceeds—

(1) for the period from October 1, 1982, until the next applicable wage survey adjustment becomes effective, the rate which was payable for the applicable grade and step to such employee under the applicable wage schedule that was in effect and payable on September 30, 1982; and

(2) for the period consisting of the remainder of the fiscal year ending September 30, 1983, a rate which exceeds, as a result of a wage survey adjustment, the rate payable under paragraph (1) of this subsection by more than the overall average percentage of the adjustment in the General Schedule during the fiscal year ending September 30, 1983.

(b) Notwithstanding the provisions of section 9(b) of Public Law 92-392 or section 704(b) of the Civil Service Reform Act of 1978, the provisions of subsection (a) of this section shall apply (in such manner as the Office of Personnel Management shall prescribe) to prevailing rate employees to whom such section 9(b) applies, except that the provisions of subsection (a) may not apply to any increase in a wage schedule or rate which is required by the terms of a contract entered into before the date of enactment of this Act.

(c) For the purposes of subsection (a) of this section, the rate payable to any employee who is covered by this section and who is paid from a schedule which was not in existence on September 30, 1982, shall be determined under regulations prescribed by the President.

(d) The provisions of this section shall apply only with respect to pay for services performed by affected employees after the date of enactment of this Act.

(e) For the purpose of administering any provision of law, rule, or regulation which provides premium pay, retirement, life insurance, or any other employee benefit, which requires any deduction or contribution, or which imposes any requirement or limitation, on the basis of a rate of salary or basic pay, the rate of salary or basic pay payable after the application of this section shall be treated as the rate of salary or basic pay.

SEC. 111. No part of any appropriation contained in, or funds made available by this or any other Act, shall be available for any agency to pay to the Administrator of the General Services Administration a higher rate per square foot for rental of space and services (established pursuant to section 210(j) of the Federal Property and Administrative Services Act of 1949, as amended) than the rate per square foot established for the space and services by the General Services Administration for the current fiscal year and for which appropriations were granted: *Provided*, That no part of any appropriation contained in, or funds made available by this or any other Act, shall be available for any agency to pay to the Administrator of the General Services Administration a higher rate per square foot for rental space and services (established pursuant to section 210(j) of the Federal Property and Administrative Services Act of 1949, as amended) than the rate per square foot established for the space and services by the General Services Administration for the fiscal year 1982.

SEC. 112. Notwithstanding any other provision of this joint resolution, moneys deposited into the National Defense Stockpile Transaction Fund under section 9(b) of the Strategic and Critical Materials Stock Piling Act (50 U.S.C. (98h(b)) are hereby made available, subject to such limitations as may be provided in appropriation Acts and in section 5(a)(1) of such Act, until expended for the acquisition of strategic and critical materials under section 6(a)(1) of such Act (and for transportation and other incidental expenses related to such acquisition). This paragraph applies without fiscal year limitation to moneys deposited into the fund before, on or after October 1, 1982: *Provided*, That during the fiscal year ending on September 30, 1983, not more than $120,000,000 in addition to amounts previously appropriated, may be obligated from amounts in the National Defense Stockpile Transaction Fund for the acquisition of strategic and critical materials under section 6(a)(1) of the Strategic and Critical Materials Stock Piling Act (50 U.S.C. 98e(a)(1)) and for transportation and other incidental expenses related to such acquisition.

SEC. 113. Notwithstanding any other provision of this joint resolution, funds available to the Federal Building Fund within the General Services Administration may be used to initiate new construction, purchase, advance design, and repairs and alteration line-item projects which are included in the Treasury, Postal Service and General Government Appropriation Act, 1983, as reported to the House.

SEC. 114. Funds provided by this joint resolution for costs to continue the implementation of provisions contained in the District of Columbia Statehood Constitutional Convention Initiative (D.C. Law 3-171) shall be applied first toward ensuring voter education on the proposed constitution by (a) printing, by the Statehood Commission, of the proposed constitution together with objective statements both for and against its provisions as expressed by the Convention delegates taking such positions; (b) mailing of this information to the registered voters of the District of Columbia by October 15, 1982; and (c) preparing for publication as a public document a comprehensive legislative history of the proposed constitution.

SEC. 115. Notwithstanding any other provision of this joint resolution except section 102, there are appropriated to the Postal Service Fund sufficient amounts so that postal rates for all preferred-rate mailers covered by section 3626 of title 39, United States Code, shall be continued at the rates in effect on July 28, 1982 (step 13): *Provided*, That mail for overseas voting and mail for the blind shall continue to be free: *Provided further*, That six-day delivery and rural delivery of mail shall continue at the 1982 level.

SEC. 116. Funds appropriated in Public Law 97-257 to the United States Fish and Wildlife Service for "Construction and anadromous fish" and to the Office of Surface Mining Reclamation and Enforcement for "Abandoned Mine Reclamation Fund" shall remain available until expended.

SEC. 117. Notwithstanding section 101(a)(4) of this joint resolution, funds shall be available for the United States Court of Appeals for the Federal Circuit at an annual rate not to exceed $4,146,000.

SEC. 118. Notwithstanding any other provision of law or of this joint resolution, AID/afr-C-1414, Agency for International Development, shall be extended for an additional three years.

SEC. 119. Notwithstanding any other provision of this joint resolution, there is appropriated $36,500,000, to remain available until expended, for Smithsonian Institution "Construction" to carry out the provisions of Public Law 97-203 to construct a building for the Museum of African Art and a gallery for Eastern art together with structures for related educational activities in the area south of the original Smithsonian Institution Building, including not to exceed $100,000 for services as authorized by 5 U.S.C. 3109.

SEC. 120. Notwithstanding any other provision of this joint resolution, there is appropriated $242,118,000, to remain available until expended, for Department of Energy "Strategic Petroleum Reserve" to carry out the provisions of Sections 151 through 166 of the Energy Policy and Conservation Act of 1975 (Public Law 94-163).

SEC. 121. Notwithstanding section 101(a)(4) of this joint resolution, of the funds provided for the Salaries and Expenses appropriation of the Small Business Administration under this joint resolution, an annual rate of $14,000,000 shall be avail-

able only for grants for Small Business Development Centers as authorized by section 20(a) of the Small Business Act, as amended.

SEC. 122. Notwithstanding section 101(a)(4) of this joint resolution, none of the funds provided by this joint resolution for the Legal Services Corporation shall be expended for any purpose prohibited or limited by or contrary to any of the provisions of H.R. 3480, as passed the House of Representatives on June 18, 1981.

SEC. 123. No provision in any appropriation Act for the fiscal year 1983 that makes the availability of any appropriation provided therein dependent upon the enactment of additional authorizing or other legislation shall be effective before the date set forth in section 102(c) of this joint resolution.

SEC. 124. Notwithstanding any other provision of this joint resolution, in the case of any employee of the Federal Government who is indebted to the United States, as determined by a court of the United States in an action or suit brought against such employee by the United States, the amount of the indebtedness may be collected in monthly installments, or at officially established regular pay period intervals, by deduction in reasonable amounts from the current pay account of the individual. The deductions may be made only from basic pay, special pay, incentive pay, or, in the case of an individual not entitled to basic pay, other authorized pay. Collection shall be made over a period not greater than the anticipated period of employment. The amount deducted for any period may not exceed one-fourth of the pay from which the deduction is made, unless the deduction of a greater amount is necessary to make the collection within the period of anticipated employment. If the individual retires or resigns, or if his employment otherwise ends, before collection of the amount of the indebtedness is completed, deduction shall be made from later payments of any nature due to the individual from the United States Treasury.

SEC. 125. Of the $70,122,000 available at an annual rate under this joint resolution for the exchange programs of the United States Information Agency, $60,415,000 shall be available for the Fulbright and International Visitor Programs, $2,620,000 shall be available for the Humphrey Fellowship Program and $7,087,000 shall be available for the Private Sector Programs.

SEC. 126. None of the funds provided in this Joint Resolution shall be obligated for any aspect of the processing or issuance of permits or leases pertaining to exploration for or development of coal, oil, gas, or geothermal resources on Federal lands within any component of the National Wilderness Preservation System or within any Forest Service RARE II areas recommended for wilderness designation or allocated to further planning in Executive Communication 1504, Ninety-Sixth Congress (House Document numbered 96-119); or within any lands designated by Congress as wilderness study areas.

SEC. 127. No reduction in the amount payable to any State under title IV of the Social Security Act with respect to any of the fiscal years 1977 through 1982 shall be made prior to the date on which this resolution expires on account of the provisions of section 403(h) of such Act.

GENERAL LEAVE

Mr. WHITTEN. Mr. Speaker, I ask unanimous consent that all Members may have 5 legislative days within which to revise and extend their remarks on House Joint Resolution 599, and that I may include tabular and extraneous matter.

The SPEAKER pro tempore (Mr. RUSSO). Is there objection to the request of the gentleman from Mississippi?

There was no objection.

The SPEAKER pro tempore. The gentleman from Mississippi (Mr. WHITTEN) is recognized for 1 hour.

Mr. WHITTEN. Mr. Speaker, I yield 30 minutes to the gentleman from Massachusetts (Mr. CONTE), for purposes of debate only, pending which I yield myself such time as I may require.

Mr. Speaker, I do not believe anyone here regrets any more than I do the necessity for this continuing resolution, because it becomes necessary as a result of our Committee on Appropriations being delayed in handling the regular annual appropriation bills. We have experienced many delays and uncertainties, many more than we have in recent years. The first budget resolution was not even reported to the House until after the statutory deadline for its final adoption. The committee received its section 302 allocation under the resolution on June 22, just two days before the Fourth of July recess began.

Mr. Speaker, as cochairman of the study group which recommended the Budget Committee—I know the purpose of the committee was to gain control of the uncontrollable entitlements and back door spending. Instead of meeting that purpose, attention has largely been directed to controllable items—where our Appropriations Committee for 37 out of 39 years has been below the budget and those 2 years—of increased spending were due to additional military spending.

But the point of all this is that if we are going to restore order to the proceedings, we are going to have to let the Appropriations Committee go ahead with its bills. So I say to the Members that we are here through no fault of our own. We are doing the best we can.

We might ask why we have this rule and why we have it like it is. I am sure there are at least 100 Members who would like to offer amendments to the appropriations bills referenced in this resolution. A continuing resolution is a hybrid. It provides temporary appropriations and authorizations in certain areas, which means that in the absence of any restrictions anything germane would be in order, and we could be here still amending this resolution when the 1st of October comes around.

May I say that other folks do not like this, that, and the other things about the content of the resolution, and that is natural. But in an attempt to bring together 13 subcommittees and 54 Members with different interests and with different situations so far as this resolution is concerned, you have to do a whole lot and take a whole lot to come up with a composite or a unified front.

May I say to the Members that we should keep in mind that after adopting this resolution, anytime a regular annual appropriations bill is agreed upon and signed by the President, it disengages from the resolution. So what we have here is a continuing resolution to keep us in business until the regular bills get enacted into law.

The Members may be interested in what situation we are in now. The House Committee on Appropriations has reported 9 of the 13 1983 appropriation bills.

They are: HUD-independent agencies; Commerce-Justice-State-the Judiciary; military construction; Transportation and related agencies; Agriculture; Legislative; District of Columbia; energy and water development; and Treasury-Postal Service-General Government.

The Labor, Health and Human Services and Education bill has been marked up in subcommittee but not reported.

Three bills have not yet been marked up in subcommittee. They are: Interior, Defense, and foreign aid.

Four bills have passed the House. They are: Military construction; HUD-independent agencies; Transportation; and Agriculture.

It is hoped that additional bills will be considered by the House before the recess begins.

So we are working overtime, trying to handle the bills in the regular way, and this resolution is just so the Government will stay in business during the period.

For those of you who have amendments you want to offer—and many of you do—and those who have issues that they want to bring to a vote, when the regular bills are considered is the time to do it. This is a bill where we are just holding in line and doing the best we can.

□ 1430

I tell you there are two things you have to do. One of them is you have to get this bill through and then you have to get it signed.

In connection with the defense bill, it has been pointed out, that for a number of reasons, including awaiting the results of investigations, there has been no action here insofar as marking up defense is concerned. But it is also known that the President has requested substantial increases in defense in 1983. The committee made an exception for the defense bill. The continuing resolution calls for defense at the current rate until the defense appro-

priations bill is reported. Then the rate would go to the reported rate until the House passes the defense bill. Then the rate would be that specified in the House passed bill.

I will briefly explain the other major provisions of the resolution.

Section 101(a) provides for seven bills. Under this section if there is just a House bill by October 1—reported or passed—the rate is the lower of the House bill or the current rate.

If any of the House bills are passed by the Senate by October 1, the rate is the House bill or the Senate bill whichever is lower.

The seven bills under this section are: Agriculture; Commerce-Justice-State and the Judiciary; District of Columbia; energy and water development; HUD-independent agencies; Transportation; and Treasury-Postal Service-General Government.

Section 101(b) provides for two bills at the current rate. They are: Labor-HHS-Education; and Interior and related agencies.

Section 101(d) provides for foreign assistance at the rate of last year's bill or the budget estimate, whichever is lower.

The legislative bill is provided for in section 101(e) at the rate of the reported bill, in the same manner as was done last year.

Military construction is provided for in section 101(f) at the rate of the House passed bill.

But now, then, we have this continuing resolution. When we pass it, of course the other body in turn acts upon it and we get into conference. In the years that I have been here we on our committee have tried to protect the interests of the House. We have stayed up all night several times in order to stand up for the House position. We are prepared to do that again, if necessary.

It stands to reason that with the first of October facing us there is no way for us to be assured that we can get together with the other body on a conference and report on each of the regular annual bills, but we shall try.

I say to you the reason that we have to have this is so that they will not have our backs to the wall on October 1, the start of the new fiscal year, when we have no elbow room to work it out like we ought to.

The only way that we could bring this up and hope to get through, is with a limited rule. It is temporary. The regular bills will govern.

Again let me repeat, this being a hybrid, a continuing resolution being open to anything that is germane, then the sky is the limit as to how many amendments you would have here. In my judgment, the country would not be well served. There will be plenty of opportunities to address these matters. We have the responsibility to provide for the orderly continuation of governmental functions.

So that being the situation I recommended, and our committee recommended, that we have a rule where we could do what this is supposed to do, keep on track until we act on the regular bills. So that is what this is.

The regular bills will be substituted when we get those through and we are moving rapidly. I will tell you that we are going to go to conference with the other body as rapidly as possible and we are going to move as soon as we are allowed to. We can look after the House position 10 times better with room and latitude if this continuing resolution is agreed to.

So I hope you will vote with us on this continuing resolution. A continuing resolution means keeping the Government going. The other side of this is if this is turned down, with the time limit facing us, we face a closedown of the whole Government because all of the bills are covered in this. On October 1, under the opinion of the Attorney General, they will have to close down the Government and this risk should not be taken.

In other words, we bring you a resolution here that provides for orderly government, because it just holds things together until we can get the regular bills passed, and it gives us in conference an opportunity to stand up for your rights and not be afraid that we will be responsible for closing down the Government.

So again I leave it in your hands and I hope you will support us because we in turn are trying to support you.

The SPEAKER pro tempore. The gentleman from Mississippi (Mr. WHITTEN) has consumed 8 minutes.

Mr. CONTE. Mr. Speaker, I yield myself such time as I may consume.

Mr. Speaker, I support this joint resolution, and I urge my colleagues on both sides of the aisle to do likewise.

This resolution is virtually a general appropriation bill for the entire Government. Because of its scope, it affects every Member of the House.

Every Member of the House can find something good—or something bad.

Many Members have spoken to me about problems with this resolution—from the level of spending for defense and education, to the extension of the FTC, and many lesser problems with programs and projects that are none the less truly important to the individual Member.

I share many of these concerns.

In my opinion, the levels of spending for health and education are too low. The level for foreign assistance is too low. The administration regards the level for defense as inadequate, in my opinion the administration's position on defense is too high.

But we cannot all have everything we want.

This resolution is a delicately balanced compromise, which deserves the support of the House and of the administration.

However, if any Member is considering voting against the resolution, because of a problem with a particular program or project, I hope that Member will think very carefully.

The committee will do its best to bring the general appropriation bills to the floor, either before the election, or during the special session. Amendments can and should be offered to those bills to solve any individual problem a Member may have.

But if we defeat this resolution, as sure as I am standing here, there will be no funds for these programs on October 1. None.

There will be no funding for education programs, or health programs, or the Department of Defense, or for food stamps, or for the child nutrution programs. There will be no veterans benefits, and no social security, because the administrative costs and funds for mailing checks are provided by this continuing resolution.

Think about it.

It is an election year, and I know that many Members truly believe that a vote against this resolution would help them politically.

But if this resolution is defeated, on October 1 the people will remember that vote when the Government closes, and the social security checks stop.

I know it is difficult for Members to look beyond the resolution before us, but I truly believe that in this case the right thing for the country is also the right thing politically.

Support the resolution.

Seven of the 1983 bills are covered under section 101(a): Agriculture; Commerce; District of Columbia; Energy and Water Development; Housing and Urban Development; Transportation; and Treasury.

Appropriations are provided for projects and activities for which funds would be available in the 1983 bill, which were conducted in fiscal 1982, and which are not funded elsewhere in the resolution. The rates are based on the status of each bill as of October 1, 1982.

If the bill has been reported to or passed the House, the continung resolution rate is the current rate or the House rate, whichever is lower, under the authority and conditions in effect in fiscal 1982.

If the bill has been reported to or passed the House, and passed the Senate, the rate is the House or Senate rate, whichever is lower, under the more restrictive authority. If an item is included in only the House or Senate bill, the rate is as provided in that bill, under the terms and conditions in effect in 1982. No new general

provision shall take effect unless it is included in identical form in the House and Senate bills.

The language of the resolution which determines rates and conditions refers only to House bills, or House bills considered in the Senate, and does not refer, or in any way give standing to Senate bills.

Two of the 1983 bills, Interior and Labor-HHS, are covered under section 101(b). Appropriations are provided for activities in the 1983 bill, which were conducted in fiscal 1982, under the 1982 terms and conditions, and at a rate sufficient to maintain current operating levels.

Defense activities which were conducted in fiscal 1982, and for which provision was made in the fiscal 1982 defense bill, are continued under section 101(c) at the current rate and terms and conditions, or at the House rate and conditions if and when a bill is reported to or passed by the House.

Activities in the 1982 foreign assistance bill are continued at the 1982 rate, or the budget estimate, whichever is lower, and under the more restrictive authority.

Activities funded in the legislative bill for fiscal 1983 are funded at that rate and under those conditions for the full fiscal year, and the pay cap on upper-level Federal employees, including Members of Congress, is continued for the period covered by the resolution.

Activities funded in the military construction bill for fiscal 1983 as passed the House are funded at that level and under those conditions.

Under section 102, continuing appropriations are available for a project or activity until enactment into law of an appropriation for the project or activity or enactment by both Houses of the applicable appropriation act without any appropriation for the project or activity, or February 28, 1983, whichever first occurs.

Rates and conditions under section 101(a)(3) are derived only by reference to a bill listed in that section which has been reported to or passed the House, or a House bill that has passed the Senate.

Section 101(a)(3) is based on "an Act listed in this subsection as passed the House * * *", and "such Act" as passed the Senate.

A plain reading of section 101(a)(3) establishes beyond doubt that "such Act" refers directly and exclusively to "an Act listed in this subsection as passed the House * * *", that is, to a House bill.

We are often asked, "How much is in the continuing resolution?"

Because of the way continuing resolutions are and must be written, that question cannot be answered.

First, in nearly all instances, rates are based on the status of a bill as of October 1 of the new fiscal year. We do not know, and cannot responsibly predict, what that status will be.

Second, rates under any continuing resolution are and should be intended to provide OMB and the agencies with sufficient flexibility to allow for subsequent congressional action, in addition to the requirements for prudent management under the Antideficiency Act.

However, this flexibility is not to be used to reduce, defer, or eliminate programs based on policy disagreements with the Congress.

Third, many of the rates in the continuing resolution are for entitlement programs, where the actual rate of obligation and expenditure is determined under existing law by participation rates and other factors outside of the immediate control of Congress or the Executive.

Mr. Speaker, it is very important, in considering a continuing resolution, that the administration understand the intent of the House with regard to spending rates, apportionment, and the withholding of funds.

OMB and the individual agencies can and should exercise commonsense discretion in spending under the continuing resolution, so that agencies are not caught in a bind if the appropriation finally enacted is significantly above or below the continuing resolution level.

However, absent clear and compelling indications of congressional action, OMB and the agencies are expected to apportion and obligate at the continuing resolution rate.

The OMB and individual agencies should not withhold or otherwise delay the apportionment or obligationment of funds, below the continuing resolution rate, based on policy disagreements with the Congress, even in the guise of protecting congressional prerogatives.

Of course, unless specified to the contrary in the continuing resolution, the current rate includes supplementals, and continuing appropriations are subject to other procedures in existing law, such as the Antideficiency Act, and the Impoundment Control Act.

□ 1440

Mr. Speaker, I will not offer an amendment to the continuing resolution changing the date. However, I will offer a motion to recommit the bill with one amendment to terminate the continuing resolution with the sine die of the 97th Congress.

Now, I hope the Members who are here and the Members who are listening on television in their offices will realize the importance of that amendment, because the ones who are interested in amendments for Clinch River or Tennessee-Tombigbee or the FTC, or any other amendment that they may have to this bill.

They will have another opportunity when the public works bill or the Commerce bill is brought forth to the House.

Mr. MICHEL. Mr. Speaker, will the gentleman yield?

Mr. CONTE. I yield to my good friend, the gentleman from Illinois (Mr. MICHEL), the distinguished minority leader.

Mr. MICHEL. I am sorry that I did not hear the gentleman's earlier presentation. Could the gentleman enlighten me as to whether or not the terms of this continuing resolution would allow for increased spending for the new fiscal year in the Defense area?

Mr. CONTE. In the Defense area, under section 101(c) of the bill, it will be the current rate, or if the subcommittee and the full Appropriations Committee reports the Defense bill to the House, that will be the mark that they will use.

Mr. MICHEL. And do I understand from what the gentleman has just said that the reference is made only to the House subcommittee or House full Committee on Appropriations, and no reference to what the other body might do, both subcommittee and full committeewise?

Mr. CONTE. In answer to the gentleman from Illinois, the gentleman is absolutely right; it is only the House.

Mr. MICHEL. Would the gentleman conjecture about whether or not the other body would amend our continuing resolution to include language suggesting providing for, pay, the lower of either the House committee or Senate committee-passed bill having to do with defense expenditures?

Mr. CONTE. That is possible. It is my hope—and I understand that now the Senate has TV over there and they watch these debates, and I hope they are watching this debate—that they do not load up this continuing resolution.

We try to do a good job. We are sending them a clean resolution. They have the horses over there and I hope they will keep this resolution clean.

Mr. MICHEL. I might make the observation to the gentleman, having talked to the Senate majority leader within the hour and having advised him that we were about to take up the continuing resolution, that we were hopeful to send it to him as clean as possible, with the hope, as the gentleman has expressed here, that that would signal to the other body that it also should pass a resolution as clean as possible rather than loading it down with many extraneous issues. The majority leader agreed with me, and that is one of the reasons why I wanted to inquire here and of the gentleman from Alabama, who is here on the floor and who is the ranking minority member on the Defense Appropriations Committee as to what prospects he sees for our House Subcommittee

on Defense Appropriations or the full committee acting in accordance with the dialog that has just taken place between the gentleman from Massachusetts and myself.

Mr. CONTE. I yield to my good friend, the gentleman from Alabama (Mr. EDWARDS).

Mr. EDWARDS of Alabama. I thank the gentleman for yielding.

Mr. Speaker, it is the intention of the Subcommittee on Defense to start its markup on September 28. It would be our hope and our expectation that we would finish that markup the week of the 28th. It is the intention of the full committee to receive that report the following week, assuming we are in session until the 8th, and to report the bill then to the House, which then would fulfill the requirement that the gentleman from Massachusetts just spoke about and would then allow us to use that number for the Defense number.

Mr. MICHEL. If the gentleman will yield further, is there any likelihood of the House itself having the opportunity to vote or to consider the Defense appropriation bill before we recess for the election? Or would the gentleman from Massachusetts care to answer that.

Mr. CONTE. I doubt that very much. We have, I understand, scheduled for full committee Wednesday the HHS bill. As the gentleman knows, being a former member of that subcommittee, that is a gigantic bill. And if the House could digest that one, it would be really quite an accomplishment. So I do not see how we could ever get to that point. Does the gentleman from Alabama agree with me?

Mr. EDWARDS of Alabama. I agree with that 100 percent.

Mr. MICHEL. I thank the gentleman.

Mr. WHITTEN. Mr. Speaker, I yield 4 minutes to the gentleman from Kentucky (Mr. NATCHER).

Mr. WAXMAN. Mr. Speaker, will the gentleman yield?

Mr. NATCHER. I yield to the distinguished gentleman from California.

Mr. WAXMAN. I thank the gentleman for yielding.

Mr. Speaker, a number of health programs have received additional funding during the year through supplemental appropriations. I have in mind such programs as community health centers—which received supplemental money in Public Law 97-216—and the childhood immunization program—which was supplemented in Public Law 97-257.

Is it the committee's intent that these adjusted increased levels be considered the current rate for the purposes of continuation under this resolution?

Mr. NATCHER. Mr. Speaker, the gentleman is correct. We have had several supplementals in addition to the basic continuing resolution for 1982. All increases and all programs adopted in those supplementals become a part of the current rate for purposes of the 1983 resolutions which is before us. I know the gentleman from California is very much concerned about the increases that have taken place in the maternal and child health program, the childhood immunization program and venereal disease program.

These increases, Mr. Speaker, as you well know, were in one or more of the supplementals. They are now included in the current operating level for purposes of section 101(b) of House Joint Resolution 599.

Mr. WAXMAN. If the gentleman will yield further for one other clarification, some programs—such as the tuberculosis control and AIDS research programs—received their initial specific appropriations for 1982 under supplemental appropriations bills.

Is it the committee's intent that these programs be continued?

Mr. NATCHER. The gentleman is correct, Mr. Speaker, that they not only be continued, but at the rate set forth in the supplemental. The gentleman is correct.

Mr. WAXMAN. I want to thank the chairman for his efforts and for his support for these and other important health programs, and for yielding to me for this clarification.

Mr. CONTE. Mr. Speaker, will the gentleman yield?

Mr. NATCHER. I yield to the distinguished gentleman from Massachusetts.

Mr. CONTE. Mr. Speaker, I would like to join with what the gentleman from Kentucky (Mr. NATCHER), my good friend, has said. This continuing resolution is meant to keep the Labor-HHS programs operating at the current levels, including supplementals, and to continue programs funded for the first time in supplementals at their current levels as well. I agree with his interpretation.

Mr. ROYBAL. Mr. Speaker, will the gentleman yield?

Mr. NATCHER. I yield to the distinguished gentleman from California, a member of the committee.

Mr. ROYBAL. I thank the gentleman for yielding, and I seek this time to make inquiries with regard to refugee assistance.

Mr. Speaker, section 101(b) provides continuing authority under current terms and conditions and at a rate to maintain current operating levels for Labor, HHS and Education programs, including all of those related to refugee assistance.

With regard to cash and medical assistance provided to refugees, our committee has stated clearly that the Federal Government is responsible for 100-percent reimbursement of all eligible costs. Mr. Speaker, the State of California is faced with the possibility of a significant shortfall and is currently trying to resolve this matter with Social Security Administration officials.

If it is determined that a shortfall does in fact exist, am I correct in stating that the statutory language of the continuing resolution allows the administration to pay all legitimate costs incurred by California under the cash and medical assistance program?

Mr. NATCHER. Mr. Speaker, the gentleman's understanding is correct.

Mr. ROYBAL. I thank the gentleman. May I also make the following inquiry: Am I also correct in stating that the continuing resolution provides authority to extend currently funded employment and training assistance programs, including the farmworker housing program?

Mr. NATCHER. The gentleman is correct, Mr. Speaker.

Mr. ROYBAL. I thank the gentleman.

□ 1450

Mr. WHITTEN. Mr. Speaker, I yield 3 minutes to the gentleman from Texas (Mr. PICKLE).

Mr. PICKLE. Mr. Speaker, we are here today, as we are about this same time every, to pass a continuing resolution to fund the operation of our Government.

I do not intend to try to place blame. There is plenty to go around, I think, and we all share it. But I think we all agree that there is no excuse for this continuation. To fall back time and again on the inefficient, politically painless continuing resolution process—particularly when our Nation is in the midst of an economic crisis—is an abdication of our authority, and our responsibility.

Historically, traditionally, and philosophically, it is the right and responsibility of the Congress to govern the appropriations process. Ah—but the tail has come to wag the dog. We no longer rule the appropriations process, it rules us. Or at least we hide from it, frightened of the tough decisions and the controversial votes a thorough, thoughtful, comprehensive approach requires.

The continuing resolution is a pressurized quick-fix, and nothing more. It has no long-term value, and it is truly counterproductive making long-term solutions and long-term planning, and cogent Government administration all but impossible.

We all know that deep down. But it is so much easier when the end of the year rolls around to look over our shoulders and quickly pass a "continuing" than to admit that we have been able to deal with the budget that the years begin to run together, and we forget how really irresponsible we have become.

Do you know the last time we passed a budget and then followed it through? I am not talking about a "budget resolution," I am talking about working through the whole process.

Well the last time we did our work without falling back on a continuing resolution was in 1976—and we only accomplished that much because it was the first full year of the new budget process under the new fiscal year.

Mr. Speaker, we must stop this process. I do not blame the Appropriations Committee alone. that blame must be shared by the Budget and Tax Committees—and by the entire Congress. The budget debate this year took some 5 months of our time, and the Appropriations Committee could not act. I do not speak for any specific public works project, or a defense matter, or agriculture or education. I say that we must stop this easy continuing process.

Last year I introduced H.R. 5102 which will require a two-thirds majority vote in both bodies of Congress before the continuing appropriations process could be used to fund everyday operations of Government, with exceptions for national emergencies.

I shall reintroduce this resolution early next session and I ask my colleagues to join me in limiting the use of a continuing resolution. If we do not stop this indiscriminate use of the continuing resolution, we will destroy the appropriations process—and the committee system.

Mr. CONTE. Mr. Speaker, I yield 3 minutes to the gentleman from Oklahoma (Mr. EDWARDS).

Mr. EDWARDS of Oklahoma. Mr. Speaker, I rise to bring to the attention of my colleagues some language in the resolution that may be setting a dangerous precedent and which may be questionable on constitutional grounds.

The section I refer to deals with the defense appropriations and it states that the defense appropriations will continue at the 1982 levels until the 1983 Defense Appropriation Act "is reported in or subsequently passed by the House of Representatives * * *."

What this section does is delegate to a subunit of Congress—the Appropriations Committee—the authority to set an appropriations level without also establishing a standard or a level beyond which those funds may not be appropriated. In my mind, that raises two very important questions: First, is it appropriate for this House to delegate to a single committee the authority to set appropriations levels without standards or with standards to be set in the future?

The second question deals with the constitutionality of the delegation of legislative power. Can the Congress, which is given in the Constitution the power to make appropriations, legally delegate that authority to one of its committees?

The prevailing rule of law is that the courts will sustain a delegation of lawmaking power by the Congress so long as that delegation is accompanied by a limiting standard; and as we have seen, there is no limiting standard provided in this legislation.

Had we had a rule that permitted amendments I would have offered an amendment to change that provision. I am philosophically bothered by the concept of removing from 380 Members of the House the right to vote on this appropriation.

I understand the argument that when we pass this resolution the entire House is voting to give that power to the Appropriations Committee but as my colleagues can see there is nobody on the floor. There are very few Members who know this provision is in this bill, and that is why I rise to call it to the attention of the committee.

Mr. WHITTEN. Mr. Speaker, I yield 2 minutes to the gentleman from California (Mr. FAZIO).

Mr. FAZIO. Mr. Speaker, I rise in support of the joint resolution.

Mr. Speaker, in section 101(e) this resolution incorporates the appropriations and provisions contained in H.R. 7073, the legislative branch appropriations bill for fiscal year 1983. I would like to explain that bill to the House.

Mr. Speaker, it is a privilege for me to present the legislative branch appropriation bill for fiscal year 1983 to the House. At the outset, I would like to express my thanks to the other members of the subcommittee for their help and support throughout the hearings and markup process. The members of the subcommittee have included Mr. MURTHA of Pennsylvania; Mr. TRAXLER of Michigan; the late Mr. Benjamin of Indiana; Mr. BURGENER of California, who has been very helpful in his position as ranking minority member; Mr. CONTE of Massachusetts, the ranking minority member of the full Appropriations Committee; Mr. LEWIS of California; Mr. CAMPBELL of South Carolina; and of course, Mr. WHITTEN of Mississippi, who, as chairman of the Committee on Appropriations, is an ex-officio member of the subcommittee.

I especially want to note the contributions and cooperation by my friend and colleague, CLAIR BURGENER. This will be his last term in Congress—he is retiring at the conclusion of this session—and he will be missed. CLAIR is a former member of the California Legislature—a pathway to the House identical to the one I took—and has distinguished himself and his constituents with his representation of the great city of San Diego both in Sacramento and here in the U.S. Congress. During the past several years, he and I have worked closely on legislative branch appropriations and on other matters of concern to Californians and the country. In all cases, his counsel has been invaluable and constructive. I will feel a deep personal loss at his departure, and wish him well for the future.

Mr. Speaker, I want to mention our recently deceased colleague, Adam Benjamin, Jr., of Indiana, who has been a member of our subcommittee since the beginning of the 95th Congress and was my predecessor as subcommittee chairman, a position he filled during the 96th Congress. Adam Benjamin was a highly effective Member of Congress, and a great friend. I have not heard of a Member who worked harder or longer hours for his constituents or on his committee assignments. He gave me much useful advice in connection with legislative branch appropriation matters and was always available when needed. Adam was taken from his family and all of us at a relatively young age—but he accomplished a great deal in those years he had and we are all better off as a result. He will be missed, Mr. Speaker, and remembered.

RECOMMENDATIONS FOR FISCAL YEAR 1983

Mr. Speaker, the bill we are considering today contains appropriations for fiscal year 1983 totaling $1,084,808,000, of which $621,951,000 is for congressional operations. These figures exclude appropriations for the operation of the Senate in accord with the long-term practice under which each body determines its own housekeeping requirements.

The budget requests considered by the committee totaled $1,138,717,000. The recommendation is $53,909,000 less than was requested. This is a reduction of almost 5 percent under the amounts presented in the President's budget.

The overall appropriations recommended are $37,280,325 under the amounts appropriated in fiscal year 1982, the current year level. That is a 3.3-percent decrease in annual appropriations to the legislative branch. Even if there were no inflation—and the current rate is about 7 percent—we have actually reduced the size of the legislative budget. In the face of constant inflation over the past several years, this budget is far below the amount necessary to keep up with the pace of increases in prices and wages.

In general, very few increases for workload expansion have been allowed, and then only when the work of the Congress has so required or where we are trying to protect the taxpayers' investment in legislative branch resources. It has been the general policy of the committee to provide the funds necessary for employee cost-of-living pay raises and other mandatory items and for a selected number

of the increases made necessary because of rising prices. These increases have been offset by reductions in staffing, equipment, alterations, repairs, and in the effects of legislation.

The bill requires almost a 1-percent reduction in the projected level of legislative branch employment. We have allowed only 23 of 178 new jobs requested, but other cuts in the employment base will enable us to end up with 24 fewer jobs in the legislative branch than we now have authorized. But I believe we have been careful to insure that the essential operations necessary to support the Congress have been preserved.

At a time when the Federal budget presented by the administration is up by 4.4 percent, and while the budget resolution calls for an increase in budget authority between fiscal year 1982 and fiscal year 1983 of 5.7 percent, we are bringing a legislative branch budget to the House that will result in a reduction in spending authority and a reduction in work force.

We are actually reducing the employment base in the legislative branch and we are recommending a decline in both actual and real dollar terms in the overall budget of the legislative branch.

And this is not just a 1-year phenomenon, Mr. Speaker. Since 1979 the legislative branch appropriation has grown at an annual rate of only 4.1 percent, while the executive budget has grown at a 10-percent rate—all this during a time when annual inflation has been over 9 percent. The Federal budget has been growing at a rate 2½ times greater than the legislative branch budget. In the meantime, our budget has declined in real growth terms.

Mr. Speaker, we can tell the taxpayers that the legislative branch is participating completely—as a matter of fact we are showing the way—in the process of reducing Federal expenditures. Every Member of this body can report to his constituents that fiscal responsibility begins at home—here in the Halls of Congress.

At this point in the RECORD under permission which I have already obtained, I will insert a tabulation detailing the committee recommendations in comparative form:

COMPARATIVE STATEMENT OF NEW BUDGET (OBLIGATIONAL) AUTHORITY—LEGISLATIVE BILL (H.R. 7073) (AS REPORTED SEPTEMBER 9, 1982)

	Fiscal year—		Committee recommendation	Committee recommendation compared with—	
	1982 enacted	1983 estimates		Enacted	1983 estimates

REVENUE ACTIVITIES

The Members may be interested to know there are a number of revenue activities within the legislative branch which will return over $83 million before expenses to the Federal Government during fiscal year 1983. Included in this estimate is $2 million to the Capitol Power Plant in reimbursements for heating and air-conditioning, $11.5 million from copyright fees and the sale of catalog cards and publications by the Library of Congress, $6.9 million in gift and trust fund income, $52.6 million from the sale of Government documents through the Office of the Superintendent of Documents, and $10.7 million from various other reimbursable activities at the Library of Congress and Copyright Royalty Tribunal. Savings attributable to General Accounting Office activities total approximately $8.5 billion, which also have an offsetting effect on total Federal finances.

MAJOR ITEMS IN BILL

TITLE I—CONGRESSIONAL OPERATIONS

The bill provides a total of $621,951,000 for fiscal year 1983 for seven major areas of congressional or direct congressional support activity. These include the House of Representatives, joint items, the Office of Technology Assessment, the Congressional Budget Office, the Architect of the Capitol (except Senate and Library buildings and grounds), the Congressional Research Service, and congressional printing and binding.

HOUSE OF REPRESENTATIVES AND JOINT ITEMS

The allowance of $413,163,000 for the House and joint items for 1983 includes an amount of $348,775,000 for the operations of the House itself. The budget for the House is $31,611,325 less than the amount appropriated last year, primarily due to the transfer of the compensation of Members to a permanent appropriation, but also because of other reductions in contingent expenses and committee salaries and expenses. The combined total for the House and activities shared jointly with the Senate—so-called joint items—is $51,695,325, or 11 percent, less than the amount appropriated in fiscal year 1982.

RECOMMENDED REDUCTIONS

The total recommendation for congressional operations is $22,101,000 less than was requested. Included in this decrease is: A reduction of $1.6 million in funding requested for the special and select committees—due to actions already taken and approved by the House; a voluntary markdown of $135,000 in the Joint Committee on Printing budget; a reduction of $1,325,000 under the request of the Office of Technology Assessment; $2,152,000 less than requested by the Congressional Budget Office; the deferral of certain projects and other downward adjustments totaling $5,131,000 in the budget of the Architect; a reduction of $3,258,000 for the operation of the Congressional Research Service; and a reduction of $8,500,000 in congressional printing and binding.

TITLE II—OTHER AGENCIES

A total of $462,857,000 is recommended for the six agencies carried in title II of the bill. This allowance is an increase of $6,708,000—only 1.5 percent—over the current level of appropriations and $31,808,000 less than requested.

The agencies that are included in this title of the bill and the amounts recommended are as follows: First, Botanic Garden, $1,827,000; second, Library of Congress (except the Congressional Research Service), $169,828,000; third, Architect of the Capitol: For Library Building and Grounds, $5,071,000, and for Congressional Cemetery, $300,000; fourth, Copyright Royalty Tribunal, $449,000; fifth, Government Printing Office (except congressional printing and binding), $40,082,000; and sixth, General Accounting Office, $245,300,000.

Mr. Speaker, I will not attempt to discuss all of the recommendations made by the committee for the various agencies funded in this title of the bill, but I would like to mention a few. Our general policy has been to provide only the resources necessary to maintain activities at the current level or slightly below and to fund mandatory increases. Only 29 of the 178 additional staffing requested have been allowed. In addition, a reduction of 53 positions under current staffing has been made. Thus, we have reduced legislative branch employment by 24 positions under the level provided for last year and by 202 positions—almost 10 percent—under the level requested for fiscal year 1983.

We have provided $500,000 to begin a program to preserve Library of Congress collections using mass deacidification techniques and for special preservation treatment of the U.S. county atlas collection. The walkway approaches to the west front of the Capitol are in a deteriorating state and funds are provided for their replacement and related work. The bill also provides $300,000 for grants to be administered by the Architect of the Capitol to assist in the restoration and preservation of the historic portions of the Congressional Cemetery.

TITLE III—GENERAL PROVISIONS

Section 305 amends title 44 of the United States Code and is designed to make the funding of the international exchange program more equitable. This program, which has operated since the Treaty of Brussels in 1886, has been in serious jeopardy because of a decision by the Smithsonian Institution to withdraw financial support of the costs of distributing publications of the U.S. Government to those foreign countries who agree to exchange their own publications for ours. While funding was being withdrawn, several agencies including the State Department, U.S. Information Agency, Library of Congress, and others expressed a strong desire to continue the program because of the beneficial effects of information exchange. The change to title 44 will accomplish that objective and will provide that the publishing agency will be charged for the costs of printing, binding, and distribution of the publications that are eligible for the program. The change to title 44 also places tighter controls on the type and nature of publications of the U.S. Government that are subject to the international exchange agreement.

Section 307 provides that during fiscal year 1983, individuals in the legislative, executive, or judicial branches, or the District of Columbia government, may not receive a pay raise over their rate of pay on September 30, 1982, if their salary is set at a rate which is equal to or greater than level V of the Executive Schedule (currently frozen at $57,500 per annum), or to a percentage of such rate. There is also a limitation on bonuses paid to senior executive service personnel.

Section 307 provides for a pay freeze for high-level individuals in the legislative, executive, and judicial branches or in the government of the District of Columbia.

The first sentence of section 307 provides that the rate of pay will be frozen at the rate payable on September 30, 1982, which is the last day before the 1982 comparability adjustment is to take effect. It also defines in paragraphs (1) and (2) the individuals who are subject to the freeze. Under paragraph (1) any individual whose rate of pay is $57,500 or more—that is equal to or greater than level V of the Executive Schedule—is covered by the freeze. This paragraph covers those individuals whose rate of pay was directly affected by the 1977 quadrennial increase (such as judges, Members, Senators, heads and assistant heads of Cabinet departments), as well as individuals whose rate of pay is administratively set at rates above $57,500 (such as high-level positions in the Postal Service). This paragaph also covers those employees under the Administrative Office of the U.S. Courts whose rates of pay are tied specifically to the rates of pay of certain Federal judges.

Paragraph (2) covers those individuals whose rates of pay are at or will, as a result of this year's comparability adjustment, bump against a statutory—or other—salary ceiling on their rates of pay. For example, the statutory rate for a GS-18 is $61,300 but the payable rate is only $57,500 because of the statutory level V ceiling. Under this section the $57,500 ceiling is maintained. Section 307 also maintains existing ceilings on rates of pay for committee staffs, other officers and employees of the House and Senate, and for administrative assistants whose maximum rate of pay is limited by congressional resolution.

Paragraph (2) would also limit the rate of pay for some individuals who are currently paid less than the level V payable rate of $57,500. For example, a GS-16, step 2 employee presently makes $56,580. Under the amendment, he could not receive this October's entire comparability increase since his pay would be subject to the "frozen" $57,500 statutory ceiling. The parenthetical "(or a percentage of such maximum rate)" insures a freeze in rates of pay for those House committee staff employees whose rate is limited to 75 percent of level IV.

The amendment applies to individuals in all three branches, and thus includes individuals in the Senior Executive Service. The Office of Personnel Management has informally estimated that the freeze will apply to 24,833 individuals in the executive branch—as well as over 2,000 in the legislative and judicial branches—broken down as follows:

Executive branch:	
Currently at level V or above	18,503
Additional affected by frozen ceiling	6,330
Legislative branch and Judicial branch	2,000+

Under this section, the freeze is in effect for fiscal year 1983. If the freeze is to continue beyond fiscal year 1983, it will be necessary for Congress to enact a similar limitation of funds again next year.

Subsection (b) provides a special rule to cover positions which are created after September 30, 1982, and requires the appropriate officials in each branch to promulgate regulations to insure that the pay for such positions will be set at a rate equivalent to that for comparable positions which were in existence on September 30, 1982.

Subsection (c) continues the 20-percent limitation on the number of SES personnel or comparable personnel under other executive personnel systems who may be paid performance awards in fiscal year 1983.

Subsection (d) provides that the salary or pay actually paid to an employee, as a result of the application of the amendment, will serve as the basis for computing life insurance, retirement, and other benefits, rather than the higher statutory rate.

CONCLUSION

Mr. Speaker, these are the highlights of the fiscal year 1983 legislative branch appropriation bill. The committee report explains our actions in much more detail, and is available to all the Members of the House.

The committee has little discretion as far as the amounts for the House and the joint items of the Congress are concerned. Salaries, allowances, and expenses of the Members, special and select committee funding and other items have been approved by the House and are already in effect through the adoption of House resolutions from the Committee on House Administration. Where the committee has discretion, it has been exercised.

As I noted earlier in my remarks, the committee is recommending an overall reduction totaling $53,909,000 and only 23 of the 178 new positions requested have been allowed. Moreover, the level of legislative branch staffing will actually be less than the current level.

We are bringing a legislative branch budget to the House that is smaller in actual dollars than the current year by over $37 million.

We have trimmed the fat from the legislative branch and have made a conscious effort to stimulate increases in productivity.

We have no apologies to make in voting for this budget, Mr. Speaker.

This is a good bill and one I think all the Members can support and identify with during this period of extreme budget austerity

I recommend that it be approved.

Mr. Speaker, I would also like to engage in a brief colloquy with the gentleman from California (Mr. ROYBAL).

Mr. Speaker, section 110 of House Joint Resolution 599 provides for a cap on Federal Wage Board employees similar to that placed on the Government's Class Act employees.

However, provisions were made in Public Law 92-392, House Report No. 92-339 of the 92d Congress that periodic surveys were to be made in our private sector of the pay of supervisory wage employees to be used to adjust the pay of the Federal Government's Wage Board Supervisors.

The first survey has now been made and the Office of Personnel Management has stipulated in the Federal Register, volume 47, No. 99 of May 21, 1982, the details for implementing the results of the survey.

It is my understanding that the provisions of section 110 of House Joint Resolution 599 do not in any way prohibit the implementation of the Wage Board supervisory study as detailed in the Federal Register.

[From the Federal Register, May 21, 1982]

OFFICE OF PERSONNEL MANAGEMENT—5 CFR PART 532—PREVAILING RATE SYSTEMS

Agency: Office of Personnel Management.

Action: Proposed Rulemaking.

Summary: The Office of Personnel Management is proposing regulations to implement the results of a study which it conducted of blue collar supervisory pay practices in private industry. The study results would be implemented by making certain changes in the grades of wage supervisors, and in the current pay formula which is used to compensate employees in these positions.

Date: Comments must be received by July 20, 1982.

Address: Send or deliver written comments to Mr. Jerome D. Julius, Assistant Director for Pay Programs, Compensation Group, Room 3353, 1900 E Street, NW., Washington, D.C. 20415.

For further information contact: Mr. David Weisberg, (202) 632-5454.

Supplementary information: The current pay plan for supervisors of Federal trade, craft and labor occupations was established in December 1968, following a comprehensive study of supervisory practices in private industry. The formula which was adopted for setting Federal supervisors' pay closely followed the patterns of supervisory pay practices and pay differentials which were disclosed by the industry study.

The Federal wage system law (Pub. L. 92-392) requires that Government compensation practices be kept consistent with those which prevail in the private sector. A new supervisory study was therefore conducted in 1979 to determine whether the Government-wide system for supervisors was still reflective of industrial practices.

All industry data collected in the study were converted to equivalent grades under the Federal supervisory structure. The pay differentials of the industry positions were then compared with the differentials the positions would receive if they were paid from the average wage schedule in the Federal Government. The average Federal schedule was constructed in a manner which assured that the present restrictions on Federal pay which have been adopted as a matter of public policy would be applied to blue collar supervisors in the same fashion as they are applied to all other Federal employees. Differences between the Federal and industry pay differentials were weighted by the number of industry samples obtained at each grade. The comparison of these Federal and industry differentials is as follows:

COMPARISON OF SURVEY RESULTS WITH FEDERAL SUPERVISORY DIFFERENTIALS

[In percent]

	Survey results	Federal differentials	Adjustment indicated [1]
Grade:			
WS-1[2]	53	39	+14
WS-2[2]	37	44	−7
WS-3[2]	21	36	−15
WS-4[2]	34	40	−6
WS-5[2]	37	37	None
WS-6[2]	28	36	−8
WS-7[2]	39	38	+1
WS-8[2]	30	31	−1
WS-9[2]	32	33	−1
WS-10[2]	33	31	+2
WS-11[3]	47	40	+7
WS-12[3]	51	42	+9
WS-13[3]	39	37	+2
WS-14[3]	58	50	+8
WS-15[3]	74	51	+23
WS-16[3]	70	59	+11
WS-17[3]	79	63	+16

Differential results for positions in grades WS-1 through WS-10, and WS-11 through WS-17, respectively, were analyzed separately because both current Federal pay setting procedures and the survey results differ significantly for positions in grades WS-1 through WS-10, compared with those in grades WS-11 through WS-17. The preceding Table indicates that positions in the Federal Government in grades WS-1 through WS-10 receive pay differentials over their nonsupervisory subordinates which exceed private sector differentials by a little less than one percent. Positions in the Federal Government in grades WS-11 through WS-17, however, trail private industry differentials by approximately 7.6 percent. In the Federal Government most Foreman positions are in grades WS-1 through WS-10, and most General Foreman positions are in grades WS-11 through WS-17.

OPM Proposes to achieve overall comparability with private industry for the range of supervisory positions in grades WS-11 through WS-17 by raising all General Foreman positions one grade, and changing the linkage point for WS-19 and the current supervisory pay formula from GS-14/1 to GS-14/3. For economic reasons, this will be accomplished over a two-year period on a wage area-by-wage area basis. During the first year, the WS-19 linkage point will be changed from GS-14/1 to GS-14/2. In the second year of implementation, all General Foreman positions will receive a one grade increase concurrent with the completion of the WS-19 linkage adjustment from GS-14/2 to GS-14/3. The Staffing Services Group of OPM will raise the General Foreman grades by revising the wage supervisor job-grading standard; the linkage change will be accomplished by changing the reference to "minimum" rate in regulation 5 CFR 532.203(d)(2) to the "second" rate in the first year of implementation, and to the "third" rate to the second year of implementation. No changes are proposed for Foreman positions in grades WS-1 through WS-10 whose current pay differentials correspond closely to industry practice.

The General Foreman—GS-14/3 linkage adjustment which OPM is proposing will, when completed, eliminate the lag observed in the supervisory study for all positions in grades WS-11 through WS-17. The increases which would result from the OPM proposal are targeted primarily to the General Foreman positions in those grades. General Foremen in grades WS-11 through WS-17 currently receive pay differentials which are 15 percent less than private industry. The OPM proposal would reduce the pay differential lag for General Foreman positions in these grades to 2 percent.

OPM wishes comments on its proposal to change the current WS-19 linkage point in conjunction with increasing the grade of General Foreman positions. We will also consider any other suggestions for implementing the supervisory study results. These could take the form of a new or revised supervisory pay formula, or some different approach which would serve to carry out the survey findings. If this proposed regulation is ultimately issued as a final regulation, it will be revised after one year to complete the WS-19 linkage adjustment from GS-14/2 to GS-14/3.

Mr. ROYBAL. Mr. Speaker, will the gentleman yield?

[1] Adjustment to average Federal schedule to reflect survey results.
[2] Weighted average difference WS-1—WS-10: −8%
[3] Weighted average difference WS-11—WS-17: +7.6%

Mr. FAZIO. I yield to the gentleman from California.

Mr. ROYBAL. Mr. Speaker, may I inform the gentleman since it is not the result of a general wage increase, the gentleman is correct, the implementation of the wage survey may take place.

Mr. FAZIO. I appreciate the comments of the gentleman.

□ 1500

Mr. WHITTEN. Mr. Speaker, I yield such time as he may consume to the gentleman from Alabama (Mr. BEVILL).

Mr. BEVILL. Mr. Speaker, the energy and water development appropriation bill is reflected in the continuing resolution at the House-reported level of funding or the current rate, whichever is lower.

Our approach is the same as that of the other subcommittees that have reported bills at this time, and that is to reflect the most current action in regard to funding levels and to maintain programs at their current levels pending final congressional action.

The subcommittee is recommending only two exceptions to this approach: First, in regard to the level of funding for Corps of Engineers—civil, operation, and maintenance, general, and the operation and maintenance activities funded in flood control, Mississippi River and tributaries, the funding in the resolution would be at the fiscal year 1983 recommended level. This is necessary to prevent closure of certain locks and dams and other actions that could be irreversible. The second exception is for the national security programs, which is about $1.1 billion above the current year level and $164 million below the request in the subcommittee-recommended bill. The additional funding is needed to continue production of seven weapons systems currently in production and one new system. Each of these systems has been approved for production by the President and reflects the planning of both the Carter and Reagan administrations. It also provides for additional nuclear materials production for future national security program requirements.

For the Federal Energy Regulatory Commission, it is the committee's intention that the program level is $89,100,000 for fiscal year 1983, the amount available before estimated revenues are deducted. For the Nuclear Regulatory Commission, the program level is $474,500,000 for fiscal year 1983, the amount available before estimated revenues are deducted.

The "Nuclear fuel cycle activities" appropriation account is new for fiscal year 1983. However, the committee's intention is that activities such as nuclear waste disposal efforts are continuing efforts and shall be funded at

the level provided in fiscal year 1982 under the energy supply, research, and development activities account.

The committee expects that all departments and agencies covered by the Energy and Water Development Appropriations Act, particularly the Department of Energy, will maintain staffing levels and program activities at least at the current level during the period of the continuing resolution so as to not prejudice any final congressional decisions on this Appropriation Act.

● Mrs. SCHROEDER. Mr. Speaker, section 124 writes new law on the subject of debt collection by the Federal Government against its own employees. As chairwoman of the Subcommittee on Civil Service, I can report that the subcommittee has been at work on coming up with a reasonable provision which meets the Government's legitimate interest in collecting debts owed by its own employees and which also addresses the serious concerns of Federal employees in safeguarding their due process rights. We were well along on this process when we found that the Appropriations Committee had usurped our jurisdiction and decided to write its own version in the law.

Quite apart from arguments based on the sanctity of jurisdictional assignments, this provision demonstrates why legislating should be left to the committees with jurisdiction over the subject matter. Section 124 might be considered a compromise since it neither meets the legitimate interests of the Government nor addresses the real concerns of employees. It is a poorly drafted provision which should be deleted.

Let me explain. Section 124 requires the Government to get a court order before it can withhold money from an employee's pay. The cost of going to court will frequently be greater than the amount of the debt. So, in essence, this provision is instructing the Government to write off small debts. Furthermore, the provision does nothing to overrule a line of Supreme Court cases holding that there can be no garnishment of employee's pay because such attachment would violate the doctrine of sovereign immunity. So, at best, this provision would allow the Government to collect a small portion of the debts owed to it by its employees; at worst, it would have no effect whatsoever.

From the employee's point of view, this provision provides no real protection. The cost of contesting in court would probably be high and the procedures arcane. It would be far better to have an administrative hearing mechanism. Further, this provision would allow for the deduction of 25 percent of pretax income, which could make it quite difficult for anyone to meet their mortgage payments. There is no right of the employee to try to negotiate a better payment schedule.

Additionally, this provision does nothing about the inability of private debtors to garnish from Federal employees. This is an issue which should be dealt with.

Unfortunately, the rule does not permit an amendment to this section. We cannot improve it and we cannot remove it. We have to rely on the other body to cure this bad provision. I hope they remove it.●

● Mr. SMITH of Iowa. Mr. Speaker, section 122 of this resolution prohibits the use of the funds provided under the resolution for any purpose contrary to the provisions of H.R. 3480, the Legal Services Corporation authorization measure passed by the House last year.

It is the intent of this committee that the Legal Services Corporation and its grantees spend these funds strictly in accordance with the terms of H.R. 3480 as if it were law, including section 4 which repeals the right to presumptive refunding hearings during the period that this resolution is in effect. One of the provisions of H.R. 3480 is that which repeals section 1011 of the present Legal Services Corporation Act and replaces it with a simple hearing requirement in the case of Corporation decisions that interrupt an ongoing grant. This committee intends that the Legal Services Corporation accord applicants for refunding constitutional due process, but no funds provided under this resolution are to be expended to insure any applicant any procedural rights that the applicant would not have if H.R. 3480 were enacted.●

● Mr. FRENZEL. Mr. Speaker, I know continuing resolutions are sometimes necessary and I vote for them when they are necessary.

However, a continuing resolution which contains nearly every appropriation we have is a little too much.

It is also too much that the Health and Human Services gets a special spending deal over all other departments.

Finally, it is much too much that this resolution is handled under a rule that reduces debate and prohibits amendments. The House ought to have more respect for its own processes, and more respect for the taxpayers' money.

The resolution ought to be defeated. We can do better.●

AMENDMENT OFFERED BY MR. WHITTEN

Mr. WHITTEN. Mr. Speaker, I offer an amendment.

The Clerk read as follows:

Amendment offered by Mr. WHITTEN: On page 7, line 20, strike "February 28, 1983" and insert in lieu thereof "December 15, 1982".

On page 8, line 13, strike "February 28, 1983" and insert in lieu thereof "December 15, 1982".

Mr. WHITTEN. Mr. Speaker, this amendment took form after consideration with the leadership of the House and others with regard to what might be the most convenient way to deal with the time limit. I repeat again that once a regular annual appropriations bill is agreed upon and signed into law, it comes out from under the continuing resolution, so that takes care of itself, or will in the future.

In discussing this with the several Members and with the leadership, it was thought that December 15 would not be in the way of any bill that we agree on. But it would provide some time to agree as to when it would be most convenient for the Members of the Congress to come back here to conclude our business.

Now, in the discussions which took place there was concern with the termination date in the reported resolution, and may I explain how that date was determined. Like my colleagues, I thought perhaps sine die adjournment would be a good date, because I was not trying to fix any specific date. I was just trying to get this show on the road. The time of adjournment is a matter which will have to be agreed on by the leadership on both sides of the Capitol. But after consultation with the House leadership and others, it was thought that if we put December 15, it would allow time. Everything has to be worked out, of course, between the House and the Senate, to allow time to determine what is the best time in order for us to come back and conclude our business. So for that reason I have offered this amendment and I hope you will go along with it. It does not drag out anything, but it just leaves it where the leadership can decide what is the best time to call us all back here; so on that basis, I hope you will go along with the amendment.

Mr. CONTE. Mr. Speaker, I yield back the balance of my time.

Mr. WHITTEN. Mr. Speaker, I yield back the balance of my time.

The SPEAKER pro tempore. Pursuant to House Resolution 596, the previous question is considered as having been ordered.

The question is on the amendment offered by the gentleman from Mississippi (Mr. WHITTEN).

The amendment was agreed to.

The SPEAKER pro tempore. The question is on the engrossment and third reading of the joint resolution.

The joint resolution was ordered to be engrossed and read a third time, and was read the third time.

MOTION TO RECOMMIT OFFERED BY MR. CONTE

Mr. CONTE. Mr. Speaker, I offer a motion to recommit.

The SPEAKER pro tempore. Is the gentleman opposed to the joint resolution?

Mr. CONTE. I am in its present form, Mr. Speaker.

The SPEAKER pro tempore. The Clerk will report the motion to recommit.

The Clerk read as follows:

Mr. CONTE moves to recommit House Joint Resolution 599 to the Committee on Appropriations, with instructions to that Committee to report the joint resolution back to the House forthwith, with the following amendments.

On page 19, after line 2, add a new section as follows:

SEC. 128. Notwithstanding section 102 of this joint resolution, and notwithstanding the termination date of section 307 (a), (b), and (d) specified in section 101(e) of this joint resolution, appropriations and funds made available and authority granted pursuant to this joint resolution shall be available from October 1, 1982, and shall remain available until (a) enactment into law of an appropriation for any project or activity provided for in this joint resolution, or (b) enactment of the applicable appropriation Act by both Houses without any provision for such project or activity, or (c) sine die adjournment of the second session of the Ninety-seventh Congress, which first occurs.

On page 9, in line 19, strike "102" and insert in lieu thereof "128".

On page 15, in line 2, strike "102" and insert in lieu thereof "128".

On page 17, in line 5, strike "102" and insert in lieu thereof "128".

On page 7, in line 11, after "102" insert "and section 128".

Mr. CONTE (during the reading). Mr. Speaker, I ask unanimous consent that the motion to recommit be considered as read and printed in the RECORD.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Massachusetts?

There was no objection.

Mr. Speaker, the issue before the House is as straight as an arrow, and for the majority leadership, it appears to be just about as painful.

Shall this Congress make very reasonable effort to complete the public's business?

The minority believes the answer is "yes," and that the date in this continuing resolution should be changed to sine die adjournment of this Congress.

The legislative record of this House is a disgrace.

Under the Constitution we originate appropriation bills.

Yet here it is, September 22, and the House has passed only four appropriation bills for fiscal 1983.

As of September 1, we had passed only one.

We will have a special session. We will consider and enact several more appropriation bills. The responsible thing to do is to extend this continuing resolution during the special session, making adjustments to rates and conditions at that time to reflect additional congressional action.

The majority has suddenly—and belatedly—recognized the wisdom of our position.

The resolution as initially drafted by the chairman terminated at sine die adjournment. Then, by direction of the majority leadership, and I am sure against his usual good judgment, the chairman changed the date to February 28.

Then the leadership, realizing they were giving the minority a legitimate opportunity to raise a legitimate issue, provided in the rule an amendment changing the date from February 28 to a date certain.

And the date has now been changed to December 15.

Frankly, this is almost as bad.

It does not make sense to run the continuing resolution to February 28. We will not have time between the start of the 98th Congress and February 28 to enact appropriation bills.

It does not make sense to run the continuing resolution to a date certain in 1982—say December 15.

What will happen if we are tied up on a controversial bill or issue on December 15? I understand the Judiciary Committee is bringing out the immigration bill. A lot of people want to see that bill acted upon. We could have many other bills up before us. We could have debate on the defense bill that will go days and days. Our health and human services bill may go for a long period of time.

We can finish our business. We can provide ourselves with some commonsense flexibility by going with a continuing resolution through sine die adjournment.

Legislative politics is difficult enough in this day and age. Let us not shoot ourselves in the foot again by ducking our responsibilities until February or binding ourselves to a fixed date in December.

I think the wise vote here is a vote for the motion to recommit, for a continuing resolution through sine die adjournment, and then let us get busy on the appropriations bills. There we will have a little flexibility. We can move forward or backward. If we want to get through here on the 8th, then we get everything done on the 8th. If we want to get through on the 20th of December, and believe me, of all the lameduck sessions that I have been in, the chairman, the gentleman from Mississippi, has been here a lot longer than I have, we will be here just before Christmas, maybe December 22 or December 23, battling away on some of these bills and you will have a little more time, a little more flexibility to handle that continuing resolution.

I hope the motion to recommit passes.

Mr. WHITTEN. Mr. Speaker, I rise in opposition to the motion.

May I say again that as chairman of the Appropriations Committee, I first put the date in there not with any desire to dictate to the House.

After conferring with the leadership and others and listening to various pros and cons, it was thought that if December 15 was agreed to, it would give more leeway to the Senate and the House leadership as to the remainder of the session.

There was opposition to putting it over until February and I have no strong desire to put it to that date, which would go into the next Congress.

I think it is much more sound to say December 15 and have a fixed date, which as I say, as others have said and I think is true, gives the leadership on both sides more leeway to determine when they wish us to come back for a limited time than it would if we did it the other way.

□ 1510

But if we did it the other way, the sine die way, it was thought it would create problems.

So why go through all that rigmarole? I think it is still better to follow the recommendations we received and make it December 15. Of course, this will have to be agreed to, in the final analysis, between the House and the Senate.

The SPEAKER pro tempore. Without objection, the previous question is ordered on the motion to recommit.

There was no objection.

The SPEAKER pro tempore. The question is on the motion to recommit.

The question was taken; and the Speaker pro tempore announced that the noes appeared to have it.

Mr. CONTE. Mr. Speaker, I object to the vote on the ground that a quorum is not present and make a point of order that a quorum is not present.

The SPEAKER pro tempore. Evidently a quorum is not present. Pursuant to the provisions of clause 5 of rule XV, the Chair announces that he will reduce to a minimum of 5 minutes the period of time within which a vote by electronic device, if ordered, will be taken on the question of passage of the joint resolution.

The Sergeant at Arms will notify absent Members.

The vote was taken by electronic device, and there were—yeas 188, nays 215, answered "present" 1, not voting 28, as follows:

Mr. PANETTA and Mr. WYDEN changed their votes from "yea" to "nay."

Mrs. HOLT and Messrs. SKELTON, LEACH of Iowa, and PATTERSON changed their votes from "nay" to "yea."

So the motion to recommit was rejected.

The result of the vote was announced as above recorded.

The SPEAKER pro tempore. The question is on the passage of the joint resolution.

The question was taken; and the Speaker pro tempore announced that the ayes appeared to have it.

RECORDED VOTE

Mr. PHILIP M. CRANE. Mr. Speaker, I demand a recorded vote.

A recorded vote was ordered.

The SPEAKER pro tempore. The Chair will remind the Members that this is a 5-minute vote.

The vote was taken by electronic device, and there were—ayes 242, noes 161, not voting 29, as follows:

[Roll No. 359]

Messrs. MARKEY, HERTEL, EVANS of Iowa, LEACH of Iowa, FISH, LENT, HORTON, RODINO, MATSUI, VOLKMER, and KOGOVSEK changed their votes from "aye" to "no."

So the joint resolution was passed.

The result of the vote was announced as above recorded.

A motion to reconsider was laid on the table.

□ 1540

REPORT ON RESOLUTION PROVIDING FOR FURTHER EXPENSES OF INVESTIGATIONS AND STUDIES BY COMMITTEE ON STANDARDS OF OFFICIAL CONDUCT IN 2D SESSION, 97TH CONGRESS

Mr. ANNUNZIO, from the Committee on House Administration, submitted a privileged report (Rept. No. 97-852) on the resolution (H. Res. 568) providing amounts from the contingent fund of the House for further expenses of investigations and studies by the Committee on Standards of Official Conduct in the 2d session of the 97th Congress, which was referred to the House Calendar and ordered to be printed.

REMOVAL OF NAME OF MEMBER AS COSPONSOR OF HOUSE JOINT RESOLUTION 533

Mr. RODINO. Mr. Speaker, I ask unanimous consent that the name of the gentleman from North Carolina (Mr. ANDREWS) be removed from the list of cosponsors of House Joint Resolution 533.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from New Jersey?

There was no objection.

NATIONAL BUREAU OF STANDARDS AUTHORIZATION ACT FOR FISCAL YEAR 1983

Mr. FUQUA. Mr. Speaker, I ask unanimous consent to take from the Speaker's table the Senate bill (S. 2271) to authorize appropriations to the Secretary of Commerce for the programs of the National Bureau of Standards for fiscal year 1983, and for other purposes, with Senate amendments to the House amendment thereto, and concur in the Senate amendments to the House amendment.

The Clerk read the title of the Senate bill.

The Clerk read the Senate amendments to the House amendment as follows:

Page 2, lines 12 and 13, of the House engrossed amendment, strike out "(a)(1) not less than $1,000,000 shall be available for the "Office of Weights and Measures";" and insert "(a)(4) not less than $3,000,000 shall be available for "Metals Processing";".

Page 2, lines 22 and 23, of the House engrossed amendment, strike out "'Discrete Process Technology (Robotics)'." and insert "'Robotics Research and Development'.".

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Florida?

There was no objection.

A motion to reconsider was laid on the table.

APPOINTMENT OF ADDITIONAL CONFEREE TO S. 2852, SALLIE MAE TECHNICAL AMENDMENTS ACT OF 1982

Mr. SIMON. Mr. Speaker, I ask unanimous consent that the Speaker may have authority to appoint one additional conferee to the Senate bill, S. 2852. One of the conferees was accidentally left off. I ask that one additional name be designated.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Illinois?

Mr. MARTIN of New York. Mr. Speaker, reserving the right to object, may I inquire of the gentleman as to whether or not the minority had been consulted with respect to this?

Mr. SIMON. Mr. Speaker, will the gentleman yield?

Mr. MARTIN of New York. I yield to the gentleman.

Mr. SIMON. Frankly, they were consulted about the names in advance. When the names were submitted to the Speaker, that one name was left off. It was inadvertent, an accident, just a clerical error.

Mr. MARTIN of New York. Mr. Speaker, I withdraw my reservation of objection.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Illinois? The Chair hears none and, without objection, appoints the gentleman from Michigan (Mr. FORD) as an additional conferee to be listed after the gentleman from Illinois (Mr. SIMON).

There was no objection.

REMOVAL OF NAME OF MEMBER AS COSPONSOR OF H.R. 3722

Mr. ECKART. Mr. Speaker, I ask unanimous consent that my name be removed from the list of cosponsors of H.R. 3722.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Ohio?

There was no objection.

PERMISSION FOR COMMITTEE ON APPROPRIATIONS TO HAVE UNTIL MIDNIGHT TO FILE REPORT ON BILL MAKING APPROPRIATIONS FOR TREASURY DEPARTMENT, U.S. POSTAL SERVICE, EXECUTIVE OFFICE OF THE PRESIDENT AND CERTAIN INDEPENDENT AGENCIES, FISCAL YEAR 1983

Mr. ROYBAL. Mr. Speaker, I ask unanimous consent that the Committee on Appropriations may have until midnight tonight to file a privileged report on a bill making appropriations for the Treasury Department, U.S. Postal Service, Executive Office of the President and certain independent agencies for the fiscal year ending September 30, 1983, and for other purposes.

Mr. MILLER of Ohio reserved all points of order on the bill.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from California?

There was no objection.

PROVIDING FOR CONSIDERATION OF H.R. 6173, HEALTH PLANNING BLOCK GRANT ACT OF 1982

Mr. HALL of Ohio. Mr. Speaker, by direction of the Committee on Rules, I call up House Resolution 594 and ask for its immediate consideration.

The Clerk read the resolution, as follows:

H. RES. 594

Resolved, That upon the adoption of this resolution it shall be in order, section 402(a) of the Congressional Budget Act of 1974 (Public Law 93-344) to the contrary notwithstanding, to move that the House resolve itself into the Committee of the Whole House on the State of the Union for the consideration of the bill (H.R. 6173) to amend the Public Health Service Act to re-

place title XV of such Act with a block grant to States for health planning, and the first reading of the bill shall be dispensed with. After general debate, which shall be confined to the bill and shall continue not to exceed one hour, to be equally divided and controlled by the chairman and ranking minority member of the Committee on Energy and Commerce, the bill shall be read for amendment under the five-minute rule. In lieu of the amendment in the nature of a substitute recommended by the Committee on Energy and Commerce now printed in the bill, it shall be in order to consider an amendment in the nature of a substitute consisting of the text of the bill H.R. 7040 as an original bill for the purpose of amendment under the five-minute rule, and each section of said substitute shall be considered as having been read. At the conclusion of the consideration of the bill for amendment, the Committee shall rise and report the bill to the House with such amendments as may have been adopted, and any Member may demand a separate vote in the House on any amendment adopted in the Committee of the whole to the bill or to the amendment in the nature of a substitute made in order as original text by this resolution. The previous question shall be considered as ordered on the bill and amendments thereto to final passage without intervening motion except one motion to recommit with or without instructions.

The SPEAKER pro tempore. The gentleman from Ohio (Mr. HALL) is recognized for 1 hour.

Mr. HALL of Ohio. Mr. Speaker, I yield the customary 30 minutes to the gentleman from Tennessee (Mr. QUILLEN) for purposes of debate only, pending which I yield myself such time as I may consume.

Mr. Speaker, House Resolution 594 is an open rule providing for the consideration of H.R. 6173, the Health Planning Block Grant Act of 1982.

The rule provides for 1 hour of general debate to be equally divided and controlled by the chairman and ranking minority member of the Committee on Energy and Commerce. The rule also provides for one motion to recommit with or without instructions.

It should be noted that the rule waives a point of order against the bill under section 402(a) of the Congressional Budget Act. Section 402(a) provides that it shall not be in order to consider any bill which authorizes the enactment of new budget authority for a fiscal year unless that bill has been reported on or before May 15 preceding the beginning of such fiscal year.

By unanimous consent, the House extended the May 15 reporting deadline to May 17 for bills authorizing new budget authority for fiscal year 1983.

As introduced, H.R. 6173 would authorize the enactment of new budget authority for fiscal year 1983. Since it was not reported on or before May 17, 1982, it would be subject to a point of order under section 402(a) of the Budget Act. The Rules Committee has been advised that the House Budget Committee supports a waiver of section 402(a) so that H.R. 6173 can be considered by the House before adjournment in October.

The rule further makes in order an amendment in the nature of a substitute consisting of the text of H.R. 7040. The text of the bill H.R. 7040 is to be considered as an original bill for purposes of amendment, and each section of this substitute shall be considered as having been read. The text of H.R. 7040 shall be made in order in lieu of the amendment in the nature of a substitute recommended by the Energy and Commerce Committee and now printed in the bill.

Mr. Speaker, this rule facilitates the consideration of the compromise health planning legislation developed by bipartisan members of the Energy and Commerce Committee. Under the provisions of H.R. 7040, the project grant program of title XV of the Public Health Service Act is repealed and a new block grant is established under title XIX. However, the block grant still will fund State planning agencies and regional health planning agencies as the ultimate grantees, but through the States and at the discretion of the States themselves.

I am not aware of any opposition to the rule on H.R. 6173, and I would urge my colleagues to adopt it.

□ 1550

Mr. QUILLEN. Mr. Speaker, I yield myself as much time as I may use.

Mr. Speaker, this rule has been ably explained. It is time for action. I support the rule. We should get down to business and discuss the measure itself.

The administration opposes enactment of H.R. 6173, which will continue mandated certificate-of-need program requirements for the States. The opposition notwithstanding, I think that we should fully debate the measure.

I urge the adoption of the rule.

Mr. Speaker, I have no requests for time, and I yield back the balance of my time.

Mr. HALL of Ohio. Mr. Speaker, I move the previous question on the resolution.

The previous question was ordered.

The SPEAKER pro tempore. The question is on the resolution.

The question was taken; and the Speaker pro tempore announced that the ayes appeared to have it.

Mr. MARTIN of New York. Mr. Speaker, I object to the vote on the ground that a quorum is not present and make the point of order that a quorum is not present.

The SPEAKER pro tempore. Evidently a quorum is not present.

The Sergeant at Arms will notify absent Members.

The vote was taken by electronic device, and there were—yeas 380, nays 7, not voting 45, as follows:

Mr. JOHNSTON changed his vote from "nay" to "yea."

So the resolution was agreed to.

The result of the vote was announced as above recorded.

A motion to reconsider was laid on the table.

PROVIDING FOR CONSIDERATION OF H.R. 6457, HEALTH RESEARCH EXTENSION ACT OF 1982

Mr. HALL of Ohio. Mr. Speaker, by direction of the Committee on Rules, I call up House Resolution 595 and ask for its immediate consideration.

The Clerk read the resolution, as follows:

H. RES. 595

Resolved, That upon the adoption of this resolution it shall be in order, section 402(a) of the Congressional Budget Act of 1974 (Public Law 93-344) to the contrary notwithstanding, to move that the House resolve itself into the Committee of the Whole House on the State of the Union for the consideration of the bill (H.R. 6457) to amend the Public Health Service Act to revise and extend the authorities under that Act relating to the National Institute of Health and the national research institutes, and for other purposes, and the first reading of the bill shall be dispensed with. After general debate, which shall be confined to the bill and shall continue not to exceed one hour, to be equally divided and controlled by the chairman and ranking minority member of the Committee on Energy and Commerce, the bill shall be read for amendment under the five-minute rule, and each section of the bill shall be considered as having been read. At the conclusion of the consideration of the bill for amendment, the Committee shall rise and report the bill on the House with such amendments as may have been adopted, and the previous question shall be considered as ordered on the bill and amendments thereto to final passage without intervening motion except one motion to recommit.

□ 1610

The SPEAKER pro tempore. The gentleman from Ohio (Mr. HALL) is recognized for 1 hour.

Mr. HALL of Ohio. Mr. Speaker, I yield the customary 30 minutes to the gentleman from Tennessee (Mr. QUILLEN) for purposes of debate only, pending which I yield myself such time as I may consume.

Mr. Speaker, House Resolution 595 provides for the consideration of H.R. 6457, the Health Research Extension Act of 1982. The resolution provides for 1 hour of general debate. It is an open rule, allowing any germane amendment to be offered under the 5-minute rule.

In addition, the rule provides for a waiver of points of order under section 402(a) of the Budget Act—prohibiting consideration of authorizations not reported by May 15 preceding the beginning of the fiscal year for which they are effective—against the bill. This waiver was recommended in a letter to the chairman of the Rules Committee from the chairman of the Budget Committee in order to facilitate consideration of the bill before the end of the Congress.

Finally, Mr. Speaker, the rule provides a simple motion to recommit.

Mr. Speaker, no one in the Chamber needs to be reminded of the distinguished record of the National Institutes of Health, the foremost research unit of its type in the world. H.R. 6457 authorizes funding for the next 3 fiscal years for the two largest Institutes, the National Cancer Institute and the Heart, Lung, and Blood Institute, and makes needed revisions in the enabling legislation of the other nine Institutes. In addition, the bill provides for the establishment of a new Arthritis Institute. A separate arthritis unit will bring needed attention to this important and all too common disease.

Mr. Speaker, I urge my colleagues to adopt this rule and ask my colleagues to initiate its consideration by swift passage of the rule before us.

Mr. QUILLEN. Mr. Speaker, I yield myself such time as I may use.

Mr. Speaker, we all know how important health research is. I have had a number of communications urging support for this measure, although there is opposition in some circles. That opposition can be expressed when the bill is debated on the floor of the House.

Mr. Speaker, it is a good rule and should be adopted. I urge its adoption and yield back the balance of my time.

Mr. HALL of Ohio. Mr. Speaker, I move the previous question on the resolution.

The previous question was ordered.

The resolution was agreed to.

A motion to reconsider was laid on the table.

OCEAN AND COASTAL RESOURCES MANAGEMENT AND DEVELOPMENT BLOCK GRANT ACT

Mr. JONES of North Carolina. Mr. Speaker, I move that the House resolve itself into the Committee of the Whole House on the State of the Union for the consideration of the bill (H.R. 5543) to establish an Ocean and Coastal Resources Management and Development Fund and to require the Secretary of Commerce to provide to coastal States national ocean and resources management and development block grants from sums in the Fund.

The SPEAKER pro tempore. The question is on the motion offered by the gentleman from North Carolina (Mr. JONES).

The question was taken; and the Speaker pro tempore announced that the ayes appeared to have it.

Mr. RUSSO. Mr. Speaker, I object to the vote on the ground that a quorum is not present and make the point of order that a quorum is not present.

The SPEAKER pro tempore. The Chair will count. Two hundred and eighteen Members are present, a quorum.

So the motion was agreed to.

IN THE COMMITTEE OF THE WHOLE

Accordingly the House resolved itself into the Committee of the Whole House on the State of the Union for the consideration of the bill, H.R. 5543, with Mr. SIMON in the chair.

The Clerk read the title of the bill.

The CHAIRMAN. Pursuant to the rule, the first reading of the bill is dispensed with.

Under the rule, the gentleman from North Carolina (Mr. JONES) will be recognized for 30 minutes, and the gentleman from Washington (Mr. PRITCHARD) will be recognized for 30 minutes.

The Chair recognizes the gentleman from North Carolina (Mr. JONES).

Mr. JONES of North Carolina. Mr. Chairman, I yield myself such time as I may consume.

Mr. Chairman, I rise to support H.R. 5543, to establish an ocean and coastal resources block grant program. This bill would take a small portion of future increases from Outer Continental Shelf oil and gas revenues and share those funds with coastal States. Reasons to support the bill include:

First, it is fair. coastal States will finally have a small share of revenues attributable to extraction of oil and gas from Federal offshore lands; other States for years have shared, under the Mineral Leasing Act and other laws, huge sums from extraction of resources from Federal lands.

Second, it will help us accelerate Outer Continental Shelf oil and gas development by reducing conflicts between State and Federal Governments.

Third, it will help States maintain renewable natural resources that might otherwise be harmed by Outer Continental Shelf development.

Fourth, it is consistent with New Federalism.

Mr. Chairman, it is vital that we reduce the conflicts over Outer Continental Shelf development between the State and Federal Governments. If we do not, we not only lose energy development on the Outer Continental Shelf, but we cause expanded budget deficits.

This House should know that the administration's budgets estimate that from 1983 through 1986, its Outer Continental Shelf program will generate revenues $22 billion above the program of the prior administration. That $22 billion figures prominently in the President's budgetary projections and in his program for economic recovery. But let us not kid ourselves. These projections will never be reached, and the deficit will be swollen further as a result, so long as the States continue to oppose Secretary Watt's program for accelerated Outer Continental Shelf development.

How can we reduce this conflict and thereby accelerate Outer Continental Shelf production and hold down the deficit? We certainly will not reduce these conflicts by following the administration's desire to terminate the coastal zone management program, the coastal energy impact program, and the national sea grant college program. These programs help the States cope with Outer Continental Shelf development. Terminating them is totally inconsistent with the policy of increased offshore development.

In reviewing the many complex components involved in the question of Federal-State relations, offshore energy development, and the protection of renewable ocean and coastal resources, it became clear to the committee that a legislative remedy was necessary.

I am proud to bring before the House today that legislative remedy—H.R. 5543. It is a product of long and arduous consideration and it is based in the future growth of Outer Continental Shelf revenues—not on any moneys presently in the Treasury. The fund established by the legislation contains a ceiling of $300 million annually. In effect, it is based on less than 2 percent of anticipated 1983 Outer Continental Shelf revenues—less than 2 percent. This fund would serve two purposes: Continuation of the highly cost-effective national sea grant college program and the awarding of block grants to coastal States for coastal management, fisheries and national resource management purposes.

In sponsoring this legislation, the chairman of the Oceanography Subcommittee, Congressman D'AMOURS, and I have been joined by 54 of our colleagues. Additionally, the bill has the support of at least 20 individual Governors and the support of the New England Governors' Association, the Western Governors' Association, the Southern Governors' Association and the National Governors' Conference. There is broad grassroots support from local governments, private associations, and individuals.

Mr. Chairman, our Outer Continental Shelf program is critical for the further development of domestic sources of energy. The revenues accruing to the Federal Government are also essential to reduce the deficit. Neither of these results will occur unless and until we establish a strong and firm partnership with coastal States in the management of ocean resources. Our legislation will help accelerate the offshore program and reduce deficits by increasing revenues to the Federal Government and, at the same time, provide the necessary mechanisms for protection of important environmental resources along the coast. H.R. 5543 is a timely and thoroughly considered bill with solid and proven support from our coastal States and local Governors. I urge the support of my colleagues for final passage.

Mr. Chairman, the rules of the House prohibit Members from cosponsoring legislation after a bill has been reported by a committee. However, because of the growing interest in H.R. 5543, a number of Members have asked to be added to the bill since the committee reported it on May 20, 1982. Therefore, in fairness to those Members who wish to be associated with the ocean and coastal resources block grant legislation, I hereby submit the following list of 56 Members who have indicated their intention to cosponsor the legislation: Mr. JONES of North Carolina; Mr. D'AMOURS; Mr. EMERY; Mr. HUGHES; Mr. SUNIA; Mr. HEFTEL; Mr. GEJDENSON; Mrs. HOLT; Mr. BROOKS; Mr. CHAPPELL; Mrs. BOUQUARD; Mr. TRIBLE; Mr. LAFALCE; Mr. BARNARD; Mr. LUNDINE; Mr. FOGLIETTA; Mr. DYSON; Mr. OBERSTAR; Mr. DONNELLY; Mr. HUTTO; Mr. DENARDIS; Mr. BENNETT; Mr. BIAGGI; Mrs. SCHNEIDER; Mr. DAVIS; Mr. BONKER; Mr. STUDDS; Mr. MINETA; Mr. EDWARDS of California; Mr. WAXMAN; Mr. ANDERSON; Mr. GUARINI; Mr. MOFFETT; Mrs. KENNELLY; Mr. RATCHFORD; Mr. LANTOS; Mr. RODINO; Mr. HERTEL; Mr. WON PAT; Mr. MARKEY; Mr. DOWNEY; Mr. OTTINGER; Mr. JOHN BURTON; Mr. WYDEN; Mr. BEILENSON; Mr. MITCHELL of New York; Mr. FAZIO; Mr. CORRADA; Mrs. FENWICK; Mr. MINISH; Mr. PRITCHARD; Mr. DICKS; Mr. LEHMAN; Mr. ZEFERETTI; Mr. FRANK; and Mr. DERRICK.

□ 1620

Mr. Chairman, I yield such time as he may consume to the gentleman from New Hampshire (Mr. D'AMOURS), a cosponsor of the bill and chairman of the Subcommittee on Oceanography of the Committee on Merchant Marine and Fisheries.

Mr. D'AMOURS. I thank the chairman for yielding to me.

Mr. Chairman, I rise, of course, in strong support of H.R. 5543, which originated in the Subcommittee on Oceanography which I chair.

Mr. Chairman, as the chairman of the full committee, the gentleman from North Carolina (Mr. JONES) has just stated, one of the critically important issues in this matter is the issue of equity and fairness.

Since the 1920's, since we passed the Mineral Leasing Act, inland States have always been able to share a portion of the revenues the Federal Government obtained from leasing land for energy development on Federal lands adjacent to those States' borders. That percentage today is 50 percent.

Mr. Chairman, this bill seeks some equity by providing a share for coastal States of the leasing revenues developed by the granting of oil leases and licenses on Federal lands adjacent to the coasts of those States. That share is only 10 percent, not the 50 percent the inland States get, and the coastal States share has a cap of $300 million for any given year.

In fiscal year 1981, the inland States received direct payments as a result of mineral development on Federal lands of $781 million. In fiscal year 1982, those payments are estimated to top $1 billion.

Mr. Chairman, I think the time is long past when we can ask the coastal States to continue to act as partners with the Federal Government in the development of oil resources off their coasts and yet continue to erode the

base of information upon which they rely to meet that responsibility.

The coastal zone management program, the CEIP, the coastal energy improvement program, and the sea grant program, are all programs that are intended to help the States to meet the accelerated search for oil off our coasts. But those programs are being eliminated. This administration is attempting to eliminate those programs.

All we are seeking to do is to provide those States with the information resources necessary to meet the constantly accelerating pace of oil development off our coasts.

It is important, Mr. Chairman, that we understand that the States need to be partners in this process. If the States cannot act as partners in this process, they are going to act to obstruct the process through litigious means. They are going to file law suits to delay these leases until they can have the time to acquire the information necessary to understand what is happening and to meet the impacts of that development upon their coasts.

Now, if anybody doubts that, I would refer them to a study that was conducted by the Department of the Interior, a study that was unreleased but prepared earlier this year for the Cabinet Council on Natural Resources Working Group on OCS revenue sharing.

That study, a Department of the Interior-administration study, concluded, and I quote:

> The coastal States and localities will still have available a whole arsenal of litigious weapons which can be directed against the OCS program. While it is unlikely that these attacks can stop a substantial portion of the leasing effort, they are expected to continue to cause increasingly costly—

I repeat—"increasingly costly delay for the foreseeable future."

That same report goes on to say:

> The only apparent solution to reducing the cost of opposition to the OCS program is to provide States and localities with an incentive to support leasing which is perceived by the States and localities as sufficient to counterbalance their perception of the potential harm and risk to which they are subject.
>
> OCS revenue sharing is the best incentive available to achieve that counterbalance.

This is a Department of the Interior report which concludes that OCS revenue sharing is the best incentive available to achieve that counterbalance.

The cost to the Federal Treasury of the kinds of litigious delay that could be caused by the States has been estimated to be $1 billion. There is a cap on this bill of $300 million to be spread amongst the States in any given year. Nor does this bill drain the Federal Treasury. The only payments, as Chairman JONES has indicated, that are made in this bill are from revenues over and above the fiscal year 1982 levels.

So we do not go into fiscal year 1982 revenues, we do not go into fiscal year 1981 revenues or any other. It is just the increase in Federal revenues which we tag for a 10-percent revenue-sharing cost to bring some fairness and equity to the coastal States.

If the administration's intent to eliminate the programs that allow the coastal States to fully participate in studying this problem is carried through, that is, elimination of CZM, CEIP, the sea grant program, coastal States estimate they would lose 60 percent of their staffing abilities and their research ability to meet this need.

Mr. Chairman, there are many good reasons to pass this bill. I think equity perhaps is one of the strongest. Certainly the prudence of saving the billions of dollars that could be lost to the Federal Treasury by unnecessary delays is another.

We ought to be seeking to involve the coastal States as full partners in this accelerated development for the search for oil off our coasts.

Mr. Chairman, I yield back the balance of any time that I may have remaining.

Mr. JONES of North Carolina. Mr. Chairman, I thank the gentleman from New Hampshire (Mr. D'AMOURS).

Mr. Chairman, I now yield 5 minutes to the ranking member on the committee, the gentleman from New York (Mr. BIAGGI).

Mr. BIAGGI. I thank the chairman of the full committee for yielding time to me.

Mr. Chairman, as a cosponsor of this legislation, I rise in strong support of H.R. 5543, as reported by the Committee on Merchant Marine and Fisheries. I especially commend the gentleman from New Hampshire (Mr. D'AMOURS) for his leadership in authoring this legislation of critical importance to coastal States such as New York.

In particular, I wish to thank the gentleman for his efforts in securing $3 million in fiscal year 1982 supplemental funds for New York State to initiate its coastal zone managment efforts following the recent approval of its State plan by the Secretary of Commerce. Roughly half of those moneys will be passed through to the city of New York to be expended for the purpose of urban waterfront redevelopment under the provisions of the New York State Waterfront Revitalization and Coastal Resources Act of 1981."

Mr. Chairman, my support for the concept of OCS revenue sharing is grounded in the principle of equity. Furthermore, it is in recognition of the need for continuation of the Federal/State partnership in the management of renewable ocean and coastal resources—and in the preservation of the knowledge base for enlightened resource management.

This bill would accomplish these twin purposes by returning to the States a portion of the revenue derived from Outer Continental Shelf oil and gas leasing activities. It will insure continued funding for valuable programs in resource management and education administered under the provisions of the Coastal Zone Management Act of 1972 and the National Seagrant College Program Act.

Under conditions of intensifying budgetary competition, these programs are slated for termination. This is not withstanding their considerable value in facilitating Federal-State cooperation—rather than confrontation—in resource development in the national interest. They provide States an economic stake in the conduct of Federal OCS leasing activity in frontier areas.

Under this legislation, these programs would continue with a secure source of Federal funding. This is accomplished through the establishment of a $300 million revenue-sharing trust fund as a permanent mechanism for financing the Federal share of administering these programs.

In my judgment, the equity argument is the crux of the issue underlying this legislation. Under the provisions of the Mineral Leasing Act of 1920, 23 States annually receive approximately $600 million in direct payments from the Federal Government. This compensates them for the revenue loss and related economic impacts associated with development of renewable resources, contained in Federal lands within the boundaries of those States.

This represents nearly one-half of the total Federal receipts collected under that act. Moreover, under the provisions of the Reclamation Act, virtually all the remaining Federal revenue attributable to these activities is ultimately returned to the States through indirect payments.

Other similar precedents reflecting Federal sharing of revenue derived from Federal activities within State boundaries in the form of Federal land payments to States are contained in: The Federal Power Act, Taylor Grazing Act, Farm Tenant Act, Refuge Revenue-Sharing Act, and other related acts authorizing sale of timber, grazing land, and mineral rights by the Federal Government to private interests.

In contrast, the Congressional Budget Office projects the Federal Government will collect approximately $10 billion in revenue receipts from OCS lease sales in the form of royalties, bonuses, and lease payments in fiscal year 1983.

Under current law, none of this revenue will flow—either directly to the States affected by OCS leasing activity—or indirectly through the support

of cooperative resource management and related education programs.

The legislation before us corrects this fundamental inequity by diverting $300 million—or approximately 3 percent of total OCS revenue—into an ocean and coastal resources management development fund. This represents partnership capital contribution by the Federal Government to the States as a demonstration of its commitment to New Federalism in cooperative resource development.

Thirty-four States, territories, and possessions will benefit directly from the expenditure of these funds. In the case of New York, this includes 240 coastal communities in their efforts to revitalize the State's 3,200 miles of waterfront.

Every State will benefit indirectly—through the preservation, conservation, and wise management of our national heritage that will inevitably result from the enactment of this farsighted legislation. H.R. 5543 is deserving of its widespread endorsement, and I commend it for positive consideration by my colleagues in the House.

● Mr. BROOKS. Mr. Chairman, I rise in strong support of this bill and I commend the gentleman from North Carolina and other members of the Merchant Marine and Fisheries Committee for bringing it before us.

The establishment of a working relationship between the Federal Government and the coastal States for the management of ocean resources has been a major concern of Congress for the past decade. We have passed a number of bills dealing with this subject and I have seen at first hand in my district how beneficial they have been.

But now, at the same time it is proposing to expand oil and gas drilling on the Outer Continental Shelf at an unprecedented rate, the administration wants to cut back or terminate several of these programs. I find that inconceivable and I welcome this opportunity to provide a block grant approach to financing them.

I think it is particularly appropriate that funding for these grants would come from the Federal revenues received from Outer Continental Shelf oil and gas exploration and development. The activities that generate these revenues have a strong impact on adjoining coastal communities and it is consistent with the cooperative nature of coastal zone management that a small portion of these funds should return to the affected areas.

Funding the block grants from OCS revenues also meets any objections that the bill will have an adverse affect on budget deficits. It will not, since the fund would be used on future growth in revenues from offshore oil and gas development.

Mr. Chairman, the resources of the Outer Continental Shelf—and the waters above it—are of inestimable value to the United States. The proper management of these resourdes calls for a strong and effective partnership between the Federal Government and the coastal States. H.R. 5543 provides the basis for such a partnership and I hope it will be strongly supported by the House.●

□ 1630

Mr. PRITCHARD. Mr. Chairman, I yield myself such time as I may consume.

Mr. Chairman, I would like to make a brief statement in support of the Ocean and Coastal Resources Management and Development Block Grant Act, H.R. 5543. The bill provides coastal States with a reliable source of funding for coastal zone management, the coastal energy impact program, living marine resource programs and, last but not least, the national sea grant college program.

Although the concept of revenue sharing is by no means new the logic of applying the concept in the situation of Outer Continental Shelf oil and gas revenues is increasingly apparent. Coastal States are facing the prospect of locating funding for many important programs from other than Federal sources. At the same time, the Department of the Interior is proceeding on a significantly accelerated 5-year oil and gas leasing program. The pressures on coastal communities, and the need for locating a source of funding that would not place additional burdens on either the Federal budget or on individual taxpayers, have never been greater.

I am pleased to be part of this bipartisan effort to insure continued funding for important ocean and coastal development activities, and to achieve equity for coastal States with inland States in terms of long-term, equitable compensation for the effects of federally generated resource exploration and development. The State of Washington, the first State with an approved coastal zone management program, has a deep and longstanding interest in the programs which would receive funding under this bill. The coastal zone management program, the sea grant program, and commercial fisheries research and development are all programs which significantly contribute to the quality of life and to the enhancement of the economy of Washington State.

I would strongly urge my colleagues to support this essential legislation.

Mr. Chairman, I would just add this: We have got to form a partnership between the States and the Federal Government, and in the area of leasing and offshore activities we know that we are headed for a lot of litigation and a lot of involved bickering and hassling between States and the Federal Government. This partnership program can cut through a lot of that bickering and make the States feel that the Federal Government wants to be a partner and wants to help them. I think, in the long run, this will produce more money and will be helpful to the Federal Government. I think it makes sense, and that is why I believe this should be a bipartisan program.

Mr. Chairman, I yield 2 minutes to the gentleman from Delaware (Mr. EVANS).

Mr. EVANS of Delaware. Mr. Chairman, I thank the distinguished gentleman from Washington for yielding time to me.

Mr. Chairman, I rise in strong support of H.R. 5543. This legislation will insure that funding for vitally important coastal resource management programs like the sea grant program and the coastal zone management program continues. The block grant established by H.R. 5543 will not be funded by appropriations from the already overextended Federal Treasury, it will be funded by the increase in revenues, using 1982 as a base year, from the sale of oil and gas leases on the Outer Continental Shelf. The programs funded by H.R. 5543 were established to deal with increasing threats to our ocean resources. Those threats remain, and I know that in my own State of Delaware the programs that H.R. 5543 will support have been remarkably successful.

At this point, I will address my remarks specifically to the sea grant college program. Sea grant has come under attack by some, and I want to set the record straight. Sea grant came into existence in 1966. The program was modeled after the century old and extremely successful land grant program. Its purpose was to accelerate research of the conservation, management and utilization of marine resources.

I believe that sea grant is precisely the type of program we should be supporting in view of the current Federal budget deficit. Quite simply, sea grant has brought in more tax dollars than we have appropriated for it. The program is cost effective, and contrary to some arguments, has faired well in the competitive budget process. The Appropriations Committee provided $25 million to sea grant in H.R. 6957, the fiscal year 1983 State, Justice, Commerce, and related appropriations bill. In fact, the Appropriations Committee report commented that the sea grant program is one of the most cost-effective Federal-private sector partnerships.

I know that in my home State of Delaware the sea grant program at the University of Delaware has benefited our entire State. Through this valuable program our State, and indeed all coastal States, will be able to better

utilize our marine resources in an environmentally responsible manner. This not only makes good environmental sense, it makes good economic sense as well. Coastal States like Delaware have extremely important fishing and tourism industries that create thousands of permanent job opportunities. These vital industries depend upon responsible policies to utilize—and protect—our valuable marine resources.

In view of the current efforts to accelerate offshore leasing, it would be penny wise, and dollar foolish to abandon the very programs that were designed to make certain that Federal, State, and private activities coexist with a minimum of friction. The impact of energy development on the Outer Continental Shelf must be carefully assessed. Continuing problems that affect our coastal areas must be addressed or we may jeopardize our irreplaceable ocean resources. As my colleagues from coastal States know well, thousands of jobs in the fishing and tourism industries depend on those resources. Programs designed to manage and conserve our ocean resources are essential to the economies of coastal States, and I urge my colleagues to support this worthy bill.

Mr. PRITCHARD. Mr. Chairman, I yield 6 minutes to the gentleman from Kentucky (Mr. SNYDER).

Mr. SNYDER. Mr. Chairman, the proponents of this bill have utilized very descriptive words that are very much in vogue today when they explained the reasons that they believe H.R. 5543, the Ocean and Coastal Resources Management Block Grant Act, should become law. But I would urge my colleagues to take a very close look at the rhetoric which is being bantered about by the proponents. They call this bill a block grant. They talk about developing a partnership with the States. They also characterize the legislation as revenue sharing and that it is important to facilitating the development of our Outer Continental Shelf energy resources. But if you look at what the bill actually does, you will see that there is a great slip between the cup and the lip. This bill is not one that creates a partnership. It is not one which gives the State a block grant. What it does is order that States fund three programs which this administation and the Carter administration have sought to either eliminate or reduce the funding for, and the Congress has agreed.

What exactly are the programs we are talking about? We are talking about the sea grant program. What does the sea grant program do? Currently, it pays for masters degrees for graduate students. That is, the taxpayer is footing 100 percent of the students educational cost. Under H.R. 5543, we will continue to pay for masters degrees out of the funds authorized by the legislation.

What else do we receive for our money under the sea grant program? Well, the Merchant Marine and Fisheries Committee gets free staff—we have approximately three so-called sea grant interns this year and four last year. Also, just in the last 2 years, the Government has paid for studies such as how to develop training programs for aquatic veterinarians; assessment of the recreational fishing potential for New York City; a study of the role of the American Indian in marine science; a study delineating how to culture flat-head minnows for bait in Ohio; and for all of you that are interested in such a subject, the vital statistics of the female crab.

Now I would wonder about the priorities of any Congress that would take up to $3 billion from the U.S. Treasury to put these turkeys ahead of other important programs, such as social security, to name one.

The proponents of the legislation, and I would especially direct the attention of my Democratic colleagues to this point because their whip notice brings it out—the proponents state that currently there is authorized $490 million for the programs to be carried out by H.R. 5543 and that only $300 million will be put aside from the general fund for these programs; thus inferring a cut of $190 million. In fact, however, the Congress and the President have requested zero in appropriations for fiscal year 1982 for sea grant and only $7.5 million for the two other programs, a difference of a mere $483 million. We are being treated to a legislative sleight of hand, mixing apples and oranges, which of course this bill does frequently when it calls itself a block grant.

I would point out to the Members that the proponents talk in terms of the cost of this legislation being $300 million. That is accurate for fiscal year 1984, but the bill goes on forever, and through fiscal year 1994 the price tag that goes with it for the next decade is estimated to be $1.5 to $3 billion—that is billion.

So remember, you are not voting today on taking $300 million for the general fund—from other programs—you are taking $3 billion, and that is real money, money which will no longer be available to fund other Government programs—unless we borrow the money or eliminate other programs.

The administration strongly opposes the enactment of this legislation. Many of you have received a copy of their correspondence on that, but I would like to reiterate their view that these programs are no longer necessary to meet their original purposes. That is, that the objectives have been accomplished and it is now up to those that feel it is so important to continue these programs, that they find a mechanism other than Federal dollars to do it.

Mr. Chairman, I had introduced a number of amendments, 28 in number, whose purpose was to demonstrate the shortcomings of this bill. In light of the schedule of the House, the fact that many truly important bills are waiting for this turkey bill to yield the floor, the fact that the Senate will not take up this legislation, and the fact that the administration has done nothing but write a letter on this bill, I will not waste my colleagues' time. We have too much else to do. Mr. GRAMM or Mr. FIELDS may offer amendments which improve the bill. If they do, I would hope that my colleagues will vote for his proposal, but, then, against the bill.

□ 1640

Mr. JONES of North Carolina. Mr. Chairman, I yield myself such time as I may consume.

Mr. Chairman, I take this time to reply to some of the statements of my good friend, the gentleman from Kentucky (Mr. SNYDER) who just finished speaking. His reference to the "turkey," I think, is absolutely in order since Thanksgiving is approaching and here we have a "turkey" that we can cut up equally among the many States.

Also I would like to point out the fact that, referring to the astronomical figures mentioned down the road in 1994, 1995, 1996, whatever it was, all of this money is subject to the appropriating processes and is not automatically disbursed.

Mr. SNYDER. Mr. Chairman, will the committee chairman yield just briefly on that point?

Mr. JONES of North Carolina. Certainly I yield to the gentleman from Kentucky, who sits next to me on the committee.

Mr. SNYDER. Of course, Mr. Chairman, the Appropriations Committee has not seen fit thus far to appropriate anything like what the gentleman suggests in this bill.

I was wondering, could the committee chairman give us any real insight into that study on the vital statistics of the female crab which is funded?

Mr. PRITCHARD. Mr. Chairman, will the gentleman yield?

Mr. JONES of North Carolina. I yield to the gentleman from Washington for a response to that question.

Mr. PRITCHARD. Mr. Chairman, I would be happy to reply.

I did not mind the gentleman jumping on the graduate students and some of the other programs, but I did when he started kicking around the female crab. When one comes from Kentucky, maybe it does not mean very much, but as a matter of fact in this Nation we have a multimillion-dollar industry. The new crab vessels themselves cost

almost a million dollars. This industry is of vital importance to the west coast.

When the gentleman makes light of female crabs, I want him to know that this industry is one way to increase the protein supply that we have in this country. The oceans are out there, and it is a marvelous place for increasing protein. The crab industry is one of the ways we can achieve this increase in needed protein.

So, Mr. Chairman, I wish the gentleman from Kentucky would not kick around the female crab. I think that is just not called for.

Mr. SNYDER. Mr. Chairman, will the gentleman yield?

Mr. JONES of North Carolina. I am happy to yield to the gentleman from Kentucky.

Mr. SNYDER. Mr. Chairman, I really did not intend to kick around the female crab, but this has to do with their vital statistics, and the gentleman is correct, it is not an issue that is parochial in my part of the country. I just did not know that you evaluated crabs by their vital statistics, the same way you perhaps do other females.

Mr. PRITCHARD. I would only say to the gentleman that perhaps he does not understand crabs. He probably understands horses in Kentucky. But if he understood the crab and the need for the crab industry, he would not make light of this study of the female crab.

Mr. SNYDER. The gentleman feels that the Federal Government and we in Kentucky ought to be funding a study of the vital statistics of the female crab?

Mr. PRITCHARD. Absolutely.

If the gentleman ever looked at how much money we poured into the agricultural extension programs that go all through the farm areas of Kentucky, he would understand the role of the Federal Government in increasing and encouraging the crab industry, which has such a bright future.

Mr. JONES of North Carolina. Mr. Chairman, I yield 5 minutes to the gentleman from California (Mr. ANDERSON).

Mr. ANDERSON. Mr. Chairman, I rise in support of H.R. 5543, a bill to establish the Ocean and Coastal Resources Management and Development Block Grant Act of 1982.

H.R. 5543 recognizes that Outer Continental Shelf oil development may have substantial impact not only upon coastal wildlife and natural resources, but upon coastal communities and coastal ports as well.

Mr. Chairman, I would like to tell you how my Ports of Los Angeles and Long Beach have benefited from the programs that will be continued under H.R. 5543. The importance of these programs to coastal ports cannot be overestimated. I have two letters, one from the excutive director of the Port of Los Angeles, Dr. Roy Perry; and one from the executive director of the Port of Long Beach, Mr. James McJunkin, which make clear the importance of H.R. 5543 to these two ports in my district in California. I would like to have these letters included with my remarks in the RECORD. Specifically, H.R. 5543 would benefit these ports in three ways:

First, H.R. 5543 would continue the coastal energy impact program. Through this program the Ports of Los Angeles and Long Beach have developed risk management plans for the location of oil and other hazardous cargo facilities. These plans minimize the potential for loss of life or property due to accidents involving these facilities. The accelerated offshore oil leasing program will add to the increasing pressures on our ports to develop additional energy commodity facilities. I believe that it is especially important for our ports to formulate safe and effective plans for energy facility development projects. These funds are critical to the accomplishment of those plans.

Second, additional onshore oil facilities also place pressures on those ports such as Long Beach which have insufficient land capacity for additional terminal development. Additional terminal capacity is largely achieved by dredging and filling. The harm dredging and filling does to the local wildlife and environment is required to be offset or mitigated through replacement or enhancement of marine habitat lost through land fills. This funding assists ports in fulfilling their "mitigation" requirements.

Third, H.R. 5543 would allow the sea grant college program to continue its applied research in marine policy and coastal resource management. In my district the University of Southern California has conducted research that is directly applicable to port development. For example, the ports of Los Angeles and Long Beach have benefited from sea grant studies such as the 15-volume study done in the seventies, which assessed the potential affects on San Pedro Bay's water quality and marine life from the dredging operations in the harbor, which are now nearing completion; and a sea grant study which looked at the consequences on the bay's water quality as a result of the tragic explosion and subsequent oil spill from the oil tanker *Sansinena.*

In conclusion, Mr. Chairman, I ask that my colleagues vote for H.R. 5543, and in so doing continue to support rational and effective port planning and development necessitated by accelerated Outer Continental Shelf oil development.

At this point in the RECORD I include the following letters:

PORT OF LOS ANGELES,
Los Angeles, Calif., June 10, 1982.

Congressman GLENN ANDERSON,
House Office Building,
Washington, D.C.

DEAR GLENN: I am writing to you to apprise you of the Port of Los Angeles' support for the Ocean and Coastal Resources Management and Development Block Grant Act, H.R. 5543.

The Coastal Energy Impact Program was, until recent budget cuts, an excellent source of funding to mitigate the impact of coastal energy projects upon communities, the coastline, and, especially, deep draft ports. The provisions of H.R. 5543, if enacted, will reinstitute the meaningful work that the Coastal Energy Impact Program initiated.

Projects of the Port of Los Angeles which could conceivably benefit from this Act include the proposed coal facility located on Terminal Island, the Intermodal Container Transfer Facility, and the 65-foot deep draft channel. Additionally, this Act could provide funding for environmental mitigations required to secure development permits for the foregoing projects.

By means of this letter I am requesting the assistance of the Chief Legislative Analyst of the City of Los Angeles to add H.R. 5533 to the city's legislative advocacy program.

Sincerely,

ERNEST L. PERRY,
Executive Director.

PORT OF LONG BEACH,
Long Beach, Calif., June 2, 1982.

Congressman GLENN ANDERSON,
Rayburn House Office Building,
Washington, D.C.

Subject: H.R. 5543.

DEAR GLENN: The Port of Long Beach supports the establishment of an Ocean and Coastal Resources Management and Development Fund as provided in H.R. 5543. Coastal states should be provided a mechanism for sharing in the revenue from OCS oil and gas development just as interior states share in federal receipts resulting from mineral extraction on federal lands within their borders. The fund, as established by this bill, will benefit the Port of Long Beach through block grant monies that will be destined for the Coastal Zone Management Act Policies (such as the CEIP Program) and enhancement and management of state resources.

We support the provisions of the bill that provide proportional block grants to the state based on OCS expansion activities, coastal population and shoreline mileage, as well as provisions granting the states ultimate authority for allocation of grants based on state-specific management priorities.

Specifically, the Port could benefit from the bill in several ways.

1. We have received CEIP funding in the past for the development of our Risk Management Plan, an element of the Port's Master Plan. The Port is in the process of developing an Energy Management Program which would be suitable for CEIP funding.

2. Block Grants for enhancement and management of natural resources may be useful in assisting the Port with fulfilling its "mitigation" requirements for enhancement or replacement of marine habitats which are impacted by Port development projects.

3. The Sea Grant College Program has support applied research in marine policy

and coastal resource management that is directly applicable to port development. We would like to see this program continued.

Accordingly, we offer our support to H.R. 5543.

JAMES H. MCJUNKIN,
Executive Director.

□ 1650

Mr. JONES of North Carolina. Mr. Chairman, I yield as much time as he might consume to the gentleman from Florida (Mr. BENNETT).

Mr. Chairman, I rise today to support H.R. 5543, which I have cosponsored, and which would establish an ocean and coastal resources management and development fund for the purpose of awarding block grants to States.

The fund would be composed of an amount equal to 10 percent of the growth in revenues from Outer Continental Shelf oil and gas revenues. The fund would be used to continue the national sea grant college program as well as to provide block grants to States for the maintenance of several programs earmarked by the Reagan administration for elimination of funding. These programs include the coastal zone management program, the coastal energy impact program, and the ocean fisheries and living marine resource programs. The elimination of these programs will seriously jeopardize the ability of coastal States to prepare for the effects which will be produced by the increased Outer Continental Shelf (OCS) development activity proposed by the administration.

Under current law, coastal States receive no direct share of OCS revenue and are not authorized to generate funds from Federal leases on the OCS. This legislation would permit the coastal States who dangerously face the impact of OCS development activity to continue the programs they need in order to prepare themselves for this development.

I have received expressions of support for this bill from the Southern Governors' Association, the Florida Governor, the National Governors' Conference, the Florida Audubon Society, the Sierra Club, and the Northeast Florida Regional Planning Council. I urge my fellow Members to approve it.

Mr. PRITCHARD. Mr. Chairman, I yield 3 minutes to the gentleman from California (Mr. CLAUSEN).

Mr. CLAUSEN. Mr. Chairman, as a representative from a coastal State, the great State of California, I rise in support of H.R. 5543, the Ocean and Coastal Resources Management and Development Block Grant Act, and would like to share my views on this proposal with my colleagues.

I believe the concept behind this legislation to be basically sound in that it continues programs that have proven valuable in evaluating the impact of Outer Continental Shelf drilling and in particular the National Sea Grant College Program Act, which, in my judgment, has been a most constructive and successful program. Working with our own Humboldt State University, I have observed firsthand the many benefits derived from the national sea grant college program.

However, a thorough study of the legislation reveals some provisions that would prevent it from being as responsive as I think it should be or could be to the OCS-impacted communities. I am specifically concerned about the criteria used for allocating funding among the various States and desire to see the legislation amended in order to provide greater equity for the OCS revenue-producing States.

In addition, the legislation tightly restricts the use of the $300 million in offshore revenues the State could potentially receive—again, I believe greater provision must be made for assisting the coastal communities most heavily impacted by OCS drilling, and the State's hands need to be freed in terms of its ability to channel resources to the programs of greatest value to the people of the State.

In essence, I do not feel that the legislation as reported achieves the most essential objective of a revenue sharing measure, although it is a genuinely commendable step in the right direction.

I would prefer amending the measure to greatly reduce the degree of control of the State and local governments by the Federal Government.

I do believe that the block grant or revenue sharing concept is a very good way in which to help some of these coastal States that are impacted. So I support a stipulation that a clear portion of the OCS revenues be returned to the State and actually be earmarked for direct pass-through assistance to impacted coastal communities, the remainder being returned to the State for additional assistance and for coastal management programs of the type it deems most appropriate and valuable.

Should there be an agreement by the leadership to not accept amendments, I want to serve notice that I will pursue these objectives with the other body.

Mr. LENT. Mr. Chairman, will the gentleman yield?

Mr. CLAUSEN. I yield to the gentleman from New York.

Mr. LENT. I thank the gentleman for yielding.

Mr. Chairman, I rise in support of H.R. 5543, the proposed Ocean and Coastal Resources Management and Development Block Grant Act, and urge its timely passage.

The legislation establishes a special fund in the U.S. Treasury to be fed by future revenues from Federal offshore oil and gas activities. Coastal States would be eligible for a share of the fund in the form of block grants for use in ocean, coastal, and living marine and natural resource programs. In addition, the fund would support the national sea grant program, which has made significant contributions in New York State and nationwide in marine research, education, and advisory services.

Under the bill's formula, New York's share of the fund could exceed $15 million a year.

This legislation has important provisions for Long Islanders. With our precious coast lined with miles of beaches, fragile wetlands, inlets, and estuaries, proper management of these important resources is vital both to our economy and to maintain our unique environment.

With approval of New York State's coastal zone management plan expected within a matter of days, Long Islanders will be assured a participatory role in Federal OCS decisionmaking. This legislation will assure a source of funding for the Coastal Zone Management Act, coastal energy impact program activities, as well as other State efforts to manage and enhance living marine and natural resources.

By no measure is this a perfect piece of legislation. I would prefer more of a no strings approach in this revenue-sharing proposal to give State and local governments more flexibility in meeting their needs, and for the formula to be more responsive to actual oil and gas activities.

Yet, coastal States currently receive no revenues from the leasing of OCS tracts off their coasts. When it is estimated that future Federal OCS revenues could exceed $13 billion per year under the new leasing plan, it is only fair that a portion of the increase is shared with coastal States to help them mitigate offshore oil and gas activities, as provided under current law.

Mr. PRITCHARD. Mr. Chairman, I yield 5 minutes to the gentleman from Texas (Mr. FIELDS).

Mr. FIELDS. Mr. Chairman, I rise in strong opposition to the passage of H.R. 5533, the so-called Ocean and Coastal Resources Management Act.

While I believe an argument can be made for the concept of OCS revenue sharing, unfortunately, the formula for allocating funds to the States as contained within this bill is tragically flawed.

While the proponents of this legislation, argue that the purpose of OCS revenue sharing is to compensate those communities who may be impacted by leasing off of their shores, this bill, in fact, ignores this basic premise and instead allocates funds based on some convoluted formula that penalizes those very States where OCS development has and will occur in the future.

Mr. Chairman, although I have the highest respect for the distinguished chairman of the Merchant Marine and Fisheries Committee, I believe this legislation is nothing more than a facade to disguise the true intentions of this bill. Quite simply, this is a blatant attempt to fund several coastal zone management programs which both the Carter and the Reagan administration have repeatedly chosen not to fund.

If the proponents of this bill really want to establish a workable and equitable OCS revenue-sharing plan, then they would reject this formula and instead adopt one based on the amount of actual leasing and production located within a State's territorial waters.

Mr. Chairman, it is well known, that now and historically the vast majority of OCS oil and gas production has come from the Gulf of Mexico and specifically off the coast of Texas and Louisiana. Our region contributes more than 96 percent of OCS oil and virtually all the OCS natural gas production.

As a result of this energy production, the Federal Government has received in excess of $34 billion in OCS revenues or nearly 80 percent of the total revenues collected to date.

In addition, it must be noted that even under the Department of the Interior's new 5-year OCS leasing plan, both Texas and Louisiana will continue to have the vast majority of production off their coasts and will thus continue to contribute to the Federal Government the overwhelming majority of OCS revenues.

Yet, under this legislation, the State of Texas is heavily and unfairly penalized for not yet having a federally approved coastal zone management plan.

Mr. Chairman, if we are to accept the basic premise, the very heart of this legislation which states that coastal communities should be compensated for having OCS development off their shores, then it should make absolutely no difference whether a State has or does not have a CZM plan.

If we allow this legislation to pass in its present form, we will be unfairly penalizing, through this punitive formula, dozens of communities all along the gulf coast and by so doing deny them the very compensation the authors of this bill have repeatedly indicated they deserve.

At the same time, despite the fact that Texas does not have a federally approved CZM, my State has, in fact, developed an excellent coastal management program which shows as much environmental concern if not more than if we had a federally approved CZM plan.

Mr. Chairman, I believe there is a need for a strong, equitable, and viable OCS revenue-sharing plan. Unfortunately, I find this legislation to be ill timed, poorly conceived, and tragically flawed and appeal to my colleagues to reject this legislation.

Mr. PRITCHARD. Mr. Chairman, I have no further requests for time, and I yield back the balance of my time.

Mr. JONES of North Carolina. Mr. Chairman, I yield 2 minutes to the gentleman from New Hampshire (Mr. D'AMOURS).

Mr. D'AMOURS. Mr. Chairman, I just want to take a minute to refer to the colloquy that took place on the floor a little while ago between my very good friend from Kentucky and my very good friend from Washington. I do think we ought to state very clearly on the record that there is no money in the sea grant program for student tuition, absolutely none, not a penny.

□ 1700

The program does not operate that way. The program only funds projects and work. None of the money can go for tuition.

Second, I would like to note that the Conservative Heritage Foundation issued a report a year ago on sea grant, and the Heritage Foundation said that sea grant has an impressive record of success primarily because it is based largely on local priorities and needs, it operates in partnership with State and local governments, private industry, universities, organizations, and individuals concerned with or affected by ocean and coastal resources.

The Heritage Foundation concluded that sea grant funding should be increased by 10 percent per year in real terms for the next 5 years. This is the Heritage Foundation opinion of the sea grant program.

Finally, my good friend from Kentucky, in his usual good humor and levity, indicated something about studies that he thought were frivolous. I would remind this body that 3 years ago the gentleman from Wisconsin, in the other body, who is known for giving out Golden Fleece Awards, gave such a Golden Fleece Award 3 years ago to a group that was studying the behavior of fruit flies. Well, I do not think I have to remind anybody that the people of California, just within the past year, were very grateful for any information they could possibly develop on fruit flies. These studies are easily made fun of, but scientifically they are worthwhile. Sure, there are some that are silly, but some that even sound a little silly sometimes in fact are not.

Mr. JONES of North Carolina. Mr. Chairman, I yield such time as he may consume to the gentleman from Puerto Rico (Mr. CORRADA).

Mr. CORRADA. Mr. Chairman, I rise in strong support of H.R. 5543, the Ocean and Coastal Resources Management and Development Block Grant Act, which provides for the use of revenues from the Outer Continental Shelf leasing program for the conservation and management of our marine resources.

I welcome this initiative, for I believe it is imperative that our country continue its work to protect and develop the ocean fisheries and living marine resources. The administration's proposal to terminate Federal support for the coastal zone management program, the coastal energy impact program, and the national sea grant program clearly places in a predicament our national effort to preserve marine resources.

Using OCS revenues as an alternative source of funding to rescue the marine resources protection and development activities is a sound idea and particularly fitting. The coastal States and territories receive most, if not all, of the environmental impact associated with the development of the Outer Continental Shelf. In addition, many of these States take substantial economic risks when they get involved in this initiative. It is only fair play that they receive some of the revenues raised from these activities to offset the impacts ancillary to the offshore development.

The continued funding of the ocean and coastal development activities is of great concern to the people and the Government of Puerto Rico because of Puerto Rico's condition as a tropical island. Puerto Rico over the years has taken a very active role in a broad range of ocean, fishery, and coastal programs, including the national sea grant program. The same can also be said of many if not all of the coastal States and territories.

The constant interaction between human activity and nature urgently require a continuing program of monitoring, evaluation, and protection, such as would be possible under the proposed program. The bill is envisioned and designed in the national interest for the proper development of the Nation's invaluable and irreplaceable marine resources.

I do have my reservations regarding the funding of this program, which is based on the increase of revenues in the OCS program between the base year and each succeeding year. This approach relies too much upon the success of the administration's plan for expanding the OCS program. I particularly prefer the one taken by Senator STEVENS in a similar bill—S. 2792—which he introduced in the Senate and has received bipartisan support. Under S. 2792 the fund would receive a modest 6 percent of the royalties and 4 percent of the bonuses derived from oil and gas production in the OCS activities disregarding if there was an increase or not in revenues. I believe this approach is more realistic and gives a greater possibility of a long, and well-funded life to this

highly important revenue-sharing program.

Nevertheless, given the short time we have available before the final adjournment and the crucial need there exists to create the fund, I urge my colleagues to vote for the passage of this legislation. Later, I believe and hope we can work out any disagreements with the Senate's final action taken on Senator STEVENS' bill or any other similar bill.

● Mrs. SCHNEIDER. Mr. Chairman, I rise today in support of H.R. 5543, the Ocean and Coastal Resources Management and Development Block Grant Act. This legislation will provide minimal financial assistance to States to manage and facilitate Federal energy developments.

The concept of OCS revenue sharing is not new. Ten years ago, the Congress declared that there is national interest in the effective management and development of the Nation's coastal zone. In the meantime, expanding demands for food, energy, minerals, recreation, and waste disposal have placed an increased stress on coastal areas. Recent surveys show that, without an alternative to current funding, there will be no implementation.

The OCS revenue-sharing proposal is a concept that coastal States strongly support. It is consistent with the new philosophy of shifting responsibilities for many public services from the Federal Government to the States, and supporting these programs with block grants. More importantly, revenue sharing for both inland and coastal States would be more equitable and would protect our coastal resources.

I urge my colleagues to support this legislation. Energy development is critical in the effort to lessen our dependence on foreign energy supplies, and this bill will move us in the right direction.●

● Mr. HUGHES. Mr. Chairman, I rise in support of H.R. 5543 and urge my colleagues to adopt this important legislation, which provides for the establishment of an Outer Continental Shelf revenue-sharing program.

As a member of the Merchant Marine and Fisheries Committee, which reported out this legislation, and as the Representative from New Jersey's largest coastal district, I am well aware of the important role that OCS leasing and development plays in America's energy future.

Outer Continental Shelf oil and gas development, however, is not risk-free, and development activities place subtle pressures on coastal areas.

Within the past decade, we have witnessed for the first time the development of a number of State and Federal programs which address the need for comprehensive planning for our Nation's coasts. Much of the impetus for State coastal planning activities was directly attributable to the Coastal Zone Management Act, which Congress enacted 10 years ago.

During the past several years, we have witnessed an attempt on the part of this adminstration to eliminate Federal assistance for State coastal planning activities while at the same time undertaking actions directed toward accelerating OCS leasing and development activities. Although there is little doubt that a workable OCS leasing program is in the public's best interest, we too often lose sight of the need to properly manage and protect our renewable resources—such as recreational and commercial fisheries—while we extract nonrenewable oil and gas from underneath our oceans.

This legislation addresses the critical need to provide coastal States with the financial resources which they need to properly plan for OCS leasing activities and to manage their coastal and ocean resources. Without such assistance for such coastal activities, many or the States would be unable to make the adjustments necessary for accelerated Outer Continental Shelf oil and gas development. States caught in such a situation might find their only recourse—to protect their offshore resources—would be litigation to block lease sales and development activities by the oil and gas industry.

State planning needs to be made an integral part of the OCS process. Coastal States which will have to live with the impacts resulting from accelerated oil and gas development off their shores should also receive the resources necessary to adequately cope with OCS development.

The pace of OCS leasing and development is rapidly increasing. The Secretary of the Interior has proposed to offer for lease close to 1 billion acres—nearly the entire Outer Continental Shelf—within the next 5 years. Revenues from increased leasing activities are expected to be more than $15 billion, according to administration estimates. Clearly, a small portion of that revenue can be set aside for coastal States to use in planning for OCS activities, managing and enhancing their fisheries and living resources, and mitigating possible harmful impacts.

I believe that enactment of this legislation is critical to insure the orderly development of our OCS resources. I urge you to support H.R. 5543.●

● Mr. YOUNG of Alaska. Mr. Chairman, I rise in opposition to H.R. 5543, the Ocean and Coastal Resources Management and Development Block Grant Act.

Let me make clear that my opposition is not to the philosophy of sharing OCS revenues with coastal State and local coastal communities. In fact, as the Members of this body know, I have worked with a number of our colleagues to produce a bill which fairly meets the needs of coastal areas. My opposition to the bill before us today stems from the particular provisions which I feel will increase Government regulation and further tie the hands of coastal States when those States attempt to meet their needs in coastal areas.

Let me point out some of the deficiencies in this legislation. First and foremost, all revenue received will go to State governments. While this is certainly preferrable to keeping all power in the hands of the Federal Government, it does not take into account the fact that State governments at times are not fully responsive to local communities. It is the local areas that will feel the most severe impacts. It is imperative that local communities receive a fair share of any revenues that are forthcoming. H.R. 7077, the alternative bill which I helped develop, would rectify this problem by mandating that coastal communities receive 50 percent of each State's share.

Second, I strongly object to the formula used to allocate revenue among the States. Admittedly, Alaska would fare well under this bill. However, a true OCS revenue-sharing plan should be based on the amount of OCS activity that is occurring in the OCS off each individual State. Coastline mileage and coastal population have no bearing on the number of acres leased, the amount of oil produced, and so forth. H.R. 7077 would solve this problem by instituting a distance test between the coastal area and the OCS development area. The closer you are, the greater the possible impacts, and therefore the greater the amount of money you would receive.

Third, I object to the increased control that the Federal Government would exercise over coastal State activities. This bill claims to provide block grants. Nonsense. The bill mandates that money spent for particular programs. Whether or not any Member of this body agrees with the philosophies of these programs is immaterial. If we are going to share revenues, then let individual States make the decision as to how best to spend them. If the Congress wants to fund programs, let us do so directly, rather than through some back-door approach. The Federal Government has no business telling the State of Alaska, or the State of California, or any other State that it has to spend 40 percent of its money on coastal zone management programs if those programs are not what the State feels it needs. The people of the United States have given a clear directive to this body: They want less, not more, Federal control of their lives. I, for one, do not intend to support increased Federal controls.

Mr. Chairman, H.R. 5543 started with a sound premise but has degenerated into nothing more than another attempt to increase Federal control

over our lives. I urge all Members to oppose it.●

● Mr. EMERY. Mr. Chairman, I appreciate this opportunity to speak in support of H.R. 5543, the Ocean and Coastal Resources Management and Development Block Grant Act.

H.R. 5543, sponsored by Congressmen JONES and D'AMOURS, and endorsed by the House Committee on Merchant Marine and Fisheries, establishes a fund to provide coastal States with a means to maintain ocean resources management and development. I am a cosponsor of this legislation, and as a Representative from Maine and a resident of a coastal area there, I believe the concept embodied in H.R. 5543 is a significant one.

The bill establishes a stable source of funding to insure the continuation of important coastal and marine resource programs that serve both national and State interests. As the need for management of our coastal and ocean resources increase, it is essential that we give the relevant agencies adequate financial support so that the goals of the coastal management laws enacted by Congress can be carried out. This proposed legislation gives the States and Federal Government the opportunity to continue the essential partnership which was established in the Coastal Zone Management Act of 1972 and which Congress has since recognized as an internal part of ocean resource management.

The partnership initiated in those laws has led to a balanced and coordinated decisionmaking process that sets up guidelines for a variety of activities occurring in the coastal zone, the fisheries conservation zone, and on the Outer Continental Shelf. H.R. 5543 includes provisions that insure the continued funding of the Coastal Zone Management Act and the national sea grant college program, which are the cornerstone of national ocean-related planning and research activities. These laws were enacted in response to rapidly increasing pressures on this Nation's coastal resources, which have not diminished in any way since then. In fact, in view of the recently approved Outer Continental Shelf accelerated 5-year leasing plan, I would submit that the pressures on our marine resources are greater than ever.

As multiple and competing uses take place in areas of national concern or under Federal jurisdiction, States' coastal and marine resource management agencies inevitably become deeply involved in addressing national concerns. Maintaining Federal support of programs such as coastal zone management and sea grant as proposed in H.R. 5543 is an entirely appropriate role for the Federal Government to play. The money allocated through the Ocean and Coastal Resources Management and Development Fund will be transferred to the States through an already well-established program that was set up to help the coastal States handle the pressures of a Federal activity, offshore drilling. That Federal activity now seems to be a top Federal priority, and we cannot ignore the impact this has on coastal communities.

The CZM program is a very diverse one, and each federally approved State program is designed to meet the needs of that particular State. To obtain Federal approval, the State plan must take into account the national interest and also coordinate activities with local governments and the public. This program therefore represents the necessary and important balance among Federal, State, and local concerns and presents the rare opportunity for communication so that as many of those interests as possible can be recognized. The resulting programs, now acquired by 27 States and territories, focus on the review and analysis of OCS exploration and development plans, assessment and analysis of the impacts of proposed uses of marine and coastal zone resources, expanded enforcement responsibility in all areas of environmental concern and resource management in the coastal zone, and expanded biological research activities.

Again, I do not think it is appropriate for the Federal Government to turn its back on these projects, especially at a time when accelerated offshore leasing is certain to generate additional State concerns. We cannot simply say that we are no longer concerned with offshore fisheries problems or the impact of energy development on the coastal zone, because in doing so we will damage the partnership we have so carefully crafted. H.R. 5543 establishes a fair and equitable method of providing a continuing Federal role in that partnership.

It must be recognized that our marine and coastal resources need to be conserved and managed, and that this must be considered as a policy of importance. The enactment of the 200-mile-limit law in 1976 represents the U.S. claim to jurisdiction over the resources out to 200 miles, and the appropriate conservation and management those resources impact heavily on coastal areas. The entire Nation benefits from the planning that occurs through existing laws.

H.R. 5543 recognizes, in its funding formula, the need for Congress to pay heed to existing pressures on coastal communities, as well as planning for future activities. I urge my colleagues to support H.R. 5543 so that we may in fact recognize and address the needs of coastal communities.●

Mr. JONES of North Carolina. Mr. Chairman, I have no further request for time, and I yield back the balance of my time.

The CHAIRMAN. Does the gentleman wish to make a motion at this point?

Mr. JONES of North Carolina. Yes, Mr. Chairman. I make a motion that the Committee do now rise.

The motion was agreed to.

Accordingly the Committee rose; and the Speaker pro tempore (Mr. BENNETT) having assumed the chair, Mr. SIMON, Chairman of the Committee of the Whole House on the State of the Union, reported that that Committee, having had under consideration the bill (H.R. 5543) to establish an ocean and coastal resources management and development fund and to require the Secretary of Commerce to provide to coastal States national ocean and resources management and development block grants from sums in the fund, had come to no resolution thereon.

PARLIAMENTARY INQUIRIES

Mr. JONES of North Carolina. Mr. Speaker, I have a parliamentary inquiry.

The SPEAKER pro tempore. The gentleman will state it.

Mr. JONES of North Carolina. Was not the bill supposed to have been read while we were sitting in the Committee of the Whole, read for amendments?

The SPEAKER pro tempore. Will the gentleman repeat his parliamentary inquiry?

Mr. JONES of North Carolina. Was it not proper that the bill should have been read for amendments while we were sitting at the Committee of the Whole?

The SPEAKER pro tempore. The Committee has risen now, and the Chair does not know of any way of automatically going back at this point to do that. If the Committee of the Whole had proceeded to consider the bill for amendment, it would have conflicted with a determination made by the leadership as to the legislative schedule, so the House should not resume consideration of the bill anyway at this point. In other words, the leadership had indicated that we would have general debate only today. So it would conflict with the understanding previously made that we would not get into the amendment process.

Mr. JONES of North Carolina. A further parliamentary inquiry, Mr. Speaker. Was that statement made here on the floor?

The SPEAKER pro tempore. The leadership decision was not announced on the floor, but it was a leadership decision.

Mr. JONES of North Carolina. Hopefully there are none, but should there be any amendments, at what point in time would a Member have the opportunity to present that amendment?

The SPEAKER pro tempore. When the bill is read. It will not cut off any procedure.

The Chair will take 1-minute speeches if any Member would like to make one.

Mr. JONES of North Carolina. A parliamentary inquiry, Mr. Speaker. We have not finished this bill.

The SPEAKER pro tempore. The gentleman is correct. But the leadership had determined the Committee would not go beyond general debate on the bill.

Mr. JONES of North Carolina. Mr. Speaker, another parliamentary inquiry, or statement. I was assured by the leadership that if there were no amendments, we would conclude the bill. I do not anticipate any amendments. The agreement was that if an amendment would be offered, then the Chairman would make a motion that the Committee do now rise, which I have not made.

The SPEAKER pro tempore. The Chair would observe that there are many amendments printed in the RECORD.

Mr. JONES of North Carolina. But, Mr. Speaker, they are not going to be offered. I am trying to avoid bringing this bill up again tomorrow.

Mr. SNYDER. Mr. Speaker, if the gentleman will yield, I said in my statement that I was not offering my 28 amendments. I understood we would finish the bill.

The SPEAKER pro tempore. The Committee of the Whole has risen. There is nothing in a parliamentary way the House could do to reserve consideration except to consider a motion to resolve into the Committee of the Whole for the further consideration of the bill.

Mr. JONES of North Carolina. A parliamentary inquiry, Mr. Speaker. Would I have the privilege as the Chairman of this committee to move that the House resolve itself into the Committee once again?

The SPEAKER pro tempore. The Chair's understanding is that the leadership does not want to entertain that motion, which would conflict with the legislative schedule.

Somebody has sent for the gentleman from California (Mr. WAXMAN), who will make a motion of equal privilege to arrive, and he is undoubtedly on his way. The Chair would be glad to respond to any further conversation that the gentleman would want to have on this subject which would be in order, until the gentleman arrives.

Mr. PRITCHARD. Mr. Speaker, I have a parliamentary inquiry.

Is it the ruling of the Chair that we cannot by unanimous consent go back into the Committee?

The SPEAKER pro tempore. The Chair is following the wishes of the leadership and, therefore, would not recognize any Member for the purpose of moving that the House resolve itself into the Committee of the Whole for further consideration of the bill at this time.

What the gentleman might do, he might contact the Speaker, perhaps after the next matter is taken care of. But it should not be done at this point without the consent of the Speaker.

The gentleman from California (Mr. WAXMAN) has now arrived, and he is recognized.

HEALTH PLANNING BLOCK GRANT ACT OF 1982

Mr. WAXMAN. Mr. Speaker, I move that the House resolve itself into the Committee of the Whole House on the State of the Union for the consideration of the bill (H.R. 6173) to amend the Public Health Service Act to replace title XV of such act with a block grant to States for health planning.

The SPEAKER pro tempore. The question is on the motion offered by the gentleman from California (Mr. WAXMAN).

The question was taken; and the Speaker pro tempore announced that the ayes appear to have it.

Mr. SNYDER. Mr. Speaker, I object to the vote on the ground that a quorum is not present and make the point of order that a quorum is not present.

The SPEAKER pro tempore. Evidently a quorum is not present.

The Sergeant at Arms will notify absent Members.

The vote was taken by electronic device, and there were—yeas 346, nays 11, not voting 75, as follows:

□ 1720

So the motion was agreed to.

The result of the vote was announced as above recorded.

IN THE COMMITTEE OF THE WHOLE

Accordingly the House resolved itself into the Committee of the Whole House on the State of the Union for the consideration of the bill, H.R. 6173, with Mr. D'AMOURS in the chair.

The Clerk read the title of the bill.

The CHAIRMAN. Pursuant to the bill, the first reading of the bill is dispensed with.

Under the rule, the gentleman from California (Mr. WAXMAN) will be recognized for 30 minutes, and the gentleman from Illinois (Mr. MADIGAN) will be recognized for 30 minutes.

The Chair recognizes the gentleman from California (Mr. WAXMAN).

Mr. WAXMAN. Mr. Chairman, I yield myself such time as I may consume.

Mr. Chairman, I rise in support of H.R. 6173, the Health Planning Block Grant Act of 1982.

The rule just agreed to for H.R. 6173, makes in order a motion to substitute the provisions of H.R. 7040 as the original text for the purpose of the consideration of amendments on the floor. This rule stems from an agreement among Mr. MADIGAN, Mr. SHELBY, Mr. BROYHILL, Mr. DINGELL, and myself to develop a consensus health planning bill. That consensus bill is H.R. 7040.

H.R. 7040 is the result of extensive work both by the committee members and by interested individuals and associations. The efforts of Mr. MADIGAN and Mr. SHELBY were especially important in shaping this legislation. Without their commitment and cooperation, the development of this bill would not have been possible.

As a result of the close cooperation of all those involved in its development, H.R. 7040 is supported by many health care associations. These include the Health Insurance Association of America, the Blue Cross and Blue Shield Association, the Washington Business Group on Health, the National Governors' Association, and the Catholic Health Association.

H.R. 7040 provides for limited Federal support for State-based certificate of need and health planning activities for fiscal years 1983 and 1984. Under this bill, health planning will be a more streamlined, focused program than that now described by title XV of the Public Health Service Act. Assistance to health systems agencies is, in particular, repealed.

The bill authorizes $64 million for fiscal year 1983 and $67 million for 1984. These authorizations reduce Federal spending for health planning by over 60 percent from the amount appropriated in 1980.

Under H.R. 7040, each State is allowed to decide whether it will have health planning agencies at the State level. There is no penalty for a State which elects not to participate in the program. Similarly, each State is to determine if there will be regional agencies within the State. Again, there is no penalty for a State which prefers not to have any regional agencies or which limits them to certain areas of the State.

In the case of States which choose to participate, H.R. 7040 provides Federal support for the direct operation of State agencies. Participating States must develop a State health plan and operate a certificate of need (CON) program. The primary focus of both the plan and the CON program are services provided by hospitals, nursing homes, and other health care facilities. The bill focuses CON review on major projects by requiring States to exempt all capital expenditures of less than $5 million, or $1 million under certain circumstances, from CON review.

Funds are also provided on an optional basis, through the States, to regional health planning agencies. These agencies are to assist the States in the development of health plans. They are not to conduct the first level CON review as HSA's do today. Where these agencies exist, a majority of their boards are to be drawn from elected public officials and other nonproviders.

To insure that the Nation's previous investment in health planning is not wasted, H.R. 7040 provides for a careful transition between the existing and the new health planning programs. Under this transition, funds are to be provided for agencies under the current authority until a State has decided whether or not it will participate in the new program. This transition is expected, under the terms of this bill, to take approximately 9 months.

Mr. Chairman, the Federal Government has supported State and regional health planning activities for more than 30 years. This support is justified by the concern that unlimited growth of individual hospitals and other health care facilities leads to increased health care costs.

Because the Federal Government, under medicare and medicaid, now pays over 35 percent of hospital costs, there is a substantial Federal interest in fostering an efficient hospital system. There is broad agreement that H.R. 7040 will provide a sound, streamlined health planning program to assist in the development of such an efficient system.

□ 1730

Mr. Chairman, I reserve the balance of my time.

Mr. MADIGAN. Mr. Chairman, I yield such time as he may consume to the gentleman from Alabama (Mr. SHELBY).

Mr. SHELBY. Mr. Chairman, as sponsor of a bill to repeal health planning, I think it must be obvious that I have had serious reservations about this program. The substitute bill that we have before us attempts to resolve many of the problems that have plagued the program and provides a fair compromise between continuation of the program as it is now and outright repeal. It gives us time to consider competitive alternatives to the burdensome certificate of need mechanism for preventing overexpansion.

I am sure you are all familiar with the problems that have been identified with health planning. I would like to go through some of them and tell you how this amendment addresses them.

First, this program has been a very expensive one. Before Congress began to curb appropriations for health planning, the appropriations hit a high in 1980 of $157.7 million. This bill authorizes $64 million for 1983 and $67.2 million for 1984.

Not only was the program expensive, but studies show we did not buy much with those dollars. In fact, we probably increased the cost of health services through unnecessary and inefficient CON reviews. This bill provides for a more sharply focused, streamlined program. The old threshold for CON review was so low that it caught in its net too many projects of minor significance. Most of these projects were eventually approved, but only after lengthy delays, initial rejections, and so forth, that added to the cost of the project. By increasing the threshold for CON reviews, only truly major projects with significant implications for health care costs will be reviewed. It is estimated that even with the lowest thresholds permitted by the amendment, over 50 percent of the projects that would have required a CON in 1980 could be pursued without CON reviews.

Another limitation the amendment imposes on delays in CON review is the requirement that state agencies review projects for completeness within 20 business days and approve or disapprove within another 110 business days.

Complaints of agency overreaching in the CON process have been ad-

dressed. Only State agencies can conduct the CON review; regional agencies are precluded from this authority. The CON review is prohibited from extending into the physician's office. HMO's, inherently cost-saving forms of health delivery, are exempted from CON reviews. And approval of a CON cannot be conditioned on compliance with some non-plan-related goal of the reviewers.

The current health planning law is the ultimate attempt to force a dynamic, diverse and localized system of medical care into a single Federal mold. I believe the health planning system envisioned in this amendment takes us in a better direction. First, it is voluntary. It is not federally imposed. For those States which choose to participate, control of the Program, for the most part, rests with the State, not the Federal Government. It is left to the Governor to decide if a State will have regional health planning agencies. Likewise, the Governor designates the regional areas and agencies and specifies the functions of the regional agencies. And to assure that regional agencies have local support and involvement, they are required to match 15 percent of the Federal allocation.

I urge each of you who has doubts about health planning to look at this proposal carefully. I believe it goes a long way toward remedying the problems that have plagued health planning in the past.

Mr. MADIGAN. Mr. Chairman, I yield myself such time as I may consume.

Mr. Chairman, I rise to speak in favor of H.R. 6173, the health planning block grant of 1982.

I would like to briefly trace the development of this legislation for the Members.

As you all know, health care cost inflation has been a principal concern of the Federal Government for some time. In particular, rapid increases in hospital costs have contributed to significant increases in Federal outlays for health care programs. Over the past decade, in-patient hospital costs have risen at an average annual rate in excess of 15 percent. During the same period, Federal medicare and medicaid outlays for hospital services alone rose approximately 17 percent per year. Many economists believe that excessive investment in hospital construction and equipment is a major cause of the growth in hospital costs. In response to this concern, the Congress in the early 1970's enacted legislation which came to be known as the Health Planning and Resources Development Act of 1974, Public Law 93-641. The intent of this legislation was to prevent unnecessary and costly hospital investment and to improve the distribution of health care services.

This act created a system of State and local health planning agencies. It also mandated that the States enact certificate of need (CON) legislation requiring State agency approval for hospital investment and new facilities, equipment, and services. Such approval was to be in conformance with predetermined State and local planning agency goals.

This program, commonly referred to as health planning, came up for reauthorization this year. Early this year, the subcommittee on health and the environment commenced hearings on the act. We took testimony from a broad array of witnesses. During our first hearing in March, I was very impressed by the testimony given our subcommittee by witnesses from Aetna Insurance Co., Bell Telephone, the Health Insurance Association of America, and other major corporations and associations who do not generally support intrusive government regulation. Nevertheless, these individuals and groups forthrightly supported the concept of a continued health planning program.

I, too, support a continued health planning function, funded in part by the Federal Government. My reasons, however, may be somewhat different from those of others. As I have stated on many occasions, both in Congress and other settings, I am not generally a supporter of Federal regulatory activities. With regard to the regulatory review process involved in health planning, however, I am a cautious supporter.

As a matter of fact, I am on record in support of repeal of health planning, title XV of the PHS Act. But, I have stated in committee and other places my concern that repeal of health planning without creation of an interim review program would be a mistake as flurry of capital commitment could follow repeal. I believe it is reasonable to assume that such a surge of capital commitment would further escalate the growth pattern of health care cost inflation. As health care expenditures continue to lead overall cost inflation, I believe that such a surge would bring a renewed push to more directly regulate this industry. Such moves would be unfortunate.

As a consequence, last spring I introduced H.R. 6173, a bill to both repeal title 15 of the Public Health Service Act and to create a new part D of title 19 of the Public Health Service Act. This new part D would be a block grant-type mechanism providing an optional program for State certificate of need activity.

At the same time, the chairman of our subcommittee, the gentleman from California (Mr. WAXMAN), introduced his bill H.R. 6084, to reauthorize and extend authorities for the existing title 15. Taking the other end of the argument, another colleague from the subcommittee, the gentleman from Alabama (Mr. SHELBY), introduced a bill providing for simple repeal of title 15.

Starting from these three quite distinct approaches, the Committee on Energy and Commerce drafted a balanced piece of legislation which we sincerely believe best addresses the needs for a modest regulatory program.

During consideration of H.R. 6173, the bill was amended by a substitute sponsored by myself and the gentleman from Alabama. That is the text of the bill H.R. 6173 before the House today.

This bill does not, however, contemplate the full intent of the Committee on Energy and Commerce. Rather, it is the text of the bill H.R. 7040 which reflects our intent. This bill, which we will offer as a substitute to the pending bill, is the product of 3 months of negotiation by interested members on the Commerce Committee. The content of the provisions of this substitute are fully discussed in House Report No. 97-784.

Numerous lengthy drafting sessions were held in a successful effort to flesh out a series of policy decisions made by Mr. SHELBY, Mr. WAXMAN, Mr. DINGELL, Mr. BROYHILL, and me. The successful effort is seen in the concurrence of these Members in their sponsorship of H.R. 7040.

The gentleman from California and I will discuss the particulars of this substitute when we offer it to the House for consideration. In the meantime, however, I would like to briefly give you my perspective.

H.R. 7040 expands the concepts laid out in H.R. 6173, the bill authorizes grants to States for the operation of certificate of need programs. These CON programs are to be constructed that participating States will use so-called State health plans as the decisionmaking basis for CON review.

In a departure from H.R. 6173, the substitute provides for discretionary grants for local health planning agencies. States which choose to participate will be provided Federal funds to assist in the operation of these local health planning agencies.

Further, H.R. 7040 provides for the Secretary of Health and Human Services to designate a technical research and assistance agency. The bill also provides for a flexible transition period during which the activities under existing title 15 and the new activities under this bill will be meshed.

Finally, the bill includes a "sunset" provision, under which the act will be automatically repealed following the end of the third successive fiscal year following enactment.

Mr. Chairman, I trust that this brief summary will assist the Members in

their initial deliberations. I can assure you that we have given this matter serious and sustained attention. I am quite pleased with the result and I urge the adoption of H.R. 6173 as amended by the substitute we will offer at the appropriate time.

Thank you.

● Mr. CORRADA. Mr. Chairman, I rise in support of H.R. 6173, as amended to replace title XV of the Public Health Service Act with a block grant to States for health planning.

The purpose of this bill is to provide limited Federal support for State-based certificate of need and health planning programs and to create a more streamlined, targeted program than that now authorized by title XV of the Public Health Service Act. This bill provided Federal support for the direct operation of State agencies and, by the allocation of funds through the States, for regional health planning agencies.

I am pleased to know that Puerto Rico and other U.S. territories are included in this legislation. As the committee notes on page 87 of its report, by not providing a specific definition of a State, the bill incorporates the provision of section 2(F) of the Public Health Service Act. Under this section, the District of Columbia, Guam, Puerto Rico, the Northern Mariana Islands, the Virgin Islands, American Samoa, and the Trust Territory of the Pacific Islands are all eligible to participate in the program if they choose.

The Office of Planning and Evaluation has become a central tool to Puerto Rico. It provides the assessment, planning, evaluation, and monitoring function for all Federal programs in the health care and for the implementation of the block grants. Also, the continuing funding to the local health system agency is very important to insular areas who are still developing adequate medical facilities to serve their populations. These funds are the basis of their health system planning making sure that decent medical care is available to their citizens.

Health planning and development has become in Puerto Rico as well in the Nation a very important tool in halting the runaway increase in health care costs while assuring the accessibility of quality health care by carefully assessing the need for new or additional health facilities to provide services. It would not be wise to eliminate this important mechanism at a time in which health care costs have increased so drastically.

The need in Puerto Rico and other States for health planning development has become more necessary with the substantially increased role of the State government in assuming many of the responsibilities formerly carried out by the Federal Government. Faced with the need to optimize all available resources and to carefully evaluate all existing services and projects the increase for planning and evaluation is a must.

At a time when available resources have significantly decreased at the National and State level and that the health care needs of the people have increased the need for continuing health planning and development activities is imperative.

I urge my colleagues to vote for H.R. 6173 and thank them for their support.●

Mr. WAXMAN. Mr. Chairman, we have no requests for time, and I yield back the balance of our time.

Mr. MADIGAN. Mr. Chairman, I yield back the balance of my time.

Mr. WAXMAN. Mr. Chairman, I move that the Committee do now rise.

The motion was agreed to.

Accordingly the Committee rose; and the Speaker pro tempore (Mr. BENNETT) having assumed the chair, Mr. D'AMOURS, Chairman of the Committee of the Whole House on the State of the Union, reported that that Committee, having had under consideration the bill (H.R. 6173) to amend the Public Health Service Act to replace title XV of such act with a block grant to States for health planning, had come to no resolution thereon.

CONFERENCE REPORT ON S. 1409, BUFFALO BILL DAM, RECLAMATION REFORM, AND PAPAGO INDIAN WATER RIGHTS

Mr. KAZEN submitted the following conference report and statement on the Senate bill (S. 1409) to authorize the Secretary of the Interior to construct, operate, and maintain modifications of the existing Buffalo Bill Dam and Reservoir, Shoshone project, Pick-Sloan Missouri Basin program, Wyoming, and for other purposes:

CONFERENCE REPORT (H. REPT. No. 97-855)

The committee of conference on the disagreeing votes of the two Houses on the amendment of the Senate to the amendment of the House to the bill (S. 1409) to authorize the Secretary of the Interior to construct, operate, and maintain modifications of the existing Buffalo Bill Dam and Reservoir, Shoshone project, Pick-Sloan Missouri Basin program, Wyoming, and for other purposes, having met, after full and free conference, have agreed to recommend and do recommend to their respective Houses as follows:

That the House recede from its disagreement to the amendment of the Senate to the amendment of the House and agree to the same with an amendment as follows:

In lieu of the matter proposed to be inserted by the Senate amendment, insert the following:

TITLE I

CONSTRUCTION OF DAM MODIFICATIONS

SEC. 101. The Secretary of the Interior, acting pursuant to Federal reclamation law (Act of June 17, 1902, 32 Stat. 388 and Acts amendatory thereof and supplemental thereto), is hereby authorized to construct, operate, and maintain modifications to the Buffalo Bill Dam and Reservoir, Shoshone project, Pick-Sloan Missouri Basin program, Wyoming, for the purposes of providing approximately seventy-four thousand acre-feet of additional water annually for irrigation, municipal and industrial use, increased hydroelectric power generation, outdoor recreation, fish and wildlife conservation and development, environmental quality, and other purposes. The principal modifications to the Buffalo Bill Dam and Reservoir shall include raising the height of the existing Buffalo Bill Dam by twenty-five feet, enlarging the capacity of the existing Buffalo Bill Reservoir by approximately two hundred and seventy-one thousand acre-feet, replacing the existing Shoshone Powerplant, enlarging a spillway, construction of a visitor's center, dikes and impoundments, and necessary facilities to effect the aforesaid purposes of the modifications. These modifications are hereby authorized as part of the Pick-Sloan Missouri Basin program: Provided, That the powerplant authorized by this section shall be designed, constructed, and operated in such a manner as to not limit, restrict, or alter the release of water from any existing reservoir, impoundment, or canal adverse to the satisfaction of valid existing water rights or water delivery to the holder of any valid water service contract.

CONSERVATION AND FISH AND WILDLIFE

SEC. 102. The conservation and development of the fish and wildlife resources and the enhancement of recreation opportunities in connection with the modification of Buffalo Bill Dam and Reservoir shall be in accordance with the Federal Water Project Recreation Act (79 Stat. 213), as amended.

COORDINATION WITH OTHER LAWS

SEC. 103. The modifications of the Buffalo Bill Dam and Reservoir shall be integrated physically and financially with the other Federal works constructed under the comprehensive plan approved by section 9 of the Flood Control Act of December 22, 1944 (58 Stat. 887, 891), as amended and supplemented. Revenues for the return of costs allocated to power shall be determined by power rate and repayment analysis of the Pick-Sloan Missouri Basin program. Repayment contracts for the return of costs allocated to municipal and industrial water and irrigation water supplies exclusive of State participation pursuant to section 107 shall be negotiated under provisions of the Reclamation Project Act of 1939 (53 Stat. 1198) or the Water Supply Act of 1958 (72 Stat. 320), as amended, and shall be prerequisite to the initiation of construction of facilities for this purpose. Costs allocated to environmental quality shall be nonreimbursable and nonreturnable under Federal reclamation law.

TRANSMISSION INTERCONNECTIONS

SEC. 104. (a) The Secretary of Energy is authorized to construct, operate, and maintain transmission interconnections as required physically to interconnect the hydroelectric powerplant authorized by this title to existing power systems as he determines necessary to accomplish distribution and marketing of the power generated.

(b) Hydroelectric power generated by the facility constructed pursuant to this title shall be delivered to the Secretary of Energy for distribution and marketing. Such facility shall be financially integrated with the Western Division, Pick-Sloan Missouri Basin program power system and the power

marketed under rate schedules in effect for such system.

INTEREST

SEC. 105. The interest rate used for computing interest during construction and interest on the unpaid balance of the reimbursable costs of the Buffalo Bill Dam and Reservoir modifications shall be determined by the Secretary of the Treasury, as of the beginning of the fiscal year in which construction of the unit is commenced, on the basis of the computed average interest rate payable by the Treasury upon its outstanding marketable public obligations which are neither due nor callable for fifteen years from date of issue.

AUTHORIZATION FOR APPROPRIATIONS

SEC. 106. (a) There is hereby authorized to be appropriated beginning October 1, 1982, for construction of the Buffalo Bill Dam and Reservoir modifications the sum of $106,700,000 (October 1982 price levels) plus or minus such amounts, if any, as may be required by reason of ordinary fluctuations in construction costs as indicated by engineering cost indexes applicable to the types of construction involved herein and, in addition thereto, such sums as may be required for operation, maintenance, and replacement of the works of said modifications: Provided, That, such sums authorized to be appropriated for construction, operation, maintenance, and replacement shall be reduced by the amounts contributed to the project under the provisions of section 107 of this title.

(b) There is also authorized to be appropriated beginning October 1, 1982, such sums as may be required by the Secretary of Energy to accomplish interconnection of the powerplant authorized by this title, together with such sums as may be required for operation and maintenance of the works authorized by section 104(a).

CONTRACTS AUTHORITY

SEC. 107. The Secretary of the Interior is authorized to enter into contracts with the State of Wyoming, upon such terms and conditions as he deems necessary, for the division of additional water impounded by the modifications, the sharing of revenues from the modifications, and the sharing of the costs of construction, operation, maintenance, and replacement of the Buffalo Bill Dam and Reservoir modifications.

TITLE II

SHORT TITLE

SEC. 201. This title shall amend and supplement the Act of June 17, 1902, and Acts supplementary thereto and amendatory thereof (43 U.S.C. 371), hereinafter referred to as "Federal reclamation law". This title may be referred to as the "Reclamation Reform Act of 1982".

DEFINITIONS

SEC. 202. As used in this title:

(1) The term "contract" means any repayment or water service contract between the United States and a district providing for the payment of construction charges to the United States including normal operation, maintenance, and replacement costs pursuant to Federal reclamation law.

(2) The term "district" means any individual or any legal entity established under State law which has entered into a contract or is eligible to contract with the Secretary for irrigation water.

(3)(A) The term "full cost" means an annual rate as determined by the Secretary that shall amortize the expenditures for construction properly allocable to irrigation facilities in service, including all operation and maintenance deficits funded, less payments, over such periods as may be required under Federal reclamation law or applicable contract provisions, with interest on both accruing from the date of enactment of this Act on costs outstanding at that date, or from the date incurred in the case of costs arising subsequent to the date of enactment of this Act: Provided, That operation, maintenance, and replacement charges required under Federal reclamation law, including this title, shall be collected in addition to the full cost charge.

(B) The interest rate used for expenditures made on or before the date of enactment of this Act shall be determined by the Secretary of the Treasury on the basis of the weighted average yield of all interest bearing, marketable issues sold by the Treasury during the fiscal year in which the expenditures by the United States were made, but shall not be less than seven and one-half per centum per annum.

(C) The interest rate used for expenditures made after the date of enactment of this Act shall be determined by the Secretary of the Treasury on the basis of the arithmetic average of—

(i) the rate as of the beginning of the fiscal year in which expenditures are made on the basis of the computed average interest rate payable by the Treasury upon its outstanding marketable public obligations which are neither due nor callable for redemption for fifteen years from the date of issuance; and

(ii) the weighted average yield on all interest-bearing, marketable issues sold by the Treasury during the fiscal year preceding the fiscal year in which the expenditures are made.

(4) The term "individual" means any natural person, including his or her spouse, and including other dependents thereof within the meaning of the Internal Revenue Code of 1954 (26 U.S.C. 152).

(5) The term "irrigation water" means water made available for agricultural purposes from the operation of reclamation project facilities pursuant to a contract with the Secretary.

(6) The term "landholding" means total irrigable acreage of one or more tracts of land situated in one or more districts owned or operated under a lease which is served with irrigation water pursuant to a contract with the Secretary. In determining the extent of a landholding the Secretary shall add to any landholding held directly by a qualified or limited recipient that portion of any landholding held indirectly by such qualified or limited recipient which benefits that qualified or limited recipient in proportion to that landholding.

(7) The term "limited recipient" means any legal entity established under State or Federal law benefiting more than twenty-five natural persons.

(8) The term "project" means any reclamation or irrigation project, including incidental features thereof, authorized by Federal reclamation law, or constructed by the United States pursuant to such law, or in connection with which there is a repayment or water service contract executed by the United States pursuant to such law, or any project constructed by the Secretary through the Bureau of Reclamation for the reclamation of lands.

(9) The term "qualified recipient" means an individual who is a citizen of the United States or a resident alien thereof or any legal entity established under State or Federal law which benefits twenty-five natural persons or less.

(10) The term "recordable contract" means a contract between the Secretary and a landowner in writing capable of being recorded under State law providing for the sale or disposition of lands held in excess of the ownership limitations of Federal reclamation law including this title.

(11) The term "Secretary" means the Secretary of the Interior.

NEW OR AMENDED CONTRACTS

SEC. 203. (a) The provisions of this title shall be applicable to any district which—

(1) enters into a contract with the Secretary subsequent to the date of enactment of this Act;

(2) enters into any amendment of its contract with the Secretary subsequent to the date of enactment of this Act which enables the district to receive supplemental or additional benefits; or

(3) which amends its contract for the purpose of conforming to the provisions of this title.

(b) Any district which has an existing contract with the Secretary as of the date of enactment of this Act which does not enter into an amendment of such contract as specified in subsection (a) shall be subject to Federal reclamation law in effect immediately prior to the date of enactment of this Act, as that law is amended or supplemented by sections 209 through 230 of this title. Within a district that does not enter into an amendment of its contract with the Secretary within four and one-half years of the date of enactment of this Act, irrigation water may be delivered to lands leased in excess of a landholding of one hundred and sixty acres only if full cost, as defined in section 202(3)(A) of this title, is paid for such water as is assignable to those lands leased in excess of such landholding of one hundred and sixty acres: Provided, That the interest rate used in computing full cost under this subsection shall be the same as provided in section 205(a)(3).

(c) In the absence of an amendment to a contract, as specified in subsection (a), a qualified recipient or limited recipient may elect to be subject to the provisions of this title by executing an irrevocable election in a form approved by the Secretary to comply with this title. The district shall thereupon deliver irrigation water to and collect from such recipient, for the credit of the United States, the additional charges required by this title and assignable to the recipient making the election.

(d) Amendments to contracts which are not required by the provisions of this title shall not be made without the consent of the non-Federal party.

LIMITATION ON OWNERSHIP

SEC. 204. Except as provided in section 209 of this title, irrigation water may not be delivered to—

(1) a qualified recipient for use in the irrigation of lands owned by such qualified recipient in excess of nine hundred and sixty acres of class I lands or the equivalent thereof; or

(2) a limited recipient for the use in the irrigation of lands owned by such limited recipient in excess of six hundred and forty acres of class I lands or the equivalent thereof;

whether situated in one or more districts.

PRICING

SEC. 205. (a) Notwithstanding any other provision of law, any contract with a district entered into by the Secretary as specified in section 203, shall provide for the de-

livery of irrigation water at full cost as defined in section 202(3) to:

(1) a landholding in excess of nine hundred and sixty acres of class I lands or the equivalent thereof for a qualified recipient,

(2) a landholding in excess of three hundred and twenty acres of class I land or the equivalent thereof for a limited recipient receiving irrigation water on or before October 1, 1981; and

(3) the entire landholding of a limited recipient not receiving irrigation water on or before October 1, 1981: Provided, That the interest rate used in computing full cost under this paragraph shall be determined by the Secretary of the Treasury on the basis of the arithmetic average of—

(A) the computed average interest rate payable by the Treasury upon its outstanding marketable public obligations which are neither due nor callable for redemption for fifteen years from the date of issuance; and

(B) the weighted average of market yields on all interest-bearing, marketable issues sold by the Treasury

during the fiscal year preceding the fiscal year in which the expenditures are made, or the date of enactment of this Act for expenditures made before such date of enactment.

(b) Any contract with a district entered into by the Secretary as specified in section 203, shall provide for the delivery of irrigation water to lands not in excess of the landholdings described in subsection (a) upon terms and conditions related to pricing established by the Secretary pursuant to Federal reclamation law in effect immediately prior to the date of enactment of this Act, or, in the case of an amended contract, upon the terms and conditions established by such contract prior to the date of its amendment. However, the portion of any price established under this subsection which relates to operation and maintenance charges shall be established pursuant to section 208 of this title.

(c) Notwithstanding any extension of time of any recordable contract as provided in section 209(e) of this title, lands under recordable contract shall be eligible to receive irrigation water at less than full cost for a period not to exceed ten years from the date such recordable contract was executed by the Secretary in the case of contracts existing prior to the date of enactment of this Act, or five years from the date such recordable contract was executed by the Secretary in the case of contracts entered into subsequent to the date of enactment, or the time specified in section 218 for lands described in that section: Provided, That in no case shall the right to receive water at less than full cost under this subsection terminate sooner than 18 months after the date on which the Secretary again commences the processing or the approval of the disposition of such lands.

CERTIFICATION

SEC. 206. As a condition to the receipt of irrigation water for lands in a district which has a contract as specified in section 203, each landowner and lessee within such district shall furnish the district, in a form prescribed by the Secretary, a certificate that they are in compliance with the provisions of this title including a statement of the number of acres leased, the term of any lease, and a certification that the rent paid reflects the reasonable value of the irrigation water to the productivity of the land. The Secretary may require any lessee to submit to him, for his examination, a complete copy of any such lease executed by each of the parties thereto.

EQUIVALENCY

SEC. 207. Upon the request of any district, the ownership and pricing limitations imposed by this title shall apply to the irrigable lands classified within such district by the Secretary as having class I productive potential or the equivalent thereof in larger acreage of less productive potential, as determined by the Secretary, taking into account all factors which significantly affect productivity, including but not limited to topography, soil characteristics, length of growing season, elevation, adequacy of water supply, and crop adaptability.

OPERATION AND MAINTENANCE CHARGES

SEC. 208. (a) The price of irrigation water delivered by the Secretary pursuant to a contract or an amendment to a contract with a district, as specified in section 203, shall be at least sufficient to recover all operation and maintenance charges which the district is obligated to pay to the United States.

(b) Whenever a district enters into a contract or requests that its contract be amended as specified in section 203, and each year thereafter, the Secretary shall calculate such operation and maintenance charges and shall modify the price of irrigation water delivered under the contract as necessary to reflect any changes in such costs by amending the district's contract accordingly.

(c) This section shall not apply to districts which operate and maintain project facilities and finance the operation and maintenance thereof from non-Federal funds.

DISPOSITION OF EXCESS LANDS

SEC. 209. (a) Irrigation water made available in the operation of reclamation project facilities may not be delivered for use in the irrigation of lands held in excess of the ownership limitations imposed by Federal reclamation law, including this title, unless and until the owners thereof shall have executed a recordable contract with the Secretary, in accordance with the terms and conditions required by Federal reclamation law, requiring the disposal of their interest in such excess lands within a reasonable time to be established by the Secretary. In the case of recordable contracts entered into prior to the date of enactment of this Act, such reasonable time shall not exceed ten years after the recordable contract is executed by the Secretary. In the case of recordable contracts entered into after the date of enactment of this Act, except as provided in section 218, such reasonable time shall not exceed five years after the recordable contract is executed by the Secretary.

(b) Lands held in excess of the ownership limitations imposed by Federal reclamation law, including this title, which, on the date of enactment of this Act, are, or are capable of, receiving delivery of irrigation water made available by the operation of existing reclamation project facilities may receive such deliveries only—

(1) if the disposal of the owner's interest in such lands is required by an existing recordable contract with the Secretary, or

(2) if the owners of such lands have requested that a recordable contract be executed by the Secretary.

(c) Recordable contracts existing on the date of enactment of this Act shall be amended at the request of the landowner to conform with the ownership limitations contained in this title: Provided, That the time period for disposal of excess lands specified in the existing recordable contract shall not be extended except as provided in subsection (e).

(d) Any recordable contract covering excess lands sales shall provide that a power of attorney shall vest in the Secretary to sell any excess lands not disposed of by the owners thereof within the period of time specified in the recordable contract. In the exercise of that power, the Secretary shall sell such lands through an impartial selection process only to qualified purchasers according to such reasonable rules and regulations as the Secretary may establish: Provided, That the Secretary shall recover for the owner the fair market value of the land unrelated to irrigation water deliveries plus the fair market value of improvements thereon.

(e) In the event that the owner of any lands in excess of the ownership limitations of Federal reclamation law has heretofore entered into a recordable contract with the Secretary for the disposition of such excess lands and has been prevented from disposing of them because the Secretary may have withheld the processing or approval of the disposition of the lands (whether he may have been compelled to do so by court order or for other reasons), the period of time for the disposal of such lands by the owner thereof pursuant to the contract shall be extended from the date on which the Secretary again commences the processing or the approval of the disposition of such lands for a period which shall be equal to the remaining period of time under the recordable contract for the disposal thereof by the owner at the time the decision of the Secretary to withhold the processing or approval of such disposition first became effective.

(f) Excess lands which have been or may be disposed of in compliance with Federal reclamation law, including this title, shall not be considered eligible to receive irrigation water unless—

(1) they are held by nonexcess owners; and

(2) in the case of disposals made after the date of enactment of this Act, their title is burdened by a covenant prohibiting their sale, for a period of ten years after their original disposal to comply with Federal reclamation law, including this title, for values exceeding the sum of the value of newly added improvements and the value of the land as increased by market appreciation unrelated to the delivery of irrigation water. Upon expiration of the terms of such covenant, the title to such lands shall be freed of the burden of any limitations on subsequent sale values which might otherwise be imposed by the operation of section 46 of the Act entitled "An Act to adjust water rights charges, to grant certain relief on the Federal irrigation projects, and for other purposes", approved May 25, 1926 (43 U.S.C. 423e).

WATER CONSERVATION

SEC. 210. (a) The Secretary shall, pursuant to his authorities under otherwise existing Federal reclamation law, encourage the full consideration and incorporation of prudent and responsible water conservation measures in the operations of non-Federal recipients of irrigation water from Federal reclamation projects, where such measures are shown to be economically feasible for such non-Federal recipients.

(b) Each district that has entered into a repayment contract or water service contract pursuant to Federal reclamation law or the Water Supply Act of 1958, as amended (43 U.S.C. 390b), shall develop a water conservation plan which shall contain definite goals, appropriate water conservation meas-

ures, and a time schedule for meeting the water conservation objectives.

(c) The Secretary is authorized and directed to enter into memorandums of agreement with those Federal agencies having capability to assist in implementing water conservation measures to assure coordination of ongoing programs. Such memorandums should provide for involvement of non-Federal entities such as States, Indian tribes, and water user organizations to assure full public participation in water conservation efforts.

RESIDENCY NOT REQUIRED

SEC. 211. Notwithstanding any other provision of law, irrigation water made available from the operation of reclamation project facilities shall not be withheld from delivery to any project lands for the reason that the owners, lessees, or operators do not live on or near them.

CORPS OF ENGINEERS PROJECTS

SEC. 212. (a) Notwithstanding any other provision of law, neither the ownership or pricing limitation provisions nor the other provisions of Federal reclamation law, including this title, shall be applicable to lands receiving benefits from Federal water resources projects constructed by the United States Army Corps of Engineers, unless—

(1) the project has, by Federal statute, explicitly been designated, made a part of, or integrated with a Federal reclamation project; or

(2) the Secretary, pursuant to his authority under Federal reclamation law, has provided project works for the control or conveyance of an agricultural water supply for the lands involved.

(b) Notwithstanding any other provision of this section to the contrary, obligations that require water users, pursuant to contracts with the Secretary, to repay the share of construction costs and to pay the share of the operation and maintenance and contract administrative costs of a Corps of Engineers project which are allocated to conservation storage or irrigation storage shall remain in effect.

REPAYMENT OF CONSTRUCTION CHARGES

SEC. 213. (a) The ownership and full cost pricing limitations of this title and the ownership limitations provided in any other provision of Federal reclamation law shall not apply to lands in a district after the obligation of a district for the repayment of the construction costs of the project facilities used to make project water available for delivery to such lands shall have been discharged by a district (or by a person within the district pursuant to a contract existing on the date of enactment of this Act), by payment of periodic installments throughout a specified contract term, including individual or district accelerated payments where so provided in contracts existing on the date of enactment of this Act.

(b)(1) The Secretary shall provide, upon request of any owner of a landholding for which repayment has occurred, a certificate acknowledging that the landholding is free of the ownership or full cost pricing limitation of Federal reclamation law. Such certificate shall be in a form suitable for entry in the land records of the county in which such landholding is located.

(2) Any certificate issued by the Secretary prior to the date of enactment of this Act acknowledging that the landholding is free of the acreage limitation of Federal reclamation law is hereby ratified.

(c) Nothing in this title shall be construed as authorizing or permitting lump sum or accelerated repayment of construction costs, except in the case of a repayment contract which is in effect upon the date of enactment of this Act and which provides for such lump sum or accelerated repayment by an individual or district.

TRUSTS

SEC. 214. The ownership and full cost pricing limitations of this title and the ownership limitations provided in any other provision of Federal reclamation law shall not apply to lands in a district which are held by an individual or corporate trustee in a fiduciary capacity for a beneficiary or beneficiaries whose interests in the lands served do not exceed the ownership and pricing limitations imposed by Federal reclamation law, including this title.

TEMPORARY SUPPLIES OF WATER

SEC. 215. (a) Neither the ownership limitations of this title nor the ownership limitations of any other provision of Federal reclamation law shall apply to lands which receive only a temporary, not to exceed one year, supply of water made possible as a result of—

(1) an unusually large water supply not otherwise storable for project purposes; or

(2) infrequent and otherwise unmanaged flood flows of short duration.

(b) The Secretary shall have the authority to waive payments for a supply of water described in subsection (a).

INVOLUNTARY FORECLOSURE

SEC. 216. Neither the ownership limitations of this title nor the ownership limitations of any other provision of Federal reclamation law shall apply to lands when the lands are acquired by involuntary foreclosure, or similar involuntary process of law, by bona fide conveyance in satisfaction of a debt (including, but not limited to, a mortgage, real estate contract, or deed of trust), by inheritance, or by devise: Provided, That such lands were eligible to receive irrigation water prior to such transfer of title or the mortgaged lands became ineligible to receive water after the mortgage is recorded but before it is acquired by involuntary foreclosure or similar involuntary process of law or by bona fide conveyance in satisfaction of mortgage: Provided further, That if, after acquisition, such lands are not qualified under Federal reclamation law, including this title, they shall be furnished temporarily with an irrigation water supply for a period not exceeding five years from the effective date of such an acquisition, delivery of irrigation water thereafter ceasing until the transfer thereof to a landowner qualified under such laws: Provided further, That the provisions of section 205 of this title shall be applicable separately to each acquisition under this section if the lands are otherwise subject to the provisions of section 205.

ISOLATED TRACTS

SEC. 217. Neither the ownership limitations of this title nor the ownership limitations of any other provision of Federal reclamation law shall apply to lands which are isolated tracts found by the Secretary to be economically farmable only if they are included in a larger farming operation but which may, as a result of their inclusion in that operation, cause it to exceed such ownership limitations.

CENTRAL ARIZONA PROJECT

SEC. 218. Lands receiving irrigation water pursuant to a contract with the Secretary as authorized under title III of the Colorado River Basin Project Act (82 Stat. 887; 43 U.S.C. 1521 et seq.) which are placed under recordable contract shall be eligible to receive irrigation water upon terms and conditions related to pricing established by the Secretary pursuant to Federal reclamation law in effect immediately prior to the date of enactment of this Act, for a period of time not to exceed 10 years from the date such lands are capable of being served with irrigation water, as determined by the Secretary.

RELIGIOUS OR CHARITABLE ORGANIZATIONS

SEC. 219. An individual religious or charitable entity or organization (including but not limited to a congregation, parish, school, ward, or chapter) which is exempt from taxation under section 501 of the Internal Revenue Code of 1954, as amended, and which owns, operates, or leases any lands within a district shall be treated as an individual under the provisions of this title regardless of such entity or organization's affiliation with a central organization or its subjugation to a hierarchical authority of the same faith and regardless of whether or not the individual entity is the owner of record if—

(1) the agricultural produce and the proceeds of sales of such produce are directly used only for charitable purposes;

(2) said land is operated by said individual religious or charitable entity or organization (or subdivisions thereof); and

(3) no part of the net earnings of such religious or charitable entity or organization (or subdivision thereof) shall inure to the benefit of any private shareholder or individual.

CONTRACT REQUIRED

SEC. 220. Irrigation water temporarily made available from reclamation facilities in excess of ordinary quantities not otherwise storable for project purposes or at times when such irrigation water would not have been available without the operations of those facilities, may be used for irrigation, municipal, or industrial purposes only to the extent covered by a contract requiring payment for the use of such irrigation water, executed in accordance with the Reclamation Project Act of 1939, or other applicable provisions of Federal reclamation law.

WAIVER OF SOVEREIGN IMMUNITY

SEC. 221. Consent is given to join the United States as a necessary party defendant in any suit to adjudicate, confirm, validate, or decree the contractual rights of a contracting entity and the United States regarding any contract executed pursuant to Federal reclamation law. The United States, when a party to any suit, shall be deemed to have waived any right to plead that it is not amenable thereto by reason of its sovereignty, and shall be subject to judgments, orders, and decrees of the court having jurisdiction, and may obtain review thereof, in the same manner and to the same extent as a private individual under like circumstances. Any suit pursuant to this section may be brought in any United States district court in the State in which the land involved is situated.

EXCESS CROP RESTRICTIONS

SEC. 222. (a) Within one year of the date of enactment of this Act, the Secretary of Agriculture, with the cooperation of the Secretary of the Interior, shall transmit to the Congress a report on the production of surplus crops on acreage served by irrigation water. The report shall include—

(1) data delineating the production of surplus crops on lands served by irrigation water;

(2) the percentage of participation of farms served by irrigation water in set-aside programs, by acreage, crop, and State;

(3) the feasibility and appropriateness of requiring the participation in acreage set-aside programs of farms served by irrigation water and the costs of such a requirement; and

(4) any recommendations concerning how to coordinate national reclamation policy with agriculture policy to help alleviate recurring problems of surplus crops and low commodity prices.

(b) In addition, notwithstanding any other provision of law, in the case of any Federal reclamation project authorized before the date of enactment of this Act, any restriction prohibiting the delivery of irrigation water for the production of excess basic agricultural commodities shall extend for a period no longer than ten years after the date of the initial authorization of such project.

SMALL RECLAMATION PROJECTS ACT

SEC. 223. Section 5(c)(2) of the Act of August 6, 1956 (43 U.S.C. 422e), is amended by striking out "by any one owner in excess of one hundred and sixty irrigable acres;" and inserting in lieu thereof "by a qualified recipient, as such term is defined in section 202 of the Reclamation Reform Act of 1982, in excess of nine hundred and sixty irrigable acres, or by a limited recipient, as such term is defined in section 202 of the Reclamation Reform Act of 1982, in excess of three hundred and twenty irrigable acres;".

ADMINISTRATIVE PROVISIONS

SEC. 224. (a) The provisions of Federal reclamation law shall remain in full force and effect, except to the extent such law is amended by, or is inconsistent with, this title.

(b) Nothing in this title shall repeal or amend any existing statutory exemptions from the ownership or pricing limitation of Federal reclamation law.

(c) The Secretary may prescribe regulations and shall collect all data necessary to carry out the provisions of this title and other provisions of Federal reclamation law.

(d) Section 3 of the Act of July 7, 1970 (43 U.S.C. 425b) is amended by striking the phrase "for a period not to exceed twenty-five years" following the term "project water".

(e) Any nonexcess land which is acquired into excess status pursuant to involuntary foreclosure or similar involuntary process of law, conveyance in satisfaction of a debt (including, but not limited to, a mortgage, real estate contract, or deed of trust), inheritance, or devise, may be sold at its fair market value without regard to any other provision of this title or to section 46 of the Act entitled "An Act to adjust water rights charges, to grant certain relief on the Federal irrigation projects, and for other purposes", approved May 25, 1926 (43 U.S.C. 423e): Provided, That if the status of mortgaged land changes from nonexcess into excess after the mortgage is recorded and is subsequently acquired by the lender by involuntary foreclosure or similar involuntary process of law, by bona fide conveyance in satisfaction of the mortgage, such land may be sold at its fair market value.

(f) The first proviso in the third paragraph of section 1 of the Act of April 4, 1910 (36 Stat. 269, 270), as amended by the Act of August 7, 1946 (60 Stat. 866, 867) is hereby repealed.

VALIDATION

SEC. 225. The provisions of any contract entered into prior to October 1, 1981, by the Secretary with a district, which define project or nonproject water, or describe the delivery of project water through nonproject facilities or nonproject water through project facilities to lands within the district, are hereby authorized and validated on the part of the United States.

PUBLIC PARTICIPATION

SEC. 226. Section 9 of the Reclamation Project Act of 1939 (43 U.S.C. 485h) is amended by adding at the end the following new subsection:

"(f) No less than sixty days before entering into or amending any repayment contract or any contract for the delivery of irrigation water (except any contract for the delivery of surplus or interim irrigation water whose duration is for one year or less) the Secretary shall—

"(1) publish notice of the proposed contract or amendment in newspapers of general circulation in the affected area and shall make reasonable efforts to otherwise notify interested parties which may be affected by such contract or amendment, together with information indicating to whom comments or inquiries concerning the proposed actions can be addressed; and

"(2) provide an opportunity for submission of written data, views and arguments, and shall consider all substantive comments so received.".

LEASING REQUIREMENTS

SEC. 227. Notwithstanding any other provision of Federal reclamation law, including this title, lands which receive irrigation water may be leased only if the lease instrument is—

(1) written; and

(2) for a term not to exceed ten years, including any exercisable options: Provided, however, That leases of lands for the production of perennial crops having an average life of more than ten years may be for periods of time equal to the average life of the perennial crop but in any event not to exceed twenty-five years.

REPORTING

SEC. 228. Any contracting entity subject to the ownership or pricing limitation of Federal reclamation law shall compile and maintain such records and information as the Secretary deems reasonably necessary to implement this title and Federal reclamation law. On a date set by the Secretary following the date of enactment of this Act, and annually thereafter, every such contracting entity shall provide in a form suitable to the Secretary such reports on the above matters as the Secretary may require.

COMMISSIONER OF RECLAMATION

SEC. 229. The Act of May 26, 1926 (44 Stat. 657) is amended by adding the words "by and with the advice and consent of the Senate" after the word "President".

SEVERABILITY

SEC. 230. If any provision of this title or the applicability thereof to any person or circumstances is held invalid, the remainder of this title and the application of such provision to other persons or circumstances shall not be affected thereby.

TITLE III

CONGRESSIONAL FINDINGS

SEC. 301. The Congress finds that—

(1) water rights claims of the Papago Tribe with respect to the San Xavier Reservation and the Schuk Toak District of the Sells Papago Reservation are the subject of existing and prospective lawsuits against numerous parties in southern Arizona, including major mining companies, agricultural interests, and the city of Tucson;

(2) these lawsuits not only will prove expensive and time consuming for all participants, but also could have a profound adverse impact upon the health and development of the Indian and non-Indian economies of southern Arizona;

(3) the parties to the lawsuits and others interested in the settlement of the water rights claims of the Papago Indians within the Tucson Active Management Area and that part of the Upper Santa Cruz Basin not within that area have diligently attempted to settle these claims and the Federal Government, by providing the assistance specified in this title, will make possible the execution and implementation of a permanent settlement agreement;

(4) it is in the long-term interest of the United States, the State of Arizona, its political subdivisions, the Papago Indian Tribe, and the non-Indian community of southern Arizona that the United States Government assist in the implementation of a fair and equitable settlement of the water rights claims of the Papago Indians respecting certain portions of the Papago Reservation; and

(5) the settlement contained in this title will—

(A) provide the necessary flexibility in the management of water resources and will encourage allocation of those resources to their highest and best uses; and

(B) insure conservation and management of water resources in a manner consistent with the goals and programs of the State of Arizona and the Papago Tribe.

DEFINITIONS

SEC. 302. For purposes of this title—

(1) The term "acre-foot" means the amount of water necessary to cover one acre of land to a depth of one foot.

(2) The term "Central Arizona Project" means the project authorized under title III of the Colorado River Basin Project Act (82 Stat. 887; 43 U.S.C. 1521, et seq.).

(3) The term "Papago Tribe" means the Papago Tribe of Arizona organized under section 16 of the Act of June 18, 1934 (48 Stat. 987; 25 U.S.C. 476).

(4) The term "Secretary" means the Secretary of the Interior.

(5) The term "subjugate" means to prepare land for the growing of crops through irrigation.

(6) The term "Tucson Active Management Area" means the area of land corresponding to the area initially designated as the Tucson Active Management Area pursuant to the Arizona Groundwater Management Act of 1980, laws 1980, fourth special session, chapter 1.

(7) The term "December 11, 1980, agreement" means the Central Arizona Project water delivery contract between the United States and the Papago Tribe.

(8) The term "replacement costs" means the reasonable costs of acquiring and delivering water from sources within the Tucson Active Management Area and that part of the Upper Santa Cruz Basin not within that area. Such costs shall include costs of necessary construction amortized in accordance with standard Bureau of Reclamation Procedures.

(9) The term "value" means the value attributed to the water based on the Tribe's anticipated or actual use of the water, or its fair market value, whichever is greater.

WATER DELIVERIES TO TRIBE FROM CAP; MANAGEMENT PLAN; REPORT ON WATER AVAILABILITY; CONTRACT WITH TRIBE

SEC. 303. (a) As soon as is possible but not later than ten years after the enactment of this title, if the Papago Tribe has agreed to the conditions set forth in section 306, the Secretary, acting through the Bureau of Reclamation, shall—

(1) in the case of the San Xavier Reservation—

(A) deliver annually from the main project works of the Central Arizona Project twenty-seven thousand acre-feet of water suitable for agricultural use to the reservation in accordance with the provisions of section 304(a); and

(B) improve and extend the existing irrigation system on the San Xavier Reservation and design and construct within the reservation such additional canals, laterals, farm ditches, and irrigation works as are necessary for the efficient distribution for agricultural purposes of the water referred to in subparagraph (A); and

(2) in the case of the Schuk Toak District of the Sells Papago Reservation—

(A) deliver annually from the main project works of the Central Arizona Project ten thousand eight hundred acre-feet of water suitable for agricultural use to the reservation in accordance with the provisions of section 304(a); and

(B) design and construct an irrigation system in the Eastern Schuk Toak District of the Sells Papago Reservation, including such canals, laterals, farm ditches, and irrigation works, as are necessary for the efficient distribution for agricultural purposes of the water referred to in subparagraph (A); and

(3) establish a water management plan for the San Xavier Reservation and the Schuk Toak District of the Sells Papago Reservation which, except as is necessary to be consistent with the provisions of this title, will have the same effect as any management plan developed under Arizona law.

(4) There are authorized to be appropriated up to $3,500,000, plus or minus such amounts, if any, as may be justified by reason of ordinary fluctuations in construction costs as indicated by engineering cost indices applicable to the type of construction involved for those features of the irrigation system described in paragraphs (1)(B) or (2)(B) of section 303(a) which are not authorized to be constructed under any other provision of law.

(b)(1) In order to encourage the Papago Tribe to develop sources of water on the Sells Papago Reservation, the Secretary shall, if so requested by the tribe, carry out a study to determine the availability and suitability of water resources within the Sells Papago Reservation but outside the Tucson Active Management Area and that part of the Upper Santa Cruz Basin not within that area.

(2) The Secretary shall, in cooperation with the Secretary of Energy, or, with the appropriate agency or officials, carry out a study to determine—

(A) the availability of energy and the energy requirements which result from the enactment of the provisions of this title, and

(B) the feasibility of constructing a solar power plant or other alternative energy producing facility to meet such requirements.

(c) The Papago Tribe shall have the right to withdraw ground water from beneath the San Xavier Reservation and the Schuk Toak District of the Sells Papago Reservation subject to the limitations of section 306(a).

(d) Nothing contained in this title shall diminish or abrogate any obligations of the Secretary to the Papago Tribe under the December 11, 1980, agreement.

(e) Nothing contained in sections 303(c) and 306(c) shall be construed to establish whether or not the Federal reserved rights doctrine applies, or does not apply, to ground water.

DELIVERIES UNDER EXISTING CONTRACT; ALTERNATIVE WATER SUPPLIES; OPERATION AND MAINTENANCE

SEC. 304. (a) The water delivered from the main project works of the Central Arizona Project to the San Xavier Reservation and to the Schuk Toak District of the Sells Papago Reservation as provided in section 303(a), shall be delivered in such amounts, and according to such terms and conditions, as are set forth in the December 11, 1980, agreement, except as otherwise provided under this section.

(b) Where the Secretary, pursuant to the terms and conditions of the agreement referred to in subsection (a), is unable, during any year, to deliver from the main project works of the Central Arizona Project any portion of the full amount of water specified in section 303(a)(1)(A) and section 303(a)(2)(A), the Secretary shall acquire and deliver an equivalent quantity of water from the following sources or any combination thereof:

(1) agricultural water from the Central Arizona Project which has been contracted for but has been released or will be unused by the contractor during the period in which the Secretary will acquire the water;

(2) any water available for delivery through the Central Arizona Project which exists by reason of the augmentation of the water supply available for use and distribution through the Central Arizona Project by subsequent Acts of Congress; and

(3) water from any of the following sources or any combination thereof within the Tucson Active Management Area and that part of the Upper Santa Cruz Basin not within that area in the State of Arizona:

(A) private lands or interests therein having rights in surface or ground water recognized under State law; or

(B) reclaimed water to which the seller has a specific right.

Deliveries of water from lands or interests referred to in subparagraph (A) shall be made only to the extent such water may be transported within the Tucson Active Management Area pursuant to State law.

(c) If the Secretary is unable to acquire and deliver quantities of water adequate to fulfill his obligations under this section or paragraphs (1)(A) and (2)(A) of section 303(a), he shall pay damages in an amount equal to—

(1) the actual replacement costs of such quantities of water as are not acquired and delivered, where a delivery system has not been completed within ten years after the date of enactment of this title, or

(2) the value of such quantities of water as are not acquired and delivered, where the delivery system is completed.

(d) No land, water, water rights, contract rights, or reclaimed water may be acquired under subsection (b) without the consent of the owner thereof. No private lands may be acquired under subsection (b)(3)(A) unless the lands have a recent history of receiving or being capable of actually receiving all or substantially all of the water right the use of which is recognized by State law. In acquiring any private lands under subsection (b)(3)(A), the Secretary shall give preference to the acquisition of lands upon which water has actually been put to beneficial use in any one of the five years preceding the date of acquisition. Nothing in this section shall authorize the Secretary to acquire or disturb the water rights of any Indian tribe, band, group, or community.

(e)(1) To meet the obligation referred to in paragraphs (1)(A) and (2)(A) of section 303(a), the Secretary shall, acting through the Bureau of Reclamation, as part of the main project works of the Central Arizona Project—

(A) design, construct and, without cost to the Papago Tribe, operate, maintain, and replace such facilities as are appropriate including any aqueduct and appurtenant pumping facilities, powerplants, and electric power transmission facilities which may be necessary for such purposes; and

(B) deliver the water to the southern boundary of the San Xavier Reservation, and to the boundary of the Schuk Toak District of the Sells Papago Reservation, at points agreed to by the Secretary and the tribe which are suitable for delivery to the reservation distribution systems.

(2) There is hereby authorized to be appropriated by this title in addition to other sums authorized to be appropriated by this title, a sum equal to that portion of the total costs of phase B of the Tucson Aqueduct of the Central Arizona Project which the Secretary determines to be properly allocable to construction of facilities for the delivery of water to Indian lands as described in subparagraphs (A) and (B) of paragraph (1). Sums allocable to the construction of such facilities shall be reimbursable as provided by the Act of July 1, 1932 (Public Law 72-240; 25 U.S.C. 386(a)), as long as such water is used for irrigation of Indian lands.

(f) To facilitate the delivery of water to the San Xavier and the Schuk Toak District of the Sells Papago Reservation under this title, the Secretary is authorized—

(1) to enter into contracts or agreements for the exchange of water, or for the use of aqueducts, canals, conduits, and other facilities for water delivery, including pumping plants, with the State of Arizona or any of its subdivisions, with any irrigation district or project, or with any authority, corporation, partnership, individual, or other legal entity; and

(2) to use facilities constructed in whole or in part with Federal funds.

RECLAIMED WATER; ALTERNATIVE WATER SUPPLIES

SEC. 305. (a) As soon as possible, but not later than ten years after the date of enactment of this title, the Secretary shall acquire reclaimed water in accordance with the agreement described in section 307(a)(1) and deliver annually twenty-three thousand acre-feet of water suitable for agricultural use to the San Xavier Reservation and deliver annually five thousand two hundred acre-feet of water suitable for agricultural use to the Schuk Toak District of the Sells Papago Reservation.

(b)(1) The obligation of the Secretary referred to in subsection (a) to deliver water suitable for agricultural use may be fulfilled by voluntary exchange of that reclaimed water for any other water suitable for agricultural use or by other means. To make available and deliver such water, the Secretary acting through the Bureau of Reclamation shall design, construct, operate, maintain, and replace such facilities as are appropriate. The costs of design, construction, operation, maintenance, and replacement of

on-reservation systems for the distribution of the water referred to in subsection (a) are the responsibility of the Papago Tribe.

(2) The Secretary shall not construct a separate delivery system to deliver reclaimed water referred to in subsection (a) to the San Xavier Reservation and the Schuk Toak District of the Sells Papago Reservation.

(3) To facilitate the delivery of water under this title, the Secretary shall, to the extent possible, utilize unused capacity of the main project works of the Central Arizona Project without reallocation of costs.

(c) The Secretary may, as an alternative to, and in satisfaction of the obligation to deliver the quantities of water to be delivered under subsection (a), acquire and deliver pursuant to agreements authorized in section 307(b), an equivalent quantity of water from the following sources or any combination thereof—

(1) agricultural water from the Central Arizona Project which has been contracted for but has been released or will be unused by the contractor during the period in which the Secretary will acquire the water;

(2) any water available for delivery through the Central Arizona Project which exists by reason of the augmentation of the water supply available for use and distribution through the Central Arizona Project by subsequent Acts of Congress; and

(3) water from any of the following sources or any combination thereof within the Tucson Active Management Area in the State of Arizona and that part of the Upper Santa Cruz Basin not within that area—

(A) private lands or interests therein having rights in surface or ground water recognized under State law; or

(B) reclaimed water to which the seller has a specific right.

Deliveries of water from lands referred to in subparagraph (A) shall be made only to the extent such water may be transported within the Tucson Active Management Area pursuant to State law.

(d) If the Secretary is unable to acquire and deliver quantities of water adequate to fulfill his obligations under this section, he shall pay damages in an amount equal to—

(1) the actual replacement costs of such quantities of water as are not acquired and delivered, where a delivery system has not been completed within ten years after the date of enactment of this title, or

(2) the value of such quantities of water as are not acquired and delivered, where a delivery system is completed.

(e) No land, water, water rights, contract rights, or reclaimed water may be acquired under subsection (c) without the consent of the owner thereof. No private lands may be acquired under subsection (c)(3)(A) unless the lands have a recent history of receiving or being capable of actually receiving all or substantially all of the water the right to the use of which is recognized by State law. In acquiring said private lands, the Secretary shall give preference to the acquisition of lands upon which water has actually been put to beneficial use in any one of the five years preceding the date of acquisition. Nothing in this section shall authorize the Secretary to acquire or disturb the water rights of any Indian tribe, band, group, or community.

LIMITATION ON PUMPING FACILITIES FOR WATER DELIVERIES; DISPOSITION OF WATER

SEC. 306. (a) The Secretary shall be required to carry out his obligation under subsections (b), (c), and (e) of section 304 and under section 305 only if the Papago Tribe agrees to—

(1) limit pumping of ground water from beneath the San Xavier Reservation to not more than ten thousand acre-feet per year;

(2) limit the quantity of ground water pumped from beneath the eastern Schuk Toak District of the Sells Papago Reservation which lies within the Tucson Active Management Area to those quantities being withdrawn on January 1, 1981; and

(3) comply with the management plan established by the Secretary under section 303(a)(3).

Nothing contained in paragraph (1) shall restrict the tribe from drilling wells and withdrawing ground water therefrom on the San Xavier Reservation if such wells have a capacity of less than thirty-five gallons per minute and are used only for domestic and livestock purposes. Nothing contained in paragraph (2) shall restrict the tribe from drilling wells and withdrawing ground water therefrom in the eastern Schuk Toak District of the Sells Papago Reservation which lies within the Tucson Active Management Area if such wells have a capacity of less than thirty-five gallons per minute and which are used only for domestic and livestock purposes.

(b) The Secretary shall be required to carry out his obligations with respect to distribution systems under paragraphs (1)(B) and (2)(B) of section 303(a) only if the Papago Tribe agrees to—

(1) subjugate, at no cost to the United States, the land for which those distribution systems are to be planned, designed, and constructed by the Secretary; and

(2) assume responsibility, through the tribe or its members or an entity designated by the tribe, as appropriate, following completion of those distribution systems and upon delivery of water under this title, for the operation, maintenance, and replacement of those systems in accordance with the first section of the Act of August 1, 1914 (38 Stat. 583; 25 U.S.C. 385).

(c)(1) The Papago Tribe shall have the right to devote all water supplies under this title, whether delivered by the Secretary or pumped by the tribe, to any use, including but not limited to agricultural, municipal, industrial, commercial, mining, or recreational use whether within or outside the Papago Reservation so long as such use is within the Tucson Active Management Area and that part of the Upper Santa Cruz Basin not within such area.

(2) The Papago Tribe may sell, exchange, or temporarily dispose of water, but the tribe may not permanently alienate any water right. In the event the tribe sells, exchanges, or temporarily disposes of water, such sale, exchange, or temporary disposition shall be pursuant to a contract which has been accepted and ratified by a resolution of the Papago Tribal Council and approved and executed by the Secretary as agent and trustee for the tribe. Such contract shall specifically provide that an action may be maintained by the contracting party against the United States and the Secretary for the breach thereof. The net proceeds from any sale, exchange, or disposition of water by the Papago Tribe shall be used for social or economic programs or for tribal administrative purposes which benefit the Papago Tribe.

(d) Nothing in section 306(c) shall be construed to establish whether or not reserved water may be put to use, or sold for use, off of any reservation to which reserved water rights attach.

OBLIGATION OF THE SECRETARY; CONTRACT FOR RECLAIMED WATER; DISMISSAL AND WAIVER OR CLAIMS OF PAPAGO TRIBE AND ALLOTTEES

SEC. 307. (a) The Secretary shall be required to carry out his obligations under subsections (b), (c), and (e) of section 304 and under section 305 only if—

(1) within one year of the date of enactment of this title—

(A) the City of Tucson and the Secretary agree that the city will make immediately available, without payment to the city, such quantity of reclaimed water treated to secondary standards as is adequate, after evaporative losses, to deliver annually, as contemplated in section 305(a), twenty-eight thousand two hundred acre-feet of water for the Secretary to dispose of as he sees fit; such agreement may provide terms and conditions under which the Secretary may relinquish to the City of Tucson such quantities of water as are not needed to satisfy the Secretary's obligations under this title;

(B) the Secretary and the City of Tucson, the State of Arizona, the Anamax Mining Company, the Cyprus-Pima Mining Company, the American Smelting and Refining Company, the Duval Corporation, and the Farmers Investment Company agree that funds will be contributed, in accordance with the paragraphs (1)(B) and (2) of subsection (b) of section 313, to the Cooperative Fund established under subsection (a) of such section.

(C) the Papago Tribe agrees to file with the United States District Court for the District of Arizona a stipulation for voluntary dismissal with prejudice, in which the Attorney General is authorized and directed to join on behalf of the United States, and the allottee class representatives' petition for dismissal of the class action with prejudice in the United States, the Papago Indian Tribe, and others against the city of Tucson, and others, civil numbered 75-39 TUC (JAW); and

(D) the Papago Tribe executes a waiver and release in a manner satisfactory to the Secretary of—

(i) any and all claims of water rights or injuries to water rights (including water rights in both ground water and surface water) within the Tucson Active Management Area and that part of the Upper Santa Cruz Basin not within said area, from time immemorial to the date of the execution by the tribe of such waiver, which the Papago Tribe has against the United States, the State of Arizona and any agency or political subdivision thereof, or any other person, corporation, or municipal corporation, arising under the laws of the United States or the State of Arizona; and

(ii) any and all future claims of water rights (including water rights in both ground water and surface water) within the Tucson Active Management Area and that part of the Upper Santa Cruz Basin not within said area, from and after the date of execution of such waiver, which the Papago Tribe has against the United States, the State of Arizona and any agency or political subdivision thereof, or any other person, corporation, or municipal corporation, under the laws of the United States or the State of Arizona; and

(2) the suit referred to in paragraph (1)(C) is finally dismissed;

(b) After the conditions referred to in subsection (a) have been met the Secretary shall be authorized and required, if necessary or desirable, to enter into agreements with other individuals or entities to acquire and

deliver water from such sources set forth in section 305(c) if through such contracts as exercised in conjunction with the contract required in subsection (a)(1)(A) it is possible to deliver the quantities of water required in section 305(a).

(c) Nothing in this section shall be construed as a waiver or release by the Papago Tribe of any claim where such claim arises under this title.

(d) The waiver and release referred to in this section shall not take effect until such time as the trust fund referred to in section 309 is in existence, the conditions set forth in subsection (a) have been met, and the full amount authorized to be appropriated to the trust fund under section 309 has been appropriated by the Congress.

(e) The settlement provided in this title shall be deemed to fully satisfy any and all claims of water rights or injuries to water rights (including water rights in both ground water and surface water) of all individual members of the Papago Tribe that have a legal interest in lands of the San Xavier Reservation and the Schuk Toak District of the Sells Reservation located within the Tucson Active Management Area and that part of the Upper Santa Cruz Basin not within said area, as of the date the waiver and release referred to in this section take effect. Any entitlement to water of any individual member of the Papago Tribe shall be satisfied out of the water resources provided in this title.

STUDY OF LANDS WITHIN THE GILA BEND RESERVATION; EXCHANGE OF LANDS AND ADDITION OF LANDS TO THE RESERVATION; AUTHORIZED APPROPRIATIONS

SEC. 308. (a) The Secretary is hereby authorized and directed to carry out such studies and analysis as he deems necessary to determine which lands, if any, within the Gila Bend Reservation have been rendered unsuitable for agriculture by reason of the operation of the Painted Rock Dam. Such study and analysis shall be completed within one year after the date of the enactment of this title.

(b) If, on the basis of the study and analysis conducted under subsection (a), the Secretary determines that lands have been rendered unsuitable for agriculture for the reasons set forth in subsection (a), and if the Papago Tribe consents, the Secretary is authorized to exchange such lands for an equivalent acreage of land under his jurisdiction which are within the Federal public domain and which, but for their suitability for agriculture, are of like quality.

(c) The lands exchanged under this section shall be held in trust for the Papago Tribe and shall be part of the Gila Bend Reservation for all purposes. Such lands shall be deemed to have been reserved as of the date of the reservation of the lands for which they are exchanged.

(d) Lands exchanged under this section which, prior to the exchange, were part of the Gila Bend Reservation, shall be managed by the Secretary of the Interior through the Bureau of Land Management.

(e) The Secretary may require the Papago Tribe to reimburse the United States for moneys paid, if any, by the Federal Government for flood easements on lands which the Secretary replaces by exchange under subsection (b).

ESTABLISHMENT OF TRUST FUND; EXPENDITURES FROM FUND

SEC. 309. (a) Pursuant to appropriations the Secretary of the Treasury shall pay to the authorized governing body of the Papago Tribe the sum of $15,000,000 to be held in trust for the benefit of such Tribe and invested in interest bearing deposits and securities including deposits and securities of the United States.

(b) The authorized governing body of the Papago Tribe, as trustee for such Tribe, may only spend each year the interest and dividends accruing on the sum held and invested pursuant to subsection (a). Such amount may only be used by the Papago Tribe for the subjugation of land, development of water resources, and the construction, operation, maintenance, and replacement of related facilities on the Papago Reservation which are not the obligation of the United States under this or any other Act of Congress.

APPLICATION OF INDIAN SELF-DETERMINATION AND EDUCATION ASSISTANCE ACT

SEC. 310. The functions of the Bureau of Reclamation under this title shall be subject to the provisions of the Indian Self-Determination and Education Assistance Act (88 Stat. 2203; 25 U.S.C. 450) to the same extent as if performed by the Bureau of Indian Affairs.

EXTENSION OF STATUTE OF LIMITATIONS

SEC. 311. Except as otherwise provided in section 107 of this title, notwithstanding section 2415 of title 28, United States Code, any action relating to water rights of the Papago Indian Tribe or any member of such tribe brought by the United States for, or on behalf of, such tribe or member of such tribe, or by such tribe on its own behalf, shall not be barred if the complaint is filed prior to January 1, 1985.

ARID LAND RENEWABLE RESOURCE ASSISTANCE

SEC. 312. If a Federal entity is established to provide financial assistance to undertake arid land renewable resources projects and to encourage and assure investment in the development of domestic sources of arid land renewable resources, such entity shall give first priority to the needs of the Papago Tribe in providing such assistance. Such entity shall make available to the Papago Tribe—

(1) price guarantees, loan guarantees, or purchase agreements,

(2) loans, and

(3) joint venture projects,

at a level to adequately cultivate a minimum number of acres as determined by such entity to be necessary to the economically successful cultivation of arid land crops and a level to contribute significantly to the economy of the Papago Tribe.

COOPERATIVE FUND

SEC. 313. (a) There is established in the Treasury of the United States a fund to be known as the "Cooperative Fund" for purposes of carrying out the obligations of the Secretary under sections 303, 304, and 305 of this title, including—

(A) operation, maintenance, and repair costs related to the delivery of water under sections 303, 304, 305.

(B) any costs of acquisition and delivery of water from alternative sources under section 304(b) and 305(c); and

(C) any damages payable by the Secretary under section 304(c) or 305(d) of this title.

(b)(1) The Cooperative Fund shall consist of—

(A) amounts appropriated to the Fund under paragraph (3) of this subsection;

(B) $5,250,000 to be contributed as follows:

(i) $2,750,000 (adjusted as provided in paragraph (2)) contributed by the State of Arizona;

(ii) $1,500,000 (adjusted as provided in paragraph (2)) contributed by the City of Tucson; and

(iii) $1,000,000 (adjusted as provided in paragraph (2)) contributed jointly by the Anamax Mining Company, the Cyprus-Pine Mining Company, the American Smelting and Refining Company, the Duval Corporation, and the Farmers Investment Company; and

(C) interest accruing to the Fund under subsection (a) which is not expended as provided in subsection (c).

(2) The amounts referred to in subparagraph (B) of paragraph (1) shall be contributed before the expiration of the 3-year period beginning on the date of the enactment of this title. To the extent that any portion of such amounts is contributed after the 1-year period beginning on the date of the enactment of this title, the contribution shall include an adjustment representing the additional interest which would have been earned by the Cooperative Fund if that portion had been contributed before the end of the 1-year period.

(3) There are hereby authorized to be appropriated to the Cooperative Fund the following:

(A) $5,250,000; and

(B) Such sums up to $16,000,000 (adjusted as provided in paragraph (2) which the Secretary determines, by notice to the Congress, are necessary to meet his obligations under this title; and

(C) Such additional sums as may be provided by Act of Congress.

(c)(1) Only interest accruing to the Cooperative Fund may be expended and no such interest may be expended prior to the earlier of—

(A) 10 years after the date of the enactment of this title; or

(B) the date of completion of the main project works of the Central Arizona Project.

(2) Interest accruing to the Fund during the 12-month period before the date determined under paragraph (1) and interest accruing to Fund thereafter shall, without further appropriation, be available for expenditure after the date determined under paragraph (1).

(d) The Secretary of the Treasury shall be the trustee of the Cooperative Fund. It shall be the duty of the Secretary of the Treasury to invest such portion of the Fund as is not, in his judgment, required to meet current withdrawals. Such investments shall be in public debt securities with maturities suitable for the needs of such Fund and bearing interest at rates determined by the Secretary of the Treasury, taking into consideration current market yields on outstanding marketable obligations of the United States of comparable maturities.

(e) If, before the date three years after the date of the enactment of this title—

(1) the waiver and release referred to in section 307 does not take effect by reason of section 307(d); or

(2) the suit referred to in Section 307(a)(1)(C) is not finally dismissed

the Cooperative Fund under this section shall be terminated and the Secretary of the Treasury shall return all amounts contributed to the Fund (together with a ratable share of accrued interest) to the respective contributors. Upon such termination, the share contributed by the United States under subsection (b)(3) shall be deposited in the General Fund of the Treasury.

(f) Payments for damages arising under 304(c) and 305(d) shall not exceed in any

given year the amounts available for expenditure in any given year from the Cooperative Fund established under this section.

COMPLIANCE WITH BUDGET ACT

SEC. 314. No authority under this title to enter into contracts or to make payments shall be effective except to the extent and in such amounts as provided in advance in appropriations Acts. Any provision of this title which, directly or indirectly, authorizes the enactment of new budget authority shall be effective only for fiscal years beginning after September 30, 1982.

SHORT TITLE

SEC. 315. This title may be cited as the "Southern Arizona Water Rights Settlement Act of 1982".

And the Senate agree to the same.

JOINT EXPLANATORY STATEMENT OF THE COMMITTEE OF CONFERENCE

The managers on the part of the House and the Senate at the conference on the disagreeing votes of the two Houses on the amendment of the Senate to the amendment of the House to the bill (S. 1409) to authorize the Secretary of the Interior to construct, operate, and maintain modifications of the existing Bullalo Bill Dam and Reservoir, Shoshone project, Pick-Sloan Missouri Basin program, Wyoming, and for other purposes, submit the following joint statement to the House and the Senate in explanation of the effect of the action agreed by the managers and recommended in the accompanying conference report:

The House amendment struck out all of the Senate bill after the enacting clause and inserted a substitute text.

The Senate amendment to the House amendment struck out all of the House amendment and inserted a substitute text.

The House recedes from its disagreement to the amendment of the Senate with an amendment which is a substitute for the Senate amendment and the House amendment. The differences between the Senate amendment, the House amendment, and the substitute agree to in conference are noted below, except for clerical corrections, conforming changes made necessary by agreement reached by the conferees, and minor drafting and clarifying changes.

TITLE I

Except for conforming amendments, the text of Title I, to authorize the Secretary of the Interior to construct, operate, and maintain modifications of the existing Buffalo Bill Dam and Reservoir, Shoshone Project, Pick-Sloan Missouri River Basin program, Wyoming, as passed by the House on August 17, 1982, is identical to the text of S. 1409 as passed by the Senate on June 22, 1982 (S. Rept. 97-420).

TITLE II

Title II, as approved by the House, incorporates the language of HR 5539, a bill to amend and supplement Federal reclamation law, which passed the House on May 6, 1982. The Senate amendment to Title II substitutes in its entirety the language of the amendment to HR 5539 which was approved by the Senate on July 16, 1982.

Existing law places a limit of 160 acres on the quantity of irrigable land in a single ownership to which Federal reclamation water may be supplied. (The law has been interpreted to permit the delivery of water to 320 acres for lands owned by a husband and wife.)

Irrigators who receive water from Federal reclamation projects are required to repay the construction costs of the project which are allocable to irrigation over a period of years without interest. In computing the repayment obligation of the irrigators, the Secretary also takes into consideration their ability to pay and may reduce the obligation accordingly. Not charging interest on the repayment obligation and the consideration of ability to pay in computing that obligation have come to be regarded as a subsidy to the irrigators.

Both the House and Senate versions of Title II provide for an increase in the basic ownership limitations and reduce the subsidy for larger farming operations.

The Senate amendment changed the acreage limitation provision of the basic law for all districts. The amendment approved by the House made the new limitation applicable only to new irrigation districts entering into contracts with the Secretary after the date of enactment, those which receive supplemental benefits after the date of enactment which were not previously authorized by law; to districts having existing contracts which agreed to amend those contracts to conform with certain provisions of the new law; and to individuals who desire to take advantage of the new law even though the contracting entity does not do so. Both versions provided for the application of an equivalency formula which permits an increase in the basic acreage limitation for those lands of less productive capability. However, as to districts having an existing contract, the application of equivalency was also made contingent upon the agreement of the district to an amendment to its contract in the amendment approved by the House.

The conferees agreed that the benefits of the new law, which include an ownership limitation of 960 acres and the application of equivalency, should be available to irrigators in districts having existing contracts only if the district agrees to amend its contract to provide for the reduction of the subsidy for larger farming operations in excess of 960 acres and to comply with certain other provisions of the new law. Individuals in the district may make such an election if the district does not do so. The 960 acre ownership limitation would apply to all districts entering into new contracts, and to those which amend their contracts to receive new or supplemental benefits not existing on the date of enactment, as would all of the requirements which the new law would impose upon the district.

The bill approved by the conference committee also reduces the subsidy for leased lands in those districts not amending their contracts. The conferees agreed that the larger farming operations in such districts which lease lands over and above the basic ownership limitation of 160 acres should not, in the future, receive the subsidy benefit for the additional leased lands. The provision is made effective four-and-one-half years from the date of enactment in order to give districts desiring to amend their contracts sufficient time to comply with the requirements of State law for effecting such amendments and to the Federal requirement that the contracts and amendments be confirmed by a court of competent jurisdiction.

The conferees intend to make it clear that the provisions of Sections 209 through Section 230 of the conference report are intended to be of general application and are, therefore, effective immediately upon enactment and are to be applied to any district or individual, whether or not the district amends its contract pursuant to the new law.

The major differences between the House amendment, the Senate amendment, and the resolution of those differences in the substitute agreed to in the conference are described below:

OWNERSHIP AND SUBSIDY LIMITATIONS

House: The House amendment establishes an ownership limitation of 960 acres for individuals and corporations benefiting 18 or fewer individual shareholders. These operators are subject to a 960-acre limitation on the amount of land owned or leased which can receive water at subsidized rates. Under the House amendment, the ownership limitation for corporations benefiting more than 18 shareholders is 960 acres. Those corporations benefiting more than 18 shareholders, which were receiving water on or before October 1, 1981, will pay full cost for water delivered to lands in excess of 160 acres. Corporations benefiting more than 18 shareholders not receiving water on or before that date will pay full cost for water delivered to all lands.

Senate: The Senate amendment establishes an ownership limitation, as well as a limitation on the amount of land which can receive subsidized water, or 1,280 acres for individuals and legal entities benefiting 25 or fewer individuals. The ownership limitation as well as the limitation on subsidized water for legal entities benefiting more than 25 individuals is 640 acres.

The conferees agreed upon an ownership and subsidy limitation of 960 acres for individuals and legal entities benefiting 25 or fewer individuals and ownership limitation of 640 acres and a subsidy limitation of 320 acres for legal entities benefiting more than 25 individuals. However, the subsidy for the first 320 acres receiving water would be available only to those larger legal entities which were receiving, or had received, project water on or before October 1, 1981. Such larger legal entities which had not received water from a Federal reclamation project on or before that date would pay full cost for irrigation water delivered to all lands.

INTEREST RATE

House: The House amendment establishes an interest rate formula to be applied in computing full cost. That formula is the weighted average rate of all Treasury obligations issued during the fiscal year in which expenditures were made for each project. The rate will vary from project to project, but in no event will the rate be less than 5 percent.

Senate: The Senate amendment establishes an interest rate formula to be applied in computing full cost which is the arithmetic average of: (1) the average interest rate on all outstanding Treasury obligations of

at least fifteen years' duration; and (2) the weighted average of all new Treasury obligations issued in the year preceding the year in which expenditures were made or the date of enactment, whichever is later. This formula currently results in an interest rate of approximately 11⅝ percent.

The conferees adopted a full cost formula which blends the formula in the House bill and the Senate amendment. The House formula would be applied to expenditures made prior to the date of enactment with a provision that the interest rate be not less than 7½ percent in any event. For expenditures made subsequent to the date of enactment, the formula contained in the Senate amendment would be applied. Legal entities having 25 or fewer individuals. However, larger legal entities which had not been receiving water from a project on or before October 1, 1981, would be charged full cost at the rate provided in the Senate amendment for all lands irrigated. Full cost will be calculated on a district by district basis.

CERTIFICATION

House: The House amendment provides that districts entering into new contracts or amending their contracts shall require each landowner and lessee within the district to furnish to the district a certificate that they are in compliance with the provisions of the Act. The Secretary may require submission to him of an executed copy of any lease for his examination.

Senate: The Senate amendment has no directly comparable provision. The Senate amendment does impose certain requirements on leasing.

The conferees agreed upon a provision which requires certification of compliance, including the number of acres leased, the term of the lease and that the rent reflects the reasonable value of the irrigation water. The conferees also agreed to a provision which requires that leases be written and for a term of not more than 25 years in the case of perennial crops and 10 years as to all others.

EQUIVALENCY

House: The House amendment provides for the application of an equivalency formula to lands of lesser productive potential within a district which enters into a new or amended contract.

Senate: The Senate amendment provides for a similar equivalency formula which would apply to all districts upon their request.

The conferees agreed that equivalency should be applied only as to those districts which agree to an amendment to their contracts as required to gain the benefit of the increased acreage limitations. The conferees noted that the Bureau of Reclamation has adopted a system of classification of lands within projects, but intends that the Bureau have flexibility to implement any new system of classification which it might develop. Furthermore, the conferees are aware of the fact that there exists statutory authorization for the application of an equivalency formula to a number of existing Federal reclamation projects. Enactment of this legislation is not intended to alter in any way either the application of equivalency to those projects, or the manner in which it has been applied.

PAYOUT

House: The House amendment provides that the acreage ownership limitation shall not apply to lands in a district after the repayment obligation of the district has been discharged by payment of periodic installments pursuant to the terms of the repayment contract. In addition, the acreage ownership limitation would not only apply to lands in a district after the repayment obligation of the district has been discharged through accelerated payments where so provided in a repayment contract existing on the date of enactment of this Act. Repayment by individuals would also be allowed where provided in a repayment contract existing on the date of enactment.

Senate: The Senate amendment is essentially identical to the House amendment except in two respects. First, the Senate amendment allows accelerated repayment after 95 percent of the repayment obligation has been paid and a pattern of family farming has been established, regardless of whether the repayment contract provides for accelerated repayment. Second, the Senate amendment provides that a district or individual receiving a Rehabilitation and Betterment loan may avoid application of the acreage ownership limitation by agreeing to repay the loan pursuant to the Small Reclamation Projects Act. The Small Reclamation Projects Act provides for an interest rate of approximately 9⅝ percent.

The provision approved by the conferees is essentially that contained in the House amendment. The conferees recognize that Rehabilitation and Betterment loans are considered as operation and maintenance costs. By adopting the House provision, the conferees do not intend to imply that either existing or future Rehabilitation and Betterment loans subject districts to the extension of the application of the acreage limitations after repayment of construction charges. The conferees also wish to make it clear that a district will not be relieved of liability for the payment of applicable operation and maintenance charges after its repayment obligation has been discharged.

WAIVER OF SOVEREIGN IMMUNITY

House: The House amendment gives the consent of the United States to be sued to determine the rights of any entity which is a party to a reclamation contract with the United States. The provision is a waiver of the sovereign immunity of the United States.

Senate: The Senate amendment provides an identical waiver of sovereign immunity. In addition, the Senate provision states that a court, if it determines it appropriate based on the evidence, including written representations concerning the application of the federal reclamation law, may reform the contract.

The conferees agreed to the House language. In taking this action, the conferees wish to make it clear that the actions of the conference committee should not be taken as prejudicial to any particular form of evidence or remedy under existing law, but rather the applicable rules of evidence and the applicable remedies should be employed by any court entertaining a suit brought to determine the rights of any party to a reclamation contract with the United States.

OPERATION AND MAINTENANCE CHARGES

House: The House amendment requires that all new and amended contracts provide that the price of project water shall be at least sufficient to recover all O & M charges which the district is obligated to pay to the United States. Each year the Secretary shall calculate such O & M charges and modify the price of project water accordingly. This provision does not apply to districts which operate and maintain project facilities without the benefit of Federal funds.

Senate: The Senate amendment has no comparable provision.

The conferees adopted a provision which would be applicable to all new contracts, contracts amended to receive additional or supplemental benefits after the date of enactment, and to districts electing to amend their contracts to take advantage of the benefits of the new law and to individuals electing to be subject to the new law.

APPLICATION OF FULL COST TO EXCESS LANDS

House: Under the House amendment, the subsidized rate is applicable to the first 960 acres of each farm operation whether or not the land is under recordable contract.

Senate: The Senate amendment allows the delivery of water at subsidized rates to excess lands under recordable contract.

The conferees agreed upon a provision which would permit delivery of water at subsidized rates for a period of ten years from the date the contract was executed as to recordable contracts entered into prior to the date of enactment and for a period of five years from the date of the execution as to recordable contracts executed subsequent to the date of enactment. Any extension of time for the disposal of lands under recordable contract is not to be considered as also extending the period of time in which subsidized water may be delivered to the lands under recordable contract since that water shall be delivered at the subsidized rate, for a period not less than 18 months from the date of enactment, or the date when the Secretary again commences approval of sales under recordable contract in those cases in which he has withheld approval. A special provision was adopted for lands to be placed under recordable contracts in the Central Arizona Project, as noted below.

APPLICABILITY/EXEMPTIONS

House: The House amendment provides for several exemptions from the ownership limitations, but would retain the limitations on subsidy if they were otherwise applicable.

Senate: The Senate amendment provides for similar exemptions from both the ownership and subsidy limitations. The Senate amendment also provides an exemption from ownership and subsidy limitations for lands which will receive a substitute water supply from a reclamation project and which will be required, by contract, to decrease groundwater pumping in an amount equal to the amount of water received from the federal project.

The conferees agreed upon a provision which blends the intent of the House and Senate amendments.j

The conferees also agreed upon a provision which would apply the ownership and pricing provisions applicable to recordable contracts executed for lands in the Central Arizona Project. The provisions limit the delivery of water to such lands at the subsidized rate for a period of ten years from the date the Secretary finds that the lands are capable of being served with irrigation water.

WATER CONSERVATION

House: The House amendment requires a water conservation program applicable to districts which enter into new or amended contracts. The program must contain definite goals and meet specific requirements. If a State agricultural or resources agency determines that a district is wasting irrigation water, the Secretary is authorized to impose a surcharge for water service. The House amendment also provides for coordination

of Federal water conservation programs among Federal agencies with involvement of non-Federal entities.

Senate: The Senate amendment directs the Secretary, pursuant to his existing authorities, to encourage prudent and responsible water conservation measures in the operations of non-Federal recipients of irrigation water.

The conferees adopted a provision which incorporates the language of the Senate amendment and modified the provisions of the House amendment. The provision imposes an obligation upon the districts to adopt a water conservation program and a timetable for its implementation. The conservation program shall not be required to be a part of the district's repayment or water service contract. The provision also includes the language of the House amendment providing for coordination of Federal water conservation programs with the involvement of non-Federal entities.

PENALTIES

House: The House amendment contains civil penalty provisions including fines at twice the fair market value of delivered water, and $5,000 for each day of a violation. It also provides for enforcement of subpenas, and penalties for contempt of court.

Senate: The Senate amendment has no similar provision.

The conference report deletes the House penalty provision. The conference committee believes that, given the certification requirement of the conference report and the criminal penalties under law which apply, such as those as to an individual who makes a false certification, together with other remedies available to the Secretary, there is no need for such a penalty provision.

VALIDATION

House: The House amendment provides for validation of contract clauses dealing only with commingled water as described in contracts entered into prior to October 1, 1981.

Senate: The Senate amendment provides for validation of contract provisions related to the acreage limitations. It provides for a Secretarial examination of circumstances surrounding the execution of a contract and a Secretarial determination of a request to validate contract provisions. The Secretary's decision is final unless disapproved by Congress within 90 days.

The conferees agreed to the House provision and deleted the Senate provision. The Senate provision was deleted as unnecessary after the conference committee adopted the provision validating repayment provisions of existing contracts.

SURPLUS CROPS

House: The House amendment provides that no water shall be delivered from a project authorized after the date of enactment of this Act to lands producing surplus crops for a period of ten years from the date water is first made available. No water may be delivered from projects authorized prior to the date of enactment of this Act to lands producing surplus crops for a period no longer than ten years after the date of the initial authorization of the project.

Senate: The Senate amendment provides that within one year the Secretary of Agriculture, with the cooperation of the Secretary of the Interior, shall transmit to Congress a report on the production of surplus crops on acreage served by irrigation waters. The report shall include recommendations on the coordination of reclamation policy with agricultural policy regarding surplus crops.

The conferees agreed to adopt the Senate amendment and that portion of the House amendment relating to the effective date of the prohibition upon the delivery of water to lands producing surplus crops, applicable to projects authorized prior to the date of enactment.

AUDIT COMPLIANCE

House: The House amendment directs the Inspector General of the Department of the Interior to review all audit reports of the Bureau of Reclamation projects prepared since 1977 and to transmit recommendations based on that review to the Secretary and Congress within 90 days of enactment of this Act. No later than 270 days after enactment the Secretary shall implement all recommendations made by the Inspector General or inform the appropriate committee of Congress in writing of his reasons for not implementing the recommendations.

Senate: The Senate amendment has no comparable provision.

The conferees agreed to delete the House provision. The conferees are concerned that such a provision may constitute a redefinition of the statutory functions of the Inspector General and are, therefore, beyond the scope of the legislation.

SMALL RECLAMATION PROJECTS

The conferees agreed to a provision which would make the pricing limitations of the Small Reclamation Projects Act of August 6, 1956, comport with those of Title II of this Act.

The conferees intended that these pricing amendments to the Act of August 6, 1956, only be applied prospectively to contracts entered into after the date of enactment of this Act. Despite the exclusively prospective application of this change, the conferees questioned whether the distinction between existing and future small reclamation project contracts is based upon sufficient rationale and further whether such distinction is equitable. The conferees expressed the hope that this distinction would be the subject of Congressional scrutiny and review in the near future.

CORPS OF ENGINEERS EXEMPTION

The conferees agreed that the changes made in the language relevant to the Corps exemption of the House and Senate amendments to that in the conference report are and were intended to be of a conforming or technical nature and do not signify a change in substance.

CONFIRMATION OF APPOINTMENT OF COMMISSIONER OR RECLAMATION

The conferees also agreed to the provision of the Senate amendment which would require that the Commissioner of Reclamation be appointed by the President with the advice and consent of the Senate.

TITLE III—PURPOSE

The purpose of this title is to provide a fair and reasonable settlement of the water rights claims of the San Xavier Papago Indian Reservation and the Schuk Toak District of Sells Papago Indian Reservation with a minimum of social and economic disruption to the Indian and non-Indian communities in Tucson and eastern Pima County.

Under the terms of this title, the Papago Tribe is guaranteed an annual supply of water from specified sources. To coordinate water resource planning and management with other water users in the area, the Secretary will establish a water management plan for the Papago Tribe that is consistent with State planning and management.

Acquisition and delivery of water to the Papago Tribe is contingent upon the Tribe's taking action to petition for dismissal of pending legal action, and releasing claims to water from the Tucson and eastern Pima County area other than water as provided in the Act. The settlement contained in this title will remove the cloud on title of non-Indian water users and enhance regional water resource planning and management.

The allocation of water resources to the Papago Tribe under this title is uniquely suited to the geographic, social and economic characteristics of the area and is not intended to be applied to any other Indian water rights claims in other areas, within or without the State of Arizona.

BACKGROUND AND NEED

The San Xavier Papago Reservation and the Schuk-Toak District of the Sells Papago Reservation are located in eastern Pima County, adjacent to the Tucson metropolitan area. The San Xavier Reservation lies primarily within the Upper Santa Cruz Basin, and the Schuk Toak District is located in the Avra/Altar Valley Basin.

The San Xavier Papago Reservation occupies approximately 70,000 acres immediately southwest of the Tucson metropolitan area. The reservation was established by Executive Order signed by Ulysses S. Grant on July 1, 1874.

The Schuk Toak District was originally established by Executive Order signed by Woodrow Wilson on January 14, 1916. A later Executive Order, dated February 1, 1917, re-established the Schuk Toak District as part of the Sells Papago Reservation.

The Tucson metropolitan area, population 531,000, is one of the largest communities in the world that is solely dependent upon groundwater for its municipal and industrial water supply. That water supply comes from several well fields located in the Santa Cruz and Avra/Altar Valley basins.

These two basins also supply water used by copper mines operated by the Anaconda Company, Amax Copper Mines, Inc., the Pima Mining Company, and the Duval Copper Corporation. Mines located adjacent to the San Xavier Reservation produced 293,098 metric tons of copper in 1980; 24.8 percent of the total production of the United States in that year.

Other significant water users in eastern Pima County include the Cortaro-Marana Irrigation District, the Avra Valley Irrigation District and the Farmers Investment Company.

Data assembled by the Water Resources Coordination Committee (WRCC) a voluntary association of the major water users in eastern Pima County, indicate that consumptive use of groundwater pumped from these basins totaled 317,186 acre feet [1] in 1980. Projected consumption will exceed 400,000 acre feet in the year 2000 and 500,000 acre feet in the year 2030.[1]

The data also indicate a serious imbalance between existing supply and demand in these basins. Current demand for water exceeds renewable supplies by a ratio of more than four to one. The estimated overdraft of groundwater in 1980 was 225,706 acre feet.[1]

[1] Statement of the Water Resources Coordination Committee to the Water and Power Resources Subcommittee of the U.S. House Committee on Interior and Insular Affairs, Mar. 13, 1981.

This imbalance has resulted in significant, long term declines in local groundwater levels. There is increasing concern that further decline in water levels will result in increased pumping costs, reduction in well capacity, diminished water quality and increased risk of land surface subsidence.

Recognition of the gravity of the groundwater overdraft problem has led water users in Tucson and eastern Pima County to implement significant conservation measures on a voluntary basis.

Agricultural users have greatly improved their irrigation efficiency by land leveling, ditch lining, and installation of pump-back systems. Further decrease in agricultural water used is anticipated through municipal and industrial development of currently irrigated land. According to data assembled by the WRCC, such development could reduce the amount of water consumption per acre by 75 percent.[1]

The mines have also realized considerable conservation through a variety of methods, such as recirculation of water, water recovery from tailings areas, use of settling methods prior to disposal of mine waste, reduction of water levels in flotation cells and utilization of natural seepage.

Municipal customers of the City of Tucson have, through voluntary conservation programs, reduced their average daily per capita demand from 205 gallons in 1974 to 140 gallons in 1979. The significance of this reduction is apparent by comparing this consumption rate with use in other major cities in the Southwest:

City:	*Per capita demand*
El Paso	173
Phoenix	220
Las Vegas	310
San Diego	179
Reno	189
Tucson	140

The Central Arizona Project, a Federal Reclamation Project that will bring Colorado River water from Parker Dam at Lake Havasu, to central and southern Arizona, will provide additional relief for the overdrawn groundwater basins in eastern Pima County. Delivery of water to Tucson and southern Arizona is expected in 1989 or 1990. Agricultural, mining and industrial water users who contract for CAP water will be required to reduce groundwater pumping on an acre foot for acre foot basis: for every acre foot of CAP water used, the subcontractors must reduce their groundwater pumping by an acre foot.

Strict management of groundwater resources is currently being implemented by the Arizona Department of Water Resources pursuant to a groundwater code enacted by the State legislature in 1980.[2]

The Code designates four geographic units as Active Management Areas (AMA). Within an AMA all present users of groundwater must file for a certificate of grandfathered pumping rights in order to perfect their right to pump groundwater. Only acreage irrigated any time during the 5 years prior to enactment of the Code may be irrigated. New uses will be allowed only pursuant to State permit. Moreover, the Code imposes limitations on the transportation of groundwater between sub-basins or away from any AMA.

The Tucson Active Management Area corresponds to the geographic boundaries of the Upper Santa Cruz Valley Basin and the Avra/Altar Valley Basin. The goal of the Tucson AMA is safe yield, that is, a balance between recharge and withdrawals, by January 1, 2025.

The Code also directs the Director of the Department of Water Resources to develop a series of management plans for agricultural, municipal and industrial water users in the AMA. The plans shall include provisions for a mandatory conservation program for all users, designed to achieve reductions in the levels of groundwater withdrawal. The management plans will be revised periodically to achieve the increasingly more rigid objectives set forth in the Code. The first plan for the Tucson AMA is scheduled to be issued in January 1984.

Conservation and planned management of groundwater resources and importation of water from the CAP are of paramount importance to the re-balancing of the groundwater basins in Pima County. Of equal importance is a final resolution of the water rights claims of the Papago Tribe to water from the Santa Cruz and Avra-Altar Valley Basins.

The dramatic decrease in local groundwater tables has affected the Papago Tribe as well as non-Indian water users in eastern Pima County.

In 1975 the United States, on behalf of the Papago Tribe, filed suit against several major water users in the area, including the City of Tucson and the major mining and farming interests to protect the water resources of the San Xavier Reservation. That suit was consolidated with a second suit by the Papago Tribe against the same defendants.

On June 23, 1980, the Court ordered that a consolidated Amended Complaint be filed, naming as parties defendant all users of the surface and groundwaters of the Upper Santa Cruz Basin. An Amended Complaint naming approximately 1,700 defendants was filed in *The United States and the Papago Indian Tribe* v. *City of Tucson*, consolidated cases, CIV 75-39 TUC (JAW) D. Ariz. Service of the Amended Complaint and interrogatories is in process, and numerous motions are presently pending before the Court.

In 1978, primarily in response to the Papago lawsuit, the Water Resources Coordination Committee (WRCC) of eastern Pima County was formed. Membership in the WRCC consists of representatives of the major water users in and around Tucson, including the City of Tucson, Pima County, the University of Arizona, and the Papago Tribe.

The purpose of the WRCC is to accumulate data on water supply and use, provide a forum for discussion of serious water related issues confronting the community, and develop a water resources plan to satisfy the present and future water needs of eastern Pima County without resort to litigation.

Since its inception, the WRCC has compiled data on present and projected future water supplies and demands, examined the quantity, quality and potential reuses of reclaimed water, developed a proposal for the study of water delivery to mines and farms that includes a mix of CAP water and reclaimed water, and assisted the Arizona Water Commission staff in developing a computer model designed to provide accurate evaluation of alternative water management plans.

Members of the WRCC have also taken an active part in analysis of aqueduct capacity, alignments, storage and termination point of the Tucson Aqueduct of the Central Arizona Project. The WRCC has participated in discussions and hearings regarding allocation of CAP water to Indian users and non-Indian users and has appeared as a witness at Congressional hearings on several occasions to discuss important water related issues.

Settlement of the Papago Tribe's suit against the water users in eastern Pima County is the most important issue facing water resources planners in the region. The WRCC has been an effective forum for the discussion of possible legislative solutions to the Papago Tribe's water rights claims. Although it was never the intent of the WRCC to become involved in negotiations surrounding this settlement, it has provided valuable data and counsel to the Tribe, the individual water users and to the appropriate Congressional committees.

The settlement contained in this title is the product of many years of discussion, deliberation and negotiation. Since 1975 many attempts have been made to resolve the water rights claims of the Papago Tribe legislatively. These legislative measures failed because they did not have the support of the community, the major water users or the Tribe.

After years of intense debate, and hearings in Washington, Tucson and Phoenix, the major water users in eastern Pima County and representatives of the Papago Tribe reached an agreement that all parties feel is a fair and reasonable settlement of the Tribe's claims to water in the Tucson Active Management Area and that part of the Santa Cruz Basin that is not within the AMA. The settlement effectively resolves the claims of the Tribe to waters from the Santa Cruz and Altar-Avra Valley Basin.

Sec. 301

Sec. 301 contains Congressional findings that:

The water rights claims of the Papago Tribe to waters of the basins surrounding Tucson and eastern Pima County are presently the subject of a lawsuit;

The pending and prospective suits may adversely affect the Indian and non-Indian economies in southern Arizona;

Parties to the suits, plaintiffs and defendants have diligently attempted to resolve the water rights claims of the Tribe by negotiation rather than by litigation;

It is in the best interests of the United States, the State of Arizona and its political subdivisions, and the Papago Tribe to resolve these claims by means of a legislaive settlement;

The settlement contained in this title will allow flexible management of water resources in southern Arizona, encourage allocation of those resources to the highest and best uses, and enable the Papago Tribe to participate in a basinwide management plan for conservation and management of their water resources.

Sec. 302

Sec. 302 contains definitions of terms used in the title.

The House and Senate bills contained identical definitions except in two instances. The Senate bill added the word "reasonable" to the definition of the term "replacement costs" and defined the term "value" to mean the value attributed to the water based on the Tribe's anticipated or actual use of the water or its fair market value, whichever is greater. The Conference committee adopted the Senate provisions for these two terms.

[2] Ariz. Rev. Stats., Ann. 45 § 400 (1980).

Sec. 303

Sec. 303 authorizes the Secretary of the Interior to deliver, as soon as possible, but not later than 10 years after the date of enactment, 27,000 acre-feet of water from the Central Arizona Project (CAP) to the San Xavier reservation and 10,800 acre-feet from the same source to the Schuk Toak District of the Sells reservation. This water shall be of a quality suitable for agricultural use.

This section also provides that the Secretary, acting through the Bureau of Reclamation, shall improve and extend the existing irrigation system on the San Xavier Reservation, including deepening, lining, replacement or relocation of existing wells, and shall design and construct such new or additional canals, laterals, farm ditches and irrigation works on the San Xavier Reservation and the Schuk Toak District of the Sells Papago Reservation as are necessary for the efficient distribution of the quantities of water required to be delivered under this section.

P.L. 90-537, the Colorado River Basin Project Act, authorizes construction of delivery and main canals, laterals and turnouts to the 160 acre tract for the distribution of water to Indian lands. Sections 303(a)(1)(B) and (2)(B) of this title authorize construction of more complete irrigation systems, which include sub-laterals and farm ditches.

The Senate bill provided an authorization ceiling of $3.5 million, indexed for inflation, for construction of those additional sublaterals and farm ditches. The Conference Committee adopted the Senate ceiling provision as Section 303(a)(4).

Section 303(a)(3) directs the Secretary to establish a management plan for the San Xavier and Schuk Toak areas that will have the same effect as any management plan developed under State law, except as is necessary to be consistent with the provisions of this title.

It is the intent of this section that the management plan developed by the Secretary be able to require conservation measures for irrigation and non-irrigation uses, prevent waste, meter groundwater and require reasonable record keeping.

The goal of the Secretary's management plan shall be to ensure efficient, beneficial use of groundwater withdrawn by the Tribe. It is not intended that the authority to establish the management plan be construed to require any reduction in the amounts the Tribe is permitted to withdraw under this title.

Nothing in this title shall be construed to subject the Tribe's withdrawal of groundwater from the San Xavier Reservation and the Schuk Toak District of the Sells Reservation to any tax or fees levied or collected by the State of Arizona pursuant to State law.

Nothing in this title is intended to vest the State of Arizona with jurisdiction over water use by the Papago Tribe or within reservation areas.

Section 303(b)(1) provides that, if requested by the Tribe, the Secretary shall conduct a study to determine the availability and suitability of water resources within the Sells Papago Reservation, but outside the Tucson Active Management Area and that part of the Upper Santa Cruz Basin not within the Sells Reservation.

Section 303(b)(2) provides that the Secretary, in cooperation with the Secretary of Energy or other appropriate agencies or officials, shall conduct a study to determine the availability of energy and the energy requirements resulting from enactment of this title and the feasibility of constructing a solar power plant or other alternative energy producing facility to meet such requirements.

Section 303(c) provides that the Papago Tribe shall have the right to withdraw groundwater from beneath the San Xavier Reservation and the Schuk Toak District of the Sells Papago Reservation subject to the limitations of Section 306(a).

Section 303(e) provides that nothing contained in section 303(c) or section 306(c) shall be construed to establish whether or not the Federal reserved rights doctrine applies or does not apply to groundwater.

Sec. 304

Section 304(a) provides that water shall be delivered from the main project works of CAP as provided in the agreement of December 11, 1980, except as otherwise provided in this Section.

Section 304(b) provides that whenever the Secretary is unable, during any year, to deliver from the main CAP project the quantity and quality of water specified, he is obligated to acquire and deliver an equivalent quantity of water from alternative sources described in this subsection. These alternatives include unused water from the CAP project or other waters within the Tucson Active Management Area (AMA) and that part of the Upper Santa Cruz Basin not within the AMA in the State of Arizona.

Section 304(c) provides that when the Secretary is unable to acquire and deliver quantities of water as required under Section 303(a), he shall pay damages to the Tribe. The measure of damages the Secretary is obligated to pay depends upon whether or not the delivery system has been completed. The Secretary's liability is either the replacement cost or the value of the undelivered water, as defined in this title.

Section 304(d) provides that the authority of the Secretary to acquire privately owned land or water rights is limited to consensual transactions only. It also provides that no private lands shall be acquired for purposes of acquiring water unless those lands have a recent history of receiving or being capable of receiving all of the water rights recognized by State law. A preference is established for acquisition of lands upon which water has actually been put to beneficial use in any one of the five years preceding the date of acquisition by the Secretary. The Secretary is prohibited from acquiring or disturbing water rights of any Indian tribe, band, group or community.

Section 304(e) provides that the Secretary, acting through the Bureau of Reclamation, shall design and construct such works or facilities as may be necessary to deliver water from the CAP project to the distribution systems within the two reservations.

Because delivery of CAP water, pursuant to this settlement, is a part of the final settlement of the named water rights claims of the Papago Tribe, the costs of operation and maintenance of the CAP facilities to Papago Reservations are made the obligation of the United States.

Construction of facilities to deliver CAP water to the water users in Tucson and Southern Arizona is authorized under Public Law 90-537. To contribute to the final resolution of the water rights claims of the Papago Tribe at San Xavier and the Schuk Toak District, a sum equal to that portion of the total cost of Phase B of the Tucson Aqueduct of the CAP which is allocable to the construction of facilities for the delivery of CAP water to Indian lands as described in Section 304(e)(1) is authorized to be appropriated under this title. The Secretary is required, under this subsection, to deliver water to the southern boundary of the San Xavier reservation and to the boundary of the Schuk Toak District at agreed upon points.

The sums authorized in Section 304(e)(2) shall not reduce, nor be treated as part of, funds authorized to be appropriated under other law, including the Colorado River Basin Project Act (Public Law 90-537).

Sec. 305

Section 305 establishes an obligation on the part of the Secretary to acquire quantities of reclaimed or treated water and deliver a specified quantity of water to the San Xavier Reservation and the Schuk Toak District of the Sells Papago Reservation. The water provided for under this section is in addition to the CAP or alternative waters provided for under Sections 303 and 304.

Section 305(a) provides that as soon as possible, but not later than ten (10) years from the date of enactment of this title, the Secretary shall acquire reclaimed or treated water from the City of Tucson in accordance with the agreement described in section 307(a)(1) and shall deliver annually 23,000 acre-feet of water suitable for agricultural use to the San Xavier Reservation and 5,200 acre-feet of water suitable for agricultural use to the Schuk Toak District of the Sells Papago Reservation.

As provided in section 307(a), the City of Tucson will enter into an agreement with the Secretary subsequent to enactment of this title, wherein the City will agree to make reclaimed water immediately available to the Secretary to dispose of as he sees fit. The Senate bill made clear that the Secretary shall acquire the reclaimed water without payment to the City and the Conference adopted that provision.

Subsection (b)(1) permits the Secretary to voluntarily exchange the reclaimed water for other sources of water, or to use any other means to obtain the water necessary to fulfill his obligations under Section 305. The House bill mentioned specific alternative methods of acquiring water to deliver to the Tribe. The Senate bill provided that the Secretary could use any other means to meet his obligations under this section, without specifying particular methods. The Conference Committee adopted the Senate provision.

In order to deliver such water, the Secretary, acting through the Bureau of Reclamation, is authorized to construct and operate such facilities as may be appropriate. However, Section 305(b)(2) expressly prohibits construction of a single purpose, separate pipeline to deliver reclaimed water to the Papago lands, and Section 305(b)(3) states that to the extent possible, the Secretary shall use available unused capacity in the main project works of the Central Arizona Project. The Senate bill stated that the Secretary may utilize unused capacity in the Central Arizona Project system without reallocation of costs. The Conference Committee adopted the Senate provision.

Pursuant to Section 305(c) the Secretary may fulfill his Section 305 obligations by acquiring and delivering an equivalent quantity of water from specified sources, including, unused water from the CAP project, or privately owned water rights in surface or groundwater or reclaimed water within the Tucson Active Management Area (AMA) and that part of the Upper Santa Cruz

Basin not within the area. Transportation of water within the AMA shall be governed by State law.

Section 305(d) provides that, if the Secretary is unable to acquire and deliver water as required under this section, he shall pay damages to the Tribe in an amount equal to the replacement costs of such quantities of water as are not delivered, where a delivery system has not been completed, or the value of such underlivered quantities of water, where a delivery system has been completed.

Sec. 306

Section 306 provides that the Secretary shall be required to carry out this obligations under Section 304(b), (c), and (e) and Section 305 only if the Papago Tribe agrees to limit pumping of groundwater under the San Xavier Reservation to not more than 10,000 acre-feet and under that portion of the eastern Schuk Toak District of the Sells Papago Reservation lying within the Tucson Active Management Area to those quantities being withdrawn on January 1, 1981, and the Tribe also agrees to comply with the management plan established by the Secretary.

The limitations imposed by this section do not apply to withdrawal from new or existing wells in either area which have a capacity of less than 35 gallons per minute and are used only for domestic and livestock purposes.

The conditional obligation of the Secretary under this subsection applies only to any obligation imposed by this title not otherwise assumed under the December 11, 1980 agreement. If the Tribe fails to agree to the limitations set forth in this subsection, the provisions of Section 304(b), (c), and (e) and Section 305 shall be without force or effect but the respective obligations of the parties under the December 11, 1980 agreement remain undiminished.

Section 306(b) provides that the obligations of the Secretary to constuct irrigation systems within the San Xavier Reservation and the Schuk Toak District of the Sells Papago Reservation shall be conditioned on the Papago Tribe's agreeing to assume the costs of subjugation of the land which those irrigation systems are intended to benefit and to assume financial responsibility for the operation, maintenance, and replacement of such systems.

The responsibility of the Tribe for the operation, maintenance and replacement of the delivery systems shall be accomplished through the Tribe or its members or an sentity designated by the Tribe, and shall be governed by the terms of Section 1 of the Act of August 1, 1914 (38 Stat. 270, 272; 25 U.S.C. 385). Maintenance charges shall be paid in accordance with regulations promulgated by the Secretary, and to the extent such charges are reimbursable out of tribal funds, they shall be apportioned in accordance with the benefits received by each individual Indian.

In no event will operation and maintenance charges under this section be attributed to land in or funds of districts of the Papago Reservation not receiving benefits from the provisions of this title.

Section 306(c) provides that the Tribe may devote water supplies under this title to any use, including but not limited to agricultural, municipal, and industrial, commercial, mining, and recreational use, whether within or outside the reservation, so long as such use is within the Tucson Active Management Area and that part of the Upper Santa Cruz Basin not within such area. The Tribe may sell, exchange, or temporarily dispose of water but it may not permanently alienate any water right established under this title. Sale of water to non-Indians would be subject to recovery of appropriate charges.

Section 306(d) provides that nothing in this title shall be construed to establish whether or not reserved water may be put to use or sold for use off any reservation to which reserved water rights attach.

Sec. 307

Section 307(a) conditions the water delivery obligations of the Secretary on an agreement being reached by the City of Tucson and the Secretary regarding acquisition of 28,200 acre-feet of reclaimed water. The City is to make such quantities of water, treated to secondary standards, immediately available to the Secretary.

It is not intended that the City should agree to make available any more than 28,200 acre-feet of reclaimed water plus additional quantities of such water equivalent to evaporative losses from the delivery system for such water, or if further treatment is supplied by the Secretary, losses from such treatment.

As a further condition to the Secretary's obligations, the Secretary and the City of Tucson, the State of Arizona, the Anamax Mining Company, the Cyprus-Pima Mining Company, the American Smelting and Refining Company, the Duval Corporation, and the Farmers Investment Company must agree to contribute to the Cooperative Fund authorized under Section 313 as provided by the terms of that section.

The obligations of the Secretary are contingent upon the agreement of Papago Tribe to file a stipulation for a voluntary dismissal with prejudice of the water suit filed by the United States on its behalf against the City of Tucson and other water users in the United States and the Papago Indian Tribe v. City of Tucson, consolidated cases, CIV 75-39 TUC (JAW) D. Ariz. In addition, paragraph (1)(c) of Section 307(a) requires that the Papago Tribe execute a waiver and release of any and all claims of water rights or injuries to water rights within the Tucson Active Management Area and that part of the Upper Santa Cruz Basin not within said area; and that it execute a waiver and release of any and all future claims of water rights within these two areas.

Section 307(c) makes clear that nothing in Section 307 shall be construed as a waiver or release by the Papago tribe of any claim where such claim arises under this title.

Sec. 308

Section 308 directs the Secretary to carry out a study to determine which lands, if any, within the Gila Bend Reservation have been rendered unsuitable for agriculture by reason of the operation of the Painted Rock Dam. If on the basis of this study it is determined that lands have been rendered unsuitable for agriculture, then the Secretary is authorized to exchange such lands for an equivalent acreage of land within the public domain of a quality equal to those diminished by the operation of the Painted Rock Dam. Such exchanged lands shall be held in trust for the Papago Tribe and shall be a part of the Gila Bend Reservation.

Section 308(e) provides that the Secretary may require the Papago Tribe to reimburse the United States for monies paid, if any, for flood easements on lands which the Secretary replaces by exchange. It is intended that only payments previously made by the Government for acquisition of flood easements of land, rather than costs of relocation, be considered under this section. In the event any such payments were in fact made, it is the intent of this section that the Secretary shall have full latitude to establish reasonable terms for the repayment of such monies.

Sec. 309

Section 309 provides for the establishment of a $15 million trust fund for the benefit of the Papago Tribe. Appropriated funds are to be paid to the governing body of the Tribe to be held in trust for the Tribe and invested in interest bearing deposits and securities.

The corpus of this trust account is to be held intact. The income accruing on the account may only be used for subjugation of land, development of water resources, and the construction, operation, maintenance, and replacement of related facilities on the Papago Reservation which are not the obligation of the United States under this title or any Act of Congress.

The income from this trust fund will enable the Tribe to subjugate lands for agricultural purposes anywhere within any district of the Papago Reservation, and expend monies related to on-reservation distribution systems anywhere within the Papago Reservation. This use of trust income is not restricted to the San Xavier Reservation and the Schuk Toak District of the Sells Papago Reservation or to development of water for agricultural purposes.

Appropriation of monies to establish the trust fund created under this section are a prerequisite to the effective waiver and release of claims the Tribe must execute pursuant to Section 307(a)(1)(D).

Sec. 310

Section 310 provides that the functions of the Bureau of Reclamation under this title shall be subject to the provisions of P.L. 93-638, the Indian Self-Determination and Education Assistance Act. It is the intent of this section that the provisions of P.L. 93-638 apply to any and all projects of the Bureau of Reclamation under this title which are not a part of the main project works of Phase II of the Tucson aqueduct but which involve improvement of existing systems or design and construction of distribution systems within the two reservation areas.

Sec. 311

Section 311 extends the period under the Federal statute of limitations (28 U.S.C. 2415) in which the United States, on behalf of the Papago Tribe, or the Tribe itself may bring a claim for damages to December 31, 1984. The one year time period for consummation of a contract with the City of Tucson and for execution of waivers by the Tribe extends beyond the present period of limitations provided in 28 U.S.C. 2415. In addition, the Papago Tribe is currently negotiating further settlement of water rights in water districts outside the area effected by this title. This extension will provide sufficient time to complete these negotiations or bring an appropriate suit.

Sec. 312

Section 312 provides that if a Federal entity is established to provide financial assistance to undertake arid land renewable resources projects, the Papago Tribe should be given a priority in assistance for a portion of land adequate to contribute significantly to the Papago economy.

Sec. 313

Section 313 establishes a Fund, known as the Cooperative Fund, in the Treasury to provide the Secretary with a ready source of funds to pay the continuing costs related to his obligations to deliver wet water as required by sections 303, 304 and 305 of this title, to acquire and deliver alternative sources of water, or to make payments for damages as provided in Section 313(f) in the event he is unable to deliver the full amounts of water specified.

It is not intended that the Fund be used to pay for those features of this settlement, for example, design and construction of the distribution systems to receive water from the main project works of the Central Arizona Project authorized under Section 303(a); the water resources studies and energy studies authorized under Section 303(b); or the establishment of a water management plan which should be completed prior to the time water is delivered or 10 years has elapsed, as stated in Section 313(c).

It is intended that the Fund be created upon the date of enactment of this title and funded within 3 years of that date, with adjustments for interest which would have accrued after the first year. The corpus of the Fund is to be set aside for 10 years or such time as the main project works of the Central Arizona Project are completed and water is ready to be delivered to the Tribe. The level of authorizations contained in this section and the dormancy period are expected to create a Fund adequate to generate income sufficient to cover the anticipated costs of water delivery under this title.

Consultation with officials of the Department of the Interior resulted in a determination that a Fund of $10.5 million should generate sufficient monies to pay costs related to delivery of water for a period of several years under this title if the Central Arizona Project is completed to Tucson in 1990, as presently scheduled. Based on this assumption, an initial funding level is authorized in Section 313(b). $5.25 million is to be contributed by the major non-Indian water users, in amounts described in Section 313(b)(1)(B). A matching contribution is authorized to be appropriated by the Federal government in Section 313(b)(1)(A).

Additional appropriations to the Fund, to cover such contingencies as delay in completion of construction, additional operation and maintenance charges, or costs of acquisition and delivery of alternative sources of water are authorized to be appropriated by Congress in paragraphs 3(B) and 3(C) of Section 313(b).

Section 313(c) protects the corpus of the trust and provides for accumulation of income for a period of time equal to the earlier of 10 years from the date of enactment of this title or the time required to complete construction of the main project works of the CAP.

Section 313(d) provides for the termination of the Fund and the return of monies contributed in the event the waiver and release executed by the Tribe does not take effect, or the dismissal of the specified lawsuits is not accomplished within 3 years.

The settlement contained in this title is intended to provide an assured, annual supply of wet water to the Tribe to enable the Tribe to achieve economic self-sufficiency and stability. It is anticipated that the sources of water identified and specified in this title will be adequate, in most years, to provide a full supply of wet water to the Tribe and that such water will, in fact, be delivered.

There may, however, be occasional shortages of water and in some years the Secretary may be required to pay damages. In such years, some or all income generated by the Fund may not be needed to pay water delivery costs and will then be available to the Secretary to make payments for damages under Sections 304(c) and 305(d). Section 313(f) provides that, in any given year, the Secretary may not make payments which exceed the amounts available for expenditures from the Fund. In the event available income on the Fund is insufficient in any given year to pay damages under Sections 304(c) and 305(d), Congress in that year or any subsequent year may appropriate additional monies for the Fund for such purposes, or the Tribe may seek a determination of damages in excess of payments made in the Court of Claims under section 1505 of Title 28, U.S.C.

Sec. 314

The purpose of Section 314 is to provide for compliance with the Congressional Budget and Impoundment Control Act of 1974, which provides for a fiscal year only to the extent and in such amounts as provided in appropriations acts. The prohibition on "making payments" in advance of appropriations acts, for example, does not affect the creation of any liability against the United States under any provision of this title; it merely provides that in case of any such liability, payments made in satisfaction of the liability would be contingent upon appropriation of the necessary funds.

Sec. 315

Section 315 provides that this title may be cited as the "Southern Arizona Water Rights Settlement Act of 1982."

HEALTH RESEARCH EXTENSION ACT OF 1982

Mr. WAXMAN. Mr. Speaker, I move that the House resolve itself into the Committee of the Whole House on the State of the Union for the consideration of the bill (H.R. 6457) to amend the Public Health Service Act to revise and extend the authorities under that act relating to the National Institutes of Health and the national research institutes, and for other purposes.

The SPEAKER pro tempore. The question is on the motion offered by the gentleman from California (Mr. WAXMAN).

The motion was agreed to.

IN THE COMMITTEE OF THE WHOLE

Accordingly the House resolved itself into the Committee of the Whole House on the State of the Union for the consideration of the bill, H.R. 6457, with Mr. D'AMOURS in the chair.

The Clerk read the title of the bill.

The CHAIRMAN. Pursuant to the rule, the first reading of the bill is dispensed with.

Under the rule, the gentleman from California (Mr. WAXMAN) will be recognized for 30 minutes, and the gentleman from Illinois (Mr. MADIGAN) will be recognized for 30 minutes.

The Chair recognizes the gentleman from California (Mr. WAXMAN).

Mr. WAXMAN. Mr. Chairman, I yield myself such time as I may consume.

Mr. Chairman, I am pleased to present H.R. 6457, the Health Research Extension Act of 1982.

I am especially pleased to speak in support of this bill because it represents a forceful statement of support for our Nation's excellent biomedical research programs. It was the result of extensive subcommittee and committee consideration; 4 days of public hearings and 4 additional days of markup sessions were devoted to its development.

The Subcommittee on Health and the Environment is committed to an effective national effort to prevent and cure cancer, heart disease, arthritis, diabetes, and the many other diseases that afflict the American people.

The National Institutes of Health are at the vanguard of our commitment to these goals. The NIH is the finest biomedical research institution of its kind in the world. At a time when so many of our Federal programs are under attack, NIH is unique in its excellence. It is well deserving of the congressional recognition embodied in this legislation.

The Health Research Extension Act of 1982 is, for the most part, a technical redraft of title IV of the Public Health Service Act. This redraft, the first since 1944, is long overdue and necessary to adequately define the responsibilities of the NIH and to streamline redundant or inconsistent authorities.

In addition, H.R. 6457 extends for 3 fiscal years the authorization of appropriations for expiring research authorities. These authorities include: First, the National Cancer Institute; second, the National Heart, Lung and Blood Institute; third, the National Library of Medicine; fourth, national research service awards; and fifth, various diabetes, arthritis, digestive, and kidney diseases activities. Authorization levels are not as high as I would like but do represent annual increases reflecting the CBO prediction for inflation and an additional 5 percent representing the need for continuing real growth in our research program. The administration has recommended

the levels be lower but the committee turned back amendments that would have reduced the authorizations.

The legislation also makes a number of important changes to promote the more effective and efficient management of the NIH. These changes include procedures for peer review of intramural research and contracts, as well as establishment of a system for reviewing reports of scientific misconduct. Within the NIH and each national research institute, increased emphasis was placed upon sponsorship of prevention-related research. The committee recognizes that research on the prevention of disease has been underemphasized by NIH in the past yet holds the greatest promise of one day reducing the incidence of a wide range of illnesses.

Mr. Chairman, one of the most important provisions of H.R. 6457 is the establishment of a new institute, the National Institute of Arthritis and Musculoskeletal Diseases. Creation of an arthritis institute has been a special interest of the distinguished chairman of the House Select Committee on Aging, Mr. PEPPER. Congressman PEPPER has over many years of public service carefully studied the progress of arthritis research in this country. At his urging and that of the gentleman from Oregon (Mr. WYDEN), the Energy and Commerce Committee voted to expand the Federal commitment to arthritis research through establishment of a separate National Research Institute.

Mr. Chairman, support of the committee reported bill is important to the conquest of cancer, arthritis, diabetes, and the other serious diseases facing the American people. An effective biomedical research program will lead to a healthier, more productive population. H.R. 6457 provides the foundation necessary to maintain a strong, accountable health research program.

I urge each Member's support for this important legislation.

Mr. Chairman, I reserve the balance of my time.

□ 1740

Mr. MADIGAN. Mr. Chairman, I yield myself such time as I may consume.

Mr. Chairman, I rise in opposition to H.R. 6457. I regret having to do that because it was a very pleasant experience for me, Mr. Chairman, to be able to work with the members of the majority party on the Health Subcommittee of the Committee on Energy and Commerce and also on the full committee itself on the bill we have just previously debated.

There are, however, several things wrong with the bill that the gentleman from California (Mr. WAXMAN) is bringing to the floor for the National Institutes of Health. One of the things that is wrong with it is that it should, in order to be a completely honest bill, rename the National Institutes of Health the Henry A. Waxman National Institutes of Health, because if this bill would become law, it would be the gentleman from California (Mr. WAXMAN) who would be running the National Institutes of Health and not the people who are presently being employed and compensated for doing that job.

The bill does substantially increase the funding for the National Institutes of Health by some 11 percent in fact in each category, I believe. It does, as the gentleman from California has said, also create a new Institute of Arthritis. But beyond that, Mr. Chairman, it also completely recodifies the existing National Institutes of Health language so that in the future the gentleman from California would be able to set time and hour limits, as well as dollar limits, for each activity in which the Institutes might choose to be engaged.

I am not saying that just because I believe that. I am quoting from what is called in medical circles "The Blue Sheet," a remark made by Mr. WAXMAN's staff person on this very issue, that this bill is the forerunner of the gentleman from California's being able to say to the National Institutes of Health how much time and how much money will be devoted to each of the things that they might choose to do.

That is fine, except that it is completely contrary to everything that we have ever done in this country with regard to health research, and it would probably put us in a position of effectively prohibiting the very type of freedom that is needed to determine when research is worthwhile and when it would not be worthwhile at all.

Mr. WAXMAN. Mr. Chairman, will the gentleman yield to me?

Mr. MADIGAN. Yes, I am happy to yield.

Mr. WAXMAN. Mr. Chairman, I am a little taken aback by the gentleman's ad hominem attack. I certainly have no desire to do anything other than maintain and improve the operation of NIH.

Could the gentleman tell me specifically which of the redrafted provisions he objects to? I am surprised to hear that he objects to them since he supported them in the committee.

Mr. MADIGAN. Mr. Chairman, I am objecting to the recodification, and as the gentleman knows, I did not vote for this bill when it passed out of committee. At that point I was trying to reflect the administration's viewpoints on the bill, which were very confused then; they had been confused then and have been confused, in my judgment, right up to today.

Mr. WAXMAN. Mr. Chairman, could the gentleman tell us which parts of the recodification he objects to? Or the administration objects to? We would like to know what the particular problems are: I am surprised to hear about these problems. The description the gentleman has given them raises concerns on my part.

Mr. MADIGAN. Mr. Chairman, I do not object to just a part of it; I object to all of them. I object to all the recodifications.

I would be willing to work with the gentleman to try to work this bill out, as we have the others. I am willing to go so far as to substantially increase the dollar levels we had talked about before, and I am willing even to accept the separate Institute for Arthritis, if the gentleman wants to work something out.

But I am not willing in any way to have this recodification business that would allow the gentleman to have singular control of all the health research functions in the United States in the future. I find that very offensive.

Mr. WAXMAN. Mr. Chairman, will the gentleman yield further?

Mr. MADIGAN. I do not object to any part of it; I object to all of them.

Mr. WAXMAN. Mr. Chairman, will the gentleman yield further to me?

Mr. MADIGAN. Certainly I yield to the gentleman from California.

Mr. WAXMAN. I want to inform our colleagues that the recodification was the product of many hours of staff work involving the gentleman's staff as well as mine. I do not believe the gentleman is objecting to any specific provisions because I do not think there are specific issues included in the recodification that can be genuinely attacked.

I am happy to work with the gentleman and with all my colleagues on this issue, but I must say that I resent the ascription to me of personal motives for a recodification that is supported, or at least not opposed, by any group except the administration. It is supported by many in the biomedical research community.

Mr. Chairman, I thank the gentleman for yielding.

Mr. MADIGAN. Mr. Chairman, I am not surprised that the gentleman is offended. I offer no offense, and I meant no offense.

The gentleman overlooked the fact that I said I was not saying these things, that I was quoting his staff person as saying that this is the first step to having time and dollar limits imposed by the gentleman from California.

Mr. WAXMAN. Mr. Chairman, will the gentleman yield to me on that point?

Mr. MADIGAN. I yield to the gentleman from California.

Mr. WAXMAN. Mr. Chairman, I want to clarify that insofar as that statement referenced in the Blue Sheet, that it was an absolute misstatement of my position and of my staff's position.

I wish that the gentleman had brought this issue up prior to the debate on the House floor. I could have clarified any misapprehension in the gentleman's mind about statements by my staff that may reflect on what I might intend to do on bills that I offer.

Mr. MADIGAN. Mr. Chairman, I am sure the gentleman is familiar with "The Blue Sheet," and let me just read from it, if I may:

The attempt to restrict NIH's power through report language is in line with subcommittee chairman Waxman's unsuccessful effort during work on the last reauthorization bill to limit NIH's leeway by imposing authorizations for all of the 11 institutes.

Here I insert the "Mr." It is not here, but out of respect for the gentleman, I insert the "Mr."

[Mr.] Waxman also sponsored the current bill. According to one of his aides, the committee views "this as a transition period," perhaps leading to the eventual elimination of title III authority altogether. "The language of title IV is very broad," the staffer said. "We don't think there is anything you can think of they do that is not directly or indirectly mentioned in it." But rather than drop this part of the law now, the aide continued, the committee opted to "just leave title III there for a while and see what comes up."

However, NIH is concerned that the elimination of the "fall back" provision could have negative impact on the institutes, an NIH official said. "For example," he noted, "if reauthorization does not occur, we now have title III to fall back on—it makes it unnecessary to have title IV."

Mr. WAXMAN. Mr. Chairman, will the gentleman yield?

Mr. MADIGAN. I yield to the gentleman from California.

Mr. WAXMAN. Mr. Chairman, I want to point out to the gentleman that I have in my hand a letter which I would like to make part of the record from the Association of American Medical Colleges, in which they say they have no objection to the provisions of the bill if there is no intention of removing the authority under section 301(a) of the Public Health Service Act. Of course, we made no change in section 301(a).

What is being referred to is a fight that took place 2 years ago on the authorization of NIH when the gentleman from Illinois, along with his predecessor Dr. Tim Lee Carter, the ranking minority member on our subcommittee, and most of the House supported specific authorizations for all 11 of the Institutes at NIH. I think that policy has a lot to say for it in terms of the responsibility an authorizing committee has for an agency for which we authorize funds. But rather than get into that kind of heated debate this year, we agreed with the AAMC and others that we would not do what the gentleman indicates the "Blue Sheet" says we intended to do. We abandoned that approach in this bill. I want to make very clear to the gentleman that no matter what a blue, green, yellow, or red sheet may say, this bill does not in any way take away the authority granted to the Appropriations Committee to appropriate funds under section 301 of the law.

Mr. MADIGAN. Reclaiming my time, Mr. Chairman, I would just like to say that a substitute will be offered tomorrow by the gentleman from Texas (Mr. GRAMM) from the majority party and the gentleman from North Carolina (Mr. BROYHILL) from the minority party. The purpose of that substitute will be to substantially increase the funding levels for NIH activities from their current 1982 levels, to also allow the creation of a separate National Institute on Arthritis, to also provide for a study of using animals for laboratory experiments, and also to provide a further study with regard to the creation of possible new individual institutes within the National Institutes of Health.

What the substitute will not contain is the recodification provisions which I have been addressing in my earlier remarks. It will be coming a long way toward doing the kinds of things that the teaching hospitals, the American Association of Medical Colleges, the National Institutes of Health, and other people involved in health research have wanted in the way of legislation.

I will not go on record here as saying that the AAMC has been bought off from its objections to the recodification by the much higher thresholds in spending authorities that are contained in the bill offered by the gentleman from California. I will say that I met with them last week, and they raised to me as their principal objection—and I am talking about the American Association of Medical Colleges—the recodification contained in the Waxman bill. That was last week. That is the principal objection to the Waxman bill of the American Association of Medical Colleges, and it is the principal objection of the National Institutes of Health to the Waxman bill.

We will have tomorrow a substitute containing very liberal funding levels and a separate Institute on Arthritis, as well as other provisions for people who are interested in those kinds of things. But we will not have in the substitute a recodification that would transfer the future authority for health research and the allocation of funds for that to the Health Subcommittee of the Committee on Energy and Commerce.

Mr. Chairman, I reserve the balance of my time.

□ 1750

Mr. WAXMAN. Mr. Chairman, I yield myself 1 minute.

I would just point out that I have with me and will be making a part of the RECORD a letter from the Association of American Medical Colleges to me. I want to read it because it absolutely contradicts the statement that is being made by the gentleman from Illinois.

ASSOCIATION OF AMERICAN MEDICAL COLLEGES,
Washington, D.C., September 20, 1982.

Hon. HENRY A. WAXMAN,
Chairman, House Subcommittee on Health and the Environment, House of Representatives, Washington, D.C.

DEAR MR. CHAIRMAN: There appears to be some misunderstanding about the Association of American Medical Colleges' position on the Health Research Extension Act of 1982 (H.R. 6457).

Although the Association sees no need for the codification of the present institutes making up the National Institutes of Health, we have no objection to the provision of the bill if there is no intention of removing the authority under Section 301(A) of the Public Health Service Act.

We are grateful for the authorizations that you have provided for the National Cancer Institute and the National Heart, Lung, and Blood Institute in the House bill. Although we would have preferred higher levels, the House levels are much better than those in the Senate bill. We would not support any effort to reduce the authorizations in the present House bill.

We appreciate your continuing interest in strengthening biomedical research in the United States.

Sincerely,

JOHN A. D. COOPER, M.D.

I assert with absolute assuredness that this would put the AAMC in strong opposition to the amendment that will be offered by the gentleman from Illinois.

Mr. Chairman, I yield 2 minutes to the gentleman from Alabama (Mr. SHELBY).

Mr. SHELBY. Mr. Chairman, I support this bill, particularly its focus on prevention. The bill establishes a network of centers for research and demonstration on health promotion and disease prevention that will complement the centers for disease and other Federal initiatives in health promotion and disease prevention.

I feel this legislation is an essential facet of a cost-effective health services system. It promotes a major expansion in research to focus on ways of promoting health and provides for improved methods of appraising health hazards and risk factors.

This action will work within the budgetary context we are now facing in Congress by serving as a cost containment measure. In that long run, concentrating on prevention as well as cure will save dollars in the consumer's pocketbook.

Public health and preventive medicine have had outstanding successes in

the past in sanitation, nutrition, immunization, and maternal and child health through the local and State health departments, but a new approach is required for societal and self-imposed risks of stress, and methods of coping.

A Federal network of centers has been the proven pattern of expanding research and demonstration projects in cancer research and control, cardiovascular disease, and other categorical conditions. The same approach is now needed to health promotion.

The provision requires the Director of the National Institutes of Health (NIH) to establish and maintain centers for research and demonstration of health promotion and disease prevention to undertake research and demonstration projects in health promotion, disease prevention, and improved methods of appraising health hazards and risk factors. These centers shall serve as demonstration sites for the use of new and innovative research in public health techniques to prevent chronic diseases.

Ten such centers shall be established in fiscal year 1983, 10 more in fiscal year 1984, and 5 more in fiscal year 1985. The level of Federal funding necessary to provide for adequate care faculty and administrative support for each center is $1 million, for a total over 3 years of $45 million.

I urge your support of this bill and particularly this provision.

As I understand the bill as it came out of our committee, the bill establishes, among other things, a network of centers for research and demonstration and health promotion and disease prevention that will complement the centers for disease and other Federal initiatives on health problems and disease prevention.

I wonder if the gentleman from California could tell me if that is his understanding of the part of the bill as far as health prevention centers are concerned.

Mr. WAXMAN. Mr. Chairman, will the gentleman yield?

Mr. SHELBY. I yield to the chairman.

Mr. WAXMAN. I thank the gentleman for raising this issue. I want to commend the gentleman for the work he did on our subcommittee.

We did accept an amendment which the gentleman offered to authorize appropriations for centers for research and demonstration of health promotion and disease prevention.

I think it is a very important, constuctive amendment and I am pleased that it is a part of the bill.

Mr. SHELBY. I think in the long run a lot of us agreed or had the feeling that it would go a long way to curtail a lot of the health costs in the future.

Mr. WAXMAN. I share in the gentleman's hopes and I think, in fact, that when we direct some of our efforts in that way that we will be minimizing health care costs for the future.

Mr. SHELBY. I am going to support the bill and I thank the gentleman.

Mr. WAXMAN. Mr. Chairman, I yield 5 minutes to the distinguished gentleman from Oregon (Mr. WYDEN).

Mr. WYDEN. Mr. Chairman, I rise today to take the opportunity to speak in support of the Health Research Extension Act. It is legislation supported by every single major health group in this country. It was carefully crafted by the chairman of our subcommittee. It is this legislation, not the substitute, that is going to be offered tomorrow, that is supported by the health groups of this country. Let me list a few:

The American Association of Cancer Institutes, the American Heart Association, the American Lung Association, the American Diabetes Association, the Arthritis Foundation, and many others are formally on record as supporting the Health Research Extension Act in the form that it is being offered, and not the substitute.

I think it is very important that our colleagues understand that, as we enter this debate.

Earlier this year, my colleagues on the Energy and Commerce Committee voted for an amendment which I offered to the Health Reseach Extension Act to create a separate National Institute for Arthritis. I think it is fair to say the credit for this legislation rightfully belongs with my distinguished colleague who chairs the Committee on Aging, the gentleman from Florida (Mr. PEPPER) who has done so much for the elderly and other vulnerable Americans.

The reasons for creating the Institute are really quite simple. The National Institute of Arthritis and Metabolic Diseases, established in 1950, gave major focus to arthritis research but that focus has been almost totally blurred by the addition of more and more diverse research programs to the Institute.

Today only 1 percent of the funding for the National Institutes of Health is for arthritis research. This is particularly distressing when one things 37 million Americans, or 1 out of 6 people, suffer from arthritis at an annual cost to society of $30 billion.

Twenty percent of medicare hospital costs are attributable to arthritis.

Social security disability, unemployment, and lost tax revenues shoulder a major part of this fiscal burden.

Arthritis is second only to circulatory diseases in economic costs to society. Yet despite this astronomical cost to society scientific research has been put on the back burner at the NIH while quack cures proliferate.

It is time this crippling disease of arthritis receives the national focus it deserves, a focus it would receive with the creation of this institute.

I want to urge my colleagues to support H.R. 6457. I want to particularly compliment the chairman, the gentleman from California, Mr. WAXMAN. He has done a careful job. His legislation is supported by every single major health group in the country.

I would like to point out to the ranking minority member that of the major health groups, not one of them is supporting the substitute that is being advocated by the ranking minority member.

I would also like to point out that while the gentleman's substitute retains a separate Institute on Arthritis that we worked for in the Energy and Commerce Committee, and the gentleman from Florida (Mr. PEPPER) has been working on for years, the substitute being advocated by the gentleman from Illinois reduces the authorization for health research funding dramatically.

Mr. MADIGAN. Mr. Chairman, will the gentleman yield?

Mr. WYDEN. I will be happy to yield.

Mr. MADIGAN. I would say to the gentleman I have no proposal. I have no substitute.

Mr. WYDEN. The gentleman said the substitute will be offered by the gentleman from Texas (Mr. GRAMM) tomorrow, and the ranking minority member said he supported it.

I just want our colleague to understand very clearly that the major health groups in the country are not supporting the substitute and the substitute contains very seriously reduced funding for health research.

Mr. MADIGAN. If the gentleman will continue to yield, I just wanted to correct one thing the gentleman said. Although it is not my substitute, I have some familiarity with what is in it. The money available for arthritis in the substitute is exactly the same amount as available in the bill being offered by the gentleman from California, which the gentleman is supporting.

I thank the gentleman for yielding.

Mr. WYDEN. If I might reclaim the time, if we reduce funding for NIH, all research efforts will be in jeopardy including arthritis. It is clear that the amount of money for arthritis research that we have in the committee's bill, which I must again point out is supported by all the major health groups, is going to be the authorization package that allows us to get the job done right. The substitute is clearly not going to make it possible for us to give health research the attention it deserves.

I yield back to the gentleman from California.

Mr. MADIGAN. Mr. Chairman, I yield myself such time as I may consume.

I realize the hour is getting late and many of our colleagues have other things that they have to do this evening. I understand there is some sort of special recognition going on this evening for the gentleman from Florida (Mr. PEPPER) whose name has been brought up on several occasions in the debate.

I certainly do not want to keep any of my colleagues here and away from enjoying the company of our colleague from Florida (Mr. PEPPER) this evening. So I will be very brief in concluding my remarks and say that while it may be very important as to who is supporting what, perhaps the most important person in this whole debate with regard to his support is the President of the United States.

I have been authorized to assure my colleagues in the House of Representatives that if the bill being advanced here by the gentleman from California and being supported by the gentleman from Oregon would somehow happen to pass the House of Representatives and somehow happen to pass the Senate of the United States that the bill will never be signed into law by the President of the United States.

So I think when people get ready to vote on this, if they want to position themselves correctly with regard to either sustaining or overriding a veto, they would want to know that that veto would be forthcoming unless the substitute being offered, in a bipartisan sense by the gentleman from Texas (Mr. GRAMM) and the gentleman from North Carolina (Mr. BROYHILL) would happen to be adopted through the wisdom of a majority of our colleagues being present and voting for the substitute.

□ 1800

Let me just again say in conclusion that it may be true that all of these varied health groups are tonight supporting the bill being advocated by the gentleman from California and supported by the gentleman from Oregon, but last week they were not. Somebody put the hammer on them between last week and this week, and it was not anybody on this side of the aisle.

Mr. WAXMAN. Mr. Chairman, I would like to respond to the comments we just heard.

The administration has a position. Their position is to cut the funds for biomedical research and to do away with the ability of Congress to have clear oversight over what is going on at NIH, which is part of our responsibility. And I know that they do not support a separate Institute for arthritis.

Now, they may have a position, but let us understand that when a bill comes before the President of the United States, he is called upon at that time to make a final decision as to whether he will sign or veto the legislation.

I would like to see the President of the United States turn his back on biomedical research in this country. I would like to see the President of the United States and the Members of this House see if they feel in good conscience they could reject the recommendations of the people who deal in this kind of biomedical research activities both at NIH and at universities around our country.

The Association of American Cancer Institutes, the American Heart Association, the American Lung Association, the American Diabetes Association, the Arthritis Foundation, the American Academy of Orthopedic Surgeons, the American Academy of Pediatrics, the American College of Cardiology, the Association of Schools of Public Health, the Coalition of Digestive Disease Organizations, the American Academy of Dermatology, the American Gastroenterology Association, the Cooley's Anemia Foundation, the National Hemophelia Foundation, and the American College of Gastroenterology. These are just a few of the groups that have come out in support of the bill that has been sent to this House floor by the Energy and Commerce Committee.

I would think that these groups came out for this legislation because they know it is the best legislation that is before them. If we hear from them that they want this alternative that will reduce funding, I would be really amazed. And then I would be convinced that a hammer was used on these organizations to get them to change their position against their own interests.

It should not be surprising when our Nation's most prestigious health and scientific research groups come out for a bill that advances what they have devoted themselves to, the conquest of dreaded diseases.

Mr. MADIGAN. Mr. Chairman, will the gentleman yield?

Mr. WAXMAN. I yield to the gentleman from Illinois.

Mr. MADIGAN. I just want to add to the gentleman's list of people supporting increases in funding in a separate Institute for Arthritis the name of the President of the United States, who is supporting an across-the-board 7-percent increase in funding for the National Institutes of Health and is supporting a separate Institute for Arthritis, but is not supporting the recodification being advocated by the gentleman from California.

Mr. WAXMAN. I thank my colleague. I would point out to my other colleagues who may be watching this debate, that when we had this bill before us, it was the position of the administration to oppose a separate Arthritis Institute. Now they are for it. I think when this bill gets to the President's desk he will glady sign it and probably take credit for it—and he will deserve the credit because if he signs this bill he will be supporting biomedical research through the most prestigious and world renowned institution of its kind, the NIH.

Mr. WYDEN. Mr. Chairman, will the gentleman yield?

Mr. WAXMAN. I yield to the gentleman from Oregon.

Mr. WYDEN. I appreciate the chairman yielding.

I am just so pleased that the President has come around to supporting the National Institute on Arthritis. I know the gentleman from Florida (Mr. PEPPER) will be very pleased because he has been trying to get this body to take the problem of arthritis seriously for years. But the question is: Are we going to authorize enough money for health research to get the job done right? I think we have got to go beyond just saying, "All right, we have got the shell there." We have to have enough money to get the job done right.

The only legislation that makes it possible for us to continue an adequate health research effort is the committee bill. I should think the President, now that he has come around to supporting the National Institute on Arthritis, would want to make sure that we authorized enough funds for basic health research.

Mr. MADIGAN. Mr. Chairman, will the gentleman yield?

Mr. WAXMAN. I yield to the gentleman from Illinois.

Mr. MADIGAN. I again just want to repeat what I said earlier to the gentleman from Oregon, that the substitute being supported by the President and being offered by the gentleman from Texas and the gentleman from North Carolina includes the same amount of funding for arthritis as it does the bill being advocated by the gentleman from California.

So in that sense, or within the context, the remarks of the gentleman from Oregon are not well spoken.

Mr. WAXMAN. But the gentleman's statement is misleading because the substitute that will be offered will in fact call for lower funding leels where there are specific dollar amounts specified such as in cancer research or the work done at the National Heart, Lung and Blood Institute. The others are authorized for such sums as may be necessary. We know that the President is coming before the Appropriations Committee in his recommendations for less than what we would hope they would appropriate.

Mr. MADIGAN. If the gentleman will yield, the substitute will contain exact-dollar figures for each of the

outyears and for each of the activities, and will be a 7-percent increase over fiscal year 1982 outlays for those institutes which require reauthorization.

Mr. WAXMAN. Yes. And the institutes that require reauthorization have specific-dollar amounts. The work at the Arthritis Institute will not have a specific-dollar amount but is authorized for such sums as may be necessary. In that sense, there is no change from the provisions of the committee bill.

Mr. MADIGAN. If the gentleman will yield, the language is the same as your bill. And I apologize for continuing to ask the gentleman to yield, but I do that only to keep the record straight, that in that instance the language is exactly the same as the bill.

Mr. WAXMAN. In that specific instance, you are correct, the language is the same, because the authorization provides for the Appropriations Committee to make the decision as to the amount that will in fact be spent. But it is my understanding that the substitute that will be offered will have a lesser figure than what our committee has recommended for those Institutes for which we do make a specific authorization.

Does the gentleman disagree with that statement?

Mr. MADIGAN. The only thing where we are at odds is whether or not the National Institutes of Health will be managed at the National Institutes of Health or on the east side of the fourth floor of the Rayburn House Office Building. And the gentleman has one idea about what its future should be, and we have another.

Mr. WAXMAN. Our policy was one shared a very short time ago by my colleague from Illinois.

Mr. Chairman, I have no further requests for time, and I yield back the balance of my time.

The CHAIRMAN. All time has expired.

Mr. WAXMAN. Mr. Chairman, I move that the Committee do now rise.

The motion was agreed to.

Accordingly the Committee rose; and the Speaker pro tempore (Mr. BENNETT) having assumed the chair, Mr. D'AMOURS, Chairman of the Committee of the Whole House on the State of the Union, reported that that Committee, having had under consideration the bill (H.R. 6457) to amend the Public Health Service Act to revise and extend the authorities under that act relating to the National Institutes of Health and the National Research Institutes, and for other purposes, had come to no resolution thereon.

PERSONAL EXPLANATION

Mrs. SCHNEIDER. Mr. Speaker, unfortunately, due to a serious personal matter I was unable to return as planned to vote on rollcalls Nos. 355–357. Had I been present, I would have voted as follows: On rollcall No. 355, to provide for a cooling-off period rather than an imposed settlement in the rail strike, "aye"; on rollcall No. 356, final passage of the rail settlement, "aye"; and rollcall No. 357, the rule under which the continuing resolution would be considered, "no."

I request that the RECORD reflect my intention.

LET'S HELP END THE FOOTBALL STRIKE

(Mr. BIAGGI asked and was given permission to address the House for 1 minute and to revise and extend his remarks and include extraneous matter.)

Mr. BIAGGI. Mr. Speaker, as a senior member of the House Education and Labor Committee, I am introducing a resolution today calling for a prompt settlement of the National Football League Players Association strike.

The resolution in no way attempts to take sides with either the players or owners. Rather, it seeks to formally express the true sentiments of millions of frustrated football fans, as well as the many cities across the country that will suffer considerable financial hardship as a result of the strike.

The facts tell us that the National Football League Players Association voted to strike beginning on Tuesday, September 21. This is the first regular-season strike in the 63-year history of the National Football League. It is estimated that the National Football League will lose about $42 million a week during the strike and each canceled game will cost the 1,500 players approximately $500,000 in lost wages.

But the strike goes far beyond just the players and owners. It could mean the loss of livelihood for many stadium employees, and the loss of vital tax revenues not only to the 27 National Football League cities, but to other locations such as Las Vegas, which rely on football to generate substantial business. In addition, it will result in the loss of a cherished recreational enjoyment for millions of fans.

Mr. Speaker, we only have to look as far back as last year's major league baseball strike to know that the longer the players are out, the more difficult it will be to resolve this dispute. I am introducing my resolution today in the hope that a lengthy strike can and will be avoided.

My resolution notes that negotiations appear stalemated and urges "all parties involved in the dispute to resume negotiations in earnest and take whatever steps are necessary to accomplish a prompt settlement of the strike."

We must do everything possible to help obtain a prompt end to the strike. I believe my resolution will contribute to this worthy cause and I urge that it receive favorable and expeditious treatment.

At this time, Mr. Speaker, I wish to insert the text of my resolution, along with an article that appeared in today's Washington Post, entitled "Economic Losses Related to Strike Are Far-Reaching":

H. RES. —

A resolution to express the sense of the House of Representatives in support of a prompt settlement of the National Football League Players Association strike

Whereas the National Football League Players Association voted to strike beginning on Tuesday, September 21, 1982; and

Whereas this is the first regular-season strike in the 63-year history of the National Football League; and

Whereas it is estimated that the National Football League will lose about $42 million a week during the strike and each canceled game will cost the 1,500 players approximately $500,000 in lost wages; and

Whereas the strike goes far beyond players and management, and will cause the loss of vital tax revenues in the 27 National Football League cities as well as other cities indirectly affected by the strike; and

Whereas millions of Americans will be deprived of a cherished recreational enjoyment; and

Whereas a settlement will be harder to achieve with the passage of time; and

Whereas negotiations are presently stalemated; and

Whereas a regular season game is scheduled for Thursday, September 23, and a full schedule of games is planned for Sunday, September 26: Now, therefore, be it

Resolved, That it is the sense of the House of Representatives that the Congress urges all negotiating parties involved in the dispute to resume negotiations in earnest and take whatever other steps are necessary to accomplish a prompt settlement of the strike.

[From the Washington Post, September 22, 1982]

ECONOMIC LOSSES RELATED TO STRIKE ARE FAR-REACHING

(By David DuPree and Robert Fachet)

The big financial losers in the National Football League strike are the league, estimated at between $26 million and $31 million a week, and the players, with uncollected salaries of $9 million a week.

The economic impact of the players' walkout extends much further, however, to bookmakers, airlines and other transportation carriers, hotels, city halls and vendors.

Although most NFL and team officials declined to comment on the strike or related matters, league sources estimated that weekly receipts from television, gate receipt for 14 games and related income run to about $40 million.

The teams, of course, will not have to pay salaries, which amount to an average of $105,000 per player this year, according to the NFL Management Council. Each player receives one-sixteenth of his salary each week.

Neither side in the dispute has strike insurance. The owners have arranged to borrow $150 million from a consortium of banks in California should it become necessary. The players expect income from some planned all-star games.

Las Vegas gambling sources told the Associated Press that as much as $100 million is wagered on pro football each weekend, including legal bets in Nevada, illegal bookmaking and friendly wagers. About $275 million was bet legally last year on pro football with Nevada's 21 sports books. Sonny Reizner, director of the book at the Castaways, said the books show a gross profit of 4.54 percent.

The airlines figure to miss about $300,000 in revenue generated by the usual 14 weekly charter flights, although there can be a wide variance because of distances involved and method of chartering, by game or season. On the basis of last year's ridership of 20,000 per game, Metro will lose $26,000 every Sunday the Redskins are idle.

NFL teams usually stay at road hotels for two nights. The Crystal City Marriott, home away from home for Redskins opponents, estimated that each visit cost between $3,700 and $6,600, depending on number of functions and size of traveling party.

"It's bad news; I'm going to starve," said Debbie Cooksley, secretary to the director of catering.

The Armory Board will lose between $100,000 and $125,000 a game as its percentage of the gate, parking and concessions at RFK Stadium, according to Bob Sigholtz, general manager of the D.C. Armory/Starplex, which manages the stadium.

Most stadiums contacted said they figured to lose between $100,000 and $200,000 a game.

Sigholtz said that 10 months ago, the stadium operators tried unsuccessfully to get strike insurance. "We were going to consolidate and go for one insurance policy for everybody," said Sigholtz, "but the insurance companies said no."

Sigholtz said that left the stadiums to insure themselves, "but even those premiums were so ridiculous that I don't know of anybody who did it."

He said the premium was based on size of stadium, but about $600,000 was the premium amount on one of the smaller stadiums.

Also down the drain are gross concessions revenue of $100,000 to $140,000 per game and the $26,000 in salaries paid to 300 vendors and 200 concessions stand workers, according to figures supplied by B & B Caterers, which services RFK Stadium.

Sportservice, the Buffalo concessions firm that services stadiums in Milwaukee, Detroit and St. Louis, will lose about $500,000 if the strike wipes out the season, according to Sam Gifford, director of corporate communications.

A number of stadiums allow small groups to operate concession stands and some of those groups will be devastated by the strike. Texas Stadium, home of the Dallas Cowboys, for instance, is owned by the city of Irving, Tex., and many of its concessions stands are operated by small area towns.

"Most of them get 15 percent of the gross of what they take in," said Bert Rose, director of the Texas Stadium Corp., which operates the Stadium.

Most stadiums said they employ between 1,000 and 1,500 ushers, ticket takers, concession workers, parking attendants and other stadium personnel.

The Greater Washington Board of Trade declined to guess how much the strike would hurt hotels and restaurants here. However, Pittsburgh's Planning Commission estimated a loss of $235,000 for each unplayed Steelers home game. The Green Bay Visitors and Convention Bureau said that about $25 million a year was recorded by Wisconsin tourism industries because of the Packers' presence.

The Buffalo Area Chamber of Commerce estimates the indirect effect of the Bills home games on area economy is $21 million. The chamber said about 5,600 out-of-town fans attend each game and each spends about $80.

The Chicago Park District, which operates Soldier Field, home of the Bears, said it projects a loss of nearly $350,000 a game and the city of Chicago said it will lose about $86,000 in taxes.

Rep. Mario Biaggi (D-N.Y.) of the House Education and Labor Committee, citing "the drastic loss in tax revenues," introduced a resolution yesterday calling for a prompt settlement of the strike.

□ 1810

AT THE BRINK

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Texas (Mr. PAUL) is recognized for 60 minutes.

Mr. PAUL. Mr. Speaker, the International Monetary Fund (IMF) recently finished its annual meeting in Toronto, Canada. The IMF was originally designed to smooth out the balance-of-payments problems among its members, but today it serves essentially as a social welfare agency lending to nations whose economies have been crippled by socialist and fascist central planning.

As should be expected, the United States contributes more funds than any other nation. In Toronto the international banking crisis could not be ignored, yet attempts to downplay it were made. The collapse of the Mexican peso and the threat of an Argentinian default dramatize the urgency of the situation and are omens of things to come. Mexico owes $81 billion and Argentina $39 billion, but this is only a small fraction of the total debt owed to Western governments and Western banks. Eastern bloc Communist nations and Third World nations owe over $850 billion, and reasonable people do not expect that this sum will be repaid.

The race going on now is to finance all this debt through governments—principally the United States—and bail out the international banking system. The default which many pretend can be avoided is inevitable; the only question that remains is who the victims are to be. The question is, shall it be the bankers or the innocent uninformed American citizens?

The elite attending the international conference minimized the crisis only by admitting that yes, indeed, a problem did exist, but it is manageable. We cannot manage nor ever pay our own debt let alone the world's debt, yet we continue to play the game and pretend a calamitous banking crisis does not really exist and that we will work our way out of it. That is impossible. The big default will come. Mexico has been insolvent for years but it was only recently that a panic occurred and the peso collapsed. It took a lot of years, a lot of borrowing, a lot of money creation by the Mexican central bank, to set the stage that allowed the crisis to occur.

Mexico's banking problems make the dollar look strong—compared to the peso—but compared to its former purchasing power the dollar is weak and hanging precariously on the brink of collapse. The dollar collapse which now stares us in the face brings shudders to those knowledgeable and honest about currency matters. The dollar is the most vital currency of the world, and its failure will wreak havoc on Western civilization. We can no longer ignore the threat.

It is estimated that the contingent liabilities of the U.S. Government are now over $11 trillion. Fulfilling this commitment is not possible. The social security system alone exists only by robbing young Peter to pay elderly Paul. It is insolvent and we ought to admit it. The national debt is now over $1.1 trillion, our annual interest payment on this debt is more than $115 billion, and both are growing rapidly even under an administration which has been declared the most fiscally conservative of the 20th century. The reason for this inconsistency—whether it is deception, inept management, or the impossibility of controlling the runaway system—is economically unimportant. The fact that the floodgates of spending, taxing, and inflating are open and that debt repudiation has begun must be accepted before plans can be laid for reforming our banking institutions and preserving a free society.

In the old days, an event such as a dollar devaluation made big news. A jump of gold prices from $35 to $38 required surprise weekend announcements that only the insiders knew about. Today the price of gold—the barometer of monetary distrust as it has been for 6,000 years—can increase by one-third in a few weeks with no specific announcement and with the authorities pretending that this has little to do with devaluation and lost trust in the dollar. Fear is building, debt repudiation is occurring daily through dollar depreciation, and nominal dollar debt is expanding rapidly. As all this occurs, inflation and patching the system together at the expense of the innocent proceed.

The mountain of debt can be repudiated by default; that is, declared bankruptcies and subsequent liquidation of debt, but every effort conceivable will be made to prevent this from occurring on a massive scale. If this did occur it would be an old-fashioned 1929 deflation and everyone knows the politicians and the bankers will not let this happen, which is understandable,

yet the alternative method of debt liquidation offers little benefit or reassurance.

The other method of defaulting of the debt is a 1923 style German inflation. Pay the debt with rapidly depreciating newly created dollars. When the dollar is worthless, or approaching worthlessness, real debt disappears and the holder of debt instruments have their assets liquidated even though someone may still owe them many dollars. As new money appears out of thin air, real assets of the savers and the debt denominated dollars evaporate into thin air. Both forms of debt liquidation are terribly dangero :s Economic law demands the debt be paid, the pyramiding of debt cannot last forever—the drinking binge always comes to en end. In the end the patient must sober up or face an alcoholic's death.

It is similar with an economy, and we must either give up depending on new money creation—inflation—in our efforts to achieve a false sense of well-being, or face the consequences. It appears to me that we are determined to follow the course of history, failing to learn from it, and commit the errors that have brought many nations to their knees. That error is the policy of currency destruction through the inflationary process. The task of limiting government size and its expenditures far outweighs the superficial expressions of sympathy for a balanced budget here in Washington. Many do not have courage for it. Those Americans who care and are still struggling to make some sense out of our political and economic system must give backbone to the public officials who have the authority to legislate wisely and constitutionally and stop the monetary catastrophe that is occurring.

In 1980, radical changes were made in the Federal Reserve Act—the Monetary Control Act of 1980—allowing a massive increase in the power of the Federal Reserve System. Among those powers was the authority of the Fed to use the debt of foreign nations as collateral for the printing of Federal Reserve notes. This is of the greatest significance in light of the $850 billion Third World and Communist nations' debt to the West. To begin with, the foreign bonds that the Fed purchases are purchased with paper money backed by our own debt—bonds and Treasury bills. Then we turn around and use the newly purchased foreign bonds as collateral to print up more Federal Reserve notes. This system of money creation is unbelievable to rational human beings. It cannot but lead to a disastrous end for the American dollar.

Under current law the recently purchased Mexican pesos could be used to back the printing of more Federal Reserve notes. The fact that the debt structure is so large and the banks holding the debt so influential causes me to predict that Government will do a lot more inflating to bail out the private holders of foreign debt through this mechanism. We sent money to Poland when they were unable to meet their interest payments to the large banks; we did it with Mexico; and there is no reason we should not expect it to be done for Brazil, Argentina, Zaire, or whomever. The banks will get their payments, the socialist dictators will get our dollars, and the American middle class will get the bill. The bill will not be paid by raising taxes further, for there is a limit to how high taxes can be pushed, but it will be paid through inflation and dollar depreciation.

As so often occurs with economic problems originating in mismanaged centrally planned economies built on paper money, the seeds of economic isolationism have been planted. The decade of the 1930's certainly was a period when isolationism, nationalism, and militarism followed on the heels of depression, inflation, deflation, and disruption to the normally smooth functioning of a market economy. Today, we hear strong demands daily to take away the American consumers' right to purchase foreign goods, claiming this will somehow miraculously rectify the ills created by Government intervention and inflation. Nothing could be further from the truth. It will only make the economy worse, international relationships tense, and all at the expense of the individual's right to negotiate unmolested in the purchase of a particular product. The scapegoat is not Japanese efficiency and competitiveness; they serve us economically in providing for our needs. The unfairness of course is the fact that American taxpayers are forced to subsidize our competitors. Not only do we subsidize countries who need a bailout and others who just want a grant through the international banking system—all causing more inflation since we create money to fund these international development banks—we help our rich allies like Germany and Japan by providing large sums for their defense. We literally supply all Japan's defense, allowing the Japanese to have lower taxes on their car and steel companies and other subsidies. Our free gifts to them should all be stopped. It is suicidal to continue the process. It is no longer 1945, it is 1982, and a new generation of Americans are now demanding a new relationship with our allies and our enemies.

We all want a strong defense, and we want to live in peace. Free trade with potential enemies when they pay for the goods they buy can not make war more certain then it would be otherwise. Trade barriers create ill will, new enemies, and arouse feelings of nationalism and militarism. Economic isolationism, a consequence of inflation and central planning, is to be feared and rejected as a viable policy for any freedom-loving nation.

The American people, whenever they have had the chance, have spoken out for peace and free trade, balanced budgets, and sound money. And they are today as well. Yet our policies do not reflect this. On August 16, the Chinese communique was signed with the Chinese Communist dictators and our administration. On August 30, an Export-Import Bank loan of $68.5 million was authorized by the President because it was "in our national interest" to help build a steel plant for them. What for? So they can sell cheap steel to the United States? Just what we need. American steel plants are closing down, unemployment is sky high, and we subsidize Communist steel plants. It is absurd. Instead of helping the steel industry by stopping inflation and lowing taxes, we make inflation worse by more credit creation to help our competition and in this case our political enemies. The wisdom of this policy I fail to see. I venture to guess most Americans fail to see the wisdom of self-sacrifice and economics suicide as well.

The current policies of inflation, taxation, central planning, protectionism, and economic isolationism are certainly bad in that Americans and the people of the world are going to suffer from the inevitable lowering of everyone's standard of living. But a much greater threat hangs over our head. The loss of personal liberty in an age of rampant inflation, money destruction, and economic turmoil is well known. Liberty, based on a belief that it is a gift of the Creator, requires our constant and utmost vigilance. This responsibility should motivate us in all that we do, and the threat of any loss of liberty must concern us all. The material benefits of a free society are obvious, and their loss that comes with a rise in statism cannot be ignored, but the concern for the rights of each citizen must become the principal motivating force in our political actions.

Closely paralleling the loss of liberty and the economic stagnation that is also a consequence of inflation and central planning is the great danger that attempts at compensating for all previous errors of Government intervention will be made with more inflation and more Government programs. If this continues and economic isolationism and international resentment develop, nations are driven to producing massive armaments—and not necessarily defensive armaments—out of fear and confusion as well as economic justifications. History shows that great danger of war rises out of the very conditions we are experiencing today.

How is it that the people cry out for less taxes and they get more? How is it that the people cry out for balanced budgets and they get greater deficits? How is it that the people cry out for sound money and they get more inflation and higher interest rates? They cry out for peace and they get war. This need not be; war and famine are not inevitable. Freedom and sound money bring peace and prosperity. But if freedom is lost and honest money relegated to the underground economy, war and famine will follow even for the United States. Although the United States has been exempt from famine for most of its history, if we pursue foolish policies based on the immoral use of Government force, we will reap the economic whirlwind of hunger and poverty and suffer the rattle of machineguns, the blast of bombs, and the cry of human suffering.

If we accept the notion that Government should not exert unjust force on any person, that no one should be made a slave to another, and that the fraud of paper money must be outlawed, this tragedy will be averted.

A bold step is required, for a timid response with more of the same, more inflation and more Government intervention, will prove disastrous. The opportunity for positive change is available to us in this decade, and if we fail to respond in a positive way, it could be years or decades before the damage can be undone and a free society restored. It is literally up to us.

□ 1820

PERSONAL EXPLANATION

The SPEAKER pro tempore (Mr. BENNETT). Under a previous order of the House, the gentleman from New York (Mr. GILMAN) is recognized for 5 minutes.

● Mr. GILMAN. Mr. Speaker, on September 21, 1982, it was necessary for me to return to my congressional district, causing me to be absent during the following rollcalls:

On rollcall No. 344, on agreeing to the Obey amendment to H.R. 7019 the transportation appropriations bill to reduce appropriations by 30.8 percent in order to achieve a balanced budget in fiscal year 1983, which failed by a vote of 349 nays to 38 yeas, had I been present I would have voted "nay."

On rollcall No. 345, final passage of H.R. 7019, the Department of Transportation appropriation bill for fiscal year 1983, which passed by a vote of 268 yeas to 119 nays, had I been present I would have voted "yea."

On rollcall No. 347, on agreeing to the Walker amendment to H.R. 7072, to prohibit the expenditure of funds appropriated by the bill in violation of Public Law 95-435 provision requiring a balanced budget by 1981, which failed by a vote of 246 nays to 125 yeas, had I been present I would have voted "nay."

On rollcall No. 348, final passage of H.R. 7072, the agricultural, rural development and related agencies appropriations for fiscal year 1983, which passed by a vote of 264 to 105, had I been present I would have voted "yea."

On rollcall No. 349, requiring a two-thirds majority for agreeing to the motion to dispense with the Calendar Wednesday rule, which passed by a vote for 226 yeas to 79 nays, had I been present I would have voted "yea."●

CREDIT CARD FRAUD: A BILLION-DOLLAR BUSINESS

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Illinois (Mr. ANNUNZIO) is recognized for 5 minutes.

● Mr. ANNUNZIO. Mr. Speaker, while most of America's industries are suffering from the ill effects of the worst recession in nearly half a century, one business is booming—credit card fraud.

The statistics are staggering. Every year an estimated 73 million credit cards are reported lost or stolen; of that number, approximately 10 percent are illegally used—a total of roughly 20,000 cards a day.

When most of us think of credit card fraud, the use of the stolen card by a petty crook comes to mind. Unfortunately, credit cards can be misused in a number of other ways that go far beyond conventional card theft. In recent years, the schemes have become more sophisticated, and much harder to trace since in many cases the legitimate cardholder never losses possession of the card.

For example, police have uncovered a number of ploys involving sales clerks who simply copy down names and account numbers during genuine sales transactions. The stolen names and numbers are frequently used to place phone mail and telephone orders as these types of purchases can be made over the telephone, thereby eliminating the need for actual charge plates or signatures.

In another variation, the clerks make duplicate charge slips, place them in the cash register and remove cash. In either case, the unwitting customer does not find out about the phony charges until the bill comes in.

A credit card thief can also obtain legitimate credit card numbers by using the telephone. He simply calls people and tells them that they have won an all-expenses-paid trip. The thief then asks the victim to repeat the card number for verification. After recording the number, he informs the cardholder that information about the trip will be arriving in the mail, and hangs up. Although the consumer will never hear about the trip again, the thief now has the credit card number which he can use in a variety of ways.

Using what is known as the "friendly fraud" scheme, relatives or acquaintances join forces in an effort to cheat the banks or card issuers. A cardholder gives his credit card to an accomplice who makes expensive purchases. Subsequently, the legitimate cardholder reports his card as stolen and shares the loot with his partner.

Some criminals counterfeit credit cards by obtaining genuine account numbers and imprinting them on blank cards—known in the industry as "white plastic." The crooks then either form phony companies or team-up with dishonest merchants. In any case, the fake cards are used to make legitimate-looking charge slips which are later taken to banks and exchanged for hard currency.

In 1980, a package containing 250 bogus credit card slips was found in the possession of two men at Chicago's O'Hare Airport. The phony slips were part of a "white plastic" scheme that reportedly cost Chicago-area banks $200,000. Security Pacific Bank lost the same amount in a similar scheme uncovered by Los Angeles police in 1981. And in New York, one criminal deposited 950 fake charge slips into an account at Chase Manhattan Bank before he was arrested; his scam, which involved two phony corporations, cost the bank $300,000.

Law enforcement officials are particularly concerned about these "white plastic" schemes as they seem to indicate the existence of large fraud networks and possibly the involvement of organized crime.

All in all, credit card fraud adds up to big money. Investigators believe that banks in New York, Chicago, and Florida lost $15 million last year due to "white plastic" schemes alone. And experts estimate that U.S. banks lost as much as $400 million from VISA and MasterCard fraud in 1980. Losses to the entire credit card industry, including retail, oil, and travel and entertainment card issuers, totaled approximately $1 billion last year—a 300-percent increase over the 1979 figure.

However, credit card issuers are hardly the only ones who suffer as a result of credit card fraud. In many instances, the issuers try to shift the losses to the merchants who were victimized by these schemes by "charging back" the fraudulent transactions. Loopholes in the merchant/bank agreement permit such chargebacks in a number of situations. For example, merchants are particularly vulnerable in cases when purchases have been made over the telephone; they can also be held liable in some circumstances even if prior authorization for the transactions had been obtained from the credit card issuer.

Although Federal law limits to $50 the liability to an individual cardholder who falls prey to one of these schemes, consumers as a whole are footing a large part of the credit card fraud bill since the issuers keep raising card fees and charging higher annual percentage rates. Until the credit card industry recognizes the terrible inadequacy of the current antifraud devices and develops new security measures, credit card fraud will remain a big business, and consumers will continue to suffer the consequences. Experts suggest that cardholders protect themselves by following these tips:

Do not sign slips without checking the amount.

To check for billing errors, save receipts and compare them to monthly bills.

If you find an error on your bill, immediately write a letter to the bank or company that issued the card.

Destroy old bills, receipts, carbons, and expired cards.

Never give your account number over the telephone unless you are making a purchase and want to have your account charged.

Ask store clerks or merchants to prepare all charge slips in your presence.●

LEGISLATION TO ALLOW ALL-SAVERS CERTIFICATES TO BE ROLLED OVER INTO IRA'S

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Massachusetts (Mr. FRANK) is recognized for 5 minutes.

● Mr. FRANK. Mr. Speaker, today I am introducing legislation which I believe to be of critical importance to financial institutions of this country. Last year the Congress authorized the creation of a new savings certificate, the all-savers certificate, which allowed financial institutions to issue 1-year tax-exempt certificates beginning in October 1981. In several days, these certificates will begin to mature and depositors will be free to take the proceeds and invest them wherever they choose.

Certainly no one would argue with the proposition that investors should be able to reinvest these proceeds in whatever manner they deem best. However, there is currently approximately $52 billion in all-savers deposits in financial institutions with over one half that amount in our thrift institutions. If that $52 billion, or even a substantial portion of those funds, were to be withdrawn and reinvested outside of those financial institutions, the outflow of funds could create a shortage of funds needed for housing. I believe it is incumbent on the Congress, which created the all-savers certificate, to find a solution which might avoid this problem.

This legislation would authorize a taxpayer holding an all-savers certificate to rollover the principal and interest from the certificate within 60 days of maturity into an individual retirement account. The present deduction limits for IRA's—$2,000, or $2,250 for a spousal IRA—would not be increased but the entire contributed amount would be part of the IRA and the interest earned while in the IRA would continue to be tax deferred until distribution at age 59½ or thereafter, as under present law. In other words, this legislation would authorize an individual to contribute more than the regular $2,000—or $2,250 for spousal IRA's—to an IRA provided that the funds were taken from the proceeds of a matured all-savers certificate, although the deduction limits would not be affected.

One other provision of the bill requires explanation. A taxpayer who has purchased an all-savers has bought it with after-tax dollars, meaning that he or she has already paid taxes on the principal amount of the all-saver. The interest earned on the principal is, of course, tax exempt. If that principal and interest were rolled over into an IRA, it would be taxable under normal circumstances when it was distributed at retirement. Therefore, the principal would be subject to what would amount to a double taxation and the interest of the all-saver would lose its tax-exempt status when removed from the IRA. In order to prevent this unfair result, the amount contributed from the all-saver would, at the election of the taxpayer, be treated as tax-exempt when distributed.

Mr. Speaker, the idea of rolling over proceeds from an all-savers into an IRA is strongly supported by the National Association of Mutual Savings Banks. I hope that the Congress will act expeditiously on this legislation before the session concludes.●

A BILL MAKING THE AUTOMATIC PENALTY FOR UNDERESTIMATING TAXES DISCRETIONARY

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Oklahoma (Mr. JONES) is recognized for 5 minutes.

● Mr. JONES of Oklahoma. Mr. Speaker, in filing my modest amendment to the tax code today I do not seek to change the whole course of tax policy in this country, but rather to make our system of taxation more equitable and fair to a number of taxpayers at a time when they are at their most vulnerable. The last thing law-abiding citizens need to encounter at a critical juncture in their lives is an administration of justice that is prevented by law from showing any understanding, let alone mercy.

I refer to the many taxpayers each year who, after years of hard work, retire and for the first time in their lives no longer have their taxes withheld, but must suddenly start estimating. As matters now stand, there is little publicity available about the responsibilities of estimating. Too many times in the course of making what is already a painful adjustment to a new way of life, our retirees find out too late they have, through no fault of their own, failed to comply with the estimating requirements. Under current law, the Internal Revenue Service has no alternative but to slap them with an automatic penalty for failure to estimate. The exceptions currently enumerated are so tightly drawn they just do not permit the service to take their predicament into consideration, whether they would like to or not.

Similarly, in the case of those who are confronted with a sudden death in the family and either miss a filing deadline or are unaware of their new responsibilities under the tax law. For that matter, the service has been unable to show sympathetic treatment to those suddenly incapacitated by one disability or another and are prevented from meeting a deadline. The last thing individuals in such an unfortunate situation need is to be slapped with any automatic tax penalties.

Obviously, none of these examples lend themselves to neat universal rules, but vary from situation to situation. Rather than try to attempt the impossible and end up accommodating wrong-doers as well as the innocent, again and again Congress has empowered the service to use its judgment on a case-by-case basis.

That is all I seek now in filing this bill permitting the IRS to waive the penalty imposed on underpayments of estimated tax where there was reasonable cause for underpayment. Experience in dealing with the service in connection with several hardship cases from my own district indicates to me that the service itself would not mind having this discretion. After all, they have no more desire than anyone else in our Government to end up on the 6 o'clock news looking foolish because of the strict letter of the law, rather than the spirit.●

INSTITUTE FOR INTERGOVERNMENTAL RESEARCH REPORTS ON REGIONAL MULTISTATE INTELLIGENCE PROJECTS

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Oklahoma (Mr. ENGLISH) is recognized for 5 minutes.

● Mr. ENGLISH. Mr. Speaker, as this Congress approaches the end of its second session, two things are plainly on the minds of the American people: making the most efficient use of tax dollars, and reducing crime, particularly violent crime. Happily, there ap-

pears to be a way to do both at once. I am speaking of the seven regional multistate criminal intelligence-sharing projects which were created under the auspices of the LEAA, and which proved so successful that they survived the demise of that program.

As chairman of the Government Operations Subcommittee on Government Information and Individual Rights, I convened 2 days of hearings on these projects in 1981. On October 20 of last year the Committee on Government Operations issued a report of our findings (H. Rept. No. 97-280). We found that the multistate projects were serving their law enforcement members and the public well, and that they were returning to the Federal Treasury in recoveries far more than they were costing. They were scrupulously observing privacy and security guidelines.

For those members unfamiliar with the projects, they operate on a regional basis to provide a mechanism through which member local law enforcement agencies can coordinate significant criminal investigations, share intelligence, pool resources, and communicate with each other. They operate under strict guidelines promulgated by the Department of Justice and receive funding through grants channeled through a duly constituted governmental entity, such as a State attorney general's office or other units of State or local government.

The concept for the projects was formally advanced in the 1976 National Advisory Committee on Criminal Justice Standards and Goals "Report on Organized Crime," which noted that some prototype networks were even then showing degrees of success.

In March 1980, my predecessor as chairman of the Government Information and Individual Rights Subcommittee, Richardson Preyer, requested GAO to review the projects. Their report, "The Multistate Regional Intelligence Projects—Who Will Oversee These Federally Funded Networks: GGD-81-36", spoke of the problems and potential of the projects to enhance the effectiveness of our State and local law enforcement agencies in their battle against mobile, sophisticated criminals.

At the hearings in May 1981, witnesses from the Department of Justice, while admitting that the projects were effective in providing coordinating services to member agencies, nevertheless called for a cessation of Federal funding for them. According to the witnesses, the Department of Justice could no longer afford the $5 to $7 million annual price tag for the projects. They told us that, since the inception of the projects, the Department of Justice had spent a total of just over $16 million, and received in return from one project alone over $50 million in referrals to the IRS on tax fraud cases. I am pleased to note that this figure today exceeds $100 million. The other six projects report over $750 million in recovered narcotics, stolen property and currency.

The Department's position was simply that it was a matter of priority for funding; they wished to have put those funds in other programs. I, for one, am glad they did not. I am joined in this feeling by a least 54 Members of this House, who cosponsored House Resolution 166 expressing our support and encouraging the Department of Justice to continue funding the projects.

In the Senate, 27 Members, including the entire Republican leadership, recently signed a letter to the Attorney General to urge his support for the projects. The response of the Department to that letter painted a rather gray picture of the projects, suggesting that they were not as valuable as we were being led to believe.

I am pleased, therefore, to be able today to share with my colleagues the findings of the Institute for Intergovernmental Research (IIR), a private research firm of impeccable reputation, with whom the Department of Justice's Office of Justice Assistance, Research, and Statistics (OJARS) had contracted for an independent evaluation of the effectiveness of the multistate projects. Their final report, issued earlier this summer, is a ringing endorsement of the performance of these innovative projects. IIR found that the most troublesome problem of the project managers has been to deal with the Department of Justice, not with the criminals whom they were organized to fight. It finds that the projects, in their individual operations, reflect the priorities of their respective regions, ranging from narcotics to organized crime to coal industry fraud. IIR agreed with the findings of our committee that the projects are cognizant of the DOJ/LEAA criminal intelligence systems operating policies, and that each had implemented formal policies restricting criminal information dissemination only to member agencies.

Importantly, IIR states:

> While all the projects exchange information with one another on an as-needed basis, there is no evidence or indication that the projects are developing or intend to develop a coordinated nationwide intelligence system.

In commenting on the continuing disagreement between the Congress and the Department of Justice over the value of the projects, IRR found:

> The Regional Information Sharing Systems (RISS) projects as a group and the Department of Justice have divergent views concerning the merits of Congressional appropriations to the Department of Justice to financially support the RISS projects. These divergent views have resulted in numerous difficulties in the routine administration of project funds and have served to detract from the effectiveness of OJARS' management of the program. However, the intent of the Congress that the Department provide funding in support of the multistate projects has in fact been fulfilled.

The first of many recommendations made by IIR is one which I endorse, and commend to the attention of Members of this House. It is that Federal funding be continued because of the importance of the contributions of the projects to State and local law enforcement.

The seven multistate regional intelligence projects, with member States and host agencies, are:

MULTISTATE REGIONAL INTELLIGENCE PROJECTS

Regional Organized Crime Information Center (ROCIC)—Alabama, Arkansas, Florida, Georgia, Kentucky, Louisiana, Mississippi, North Carolina, Oklahoma, South Carolina, Tennessee, Texas, Virginia, West Virginia. Host Agency: Metropolitan Government of Nashville/Davidson County, Tennessee.

Rocky Mountain Information Network (RMIN)—Arizona, Colorado, Idaho, Montana, Nevada, New Mexico, Utah, Wyoming. Host Agency: Arizona Criminal Intelligence System Agency.

Western States Information Network (WSIN)—Alaska, California, Hawaii, Oregon, Washington. Host Agency: California Department of Justice.

New England State Police Administrators Conference (NESPAC)—Connecticut, Maine, Massachusetts, New Hampshire, Rhode Island, Vermont. Host Agency: Massachusetts State Police.

Middle Atlantic-Great Lakes Organized Crime Law Enforcement Network (MAGLOCLEN)—Delaware, Indiana, Maryland, Michigan, New Jersey, New York, Ohio, Pennsylvania. Host Agency: Pennsylvania Crime Commission.

Mid-States Organized Crime Information Center (MOCIC)—Illinois, Iowa, Kansas, Minnesota, Missouri, Nebraska, North Dakota, South Dakota, Wisconsin. Host Agency: Missouri Attorney General's Office.

Leviticus—Alabama, Georgia, Indiana, Kentucky, New York, Pennsylvania, Virginia. Host Agencies: New York County District Attorney, and the Virginia Division of Justice and Crime Prevention.●

BANKRUPTCY COURT ACT OF 1982

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from California (Mr. EDWARDS) is recognized for 5 minutes.

● Mr. EDWARDS of California. Mr. Speaker, we face a crisis in the judicial system on October 4, 1982, unless the Congress enacts corrective legislation before that date to solve the constitutional problem in the Federal bankruptcy court system.

H.R. 6978, the Bankruptcy Court Act of 1982, which Mr. RODINO introduced on August 12, 1982, and which I have cosponsored along with Mr. MCCLORY and Mr. BUTLER, would remove all constitutional uncertainty surrounding the bankruptcy courts by providing for the appointment of U.S.

bankruptcy judges under article III of the Constitution. The bill was favorably passed by the Judiciary Committee on August 19.

The U.S. Supreme Court held on June 28, 1982, in the case of *Northern Pipeline Construction Company* v. *Marathon Pipe Line Co.*, ——— U.S. ———, 50 U.S.L.W. 4872, that the jurisdiction conferred on the bankruptcy courts by section 241(a) of Public Law 95-598 cannot be constitutionally exercised by those courts, because bankruptcy judges are not afforded the protections set forth in article III of the Constitution to insure judicial independence—tenure during good behavior and guarantee against salary diminution while in office. The Court invalidated section 241(a), but expressly stayed the entry of its order in the case until October 4, 1982, in order to give Congress time to correct the constitutional problem. Absent congressional action by October 4, the bankruptcy courts will lack authority to hear and decide any bankruptcy matter.

Failure to remedy the constitutional problem by October 4 threatens chaos in the judicial system and credit community and could jeopardize jobs. There are in excess of 500,000 cases presently pending in the bankruptcy courts involving billions of dollars in creditors' claims. Many major corporations, employing tens of thousands of employees and having billions of dollars of assets and liabilities, and many farmers are now operating under chapter 11 of the Bankruptcy Code. In just two chapter 11 cases alone—Wickes Corp. and Sambo's—50,000 jobs are involved.

Echoing the views of the Judicial Conference which has long opposed an article III bankruptcy court on the ground that it would somehow diminish the prestige of the Federal district court judges, my colleague, Mr. KASTENMEIER, stated in the September 16, 1982, CONGRESSIONAL RECORD that H.R. 6978 would create new courts of general jurisdiction, establish additional judgeships, and create more courthouses and supporting personnel. This is completely inaccurate.

H.R. 6978 does not create a new court, does not authorize additional judges or personnel, and does not alter the jurisdiction of the bankruptcy courts. The bill simply grants article III status to an existing court by providing that U.S. bankruptcy judges be appointed by the President for life rather than for 14-year terms as is the case under present law. The number of bankruptcy judges under the bill (227 judges) is essentially the same as the current number of bankruptcy judges (241 judges), and the present jurisdiction of the bankruptcy courts which extends to all bankruptcy and bankruptcy related cases remains completely unchanged.

In a report filed on September 10, 1982, the Judicial Conference appears to read the dissenting opinion of Chief Justice Burger in the Northern Pipeline case as if it were the ruling of the Court. As one constitutional scholar testified at the subcommittee hearings:

> I think the Chief Justice had his say 5 years ago. I think it would be fundamentally unwise to recommit this question to him again.
>
> * * * * *
>
> The Chief Justice's dissent is exactly that. It is a dissent. That is, it is a statement of position by a gentleman who refuses to agree with the people who disagree with him. And I think he is not even purporting to read Justice Brennan's opinion, I guess—so I can't say his misreads Justice Brennan's opinion.
>
> I think he reads Justice Rehnquist's opinion in a way that is simply unsupportable.

The Chief Justice's dissenting opinion forms the basis of the Judicial Conference's legislative proposal and the proposal which Mr. KASTENMEIER has introduced as H.R. 7132. Far from creating jurisdictional unity and clarity and providing constitutional certainty for the bankruptcy court system, the proposal would create ambiguity, confusion, and endless jurisdictional disputes. This proposal is, if anything, even more inefficient than the pre-1978 bifurcated summary plenary jurisdictional system. The Judicial Conference's proposed "remedy" is in effect a trifurcated system that would produce endless litigation over which forum should hear an issue, diluting the assets of the estate and reducing the present value of creditors' claims.

Bankruptcy experts Lawrence P. King of New York University School of Law, Vern Countryman of Harvard Law School, and Frank R. Kennedy of the University of Michigan Law School have commented:

> The Report is replete with phrases and labels having no content other than that poured into them by the authors of the Report: "ancillary issues" and "ancillary cases"; "substantive bankruptcy law questions"; "bankruptcy law cases"; and "subsidiary proceedings." The authors seem to have no appreciation of the vagueness and potential disagreements as to the meanings of such language. Yet the Report purports to make a statistical calculation as to the proportion of the bankruptcy-connected litigation that is or would be embraced by the term "ancillary cases." * * *
>
> It thus appears that a substantial part of the jurisdiction that shall be exercised by the bankruptcy court under [the Judicial Conference's] proposed § 1471(c) may be challenged as beyond the power that may be exercised by that court. On the other hand no disposition is made at all respecting a large part of the regular business of the bankruptcy court. Jurisdictional challenges and problems of interpretation would be rife for at least a generation under such a cryptic statute.
>
> The Report speaks of the need to clarify the jurisdictional grant made by the Bankruptcy Reform Act and to deal with the ambiguities in that grant. There is neither ambiguity nor a need for clarification of the grant of jurisdiction in [present] § 1471. The amendment proposed by the Judicial Conference would create ambiguity, confusion, and litigation-producing doubts about every exercise of jurisdiction by the bankruptcy court. The Report glosses over the many problems the flood of litigation it would loosen, and the delays and expense that would be entailed by superimposing on bankruptcy administration the obscure provisions of the proposed 28 U.S.C. § 1471.
>
> The legislation proffered by the Judicial Conference is totally unresponsive to current needs. It not only reintroduces a bifurcated Jurisdictional system; one might say it would establish a trifurcated system. Instead of permitting all disputes to be resolved in one forum it would give the bankruptcy courts jurisdiction over title 11 cases and subsidiary proceedings, which may, however, be recalled by the district judge and then referred to a magistrate. Related proceedings, another legislative term, would remain with the district court but supposedly could be referred to a bankruptcy judge as special master under proposed § 1471(f).
>
> Thus, we would have cases under title 11, subsidiary proceedings, and related proceedings. We would also have the district judge, the bankruptcy judge, and the magistrate. Perhaps the view of the Judicial Conference is to place the magistrate above the bankruptcy judge since the district judge could recall a case or related proceeding from the bankruptcy judge and refer it to a magistrate. In any event this trifurcated system, although it includes Article III district judges, apparently could not handle claims based on state law, which would have to go to the state court in the absence of diversity of citizenship.

The Judicial Conference's proposal is unsound and inefficient. It would dilute the resources of an overburdened district court. It would involve massive duplication of effort by bankruptcy and district judges and magistrates. It would generate excessive, costly, and wasteful litigation over jurisdiction, productive only of expense and delay. This proposed "remedy" would completely undermine the goals of successful rehabilitation of debtors in reorganization cases and prompt liquidation and distribution to creditors in asset liquidation cases.

The hearing records in both the House and Senate demonstrate that an article III bankruptcy court is the only clearly constitutional and efficient bankruptcy court system. The Congress has now examined this issue three times—in the 94th, 95th, and the 97th Congresses. In both the 94th and 95th Congresses, the House reviewed the constitutional issues surrounding the bankruptcy courts and concluded that an article III bankruptcy court was constitutionally required. The House passed an article III bankruptcy court bill in the 95th Congress. In a compromise with the Senate, a non-article III court was created however.

I think the testimony of one witness who testified before the subcommittee is apt:

The Congress must realize that if it wishes to resolve this matter fully and responsibly, it must stop concentrating its attention on interim, stop-gap measures and turn its energies to the long-run question. This means principally that Congress must stop losing sleep over the economic and social status of 220 bankruptcy judges and start to worry about the constitutional rights of 220 million American citizens. That . . . is the less of Marathon Pipe Line.

PERSONAL EXPLANATION

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Colorado (Mr. WIRTH) is recognized for 5 minutes.

● Mr. WIRTH. Mr. Speaker, this morning I had another joyous meeting with my dentist. To my despair, physically and politically, it went longer than expected, and I thus missed three votes on final passage under suspension of the rules. Had I been present, I would have cast affirmative votes for H.R. 3581, H.R. 5573, and H.R. 6867.●

UPDATE ON AIR TRAFFIC CONTROLLER SITUATION

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Michigan (Mr. FORD) is recognized for 5 minutes.

● Mr. FORD of Michigan. Mr. Speaker, today I was advised by the chairman of the National Transportation Safety Board that the Board will initiate a followup special investigation of the air traffic control system. Members may recall that the initial NTSB investigation last year supported the staff findings of the Committee on Post Office and Civil Service that the Federal Aviation Administration's projections for restaffing the system were unrealistic, and that full recovery of the system would take longer than the administration claimed.

This is a propitious time for the Board to reexamine the state of the system. The full burden of the influx of hundreds of trainees is now falling on the small number of qualified controllers who are still employed. The arduous task of providing on-the-job training for these raw recruits, coupled with continued long hours and little time off, is without question straining the work force. Reports reaching the committee indicate that personnel management, which was found seriously lacking by a special task force appointed by the Secretary of Transportation, is getting worse, not better. The problems within control centers and towers which led to the unfortunate strike are reappearing. Morale is suffering. I have included at the end of my statement a thoughtful letter from a controller to the FAA Administrator which describes some of the problems "on the inside."

I am pleased the NTSB will focus specifically on the problems at the FAA training academy, including the "publicly debated issues about 'cheating' and grade fixing." Last December, a committee staff investigation found substantial evidence of grades being fixed to increase the number of students graduating. Although the FAA Administrator, in testimony before the committee, advised us that his investigation of the grade fixing allegations "positively concludes that there was no manipulation of scores and no intent to mainipulate those scores," the results of an inspector general investigation, requested by the committee, have been referred to the Department of Justice for a determination as to possible criminal activity.

Meanwhile, the academy continues to have trouble graduating students. After a brief improvement in the pass rate this summer, the rate has plummeted to earlier dismal levels. Only 52.4 percent of the August 24 class graduated. In an attempt to offset academy losses, the FAA has employed over 1,000 former military "direct hires" and sent them directly to facilities, skipping academy training altogether. This was never done before the strike. Only time will tell whether these individuals can develop the skills necessary to safely handle air traffic without the benefit of attending the FAA training academy.

A final problem at the academy, which I am sure the NTSB will examine, is the quality of instructors now being used. In the past, highly qualified active controllers, in essence the cream of the crop, were assigned to 2-year tours as instructors. Now, because of the shortage of qualified controllers in centers and towers, these active controllers are being phased out as instructors, and retired controllers are being hired under contract as instructors. Concern has been expressed that these retirees, however dedicated, may not be familiar with current procedures and equipment, and the quality of instruction may suffer. Again, only time will tell if future academy graduates will have the skills necessary to safely handle air traffic.

These are some of the problems NTSB will be examining. The Members know my position on how to rebuild the system. I am convinced that the only way to return the system to normal in an expeditious manner is to bring back some of the fired controllers. The committee has reported a bill which would permit, but not require, the rehiring of enough controllers to accomplish a speedy return to normal. The committee bill also addresses FAA management problems and contains provisions designed to improve morale.

The administration is currently opposed to the committee bill. I have, however, attempted to work out our differences with the Secretary of Transportation. On August 3, 1982, on the MacNeil/Lehrer Report, the Secretary stated:

And we'd much prefer, if we could have selectively, to bring some of these people (the fired controllers) back.

The committee bill would permit this. The Secretary has indicated to me that his staff believes some additional legal issues need to be addressed, and I hope we can resolve this matter before adjournment.

I want to caution Members, however, that there is always the possibility that the administration, as it did last year, will attempt to sneak its FAA pay raise bill through as a nongermane Senate amendment to the continuing resolution. This would be unfortunate. The administration's bill does not address any of the serious problems which have been identified. Instead, it simply throws money at the problems. A pay raise for those who have been working long and hard may improve morale in the short term, but it will do nothing to solve the long-term problems and prevent a recurrence of the employee-mangement problems which resulted in the current unfortunate situation. At this point in the RECORD I include the following letter:

SEPTEMBER 7, 1982.

J. LYNN HELMS,
FAA Administrator.

SIR: Unfortunately, this letter is long overdue in regard to being timely. I feel quite certain it will not break any virgin ground; but it is necessary, if not in order to initiate change, then only to re-enforce my own perseverance and retain some peace of mind. Hopefully, you will accept this in the spirit in which it is intended; not as the ravings of a malcontent, but as a totally subjective view by an employee. All opinion expressed is presented strictly as personal. Please keep in mind, however, that this same opinion has been formulated over a fourteen year career through action, and reaction, on a continuous daily basis with other controllers and with FAA management personnel.

At the time of the strike last August 3rd, I was a dues payer in PATCO working at Hartsfield Airport in Atlanta, Georgia. I had joined the union almost ten years prior and during that time had attended about three union meetings. For a number of reasons, the thought of going on strike never entered my mind. It appears that our decision to remain at work has been construed as a condonation of previous management practices. Let me assure you that is not the case. As you and Secretary Lewis stated, and the Jones Committee, as well as other studies verify, the union had some legitimate issues which need to be addressed. Thirteen months have passed and it is time to begin.

I am not speaking of cosmetic changes (assistant chief is now area manager, etc.). Nor am I speaking of committees (FATTAC is now FAB, and we're forming an HRC.). My concern, and I feel safe to say this view is held by the majority of those of us who are still working, is for visible, substantive change. So here in no particular order of importance are the things that in my opinion are waiting to be corrected. In some in-

stances, for obvious reasons, it becomes necessary to deal in generalities. I hope this will not dissuade you from the importance of the issue. Do with them what you will:

Needless to say the action taken to end the strike took most of us by surprise. Those of us who remained had envisioned a 48 to 72 hour walkout followed by some concession on both sides, the boys coming back, and a tedious return to status quo. All of a sudden that was not the case. The strikers had been fired and we became the saviors of the FAA, the darlings of the media, and the nucleus for the rebuilding program. The adulation and recognition was a cheap high and I dare say nurtured an attitude of invincibility. "We can make the system work and we don't need any of 'em back" was the order of the day. In conjunction with this, management became very attentive to our desires and, for a time, nothing was too good for us. We were supplemented by some very capable (and some not so capable) military personnel. Even we were amazed at the amount of traffic we could keep in the air. This went on for a few months; but ever so slowly the honeymoon has faded to an almost forgotten memory. The attitude of management has evolved to, and is occasionally verbalized, "if you don't like what's going on, you can hit the street with the rest of them." Quite a turn around for thirteen months.

In Atlanta we were left with approximately thirty percent of our workforce (about 30 controllers). As I stated before, we added fifteen military controllers and several administrative personnel became operational. For awhile conditions were satisfactory and we made it through the holidays with few problems. Now, however, more than half of the military are gone back to their bases. Six remain. The administrative persons have returned to their paperwork. And through retirement and various other reasons we have lost at least four (depending on who is counting—it can be more) fully qualified controllers. More losses in the form of losing our military help (January 1), retirements (some eligible now, others next year), and possible medical disqualifications loom on the near horizon. This gives us a net loss of fifteen or so from immediate post-strike levels and no end to the trend is imminent. Yet more aircraft enter the system daily. Logic dictates that this cannot continue unchecked.

During this same time frame, a number of selections for controller personnel have been made. To date only one (1) has been fully certified. Through no fault of their own the problem appears to be a definite lack of background on the part of those being selected. We are told that they are the best available people for the job, but they just do not have the experience necessary to handle the volume of traffic demanded in our situation. This in no way is intended to be an indictment of the safety of the system. I feel that under the circumstances, the system is as safe as pre-strike and the integrity has been maintained admirably. Let me hasten to add that to my knowledge, and to our local management's credit, at no time has any undue pressure been placed on anyone to certify someone that an instructor did not think was qualified for the job. This has not always been the case under conditions much less demanding than this, and I feel they are to be commended for this. The fact remains that, contrary, to what you may be told, rebuilding is not on schedule, and there is no relief in sight in the near (1 to 2 yrs is a conservative estimate) future. Please, sir, keep in mind that I am dealing with real time events and not philosophies or numbers on a sheet of paper. It is difficult to imagine merely surviving long enough to rebuild, much less trying to provide the service we are obligated to provide the flying public.

During a safety seminar held in Phoenix, Mr. Fenello said that as much as fifty percent of the present management unit might not be able to survive the "transition" to the new "people policies" in the FAA. Either Mr. Fenello under-estimated his people or the transition has not taken place. Undoubtedly, the latter is the case. To his defense I must admit he said he did not know how these problems would be dealt with. For thirteen months the theory appears to be "if we ignore them, maybe they will go away." Let me confirm what you may already suspect. The problems are not going away. We have been overwhelmed with this rhetoric for years and years. If you, sir, and Mr. Fenello, and Secretary Lewis, and countless other spokesmen are true to your word, then it is time to overhaul an inefficient agency. I am aware that it cannot be the case, but we in the field have seen no apparent change in practice or policy in the period since the strike. While I am aware that the bureaucratic process works at a restricted pace, it only took three days to fire over 11,000 people. It seems that there would be a certain immediacy to correct the motivation for such a drastic action taken by a debilitating majority of a workforce. No one is naive enough to believe the sole issue was financial. With each day that passes the credibility of the people with the ability to invoke change becomes more and more suspect.

It appears to me that one of the major obstacles in FAA procedure is one of lack of communication. This is not a reference solely to a lack of availability to express an upward flow of information. But also to the failure in most cases to provide any insight or background on why certain things are altered or initiated. This is not an attempt to establish a forum to include the bulk of the workers in all decision-making process. We all recognize and welcome the fact that someone else is hired to do that. It would be nice, however, to be afforded at least some rationale behind any new programs which, at face value, look like change for the sake of change. In addition, there is a need for a line of access from the field to the national administrative level. There is too just an adversary relationship between the average controller and his regional office for that unit to be an effective conduit for suggestions. Many times ideas, good ideas, are never even put to paper because of the prevailing "what's the use" attitude that is inherent in today's system.

Equipment is, and forever will be, a source of frustration for any controller. Nothing ever works efficiently enough, or quickly enough, or often enough for us. It seems that there is always an essential item going out exactly when it can do the most good. Realizing this is not true, here are a few things that can be verified. We have a radar beacon system in Atlanta that has never since its installation been adequate. Numerous complaints bring only the appeasement of a channel change, which constitutes going from one bad interrogator to the other bad interrogator. This has been documented countless times and no fix is in sight. Ever since the wattage on our radios was reduced, we have had intermittent radio problems. Our ASDE (airport surface detection equipment) works best when the weather is beautiful. And last, but by no means least, is the FDEP program and network. The equipment used for this system is close to twelve years old. It is extremely slow and plagued by constant breakdowns. And now we are handicapped by not being able to even submit, much less implement, any modifications over a prescribed number to the program, either nationally or locally. We are subject to the capabilities of a computer system that was, for practical purposes, obsolete years ago. This does not coincide with the FAA's responsibility and mission to provide the best possible service to the aviation industry and its users.

Finally, there is a feeling that the financial benefits which were part of a pre-strike bargaining agreement have been relegated to a low (or no) priority by both the FAA and Congress. Understandably the legislative process is slow; but we are talking about one bill which was, in essence, written before the strike, and another which is several months old. Charges and countercharges fly as to who is responsible for the delay. The FAA says Congressman Ford's bill would force the rehiring of all fired controllers, and that the people still on the job don't want that. Well let me tell you for a fact, that at no time in thirteen months has anyone connected with the FAA asked me if I do or do not want the fired controllers back. If this is going to be the FAA position, they should substantiate it with a legitimate survey of everyone still on the job. On the other hand, Congressman Ford has not rushed his bill to the floor, probably trying to gain support for it. It would be to the advantage of all concerned to provide some action, either positive or negative, on this matter and proceed from there with the business at hand. Too often as papers are being shuffled about, it is easy to lose the human aspect of the question.

These are the major problem areas that I see in the FAA right now. If every controller, past or present, read this I feel most would concur with this summary. There are many more personal gripes which could be added, but they pale compared to these. However, when you stop and think about it, if the issues stated here were addressed, there would not be as many individual complaints. This is the challenge you have undertaken, Mr. Helms. If there is a doubt in your mind whether this is a representative letter or not, find out. Not by asking Mr. Van Vuren, or a regional director, or a facility chief. Go to the source and ask a cross-section of the people that are on the job. That is the only way to determine how people perceive policy. I am positive that, in general, the management in the FAA is as dedicated to accomplishing the purpose assigned to this department of government as any other federal employee. But with each ascending step in management, there is a degree of removal from the everyday essentials required for providing the service the people have a right to expect. This includes the intangible necessities as well as the material. It is useless to remind you that there is no better time to establish principals which will be the basis for the FAA for the future. Now is the time to implement the course of action which must have been chosen by now. Speaking for myself and hopefully all air traffic controllers let me appeal for the tools we need. At the risk of echoing the remonstrations of PATCO, give us what we are lacking: adequate staffing, working conditions which will promote ours to become a survivable occupation, and state

of the art equipment enabling us to perform our trust safely, accurately, and efficiently.

Sincerely,

MICHAEL HAKLITCH.

SPECIAL ORDERS GRANTED

By unanimous consent, permission to address the House, following the legislative program and any special orders heretofore entered, was granted to:

(The following Members (at the request of Mr. MARTIN of New York) to revise and extend their remarks and include extraneous material:)

Mr. PAUL, for 60 minutes, today.

Mr. GILMAN, for 5 minutes, today.

(The following Members (at the request of Mr. WAXMAN) to revise and extend their remarks and include extraneous material:)

Mr. SCHUMER, for 30 minutes, today.

Mr. DYSON, for 5 minutes, today.

Mr. GONZALEZ, for 15 minutes, today.

Mr. ANNUNZIO, for 5 minutes, today.

Mr. FRANK, for 5 minutes, today.

Mr. JONES of Oklahoma, for 5 minutes, today.

Mr. ENGLISH, for 5 minutes, today.

Mr. EDWARDS of California, for 5 minutes, today.

Mr. WIRTH, for 5 minutes, today.

Mr. FORD of Michigan, for 5 minutes, today.

EXTENSION OF REMARKS

By unanimous consent, permission to revise and extend remarks was granted to:

Mr. HANSEN of Idaho, following the vote on Senate Joint Resolution 250, today.

(The following Members (at the request of Mr. MARTIN of New York) and to include extraneous matter:)

Mr. BADHAM.

Mr. COATS.

Mr. LEBOUTILLIER in two instances.

Mr. GRADISON.

Mr. NELLIGAN.

Mr. MCKINNEY.

Mr. CHAPPIE.

Mr. GOODLING.

Mr. ROUSSELOT in two instances.

Mr. RITTER.

Mr. WOLF.

Mr. WINN.

Mr. ERDAHL in two instances.

Mr. GILMAN.

Mr. MOLINARI.

Mr. LEE.

Mr. DREIER.

Mr. BROYHILL.

Mr. MCCLORY.

Mr. HOLLENBECK.

Mr. EVANS of Delaware.

Mr. CRAIG.

(The following Members (at the request of Mr. WAXMAN) and to include extraneous matter:)

Mr. MAZZOLI.

Mr. HALL of Ohio.

Mr. STOKES in two instances.

Mr. FORD of Michigan.

Mr. MONTGOMERY.

Mr. MINISH.

Mr. ADDABBO in two instances.

Mr. GORE.

Mr. AUCOIN in two instances.

Mr. SKELTON.

Mr. DOWNEY in two instances.

Mr. DE LUGO in two instances.

Mr. BOLAND in two instances.

Mr. JACOBS in two instances.

Mr. ZEFERETTI.

Mr. SHELBY.

Mr. MOFFETT.

Mr. MURTHA.

Mr. SIMON in two instances.

Mr. FITHIAN.

Mr. HAMILTON.

Mrs. SCHROEDER.

Mr. CONYERS.

Mr. MOTTL.

Mr. WON PAT.

Mr. DYSON.

Mr. PEYSER.

Mr. LEHMAN.

Mr. MCDONALD.

SENATE ENROLLED BILL AND JOINT RESOLUTIONS SIGNED

The SPEAKER announced his signature to an enrolled bill and joint resolutions of the Senate of the following title:

S. 215. An act for the relief of Lourie Ann Eder;

S.J. Res. 186. Joint resolution to authorize and request the President to designate the week of September 19 through 25, 1982, as "National Cystic Fibrosis Week";

S.J. Res. 205. Joint resolution to designate September 1982 as "National Sewing Month"; and

S.J. Res. 250. Joint resolution to provide for resolution of the single outstanding issue in the current railway labor-management dispute, and for other purposes.

BILL PRESENTED TO THE PRESIDENT

Mr. HAWKINS, from the Committee on House Administration, reported that that committee did on September 21, 1982, present to the President, for his approval, a bill of the House of the following title:

H.R. 3517. An act to authorize the granting of permanent residence status to certain nonimmigrant aliens residing in the Virgin Islands of the United States, and for other purposes.

ADJOURNMENT

Mr. MONTGOMERY. Mr. Speaker, I move that the House do now adjourn.

The motion was agreed to; accordingly (at 6 o'clock and 30 minutes p.m.), the House adjourned until tomorrow, Thursday, September 23, 1982, at 10 a.m.

EXECUTIVE COMMUNICATIONS, ETC.

Under clause 2 of rule XXIV, executive communications were taken from the Speaker's table and referred as follows:

4815. A letter from the Chairman, U.S. Consumer Product Safety Commission, transmitting the Commission's fiscal year 1984 budget request, pursuant to section 27(k) of the Consumer Product Safety Act; jointly, to the Committees on Appropriations and Energy and Commerce.

4816. A communication from the President of the United States, transmitting a request for appropriation amendments and amended appropriation language for fiscal year 1983 (H. Doc. No. 97-239); to the Committee on Appropriations and ordered to be printed.

4817. A letter from the Deputy Assistant Secretary of Defense (Reserve Affairs), transmitting a report as of June 30, 1982, on selected Reserve recruiting and retention incentives, pursuant to 10 U.S.C. 2134, and 37 U.S.C. 308b and 308c; to the Committee on Armed Services.

4818. A letter from the Assistant Secretary of State for Congressional Relations, transmitting a report of political contributions of Ambassador-designate David J. Fischer, and members of his family, pursuant to section 304(b)(2) of Public Law 96-465; to the Committee on Foreign Affairs.

4819. A letter from the Comptroller General of the United States, transmitting a report on the progress of improving program and budget information for congressional use (GAO/PAD-82-47, September 1, 1982); to the Committee on Government Operations.

4820. A letter from the U.S. Trade Representative, transmitting notice that on September 21, 1982, the President suspended the moratorium for Canada which prohibits issuance of certificates or permits to motor carriers domiciled in, or owned or controlled by persons of, a contiguous foreign country, pursuant to section 6 of the Bus Regulatory Reform Act of 1982, Public Law 97-261; to the Committee on Public Works and Transportation.

4821. A letter from the Assistant Secretary of the Army (Civil Works), transmitting a Corps of Engineers report regarding studies for flood control in Brevard County, Fla., in response to a resolution by the Committee on Public Works and Transportation adopted December 9, 1975; to the Committee on Public Works and Transportation.

4822. A letter from the Comptroller General of the United States, transmitting a report on accurate air quality data for the Environmental Protection Agency in formulating a reliable monitoring system (GAO/CED-82-101, September 22, 1982); jointly to the Committees on Government Operations and Energy and Commerce.

4823. A communication from the President of the United States, transmitting a draft of proposed legislation to amend section 204 of the Federal Property and Administrative Services Act of 1949, as amended, to authorize the deposits of cash proceeds from the disposal of surplus real property into the general fund of the Treasury to be used to retire the national debt of the United States (H. Doc. No. 97-240); jointly, to the Committees on Government Operations and Interior and Insular Affairs and ordered to be printed.

REPORTS OF COMMITTEES ON PUBLIC BILLS AND RESOLUTIONS

Under clause 2 of rule XIII, reports of committees were delivered to the Clerk for printing and reference to the proper calendar, as follows:

Mr. FORD of Michigan: Committee on Post Office and Civil Service. Report pursuant to section 302(b) of the Congressional Budget Act of 1974 (Rept. No. 97-851). Referred to the Committee of the Whole House on the State of the Union.

Mr. ANNUNZIO: Committee on House Administration. House Resolution 568. A resolution providing amounts from the contingent fund of the House for further expenses of investigations and studies by the Committee on Standards of Official Conduct in the 2d session of the 97th Congress (Rept. No. 97-852). Referred to the House Calendar.

Mr. DINGELL: Committee on Energy and Commerce. House Joint Resolution 600. Joint resolution to provide for resolution of the single outstanding issue in the current railway labor-management dispute, and for other purposes (Rept. No. 97-853). Referred to the Committee of the Whole House on the State of the Union.

Mr. ROYBAL: Committee on Appropriations. H.R. 7158. A bill making appropriations for the Treasury Department, the U.S. Postal Service, the Executive Office of the President, and certain independent agencies, for the fiscal year ending September 30, 1983, and for other purposes (Rept. No. 97-854). Referred to the Committee of the Whole House on the State of the Union.

Mr. UDALL: Committee of conference. Conference report on S. 1409 (Rept. No. 97-855). Ordered to be printed.

SUBSEQUENT ACTION ON REPORTED BILLS SEQUENTIALLY REFERRED

Under clause 5 of rule X, the following actions were taken by the Speaker:

The Committees on Banking, Finance and Urban Affairs and Public Works and Transportation discharged from the further consideration of H.R. 3252; H.R. 3252 referred to the Union Calendar.

The Committee on Armed Services discharged from the further consideration of H.R. 4281; H.R. 4281 referred to the Union Calendar.

PUBLIC BILLS AND RESOLUTIONS

Under clause 5 of rule X and clause 4 of rule XXII, public bills and resolutions were introduced and severally referred as follows:

[Omitted from the Record of September 21, 1982]

By Mr. EDWARDS of California (for himself and Mr. MCCLORY):

H.R. 7154. A bill to amend the Federal Rules of Civil Procedure with respect to certain service of process by mail, and for other purposes; to the Committee on the Judiciary.

By Mr. FASCELL:

H.R. 7155. A bill to settle certain Indian land claims within the State of Florida, and for other purposes; to the Committee on Interior and Insular Affairs.

By Mr. SPENCE:

H.R. 7156. A bill to increase the land acquisition and authorized development ceilings for the Congaree Swamp National Monument; to the Committee on Interior and Insular Affairs.

By Mr. STARK:

H.R. 7157. A bill to provide a 2-year extension of the income tax deduction for expenditures to remove certain architectural and transportation barriers; to the Committee on Ways and Means.

By Mr. PEYSER:

H. Con. Res. 410. Concurrent resolution expressing the sense of the Congress with respect to a means test for the medicare program; jointly to the Committees on Ways and Means and Energy and Commerce.

[Introduced September 22, 1982]

By Mr. ROYBAL:

H.R. 7158. A bill making appropriations for the Treasury Department, the U.S. Postal Service, the Executive Office of the President, and certain independent agencies, for the fiscal year ending September 30, 1983, and for other purposes.

By Mr. CLAUSEN (for himself, Mr. HOWARD, Mr. ROE, and Mr. HAMMERSCHMIDT):

H.R. 7159. A bill to amend the Federal Water Pollution Control Act to allow modifications of certain effluent limitations relating to biochemical oxygen demand and pH; to the Committee on Public Works and Transportation.

By Mr. EDWARDS of California (for himself, Mr. ANDERSON, Mr. BEILENSON, Mr. BROWN of California, Mr. JOHN L. BURTON, Mr. COELHO, Mr. DELLUMS, Mr. DIXON, Mr. DYMALLY, Mr. FAZIO, Mr. HAWKINS, Mr. LANTOS, Mr. MARTINEZ, Mr. MATSUI, Mr. MILLER of California, Mr. MINETA, Mr. PANETTA, Mr. PATTERSON, Mr. ROYBAL, Mr. STARK, Mr. WAXMAN, and Mr. PHILLIP BURTON):

H.R. 7160. A bill to amend the Small Business Act to provide assistance to areas of economic dislocation in the United States that is the result of drastic fluctuation in the value of the currency in a country contiguous to the United States; to the Committee on Small Business.

By Mr. FRANK:

H.R. 7161. A bill to require States to match their public assistance rolls on a regular basis against all relevant State and Federal records, in order to verify the eligibility of recipients and otherwise eliminate or prevent fraud and abuse in the various federally assisted public assistance programs to which such rolls relate; to the Committee on Government Operations.

H.R. 7162. A bill to amend the Internal Revenue Code of 1954 to exempt amounts received from the redemption of all-savers certificates and contributed to individual retirement accounts from certain limitations on excess contributions, and for other purposes; to the Committee on Ways and Means.

By Mr. GRADISON:

H.R. 7163. A bill to amend the Internal Revenue Code of 1954 to extend until December 31, 1987, the energy investment tax credit for recycling property; to the Committee on Ways and Means.

By Mr. JONES of Oklahoma:

H.R. 7164. A bill to amend the Internal Revenue Code of 1954 to permit the Internal Revenue Service to waive the penalty imposed on underpayments of estimated tax where there was reasonable cause for the underpayment; to the Committee on Ways and Means.

By Mr. NELLIGAN:

H.R. 7165. A bill to direct the Secretary of Defense to submit a report to Congress on the use of U.S. agricultural products at U.S. military bases overseas; to the Committee on Armed Services.

By Mr. NICHOLS:

H.R. 7166. A bill to provide a 4-percent increase in the pay and allowances of members of the uniformed services, to make various adjustments in military personnel and compensation programs, and for other purposes; to the Committee on Armed Services.

By Mr. PEYSER:

H.R. 7167. A bill to amend the Immigration and Nationality Act to clarify the status of individuals who have been granted asylum; to the Committee on the Judiciary.

By Mr. WIRTH (for himself, Mr. BROYHILL, Mrs. COLLINS of Illinois, Mr. LENT, Mr. LONG of Maryland, Mr. MARKEY, Ms. MIKULSKI, Mr. MOORHEAD, Mr. PEPPER, Mr. RINALDO, Mr. SCHEUER, Mr. SWIFT, Mr. TAUKE, Mr. WAXMAN, Mr. WHITTAKER, and Mr. WYDEN):

H.R. 7168. A bill to amend the Communications Act of 1934 to provide reasonable access to telephone service for persons with impaired hearing and to enable telephone companies to accommodate persons with other physical disabilities; to the Committee on Energy and Commerce.

By Mr. YATRON:

H.R. 7169. A bill to amend the Tax Equity and Fiscal Responsibility Act of 1982 to repeal the provisions requiring withholding on dividends and interest; to the Committee on Ways and Means.

By Mr. FITHIAN (for himself and Mr. HAGEDORN):

H.J. Res. 603. Joint resolution directing the President to take every possible action to encourage increasing the processed product share of U.S. agricultural exports; jointly, to the Committees on Foreign Affairs and Ways and Means.

By Mr. FOUNTAIN:

H.J. Res. 604. Joint resolution designating the month of November 1982, as "National Diabetes Month"; to the Committee on Post Office and Civil Service.

By Mr. GONZALEZ (for himself and Mr. ST GERMAIN):

H.J. Res. 605. Joint resolution to provide for the temporary extension of certain insurance programs relating to housing and community development, and for other purposes; to the Committee on Banking, Finance and Urban Affairs.

By Mr. VANDER JAGT:

H.J. Res. 606. Joint resolution designating the week beginning February 13, 1983, as "National Reye's Syndrome Week"; to the Committee on Post Office and Civil Service.

By Mr. BADHAM:

H. Con. Res. 411. Concurrent resolution urging the President to declassify certain intelligence information in order to bring to the attention of the American people the extent of the military capabilities of the Soviet Union; jointly, to the Committees on Armed Services and the Permanent Select Committee on Intelligence.

By Mr. NELLIGAN:

H. Res. 600. Resolution urging the Secretary of Defense to develop policies to make maximum use of U.S. agricultural products at U.S. military installations overseas; to the Committee on Armed Services.

ADDITIONAL SPONSORS

Under clause 4 of rule XXII, sponsors were added to public bills and resolutions as follows:

H.R. 3796: Mr. FOGLIETTA.

H.R. 3984: Mr. MADIGAN and Mr. DAUB.

H.R. 4070: Mr. SOLARZ, Mr. ANDREWS, and Mr. DONNELLY.

H.R. 5088: Mr. YATES.

H.R. 5242: Mr. EVANS of Iowa, Mr. TAUZIN, Mr. STENHOLM, Mr. CRAIG, and Mr. MARTIN of New York.

H.R. 5752: Mr. RALPH M. HALL, Mr. BENEDICT, Mr. WALGREN, and Mr. FOLEY.

H.R. 5760: Mr. MINETA.

H.R. 6089: Mr. LANTOS.

H.R. 6135: Mr. BOWEN, Mr. HUCKABY, Mr. DORGAN of North Dakota, Mr. MADIGAN, Mr. LATTA, Mr. WHITEHURST, Mr. JONES of Tennessee, and Mr. SPENCE.

H.R. 6527: Mr. WIRTH, Mr. WEISS, Mr. LEHMAN, Mr. PRITCHARD, Mr. EDWARDS of Oklahoma, and Mr. LONG of Louisiana.

H.R. 6752: Mr. ROBERTS of Kansas and Mr. EVANS of Iowa.

H.R. 6865: Mr. PANETTA.

H.R. 6899: Mr. D'AMOURS, Mr. VENTO, and Mr. MITCHELL of Maryland.

H.R. 6930: Mr. WON PAT, Mr. AKAKA, Mr. PEPPER, Mr. CORRADA, Mr. WALGREN, Mr. DORNAN of California, Mr. FRANK, Mr. ROE, Mr. MITCHELL of Maryland, and Mrs. SCHNEIDER.

H.R. 7060: Mr. ROBERTS of South Dakota, Mr. BEARD, and Mr. WILLIAMS of Ohio.

H.R. 7106: Mr. WYDEN, Mr. PORTER, Mr. BROYHILL, Mr. ANTHONY, Mr. MADIGAN, Ms. MIKULSKI, and Mr. SMITH of Alabama.

H.R. 7108: Mr. LUNDINE, Mr. LOWRY of Washington, Mr. NEAL, Mr. HUGHES, and Mr. SPENCE.

H.J. Res. 172: Mr. FOLEY.

H.J. Res. 274: Mr. FRENZEL.

H.J. Res. 467: Mr. BEILENSON, Mr. BONKER, Mrs. COLLINS of Illinois, Mr. CONYERS, Mr. DANIEL B. CRANE, Mr. DOWNEY, Mr. EDGAR, Mr. ERDAHL, Mr. GOODLING, Mrs. HECKLER, Mr. HORTON, Mr. JACOBS, Mr. KEMP, Mr. LEACH of Iowa, Mrs. MARTIN of Illinois, Mr. MITCHELL of Maryland, Mr. RATCHFORD, Mr. SHAMANSKY, and Mr. STOKES.

H.J. Res. 478: Mr. ROEMER, Mr. SMITH of Alabama, Mr. SPENCE, Mr. LOWRY of Washington, Mr. LIVINGSTON, Mr. WHITE, Mr. SHELBY, Mr. BLILEY, and Mr. WHITEHURST.

H.J. Res. 564: Mr. BAILEY of Pennsylvania, Mr. WINN, Mr. COELHO, Mr. ANDERSON, Mr. DERWINSKI, Mr. DUNCAN, Mr. WILSON, Mr. FRANK, Mr. ROSE, Mr. JAMES K. COYNE, Mrs. HOLT, Mr. PANETTA, Mr. YATRON, Mrs. SNOWE, Mr. MILLER of California, Mr. SIMON, Mr. ANTHONY, Mr. BONER of Tennessee, Mr. BONIOR of Michigan, Mr. EVANS of Delaware, Mr. MINETA, Mr. MARTINEZ, Mr. BROWN of California, Mr. BURGENER, Mr. CHAPPELL, Mr. DYSON, Mrs. FENWICK, Mr. FITHIAN, Mr. HOLLENBECK, Mr. LENT, Ms. OAKAR, Mr. UDALL, Mr. WEISS, Mr. WHITEHURST, Mr. WOLPE, Mr. WON PAT, Mr. ATKINSON, Mr. RUSSO, Mr. CONTE, Mr. DORNAN of California, and Mr. DOUGHERTY.

H.J. Res. 585: Mr. DAUB, Mr. COURTER, Mr. GOLDWATER, and Mr. FORSYTHE.

H.J. Res. 586: Mr. AKAKA, Mr. ALEXANDER, Mr. ANDREWS, Mrs. ASHBROOK, Mr. ASPIN, Mr. BAFALIS, Mr. BAILEY of Pennsylvania, Mr. BARNES, Mr. BEARD, Mr. BIAGGI, Mr. BLANCHARD, Mrs. BOGGS, Mr. BONER of Tennessee, Mrs. BOUQUARD, Mr. BREAUX, Mr. BRODHEAD, Mr. BROOKS, Mr. BURGENER, Mr. JOHN L. BURTON, Mr. PHILLIP BURTON, Mrs. BYRON, Mr. CAMPBELL, Mr. CARNEY, Mr. CHAPPELL, Mr. CLAUSEN, Mr. CLINGER, Mr. COATS, Mr. COELHO, Mr. DANIEL B. CRANE, Mr. D'AMOURS, Mr. DAN DANIEL, Mr. DECKARD, Mr. DOWDY, Mr. DUNN, Mr. ENGLISH, Mr. FLORIO, Mr. FORD of Tennessee, Mr. FRENZEL, Mr. FROST, Mr. GEJDENSON, Mr. GORE, Mr. RALPH M. HALL, Mr. SAM B. HALL, JR., Mr. HAMILTON, Mr. HAMMERSCHMIDT, Mr. HANCE, Mr. HARTNETT, Mr. HEFTEL, Mr. HIGHTOWER, Mr. HOLLAND, Mr. HOYER, Mr. HUNTER, Mr. HUTTO, Mr. JACOBS, Mr. KASTENMEIER, Mr. KEMP, Mr. KOGOVSEK, Mr. LEBOUTILLIER, Mr. LENT, Mr. LEWIS, Mr. LOEFFLER, Mr. LONG of Louisiana, Mr. MCDADE, Mr. MCHUGH, Mr. MARTIN of New York, Mr. MARTIN of North Carolina, Mr. MAVROULES, Mr. MOAKLEY, Mr. MOORE, Mr. MOORHEAD, Mr. MURPHY, Mr. MURTHA, Mr. MYERS, Mr. NATCHER, Mr. NEAL, Mr. NELLIGAN, Mr. OXLEY, Mr. PERKINS, Mr. PETRI, Mr. PRICE, Mr. PRITCHARD, Mr. PURSELL, Mr. QUILLEN, Mr. RAILSBACK, Mr. REUSS, Mr. RHODES, Mr. ROBINSON, Mr. RODINO, Mr. ROTH, Mr. SAWYER, Mr. SHUMWAY, Mr. SIMON, Mr. SMITH of New Jersey, Mr. SMITH of Pennsylvania, Mr. SMITH of Iowa, Mrs. SMITH of Nebraska, Mrs. SNOWE, Mr. SNYDER, Mr. SOLOMON, Mr. SPENCE, Mr. STARK, Mr. SUNIA, Mr. SYNAR, Mr. TAYLOR, Mr. TRIBLE, Mr. WALKER, Mr. WEBER of Ohio, Mr. WEBER of Minnesota, Mr. WHITE, Mr. WHITLEY, Mr. WHITTAKER, Mr. WHITTEN, Mr. WILLIAMS of Ohio, Mr. WON PAT, Mr. WRIGHT, and Mr. ZABLOCKI.

H. Con. Res. 275: Mr. SMITH of Alabama.

H. Con. Res. 410: Mr. MOFFETT, Mr. WYDEN, Mr. MOTTL, Mr. FRANK, Mr. SANTINI, Mrs. KENNELLY, Mr. VOLKMER, Mr. ZEFERETTI, Mr. RODINO, Mr. ROSENTHAL, Mrs. CHISHOLM, Ms. MIKULSKI, Mr. WILLIAM J. COYNE, Mr. YATES, Mr. WEISS, Mr. FOGLIETTA, Mr. FORD of Michigan, Mr. APPLEGATE, Mr. OTTINGER, and Mr. BIAGGI.

H. Res. 513: Mrs. HECKLER.

H. Res. 526: Mr. BEREUTER, Mr. DASCHLE, and Mr. DAUB.

H. Res. 544: Mr. WHITTAKER.

H. Res. 558: Mr. TAUKE, Mr. MCKINNEY, Mr. DE LUGO, Mr. BENEDICT, and Mr. DONNELLY.

DELETIONS OF SPONSORS FROM PUBLIC BILLS AND RESOLUTIONS

Under clause 4 of rule XXII, sponsors were deleted from public bills and resolutions as follows:

H.R. 3722: Mr. ECKART.

H.J. Res. 533: Mr. ANDREWS.

PETITIONS, ETC.

Under clause 1 of rule XXII, petitions and papers were laid on the Clerk's desk and referred as follows:

602. By the SPEAKER: Petition of the City Council, Schenectady, N.Y., relative to the senior aide program; to the Committee on Education and Labor.

603. Also, petition of the Southern Governors' Association, Atlanta, Ga., relative to high-level nuclear waste management; jointly, to the Committees on Energy and Commerce, Interior and Insular Affairs, and Science and Technology.

604. Also, petition of the Southern Governors' Association, Atlanta, Ga., relative to domestic oil and gas production incentives; jointly, to the Committees on Energy and Commerce and Ways and Means.

605. Also, petition of the Southern Governors' Association, Atlanta, Ga., relative to Outer Continental Shelf revenue sharing; jointly, to the Committees on Merchant Marine and Fisheries and Interior and Insular Affairs.

606. Also, petition of the Southern Governors' Association, Atlanta, Ga., relative to Federal preemption of State revenue sources; to the Committee on Ways and Means.

607. Also, petition of the Southern Governors' Association, Atlanta, Ga., relative to acid rain; to the Committee on Energy and Commerce.

608. Also, petition of the Southern Governors' Association, Atlanta, Ga., relative to ports and inland waterways; jointly; to the Committees on Public Works and Transportation and Merchant Marine and Fisheries.

609. Also, petition of the Southern Governors' Association, Atlanta, Ga., relative to textile imports; to the Committee on Ways and Means.

610. Also, petition of the Southern Governors' Association, Atlanta, Ga., relative to export trading companies; jointly; to the Committees on Banking, Finance and Urban Affairs, the Judiciary, and Foreign Affairs.

611. Also, petition of the Southern Governors' Association, Atlanta, Ga., relative to highway safety—drunk driving; to the Committee on Public Works and Transportation.

612. Also, petition of the Southern Governors' Association, Atlanta, Ga., relative to community crime prevention; to the Committee on the Judiciary.

613. Also, petition of the Southern Governors' Association, Atlanta, Ga., relative to insanity defense; to the Committee on the Judiciary.

614. Also, petition of the Southern Governors' Association, Atlanta, Ga., relative to Federal role in violent crime control; to the Committee on the Judiciary.

615. Also, petition of the Southern Governors' Association, Atlanta, Ga., relative to teacher certification and reciprocity; to the Committee on Education and Labor.

616. Also, petition of the Southern Governors' Association, Atlanta, Ga., relative to state management of jobs training programs; to the Committee on Education and Labor.

617. Also, petition of the Southern Governors' Association, Atlanta, Ga., relative to employment security system; to the Committee on Ways and Means.

618. Also, petition of the Southern Governors' Association, Atlanta, Ga., relative to clarification of social security disability benefit review process; to the Committee on Ways and Means.

619. Also, petition of the Southern Governors' Association, Atlanta, Ga., relative to state pesticide registration; to the Committee on Agriculture.

620. Also, petition of the Southern Governors' Association, Atlanta, Ga., relative to commending passage of the extension of the Voting Rights Act; to the Committee on the Judiciary.

621. Also, petition of the Southern Governors' Association, Atlanta, Ga., relative to the 1992 World's Fair; to the Committee on Foreign Affairs.

AMENDMENTS

Under clause 6 of rule XXIII, proposed amendments were submitted as follows:

H.R. 3432

By Mr. HANCE:

(To the amendment in the nature of a substitute.)

—In section 304(a), strike out the period at the end thereof and insert in lieu thereof the following: ", unless the Governor of each State involved in the proposed transfer of water agrees that such plan is necessary."

H.R. 3809

By Mr. LOTT:

(An amendment to H.R. 3809 or any amendment in the nature of a substitute made in order in lieu thereof, or, any amendments thereto.)

—Strike section 112 in its entirety and insert in lieu thereof the following:

RECOMMENDATION OF CANDIDATE SITES FOR SITE CHARACTERIZATION

SEC. 112. (a) GUIDELINES.—Not later than 180 days after the date of the enactment of this Act, the Secretary, following consultation with the Council on Environmental Quality, the Administrator of the Environmental Protection Agency, the Commission, the Director of the Geological Survey, and interested Governors, shall issue general guidelines for the recommendation of sites for repositories. Such guidelines shall specify detailed geologic considerations that shall be primary criteria for the selection of sites in various geologic media. Such guidelines shall specify factors that qualify or disqualify any site from development as a repository, including factors pertaining to the location of valuable natural resources, hydrogeophysics, seismic activity, and atomic energy defense activities, proximity to populations, the effect upon the rights of users of water, and proximity to components of the National Park System, the National Wildlife Refuge System, the National Wild and Scenic Rivers System, the National Wilderness Preservation System, of National Forest Lands. Such guidelines shall specify population factors that will disqualify any site from development as a repository if any such site would be located (1) in a highly populated area; or (2) adjacent to an area 1 mile by 1 mile having a population of not less than 1,000 individuals. Such guidelines shall require the Secretary to consider the various geologic media in which sites for repositories may be located and, to the extent practicable, to recent sites in different geologic media. The Secretary shall use guidelines established under this subsection in considering candidate sites for recommendation under subsection (b). The Secretary may revise such guidelines from time to time, consistent with the provisions of this subsection.

(b) RECOMMENDATION BY SECRETARY TO THE PRESIDENT.—(1)(A) Following the issuance of guidelines under subsection (a) and consultation with the Governors of affected States, the Secretary shall recommend to the President at least 5 candidate sites in not less than 2 different geologic media that he determines suitable for site characterization for selection of the first repository site. Such sites shall be recommended by the Secretary not later than July 1, 1984. Not later than February 1, 1985, the Secretary shall recommend to the President at least 1 additional candidate site the Secretary determines is suitable for site characterization, at least 1 of which shall be a site that has not been recommended previously under this subsection. At least 1 of such additional sites shall be in a geologic medium other than the geologic medium of any site previously recommended under this subsection. Each recommendation of a candidate site under this subsection shall be accompanied by an environmental assessment, which shall include a detailed statement of the basis for such recommendation and of the probable impacts of the site characterization activities planned for such candidate site, and a discussion of alternative activities relating to site characterization that may be undertaken to avoid such impacts. Such environmental assessment shall include—

(i) an evaluation by the Secretary as to whether such candidate site is suitable for site characterization under the guidelines established under subsection (a);

(ii) an evaluation by the Secretary as to whether such candidate site is suitable for development as a repository under each such guideline that does not require site characterization as a prerequisite for application of such guideline;

(iii) an evaluation by the Secretary of the effects of the site characterization activities at such candidate site on the public health and safety and the environment;

(iv) a reasonable comparative evaluation by the Secretary of such candidate site with other sites and locations that have been considered;

(v) a description of the decision process by which such candidate site was recommended; and

(vi) an assessment of the regional and local impacts of locating the proposed repository at such candidate site.

(B)(i) The issuance of any environmental assessment under this paragraph shall be considered to be a final agency action subject to judicial review in accordance with the provisions of chapter 7 of title 5, United States Code, and section 119. Such judicial review shall be limited to the sufficiency of such environmental assessment with respect to the items described in clauses (i) through (vi) of subparagraph (A).

(ii) Each environmental assessment prepared under this paragraph shall be made available to the public.

(C) Upon recommending a candidate site to the President, the Secretary shall notify the Governor and legislature of the State in which such candidate site is located, or the governing body of the Indian tribe on whose reservation such candidate site is located, as the case may be, of such recommendation and the basis for such recommendation.

(2) Before recommending to the President any candidate site for site characterization, the Secretary shall hold public hearings in the vicinity of such candidate site to inform the residents of the area in which such candidate site is located of the proposed recommendation of such candidate site and to receive their comments. At such hearings, the Secretary shall also solicit and receive any recommendations of such residents with respect to issues that should be addressed in the environmental assessment described in paragraph (1) and the site characterization plan described in section 113(b)(1).

(c) PRESIDENTIAL REVIEW OF RECOMMENDED CANDIDATE SITES.—(1) The President shall review each candidate site recommendation made by the Secretary under subsection (b). Not later than 60 days after the submission by the Secretary of a recommendation of a candidate site, the President, in his discretion, may either approve or disapprove such candidate site, and shall transmit any such decision to the Secretary and to either the Governor and legislature of the State in which such candidate site is located, or the governing body of the Indian tribe on whose reservation such candidate site is located, as the case may be. If, during such 60-day period, the President fails to approve or disapprove such candidate site, or fails to invoke his authority under paragraph (2) to delay his decision, such candidate site shall be considered to be approved, and the Secretary shall notify such Governor and legislature, or governing body of the Indian tribe, of the approval of such candidate site by reason of the inaction of the President.

(2) The President may delay for not more than 6 months his decision under paragraph (1) to approve or disapprove a candidate site, upon determining that the information provided with the recommendation of the Secretary is insufficient to permit a decision within the 60-day period referred to in paragraph (1). The President may invoke his authority under this paragraph by submitting written notice to the Congress, within such 60-day period, of his intent to invoke such authority. If the President invokes such authority, but fails to approve or disapprove the candidate site involved by the end of such 6-month period, such candidate site shall be considered to be approved, and the Secretary shall notify such Governor and legislature, or governing body of the Indian tribe, of the approval of such candidate site by reason of the inaction of the President.

(d) CONTINUATION OF CANDIDATE SITE SCREENING.—After the required recommendation of candidate sites under subsection (b), the Secretary may continue, as he determines necessary, to identify and study other sites to determine their suitability for recommendation for site characterization, in accordance with the procedures described in this section.

(e) PRELIMINARY ACTIVITIES.—Except as otherwise provided in this subsection, each activity of the President or the Secretary under this section shall be considered to be a preliminary decisionmaking activity. No such activity shall be considered to be a major Federal action under section 102(2)(C) of the National Environmental Policy Act of 1969 (42 U.S.C. 4332(2)(C)), or to require any environmental review under subparagraph (E) or (F) of section 102(2) of such Act.

(f) TIMELY SITE CHARACTERIZATION.—Nothing in this section may be construed as prohibiting the Secretary from continuing ongoing or presently planned site characterization at any site on Department of Energy land for which the location of the principal borehole has been approved by the Secretary by August 1, 1982, except that (1) the environmental assessment described in subsection (b)(1) shall be prepared and made available to the public before proceeding to sink shafts at any such site; and (2) the Secretary shall not continue site characterization at any such site unless such site is among the candidate sites recommended by the Secretary under the first sentence of subsection (b) for site characterization and approved by the President under subsection (c). If site characterization is discontinued at any site under the second clause of the first sentence of this subsection, site characterization at such site may be continued by the Secretary if such site is subsequently approved by the President under subsection (c).

(An amendment to H.R. 3809 or any amendment in the nature of a substitute made in order in lieu thereof, or any amendments thereto.)

—Strike section 112 in its entirety and insert in lieu thereof the following:

RECOMMENDATION OF CANDIDATE SITES FOR SITE CHARACTERIZATION

SEC. 112. (a) GUIDELINES.—Not later than 180 days after the date of the enactment of this Act, the Secretary, following consultation with the Council on Environmental Quality, the Administrator of the Environmental Protection Agency, the Commission, the Director of the Geological Survey, and interested Governors, shall issue general guidelines for the recommendation of sites for repositories. Such guidelines shall specify detailed geologic considerations that shall be primary criteria for the selection of sites in various geologic media. Such guidelines shall specify factors that qualify or disqualify any site from development as a repository, including factors pertaining to the location of valuable natural resources, hydrogeophysics, seismic activity, and atomic energy defense activities, proximity to populations, the effect upon the rights of users of water, and proximity to components of the National Park System, the National Wildlife Refuge System, the National Wild and Scenic Rivers System, the National Wilderness Preservation System, or National Forest Lands. Such guidelines shall provide that any site shall be disqualified from development as a repository if such site is, according to the most recent applicable report on population and population density prepared by the Bureau of the Census before the date such site is considered for site characterization or construction authorization, as the case may be, located in any metropolitan statistical area, county, or urbanized area, having (1) both a population density of not less than 1,000 individuals per square mile and a population of not less than 2,500 individuals; or (2) a population within 1 mile of such site of not less than 1,000 individuals. Such guidelines shall require the Secretary to consider the various geologic media in which sites for repositories may be located and, to the extent practicable, to recent sites in different geologic media. The Secretary shall use guidelines established under this subsection in considering candidate sites for recommendation under subsection (b). The Secretary may revise such guidelines from time to time, consistent with the provisions of this subsection.

(b) RECOMMENDATION BY SECRETARY TO THE PRESIDENT.—(1)(A) Following the issuance of guidelines under subsection (a) and consultation with the Governors of affected States, the Secretary shall recommend to the President at least 5 candidate sites in not less than 2 different geologic media that he determines suitable for site characterization for selection of the first repository site. Such sites shall be recommended by the Secretary not later than July 1, 1984. Not later than February 1, 1985, the Secretary shall recommend to the President at least 1 additional candidate site the Secretary determines is suitable for site characterization, at least 1 of which shall be a site that has not been recommended previously under this subsection. At least 1 of such additional sites shall be in a geologic medium other than the geologic medium of any site previously recommended under this subsection. Each recommendation of a candidate site under this subsection shall be accompanied by an environmental assessment, which shall include a detailed statement of the basis for such recommendation and of the probable impacts of the site characterization activities planned for such candidate site, and a discussion of alternative activities relating to site characterization that may be undertaken to avoid such impacts. Such environmental assessment shall include—

(i) an evaluation by the Secretary as to whether such candidate site is suitable for site characterization under the guidelines established under subsection (a);

(ii) an evaluation by the Secretary as to whether such candidate site is suitable for development as a repository under each such guideline that does not require site characterization as a prerequisite for application of such guideline;

(iii) an evaluation by the Secretary of the effects of the site characterization activities at such candidate site on the public health and safety and the environment;

(iv) a reasonable comparative evaluation by the Secretary of such candidate site with other sites and locations that have been considered;

(v) a description of the decision process by which such candidate site was recommended; and

(vi) an assessment of the regional and local impacts of locating the proposed repository at such candidate site.

(B)(i) The issuance of any environmental assessment under this paragraph shall be considered to be a final agency action subject to judicial review in accordance with the provisions of chapter 7 of title 5, United States Code, and section 119. Such judicial review shall be limited to the sufficiency of such environmental assessment with respect to the items described in clauses (i) through (vi) of subparagraph (A).

(ii) Each environmental assessment prepared under this paragraph shall be made available to the public.

(C) Upon recommending a candidate site to the President, the Secretary shall notify the Governor and legislature of the State in which such candidate site is located, or the governing body of the Indian tribe on whose reservation such candidate site is located, as the case may be, of such recommendation and the basis for such recommendation.

(2) Before recommending to the President any candidate site for site characterization, the Secretary shall hold public hearings in the vicinity of such candidate site to inform the residents of the area in which such candidate site is located of the proposed recommendation of such candidate site and to receive their comments. At such hearings, the Secretary shall also solicit and receive any recommendations of such residents with respect to issues that should be addressed in the environmental assessment described in paragraph (1) and the site characterization plan described in section 113(b)(1).

(c) PRESIDENTIAL REVIEW OF RECOMMENDED CANDIDATE SITES.—(1) The President shall review each candidate site recommendation made by the Secretary under subsection (b). Not later than 60 days after the submission by the Secretary of a recommendation of a candidate site, the President, in his discretion, may either approve or disapprove such candidate site, and shall transmit any such decision to the Secretary and to either the Governor and legislature of the State in which such candidate site is located, or the governing body of the Indian tribe on whose reservation such candidate site is located, as the case may be. If, during such 60-day period, the President fails to approve or disapprove such candidate site, or fails to invoke his authority under paragraph (2) to delay his decision, such candidate site shall be considered to be approved, and the Secretary shall notify such Governor and legislature, or governing body of the Indian tribe, of the approval of such candidate site by reason of the inaction of the President.

(2) The President may delay for not more than 6 months his decision under paragraph (1) to approve or disapprove a candidate site, upon determining that the information provided with the recommendation of the Secretary is insufficient to permit a decision within the 60-day period referred to in paragraph (1). The President may invoke his authority under this paragraph by submitting written notice to the Congress, within such 60-day period, of his intent to invoke such authority. If the President invokes such authority, but fails to approve or disapprove the candidate site involved by the end of such 6-month period, such candidate site shall be considered to be approved, and the Secretary shall notify such Governor and legislature, or governing body of the Indian tribe, of the approval of such candidate site by reason of the inaction of the President.

(d) CONTINUATION OF CANDIDATE SITE SCREENING.—After the required recommendation of candidate sites under subsection (b), the Secretary may continue, as he determines necessary, to identify and study other sites to determine their suitability for recommendation for site characterization, in accordance with the procedures described in this section.

(e) PRELIMINARY ACTIVITIES.—Except as otherwise provided in this subsection, each activity of the President or the Secretary under this section shall be considered to be a preliminary decisionmaking activity. No such activity shall be considered to be a major Federal action under section 102(2)(C) of the National Environmental Policy Act of 1969 (42 U.S.C. 4332(2)(C)), or to require any environmental review under subparagraph (E) or (F) of section 102(2) of such Act.

(f) TIMELY SITE CHARACTERIZATION.—Nothing in this section may be construed as prohibiting the Secretary from continuing ongoing or presently planned site characterization at any site on Department of Energy land for which the location of the principal borehole has been approved by the Secretary by August 1, 1982, except that (1) the environmental assessment described in subsection (b)(1) shall be prepared and made available to the public before proceeding to sink shafts at any such site; and (2) the Secretary shall not continue site characterization at any such site unless such site is among the candidate sites recommended by the Secretary under the first sentence of subsection (b) for site characterization and approved by the President under subsection (c). If site characterization is discontinued at any site under the second clause of the first sentence of this subsection, site characterization at such site may be continued by the Secretary if such site is subsequently approved by the President under subsection (c).

An amendment to H.R. 3809 or any amendment in the nature of a substitute made in order in lieu thereof, or any amendments thereto.

—Strike section 112 in its entirety and insert in lieu thereof the following:

RECOMMENDATION OF CANDIDATE SITES FOR SITE CHARACTERIZATION

SEC. 112. (a) GUIDELINES.—Not later than 180 days after the date of the enactment of this Act, the Secretary, following consultation with the Council on Environmental Quality, the Administrator of the Environmental Protection Agency, the Commission, the Director of the Geological Survey, and interested Governors, shall issue general guidelines for the recommendation of sites

for repositories. Such guidelines shall specify detailed geologic considerations that shall be primary criteria for the selection of sites in various geologic media. Such guidelines shall specify factors that qualify or disqualify any site from development as a repository, including factors pertaining to the location of valuable natural resources, hydrogeophysics, seismic activity, and atomic energy defense activities, proximity to populations, the effect upon the nights of users of water, and proximity to components of the National Park System, the National Wildlife Refuge System, the National Wild and Scenic Rivers System, the National Wilderness Preservation System or National Forest Lands. Such guidelines shall provide that in the event that two or more potential sites are located within the same county on the date of enactment of this act, the Secretary shall select only that site within the county which is located in the area of lesser population density. Such guidelines shall require the Secretary to consider the various geologic media in which sites for repositories may be located and, to the extent practicable, to recent sites in different geologic media. The Secretary shall use guidelines established under this subsection in considering candidate sites for recommendation under subsection (b). The Secretary may revise such guidelines from time to time, consistent with the provisions of this subsection.

(b) RECOMMENDATION BY SECRETARY TO THE PRESIDENT.—(1)(A) Following the issuance of guidelines under subsection (a) and consultation with the Governors of affected States, the Secretary shall recommend to the President at least 5 candidate sites in not less than 2 different geologic media that he determines suitable for site characterization for selection of the first repository site. Such sites shall be recommended by the Secretary not later than July 1, 1984. Not later than February 1, 1985, the Secretary shall recommend to the President at least 1 additional candidate site the Secretary determines is suitable for site characterization, at least 1 of which shall be a site that has not been recommended previously under this subsection. At least 1 of such additional sites shall be in a geologic medium other than the geologic medium of any site previously recommended under this subsection. Each recommendation of a candidate site under this subsection shall be accompanied by an environmental assessment, which shall include a detailed statement of the basis for such recommendation and of the probable impacts of the site characterization activities planned for such candidate site, and a discussion of alternative activities relating to site characterization that may be undertaken to avoid such impacts. Such environmental assessment shall include—

(i) an evaluation by the Secretary as to whether such candidate site is suitable for site characterization under the guidelines established under subsection (a);

(ii) an evaluation by the Secretary as to whether such candidate site is suitable for development as a repository under each such guideline that does not require site characterization as a prerequisite for application of such guideline;

(iii) an evaluation by the Secretary of the effects of the site characterization activities at such candidate site on the public health and safety and the environment;

(iv) a reasonable comparative evaluation by the Secretary of such candidate site with other sites and locations that have been considered;

(v) a description of the decision process by which such candidate site was recommended; and

(vi) an assessment of the regional and local impacts of locating the proposed repository at such candidate site.

(B)(i) The issuance of any environmental assessment under this paragraph shall be considered to be a final agency action subject to judicial review in accordance with the provisions of chapter 7 of title 5, United States Code, and section 119. Such judicial review shall be limited to the sufficiency of such environmental assessment with respect to the items described in clauses (i) through (vi) of subparagraph (A).

(ii) Each environmental assessment prepared under this paragraph shall be made available to the public.

(C) Upon recommending a candidate site to the President, the Secretary shall notify the Governor and legislature of the State in which such candidate site is located, or the governing body of the Indian tribe on whose reservation such candidate site is located, as the case may be, of such recommendation and the basis for such recommendation.

(2) Before recommending to the President any candidate site for site characterization, the Secretary shall hold public hearings in the vicinity of such candidate site to inform the residents of the area in which such candidate site is located of the proposed recommendation of such candidate site and to receive their comments. At such hearings, the Secretary shall also solicit and receive any recommendations of such residents with respect to issues that should be addressed in the environmental assessment described in paragraph (1) and the site characterization plan described in section 113(b)(1).

(c) PRESIDENTIAL REVIEW OF RECOMMENDED CANDIDATE SITES.—(1) The President shall review each candidate site recommendation made by the Secretary under subsection (b). Not later than 60 days after the submission by the Secretary of a recommendation of a candidate site, the President, in his discretion, may either approve or disapprove such candidate site, and shall transmit any such decision to the Secretary and to either the Governor and legislature of the State in which such candidate site is located, or the governing body of the Indian tribe on whose reservation such candidate site is located, as the case may be. If, during such 60-day period, the President fails to approve or disapprove such candidate site, or fails to invoke his authority under paragraph (2) to delay his decision, such candidate site shall be considered to be approved, and the Secretary shall notify such Governor and legislature, or governing body of the Indian tribe, of the approval of such candidate site by reason of the inaction of the President.

(2) The President may delay for not more than 6 months his decision under paragraph (1) to approve or disapprove a candidate site, upon determining that the information provided with the recommendation of the Secretary is insufficient to permit a decision within the 60-day period referred to in paragraph (1). The President may invoke his authority under this paragraph by submitting written notice to the Congress, within such 60-day period, of his intent to invoke such authority. If the President invokes such authority, but fails to approve or disapprove the candidate site involved by the end of such 6-month period, such candidate site shall be considered to be approved, and the Secretary shall notify such Governor and legislature, or governing body of the Indian tribe, of the approval of such candidate site by reason of the inaction of the President.

(d) CONTINUATION OF CANDIDATE SITE SCREENING.—After the required recommendation of candidate sites under subsection (b), the Secretary may continue, as he determines necessary, to identify and study other sites to determine their suitability for recommendation for site characterization, in accordance with the procedures described in this section.

(e) PRELIMINARY ACTIVITIES.—Except as otherwise provided in this subsection, each activity of the President or the Secretary under this section shall be considered to be a preliminary decisionmaking activity. No such activity shall be considered to be a major Federal action under section 102(2)(C) of the National Environmental Policy Act of 1969 (42 U.S.C. 4332(2)(C)), or to require any environmental review under subparagraph (E) or (F) of section 102(2) of such Act.

(f) TIMELY SITE CHARACTERIZATION.—Nothing in this section may be construed as prohibiting the Secretary from continuing ongoing or presently planned site characterization at any site on Department of Energy land for which the location of the principal borehole has been approved by the Secretary by August 1, 1982, except that (1) the environmental assessment described in subsection (b)(1) shall be prepared and made available to the public before proceeding to sink shafts at any such site; and (2) the Secretary shall not continue site characterization at any such site unless such site is among the candidate sites recommended by the Secretary under the first sentence of subsection (b) for site characterization and approved by the President under subsection (c). If site characterization is discontinued at any site under the second clause of the first sentence of this subsection, site characterization at such site may be continued by the Secretary if such site is subsequently approved by the President under subsection (c).

An amendment to H.R. 3809 or any amendment in the nature of a substitute made in order in lieu thereof, or any amendments thereto.

—Strike section 112 in its entirety and insert in lieu thereof the following:

RECOMMENDATION OF CANDIDATE SITES FOR SITE CHARACTERIZATION

SEC. 112. (a) GUIDELINES.—Not later than 180 days after the date of the enactment of this Act, the Secretary, following consultation with the Council on Environmental Quality, the Administrator of the Environmental Protection Agency, the Commission, the Director of the Geological Survey, and interested Governors, shall issue general guidelines for the recommendation of sites for repositories. Such guidelines shall specify detailed geologic considerations that shall be primary criteria for the selection of sites in various geologic media. Such guidelines shall specify factors that qualify or disqualify any site from development as a repository, including factors pertaining to the location of valuable natural resources, hydrogeophysics, seismic activity, and atomic energy defense activities, proximity to populations, the effect upon the rights of users of water, and proximity to components of the National Park System, the National Wildlife Refuge System, the National Wild and Scenic Rivers System, the National Wilderness Preservation System, or National Forest Lands. Such guidelines shall provide that any site shall be disqualified from development as a repository if the proposed location of the repository site in such

site is, according to the most recent applicable data collected by the Bureau of the Census before the date such site is considered for site characterization located in, or within 3 miles of, any standard metropolitan statistical area, county, urbanized area, or place, as delineated by the Bureau of the Census, having both a population of not less than 1,000 individuals and a population density of not less than 1,000 individuals per square mile. Such guidelines shall require the Secretary to consider the various geologic media in which sites for repositories may be located and, to the extent practicable, to recent sites in different geologic media. The Secretary shall use guidelines established under this subsection in considering candidate sites for recommendation under subsection (b). The Secretary may revise such guidelines from time to time, consistent with the provisions of this subsection.

(b) RECOMMENDATION BY SECRETARY TO THE PRESIDENT.—(1)(A) Following the issuance of guidelines under subsection (a) and consultation with the Governors of affected States, the Secretary shall recommend to the President at least 5 candidate sites in not less than 2 different geologic media that he determines suitable for site characterization for selection of the first repository site. Such sites shall be recommended by the Secretary not later than July 1, 1984. Not later than February 1, 1985, the Secretary shall recommend to the President at least 1 additional candidate site the Secretary determines is suitable for site characterization, at least 1 of which shall be a site that has not been recommended previously under this subsection. At least 1 of such additional sites shall be in a geologic medium other than the geologic medium of any site previously recommended under this subsection. Each recommendation of a candidate site under this subsection shall be accompanied by an environmental assessment, which shall include a detailed statement of the basis for such recommendation and of the probable impacts of the site characterization activities planned for such candidate site, and a discussion of alternative activities relating to site characterization that may be undertaken to avoid such impacts. Such environmental assessment shall include—

(i) an evaluation by the Secretary as to whether such candidate site is suitable for site characterization under the guidelines established under subsection (a);

(ii) an evaluation by the Secretary as to whether such candidate site is suitable for development as a repository under each such guideline that does not require site characterization as a prerequisite for application of such guideline;

(iii) an evaluation by the Secretary of the effects of the site characterization activities at such candidate site on the public health and safety and the environment;

(iv) a reasonable comparative evaluation by the Secretary of such candidate site with other sites and locations that have been considered;

(v) a description of the decision process by which such candidate site was recommended; and

(vi) an assessment of the regional and local impacts of locating the proposed repository at such candidate site.

(B)(i) The issuance of any environmental assessment under this paragraph shall be considered to be a final agency action subject to judicial review in accordance with the provisions of chapter 7 of title 5, United States Code, and section 119. Such judicial review shall be limited to the sufficiency of such environmental assessment with respect to the items described in clauses (i) through (vi) of subparagraph (A).

(ii) Each environmental assessment prepared under this paragraph shall be made available to the public.

(C) Upon recommending a candidate site to the President, the Secretary shall notify the Governor and legislature of the State in which such candidate site is located, or the governing body of the Indian tribe on whose reservation such candidate site is located, as the case may be, of such recommendation and the basis for such recommendation.

(2) Before recommending to the President any candidate site for site characterization, the Secretary shall hold public hearings in the vicinity of such candidate site to inform the residents of the area in which such candidate site is located of the proposed recommendation of such candidate site and to receive their comments. At such hearings, the Secretary shall also solicit and receive any recommendations of such residents with respect to issues that should be addressed in the environmental assessment described in paragraph (1) and the site characterization Plan described in section 113(b)(1).

(c) PRESIDENTIAL REVIEW OF RECOMMENDED CANDIDATE SITES.—(1) The President shall review each candidate site recommendation made by the Secretary under subsection (b). Not later than 60 days after the submission by the Secretary of a recommendation of a candidate site, the President, in his discretion, may either approve or disapprove such candidate site, and shall transmit any such decision to the Secretary and to either the Governor and legislature of the State in which such candidate site is located, or the governing body of the Indian tribe on whose reservation such candidate site is located, as the case may be. If, during such 60-day period, the President fails to approve or disapprove such candidate site, or fails to invoke his authority under paragraph (2) to delay his decision, such candidate site shall be considered to be approved, and the Secretary shall notify such Governor and legislature, or governing body of the Indian tribe, of the approval of such candidate site by reason of the inaction of the President.

(2) The President may delay for not more than 6 months his decision under paragraph (1) to approve or disapprove a candidate site, upon determining that the information provided with the recommendation of the Secretary is insufficient to permit a decision within the 60-day period referred to in paragraph (1). The President may invoke his authority under this paragraph by submitting written notice to the Congress, within such 60-day period, of his intent to invoke such authority. If the President invokes such authority, but fails to approve or disapprove the candidate site involved by the end of such 6-month period, such candidate site shall be considered to be approved, and the Secretary shall notify such Governor and legislature, or governing body of the Indian tribe, of the approval of such candidate site by reason of the inaction of the President.

(d) CONTINUATION OF CANDIDATE SITE SCREENING.—After the required recommendation of candidate sites under subsection (b), the Secretary may continue, as he determines necessary, to identify and study other sites to determine their suitability for recommendation for site characterization, in accordance with the procedures described in this section.

(e) PRELIMINARY ACTIVITIES.—Except as otherwise provided in this subsection, each activity of the President or the Secretary under this section shall be considered to be a preliminary decisionmaking activity. No such activity shall be considered to be a major federal action under section 102(2)(C) of the National Environmental Policy Act of 1969 (42 U.S.C. 4332(2)(C)), or to require any environmental review under subparagraph (E) or (F) of section 102(2) of such Act.

(f) TIMELY SITE CHARACTERIZATION.—Nothing in this section may be construed as prohibiting the Secretary from continuing ongoing or presently planned site characterization at any site on Department or Energy land for which the location of the principal borehole has been approved by the Secretary by August 1, 1982, except that (1) the environmental assessment described in subsection (b)(1) shall be prepared and made available to the public before proceeding to sink shafts at any such site; and (2) the Secretary shall not continue site characterization at any such site unless such site is among the candidate sites recommended by the Secretary under the first sentence of subsection (b) for site characterization and approved by the President under subsection (c). If site characterization is discontinued at any site under the second clause of the first sentence of this subsection, site characterization at such site may be continued by the Secretary if such site is subsequently approved by the President under subsection (c).

(Amendment to the amendment in the nature of a substitute offered by Mr. UDALL to H.R. 3809 or any amendment in the nature of a substitute made in order in lieu thereof.)

—Delete section 112(a) relating to guidelines and population restrictions wherever it appears in the amendment in the nature of a substitute, and insert in lieu thereof:

RECOMMENDATION OF CANDIDATE SITES FOR SITE CHARACTERIZATION

SEC. 112. (a) GUIDELINES.—Not later than 180 days after the date of enactment of this Act, the Secretary, following consultation with the Council on Environmental Quality, the Administrator of the Environmental Protection Agency, the Commission, the Director of the Geological Survey, and interested Governors, shall issue general guidelines for the recommendation of sites for repositories. Such guidelines shall specify detailed geologic considerations that shall be primary criteria for the selection of sites in various geologic media. Such guidelines shall specify factors that qualify or disqualify any site from development as a repository, including factors pertaining to the location of valuable natural resources, hydrogeophysics, seismic activity, and atomic energy defense activities, proximity to water supplies, proximity to populations, the effect upon the rights of users of water, and proximity to components of the National Park System, the National Wildlife Refuge System, the National Wild and Scenic Rivers System, the National Wilderness Preservation System, or National Forest Lands. Such guidelines shall provide that any site shall be disqualified from development as a repository if such site is, according to the most recent applicable report on population and population density prepared by the Bureau of the Census before the date such site is considered for site characterization or construction authorization, as the case may be, located in any metropolitan statistical area, county, or urbanized area, having a population within 1 mile of such

such site of not less than 1,000 individuals. Such guidelines shall require the Secretary to consider the various geologic media in which sites for repositories may be located and, to the extent practicable, to recommend sites in different geologic media. The Secretary shall use guildelines established under this subsection in considering candidate sites for recommendation under subsection (b). The Secretary may revise such guidelines from time to time, consistent with the provisions of this subsection.

H.R. 5447

By Mr. SMITH of Iowa:

—On page 40, between lines 13 and 14, insert the following:

Section 8 of the Commodity Exchange Act is amended by inserting a new section, section 8d, as follows:

"SEC. 8d(1). As used in this subsection 'insider' means any individual who has access to information, not generally available to the public, about present or anticipated cash or futures trading or present or anticipated cash or futures positions in any commodity of any person, where such trading or positions are in amounts at or above Commission designated reporting levels as specified pursuant to section 4i of this Act.

"(2) No insider shall own, control, have a beneficial interest in, or enter into any contract or contract for future delivery in any such commodity on any contract market."

—On page 36, between lines 3 and 4, insert the following:

The Commodity Exchange Act, as amended, is further amended by—

(1) inserting in section 5 after "to designate any board of trade" the following: "except as specified in section 5(h) of this Act";

(2) inserting in section 5 a new subsection (h) as follows:

"(h) Beginning with contracts which expire during or after February 1984, designation shall be hereby deemed withdrawn for all contract markets for cattle or beef parts or beef products until or unless designated as hereafter provided in this section. No board of trade shall be designated as a contract market for cattle or beef parts or beef products until or unless the Secretary of Agriculture determines that the designation of such board of trade as a contract market is approved or favored by at least a majority of the producers who, during a representative period determined by the Secretary, have been engaged in the production for sale of the cattle specified in the futures contract for which such board of trade is seeking designation or in the production for sale of the cattle from which the beef parts or beef products are derived for which such board of trade is seeking designation.".

—On page 55, between lines 16 and 17, insert the following:

The Commodity Exchange Act, as amended (7 U.S.C. 1-20) is further amended by inserting after section 8c (7 U.S.C. 12c) the following:

"SEC. 8d. The Commission shall revoke the registration of any futures commission merchant, associate of any futures commission merchant, commodity pool operator or floor broker—

"(1) who accepts or places, either directly or indirectly, any order for the purchase or sale of any commodity for future delivery on any contract market from any person who has been found in violation of the provisions of section 20; or

"(2) who, himself, is a person who has been found in violation of the provisions of section 20.

Any such person whose registration is revoked in accordance with this section shall not be eligible to reapply for registration until twelve months after the date of revocation.".

SEC. 2. The Commodity Exchange Act, as amended, is further amended by adding at the end thereof the following new section.

"SEC. 20. Any person who, directly or indirectly, sells for export or agrees to sell for export the quantities determined pursuant to subsection (c) below of any wheat, corn, soybeans, and any component or commodity related to wheat, corn, or soybeans as the Commission may designate shall report the following information to the Commission: (1) the date of such sale or agreement, (2) the name and full identity of the commodity, (3) the quantity of the commodity, (4) the country or countries to which the commodity is to be shipped and the ultimate destination if known, and (5) such other information as the Commission may by regulation require. The report must be received by the Commission within forty-eight hours of the sale or agreement.

"(b) Notwithstanding the provisions of section 8 of this Act or any other provision of this Act, the Commission shall make available to the public each such report filed with the Commission pursuant to subsection (a) on the first working day following their receipt by the Commission. The Commission shall make these reports public in a manner that will (1) assure that all interested persons may obtain access to these reports at the same time and (2) protect against any person or firm obtaining premature disclosure of the information the reports contain. The Commission shall continue to make this information available to the public for a reasonable period of time.

"(c) Consistent with the interest of agricultural producers and others in the information contained in these reports, the purposes of this section, and the public interest, the Commission shall promulgate rules and regulations implementing the provisions of this section within ninety days of the effective date of this Act and may amend those rules and regulations from time to time thereafter. The Commission may by rule or regulation, among other things, limit the class of persons required to report pursuant to subsection (a). Unless or until changed by rule or regulation promulgated pursuant to this subsection, the class of persons required to report hereunder shall be limited to those persons whose total export sales and cancellations of wheat, corn, and soybeans exceed one hundred thousand metric tons daily or whose total export sales and cancellations of such commodities exceed two hundred thousand metric tons within seven calendar days.".

H.R. 5540

By Mr. BETHUNE:

—Page 27, after line 20, insert the following:

"(3) No assistance may be extended under this subsection unless the Secretary of Commerce, in consultation with the Secretary of the Treasury, determines that any assistance to an applicant will not enhance that applicant's procurement of credit for business ventures outside the territory of the United States."

By Mr. VENTO:

—Page, 50 after line 20, insert the following:

(2) The Secretary of Defense shall report to the Committee on Banking, Housing and Urban Affairs of the Senate and to the Committee on Banking, Finance and Urban Affairs of the House of Representatives any memorandum or understanding or similar agreement which involves actual or planned offsets, in contracts involving the sale of defense articles or services, in excess of $5 million not later than 30 days after the Secretary of Defense signs such memorandum of understanding.

And redesignate the following sections accordingly.

H.R. 6457

By Mr. BROYHILL:

(Amendment in the nature of a substitute.)

—Strike out all after the enacting clause and insert in lieu thereof the following:

SHORT TITLE

SECTION 1. (a) This Act may be cited as the "Biomedical Research and Library Extension Act of 1982".

NATIONAL CANCER INSTITUTE

SEC. 2. (a) Section 410(a) of the Public Health Service Act (42 U.S.C. 286e(a)) is amended by striking out "and" after "1981;", and by inserting before the period a semicolon and "$925,450,490 for the fiscal year ending September 30, 1983; $980,977,600 for the fiscal year ending September 30, 1984; and $1,030,026,400 for the fiscal year ending September 30, 1985".

(b) Section 410(b) of such Act is amended by striking out "and" after "1981;", and by inserting before the period a semicolon and "$59,195,600 for the fiscal year ending September 30, 1983; $62,747,350 for the fiscal year ending September 30, 1984; and $65,884,720 for the fiscal year ending September 30, 1985".

NATIONAL HEART, LUNG, AND BLOOD INSTITUTE

SEC. 3. (a) Section 414(b) of the Public Health Service Act (42 U.S.C. 287c(b)) is amended by striking out "and" after "1981,", and by inserting before the period a comma and "$38,520,000 for the fiscal year ending September 30, 1983, $40,831,200 for the fiscal year ending September 30, 1984, and $42,872,760 for the fiscal year ending September 30, 1985".

(b) The first sentence of section 419B of such Act (42 U.S.C. 287i) is amended by striking out "and" after "1981,", and by inserting before the period a comma and "$530,573,410 for the fiscal year ending September 30, 1983, $562,407,810 for the fiscal year ending September 30, 1984, and $590,528,200 for the fiscal year ending September 30, 1985".

NATIONAL LIBRARY OF MEDICINE

SEC. 4. Section 390(c) of the Public Health Service Act (42 U.S.C. 280b(c)) is amended by striking out "and" after "1981, and", and by inserting before the period a comma and "$8,000,000 for the fiscal year ending September 30, 1983, $8,500,000 for the fiscal year ending September 30, 1984, and $9,000,000 for the fiscal year ending September 30, 1985".

NATIONAL INSTITUTE OF ARTHRITIS AND MUSCULOSKELETAL DISEASES

SEC. 5. (a) Title IV of the Public Health Service Act is amended by adding at the end the following new part:

"PART J—NATIONAL INSTITUTE OF ARTHRITIS AND MUSCULOSKELETAL DISEASES

"ESTABLISHMENT AND PURPOSE OF INSTITUTE

"SEC. 481. (a) There is established in the Public Health Service a National Institute of Arthritis and Musculoskeletal Diseases (hereinafter in this part referred to as the 'Institute'). The general purpose of the In-

stitute is the conduct and support of research, training, health information, and related programs with respect to arthritis and musculoskeletal and skin diseases, including sports-related disorders.

"(b) The Director of the Institute, with the advice of its advisory council, shall develop a plan for a national arthritis and musculoskeletal diseases program to expand, intensify, and coordinate the activities of the Institute respecting the diseases, and shall carry out the program in accordance with such plan. The program shall be coordinated with the other national research institutes of the National Institutes of Health to the extent that they have responsibilities respecting such diseases and shall, at least, provide for—

"(1) investigation into the epidemiology, etiology, and prevention of all forms of arthritis and musculoskeletal diseases, including sports related disorders, primarily through support of basic research in such areas as immunology, genetics, biochemistry, microbiology, physiology, bioengineering, and any other scientific discipline which can contribute important knowledge to the treatment and understanding of these diseases;

"(2) research into the development, trial, and evaluation of techniques, drugs, and devices used in the diagnosis, treatment, and prevention of arthritis and musculoskeletal diseases;

"(3) research on the refinement, development, and evaluation of technological devices that will replace or be a substitute for damaged bone, muscle, and joints and other supporting structures; and

"(4) establish mechanisms to monitor the causes of athletic injuries and identify ways of preventing such injuries on scholastic athletic fields.

The Director shall transmit to the Director of the National Institutes of Health the plan required by this section, together with such comments and recommendations as the Director of the Institute determines appropriate.

"(c) The Director of the Institute shall—

"(1) carry out programs of support for research and training (other than training for which National Research Service Awards may be made under section 472) in the diagnosis, prevention, and treatment of arthritis, musculoskeletal diseases, and skin diseases, including support for training in medical schools, graduate clinical training, graduate training in epidemiology, epidemiology studies, clinical trials, and interdisciplinary research programs; and

"(2) establish programs of evaluation, planning, and dissemination of knowledge related to such research and training.

"INFORMATION CLEARINGHOUSE AND DATA SYSTEM

"SEC. 482. (a) The Director shall (1) establish the National Arthritis and Musculoskeletal Diseases Data System for the collection, storage, analysis, retrieval, and dissemination of data derived from patient populations with arthritis and musculoskeletal diseases, including, where possible, data involving general populations for the purpose of detection of individuals with a risk of developing such diseases, and (2) establish the National Arthritis and Musculoskeletal Diseases Information Clearinghouse to facilitate and enhance knowledge and understanding of arthritis and musculoskeletal diseases on the part of health professionals, patients, and the public through the effective dissemination of information.

"(b) For the data system and clearinghouse under subsection (a) there is authorized to be appropriated $1,500,000 for the fiscal year ending September 30, 1983, $1,000,000 for the fiscal year ending September 30, 1984, and $1,100,000 for the fiscal year ending September 30, 1985.

"INTERAGENCY COORDINATION COMMITTEES

"SEC. 483. (a) For the purpose of—

"(1) better coordination of the research activities of all the national research institutes relating to arthritis, skin diseases, and musculoskeletal diseases, including sports related disorders; and

"(2) coordinating those aspects of all Federal health programs and activities relating to such diseases to assure the adequacy and technical soundness of such programs and activities and to provide for the full communication and exchange of information necessary to maintain adequate coordination of such programs and activities,

the Secretary shall establish an Arthritis and Musculoskeletal Diseases Interagency Coordinating Committee and a Skin Diseases Interagency Coordinating Committee (hereinafter in this section individually referred to as a 'Committee').

"(b) Each Committee shall be composed of the Director (or his designee) of the Institute and its divisions involved in research involving arthritis and musculoskeletal diseases or skin diseases, as may be appropriate, the chief medical director (or the director's designee) of the Veterans' Administration, and a medical officer designated by the Department of Defense, and shall include representation from all other Federal departments and agencies whose programs involve health functions or responsibilities relevant to arthritis and musculoskeletal diseases or skin diseases, as may be appropriate, as determined by the Secretary. Each Committee shall be chaired by the Director of the National Institutes of Health (or his designee). Each Committee shall meet at the call of the chairman, but not less often than four times a year.

"(c) Each Committee shall prepare an annual report for—

"(1) the Secretary, and

"(2) the Director of the National Institutes of Health,

detailing the work of the Committee in the fiscal year for which the report was prepared in carrying out the coordinating activities described in paragraphs (1) and (2) of subsection (a). Such report shall be submitted not later than the one hundred and twentieth day after the end of each fiscal year.

"ARTHRITIS AND MUSCULOSKELETAL DISEASES DEMONSTRATION PROJECTS

"SEC. 484. (a) The Secretary may make grants to public and other nonprofit entities to establish and support projects for the development and demonstration of methods for arthritis and musculoskeletal diseases screening and detection and for referral for treatment, and for dissemination of information on these methods to the health and allied health professions. Activities under such projects shall be coordinated with (1) Federal, State, local, and regional health agencies, (2) centers assisted under section 485, and (3) the data system established under subsection (c).

"(b) Projects under this section shall include—

"(1) programs which emphasize the development and demonstration of new and improved methods of screening and early detection, referral for treatment, and diagnosis of individuals with a risk of developing arthritis and musculoskeletal diseases;

"(2) programs which emphasize the development and demonstration of new and improved methods for patient referral from local hospitals and physicians to appropriate centers for early diagnosis and treatment;

"(3) programs which emphasize the development and demonstration of new and improved means of standardizing patient data and recordkeeping;

"(4) programs which emphasize the development and demonstration of new and improved methods of dissemination of knowledge about the projects and methods referred to in the preceding paragraphs of this subsection to health and allied health professionals;

"(5) programs which emphasize the development and demonstration of new and improved methods for the dissemination to the general public of information—

"(A) on the importance of early detection of arthritis and musculoskeletal diseases, of seeking prompt treatment, and of following an appropriate regimen; and

"(B) to discourage the promotion and use of unapproved and ineffective diagnostic, preventive treatment, and control methods for arthritis and unapproved and ineffective drugs and devices for arthritis and musculoskeletal diseases; and

"(6) projects for the investigation into the epidemiology of all forms and aspects of arthritis and musculoskeletal diseases, including investigations into the social, environmental, behavioral, nutritional, and genetic determinants and influences involved in the epidemiology of such diseases.

"(c) For grants for arthritis and musculoskeletal diseases demonstration projects under subsection (a) there are authorized to be appropriated $2,000,000 for the fiscal year ending September 30, 1983, and for each of the next two fiscal years.

"(d) The Director shall provide for the standardization of patient data and recordkeeping for the collection, storage, analysis, retrieval, and dissemination of such data in cooperation with projects under this section and centers assisted under section 485, and other persons engaged in arthritis and musculoskeletal diseases programs.

"MULTIPURPOSE ARTHRITIS AND MUSCULOSKELETAL DISEASES CENTERS

"SEC. 485. (a) The Director of the Institute shall, after consultation with the advisory council to the Institute and consistent with the arthritis plan developed pursuant to the National Arthritis Act of 1974, provide for the development, modernization, and operation (including staffing and other operating costs such as the costs of patient care required for research) of new and existing centers for arthritis and musculoskeletal diseases. For purposes of this section, the term 'modernization' means the alteration, remodling, improvement, expansion, and repair of existing buildings and the provision of equipment for such buildings to the extent necessary to make them suitable for use as centers described in the preceding sentence.

"(b) Each center assisted under this section shall—

"(1) (A) use the facilities of a single institution or a consortium of cooperating institutions, and (B) meet such qualifications as may be prescribed by the Secretary; and

"(2) conduct—

"(A) basic and clinical research into the cause, diagnosis, early detection, prevention,

control, and treatment of arthritis and musculoskeletal diseases and complications resulting from such diseases, including research into implantable biomaterials and biomechanical and other orthopaedic procedures;

"(B) training programs for physicians, scientists, and other health and allied health professionals;

"(C) information and continuing education programs for physicians and other health and allied health professionals who provide care for patients with arthritis and musculoskeletal diseases; and

"(D) programs for the dissemination to the general public of information—

"(i) on the importance of early detection of arthritis and musculoskeletal diseases, of seeking prompt treatment, and of following an appropriate regimen; and

"(ii) to discourage the promotion and use of unapproved and ineffective diagnostic, preventive, treatment, and control methods and unapproved and ineffective drugs and devices.

A center may use funds provided under subsection (a) to provide stipends for health professionals enrolled in training programs described in paragraph (2)(B).

"(c) Each center assisted under this section may conduct programs to—

"(1) establish the effectiveness of new and improved methods of detection, referral, and diagnosis of individuals with a risk of developing arthritis and musculoskeletal diseases,

"(2) disseminate the results of research, screening, and other activities, and develop means of standardizing patient data and recordkeeping, and

"(3) develop community consultative services to facilitate the referral of patients to centers for treatment.

"(d) The Director shall, insofar as practicable, provide for an equitable geographical distribution of centers assisted under this section. The Director shall give appropriate consideration to the need for centers especially suited to meeting the needs of children affected by arthritis.

"(e) Support of a center under this section may be for a period of not to exceed five years and such period may be extended by the Director for additional periods of not more than five years each after review of the operations of such center by an appropriate scientific review group established by the Director.

"(f) For multipurpose arthritis and musculoskeletal diseases centers there are authorized to be appropriated $20,000,000 for the fiscal year ending September 30, 1983, $15,000,000 for the fiscal year ending September 30, 1984, and $18,000,000 for the fiscal year ending September 30, 1985.

"REPORT

"SEC. 486. The Director of the Institute shall include in the annual report of the Institute a description of the Institute's activities under the current Arthritis Plan under the National Arthritis Act of 1974. The description submitted by the Director shall include an evaluation of the activities of the centers supported under section 485.".

(b)(1) Section 431(a) of the Public Health Service Act (42 U.S.C. 289a(a)) is amended by striking out "arthritis, rheumatism, and".

(2)(A) Subsection (a) of section 434 of such Act (42 U.S.C. 298c-1) is amended by striking out "Arthritis, Diabetes," each place it appears and inserting in lieu thereof "Diabetes".

(B) Subsection (b) of such section is amended (i) by striking out "Arthritis, Diabetes," and inserting in lieu thereof "Diabetes", and (ii) by striking out "an Associate Director for Arthritis and Musculoskeletal and Skin Diseases,".

(C) Subsection (c) of such section is amended (i) by striking out "a subcommittee on arthritis and musculoskeletal and skin diseases,", and (ii) by striking out "arthritis, musculoskeletal and skin diseases,".

(D) Subsection (d) of such section is amended (i) by striking out "the Associate Director for Arthritis and Musculoskeletal and Skin Diseases,", and (ii) by striking out "arthritis, musculoskeletal and skin diseases,".

(E) Subsection (e) of such section is amended by striking out paragraph (1) and by redesignating paragraphs (2) and (3) as paragraphs (1) and (2), respectively.

(F) The heading for such section is amended by striking out "ARTHRITIS, DIABETES," and inserting in lieu thereof "DIABETES".

(3)(A) Subsection (a) of section 436 of such Act (42 U.S.C. 289c-3) is amended (i) by striking out "arthritis, diabetes mellitus," and inserting in lieu thereof "diabetes mellitus", and (ii) by striking out "an Arthritis Interagency Coordinating Committee,".

(B) Subsection (b) of such section is amended by striking out "Arthritis, Diabetes," and inserting in lieu thereof "Diabetes".

(4)(A) Subsection (a) of section 437 of such Act (42 U.S.C. 289c-4) is amended by striking out "the National Arthritis Advisory Board,".

(B) Subsection (b)(2) of such section is amended by striking out "Arthritis, Diabetes," and inserting in lieu thereof "Diabetes".

(C) Subsection (d) of such section is amended by striking out "and the National Arthritis Advisory Board, six of the members of each" and inserting in lieu thereof, ", six of the members of".

(D) Subsection (g) of such section is amended by striking out "Arthritis, Diabetes," and inserting in lieu thereof "Diabetes".

(E) Subsection (h)(3) is amended by striking out "Arthritis, Diabetes," and inserting in lieu thereof "Diabetes".

(F) The heading for such section is amended by striking out ", ARTHRITIS,".

(5) Sections 438 and 439 of such Act (42 U.S.C. 289c-5, 289c-6) are repealed.

(6) The heading for part D of such Act is amended by striking out "ARTHRITIS, DIABETES," and inserting in lieu thereof "DIABETES".

STUDY OF NATIONAL RESEARCH INSTITUTES

SEC. 6. (a)(1) The Secretary of Health and Human Services, through the Director of the National Institutes of Health, shall in accordance with subsection (b) arrange for the conduct of a study of the effectiveness of the existing combinations of disease research programs within the individual national research institutes and of the standards which should be followed in establishing new or realigning existing national research institutes.

(2) The Secretary shall submit to the Committee on Energy and Commerce of the House of Representatives and the Committee on Labor and Human Resources of the Senate a report on the results of the study. The report shall be submitted not later than 18 months after the date of the enactment of this Act.

(b)(1) The Secretary of Health and Human Services shall request the National Academy of Sciences, through the Institute of Medicine, to conduct the study required by subsection (a)(1) under an arrangement under which the actual expenses incurred by the academy in conducting such study will be paid by the Secretary and the Academy will prepare the report required by subsection (a)(2). If the National Academy of Sciences is willing to do so, the Secretary shall enter into such an arrangement with the Academy for the conduct of the study.

(2) If the National Academy of Sciences is unwilling to conduct such study under such an arrangement, the Secretary shall enter into a similar arrangement with other appropriate nonprofit private entities.

(c) No national research institute, other than the National Institute of Arthritis and Musculoskeletal Diseases, shall be established in addition to the institutes in existence on the date of the enactment of this Act before the expiration of 6 months after the submission of the report referred to in subsection (a)(2).

(d) The Secretary of Health and Human Services shall conduct an administrative review of the disease research programs within the National Institute of Diabetes and Digestive and Kidney diseases to determine if any of such programs could be more effectively and efficiently managed by other national research institutes. The Secretary shall complete such review within the sixty-day period beginning on the date of enactment of this Act.

ANIMALS IN RESEARCH

SEC. 7. (a) The Secretary of Health and Human Services shall review—

(1) the actions being taken by the Department of Health and Human Services to support research to develop research and testing methodologies which will decrease the number of live animals used in biomedical and behavioral research;

(2) the actions taken by the Department to improve oversight of the use of animals in such research by entities which receive financial support for such research through the Department; and

(3) the activities undertaken by the Department to ensure the humane care and treatment, and appropriate use, of live animals in such research conducted or supported by agencies of the Department.

(b) Not later than June 30, 1984, the Secretary of Health and Human Services shall transmit to the Committee on Labor and Human Resources of the Senate and Committees on Energy and Commerce and Science and Technology of the House of Representatives a report on the review conducted under subsection (a). The report shall also contain a detailed analysis of the impact on biomedical and behavioral research and the entities conducting such research of a requirement that the entities be accredited for the use of live animals in research.

EXTENSIONS OF REMARKS

SCHOOL PRAYER

HON. DAN COATS

OF INDIANA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, September 22, 1982

● Mr. COATS. Mr. Speaker, as a cosponsor of the President's school prayer amendment, I felt it was significant that one of the most influential religious periodicals in our Nation, Christianity Today, editorialized in its September 3, 1982, issue on the necessity of passing the prayer amendment. The importance of this endorsement, as well as its content, should not go unnoticed by Members of Congress and therefore, I am submitting the majority of the article for their consideration.

In earlier years, Christianity Today either opposed the idea or suggested that a moment of silence would be the best solution. Now, the editors of the magazine have come out squarely behind the proposed amendment. It should be of interest to note that they also endorsed as "even better form" the slightly revised version of the amendment suggested by Robert Dugan of the National Association of Evangelicals during recent Senate hearings.

The editorial follows:

DOES RELIGION BELONG IN SCHOOL?

(The Prayer amendment has major implications for how our Constitution is understood.)

"Astonishingly trivial!" So a liberal opponent decried the proposal for the School Prayer Amendment. The whole matter, he insists, is so inconsequential that no sensible person will waste his time arguing for or against it. The only justification for fighting it, he suggests cynically, is to "keep right-wingers pinned down on the Prayer Amendment battle for a number of years so they won't be able to cause trouble on more important fronts."

There is a piece of truth in what he says. The Prayer Amendment is certainly no panacea for the moral ills of our society. The evangelist who blamed the Supreme Court ban on school prayers for "crime, racial conflict, drug abuse, political assassination, the Vietnam war, sexual promiscuity, and the demise of American family life" is living in a dream world. Passing the Prayer Amendment will not result in an automatic upsurge of good laws for the relief of the poor, the downtrodden, and the disenfranchised. It will not roll back the materialism and secularism dominating higher echelons of our culture. And, above all, there are other great issues before our nation. Evangelicals must not allow themselves to be sidetracked by a concern for the School Prayer Amendment, making it into an issue out of all proportion to its true significance.

WHY THE PRAYER AMENDMENT IS IMPORTANT

Nontheless, our liberal friend labors under a very serious misconception. The issue over the Prayer Amendment is not trivial. It is a symbol of the fact that America for 200 years has labeled itself a nation under God. Secularists are struggling valiantly to try to pull our nation out from under its conscious submission to a supreme moral ruler. They are trying to make the United States into a pagan nation. While few, if any, defend their opposition to this amendment on the grounds that they wish to make America a pagan nation, that is nonetheless the heart of the issue.

We are not an obedient nation, nor are we a righteous nation. But in our national motto, in our Pledge of Allegiance, and in countless other ways, we have consciously chosen to be a nation that recognizes God as the Supreme Ruler and the Guarantor of our basic ethical values. The Prayer Amendment, for good or ill, has become the symbol of whether or not America still has the will to claim itself to be a nation under God.

Moreover, no one should ever think that evangelicals will remain satisfied with securing merely the symbol of our national recognition of God. If this amendment or some other action makes it possible for Americans to give public recognition to God, it will have far-reaching effects. It will prove to all that this nation has not drifted so far from its heritage as some have thought. The American people still want to commit this nation to God, however vague and hesitant that desire may be.

Therefore, God-fearing people everywhere will be encouraged. Evangelicals will gain a greater sense of their responsibility to act politically as Christians. They must not, and they will not, stop until they have reasserted their right to the full practice of their evangelical faith and its application in ways that are appropriate to a pluralistic society. They will certainly press for the right to provide meaningful instruction for their children in Christian doctrine and biblical ethics, however this can be justly safeguarded in our pluralistic society. No large segment of society has ever been willing to turn its children over to an educational process that undermines or neglects as irrelevant its basic values. On the current scene, this rests heavily as a major social problem and, as we shall see, is directly related to the issue of the Prayer Amendment.

This proposed amendment also has significant implications for the whole understanding of our American Constitution and how it works in practice. Over the last few decades, the Supreme Court has chosen to "interpret" our Constitution in ways that almost every student of the American system recognizes are really not interpretations in the usual sense of the word. They are instead adaptations of it to fit what the Supreme Court feels is good for the American people at the moment. In this process, most evangelicals are convinced that while the court has protected many basic human rights, it has also jeopardized other rights built into the original Bill of Rights. Passage of the Prayer Amendment would seek to reassert some of this precious heritage without endangering political and social freedoms the American people have gained in other areas.

RELIGIOUS FREEDOM IN PUBLIC SCHOOLS

The First Amendment prohibited Congress from establishing any particular religion as the law of the land, and it guaranteed the people their right to worship freely as they wished. The Fourteenth Amendment has been interpreted (many think wrongly) to mean that these same rules apply to each of the 50 states and local governments. Immediately after World War II, however, a series of Supreme Court decisions upset the balance between these two principles of (1) freedom from governmental prescription of religion, and (2) freedom from government interference in the free exercise of religion.

The famous *McCullum* case ruled out released time (for Bible classes).

In *Eagle* v. *Vitale*, the Supreme Court struck down a 22-word prayer prepared by the New York Board of Regents for voluntary use.

In *Murray* v. *Curlett*, Bible reading and the Lord's Prayer were forbidden in school exercises.

Although the Court decisions were not so clear-cut with respect to voluntary religious exercises as some have thought, the courts have made abundantly clear that: (1) any legislated practice must have a secular purpose, (2) its primary effect must not be to aid or inhibit religion, and (3) it must not significantly entangle the government in religion. Even more important than this set of tests has been the effect of the Court's decision upon the practice of our public schools. In order to avoid litigation and to "be on the safe side," school officials across our nation have pretty much eliminated voluntary prayer or Bible reading or religious exercises of any kind.

The cumulative effect of this upon our nation is disastrous. In the first place, it has deprived religious people of sharing with their children the basic structure of their own religious and moral commitments. Moreover, it has deprived our nation of communicating its religious heritage to its citizens. And finally, it has, in effect, established a religion of secularism.

As Supreme Court Justice Stewart noted in his 1964 minority report (*Abington* v. *Schempp*): "[A] compulsory state educational system so structures a child's life that if religious exercises are held to be an impermissible activity in schools, religion is placed at an artifical and state-created disadvantage. Viewed in this light, permission of such exercises for those who want them is necessary if the schools are truly to be neutral in the matter of religion. And a refusal to permit religious exercises thus is seen, not as the realization of state neutrality, but rather as the establishment of a religion of secularism."

The dilemma before the American people is simply this: How can we adequately protect the right of our people not to have an alien religion forced upon them by government but at the same time allow them the free exercise of their own religion in a way that will be appropriate with the nature of their deep religious commitment? In a pluralistic society like ours, how can these two basic freedoms be preserved in appropriate balance?

● This "bullet" symbol identifies statements or insertions which are not spoken by the Member on the floor.

IS THE PRAYER AMENDMENT A SOLUTION?

We believe that the amendment proposed by the Senate (S.J. Res. 199) and sponsored by President Reagan will go a long way towards the preservation of both of these freedoms and secure the desired balance. The resolution reads: "Nothing in this Constitution shall be construed to prohibit individual or group prayer in public schools or in public institutions. No person shall be required by the United States or by any state to participate in prayer."

The slightly revised version also under consideration is, we think, an even better form, although we would support either. The revised form would read: "Nothing in this Constitution shall be construed to prohibit prayer *or other religious activity* in public schools or other public institutions. Neither the United States nor any state shall require any person to participate in prayer or other religious activity or *influence the form or content of any prayer or other religious activity.*" Either form of amendment would significantly extend the freedom to exercise religion in the public school. The second form has the added feature that it would not permit simply voluntary prayer, but also the voluntary exercise of religion in debates, private meditation, Bible study, moral instruction, Bible reading, or religious clubs as long as these did not infringe upon the freedom of the nonparticipant.

Both readings also protect the student's right not to have a religion he does not want crammed down his throat. The amended form again is stronger. It not only prohibits the government from requiring anyone to participate in prayer or any other religious activity, it also forbids the government from influencing the form or content of the prayer or religious activity. That is, the government would not be permitted to prescribe a particular form even for voluntary use. In this way it could not indirectly foster a particular religion by preparing sectarian prayers or forms of worship and making them readily available. More important by far to all evangelicals, it could not in the interests of peace and harmony prepare "harmless" prayers with all distinctively evangelical convictions safely removed from them.

WOULD THIS FOSTER ONE FREEDOM TO DESTROY ANOTHER?

In one sense, of course, by providing an environment in which those who wish to pray will be permitted to do so, some will be influenced toward religion and even a particular religion. Army chaplains, for example, sometimes influence a soldier toward a particular religion. But it is not the government's aim in providing the chaplain to influence a soldier in the direction of a particular religion. Just so, if the government creates an opportunity for prayer or Bible study, its aim is not to influence anyone toward a particular religion, though that may sometimes happen. Its aim is to provide freedom for those who wish to exercise their religion to do so while retaining safeguards against unduly embarrassing or pressuring any students to participate in an unwanted religious exercise.

Of course, some insist that merely creating opportunity for prayer is in itself a dangerous push in the direction of fostering religion. Yet, in a pluralistic society we must retain a balance of both principles—freedom to exercise and freedom against compulsion. Most Americans believe in God and hold that belief in a wise and just Supreme Ruler is important to the moral fiber of the nation. Therefore, it is appropriate for our government to provide a favorable environment for the fostering of religion so long as it adheres to the Golden Rule and safeguards to the best of its ability the feedom for irreligion (applying the Golden Rule to others).

This is precisely what we now do with our Pledge of Allegiance. We gladly acknowledge that we are a nation under God. But we do not force the atheist or Jehovah's Witness to repeat a religious commitment that runs against his conscience. Accordingly, teachers could pray if they wished, but they could not be forced to pray and they could not directly teach their students to pray. And if a teacher or student chose to pray, the government could not prescribe a prayer to shape their religious exercise.

WOULD IT DESTROY GENUINE RELIGION?

Some object that such holding of religious exercises would be divisive, setting the religious against the irreligious. Not at all! It would be far more likely to lead to a greater understanding by each student of the other person's religious values or of his lack of religious values. In most cases it would lead to a greater respect for religion. But it would also provide a marvelous laboratory in which children could learn mutual respect for diverse religious views and how those with very deep, but also very different, commitments can function effectively in a pluralistic society.

Again, Christians often object that the watered-down sort of religious exercise acceptable to the vast majority of American citizens could only be an impoverished civil religion offensive to any evangelical who bases his religion on the Bible. Evangelicals have no desire to "establish" a false deistic religion and promulgate it in our schools. But this is not what the amendment proposes or even allows for. The fact is, by the complete elimination of religion from the schools, we now have the establishment of a secular religion. We are not asking that this be replaced by an anemic, vaguely theistic, civil religion. Certainly we are not asking for a theology-free prayer or religious exercise. Rather, we desire freedom for each person to carry out his or her own religious convictions within the public school. The public schools of America are too determinative for our entire cultural heritage to allow them to become an irreligious preserve or to promulgate a religion of secularism. We are, in short, insisting—and the amendment as revised would certainly require this— that the religion students would be free to exercise should be their own.

Finally, we need to examine the often-repeated theme that religion is really a matter for the home and church. With this we certainly agree. By no means do we wish the school to replace the church and the home as the primary source of religious instruction to the young. But no one denies that the American public school plays a decisive role in transmitting culture in our society. It is to the degree a person thinks religion is important that he will be unwilling for this crucial influence upon the young of our nation to be totally divorced from religious influence.

Moreover, we dare not teach our youngsters that religion is a purely private affair that does not affect public life. Religion deals with one's ultimate commitments and, if genuine, affects every area of life. It is important, therefore, to see that the state is not the highest authority. Like every other aspect of human life, the state, too, is subject to a higher divine law of righteousness and justice.

Pluralism in America does not mean or require that our government must root out every vestige of religion from public life. In recent years, even religious people have at times defended singing "Silent Night" or repeating a prayer as really not religion at all so as to keep it within the bounds of what has been decreed permissible by our courts. But these are, and should be acknowledged as, religious practices. America claims to be a nation under God. Indirectly, it may foster religion and even a practice of a certain kind. But we are not defending permitting religious exercises in our public schools for that reason. We are defending them because of the inalienable freedoms that are ours as human beings—freedoms no government has a right to take from us. It is our aim to permit U.S. citizens to free exercise of their own religion. And we believe this can be done without foisting their religious convictions upon all or coercing our citizens to adopt a particular religion.●

BATTLE BETWEEN AMA AND FTC

HON. ROBERT E. BADHAM

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, September 22, 1982

● Mr. BADHAM. Mr. Speaker, a 7-year fight between the American Medical Association and the Federal Trade Commission concerning the FTC's jurisdiction over the licensed professions is about to reach a climax. Final debate in this House on legislation to reauthorize the FTC will decide whether these professionals will be allowed to police themselves through reasonable self-regulation or be policed by an administrative agency whose congressional charter never included power over the professions or over State regulatory activity.

If the FTC is allowed to regulate the medical profession, local societies will have real difficulty setting standards by which medical care is measured. Nor will they be able to provide information to patients on what fees are reasonable or unreasonable, warn inquiring patients of physicians, clinics, or other medical services with poor performance records, and participate in voluntary coalitions to deal with cost containment.

The FTC now assumes subpena power over the records of State, county, and other medical societies, very often for fishing expeditions. One medical society in California spent an initial $1 million in costs in an FTC action, and then agreed to discontinue publication of a relative value scale of charges for certain procedures. The relative value scale study would have been useful to consumers. Indeed, the study will be the basis of reimbursement rates for the California medicaid and medicare program. The Department of Health and Human Services

will use the same value scale that was not allowed by the FTC.

We will have the opportunity, when the FTC reauthorization bill comes to the floor for a vote, to add an amendment that will take the FTC out of the business of regulating the professions. Clearly, the FTC does not have the expertise to deal with problems of the learned professions. The self-regulation system and the processes in place at the Federal level through the Department of Justice and at the State level through the States attorneys general offices and the courts has worked well for many years. There is no need for the FTC to become involved in regulating the practice of medicine.

The Luken-Lee amendment to the FTC authorization bill will put a moratorium on the activities of the FTC over the professions, until we, the Congress, decide the FTC should act in this area. It is a reasonable proposal. The FTC has never been specifically granted the power to govern the professions. Yet, the agency is taking the power through its investigations and orders. We can define where the authority for action by the FTC lies. We must support the Luken-Lee amendment.●

NATIONAL NEIGHBORHOOD DAY

HON. ROMANO L. MAZZOLI

OF KENTUCKY

IN THE HOUSE OF REPRESENTATIVES

Wednesday, September 22, 1982

● Mr. MAZZOLI. Mr. Speaker, the U.S. Conference of Mayors, meeting in my hometown of Louisville, Ky., this summer, recognized the importance of neighborhoods in the development of the American character and spirit. They adopted a resolution pointing out that "* * * neighborhoods are the building blocks of America's cities, and contribute to the social, cultural, political, and economic life of urban centers * * * strong identification with neighborhoods by citizens can enhance city life and help sustain stable, family-centered living * * *".

But, more than this, neighborhoods represent the real "grassroots" America—the America that is fed up with nuclear proliferation, with drunk drivers, with crime. And it is from these communities that solutions to these problems and others will come. It is the leaders of the communities that know their people's needs best, and can help forge the public/private partnership that will get America rolling again.

Many communities across the Nation—including the Crescent Hill Community in Louisville—have adopted the first Saturday following Labor Day of each year as National Neighborhood Day. This year's celebration in Crescent Hill was once again at the historic Peterson-Dumesnil House.

An early order of business for next Congress should be the designation of "National Neighborhood Day." Congress should recognize the importance of neighborhoods, and encourage activities to preserve and revitalize them.●

BRIG. GEN. RICHARD D. DEAN APPOINTED DEPUTY DIRECTOR OF ARMY NATIONAL GUARD

HON. IKE SKELTON

OF MISSOURI

IN THE HOUSE OF REPRESENTATIVES

Wednesday, September 22, 1982

● Mr. SKELTON. Mr. Speaker, I take this opportunity to congratulate Brig. Gen. Richard D. Dean, of Sedalia, Mo., for being appointed Deputy Director of the Army National Guard. He is the first Missourian to hold this position, which is the second highest position in the National Guard.

As the Deputy Director of the Army National Guard, Brigadier General Dean will be responsible for supervising efforts to meet manpower and equipment needs of the National Guard. He will also work with national budget matters for the Guard and will be testifying before Congress on related issues.

Brigadier General Dean has an impressive history with the National Guard. He served as executive officer in Battery C, 128th Field Artillery of the Missouri National Guard. He has also served as commander of the 135th Artillery Group and Engineer Brigade and was commander of the 35th Engineer Brigade, Missouri National Guard at the time of his new appointment. His service decorations include: the meritorious service medal, Army commendation medal, United Nations service medal, Korean service medal with battle star, and the Korean President unit citation.

Again, I congratulate Brigadier General Dean for his appointment as Deputy Director of the Army National Guard and I wish him the best of luck in his new endeavor.●

CANBY'S CROSS—THE CENTENNIAL OF ITS PLACING

HON. GENE CHAPPIE

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, September 22, 1982

● Mr. CHAPPIE. Mr. Speaker, I include the following historical dedication in the RECORD:

CANBY'S CROSS—THE CENTENNIAL OF ITS PLACING

(Prepared by James O. Southern)

This September will mark the centennial of a noted northern California historical landmark. In September of 1882, Lt. John S. Parke, USA, erected a wooden cross on the spot near where General E. R. S. Canby was killed during a peace conference designed to end hostilites of the 1872-73 Modoc Indian War.

The story of the war and Canby's death is well known in the annuals of Western American history. Just below the Oregon border in California an army of about 1,000 soldiers was held at bay by under 170 Modoc Indians. U.S. casualties were high. In time the Indians ran out of supplies and surrendered.

Seven years after the conflict Lt. Parke visited these isolated, desolate lava beds. He viewed the area with awe and must have thought of Canby as a cadet and how those early commissioned years were slow in attaining rank. There were several Indian campaigns, then came the war with Mexico and the Civil War; the latter seeing Canby become a general officer. He was not the dashing officer like those we remember so well from this period of our national history. And few realize that Canby accepted the capitulation of CSA General Kirby Smith at New Orleans, thus ending final resistance of the Confederacy.

Canby then became an administrative officer with occasional periods of field duty. Parke must have thought about the press Canby received and remembered that Canby was an officer who was without enemies in his profession, and rarely criticized. He was a compassionate and just man, one whom a number of Indian tribes had come to look upon as a friend. Now, here on these lava beds Canby was murdered while trying to find an honorable peace to end a war brought on by nearly two decades of Indian and white conflict spawned by greed and mistrust.

Parke must have thought about Canby's past, and he was determined to mark the place where the peace council tent stood. In September of 1882 he did just that. With the aid of a civilian carpenter he erected a wooden cross with a lava rock base to the memory of the first general officer of the U.S. Army ever to be killed during an Indian war.

Today the original cross may be seen in the Visitor Center of the Lava Beds National Monument near Tulelake, California. The original site is still marked by its lava rock base and the 4th or 5th replacement of the wooden cross. It is a tribute to an American hero which is viewed by many modern day tourists.●

TRIBUTE TO A PENNSYLVANIA SCOUT

HON. JAMES L. NELLIGAN

OF PENNSYLVANIA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, September 22, 1982

● Mr. NELLIGAN. Mr. Speaker, I join my colleagues today in honoring an outstanding boy scout from the 11th District of Pennsylvania, which I am privileged to represent. This scout will

receive the highest scouting award, the coveted Eagle Scout Award.

Daniel J. Backo, 16, son of Joseph P. and Lorraine J. Backo of Exeter, Pa., conducted a free blood pressure clinic as his eagle award project. He is a junior and is active on the golf team at Wyoming Area High School.

I commend troop 311, its leaders and Scout Master William Daileda for spurring this young man to this outstanding achievement, and I join parents, friends, and members of the community in wishing Daniel equal success in his future endeavors.●

A TRIBUTE TO GUY BREWER

HON. JOSEPH P. ADDABBO

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Wednesday, September 22, 1982

● Mr. ADDABBO. Mr. Speaker, I am pleased and proud to announce that New York City has recently paid tribute to one of its finest native sons—Guy Brewer—by renaming a Queens street in his honor.

Guy, an articulate and capable legislator, as well as a good friend, was a five-term member of the New York State Assembly until his death in 1978. He was the first black member of any political party to serve as majority whip of that body. Guy also founded the United Democratic Club nearly 40 years ago, which helped to elect the first black officials in Queens County. Guy stood out as a champion of individual and minority rights, and it is most fitting that we give him his due recognition.

A parade and dediction ceremony were held in Queens on Saturday, September 11, as New York Boulevard officially became Guy R. Brewer Boulevard. The bill to change the name was introduced by Councilman Archie Spigner in May 1982, and signed by the mayor on June 1. The boulevard is the longest street in New York City named after a black citizen; stretching 3.7 miles from the Jamaica business district on the north to Kennedy Airport on the south.●

TRIBUTE TO JOHN HOVING

HON. WILLIS D. GRADISON, JR.

OF OHIO

IN THE HOUSE OF REPRESENTATIVES

Wednesday, September 22, 1982

● Mr. GRADISON. Mr. Speaker, I rise to congratulate John Hoving on 10 years of distinguished service to Federated Department Stores and to the entire Cincinnati community. John is now leaving Cincinnati and will be sorely missed.

The Cincinnati Enquirer on September 14 printed an editorial which I think succinctly sums up the way I and many others feel about John Hoving. I am submitting that editorial for the record and extending to John my personal thanks for his contributions to our community.

TRIBUTE TO JOHN HOVING

The impending departure of John Hoving, for a decade senior vice president for public affairs and public relations of Federated Department Stores Inc., will be a distinct loss for the Queen City.

Widely regarded as one of the most effective public-relations specialists in America, Mr. Hoving has stood at the fore of Federated's involvement in the social and economic life of Southwestern Ohio and contributed significantly to its advancement. His broad background in analyzing public issues and helping to shape public policy has made him something of a community conscience whose insights were welcomed by Cincinnatians of all persuasions.

He has left a positive mark on Cincinnati's civic life and a warm place in the memories of all those associated with him.●

PUBLIC SERVICES OF ALFRED A. REDA

HON. JOSEPH G. MINISH

OF NEW JERSEY

IN THE HOUSE OF REPRESENTATIVES

Wednesday, September 22, 1982

● Mr. MINISH. Mr. Speaker, it is a pleasure to call the attention of my colleagues to the public service performed by Mr. Alfred A. Reda of West Paterson, N.J., which will be celebrated this week. Mr. Reda personifies the kind of civic dedication which has done so much to enhance the quality of life in America.

Since January 1, 1957, Alfred Reda has served as the municipal clerk of West Paterson. His tenure has seen the office expand from a part-time operation, open just 2 hours a day, to the present efficient full-time administration. By January of 1957, Mr. Reda's conspicuous abilities and solid achievements in office led the mayor and council to select him as the borough's first administrator. Major municipal improvements characterized his tenure, including the construction of a new municipal building, a new public library, a million-gallon water tank, a public works garage, newly acquired and developed public parks, and—perhaps more significant that any building—the codification of municipal ordinances. His has been the particular responsibility of attracting desirable ratables among commercial and industrial firms.

These solid achievements testify not only to Alfred Reda's skill, knowledge, and energy, but most particularly to a true spirit of public service. His prime motivation has been a desire to enhance the community which has been his lifelong home.

Mr. Reda has been active in many professional organizations, which aided his efforts to work better for his community. His distinguished participation in the Passaic County Municipal Clerks Association and in the Municipal Clerks Association of New Jersey was recognized by his election as president of both groups, in 1961 and 1975 respectively. He has employed his memberships in these groups as valuable means of improving the capabilities of himself and his colleagues to serve their respective communities efficiently. He also served on the State advisory board and the education board, teaching classes at Rutgers University in the latter capacity.

Mr. Reda's diligent work to make his community a better place to live represents a very commendable form of patriotism. The people of West Paterson recognize how fortunate they have been to have such a friend working to meet their needs for a quarter of a century, so they will honor Mr. Reda at a testimonial dinner on September 26. Nobody could deserve this honor more.

America's towns and cities have great demands for services and facilities in the days ahead; I wish every one of them had an Alfred A. Reda to deal with them. West Paterson is fortunate to have a good man on the job in these challenging times.●

GET A PIECE OF WILDERNESS BEFORE IT IS TOO LATE

HON. STEPHEN L. NEAL

OF NORTH CAROLINA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, September 22, 1982

● Mr. NEAL. Mr. Speaker, I am inserting into the CONGRESSIONAL RECORD today an excellent article assessing the policies of the Secretary of the Interior James G. Watt that recently appeared in the Winston-Salem Sentinel. The author of the article, Jim Dockery, contends that Secretary Watt has turned the Interior Department upside down, politicizing the historically nonpartisan agency and playing fast and loose with our national treasures. Mr. Dockery characterizes Mr. Watt's attempts to open wilderness areas and the entire eastern seaboard to mineral exploration as irresponsible. He also thinks it would be a foolish mistake for the Interior Secretary to auction off public land greater in size than the State of North Carolina.

Mr. Speaker, Secretary Watt would have us believe that his policies are part of a devine plan. In Mr. Dockery's view, however, the Secretary's policies are rooted in nothing greater than "self-interest, ignorance, shortsightedness, and greed."

Mr. Speaker, I would urge my colleagues to take the time to read this article. I believe they would find it worthwhile. Mr. Dockery is chairman of the North Carolina Chapter of the

Sierra Club and is quite knowledgeable in matters affecting the environment. The article follows:

WATT'S AMERICA: OIL RIGS, STRIP MINES

A billion acres offshore for lease and 35 million acres onshore for sale. Contact Interior Secretary James Watt, Washington, D.C.

P.S. Get a piece of wilderness before it's too late.

The Interior Secretary is responsible for all the nation's public lands, except the national forests over which he has jurisdiction for oil and mineral activities. He is also responsible for federal oil and mineral interests in the outer continental shelf. Some of these public lands and coastal areas are available for a variety of private uses—from cattle ranges to oil and mineral development. It is the responsibility of the Secretary to represent the public interest in the Interior Department's management of these lands.

The balanced approach of the Interior Department under many prior administrations, Republican and Democratic alike, has been radically reversed by Mr. Watt's pro-development policies. The fox is now guarding the hen house and trying to hand out the fat hens. Three proposals show Watt's hand.

Changing years of bipartisan department policy, Watt deliberately sought to open wilderness areas for mining and drilling. The oil companies leaped in with about 1,000 applications for over 3 million acres of these special places including Joyce Kilmer-Slickrock Wilderness Area and Linville Gorge in North Carolina. A storm of protest arose. To block Watt, the House of Representatives by an incredible 340-58 margin passed a bill closing wilderness areas to oil and mineral leasing (in the absence of a special presidential declaration of national need and with the consent of Congress. All North Carolina congressmen (expect Walter Jones, D-1st District, who did not vote) voted in favor of protecting our wilderness resources. The bill now moves to the Senate where it has 52 sponsors—a majority. Probably no single congressional action during this administration so strongly shows the extensive public support for wilderness and conservation policies in the face of Watt's pro-development policies. Opening the wilderness areas is unnecessary anyway. These areas are estimated to contain only 1 to 3 percent of our undiscovered oil and gas. If we become so desparate that we need to despoil our wilderness areas, wildlife refuges and other national treasures, let us at least wait and use them last. If any oil is there now, it will be there later.

Watt has proposed leasing nearly all of the nation's outer continental shelf over the next five years, about 1 billion acres. To understand the staggering scope of this proposal, the yearly acreage—200 million—is 10 times more acreage than has been leased in total since offshore leasing began in the 1950s. The plan is environmentally irresponsible. Such huge tracts would make the environmental assessment process unmanageable or render it superficial. Many coastal states, including North Carolina, are concerned as to the possible damage to their other coastal resources, including tourism and fishing. Also, Watt's scheme is financially irresponsible. The oil market is depressed and glutted. A recent sale of offshore tracts brought bids on less than 10 percent of the tracts offered and at the lowest yield per acre in 28 years of federal leasing. There is a practical limit to the amount of drilling the oil companies can handle each year considering manpower, drilling rigs and capital. If acreage vastly greater than the industry can explore and develop is thrown upon the market, our national resources will be squandered at cheap prices.

Over the next five years the government proposes to sell 35 million acres of "surplus" federal land. This acreage is greater than the entire state of North Carolina. Granting that some scattered sites are appropriate for disposition, cerainly there is no "surplus" equal to the combined states of Maine, New Hampshire, Vermont and Massachusetts. The public domain should be kept for the public use. The current administration is proposing to ape the foolish spendthrift who, not living within his income, commences disposing of his principle.

What are the motives for Mr. Watt's actions? As the kids today say, where is he coming from?

Mr. Watt has indicated the he believes he is following Divine sanctions. Watt said, "My responsibility is to follow the Scriptures, which call upon us to occupy the land until Jesus returns." This he implied may be quite soon. It is worth pondering whether the loving Heavenly Father which the Scriptures teach created the earth and all its inhabitants, wants his creation to be treated as an occupied land where the rich and powerful govern.

Watt's theology appears to ignore the great biblical themes that man is merely a tenant of God's creation with stewardship responsibility toward all of creation. The effect of Mr. Watt's use-it-now theology is a denial of concern or responsibility for the future; a denial that our children and grandchildren will inherit the fullness of the earth (Psalms 24).

I am inclined to the view that Watt's actions more likely arise from plain old-fashioned greed rather than pious concepts. The Sierra Club has said "Watt-ism may be new in its audacious scale and speed, but at the heart of this assault are old, old enemies the Sierra Club has been fighting for almost a century: self-interest, ignorance, short-sightedness and greed." It is perfectly legitimate for corporations to operate for profit and self-interest. In fact, some people, including economist Milton Friedman, argue that the sole and sufficient duty of corporate management is to maximize profits. But the public interest in the federal lands includes, among other things, watershed protection for safe and permanent water supplies, wildlife protection, a perpetual forest resource, soil conservation and recreation. The current administration has extolled supply-side economics with its "trickle down" theory whereby everyone is supposed to benefit from the invigorated activities of businesses aided by tax and regulatory reforms. It might work in economics but there is certainly no basis to believe that the public interest in the conservation of natural resources trickles down by turning over the public lands to private interests for maximum exploitation. In fact, the history of the 19th century shows just the opposite. What trickled down was denuded forests, eroded lands and abandoned strip mines. It was in the face of these abuses that Congress established the national forest system as well as wildlife refuges, national parks, national seashores, the national wild and scenic river system, wilderness areas and passed a wide spectrum of laws to protect these resources and our environment.

Watt is out of touch with the American mood with his meat-ax approach to the public lands and environmental protection. Poll after poll shows great bipartisan support for strong governmental actions to protect the environment. Watt is poorly serving his party and the American public. By ironic fate, however, the conservation organizations have benefited from Watt. Their memberships have grown dramatically as many more Americans are responding to the obvious threat posed by Watt and Company. This fallout, however, is a blessing the conservation organization would just as soon forgo, given the price.●

EARLY FIRE ALERTING SYSTEM FOR DISABLED

HON. JOSEPH P. ADDABBO

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Wednesday, September 22, 1982

● Mr. ADDABBO. Mr. Speaker, I would like to take this opportunity to share some very important information with my colleagues.

The National Institutes of Health and other authorities estimate that over 1 million Americans suffer significant mobility impairment as a consequence of muscular dystrophy or other neuromuscular disorders. Until now these disabled citizens have been forced to rely constantly on other people for assistance in life-threatening situations, such as fire. Collectively, they suffer a disproportionate percentage of fatalities and severe injuries caused by fire each year in the United States, where we lead the world with over 9,000 fire deaths.

Gratefully, the International Association of Fire Fighters, in cooperation with the Musclar Dystrophy Association, has undertaken a new initiative to better safeguard our fellow citizens through the development of an early alerting system in the event of fire or medical emergency. This commendable effort undertaken by two disparate and cooperating organizations is being done without public funds. Placing complete reliance on voluntary efforts and private donations, the program promises a new life safety system that will substantially limit the needs and dependence of the disabled on others more fortunate. With expanded use, the system will afford an even greater degree of independence and confidence.

Such efforts are worthy of praise and encouragement by this Congress and I move to publicly commend both the International Association of Firefighters and the Muscular Dystrophy Association work.●

STATEMENT ON H.R. 6458, REAUTHORIZATION OF FEDERAL ALCOHOL AND DRUG ABUSE RESEARCH

HON. LEO C. ZEFERETTI
OF NEW YORK
IN THE HOUSE OF REPRESENTATIVES

Wednesday, September 22, 1982

● Mr. ZEFERETTI. Mr. Speaker, on September 20, 1982, the House passed under suspension of the rules H.R. 6458 which extends for 3 years the authorization of appropriations for alcohol and drug abuse research by the Federal Government.

As chairman of the Select Committee on Narcotics Abuse and Control, I want to express my support for this legislation, particularly the provisions of H.R. 6458 that authorize funds for drug abuse research activities conducted by the National Institute on Drug Abuse (NIDA). The bill provides $47 million for these purposes in fiscal year 1983, $53 million for fiscal year 1984, and $59 million for fiscal year 1985.

Drug abuse continues to be one of the Nation's most pervasive and serious public health problems, particularly among our young people. In addition to controlling the supply of illicit narcotics and other dangerous drugs, the resources of our country—both public and private—must be directed toward efforts to reduce the demand for these substances. The consolidation of categorical drug abuse services programs into a new Alcohol, Drug Abuse and Mental Health Services (ADM) block grant has resulted in reduced Federal financial support for drug treatment, rehabilitation and prevention programs and has significantly decreased Federal involvement in the delivery of these vital services. Federal responsibility for providing national leadership in the area of demand reduction, however, has not and cannot be diminished. A continuing Federal commitment to demand reduction efforts is essential to stimulate non-Federal support for drug treatment, rehabilitation, and prevention programs and to carry out a number of critical functions that States and the private sector cannot reasonably or practically undertake on their own.

Drug abuse research is the heart of the Federal Government's responsibility for national leadership in reducing the demand for drugs. Acquiring new knowledge about how drugs of abuse work in the body and understanding the underlying causes of drug abuse are fundamental to developing more effective approaches to prevent and treat drug abuse. Moreover, assessing research priorities, providing financial support and direction for a national drug research program, and disseminating the findings of this research can only be done effectively at the Federal level.

As the lead Federal agency for drug abuse research, NIDA is responsible for providing the national leadership needed to expand our knowledge of the health and other factors involved in drug abuse and to translate this information into more effective drug treatment and prevention strategies. NIDA's other important functions include: Collecting and analyzing data on national drug abuse trends; disseminating information to increase public awareness of drug abuse problems; promoting new and more effective treatment and prevention techniques; providing technical assistance; and supporting research training.

Recent budget cuts have severely weakened NIDA's ability to fulfill its national leadership responsibilities for demand reduction. With respect to research activities, the 1982 research budget is nearly 25-percent less than the funds allocated for research in either fiscal year 1980 or 1981. This decrease is 30 to 40 percent if the effects of inflation are included. In fiscal year 1982, NIDA expects to award only nine new extramural research projects compared to an average annual level of 78 for all previous years.

Any further reductions in NIDA's research budget, or even freezing NIDA's budget at current levels, would irreparably harm our Nation's drug abuse research program. NIDA would be forced to phase down or out important parts of its research program, and its ability to fund research in new areas of emerging importance would be greatly limited. These developments would, in turn, restrict NIDA's ability to attract qualified new researchers into the drug abuse field and cause scientists already in the field to switch to other research areas that will be supported. Consequently, the pool of scientists doing drug abuse research would decline, and the quality of NIDA's research program would suffer. Rebuilding the program, once such cuts are made, would require a number of years. We cannot afford to neglect our drug abuse research program, the core of the Federal Govenment's demand reduction efforts.

The authorizations provided in H.R. 6458 for NIDA's research programs are sufficient to raise the Institute's research activities to nearly the levels prior to 1982. For fiscal year 1983, the $47 million authorized is approximately a 13-percent increase over 1982 funds. This amount will permit NIDA to support its ongoing research efforts and fund 63 new projects, and requested by the administration. The bill also will enable NIDA to increase research support in two of its highest priority areas, marihuana and cocaine. For fiscal years 1984 and 1985, H.R. 6458 will allow modest real growth in NIDA's research resources. Even with these increases, the annual authorizations for drug abuse research provided in this bill will not exceed the 1980 level of funds until 1985. The amounts in H.R. 6458 are a small price to pay when compared to the benefits of drug abuse research and the costs of providing anything less for NIDA's program.

This legislation involves a number of other issues I would like to address. First, I am pleased to note that the committee report on H.R. 6458 calls upon NIDA to allocate a higher priority during the next 3 fiscal years to expanding research activities in prevention, particularly with regard to stimulating innovative services demonstration projects involving young people. Moreover, to assure greater attention to such prevention research activities, the bill requires the NIDA Director to establish an office to administer and promote the Institute's prevention research programs. This increased emphasis on prevention research and demonstration is also reflected in the provision of the bill establishing an Assistant Administrator of the Alcohol, Drug Abuse, and Mental Health Administration (ADAMHA) to be responsible for promoting and coordinating the prevention research programs of ADAMHA's constituent agencies, including NIDA.

Influencing young people away from drugs offers the greatest opportunity to reduce substantially the heavy toll that drug abuse extracts from individuals and society as a whole. By placing a higher priority on sponsoring projects to demonstrate new and promising prevention approaches, the Federal Government can make the most efficient use of its limited resources and at the same time provide strong national leadership in promoting prevention efforts at the State and local level. For these reasons, the select committee's comprehensive drug control program, included in our annual report for 1981, recommended extension and funding of the specific demonstration authority first enacted for NIDA in the Omnibus Budget Reconciliation Act of 1981 (Public Law 97-35, sec. 970). Recognizing that reauthorization of this separate program at this time may not be advisable given current economic and fiscal considerations, I commend the Energy and Commerce Committee for the efforts it has made in this legislation to enhance the priority accorded prevention demonstration research projects.

Second, the report of H.R. 6458 also states the committee's strong objections to the Department of Health and Human Services (HHS) proposal to transfer administrative responsibility for the ADM block grant from the ADAMHA Administrator to the Assistant Secretary for Health. I want to express my complete agreement with the committee's position and urge the

HHS Secretary to leave administration of the ADM block grant in the hands of the ADAMHA Administrator, who is best suited to oversee the transition to the new block grant.

Finally, H.R. 6458 replaces a number of separate reporting requirements concerning NIDA's activities with a new requirement for a single, comprehensive report from the HHS Secretary to Congress every 3 years. This report is to include information on the health consequences and extent of drug abuse in the United States, drug abuse research findings, and the Secretary's recommendations for legislative and administrative action. As a result of this change, the current requirement for a biennial marihuana and health report from the Secretary to Congress is repealed.

I want to emphasize that the elimination of this separate requirement for a report on marihuana and health should in no way be viewed as an expression of diminished congressional interest in the development and dissemination of accurate and current public information on the health consequences of marihuana use. We are just now beginning to recognize the serious harm that can result from marihuana use, particularly to our young people. The need for increased public awareness of the dangers of marihuana use is great, and the demand for information is strong, sparked by the burgeoning parents' movement across the Nation. Results of recent NIDA surveys of high school senior drug abuse offer the most encouraging evidence of the value of public information about marihuana and health. After years of unprecedented growth, marihuana use among this group of young people has declined for the past 2 years in a row. This drop has been particularly dramatic for daily use of marihuana. These changes are attributed in large part to the increased health concerns related to regular use of this drug expressed by a substantial and growing number of young people.

In light of the above, I would expect the new triennial report required by this bill to continue to devote substantial attention to the health consequences of marihuana use. I would also expect that NIDA and the HHS Secretary will continue to report significant new information about the effects of marihuana on health to Congress on a continuing basis and will use all means available to disseminate such information to the public in a timely manner.●

THE EXTRADITION ACT: H.R. 6046

HON. ARLEN ERDAHL

OF MINNESOTA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, September 22, 1982

● Mr. ERDAHL. Mr. Speaker, I rise to express my concern for H.R. 6046, the Extradition Act of 1982. Earlier in this session I expressed my reservations to this bill in a supplemental view to the Foreign Affairs Committee report. I hope my colleagues will take time to read these objections.

While I support efforts to reform extradition procedures, I believe there are flaws in this legislation. First, section 3194 of the bill strictly defines what does not constitute a political, that is extraditable, offense. Such limitations remove the significance of the exception. The "extraordinary circumstances" clause provided is not well defined and may not prove to be an adequate safety provision.

Second, the bill would give the Secretary of State judicial responsibilities in determining whether extradition is sought because of a person's "political opinion, race, religion, or nationality." Finally, it is possible that arrests and detentions could occur simply on the basis of accusations by foreign governments.

I appreciate the concern of my colleagues supporting reform in the current extradition law and their desire to pass H.R. 6046. I only hope the House will see fit to give the legislation the time and careful consideration it deserves.

Mr. Speaker, for over 200 years the United States has served as a haven for persons escaping tyranny and oppression in foreign countries. It is vital that, with any new extradition law, this country protect the rights of those individuals seeking shelter and maintain our Nation's peerless record of respecting human rights.●

SPECIAL MEMORIES FOR A SPECIAL LADY—MRS. GUSSIE JONES

HON. LOUIS STOKES

OF OHIO

IN THE HOUSE OF REPRESENTATIVES

Wednesday, September 22, 1982

● Mr. STOKES. Mr. Speaker, it is a signal honor and tremendous pleasure for me to join with the multitude of friends of Mrs. Gussie Jones in saluting her on her retirement from the Ohio Bell Telephone Co. My cherished friend, Gussie Jones, retired in August 1982 after 32 years of service. This testimonial and retirement dinner, entitled "Memories for Gussie," on September 24, 1982, in Cleveland is a token of thanks and admiration for the contributions of this dynamic human being.

Mr. Speaker, the persons participating in the retirement dinner for Mrs. Gussie Jones have a fountain of fond memories and feelings for her. She has been a source of strength in the community for many years. A native of Cleveland, Gussie Jones has worked each day of her life to pave the way for a better future for her neighbors and friends. With all due candor, I can think of few people in the Cleveland metropolitan area who have had the widespread impact on the lives of so many people as Mrs. Gussie Jones.

Mr. Speaker, she has been a respected employee and a role model on her job with the Ohio Bell Telephone Co. for the past 32 years. At the time of her retirement, Gussie Jones was an assistant manager in the general services department of the company. Within the company, she was a member of the Ohio Bell Speakers Bureau in which she gained a reputation for her outstanding speaking ability. As an orator, Mrs. Jones was the recipient of numerous awards from the Spellbinders Club which is also an Ohio Bell speakers group.

In addition to her distinction as a public speaker at the Ohio Bell Telephone Co. Gussie steadily climbed the corporate ladder and scored many "firsts" in the company. Mr. Speaker, that had been the legend and unique way of Mrs. Gussie Jones. She has always been at the forefront of things and is truly a lady of "firsts" and numerous achievements.

So, Mr. Speaker, I view the testimonial for Gussie Jones on September 24 as more than just another retirement dinner. It is, in my estimation, a celebration of her life and contributions.

It is also an acknowledgement of the valuable tools and inspiration she has given to those who have come into contact with her through the job, her church, her family, and community organizations.

In each of these facets, Gussie Jones has been a guiding light for those around her. Inspiration and involvement have been the trademarks of the life of Gussie Jones in the Cleveland metropolitan area. Memories for Gussie Jones on September 24 will be a voyage through her life with special attention being pointed to the many acts of kindness and love she has spread through her many friendships and associations.

Moreover, Mr. Speaker, the occasion will not only be a tribute to the kind of service she gave to the Ohio Bell Telephone Co. but also to the unceasing service she has rendered to our church, the St. Paul A.M.E. Zion Church in Cleveland. Every since I can remember, Mrs. Gussie Jones has been a powerful force and true servant of the Lord through this church. Her

reward for faithful service came in 1979 when she was named "Exhorter" for the African Methodist Episcopal Church. This is a position of honor and tremendous responsibility in the A.M.E. Zion Church. She was the first woman in modern day to obtain this title which is still another one of her "firsts."

Additionally, at St. Paul A.M.E. Zion Church, Gussie Jones is involved in many organizations including her position as the chairman of the Scholarship Fund Committee, chairman of the Memorial Committee and narrator of the Cleveland Mass Choir. It is obvious, Mr. Speaker, that Mrs. Gussie Jones is a dedicated church worker and soldier for the Lord.

Mr. Speaker, Gussie Jones, more than any person I know, radiates her own unique sense of charity, involvement and Christianity through all of her associations. Her character and deeds have earned her the respect of persons from all walks of life.

She has served the community through her membership in the 21st Congressional District Caucus and has served on many occasions as my special representative at many functions in Cleveland. She also serves as the chairman for the Speakers Bureau for my campaign committee. Additionally, Mr. Speaker, she is an active member of the League of Women Voters and the Iota Chapter of Tau Gamma Delta Sorority, Inc.

In conclusion, Mr. Speaker, it is abundantly clear that Gussie Jones is a lady of "firsts" in the Cleveland metropolitan area. It is a very special privilege for me to join with the hundreds of former work associates, church members and friends is saluting this very special lady. Everyone who knows Gussie Jones loves her. This is due to the fact that she has brought us all some very special memories. On September 24, we will come together to acknowledge that during the dinner entitled, "Memories for Gussie."

At this time, I ask my colleagues to join me in salute of my dear friend, Mrs. Gussie Jones.●

FALKLANDS FALLOUT

HON. WILLIAM F. GOODLING

OF PENNSYLVANIA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, September 22, 1982

● Mr. GOODLING. Mr. Speaker, I would like to insert in the RECORD an analysis of the after effects of the Falklands crisis for the United States which appeared in the Council on Hemispheric Affairs' Washington Report on the Hemisphere. The analysis, I am proud to say, was written by a native of my constituency, Peter J. Swavely, formerly of Carlisle and now a Washingtonian employed by the COHA. The analysis is balanced and is, I believe, an accurate representation of how we are viewed by our fellow American nations in the aftermath of the Falklands crisis.

FALKLANDS FALLOUT

PART ONE

(By Peter J. Swavely)

Some two months after the cease-fire that ended the Falklands war, Uncle Sam treads lightly in South America, but the cathartic realignment of Latin American loyalties which was widely predicted at the height of the conflict has as yet failed to materialize. Many Latin American countries, realizing the importance of their economic ties to western Europe and the U.S., have been less outspoken in their condemnation of Washington since the crisis ended. Nevertheless, U.S. support for Britain in the war has caused "the scales to fall from the eyes of moderate and even conservative Latin American leaders," according to one observer. The problems faced by the U.S. in the hemisphere have been made more daunting, and moves toward Latin American independence of the U.S have been accelerated by the Falklands episode. It is widely believed that, for the near future, a more fundamental mistrust of the U.S. will be a feature of Latin American politics.

Latin America remains united in its insistence on Argentine sovereignty over the Falklands/Malvinas, and as the struggle shifts to the U.N.'s Decolonization Committee and General Assembly, Latin Americans will be watching the United States closely for signs of support. So far, however, the U.S. has maintained a cautious silence regarding the eventual status of the islands. Because Argentina has as yet refused to recognize anything other than a de facto cessation of hostilities, the problem has been complicated for those in the State Department who are eager to rebuild their hemispheric credentials by pressing the British for some moderation on the sovereignty question.

But the British remain adamant, maintaining that the Argentine aggression destroyed any prospects for early negotiations. In addition, Britain is taking steps to permanently garrison the islands with a "credible" force to prevent any future Argentine action. As long as the Argentines refuse to end hostilities officially, the British will continue their interdictory control of the islands' waters and airspace. But if the Argentines were to renounce the possibility of further military action, Britain would still not waiver from its policy of reestablishing firm control over the islands, at least as long as the Thatcher government holds office.

In the face of enthusiastic expressions of Latin American solidarity on the Malvinas issue the U.S. approach to mending relations with the region has been cautiously bilateral. Lake a number of European countries, the United States was quick to lift economic sanctions imposed against Argentina during the conflict, and has apparently had some success in soothing the tempers of the Argentine generals. President Reynaldo Bignone and army commander Christino Nicolaides are seen in Argentina as receptive to U.S. efforts to normalize relations. The Reagan administration, however, seems to appreciate the delicacy of the situation and is being careful not to identify itself with any one faction in Argentina, fearing that to do so would be "the kiss of death" for any favored group or policy bearing Washington's hallmark.

Peru, which along with Venezuela and ex-President Aristedes Royo's Panama was one of the most strident supporters of the Argentine cause, also seems to have muzzled its sentiments if not its rhetoric. Recent reports of a U.S. plane deal, although denied, are indicative of Peruvian President Belaunde's interest in maintaining good relations with the U.S. in the face of a severe economic crisis and growing difficulties with internal terrorism.

Indeed, the region-wide economic crisis probably has been one of the factors in the Latin Americans' failure to make any dramatic gestures of independence from the U.S. whose bilateral aid programs and domination of multilateral institutions, such as the IMF, are essential to the region's stability.

Colombia, whose moderate tone during the Falklands war reflected its close relationship with the U.S., will surely play a more significant role in U.S. policy in the region. Vice-President Bush's attendence at the August 7 inauguration of President Betancur signalled Washington's hopes for a new role for Colombia as Washington's democratic hand-maiden in Central America. This role was previously played by Venezuela, where President Herrera Campin's strong support for former Salvadoran Junta president Jose Napoleon Duarte and U.S. Central American policy in general had earned for it the image of Uncle Sam's diplomatic "gendarme" in the region.

Venezuela, unhappy over this image and disapponted by the Christian Democrats' loss of power in El Savador, is distancing itself from U.S. policy in the area and improving relations with both Cuba and Nicaragua, where the Venezuelan president was the sole foreign head of state to speak at the third anniversary of the Sandinista revolution.

Predictions of the demise of the OAS appear to have been unfounded, but the Latin American Economic System (SELA), long considered a paper tiger, has been strengthened by the Falklands/ Malvinas controversy. Based in Caracas. SELA has emerged as a leading forum for Latin American unity. In July, SELA's "action Committee for Aid to Argentina" met in Buenos Aires to discuss possible Latin American responses to the continuing economic embargo against Argentina, as well as regional assistance to Argentina's troubled economy. In this opening statement to the Buenos Aires meeting on July 26, SELA Secretary General Carlos Alzamora, a Peruvian, said "the Malvinas Islands crisis has taught all of us a major lesson, that is, that the Latin Americans can only rely on Latin Americans in the hour of truth."

Alzamora's remark expresses the prevailing mood in South America. The conflict has not only strengthened the growing sense of independence in the region, but has kindled a re-born sense of Latin American unity. Argentina itself—not noted for any strong feelings of solidarity with the rest of Latin America—has, since the crisis, gone out of its way to prate its gratitude for the support of its neighbors, and has generally become a promoter of Latin Americanism, including even Cuba in its generous embrace.—PJS

PART TWO

Chile, whose long-standing dispute with Argentina over the Beagle Channel led it to tacitly support Britain during the war, has

been one of the notable exceptions to the rhetorical backslapping and hypocritical displays of Latin American "solidarity" that have characterized the region since the conflict. Indeed, the Chilean ambassador in Buenos Aires has been busy since the cessation of hostilities denying numerous reports of clandestine cooperation with the British. This has not been lost on Washington, and there is growing speculation on Capitol Hill that the Reagan administration is now anxious for Chile to assume the role of "anti-communist bulwark" for which Mrs. Kirkpatrick and the State Department had been grooming Argentina. There have been rumors that the administration will soon move to renew military aid to Chile, suspended in 1977.

Apparently, the Reagan administration has not learned the real lesson of the Falklands War—that snuggling up to military dictatorships is a dangerous, as well as unprincipled, policy. Indeed, there has been no indication that the State Department has recognized its central role in inadvertently leading the Argentines to believe that they were too important to U.S. policy interests in the region to be sacrificed for the sake of a few tenuously held British islands. Thomas Enders, assistant secretary of state for inter-American affairs, has said that the reason the Argentines did not heed U.S. warnings was because "It is difficult to have credibility with a country unless one has strong links to it."

Aside from the noisy defection of Venezuela from the loyal flock, the Reagan administration has had considerably greater success in Central America and the Caribbean in minimizing the fallout of the Falklands War. Panama, whose independent foreign policy on El Salvador, Nicaragua and Cuba had become a source of growing concern to Washington, has undergone a "constitutional coup" in which President Aristedes Royo was ousted. The more conservative National Guard commander, General Ruben Dario Paredes, has emerged as the nation's strongman. Paredes has affirmed that no organization should be formed in this hemisphere without the participation of the United States, and is widely expected to more closely toe the Central American line drawn in Washington.

Close military ties with Honduras, which have turned that small country into Uncle Sam's point man in the Central American conflict, have been embellished by that country's participation, along with Costa Rica—now under the affable, if undistinguished leadership of Luis Alberto Monge—in the regional Central American Democratic Community (CDC). This curious body—called by former Panamanian President Royo "an arrow aimed at the heart of Nicaragua"—also includes El Salvador and Guatemala as its democratic devotees. Panama's membership under General Paredes would further strengthen the U.S. hand in the region.

Mexico, in dire economic straits, has been less active in regional politics than previously, prompting concern from those who admired its strong, independent line on Central America as expressed in the French-Mexican initiative of August 1981. Its stand during the Falklands War was subdued, condemning the use of armed force, but supporting in principle the Argentine claim to the islands.

President Reagan's push in Congress for passage of his highly-touted Caribbean Basin Initiative can also be seen, at least in part, as an attempt to reestablish U.S. credentials as a "good neighbor" in the wake of the war. An amendment to that measure by Sen. Steven Symms, R-Idaho, to use "any means necessary" to prevent Cuba's spread of revolution in the hemisphere, is indicative not only of continuing paranoia over Fidel's "adventurism," but also a reaction to the marked boost in Castro's stature in the hemisphere which was one result of Cuba's support of the Argentine cause.

Not only has Christian Democratic Venezuela, in its new role of anti-imperialist crusader, markedly improved its relations with Cuba, but Argentina herself has expressed its appreciation of Cuba's strong diplomatic support. In all the talk of newfound Latin American unity and solidarity, Castro's Cuba may be on the verge of casting off its pariah status among the moderate and even conservative governments of the region.

According to several observers, the fallout of the Falklands War will be most clearly apparent in the long-term attitudes of Latin American countries to U.S. initiatives in the region. In any event, Washington's cautious, bilateral approach has prevented any truly spectacualr degeneration of its relations with Latin America so far. But the U.S. can no longer count on automatic support in the OAS, for instance, and any future attempt to invoke the Rio Treaty (for collective hemispheric defense) against Cuba or any other leftist regime will not be taken seriously by its sister states in the OAS.

Before the Falklands, Argentina was regarded in Washington as a strong, secure, and reliable ally in the vigilant contest with hemispheric Marxism. Now, the country is a seething cauldron of economic crisis and political unrest.

Since assuming office on July 1, General Bignone has reversed the tight free market economic strategies of his predecessors and legalized political party activity. The economic situation continues to deteriorate, with the Argentine *peso* collapsing and the government scrambling to restore confidence by attempting to reschedule its massive foreign debt, now estimated at a staggering $39.1 billion.

The political future of Argentina remains mysterious. Racked by a wave of resignations—the most recent being that of navy Admiral Jorge Anaya—the military is also pestered by factionalism and low morale. The Peronist Party remains seriously divided, and any hope that a quick return to civilian rule would result in stability seems misplaced.

The U.S., still sucking its burned fingers, has so far maintained a low profile, but the Reagan administration has let it be known that it means to warm up its relations with Buenos Aires as soon as it is allowed to do so.—PJS●

GOVERNORS JOIN IN SUPPORT OF EXPORT-IMPORT BANK

HON. DON BONKER

OF WASHINGTON

IN THE HOUSE OF REPRESENTATIVES

Wednesday, September 22, 1982

● Mr. BONKER. Mr. Speaker, I am pleased to announce today that a coalition of 18 Governors has joined the effort to convince the administration and the Congress that further proposed reductions of the Export-Import Bank are false economy, and will cripple America's export competitiveness.

Proposals currently before Congress call for cutting the Bank's direct loan authority from $4.4 billion to $3.83 billion for fiscal year 1983, down 13 percent from fiscal year 1982, and 30 percent from fiscal year 1981.

The Eximbank is America's limited means of resisting the competitive disadvantages inherent in a global marketplace dominated by huge foreign government financing subsidies.

Today, Governor of Washington, John Spellman, announced the names of those Governors who have joined the Coalition for Employment Through Exports (CEE)—those who recognize that every 1 billion dollars' worth of exports means 30,000 jobs.

As Chairman of the House Export Task Force, I have learned to what degree our companies are at a competitive disadvantage in the world market. In 1980, some 5.7 percent of "Made in U.S.A." exports were financed through official Government credits. This compares with 44.3 percent of Japanese exports, 39 percent of British exports, and 27.2 percent of French exports.

To reduce the funding for the Bank as the administration proposed to do, at a time when our negotiators are attempting to convince our trading partners to limit their credit subsidies, amounts to unilateral credit disarmament.

As Governor Spellman noted today, the outcome of the Eximbank debate will send a clear signal of what America's intentions are in the world marketplace, whether we intend to compete or not.

We should be talking about a major increase in Eximbank loan authorization levels as our best jobs-generating bet for a speedy and sustained economic recovery.

My colleague NORM DICKS and I have sponsored House Joint Resolution 456, which establishes the intent of Congress to fund the Bank at adequate levels to enable U.S. companies to compete with their subsidized competitors on an equal footing. In addition, I have sponsored H.R. 6562, to establish a $2 billion Eximbank "war chest"—this would let our trading partners know we are serious about competing in the world market.

I want to commend Governor Spellman for joining the debate. He was one of the original founders of CEE last February. The other Governors should also be encouraged to lend their voices to the debate over export financing. We will not experience true export recovery as a nation unless we realize our export potential.

Mr. Speaker, I would like to submit for the RECORD the names of those Governors who have lent their names to support of full Eximbank funding:

Governor John Spellman, Washington.
Governor Lee Sherman Dreyfus, Wisconsin.
Governor Bob Graham, Florida.
Governor Bruce Babbitt, Arizona.
Governor Frank D. White, Arkansas.
Governor William A. O'Neill, Connecticut.
Governor George Busbee, Georgia.
Governor George Ariyoshi, Hawaii.
Governor John V. Evans, Idaho.
Governor James R. Thompson, Illinois.
Governor John Carlin, Kansas.
Governor Harry Hughes, Maryland.
Governor Albert H. Quie, Minnesota.
Governor Hugh Gallen, New Hampshire.
Governor Hugh Carey, New York.
Governor James B. Hunt, Jr., North Carolina.
Governor Victor G. Atiyeh, Oregon.
Governor Dick Thornburgh, Pennsylvania.
Governor J. Joseph Garrahy, Rhode Island.●

PUBLIC AND PRIVATE: THE COMMON GROUND

HON. WILLIAM D. FORD

OF MICHIGAN

IN THE HOUSE OF REPRESENTATIVES

Wednesday, September 22, 1982

● Mr. FORD of Michigan. Mr. Speaker, in his address to summer graduates of the University of Michigan, Stanford University president, Donald Kennedy, made some observations about the cooperation between public and private universities and their common interests. He also addressed the importance of the Federal student aid programs in giving students the freedom to attend institutions best suited to their career goals. I commend Dr. Kennedy for his thoughtful remarks and urge my colleagues to review them.

PUBLIC AND PRIVATE: THE COMMON GROUND

(By Donald Kennedy)

President Shapiro, Regents, Guests, and Fellow Alumni-to-be, it is good to be back in Michigan. This morning someone asked me: "Why are you here?" It sometimes helps, in responding to a difficult inquiry, to answer only the stated part of the question while avoiding its real import. Thus the celebrated thief Willie Sutton, when asked why it was that he robbed banks, replied "Because that's where the money is."

So I could say that I am here because, being an ex-resident of Ann Arbor and the proud owner of 28 credit points from this university, I wanted to close a circle. And I am here also because of my admiration for your President, who asked me. Since every man is a prophet without honor in his own country, you may not know that Harold Shapiro owns a degree of national respect among his peers—those of us, that is, who practice the possibly masochistic craft of running universities—that is truly enviable.

Now, you will instantly recognize that as a Willie Sutton answer. I explained why I came, but what the questioner may have wanted to know is: "Why did they ask you?," or perhaps even "Why did they ask you?"

I honestly have no idea, but I will offer a confident speculation. I suspect Harold may have believed that the president of a major private university might have something useful to say to the graduates and friends of a major public university at this very critical time—something, perhaps, about the arrangements we have made in this society for the support of higher learning, about the current threats to the quality of our enterprise, and about the roles of the public and private sections in guaranteeing its future safety. I certainly hope such a thing like that was on his mind, because that's what I intend to talk about.

I want to begin with an account of the differences and similarities between this institution and the one I represent. The comparison could as well be between Harvard and the University of California as between Stanford and Michigan; it generalizes to the form "what is different, and what alike, about the private and public institutions of highest rank?" More specifically, what can be said about the congruence of purpose, style, execution, and quality between my distinguished middle-sized private California university and this distinguished public institution with three times the enrollment and twice the operating budget?

Much has been made of the public-private difference, usually by private educators. William Rainey Harper, first president of the then-embryonic University of Chicago, used to refer to its neighbors in the nascent Big Ten as "the great engines of public instruction." He pictured Chicago as a fragile object of great worth, in constant danger of geing trampled by heedless hordes. The tactic of portraying public institutions as less sensitive and somehow less dedicated to excellence has not, I suspect, entirely disappeared from the repertoire of private university presidents, expecially near the end of fund drives.

But in Harper's time there was little distinction between the social purposes of public and private educational institutions. The first president of Stanford, David Starr Jordan was President of the University of Indiana in 1890 when Senator Leland Stanford came to Bloomington for the purpose of wooing him to California.

The day Stanford arrived, the object of his search was out of town. Where was Jordan? In Urbana, giving a speech on the importance of the State university! In it he praised the growth of the State university as "an institution existing for all the people, and for no end except the purpose of public instruction." But he then pointed out the similarities between their fundamental aims and those of the existing, largely church-related private colleges: "In its early years the State university was, in aim and method, almost a duplicate of the denominational schools by which it was surrounded." True to those beliefs, he founded at Stanford a private university at which—to the amazement of every contemporary Stanford parent to whom I recite the story—there was no tuition. Indeed the Stanford of 1895 was different in few significant ways from the neighboring, somewhat older University of California across the Bay.

The private universities have, however, always contributed the values of independence and pluralism to higher education in America. In particular, I think they have a special role associated with their status as trusts—an obligation to hold, for the indefinite future, domains of knowledge, resources, or views that might be allowed—or made—to vanish if they were more publicly responsible. As a complement, the State institutions have their particular dedication to public service, to reaching out.

But the more striking attributes of Stanford and Michigan, I would argue, are ones that they share. Along with a handful of other universities, public and private, they have a deep commitment to the acquisition of new knowledge that accompanies their responsibility for disseminating the old. They are, accordingly, called "research universities." The two institutions we're talking about, along with perhaps ten others, are responsible for a large proportion of the innovation in this society. They consume most of the Federal funds for basic research, produce most of the original work and collect almost all the Nobel prizes, generate a substantial fraction of the applications that make U.S. agriculture and industry work, and are responsible for a good deal of cultural creativity as well. Such places are the center for quality graduate and professional education in the Nation, because we discovered nearly a century ago that training of that kind prospers best where original work is also conducted. The policy of brigading graduate training and research—establishing what Suny Bergstrom has called the "democracy of American science"—has made our research enterprise the most productive in the world.

The pursuit of that wise national policy has had a cumulative result that now virtually submerges one traditional distinction between private and public as it applied to places like Stanford and Michigan. So important and pervasive is support from the national government that it would not be unfair to call each of us Federal universities, especially with respect to the functions of research and graduate training.

A second area of similarity has to do, oddly enough, with how education is paid for. Most people think of private institutions as expensive, and as supported from private sources. But State revenues do not meet most of the costs even of in-state undergraduates in an institution like this one: board and room, some tuition and fees, and incidental expenses, must be met—largely, again, from private sources. And in a private university like Stanford, conversely, over half the undergraduates receive part or all of their expenses in the form of financial aid, mostly derived from private philanthropy, but some of it from public funds.

In short, private and public payers are sharing the load in both places. Michigan and Stanford undergraduates—especially those who happen to be members of minority groups, or who come from the less affluent part of American society—depend upon direct aid and tax policies that have emerged from a carefully-developed national policy designed to improve access to higher education. That policy, crafted by the Congress over several decades and embodied in the Higher Education Act of 1965, is based upon two main premises. The first is that human resources are critical to the Nation's future, and that it is against our interest to exclude groups of people from contributing to that future simply because race or economic circumstances have handicapped them.

The second premise is that diversity itself is an important adjunct of the educational process. I explained that premise from Stanford's viewpoint in this way, in a letter to the Michigan parent of one of our undergraduates: "(It is) our belief that students gain from one another a large fraction of what they take away from the college experience. If that is right, the composition of a student body—like the quality of the faculty and equipment in the laboratories—is an es-

sential part of the education we provide . . . (and) we invest (through financial aid) in its quality just as we invest in the quality of the faculty."

For both these reasons, a substantial national commitment has been made to guarantee access of our best young people to higher education—not only in private universities, but in the state institutions as well—where full financial aid may, despite the lower tuition, still amount to over half the bill in the expensive privates. Thus at Stanford and Michigan, at least in the seventies, Federal help was a substantial component of the financial aid mix for undergraduates. And for graduate students, of course, it loomed even larger.

But in the 1980's those Federal commitments are being unravelled. The direct campus-based student aid programs have been cut drastically, and the loan programs—in many ways the most important of all—have been made much less attractive. The more fortunate private universities have been able to fill in behind the Reagan retreat from educational opportunity by redeploying private funds; and as a result we are able to retain our commitment to meet the full demonstrated financial need of every student we admit to Stanford. But other private universities, even some that are considered relatively wealthy, have been unable to do so.

And paradoxically, the Administration's abandonment of past access policies has been even harder on the public institution—the ones nominally intended for all the people. As the New Federalism accomplishes its purpose to returning functions to the States—for the euphemism functions, read financial burdens—the public institutions face the double whammy of less direct Federal support for higher education, and harder-pressed State budgets. In economically troubled regions like yours, it is requiring heroic efforts just to keep afloat. Already minority enrollments in many of the public institutions has dropped alarmingly. It would not be surprising, though surely ironic, if the private universities turned out for a while to be society's most important academic reservoirs for ethnic and economic diversity.

Now, what is being offered by way of replacement help? More and more insistently, those who are dismantling the Federal higher education programs are recommending a new fix: it is tuition tax credits.

This program is designed to help parents pay for school or college by crediting the cost of tuition against their income tax; it is billed as "free choice," and purports to help the independent educational sector by offering tax incentives to private tuition-payers.

As one whose institution would theoretically stand to benefit, I want to leave no doubt about my distaste for the entire notion. It produces a thinly-spread immediate benefit that will not make the difference between anyone's attending and not attending a good school or college. And it sells out the whole notion of financial aid based upon need. What any responsible private college administrator ought to do with a tuition tax credit, if the Congress is foolish enough to pass one, is to recoup the funds through an extra tuition increase and reaward them as need-based financial aid. The purpose of Federal help with tuition is to make sure that the most capable Americans get to college, and tuition tax credits won't do that. They are thus not one bit better for Stanford than they are for Michigan, and I hope we can oppose them together.

Indeed, I would argue that we have much to join forces over. At the top of the list is the dismantling of the Federal support for access to higher education, about which I've just been talking. Next would be the cooperative defense of our service as research universities—centers of graduate training and of the production of new knowledge. Future productivity gains in this society will depend heavily upon the kind of intellectual capital our institutions are now providing.

To these I would add a third program, one on which you have, as a public institution, a rather better start than we. It is the need for the universities to support and encourage the quality of public education at all levels. In this area the great state universities have established a powerful tradition of benign influence. Few examples are more laudable than the extraordinary writing program run by Professor Daniel Fader in the College of Literature, Science and the Arts here, which extends into Michigan high schools. It has been widely copied, as it deserves to be.

Despite the existence of such programs in places like this, the general record of concern about public primary and secondary education in the great universities is disappointingly meager, and it promises to become worse as the schools of education continue to fall into neglect. We have decided to make a major commitment to a study of the schools at Stanford, an effort in which the Dean of Education and I are trying to involve a broad array of faculty members outside the School of Education in a project led from within it. Unless the significant institutions of higher education demonstrate an interest in this problem, we risk perpetuating a situation in which only the less able students contemplate teaching careers. Two years ago, those college students intending to serve in public education had test scores averaging more than 40 points below the mean for all students. We cannot tolerate that circumstance for very long.

Therefore I want to say to you, as I have said to our own new graduates, that teaching and other forms of public service deserve your serious attention. That is one of the three important convictions that I hope you have drawn from your time in this great university. It arises out of a sense of involvement in public purposes, a sense that is particularly alive in places like this one; and it arises also from an intellectual appreciation of the continuity between knowledge and its application for public benefit.

What are the other two? First I hope you have gained some personal experience with the extraordinary richness of a great university—for the complex and grand venture that is the search for knowledge. It is an opportunity available in only a few places. And second, I hope you will gain the strength of confidence in the abilities your own education has brought you. It is one thing to know, and quite another thing to be able to apply that knowledge to unique problems, over unfamiliar intellectual terrain. You are better able than you may know to do that.

So in conclusion, I wish you well in these three ways: I wish you the joy of discovering the extent of your capacities, the confidence to apply them broadly, and the will to employ them in the public interest.●

SOVIET-ETHIOPIAN AGGRESSION AT THE HORN

HON. JOHN LeBOUTILLIER

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Wednesday, September 22, 1982

● Mr. LEBOUTILLIER. Mr. Speaker, since the invasion of Angola in 1975 by Soviet-sponsored Cuban proxy forces, U.S. policy in Africa has tended to take a passive role. Nowhere has this been more the case than in the strategic Horn of Africa where, since 1977, Ethiopia and Somalia have been at war.

Beginning in July 1982, Ethiopia—a pillar of Soviet, Cuban, and East German adventurism—escalated its invasion of Somalia. Under the leadership of Col. Mengitus Haile, Ethiopia initiated a campaign designed to overthrow the regime of President Mohammed Siad Barre of Somalia and to establish Marxist control over the entire region.

In an article appearing in the Washington Times on August 17, 1982, Dr. Z. Michael Szaz, former associate professor of international law and relations at Seton Hall and Troy State University, and currently studies program director at the American Foreign Policy Institute, discusses this issue. He says that, without additional U.S. assistance, the poorly equipped Somali Army will be unable to withstand the increased level of aggression financed by the Soviet Union. Only with additional aid can the United States:

Secure the survival of an independent Somalia friendly to the West * * *, complete the containment of Ethiopia, and challenge the Soviet position on the Horn of Africa.

I commend Dr. Szaz' article to my colleagues as follows:

HORN OF AFRICA: AIDING SOMALIA, CONTAINING ETHIOPIA

(By Michael Szaz)

Ethiopia, the former ally of the United States, has become the pillar of Soviet, Cuban and East German adventurism in the strategic Horn of Africa area. The Soviets built air and naval bases at the Dahlak archipelago off the coast of Eritrea; 4,000 Russian "advisers" are attached to the Ethiopian military and government and 2,000 East Germans operate the secret police. 17,000 Cuban troops are deployed on the Ogaden to contain the guerrillas, and around Addis Ababa to prevent any anti-Soviet coup.

In August 1981, Col. Mengitus Haile Mariam's Marxist regime concluded a pact with Libya and South Yemen, the only Marxist Arab state, to receive development aid from Libya which the Soviets are unwilling to provide. The U.S.S.R. did deliver, however, more than $2 billion in military equipment since 1977. The pact with Col. Qaddafi, according to Jay Ross in the *Washington Post*, already netted $100 million for Ethiopia and brings Libyan terrorist know-how to the volatile Horn area and the Arabian peninsula.

Effective power in Ethiopia rests with Col. Mengitus and his six military aides. As there are no political transmission belts, the colonel is establishing a Communist party, still in embryonic stages. Its preparatory body, however, the Commission for Organizing the Party for the Working People of Ethiopia, held its third plenary session in November 1981, and Marxism-Leninism was declared state ideology three years ago.

Human rights are nonexistent. During the "Red Terror" of 1977-1978 ten thousand were assassinated or executed, and persecutions continue against the Ethiopian Evangelical Church (Menahe Yesus) and the Jewish community. In November 1981 its last church and property was confiscated by the government, leading to Swedish declarations that the $20 million aid for 1982 would be cut off unless the church and property are restored.

Stabilization of the outlying provinces by military force made progress, but the rebellions are far from over. Ethiopia, besides the U.S.S.R., constitutes the last remaining colonial empire. The minority Amhara tribe rules the majority Oromo tribe and also two ethnically unrelated nations: the Somalis of the Ogaden and the Eritreans. Eritrea was an Italian colony between 1860 and 1941. It was attached to Ethiopia in 1960 and has been in revolt ever since. In 1977-78 its two guerrilla groups controlled all the province except the capital and the major port. While they lost control of all but one town and some mountain redoubts, they still tie down Ethiopian forces as does the anti-Communist revolt in Tigray province.

A continuing problem remains Ethiopia's insistence upon controlling the Ogaden, a semi-arid province in the southeast inhabited by Somalis. To quote Anthony Hughes (May/June 1981 issue of *Africa Reports*): "The dominant ethnic group, the Amhara, exercises less authority in the region than in any other fief of their farflung empire. As late as World War II, the Ogaden was under military administration with British Somaliland, and today the Somalis of the Ogaden suffer under a rule from Addis Ababa even harsher than meted out to the rest of the country."

The results were large-scale revolt and ensuing war in 1977-78 and 2 million refugees entering Somalia from the Ogaden. Since the return of the Ethiopians in the wake of Cuban troops, guerrilla activity continues.

In July 1982 Ethiopia started an invasion aimed at overthrowing the regimed President Mohammed Siad Barre in Somalia. Col. Mengitus has harbored the "Somali National Salvation Front" in Addis Ababa since 1978 and claims future control of the Horn, including Somalia and Djbouti. The ultimate beneficiary would be the Soviet Union, by being able to deny access to the Bab el-Mandeb Straits by Western air and sea power. Mengitus unleashed some of his army and some Somali dissidents upon Galdogab and Balambele, opening a third front northwest of Balambele in early August. We are now airlifting some equipment to the Somali troops trying to defend their frontiers against Ethiopian aggression. In the meantime, President Daniel arap Moi of Kenya just survived an air force coup attempt which was certainly encouraged by Mengitus.

The situation endanges our national interests. While the loss of Ethiopia was probably preventable, there is no practical hope to remove the Soviets with or without Col. Mengitus' consent. The nostalgia of some government and congressional experts and members who hope for a return of Ethiopia to the Western fold is commendable, but illusory.

In view of the Ethiopian invasion of Somali territory, the second option to be taken up immediately is the containment of Soviet-Libyan influence in the Horn region. This would include accelerated arms deliveries to under-armed Somalia and an effective alliance between the Sudan and Somalia. While the Sudan is receiving increased economic and military deliveries, the case of Somalia necessitates quick and resolute action on our part, both by the administration and Congress.

It will be necessary for both of them to come to the same conclusion as in the case of the Sudan. We need to redouble our efforts to help Somalia economically and militarily. Besides accelerated arms deliveries of FMS already appropriated, the supplemental 1982 budget request of the administration should be agreed to by the House-Senate conference which, in the case of Somalia, includes an additional $10 million FMS and the Fiscal year 1983 foreign aid appropriations must include the higher level of FMS and economic aid (at least $30 million each). This way we would give a clear signal to the Soviet Union and Ethiopia that we would secure the survival of an independent Somalia friendly to the West. By doing so, we could complete the containment of Ethiopia and challenge the Soviet position on the Horn of Africa.●

LESSONS WE SHOULD LEARN FROM POLISH EXPERIENCE

HON. PAUL SIMON

OF ILLINOIS

IN THE HOUSE OF REPRESENTATIVES

Wednesday, September 22, 1982

● Mr. SIMON. Mr. Speaker, recently, I came across an article in the Notre Dame Alumni magazine, written by Georgie Anne Geyer, about "The Lessons of Poland."

It contains some commonsense, common not only for those who live in Warsaw, but for those of us who live in Washington.

Georgie Anne Geyer says, in my opinion correctly, that the West missed its opportunity to quietly but effectively take some actions to reinforce Polish independence. Instead, we made speeches.

In the article she says:

The West should also learn some lessons about its own economic wantonness. By the time the revolution came, Poland owed Western countries $26 billion. In one sense, this massive debt was an indictment of the country's Communist system; it was like the pregnant belly of an unmarried woman, obvious to all "decent" society. But in another sense, that debt was the illegitimate child of greedy Western bankers who throughout the 1970s lined up to lend Poland billions it knew it could never repay.

Still, once the revolution began, Poland's financial obligations could have been used in a variety of ways to tie the country closer to the West. However, during those 16 largely free-and-open months, the vocally anti-communist Reagan Administration could not arrive at any policy to accomplish that. Instead, every couple of months like clockwork, the administration's top people would issue dire predictions that the Soviets would soon invade. That is what passed for a policy.

A workable policy, of necessity, would have been of the long-term variety which the Reagan people have not shown themselves capable of developing. Such a policy would have included assurances to the Soviet Union that its security needs would not be challenged, coupled with subtle and deliberate efforts to tie Poland economically and culturally to the West. Instead of such a policy, we got a television extravaganza ("Let Poland Be Poland"). So Poland wound up tied ever more closely to the Soviet Union. The West, and particularly Washington, clearly lost the moment.

Georgie Anne Geyer gives us some sound advice, and I hope we start learning our lessons.

I urge my colleagues to read her article.

THE LESSONS OF POLAND

(By Georgia Anne Geyer)

During those last sullen weeks before martial law was imposed upon Poland last December 13, nearly everyone in Warsaw knew that the infectious hope of the Polish August of 1980 was lost. In the prevailing mood of restless futility, no one in the country could come up with the "formula" for ruling Poland that was necessary for that hope to survive.

I visited the country during the final autumn of Solidarity, when the predominant mood in Poland was paralysis. When I asked Marek Brunne, Lech Walesa's personal spokesman, a key question—"Who is in control of the country?—this exhausted, red-eyed young man almost shouted: "Noboty's in control! Nobody!"

Everywhere in that courageous country, those final weeks of a 16-month ear which will become the stuff of legends, I could see the valiant gamble of Solidarity being squandered. Now, six months later, as renewed turmoil erupts in Warsaw, it is time to ask from an appropriate distance: What went wrong in Poland? Who threw the final dice in the gallant game? Who spun the roulette wheel in its last ideological round? What, in short, are the lessons of those brief, incredible 16 months?

The search for lessons much begin with Solidarity itself, that extraordinary organization of 10 million Poles which, beginning in August 1980, grew from a band of shipyard strikers in Gdansk into a historic movement aimed at building checks and balances into a totalitarian system. Alas, when the moment of truth finally came in December 1981, this astonishing organization showed that it was better at organizing its members than at plotting its survival. Indeed, Solidarity's failures at that crucial moment were colossal.

In those final weeks, the movement virtually went mad. Its membership largely ignored Lech Walesa, their good and reasonable leader who for months had warned them constantly against going too far. Its intellectuals met clandestinely all over Poland in a doomed effort at reorganizing the old prewar political parties, and then called for a referendum on the country's government and even on its military ties with the Soviet Union—a move which every sober observer knew would prove fatal. For its efforts to build a "new Socialism" in Poland, Solidarity required control. In the end, control was sacrificed to passion.

The fact that the Communist military government last year was planning a military crackdown should have surprised no one. But when the military finally did take over, it became clear that Solidarity did not have a contingency plan for such an obvious eventuality. Solidarity depended for communications on the nation's workplants, so the government closed them. Solidarity needed telexes and telephones, so the government cut them. Some Solidarity members, filled with foolish grandiosity, had boasted that they were invincible because they had the people. They learned that, at least in the short run, the government was invincible because it had the guns.

The most grievous errors of judgment and of tactics were made by Solidarity's intellectuals. Their very presence in such a movement was a new development; in the Polish uprisings of the 1960s and '70s, the intellectuals and the workers had fought each other. This time, they worked together. But in the end, only the working men, like Walesa, saw the situation in its correct parameters and warned the movement against the extremes that finally devoured it.

The reasons for the movement's growing paralysis were described to me one dark November day by Janusz Onyszkiewicz, an attractive, blond young Pole who was Solidarity's national spokesman. "It was so much easier being in the opposition," he said thoughtfully. "There was only one thing then: to be against the government. Now that we are taking part in power, we have to choose one value against another. And we cannot do that." He shook his head sadly. "We could ask people to sacrifice if we had our structures and institutions in place," he went on. "We don't."

Solidarity might have benefitted in the crisis by imitating the leadership of the Catholic Church in Poland. Church leaders, and in particular Pope John Paul II, were actually responsible for "the Polish revolution," as the Poles themselves call it. Onyszkiewicz put it poetically when he spoke of John Paul's 1979 visit to his homeland, the visit which sparked Solidarity. "When the Pope came here and we were all in the square, we could see our Polish masses all around us," he told me. "Before, it was pretty clear who 'they' were. Now we saw who we were."

Once the movement started, the church assumed a role that was as well-balanced as Walesa's. Some criticized its position for being too moderate, but in reality it was cunning in the truest sense of the word. The church knew what too fast a movement would bring and, to no avail, warned against it.

No similar discernment could be found among the leaders of the West, and the lessons for them are myriad.

First of all, the West should learn to appreciate its own good intelligence. None of the Western embassies in Poland, including the American, ever predicted a Soviet invasion. It was clear to nearly everyone in Warsaw last year that, when "it" came, it would be an internal military takeover, not an invasion. All of the Western capitals, however, ignored this good reporting and operated blithely on the assumption that the Soviets would repeat their moves into Hungary in 1956 and Czechoslovakia in 1968. Accordingly, on December 13, the West found itself in a trap of its own making: it was forced to react to the wrong action, and thus was unable to react efficaciously.

In the first round of the Polish crisis, while the Western allies squabbled about what to do, the Soviet Union won. It's far more sophisticated action this time—in backing the Polish military in an effort to put down its own people—divided the allies and, in the eyes of much of the world, preserved the illusion of a Soviet posture of nonintervention.

What the West, and in particular the United States, missed in that dismal first round was a fact of crucial and sobering significance: The Soviets have developed a sophisticated new style of diplomacy. This newfound sophistication was demonstrated in Poland, and we are going to see more of it. Indeed, we can see it already: in the button-down style of the young Soviet diplomats who now rove the world looking like an Eastern bloc variation of our own State Department types; in the slick American English diction of the new announcers on Radio Moscow, and—most importantly—in the cunning use of peace talk and peace overtures to disguise Soviet military moves.

The West should also learn some lessons about its own economic wantonness. By the time the revolution came, Poland owed Western countries $26 billion. In one sense, this massive debt was an indictment of the country's Communist system; it was like the pregnant belly of an unmarried woman, obvious to all "decent" society. But in another sense, that debt was the illegitimate child of greedy Western bankers who throughout the 1970s lined up to lend Poland billions it knew it could never repay.

Still, once the revolution began, Poland's financial obligations could have been used in a variety of ways to tie the country closer to the West. However, during those 16 largely free-and-open months, the vocally anti-communist Reagan Administration could not arrived at any policy to accomplish that. Instead, every couple of months like clockwork, the administration's top people would issue dire predictions that the Soviets would soon invade. That is what passed for a policy.

A workable policy, of necessity, would have been of the long-term variety which the Reagan people have not shown themselves capable of developing. Such a policy would have included assurances to the Soviet Union that its security needs would not be challenged, coupled with subtle and deliberate efforts to tie Poland economically and culturally to the West. Instead of such a policy, we got a television extravaganza (Let Poland Be Poland). So Poland wound up tied ever more closely to the Soviet Union. The West, and particularly Washington, clearly lost the moment.

Even now, the Western allies—whose internal squabbling over Poland in effect allowed the Soviets to march stolidly ahead with their crackdown—have failed to devise any plan to deal with the indebtedness of other Communist countries. The Soviet Union and six of its Eastern European allies have borrowed $70 billion from the West, and at least four of those countries, at this moment, cannot repay their loans.

Clearly, these mistakes, these inabilities to grasp creatively the possibilities of the Polish revolution, have been painful for the West. But the hardest lessons of Poland by far are those that must be learned by the Soviets. For despite their initial "victory" last December, they are the ones who have fooled themselves the most.

The Soviets have no idea what really happened in Poland. They have demonstrated an abysmal paucity of imagination on how to deal with the real challenges the Polish revolution has presented to them. They have no conception of what "Poland," at heart, finally represented: the exhaustion of Communism in Eastern Europe.

Poland represents a total failure of the Communist ideology. "Poland" thus represents a most dangerous delegitimization of the entire Soviet system, with its lack of incentives and corrective devices.

Ironically, Poland could have represented a renaissance for socialism. As Zbigniew Brzezinski, the national security advisor in the Carter Administration, has so well expressed it, the issue in Poland was "between primitive socialism and participatory socialism. Primitive socialism is bureaucratic, dogmatic, brutal, even terroristic, and certainly old-fashioned. Participatory socialism is more mixed, provides greater opportunity for individual expression and technological innovation. What is at stake is the concept of a modern society."

It is indeed. But that "lesson," far from inspiring the Soviets to make the changes which alone can develop and modernize their society, instead reacted in rage, in paranoia and in fear. And all the sleek young Soviet diplomats cannot hide that fact.

Ironically, even many Polish Communists understood that what happened in their country was a potentially purifying and even saving event within the Socialist bloc. Indeed, one of the most extraordinary conversations I have had in 20 years as a journalist took place in Warsaw last year with Jerzy Urban, a short, chubby man with a shiny bald pate who was and is the spokesman for the military government.

When I asked Urban why Communism had failed in Poland, he not only answered my question, he answered it systematically and correctly. "The Polish economy in the '70s was based on very expensive imports from the Western economies," Urban began, "but we could never produce exports for hard currency. Polish society simply consumed too much of the credits."

"Also, power was exercised in a very arbitrary way and by very few people," he continued. "There was no control over [politicians], and they got rich at the cost of the people. They become divided from the people, arrogant.

"The problem, in one sentence, was that we didn't introduce reforms when we needed to."

Urban went on to explain why he thought the Soviet response to Poland was so different than what we had come to expect. The previous uprisings in Hungary and in Czechoslovakia, he explained, were led by small groups of intellectuals; the workers did not take part. In Poland, on the contrary, an almost tangible social struggle was forcing change. That struggle was not limited to small groups. Also, events in Poland occurred gradually; the country did not experience a sudden uprising endangering the balance of forces in Europe. And the Polish character was always different from that of the rest of the Eastern bloc. In Poland, private property was allowed, the Catholic Church was strong, and a facade of alternate political parties was maintained. The Soviets had grown accustomed to the "Polish difference."

But the Soviets, even today, still have no idea how to build within a system like the Poles'—or like their own—the kinds of self-corrective measures which democracies build in with electoral and free-market accountability.

The Soviets stopped Solidarity, but what has that got them? They now are checkmated—economically, politically and ideological-

ly—both in Poland and within their own borders. Martial law in Poland is not working, will not work, cannot work, for the simple reason that, while you can always send a few hundred or a few thousand intellectuals to jail, you cannot force millions of workers to produce at the tip of a bayonet.

The Eastern bloc needs personal initiative and widespread commitment to the work ethic if it is to rise above its economic and social stagnation. Ironically, those are precisely the things the Soviets in Poland moved to kill.

What happens next? The speculation is endlessly creative. Some specialists believe the Communist bloc will experience counterrevolution before the end of this century. Others see a potentially ominous development in the unprecedented Soviet use of a military man, rather than a party man, to do the dirty work in Poland. With General Jaruzelski in power in Warsaw, and with a rumored new balance of power between the party and the military developing in Moscow, these experts believe a new militarism could arise across the Eastern bloc. As Pavel Machala, a Czech who fled his country in 1968 and who now teaches at Amherst, wrote: "A message will be sent to the military in other Eastern European countries that the Communist Party is no longer the absolute authority and sole representative of the will of the people."

Poland has always been different. Poland has always been a kind of litmus test of the morality of East and West. It has been the crucified Christ of nations, constantly torn asunder by its rapacious neighbors. Now, once again, its role in the world is to provide a symbolic and crucial warning.

Looking back on Poland after six months of martial law, some lessons are indeed discernible. The lessons for the West will not permit it to admire its reflection in the mirror of history. But the lessons for the East are far more sobering.

The Soviet Communists are caught in a vise. They cannot prosper without granting some degree of freedom to their people, and they cannot bear to grant that freedom. So they are captured, tied by the knots of history's cruel contradictions. Poland warned them. They didn't listen. Poland will have its revenge.

THE NAVY'S PROGRESS AGAINST DRUG ABUSE

HON. LEO C. ZEFERETTI

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Wednesday, September 22, 1982

● Mr. ZEFERETTI. Mr. Speaker, the Navy recently conducted surprise urinalysis tests of enlisted personnel in San Diego and Norfolk and found much lower rates of marihuana use than were uncovered in similar tests in 1980, when use rates of 50 percent were reported. The marihuana use rate has been cut by nearly two-thirds in San Diego and by half in Norfolk, down to an overall average of 20 to 25 percent. This is still obviously much too high, and the antidrug campaign in the armed services must be pursued unrelentingly. But the indication of progress is gratifying to those of us who have pressed the military to take firmer action against drugs.

Our support in Congress is crucial for the ultimate success of the armed services' efforts to eliminate drug use as a threat to military effectiveness and to the health of our young men and women in uniform. Congressional funding is required, for instance, for the testing equipment that serves for both deterrence and detection of drug abuse, and for related programs to combat the problem.

As one who in the past has criticized the military's failure to give sufficient priority to meeting the drug issue, and who has surveyed the matter as chairman of the Select Committee on Narcotics Abuse and Control, I am particularly pleased to commend the Navy on these initial signs of progress. Accordingly, I have written as follows to the Chief of Naval Operations:

SELECT COMMITTEE ON
NARCOTICS ABUSE AND CONTROL,
Washington, D.C., September 22, 1982.

Adm. JAMES D. WATKINS, USN,
Chief of Naval Operations, Department of the Navy, Washington, D.C.

DEAR ADMIRAL WATKINS: I was heartened by the communication from Admiral Paul Mulloy forwarding the Navy's memorandum of September 14, giving the results of surprise drug tests conducted August 30 on enlisted personnel in San Diego and Norfolk. The dramatically improved marihuana findings, compared with the drug-use levels uncovered in the 1981 Survey by the Select Committee on Narcotics Abuse and Control and in the military's own earlier surveys, attest to the wisdom and practicality of the Navy's tougher approach to the problem.

I want to congratulate you, Rear Admiral Paul Mulloy and your predecessor as CNO, Admiral Tom Hayward, on these preliminary signs of success in the Navy's attack on drug abuse in the ranks. Admiral Hayward is to be commended for setting the strong and high priorities within the Navy that provided the resources and commitment so vitally needed. We all agree on the need for continuing progress in this area so important to the nation's defense capability and to the well-being of the young people who serve.

Of course, the overall average of 20 to 25 percent marihuana usage among the recently sampled personel, while reflecting substantial improvement, is still much too high. Continued scrutiny, and firm enforcement, are imperative. You and Navy Secretary John Lehman are wise to press on toward the Navy's goal of "zero tolerance" of drug abuse. I will keep working to help provide whatever Congressional support is required.

Sincerely,

LEO C. ZEFERETTI, *Chairman.*●

PERSONAL EXPLANATION

HON. GARY A. LEE

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Wednesday, September 22, 1982

● Mr. LEE. Mr. Speaker, due to official business, I was unable to be present on the House floor yesterday, September 21, 1982. Had I been here, however, I would have cast my vote in the following manner:

Rollcall No. 342: An amendment to the Department of Transporation and related agencies appropriations for fiscal 1983 that sought to reduce the appropriations for the Department of Transporation by $320 million, "aye."

Rollcall No. 344: An amendment to the Department of Transportation and related appropriations for fiscal 1983, that sought to reduce the appropriation for every account, activity, or project in the bill by 33.8 percent, "no."

Rollcall No. 345: Department of Transportation and related agencies appropriations for fiscal 1983, "no."

Rollcall No. 347: An amendment to the agriculture, rural development and related agencies appropriations for fiscal 1983, that sought to provide that the food stamp program appropriation be for all of fiscal 1983 rather than just the period from October 1, 1982, through July 15, 1983, "aye."

Rollcall No. 348: Agriculture, rural development, and related agencies appropriations for fiscal year 1983, "no."●

MAJOR BUDGET TRENDS

HON. LEE H. HAMILTON

OF INDIANA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, September 22, 1982

● Mr. HAMILTON. Mr. Speaker, I would like to insert my Washington Report for Wednesday, September 22, 1982, into the CONGRESSIONAL RECORD:

MAJOR BUDGET TRENDS

The best way to understand the direction of public policy is to observe and assess the longterm trends in federal spending. Major changes are now taking place in the way federal money is being spent, and federal dollars are beginning to flow in ways considerably different than those of a few years ago. Among the most significant facts and figures are these:

(1) PRINCIPAL TREND

The principal trend, measured over the period from 1980 to 1985, is that larger percentages of the federal budget are going to defense, interest on the national debt, and assistance to the elderly. Spending on everything else is declining, after adjustment for inflation.

(2) RESTRAINT ON GROWTH OF SPENDING

Some progress is being made in restraining the growth of federal spending. On the basis of current law, federal outlays will rise less than 2 percent a year, after adjustment for inflation, between 1980 and 1985. In the latter year, they will be equal to 22.7 percent of the Gross National Product, which is approximately the same percentage they represented in 1980.

(3) LARGEST INCREASES

The biggest increase in federal spending (in percentage terms) will be for interest on the national debt. It jumps by 58 percent over five years as the debt soars from $918 billion at the end of 1980 to $1.7 trillion at the end of 1985. The next biggest increase is in spending for national defense. It in-

creases by 48 percent above inflation, not including the rising costs of military pensions. Together, spending for national defense and for interest on the national debt will go up nearly 10 percent faster than inflation.

(4) PENSIONS

Federal payments for medicare and for pensions of all types (including social security, federal civilian and military, and railroad retirement) will rise by 21 percent. These expenses will rise about 4 percent faster than inflation. Thus, about half of all federal spending is now supporting pensions and the medical benefits attached to those pensions. Coupled with defense spending, these payments now amount to five-sixths of the federal budget.

(5) OTHER SPENDING

Federal spending in the other major categories of the budget will show a decline during this period, after adjustment for inflation. Food stamps and medicaid will fall by 10 percent over the five-year period from 1980 to 1985. Discretionary non-defense programs, such as those for highways, national parks, civilian salaries, and the Federal Bureau of Investigation, will decline by 31 percent. Programs of rehabilitation and child nutrition will drop by 54 percent.

(6) DEFICITS

The bottom line in all of this is not encouraging. After the tax and spending cuts of 1981 and the tax increase of 1982, the federal budget remains deeply in deficit. Most alarming is the fact that even asssuming a healthy economic recovery, the deficit would still be in the range of $40 billion to $50 billion per year. Additional efforts to cut spending are inevitable. The deficit is expected to grow by $500 billion during the four years of the Reagan Adminstration. For 1983, it will be about $155 billion, by far the largest in history and the largest as a percentage of the Gross National Product since World War II. The outlook is for continuing large deficits during the next several years. If the 1985 budget were to be balanced without further reductions in spending for defense pensions, other spending in the federal budget (except for interest on the national debt) would have to be cut by about one-half.

(7) REVENUES

On the revenue side of the federal budget, the most striking fact is the drop from 12.4 percent to 7.4 percent in the share of federal revenue derived from corporate taxes. The share of revenue raised by the personal income tax will remain about the same. It was 46.9 percent in 1980 and should be about 47.1 percent in 1983. Social insurance taxes, including taxes paid to support the social security system, will rise from 30.9 percent in 1981 to 34.3 percent in 1983.

(8) REGIONAL IMPACT

The President's program of large tax and domestic spending cuts and increased outlays for defense is shifting federal spending for northern and midwestern states to southern and western states. This shift occurs partly because military installations are concentrated in the South and the West and partly because domestic programs are of greater benefit to the Midwest and the North. The shift may eventually widen already serious fiscal and economic disparities among different regions of the country.

(9) IMPACT ON THE POOR

The net effect of the tax and spending cuts will be to penalize working families near the poverty line who receive some federal benefits. Major disincentives to work are being placed in the way of low-income wage earners. Such workers lose food stamps and welfare benefits as their modest earnings rise. The "working poor"—those disadvantaged people whose incomes are just above the poverty line—are being hurt as social programs are realigned to help the very poor. Most families earning $15,000 a year or less receive no benefit; those earning between $15,000 and $50,000 receive modest benefits; substantial advantages fall to those who earn more. For example, families earning $40,000 per year will get $2,400 in tax reductions in 1984; those earning $85,000 per year, however, will get approximately $20,000 in tax relief that year.

These facts and figures come from reports of the Congressional Budget Office, the non-partisan budgetary analyst of the Congress, and the Urban Institute, a respected private organization which analyzes major events and trends in the nation's life. They will form the backdrop for the leading debates on public policy in the Congress and among the public at large in the weeks and months to come.●

SOVIET NATURAL GAS PIPELINE—A CRUCIAL TEST OF WESTERN CONSCIENCE

HON. JOHN LeBOUTILLIER

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Wednesday, September 22, 1982

● Mr. LeBOUTILLIER. Mr. Speaker, the Soviet natural gas pipeline involves a denial of principles so fundamental to Western and American, political values that any willingness to participate in its construction can only be judged worthy of contempt.

American, unique among all nations of the world, was established with freedom as a fundamental right bequeathed to all men by their Creator. In the document which declared the independence of America from the tyrannical rule of the British King, it is stated:

We hold these truths to be self-evident, that all men are created equal, that they are endowed by their Creator with certain unalienable rights, that among these are Life, Liberty, and the pursuit of Happiness.

The very essence of the American Revolution was the founding of freedom and the establishment of lasting institutions to guarantee the rights of freedom and citizenship.

Moreover, freedom was not viewed as a right pertaining to Americans alone, a phenomenon relative to a country's specific culture or history. Rather, the Founding Fathers rightly judged freedom as a fundamental right visited upon all men by their Creator and, as such, rooted by that Creator in the very nature of man. It was, in short, an "inner measure" of man's ultimate purpose, and all cultures and histories were to be judged by the extent to which they would contribute to its realization.

America's role in the course of human history was determined by this vision of freedom. America was to be an exemplar of freedom to men and countries everywhere. As John Adams said in 1765 before independence, the settlement of America constitutes "the opening of a grand design in providence for illumination of the ignorant, and the emancipation of the slavish part of mankind all over the Earth."

The depth of commitment by the American people to freedom and those human rights and institutions supportive of its realization cannot be overemphasized. There are wrongs which transcend all times and circumstances, and the conscience of America requires they be judged unacceptable to all men whatever their differences. Dehumanizing forces cannot be condoned. They must be opposed with consistency and prudence.

It is because of my strong commitment to this tradition that I find the chorus of outcries against the President's decision to impose sanctions on the Soviet Union, and those foreign subsidiaries who willfully violate contractural agreements with their parent companies, particularly distasteful.

The Soviet Union is not simply a State. It is a "prison of peoples," dedicated to the final eradication of the Judeo-Christian way of life and the sacred values on which it rests. It is the enemy of all people and the captor of each who would be so unfortunate to come under its sway. It is, in short, the enemy of the eternal basis of the spirit—freedom.

It is no accident that this is the case. Radical dehumanization flows necessarily from the very nature of communism.

The meaning and significance of communism is very deceptive. It wraps itself in a messianic mantle of false justice, false economy, false fraternity, and false promises. It says it wants only better conditions for the working man, and the removal of the real abuses of the economic order. But it does not show its real face. It does not say it is a planned systematic deception of human beings designed for the purpose of gradually enslaving nations and the entire human race. It does not say that communism is a tree whose roots are atheism, materialism, naturalism, and class struggle, and whose fruits are the destruction of freedom, individuality, family, right of free speech, and right of worship. As His Holiness Pope Pius XI said in his encyclical "Divini Redemptoris": "Communism is intrinsically wrong, and no one who would save Christian civilization may collaborate with it in any undertaking whatsoever."

According to a report recently released by the International Society for Human Rights, the Soviet Union has set up seven forced labor camps on construction stretches along the 3,000 mile pipeline route and that political

and religious prisoners are being used for labor.

Thus, the question of the Soviet natural gas pipeline is not simply a question of economics or security. It is also a question of morality, and it reaches to the very depths of the meaning of America. Slave labor is not simply labor without pay. It is work under cruel and torturous conditions. Men will die. They will die of starvation, torture, and overwork.

To condone United States or European participation in the construction of the Soviet pipeline is to dismiss the very foundations of Western culture in general, and of America in particular.

Recently, Mr. David Atkinson, Member of the British Parliament from Bournemouth, East, expressed his misgivings about Western participation in this project. Commenting on the use of hundreds of thousands of slave laborers, he says:

Such inhumanity to man by man rivals that which occurred during the construction of the pyramids by the Pharaohs.

What is so appalling is that this pipeline is viewed by our allies, and those who would support them, simply as a means for advancing the living standards of people in Western Europe.

I commend Mr. Atkinson's statement to my colleagues as follows:

Mr. David Atkinson, Member of Parliament: Today the country stands with the rest of the European Community in opposing the American embargo on exports of equipment for the project. I question whether Britain would now be taking the same strong view if the engineering company of John Brown and Company was not involved. Either way, the whole unhappy affair represents yet another failure on the part of the alliance to produce a firm, effective and united approach towards our trading relations with the Soviet bloc.

I realise that the arguments about the pipeline may now be academic because it is to go ahead, but we should remind ourselves of the possible consequences, which seem to concern President Reagan far more than those nations involved in Western Europe. The fact that France, West Germany, Belgium and Italy are prepared to put themselves "in hock" with the Soviet Union on such a vital commodity is an indictment of the concept of the European Community and illustrates its failure to produce an adequate energy policy of its own. That West Germany, usually one of the Community's most enthusiastic partners and its prime banker, is prepared to rely on the Soviet Union for more than 30 percent of its gas and 5 percent of its total energy needs in the 1990s is especially surprising. The decision to go ahead with the pipeline also ignores the fact that north-western Europe is entirely capable of supplying the same amount of gas from its own proven and probable reserves.

One assumes, and hopes, that these countries have thought out the consequences to their domestic consumers and to their industries should the Soviet Union decide to cut off the flow of gas. The Soviets have done precisely that in the past to their own customers and for their own reasons. China, Yugoslavia and Albania are all closer, ideologically, to the Soviet Union than are any of its new capitalist customers. We must also presume that they have thought out how they will stand if and when the Soviets display the same aggression as they did in Afghanistan, the same suppression of self-determination as they did in Poland as well as the continuing suppression of freedom for their own people.

My fear is that every European country that is a party to the deal will make a small but serious move towards neutrality. The moment that the French, the German, Belgian and Italian homes and factories rely upon an uninterrupted supply of Soviet gas they will render themselves "Finlandised"—self-interested, hesitant, fearful, and muted in speaking out against or retaliating against any further Soviet aggression, intervention or suppression.

Moreover, I wonder whether such countries have thought who will build the pipeline. I am not talking of the supply of Western technology and equipment but of the hard labour. The pipeline is already being built. Reports from various locations in the Soviet Union suggest that more and more prisoners sentenced to hard labour or internal exile are being used. About 100,000 such people are estimated to be involved. About 10,000 of them were sentenced because of their political opposition to the Communist regime, because they were monitoring the Helsinki Final Act, because of their religious beliefs, or for attempting to form trade unions in the Soviet Union.

From the source of the huge Urngoy gas field in northern Siberia, labour camps line the pipeline westwards, housing prisoners, not in houses or barracks, but in camps or scanty wagons which offer little protection from winter temperatures, which sometimes reach below minus 40 degrees centigrade.

Workers in exile are similarly appallingly provided for in their colonies. The few shops are never well stocked. Workers rely on food from relations. Vitamin deficiencies cause disease. Little heavy construction equipment is used and they are forced to perform most of the heavy manual labour involved in constructing the pipeline. Injuries and accidents occur frequently. Women working with the asbestos and fibreglass used to line the pipeline suffer from severe blistering. Gloves are issued only twice a year. Eczema is widespread and there is a high rate of lung collapse.

Such inhumanity to man by man rivals that which occurred during the construction of the pyramids by the Pharaohs. Its purpose is to advance the living standards of people in Western Europe.

It is suggested that President Reagan is being less than honest in attempting to sabotage the European end of the deal while continuing to sell American grain to make up the shortfall in Soviet harvests. That is to misunderstand the facts and to fall for Soviet propaganda. American grain is paid for in cash. That leaves less for the Soviet war machine budget. Moreover, as we know from President Carter's grain embargo following the Afghanistan crisis, alternative suppliers from the West, notably from Argentina, are only too happy to step in. The pipeline will not only make Western Europe more dependent on the Soviet Union, it will increase Soviet hard currency earnings by as much as one-third, and our technology will substitute theirs.

The whole unhappy episode serves as yet another warning to the Western Alliance to decide with the utmost urgency on a united approach to East-West trade, to outlaw cheap credits, to control the sale of advanced technology and to agree an effective sanctions and embargo policy as a deterrent against a future Afghanistan or an event such as the imposition of martial law in Poland.

I look forward to hearing from my right hon. Friend the Leader of the House about a British initiative to resolve the issue. If we do not learn the lesson of the Siberian pipeline deal Lenin will be proved right in predicting that capitalism will manufacture the rope by which it will be hanged.●

WE SHOULD BE ADOPTING VILLAGES

HON. PAUL SIMON

OF ILLINOIS

IN THE HOUSE OF REPRESENTATIVES

Wednesday, September 22, 1982

● Mr. SIMON. Mr. Speaker, the former assistant to our esteemed colleague LEON PANETTA of California is Matthew Cossolotto who is now with the Peace Corps in Africa.

Recently, the Christian Science Monitor published an article by him, "How About Adopting a Village?". I commend it to my colleagues and to others who may be reading the CONGRESSIONAL RECORD.

[From the Christian Science Monitor, July 16, 1982]

(By Matthew Cossolotto)

Let's face it. America's foreign aid programs have not worked. They have not succeeded in channeling aid to meet the needs of the most needy. They have not been fine-tuned to foster self-help efforts in developing countries. They have not been able to avoid propping up widespread corruption in many countries receiving aid. Why not? Simply put, they have not been organized to do so.

Perhaps more importantly, however, US aid programs fail because they do not include opportunities for Americans to learn about the problems and the cultures of the people they are ostensibly helping.

The first principle in effective aid is public participation. Americans from all walks of life should have the chance to contribute directly to aid projects and to understand both the value of the projects and the people being supported. Moving toward greater citizen involvement would bring into sharper focus the humanitarian motivations behind aid and emphasize the role played by compassion and mutual respect and understanding in making foreign aid work.

While private contributions are to be encouraged, it is far better to coalesce private donations into community-to-community programs of resource and information exchanges. Through a community approach, both sides are reminded of the importance of community action in furthering general well-being. Americans would be able to view closely the impact of their assistance. Recipient communities would benefit from the direct aid and the knowledge that it comes from Americans who know and care about the specific projects.

In effect, I am suggesting a "Sister Village" program, involving the "adoption" by an American city or town of a village in a developing country. Using the term Sister Village is a reminder that, while the majori-

ty of the world's population are village-dwellers, there is still a common bond of humanity between developed town and undeveloped village.

This adoption should take place through the passage of an appropriate resolution by the American town or city council, thus making the relationship official and guaranteeing coverage in the local media. When residents learn that their town has "adopted" a Sister Village, they will undoubtedly become curious about the program and about the people in the adopted village. The idea derives, in part, from the Sister City program and blends in some aspects of a program run by the Peace Corps—called Peace Corps Partnership—in which US schools and developing country villages mutually benefit from an exchange of information and resources.

Under the Sister Village program, US communities would collect tax-deductible contributions from individuals and from civic-minded businesses and organizations. Funds collected would then be sent abroad to help finance the digging of wells, the construction of latrines, health centers, or schools, and the establishment of education programs in agriculture, sanitation, or adult literacy. The number of tasks crying out for support is awesome, but small contributions to small villages make a big difference in terms of human welfare and self-respect.

To make sure the contributions reach their intended destination, though, there needs to be someone on the scene to identify and channel aid to worthy projects and to serve as the eyes and ears in the village for the community back home. I propose, therefore, the imaginative use of Peace Corps Volunteers (PCVs) in this role.

Failure to utilize one of the greatest resources the US has in foreign aid—Peace Corps Volunteers—is both tragic and incomprehensible. Why should the American people miss the opportunity to ensure that worthy projects are begun and completed and that knowledge of the developing world is brought back to America? There are thousands of PCVs scattered in some 60 countries, but the two years they spend abroad resemble a form of banishment, when in fact US schools and communities could be linked with PCVs in productive networks of information and resource exchange.

Use of PCVs in the field should extend to research being conducted in US universities in a variety of fields, from tropical agriculture, to appropriate technology, to health care techniques at the village level. Bringing PCVs into ongoing educational programs, at all levels, in the US would serve to internationalize what has become a far too parochial and antiquated education system, given global realities in the 1980s. In fact, the Sister Village structure would accommodate a valuable student exchange program.

All legal and logistical arrangements for the student exchanges and the information and financial transfers being proposed should be made under the auspices of the Peace Corps and the State Department. Specific agreements with recipient countries will be needed. It should be kept in mind that there may be resistance to an aid program which bypasses the host country's framework of petty fraud and corruption. But that should not dissuade the US from insisting on the kind of aid program it wants to support.

Clearly the transition from traditional aid programs to the Sister Village concept must be a gradual one. Moreover, the new program is not designed to supplant all US aid programs. But in those countries where the Peace Corps has a large program and where the Sister Village program takes root, traditional aid programs could be scaled down or phased out, resulting in slackened pressure on the federal budget and reduction in the deficit over time. Complete recordkeeping on aid contributed to Sister Villages is a necessary feature of the program.

While budget-cutting is not the main selling point of this plan, it is fair to underline that, by definition, the new program could reduce federal expenditures by relying on private contributions. The Reagan administration surely has a mandate to move in this direction.●

HONORING SVERRE ULVESTAD

HON. GUY V. MOLINARI

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Wednesday, September 22, 1982

● Mr. MOLINARI. Mr. Speaker, I would like to call to the attention of my distinguished colleagues that on September 30, 1982, an important landmark date will take place in the history of the Eger Lutheran Home on Staten Island, N.Y. On that date, Mr. Sverre Ulvestad, who has served as administrator of the Home for the past 18 years with determination and devotion, will retire.

Prior to coming to Eger, Mr. Ulvestad served the needs of people in many areas of the world. As a graduate of Det Norske Diakonhjem (a 5-year college for Health and Welfare Services) in Oslo, Norway, he served as an inspector of community health services for 3 years. In 1944, he was called to the Aker Community Hospital, Oslo, as an assistant supervisor of the First Aid Emergency and Receiving Department. In 1945, he accepted the position of health inspector of Community Health Services and was part-time assistant to the pastor of Frogner Parish in Oslo.

In 1947, he accepted a call in the Seamen's Mission and served 9 years as assistant to the mission in Philadelphia, New Orleans, and San Pedro. In 1954, he was appointed director of the new Seamen's Welfare Center in Kobe, Japan.

After leaving Japan, he served 2 years as administrator and reorganized a Psychiatric Instititute, Elmlawn, in Rockford, Ill.

In 1961, he received a special call to organize a new municipal nursing home for the city of Mabel, Minn. He served as administrator of the Green Lea Manor in Mabel until 1964, when he was called to Eger Lutheran Home by the American Lutheran Church to serve as administrator and to plan for its expansion.

In the past 18 years, Eger Home has grown from a home of 42 beds with an annual budget of $140,000, to a 378-bed home with a budget of $13 million in 1982.

In 1959, Mr. Ulvestad was awarded the St. Olay Medal by the King of Norway and, in 1967, received the Lutheran Brotherhood Distinguished Service Award.

In the announcement to staff and volunteers at Eger it was noted, "during the last 18 years, the trustees of the Eger Homes have relied on and been guided by Mr. Ulvestad's direction and stewardship."●

AGRICULTURAL EXPORTS

HON. FLOYD J. FITHIAN

OF INDIANA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, September 22, 1982

● Mr. FITHIAN. Mr. Speaker, my colleague from Minnesota, Mr. HAGEDORN, and myself are introducing today a very timely resolution. This legislation will address the problems of a few of the most depressed sectors of our economy. An increasing number of American farmers, businessmen, labor leaders, and policymakers are expressing interest in increasing U.S. exports of processed agricultural products. There are sizable potential economic benefits which could be realized if a larger portion of our agricultural exports were processed at home.

America's agribusiness is the largest contributing factor to the U.S. balance of payments. This legislation not only helps to improve our balance of payments, it also creates a savings in the Federal budget by helping to keep commodity prices in the United States above the target price, decreasing the amount of deficiency payments being paid to farmers. Its economic benefits extend far beyond the farm into farm supply industries, food processing distribution, and many other agribusiness. The processing and service activities created by the flow of agricultural commodities from the farmer to the consumer directly raise employment and income in America. Agriculture and related industry account for 20 percent of the gross national product (GNP), 23 percent of all U.S. employment, and 19 percent of all U.S. export earnings.

According to a U.S. Department of Agriculture study, if 10 percent of current raw exports of wheat, corn, and soybeans were shipped as processed products, the GNP would increase by nearly $16 billion, personal income would rise by over $3 billion—personal income which would go to the farmer and agribusinessman who is already suffering from a depressed farm economy—and more than 300,000 new U.S. jobs would be created. Encouraging exports of processed or value-added commodities makes sound economic sense.

By "value-added", we simply mean improving the quality of the product as it moves from farm to market. Raw

corn and soybeans are processed into such valuable byproducts as high fructose corn sweeteners, ethanol, soybean mill and oil, starch, corn gluten feed, and distillers dried grains.

I might add that by encouraging exports of value-added agriculture commodities, we do not seek to decrease U.S. exports of raw materials; rather, the goal of this legislation is to increase value-added exports as an additional effort to enhance and expand U.S. export markets to insure that processed food products share in the future growth of food exports.

The organizations that are supporting this resolution include: National Association of State Departments of Agriculture; National Governors' Association; Poultry and Egg Institute of America; American Farm Bureau Federation; Wine Institute; American Association of Port Authorities; Potato Chip/Snack Food Association; National Cattlemen's Association; Protein Grain Products International; Western Great Lakes Maritime Association; North Dakota Agricultural Products Utilization Commission; National Broiler Council; Food Processing Machinery and Supplies Association; Rice Millers Federation; National Turkey Federation; National Farmers Organization; National Conference of State Legislatures; Independent Bankers Association; National Rural Electric Cooperative Association; National Sunflower Association; and American Meat Institute.

This legislation also addresses the increasing problem of unfair trade practices by foreign countries. A variety of tariff and nontariff barriers confront U.S. agricultural exports in almost all counties in the world. These tariff and nontariff barriers are normally the result of national agricultural policies; that is, agricultural trade policies in these foreign countries are usually determined by these domestic agricultural policies and therefore trade is, in part, determined politically in view of national production and related farm policies.

We must begin a well-organized program, utilizing all sectors of our economy, to export these and other products to potential buyers. There are a number of ways that the public and private sectors can work in harmony to accomplish this goal. There are markets for our agricultural products throughout the world, therefore, an immediate assistance to our ailing farmer and agribusinessman is at our fingertips, at no cost to the American Government. All that needs to be done is to seize the opportunity available to us.●

CONGRESSWOMAN SHIRLEY CHISHOLM ADDRESSES CONGRESSIONAL BLACK CAUCUS

HON. WALTER E. FAUNTROY

OF THE DISTRICT OF COLUMBIA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, September 22, 1982

● Mr. FAUNTROY. Mr. Speaker, on Saturday evening, September 18, 1982, my distinguished colleague Congresswoman SHIRLEY CHISHOLM received the William L. Dawson Award at the Congressional Black Caucus Foundation Awards Dinner. Upon receiving the award, Congresswoman CHISHOLM made the following remarks which I believe constitute a forthright challenge to those of us in this body to redirect our efforts toward policies that are in the best traditions of our country. I urge my colleagues to give Congresswoman CHISHOLM's remarks the serious consideration they deserve:

My friends, my brothers and my sisters, my colleagues: Thank you. If all of you could have been my delegates at the Democratic Party Convention in 1972, we might have eaten some of our Congressional Black Caucus dinners over at the White House.

Someday, one of us will be the man, or the woman, sitting behind that desk in the Oval Office. If I am lucky, and if we are together and committed and strong, I will live to see that great day.

I have been lucky already, and I am forever grateful to my family, my friends, and all my supporters who have given me the constant encouragement over the years to be "unbought and unbossed," and to fight the "good fight."

I am honored tonight to receive the Dawson Award. I hope I have earned it. I hope I have been like Sojourner Truth who, when a white racist said "I don't care no more about what you say than a flea bite," calmly replied "maybe so, but the Lord willing, I'll keep you scratchin'."

I have tried to keep them scratching. Long ago, I learned that people can be divided into three groups: Those who make things happen; those who watch things happen; and those who wonder what happened. I have tried to make things happen and sometimes, to everyone's surprise, they did.

I found out, too, the truth of what Winston Churchill once said. He stated that "In war you can be killed only once, in politics many times." I have not always had good luck, and my major successes have not been frequent. But here I am tonight, happy and proud to bathe in the warmth of your feelings for me. Here I am tonight, ending one phase of my career, but as ready and as able as ever to proceed with the people's agenda.

In a way, my 14-year tenure in the Congress has been a circular path. You may remember that loud and angry Shirley Chisholm, that "pepperpot" who stormed into the House of Representatives in 1969. I challenged the stares and the cloakroom deals of all those "pale males." I had no hesitation to be the skunk at the family picnic.

In 1969 and into the early 1970's, I had plenty to raise a stink about. Thousands of our young men were being killed, crippled, and scarred in the jungles of Southeast Asia, while Lyndon Johnson's successor, Richard Nixon, talked endlessly about "peace with honor."

On hundreds of college campuses, and on the floor of the House of Representatives, I joined in the demands to end the war, to bring the boys home, to get the Nation's attention back to the unmet goals of the domestic war on poverty.

Finally, years too late, the Vietnam war did end; but its devastation was not confined to the countryside of that Asian nation nor to the bodies and minds of American servicemen. Among the war's other victims were the American people's trust in their government, and the American Government's commitment to driving ignorance, poverty and prejudice from our shores.

My job changed in those post-war years, and so did my temperament. As my focus moved to preserving the Great Society programs, to working more effectively with my congressional colleagues, and to speaking of the positive responsibilities of Government, some people began to worry about me.

People began to wonder if Shirely Chisholm's fire was fading. Because they did not see red flames of passion, they assumed that the steady blue flame of my inner commitment—the pilot light of my soul—was also flickering out. They could not have been more wrong.

New realities in those years demanded that I become effective and productive in the Congress. We live in a Republic, not in a revolution. People like me are needed within our institutions to learn the rules and to play the game under the guidance of firmly-held ideals.

I spent those years on the Education and Labor Committee, and then on the powerful House Rules Committee, shaping and testifying on legislation affecting the daily lives of millions of people. As Red Skelton once said of the Congress, I was helping them to play "bingo with billions."

I spent those years, too, helping to organize and motivate the political organizations of minorities and women who are needed to forcefully reassert the egalitarian promises of our Nation's Constitution. I was not lazy. I was not sleeping. I was working

Now, in the 1980's, I am still working. But also according to that curious cycle of my congressional career, I am angry and I am outspoken once again. Again, I have plenty to make noise about.

The tree of compassion, planted by President Franklin Roosevelt and nourished through the years by concerned national leaders, is now withering in the cruel, icy winds of conservative government. In a wasteland of greed and self-interest, the cries of the downtrodden are drowned out by the sirens of militarism.

Our national treasury is devoured by an insatiable war machine; our children expect their generation to be the last of the human race, destroyed by nuclear holocaust; and our people are promised brighter days by an administration committed to policies of doom and economic disaster.

Of course I am angry. Of course I am again publicly battling against the leeches of poverty, unemployment and hopelessness who are sucking the strength from America's bloodstream.

Our President and his right-wing cronies are looking at the world through a rose-colored rear-view mirror. Once again, as progressives did in the 1930's, we may have to be the ones to save capitalism from the Capitalists.

We know how Government can stimulate the economy. We know how Government can put people back to work. We know how Government can help to right the wrongs of

past exploitation and discrimination. We know, too, that this President is not interested in a government that does those things; he does not seem to believe in Government "for the people."

My friends, this is not my funeral, nor is it really a farewell. I am angry, and I am taking that anger out to the people of this great land.

I am leaving the Congress, but I am not leaving the country. I am giving up my House seat, but I am not abandoning the great dreams of Dr. King. I will no longer have a vote in the Congress, but I will continue to battle the conservatives for the hearts and minds of millions of American voters.

For 25 years, I have struggled in the political arena. It has been exciting, it has been challenging, and I have often found myself immersed in controversy. To you here tonight, and to the countless others of all ages, sexes, and races who have heard my voice, I can say from the depth of my heart that I have struggled for the good of us all, and I have given the best that is within me to give.

Thank you.●

MAJ. GEN. STANLEY C. BECK LEAVES GUAM FOR MARCH AIR FORCE BASE, CALIF.

HON. ANTONIO BORJA WON PAT

OF GUAM

IN THE HOUSE OF REPRESENTATIVES

Wednesday, September 22, 1982

● Mr. WON PAT. Mr. Speaker, Maj. Gen. Stanley C. Beck, who commanded the Strategic Air Command's 3d Air Division at Andersen Air Force Base in Guam for the past 2 years has assumed his new post as vice commander of the 15th Air Force at March Air Force Base in Riverside, Calif.

As a member of the Armed Services Committee, I am extremely proud of the accomplishments that General Beck achieved during his tenure in Guam, but I am particularly pleased with his efforts in improving community relations, by making the Air Force a truly integral part of the culture and community to such a degree that Andersen Air Force Base was awarded the distinction of having the best community relations program in SAC for the year, 1980–81.

Through his personal initiative, key civic leaders of the territory and the Japanese island of Okinawa were afforded the opportunity to learn firsthand about critical military issues vital to the defense of the free world. This was done primarily through a series of extensive briefings held at SAC headquarters in Omaha, Nebr. and tailored specifically to the concerns of the people of the Western Pacific.

General Beck has been recognized for several accomplishments which have contributed significantly to the security of the citizens of the United States. He made the B–52 stratofortress weapon system an integral training tool in the self-defense development of our allied forces in the Pacific basin, Asian, Western Pacific and South Pacific nations. This training not only aided our allies in their defense postures, but helped our own theater tactical fighter and naval forces as well.

The opening of Darwin, Australia, as a base for projection of U.S. strategic air power in the Indian Ocean was another important effort by General Beck, achieved through his diplomatic negotiations in which he established a sincere and warm friendship with Royal Australian senior leaders.

He increased the role of the B–52 in the defense of Korea through its total integration with theater forces and an American/Republic of Korea Air Force exchange program. He then expanded this "team" effort by including officers of the Japanese Self-Defense Force and the Royal Australian Air Force.

Back on the local scene, General Beck displayed his managerial acumen by recognizing the severe weather conditions in typhoon-prone Guam and then ordering the hardening of all new and repair construction to withstand the many tropical storms and typhoons which plague this strategic area.

There are other accomplishments chalked up during General Beck's 2 years of command at Andersen Air Force Base, but I would just like to say in tribute, that Maj. Gen. Stanley C. Beck, throughout his tenure as commander of SAC's 3d Air Division, has displayed a sense of duty and leadership that has won the admiration and respect not only of the people of Guam but loyal American military personnel and many others connected with the armed services in foreign lands everywhere.●

COMPUTOR EQUIPMENT CONTRIBUTION ACT OF 1982

HON. JOE MOAKLEY

OF MASSACHUSETTS

IN THE HOUSE OF REPRESENTATIVES

Wednesday, September 22, 1982

● Mr. MOAKLEY. Mr. Speaker, earlier today, I was involved in preparing for Rules Committee hearings on nuclear waste legislation and missed the vote on the Computor Equipment Contribution Act of 1982 (H.R. 5573). Had I been present, I would have voted "aye."●

VETERANS USING GI BILL

HON. G. V. (SONNY) MONTGOMERY

OF MISSISSIPPI

IN THE HOUSE OF REPRESENTATIVES

Wednesday, September 22, 1982

● Mr. MONTGOMERY. Mr. Speaker, this news release from the Veterans' Administration indicates that the Vietnam-era GI bill has been used by 7,895,000 veterans to further their educational training.

This participation points up the great importance of the program and I wanted to share these figures with my colleagues.

MORE VETERANS HAVE USED VIETNAM-ERA GI BILL

More veterans have received educational training under the Vietnam-era GI bill than previous editions of the popular education assistance legislation, the Veterans' Administration has announced.

The latest statistics show that more than 7,895,000 veterans and service personnel have trained under the third GI bill, compared to 7,800,000 World War II veterans who received educational benefits under the original legislation.

The current GI bill figures include 1,397,000 peacetime post-Korean veterans and 679,000 individuals who trained only as service personnel. The remaining 5,819,000 are veterans of the Vietnam era (August 5, 1964–May 7, 1975), who took advantage of their education and training entitlement after separation from active duty.

The Vietnam-era GI bill participation rate, based on both the 5,819,000 Vietnam-era veterans and the 679,000 active duty trainees is approximately 66 percent and is expected to stay at or near that level over the remaining 7 years that are left in the current GI bill.

By contrast, the 7.8 million veterans who trained under the World War II GI bill represented just over 50 percent of the eligible veteran population. The participation rate under the Korean conflict GI bill was even lower at 43 percent.

To date, the VA has spent about $53 billion to provide educational assistance to veterans and service personnel. From June 22, 1944, when the first measure was signed into law by President Roosevelt, through June 30, 1982, a total of 18.1 million have received assistance.

The bill, now in its 38th year, permits a veteran to use the educational benefits within 10 years following discharge from service, or by December 31, 1989, whichever is earlier.

Another educational assistance program, which requires financial participation by service personnel, is avail-

able to those who entered the military after December 31, 1976.

Veterans who want more information on GI bill eligibility should contact the nearest VA regional office.●

COURAGEOUS INDIVIDUAL HONORED

HON. RICHARD C. SHELBY

OF ALABAMA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, September 22, 1982

● Mr. SHELBY. Mr. Speaker, I would like to recognize an outstanding individual and share her courageous story with my colleagues in the House of Representatives.

Dr. Gwenyth Vaughn, chief of the Audiology and Speech Pathology Service, Birmingham, Ala., VAMC, has been named a winner in the 1982 Outstanding Handicapped Federal Employees Awards program sponsored by the Office of Personnel Management. She will be among the 10 Federal employees to be recognized at a ceremony in Washington, D.C., on October 7.

During the early years of the award program, 10 finalists were selected from handicapped employees nominated by Federal departments and agencies, with one winner named at a special ceremony. Since 1974, the emphasis has been on the achievements of 10 outstanding employees, with each receiving equal recognition. VA has had a finalist or a winner every year since the program began.

Chosen as VA's candidate from among 87 other agency nominees, Dr. Vaughn has exhibited remarkable courage in coping with her own disability while helping others overcome their handicaps. Struck by crippling polio, she became a paraplegic at age 34. At that time, she was living in Mexico, raising a family, and working as a founder and director of the first schools for the handicapped in Mexico. Prior to the onset of polio, she had completed her master's degree in English and education and had served as dean of women, dean of personnel, and head of a university's department of speech.

She never quite recovered from the polio attack. But with the aid of a walker, she moved to Colorado to coordinate a program for the mentally retarded at Wheatridge Colorado State Home and Training School while completing her Ph. D. degree in communication methodology at the University of Denver. All this was achieved by pushing a laundry basket that carried her books while using a cane to help her walk.

Dr. Vaughn joined the VA in 1966 as a speech pathologist at Birmingham, first as a volunteer, then as a part-timer, and finally as chief of her service.

While at Birmingham she has received three exchange of medical information grants to expand hearing and speech therapy for veterans who live in remote areas or who are too infirm to travel for regular therapy. Over the years she has developed a series of innovative procedures that provide both hearing and speech supplementary treatment and evaluation by telephone. Her work has been cited as extremely cost effective and for giving patients the needed frequency of patient/clinician contact and appropriate followup. The American Speech-Language-Hearing Association has described Vaughn's projects as "the technology of the future and representing a clinical renaissance."

She has established a nationwide program called Remate Machine Assisted Training and Evaluation (REMATE) which incorporates the use of a computer to provide telephonic programs. REMATE talks, types, and writes through the telephone to veterans coast to coast. Its services are individually programed for veterans by their clinicians and are available 24 hours a day, 7 days a week. Dr. Vaughn thinks REMATE has "cracked a health delivery barrier."

"The marvelous thing," she says, "is that this system is so good for so many. It cuts down on hospitalization and arduous travel. It offers frequent contacts with clinicians, where patients feel at ease—at home or close to home."

Estimates have been made showing REMATE can save the VA $5,804,240 each year in inpatient and VA costs—travel and clinician time—per thousand patients annually.

Dr. Vaughn has also developed special listening devices that screen out background noises and are especially helpful to the hearing impaired and older adults.

Dr. Vaughn fell and fractured a hip during the past year, but she hardly paused in her service to other disabled persons. She moved her office and her telephone to her hospital room. With the help of a walker and a wheelchair, she continues her lectures to professional, community, and civic groups.

Her public service and professional activities have included appointments by the Governor of Alabama, formerly as a member of the State Board of Examiners for Speech Pathology and Audiology and currently as a representative of the President's Council on Employment of the Handicapped. Both assignments were for 5 years.

Dr. Vaughn is proud to be the grandmother of two boys and a girl, and she enjoys her hobbies: classical music, reading, crocheting, pedigreed cats, tropical fish and plants.●

FULL EMPLOYMENT

HON. ROY DYSON

OF MARYLAND

IN THE HOUSE OF REPRESENTATIVES

Wednesday, September 22, 1982

● Mr. DYSON. Mr. Speaker, last month this House passed one of the most important pieces of legislation that will come before the 97th Congress—the Job Training Partnership Act. This measure was not taken up as a cure all for the widespread and persistent unemployment which now cripples this Nation. It was but one step in what hopefuly will emerge as a comprehensive overall policy to put Americans back to work and meet our national objectives.

Putting Americans back to work must be the first priority of this Congress and the Nation. Not first after the test of time has been applied to the present administration's program of economic recovery, but now.

However, some seem to prefer short-changing millions of willing, productive workers by consigning them to welfare and unemployment compensation until the tides of recession change. By endorsing recession as the alternative to inflation, the current economic policies have resulted in reduced benefits and wages, lost jobs and lost opportunities for far too many people. While it is critically important to relieve real distress, extended unemployment compensation and other benefit programs address only the effects of severe joblessness. These programs and these solutions are essential, but we must do more. If not, what kind of a vision do we have for America's future?

The statistics we read today only tell half the story of unemployment. The other half, and the most important half, is the terrible havoc unemployment wreaks on the lives of those millions who are unemployed. We cannot calculate, we cannot sincerely contemplate the real magnitude of this problem, especially as it impacts upon the individual. But each of us has seen enough and heard enough to understand that the loss of one's job sometimes results in the loss of one's dignity and hope. What we need is a long-range comprehensive plan which emphasizes full employment and offers the hope and opportunity for everyone to earn a decent living.●

PHILIPS INDUSTRIES CELEBRATES 25TH ANNIVERSARY

HON. TONY P. HALL

OF OHIO

IN THE HOUSE OF REPRESENTATIVES

Wednesday, September 22, 1982

● Mr. HALL of Ohio. Mr. Speaker, 25 years ago this October, a Dayton, Ohio man left his successful 18-year-old career in retail merchandising to buy a small company which manufactured just one product—aluminum windows for mobile homes. At the time, the enterprise had just one plant employing 20 people.

That man was Jesse Philips. Today the company which he founded a quarter century ago has grown into a giant in the building industry. And its chairman has become a leader of the Dayton community and a national business figure.

From just one product, Philips Industries expanded during the 1960's to manufacture components in the recreational vehicle and manufactured housing industry. By 1969, the company operated 21 plants and had become the leading supplier specializing in this field.

In the next decade, Philips Industries continued to expand, and it entered the conventional housing market by producing a range of home fixtures. The new segment grew rapidly during the 1970's.

The 1980's have already seen further expansion and diversification to include manufacturing in all segments of the building industry. Recently, the company entered markets outside its traditional base.

Today, Philips Industries operates 34 plants with almost 4,000 employees and worldwide sales. Its headquarters remains in Dayton.

Philips Industries stands as strong financially and organizationally as it has ever been. Despite the lingering recession, during the last fiscal year Philips Industries enjoyed the most profitable year in its history. The first quarter of the new year set a company record for sales and earnings.

Finally, I would like to say a word about the founder of Philips Industries, Jesse Philips. Jesse has been a tireless worker who has accepted a deep responsibility not only for his fellow Daytonians but the broader world community.

The record of Jesse's civic involvement is long and varied. It includes serving as director of the Dayton Area Chamber of Commerce, trustee of Oberlin College and the University of Dayton, and associate chairman of the Dayton Community Chest Drive. He has been a part of the Miami Valley Council of Boy Scouts of America, the Dayton Council of Salvation Army, and the Dayton Art Institute.

He has also served as chairman of the building committee of the Dayton Jewish Community Center, whose principal building is named for him.

Congratulations on this milestone, Jesse. Here is to many happy and productive years ahead for you and Philips Industries.●

HISTORIC PRESERVATION

HON. LES AuCOIN

OF OREGON

IN THE HOUSE OF REPRESENTATIVES

Wednesday, September 22, 1982

● Mr. AuCOIN. Mr. Speaker, as a member of the Appropriations Subcommittee on the Interior, I have come to understand what historic preservation is all about. It is preserving our Nation's heritage by saving historic sites, publications, and artifacts from extinction.

Recently, Mr. Chet Orloff, development officer of the Oregon Historical Society in Portland, published an article in The Oregonian describing the importance of historic preservation. Mr. Orloff points out the value of preservation and the compelling reasons for Federal Government support. He also outlines the major role the National Trust for Historic Preservation has played in our Nation's preservation activities.

Mr. Orloff makes several excellent observations about preservation and I would like to share them with my colleagues.

HISTORIC PRESERVATION HAMSTRUNG

(By Chet Orloff)

Like a tree, a nation depends on its roots for sustenance, support and growth. A sense of roots is necessary to mental health and is especially crucial in an age of doubt and alienation. In the face of economic uncertainty and worldwide challenge, Americans as never before need the assurance of their roots, of a collective continuity.

Continuity has two sides, the future and the past. Knowing our history, we can establish goals and visions for a shared future. An objectively understood past, which includes race, religion and neighborhood, gives us the foundation for personal and communal confidence and growth.

Representing the largest American community, the federal government must preserve our nation's heritage with the active initiative, involvement and help of individuals and organizations in the private sector. Just as you cannot catch up with history, you cannot catch years of history that are lost forever due to neglect. But today, an administration that professes a strong belief in tradition is neglecting our nation's rich history.

In his budget cuts in the areas of historic preservation, publications and exhibitions, President Reagan may believe he is being frugal. Regrettably, his actions are negligent, wasteful and, because of the nature of historic materials and information, quite final. At his direction, our government is withdrawing its modest yet far-reaching investment in programs that have energetically and efficiently saved countless invaluable facts and observations, historic sites and cultural artifacts. Taken together, these ingredients of history add to and enrich our definition and reflection of ourselves as Americans.

One wonders what Reagan would have done had he been president during the Bicentennial. During the last year and a half, his administration has tried to reduce or eliminate virtually every federal program supporting historical endeavors and preservation. The National Endowment for the Humanities has absorbed severe cuts, sharply reducing the number of publications and exhibitions it can help local organizations nationwide provide to their communities. Reductions the administration has called for will prohibit or limit the geographic range of major traveling museum exhibitions that have inspired, educated and delighted tens of millions of Americans in the last decade.

The Oregon Historical Society's current exhibition, "Soft Gold," and many other regional events and exhibits are possible only with some federal participation.

In the latest proposed federal budget, the National Historical Publications and Records Commission receives no funding, thereby placing in jeoparty the publication of important and heavily used documents. These documents, including the works of prominent American statesmen, scholars, scientists and artists, are essential to the complete understanding of American history, an understanding now more necessary than ever if we are to resolve the complex, and historically related, problems that beset our nation.

"Let us preserve the records," wrote Thomas Jefferson, "not by vaults and locks . . . but by such a multiplication of copies as shall place them beyond the reach of accident." An architect, Jefferson surely would have been concerned with the preservation of America's cultural heritage. Along with other early national leaders, he had a keen sense of history and without doubt would have joined the majority of us in recognizing the importance of preserving nationally and regionally treasured sites and buildings.

For 33 years, the national Trust for Historic Preservation has led our nation in preserving structures and places inseparable from the people and events woven into our nation's origin and growth. In Oregon, the trust's presence can be seen in Portland's Old Town, the Pittock Mansion, Pioneer Courthouse, Timberline Lodge, the John Day fossil beds and the Jacksonville restoration. These and many other successful preservation efforts are the result of the strong partnership between the trust and dedicated individuals and organizations such as our state and local historical agencies. The trust's finest work has been in this highly successful promotion of joint ventures between the private and public sectors. Politically, it has long enjoyed and earned bipartisan support in Congress.

Today, the Reagan administration has called for the near total abandonment of the federal government's role in preservation, and it has unloaded federal responsibility on the hard-pressed states. But it is a fact that Mount Vernon, and Monticello, Fort Vancouver and the Alamo belong to the entire nation. Preservation of them transcends state lines.

The preservation of our nation's history is a national trust and a national responsibility. Through public and private partnerships, this preservation and the public presentation of our history can be accomplished

on a national level for less than $100 million a year, or .02 percent of this year's federal budget. Our question must be, what are the priorities of a conservative administration that will not dedicate even so tiny an amount to help conserve America's abundant past?

The identity we lose will be irretrievable, the reflection in our national mirror will continue to become more and more dim.●

ONE OF CLEVELAND'S BRIGHTEST STARS

HON. RONALD M. MOTTL

OF OHIO

IN THE HOUSE OF REPRESENTATIVES

Wednesday, September 22, 1982

● Mr. MOTTL. Mr. Speaker, one of Cleveland's leading civic boosters, a man who has held a series of responsible positions in the business world throughout his life, is Campbell Walter Elliot, a long-time friend of mine.

Cam Elliot is a native of St. Louis and came to Cleveland in 1956 as senior vice president of the Midland-Ross Corp., one of my hometown's largest employers. He was president and chief executive officer of American Ship Building Co. in the early 1970's. Since locating in Cleveland, Cam has been at the forefront of many civic and charitable endeavors.

As president and chief executive officer of the Greater Cleveland Growth Association from 1973 to 1977, he helped pave the way for Cleveland's rebound from the depths of despair. It was with Cam's guiding hand, that our downtown was able to experience an incredible rebirth.

When Cam retired from the Growth Association, some people assumed he would revert to his true loves, his wife Dorothy and children Mary Frances, George, and Michael, not to mention his golf game. But those of us who knew this energetic man better knew that normal retirement just would not do.

Cam heeded the call of his close friend, Laury Jones, chairman of the Van Dorn Co. of Cleveland, and joined Van Dorn as vice president of public affairs. He still puts in 60-hour weeks in that capacity.

Despite the workload on the job, Cam and his bride have had the opportunity for extensive world travel the past few years. He has been a goodwill ambassador for Cleveland and the United States to some of the most exciting spots on the globe.

As long as Cleveland, Ohio, has such favorite sons as Cam Elliot working in its behalf, Cleveland will continue to rebound higher and higher.●

SUBSTITUTE AMENDMENT TO H.R. 6457—HEALTH RESEARCH EXTENSION ACT OF 1982

HON. JAMES T. BROYHILL

OF NORTH CAROLINA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, September 22, 1982

● Mr. BROYHILL. Mr. Speaker, I am concerned about many of the provisions of H.R. 6457, the Health Research Extension Act of 1982. Of principal concern are the excessively high authorization levels for the expiring authorities of the National Cancer Institute, the National Heart, Lung, and Blood Institute, and the Medical Library assistance programs of the National Institutes of Health (NIH). Another concern is the creation of new authorizations for specific program areas at NIH. This will yield additional costs. The bill would also reduce the amount of dollars available for biomedical research by diverting resources from research to numerous administrative requirements.

In addition, title IV of the PHS Act is recodified, making unnecessary and potentially disruptive changes in the management and operating procedures of the NIH and its component institutes. The bill also would create a detailed, inflexible administrative framework that may have an undesirable effect on the quality of research conducted and supported by the NIH.

To correct these problems, Congressman GRAMM and I will offer an amendment in the nature of a substitute to H.R. 6457 when it is considered on the House floor. Our amendment makes the following changes:

It provides lower authorization levels for the expiring NIH programs. This will permit continued support for important biomedical research projects at levels above the 1982 budget. These figures will be more in line with those contained in the companion bill in the Senate.

It provides for a simple extension of expiring authorities rather than a complete revision of NIH. This will be less disruptive to the agency's operation and would provide for only those changes which are essential. This will also eliminate troublesome provisions, such as the unwarranted transfer of other PHS components to NIH.

It includes a provision for a study of humane treatment of research animals. This will improve oversight of the use of those animals for research purposes and will promote alternatives to the use of live animals.

Our amendment also creates a new Arthritis Institute similar to the one contained in the Pepper and Goldwater bills. In addition, a study of the organizational structure of NIH is included in order to establish a framework for future decisions regarding the creation of new institutes.

In order that all of our colleagues have an opportunity to look over this substitute amendment, I have today inserted the amendment in the CONGRESSIONAL RECORD under the "Amendments" section.

I believe that our amendment addresses essential concerns such as the continuation of important research programs at adequate levels of funding without impeding efficient NIH management, and I urge my colleagues to vote "yes" on the Broyhill-Gramm substitute.●

H.R. 6514

HON. PETER A. PEYSER

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Wednesday, September 22, 1982

● Mr. PEYSER. Mr. Speaker, when H.R. 6514, the immigration bill reaches the House floor, I will offer an amendment to clarify the status of individuals who have been granted asylum. Specifically, the amendment would provide that a person who has been granted asylum may not be involuntarily removed from the United States notwithstanding the laws of any State or any judicial decree of any court of any State.

This amendment would clarify the status of Walter Polovchak, the 15-year-old Ukranian boy who is involved in an Illinios State court custody battle. As my colleagues know, Walter fled from his parents to avoid returning with them to the Soviet Union and was granted asylum by the Immigration and Naturalization Service. Pursuant to a State court proceeding he was placed in the custody of the State. However, an intermediate appellate court in Illinois reversed the lower court's decision and this decision is being appealed to the Supreme Court.

It is clear that a State court custody award of Walter to his parents who are living in the Soviet Union would conflict with the asylum status granted to Walter by the Immigration Service. This would clearly violate the supremacy clause. This amendment will insure that Walter's rights are protected.

Testimony was presented on July 28 before the House Foreign Affairs Subcommittee on Human Rights that Walter would face not only continued religious persecution but imprisonment if he returned to the Soviet Union.

Mr. Speaker, we cannot allow Walter Polovchak and others who have been granted asylum to be removed from the country against their will. The Federal grant of asylum by the Immigration Service pursuant to its authority under the Immigration and Nationality Act may not be interfered with by State court decree or law.

The exact language of the amendment follows:

AMENDMENT TO H.R. 6514

Page 32, line 22, strike out the close quotation mark and the period following "asylum" and add after that line the following:

"(e) Notwithstanding the laws of any State or any judicial decree of any court of any State but subject to section 241, no person who has been granted asylum under this section may be involuntarily removed from the United States.".

Page 32, line 20, strike out "subsection" and insert in lieu thereof "subsections".●

GRAIN MARKETS IN THE U.S.S.R.

HON. LARRY WINN, JR.

OF KANSAS

IN THE HOUSE OF REPRESENTATIVES

Wednesday, September 22, 1982

● Mr. WINN. Mr. Speaker, the Soviet Union has a traditional food problem—that is, it will be forced to the import grain market next year once again to make up for big grain shortfalls. Meanwhile, the United States also has a food problem. We produce surpluses every year, subsequently depressing grain prices and forcing Government payments up. But at least our people are fed without monumental food lines at the corner grocery store as is the case in Moscow, Leningrad, and Kiev. The Soviet situation is interesting. The International Wheat Council in London, representing the major exporting and importing countries around the world, recently compiled a report on the Soviet food situation through 1990.

The Soviets are in the midst of their 11th 5-year plan with the goal of more food as a chief concern. In the past, Moscow concerned itself with developing heavy industry for its enormous defense budget at the expense of basic needs for its population. Military spending is still the No. 1 budget priority but slowly and inefficiently the Soviets are realizing the weaknesses in their economy, especially in agriculture. The U.S. Department of Agriculture estimates that Soviet grain production in 1982 will be 170 billion metric tons, some 70 billion tons short of a previously stated goal for this year. Under the 12th 5-year plan conceived for 1986-90, the Soviets are hoping to produce over 250 billion tons of grain a year, but many experts concede this goal is unattainable.

While Moscow is scrambling to become agriculturally self-sufficient, the United States is in a position to establish a profitable foreign grain market on a long-term basis. The Soviets do not gain anything by buying American grain. Soviet grain sales create profits for our hard-working farmers and their trade can go a long way in revitalizing farm prices. When President Reagan reviews our current 1-year agreement with Moscow, he will hopefully approve a multiyear pact which will be more sensitive to the plight of the American farmer.●

THE SAFETY OF GOVERNMENT DEBT ISSUES

HON. BENJAMIN S. ROSENTHAL

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Wednesday, September 22, 1982

● Mr. ROSENTHAL. Mr. Speaker, the investing public is understandably very concerned about the safety of their cash investments following the failure of the Penn Square Bank in Oklahoma City and of the two New York Government securities dealers, Drysdale and Lombard-Wall. The mutual fund industry has sought to capitalize on this concern for safety by creating a special class of money market mutual funds that invest exclusively in Government securities. These Government-only mutual funds have grown very rapidly within the past year.

Unfortunately the public is largely unaware of what kinds of investments these mutual funds actually make, under the label of "Government only." Some of these funds invest heavily in the securities of quasi-private entities, such as Federal National Mortgage Association, the Farm Credit System, and the Federal Home Loan Mortgage Corp., which have no direct Government guarantee or backing for their securities. Furthermore many of these funds invest heavily in repurchase agreements issued by dealers or brokers and having some kind of Government securities, standing behind them as collateral. While most of these securities and repurchase agreements are sound investments, they are not entirely free of risk, as the name "Government" might imply.

I would like to share with my colleagues an important and informative article on this subject by Michael Quint that appeared in the New York Times, Sunday, August 15. Mr. Quint points out the limitations and possible sources of risk in both repurchase agreements and so-called Government securities.

In my view, the reason the public does not understand these factors better is because the mutual fund industry does not inform the public properly through its advertising and promotional literature. As chairman of the Commerce, Consumer, and Monetary Affairs Subcommittee, I have therefore written to SEC Chairman John Shad to request SEC review of the adequacy of the advertising and promotional literature prepared by the mutual fund industry on Government securities.

Mr. Shad's initial response in April refused to acknowledge that there was any problem. Last week, however, in response to my subsequent request for further review in this important area, Mr. Shad reversed his previous position regarding the risks of repurchase agreements. He announced a thorough SEC staff review of whether new regulations or new standards for disclosure in mutual funds prospectuses may be needed regarding mutual fund investments in repurchase agreements.

Unfortunately, the staff review he announced still did not include any review of the advertising and promotional material employed by the mutual fund industry. For this reason I remain very concerned about whether the investing public will be assured of receiving adequate and fair information about the risks and investment policies of their mutual funds from the funds themselves.

The public needs to have this information about Government securities properly understood, and in light of the SEC's reluctance to take responsibility for policing the industry's advertising standards, I am pleased that the New York Times has contributed in this way to the needed public understanding.

The article follows:

[From the New York Times, Aug. 15, 1982]

THE SAFETY OF GOVERNMENT DEBT ISSUES

(By Michael Quint)

As the number of business bankruptcies rises, the safety of Government securities becomes increasingly attractive to investors.

With the popularity of Government issues there is some confusion about the distinctions between Treasury securities, securities issued by Government agencies and the short-term financial instruments backed by those two kinds of securities.

The $800 billion of publicly held bills, notes and bonds issued by the United States Treasury are the nation's largest, highest-quality, and most actively traded group of debt securities.

The Treasury securities are distinct, however, from $300 billion of securities known as Government agencies that come in several forms and maturities and offer slightly higher yields than Treasury bills, notes and bonds. The yield spread varies with market conditions, but ranges from as little as one-tenth of a percentage point for short-term issues to two percentage points or more for longer-term issues.

Although Federal agencies that issue securities were created by acts of Congress and operate with Government oversight, the extent of Government backing for their securities ranges from the full faith and credit of the United States to no backing at all. The assumption in the market place is that Congress would not allow one of its creations to default.

Agency issues have found a niche in the portfolios of investors—including money market mutual funds—who want to combine safety with a higher yield. Some funds use their holdings of agency securities to buttress ambiguous claims of "Uncle Sam safety," "United States Government" securities, or Government agency securities. A money fund explains what it means by "Government" or "agency" in the section of its prospectus called investment policy.

Besides direct purchases of agency issues, many money market mutual funds invest in repurchase agreements, in which the fund buys a security from a large commercial bank, for example, with the agreement that the bank will repurchase it at a fixed, slightly higher price at a specified date—usually a week or less in the future. By selling the security at a higher price than it paid, a money fund is compensated for the use of its money.

While the risk of default on the underlying securities themselves is nil, there is a risk that they might not be repurchased as agreed.

In that event, the money fund would hold the securities used as collateral for the repurchase agreement, but it could sustain a loss. For example, if the initial seller of the securities went bankrupt, it is conceivable that a bankruptcy judge might not allow the money fund to sell the security and get its cash back. Or, during bankruptcy litigation, the value of the security might decline to less than the fund had paid for it.

The bankruptcy scenario is not so farfetched, considering that some money market mutual funds have arranged repurchase agreements with savings and loan associations and savings banks, commercial banks and securities dealers. Last week's bankruptcy filing by Lombard-Wall Inc. was the most recent illustration that some of these firms are financially strained. Last May, Drysdale Government Securities Inc. failed to satisfy the terms of repurchase agreements in which it was a party.

Such funds can rightfully claim their repurchase agreements are of high quality, but the investor should realize that there is more risk than with direct ownership of securities. Most funds disclose the maturity and type of security of their repurchase agreements, but they do not identify the other party in the transaction.

The use of agency securities and repurchase agreement is so pervasive that the only genuine Treasury securities money market fund is Capital Preservation Fund I, based in Palo Alto, Calif.

"Partly because of Drysdale, we changed our investment policy in June to eliminate repurchase agreements," said James Benham, president of the management company for the Capital Preservation Funds.

The most active issuers of Government agency debt securities are these:

Federal National Mortgage Association, commonly known as Fannie Mae, its function is to support the housing industry by making a secondary market in home mortgages. It finances purchases of mortgages by selling discount notes due in 30 to 270 days and longer-terms debentures—neither of which is backed by the Federal Government. Mortgage participation certificates that it issues are secured by the mortgages it helps finance and by a Fannie Mae guarantee.

Federal Home Loan Mortgage Corporation, known as Freddie Mac, or the Mortgage Corporation, it also issues mortgage participation certificates which represent an interest in a pool of home mortgages whose monthly payments of principal and interest are passed through to the investor. Its mortgage participation certificates are backed by the agency's guarantee, but have no direct Government support.

Government National Mortgage Association, commonly know as Ginnie Mae, it is best known for its guarantee of G.N.M.A. pass-through securities backed by pools of home mortgages insured by either the Federal Housing Administration or the Veterans Administration. Furthermore, the pass-through securities are backed by the full faith and credit of the United States.

Federal Home Loan Banks System, to finance loans it extends to savings and loan associations, the Home Loan Bank System sells short-term discount notes plus longer-term securities due in several years. These securities are not guaranteed by the Government, though the Treasury has the authority to buy up to $4 billion fo the system's debt. The securities are backed by the assets of the 12 Federal Home Loan Banks.

Farm Credit System, it sells short-term notes and bonds to finance loans made to farmers and agricultural businesses by the Banks for Cooperatives, the Federal Land Banks, and the Federal Intermediate Credit Banks. The borrowings are collateralized by assets of the regional banks, but are not guaranteed by the United States Government.●

GREEK ORTHODOX CATHEDRAL OF NEW JERSEY DEDICATED IN ANCIENT RITES

HON. HAROLD C. HOLLENBECK

OF NEW JERSEY

IN THE HOUSE OF REPRESENTATIVES

Wednesday, September 22, 1982

● Mr. HOLLENBECK. Mr. Speaker, the St. John the Theologian Greek Orthodox Cathedral of New Jersey will be dedicated this weekend in the ancient ceremony of consecration. These rites date back to the Old and New Testaments and the earliest years of Christianity.

The consecration of the cathedral is one of the most important events in the life of a Greek Orthodox Church. My thoughts and prayers are with the parishioners on this historic occasion, and I am delighted that I will be extending my congratulations personally at the consecration banquet.

The cathedral—and the activities and civic projects it supports—have brought to our communities a center for the positive expression of basic American traditions: faith and belief in God, family, and country. Obviously, in our fast paced, highly mobile society, such contributions to community, family and religious life are tremendously important.

Mr. Speaker, St. John the Theologian was formally founded on Palm Sunday, April 14, 1968, for Greek Orthodox families in communities of the Ninth Congressional District including Tenafly, Fort Lee, Bergenfield, and Englewood. On April 5, 1979, I was pleased to attend ceremonies where Bishop Silas was enthroned as the Greek Orthodox Bishop of the Diocese of New Jersey and the St. John the Theologian was designated a cathedral and became the Episcopal See of Bishop Silas.

The cathedral has grown to serve more than 800 families who are registered members and some additional 200 families and individuals. This growth in size and in community influence is the result of the efforts of many, many dedicated parishioners who are contributing of their time and talents. I am sure that my colleagues will wish to join me in recognizing the congregation of St. John the Theologian at this historic milestone.●

MISCELLANEOUS TARIFF AMENDMENTS OF 1982

HON. LARRY E. CRAIG

OF IDAHO

IN THE HOUSE OF REPRESENTATIVES

Wednesday, September 22, 1982

● Mr. CRAIG. Mr. Speaker, today, Congress is voting on H.R. 6867, the miscellaneous tariff amendments of 1982, which combines 30 separate and various tariff and trade bills, and amends the Tariff Schedules of the United States. I ask my colleagues to vote "no" on this bill.

Generally, I favor this legislation, but contained within these amendments is a provision which would remove the 30-year-old embargo on mink, fox, and other fur-pelt imports from the People's Republic of China. This action has the ability to increase imports up to 1 million additional fur pelts per year. The U.S. pelt industry would be devastated. The State of Idaho, which I represent, and 22 other States would feel the impact of H.R. 6867.

A large number of meat processing plants would also be adversely impacted by passage of this legislation. Many meat byproducts have no other value than being used as mink feed. With a declining domestic production of furs, the only result can be a less favorable income picture for the meat processing industry. The fur industry and the meat processing industry, as has much of the economy, have had difficult times. Passage of this bill would only exacerbate the situation.

Because this is a suspension vote and no amendments are in order, I am requesting a "no" vote on H.R. 6867.●

LAKELAND NEWSPAPERS ARE NO. 1—AGAIN

HON. ROBERT McCLORY

OF ILLINOIS

IN THE HOUSE OF REPRESENTATIVES

Wednesday, September 22, 1982

● Mr. McCLORY. Mr. Speaker, in these days of large scale criticisms of the national press it is gratifying for me to report the honors being bestowed upon a group of newspapers in my congressional district of Illinois—the Lakeland Newspapers.

Recently, the Illinois Press Association in spirited competition among the community newspapers published in

Illinois gave six first place awards to the Lakeland Newspapers. This marks the third time in 6 years that the Lakeland Newspapers has been granted this top newspaper honor in Illinois.

In addition to receiving the coveted Verle V. Kramer Award recognizing overall journalistic excellence in its class, the newspaper group also won first place awards for its "Modern Family" section, for general excellence, for typography and graphics, for feature photography, and for its editorial page.

These achievements by Lakeland Newspapers are particularly meaningful to me. The paper's publisher, William H. Schroeder and the company's president, Harold R. Kirchhardt are long-time personal friends. They, in turn, are the successors of the founder of this outstanding and successful chain of community papers—Marshall Schroeder who continues to reside in my district and serves as a consultant to this great media enterprise.

Responsible journalism is a key element in our constitutional system. The first amendment to the Constitution assures press freedom—a privilege which the publishers of the Lakeland Newspapers have exercised responsibly for the public good.

Mr. Speaker, in calling attention of my colleagues in this body to the No. 1 hometown newspapers of Illinois, I am also expressing pride in Bill Schroeder, Harold Kirchhardt, and their devoted and capable colleagues who serve the Lakeland Newspaper chain.●

OPTIMISM IN THE SUNBELT STATES

HON. CHARLES WILSON

OF TEXAS

IN THE HOUSE OF REPRESENTATIVES

Wednesday, September 22, 1982

● Mr. WILSON. Mr. Speaker, under leave to extend my remarks in the RECORD, I include the following:

OPTIMISM IN THE SUNBELT STATES

(By Robert L. Haught)

(The following report is based on observations made during an 18-day motor trip through 12 Sunbelt states, with stops in 10 major cities. Talks with local citizens, as well as business and political leaders, combined with reviews of area news coverage yielded this indicative, if not academic, analysis.)

A spirit of optimism prevails in the Sunbelt, in spite of unfavorable economic conditions. Migrants from Frostbelt states have made a noticeable impact in many areas of the region. There's little criticism of the current administration's broad domestic policies, while local concerns draw strong interest. Major cities are finding new ways to cope with problems, and overall, Sunbelt living is still very good.

These are personal impressions gained from a 4,200-mile tour of southeastern and southwestern states in late July and early August, a refreshing trip away from the nation's capital, where problems often loom larger than reality. The La Grange, Ga. Daily News provides a much different perspective than the Washington Post.

One of the first indications that Sunbelt citizens take things in stride came from Mike Harrison, a young tour guide at the Hermitage, Andrew Jackson's home in Tennessee. He often points out that President Jackson paid off a national debt of $2.5 billion. Does this comment trigger complaints about the current deficit? "Hardly ever," he said.

That isn't to say people aren't concerned about the economy in America's heartland. A survey by the Memphis Commercial Appeal revealed widespread layoffs and plant closings in several nearby states. Unemployment is above the national average in Alabama (13.9 percent), Mississippi (11.6 percent) and South Carolina (11.5 percent), although this is partially due to young people looking for summer jobs. With the U.S. jobless rate at 9.8 percent for June, Tennessee took a seasonal jump to 11.2 percent, despite an increase of 2,000 more people with jobs.

International Harvester is closing its Memphis plant, resulting in a loss of 2,400 jobs. In Birmingham, U.S. Steel Corp. has laid off 10,000 workers, including 3,400 when a plant closed in June. Cast Metals Co. closed its foundry in Shreveport, idling 350. Oklahoma City is still feeling the effects of a May layoff of 2,500 General Motors workers.

At Yazoo City, Miss., Amco Products, a manufacturer of farm tillage and crop bed equipment, has laid off 100 workers in the last 18 months, according to Emory Hodgson, vice president and general manager.

"The hell with this recession talk, this is a depression in the farm implement business," said Hodgson. "We're in a survival mode."

Even in oil-rich Texas, there are signs of economic distress. In the first half of 1982, 17 Dallas-area oil companies took bankruptcy, almost triple the number for the same period last year—a symptom of an industry downturn marked by cuts in capital spending budgets and layoffs of exploration and service company workers.

"Faltering Economy Delays Bond Issue for Water, Sewer" was the headline on a story about North Carolina Gov. James B. Hunt's decision against putting a $300 million proposal on the November ballot this year.

But for every gloomy headline, there's a cheerful note to be found. The Yazoo City plant has accumulated a few orders and is rehiring 15 of its workers. Gulfstream American Corp. recalled 825 business aircraft production workers laid off at its Bethany, Okla. plant in mid-May. A new $500 million Nissan truck plant being built near Nashville will employ 2,200 when production begins next year. In Little Rock, Ark., unemployment is lower than a year ago, due to new industry and expansion of service and distribution industries. Several Sunbelt states are below the national unemployment average, with Oklahoma running at 5.9 percent and Florida at 7.5 percent.

Comments by individuals reflect a generally upbeat feeling throughout the 12-state area from Virginia to Texas.

"A lot of people are out of work around here," said Larry Carnell, a West Memphis, Ark. Exxon dealer, "but my business is good."

Mike Kidd, Atlanta electrical products salesman, expressed similar views, adding that Georgia Pacific was helping employees being transferred to the area with home loans at below market interest rates.

Housing, a good economic barometer, figures in most discussions about the economy.

"Of course, everyone knows the housing industry is stagnant," Claude Ramsey, president of the Mississippi state AFL-CIO said.

In Dallas, expensive homes ($500,000 and up) are selling well, according to a spot check of realtors by the Dallas Times Herald. Rhonda Samuels, a Dallas-area title company manager, said real estate sales had been brisk. Housing sales in Nashville were up 39 percent in June.

Some innovative ideas are being tried in various parts of the Sunbelt to encourage home buying. Employees of Mississippi Power & Light Co. can get a five-year, interest-free $5,000 loan from the company to help buy or build an energy efficient electric home. A Houston homebuilder, Leo McConnell, gives away automobiles to home buyers.

Washington's preoccupation with President Reagan is not as intense west of the Potomac. There are critics, such as M. R. Goss of San Augustine, Tex., who complained in a letter to the Houston Post that Social Security checks were being cut because the government is rounding off to even dollars. The Pensacola (Fla.) Journal criticized a Commerce Department decision to allow killing nearly 1,000 porpoises for a scientific study. But for the most part, Sunbelt citizens seem to be tolerant of administration policies.

"I think people still want to give Reagan's economic program a chance," said Grace Boulton, Republican national committeewoman from Oklahoma.

Guthrie, Okla. printer Speedy Weems went even further, saying, "There's not any place in the country where Reagan has more friends than here."

As is often the case, local issues are of the greatest concern. San Antonio city officials, seeking to relieve consumer anguish over soaring utility bills, are working on a plan to reward those who conserve electricity and penalize those who don't. South Carolina peach growers welcomed EPA approval of a one-time application of the outlawed chemical DBCP to control the spread of ring nematodes. Interior Secretary James Watt's decision to make a billion acres of offshore areas available for oil and gas leasing aroused concern along the Gulf Coast.

One local problem that is being felt in most major cities of the south and southwest is that of immigration, primarily from northern states. It is especially apparent in Houston, now the nation's fourth largest city. Bill Dunnagan, who teaches in a Houston suburb, said the influx of northerners has had a definite impact on the schools. The heavy flow of jobseekers to Texas led the state to publish a pamphlet warning about stiff requirements for public assistance.

Oklahoma City Mayor Patience Latting said, "We're getting a lot of new residents—carpenters and other skilled workers. Some are finding jobs but others are not."

Joe Banks, resident of the Bella Vista, Ark. retirement community, said, "the Yankees are taking over, all right." But he added, smiling, "They bring a lot of money with them."

Many such migrants have given up and gone back north. But many more have remained, like Jeff Adamson of Shreveport, who said: "I couldn't even get a job pumping

gas in Baltimore. In this city there's no reason why you shouldn't be working."

Michigan native William E. Kell is retiring from the FBI after 4½ years in Little Rock. He says he and his wife have come to love Arkansas and will probably stay.

The Sunbelt continues to attract new industry. The Canadian-based Artesian Oil and Gas Co. recently announced it is moving its corporate headquarters to Oklahoma City this fall. San Antonio got a branch office of Charles Schwab & Co., the world's largest discount brokerage house. The San Antonio Light said Schwab credited "burgeoning Sunbelt business activity and wealth" with luring the business to San Antonio.

It would be incorrect to say that everything is rosy in the Sunbelt. The problems of crime, urban congestion, low farm prices, bad roads and all the symptoms of an ailing economy are being felt there as well as in the rest of the country. But in this region, the outlook is on the upswing and the view is toward the future. One cannot visit the Sunbelt without getting a renewed feeling of confidence in America and its people.●

CAMP GLYNDON

HON. CLARENCE D. LONG

OF MARYLAND

IN THE HOUSE OF REPRESENTATIVES

Wednesday, September 22, 1982

● Mr. LONG of Maryland. Mr. Speaker, this evening I have the privilege of attending the annual benefit dinner for Camp Glyndon located in my district. Camp Glyndon, which is supported solely by private contributions, provides diabetic children 2 exciting weeks at summer camp while training them to cope and lead full lives with diabetes.

Camp Glyndon would not exist without the support and dedication of hundreds of people. Tonight we honor Mr. Leonard Levine, chairman of the board, and one of the camp's sturdiest advocates. During the past 10 years he has worked to develop programs to assist diabetic children, insure adequate financial support and provide friendship to other camp supporters, counselors, and staff. Because of his unselfish dedication, as well as the work of many others, thousands of youngsters have had an opportunity to attend the camp, regardless of their ability to pay.

I know my colleagues join me when I say: "May Camp Glyndon continue to serve the diabetic children of our Nation for many years to come."●

FAZLUR R. KHAN 1929-82

HON. DON RITTER

OF PENNSYLVANIA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, September 22, 1982

● Mr. RITTER. Mr. Speaker, I would like to insert an article about the life of Fazlur R. Khan, an internationally renowned engineer who recently passed away. I encourage my colleagues to read this article which illustrates Fazlur Khan's numerous achievements as an engineer and scholar.

FAZLUR R. KHAN 1929-82

Fazlur R. Khan, prominent Partner and Chief Structural Engineer of Skidmore, Owings, and Merrill, Chicago, died March 27, 1982 during a business trip to Jeddah.

He was born April 3, 1929, in Dacca, Bangladesh. He received his Bachelor of Engineering Degree in 1950 from the University of Dacca. His education continued in the United States, where he received a Master of Science Degree in Structural Engineering in 1952, and both a Master of Science in Theoretical and Applied Mechanics and a Doctor of Philosophy in Structural Engineering three years later. All of his advanced degrees were from the University of Illinois at Urbana, Illinois.

After a short period in Karachi, he returned to the United States, and made his home in Chicago. He joined Skidmore, Owings, and Merrill in 1955, and remained with the firm until his death at age 52. He became Senior Designer with Skidmore, Owings, and Merrill his first year there, rising through Senior Project Engineer, Associate Partner, Head of Structural/Civil Division, and finally to Partner in 1970.

Dr. Khan had been responsible for the engineering design of many major architectural projects. He had developed a number of new structural systems for tall buildings, both for reinforced concrete and for structural steel. Among many of the significant tall structures designed by him, three special buildings that stand out are the 714 ft. tall One Shell Plaza building in Houston; the 100-story John Hancock Center in Chicago, the world's tallest multi-use building; and the 110-story Sears Tower in Chicago, the world's tallest building at 1,454 ft.

Dr. Khan also developed a new composite system for tall buildings, combining the advantage of both reinforced concrete and steel construction in one. The 52-story One Shell Square in New Orleans used this system.

In addition to his work with Skidmore, Owings, & Merrill, he was also an active member in many professional organizations, such as the National Academy of Engineering, the American Society of Civil Engineers of which he was a Fellow, the American Institute of Steel Construction, the American Concrete Institute, the American Welding Society, and the International Association for Bridge and Structural Engineering. He fulfilled these many responsibilities—in addition to being chairman of our Council.

He published more than 75 technical papers in engineering and architectural journals on topics relating to the analysis, design, and construction of complex structures.

At the Illinois Institute of Technology in Chicago, he was also an adjunct professor of architecture, where he taught since 1961.

All of Dr. Khan's remarkable efforts did not go unrewarded or unrecognized. The list of awards bestowed upon him for outstanding achievements is a long one, beginning even before he finished his education, with the Fulbright Scholar award in 1952. He was cited among the "Construction Men of the Year" in 1966, 1969, and 1971 and was voted "Construction's Man of the Year" in 1972, by Engineering News Record. He also received many medals, such as the Watson Medal for most meritorious paper from ACI in 1971, and the Lloyd Kimbrough Medal from AISC and the Oscar Farber Medal from the Institute of Structural Engineers in London, both in 1973.

He also received an honorary doctor of Science from Northwestern University in 1973, and an honorary doctor of Engineering from Lehigh University in 1980. Die Eidgenossiche Technische Hochscule (ETH), Zurich, Switzerland, also bestowed upon Dr. Khan an Honorary Doctor of Technical Sciences in 1980.

Other awards he received included: Chicagoan of the Year in Architecture and Engineering, AISC Special Award, Chicago Civil Engineer of the Year (ASCE), Alumni Honor Award (University of Illinois), Middlebrooks Award (ASCE), Alfred E. Lindau Award (ACI), National Academy of Engineering, State Service Award (Illinois Council of the AIA), Ernest E. Howard Award (ASCE), G. Brooks Earnest Award (ASCE Cleveland Section).

Dr. Khan left behind him a legacy few men can equal. A legacy of buildings that will stand the test of time. A legacy of knowledge, which he bestowed upon others. And a legacy of ideas, which will sow the seeds for more to grow.

He is survived by his wife, Liselotte and his daughter, Yasmin and stepson, Martin Reifschneider.●

TRIBUTE TO ALBERT ZAPANTA

HON. JOHN H. ROUSSELOT

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, September 22, 1982

● Mr. ROUSSELOT. Mr. Speaker, I rise in recognition of Mr. Albert Zapanta and the latest honor that is to be awarded to him: The Golden Apple Award for Distinguished Service to Hispanic Students in Public Education.

Mr. Zapanta presently serves as director of external affairs for ARCO Solar Industries. He has held this position since 1980. Previous to this position, Al was special assistant to Lt. Gov. Mike Curb and before that he was a visiting professor at California State University. Al Zapanta has also done a stint in Washington, D.C., as a White House Fellow at the Department of Transportation and a member of President Reagan's transition team at the State Department.

For his contribution in the Army, Al was awarded the Silver Star, the Purple Heart, 5 Bronze Stars for valor, and 30 other awards and decorations.

Complementing this man's outstandingly successful career in both Government service and the private sector is his involvement with the American Society of Public Administration, the Society of Industrial Engineers, the American Red Cross, the National Board of the YMCA Armed Services Committee, and the advisory committee to the Olympic Organizing Committee of 1984. He also serves as a commissioner of the Los Angeles County Election Commission.

Albert Zapanta has enriched every group, organization or business he has been associated with—it is my pleasure to see his involvement duly noted by a dinner given in his honor by the Institute for Hispanic School Board Members and the Community and Human Resources Agency on October 1, 1982.●

JUVENILE DIABETES FOUNDATION BIKE 'N' HIKE DAY

HON. FRANK R. WOLF

OF VIRGINIA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, September 22, 1982

● Mr. WOLF. Mr. Speaker, diabetes is a major health problem in the United States which directly affects 10 million Americans and indirectly as many as 50 million Americans. Of these, there are an estimated 2 million Americans who have insulin-dependent diabetes—juvenile diabetes—which means they are dependent on insulin injections to live. Also, diabetes is the third leading cause of death from disease and is the first leading cause of new cases of blindness. In addition, the complications of diabetes lead to many other serious health problems.

About a decade ago, a number of parents of diabetics banded together because they did not know there was enough known about diabetes; there was too little research into the causes, effects, and a possible cure for diabetes. The Juvenile Diabetes Foundation was formed as an organization of volunteers to find ways to fund research and to comfort and help newly diagnosed diabetics and their families. On Sunday, September 26, the northern Virginia and District of Columbia/Maryland chapters of the Juvenile Diabetes Foundation are sponsoring Bike 'n' Hike '82. All funds raised through this event will go toward research in diabetes. Participants will solicit money pledges from sponsors for each mile they ride or hike.

Promotional support for this event has been donated by WASH-FM radio and JDF is most grateful for their interest and enthusiasm for this cause. Special thanks go to the Optimist Club of Vienna, Giant Food, High's, and Britches who have been most generous in their support of this effort.

Also, the Jaycees and Jaycee Women have provided ongoing support not only for this effort but for all efforts on behalf of JDF. Both groups are tireless in their efforts to further the goal of finding a cure for diabetes.

The locations for the Bike 'n' Hike are Rock Creek Park, Burke Lake Park, and Mount Vernon Bike Trail.

With the commitment by volunteers in gaining funds for diabetes research, as illustrated by this effort, I am confident that someday this major disease will have a cure. Today, insulin helps diabetes victims lead apparently normal lives, with the exception that an insulin injection is necessary to live. Importantly, insulin is not a cure. Someday, there will be such a cure and we must work to that end.●

CONGRESSMAN DELLUMS ON DEFENSE SPENDING

HON. JOHN CONYERS, JR.

OF MICHIGAN

IN THE HOUSE OF REPRESENTATIVES

Wednesday, September 22, 1982

● Mr. CONYERS. Mr. Speaker, I know of few Members of Congress who have grappled with the issue of military spending as intelligently, eloquently, and tenaciously as my esteemed colleague from California, RONALD V. DELLUMS.

He has served on the Armed Services Committee for many years as a voice of conscience and reason. He has challenged the orthodoxy of stepped up military spending in every area of the country. In March and April of this year he held a series of ad hoc hearings on the implications of the defense budget—its foreign policy, national security, economic, and moral consequences—and put together the most complete public record of opposition to defense policies that has ever been established.

Congressman DELLUMS' remarks before the National Newspaper Publishers Association on March 19, 1982, lays out in the most eloquent and reasoned terms the case against escalating military spending. I wish to insert in the RECORD at this point excerpts of his remarks.

CONGRESSMAN DELLUMS ON DEFENSE SPENDING

It is extremely difficult to be Black, to be in the left wing of the body politic, to be on the Armed Services Committee, and to be willing to take a global perspective. It is a very lonely road to travel in Washington, D.C. So, I come to this podium because you are the people that I wish to communicate with; because you are in communication with a major segment of the American population that desperately needs to become an inherent part of the struggle for peace in the world, for the eradication of the insanity of nuclear weapons, and to challenge the madness of a bloated, wasteful, unnecessary, dangerous and useless military budget. So, it is for that reason I choose to speak with you.

The policies that are being made at this very moment have such enormous implications and far-reaching consequences that we now have a moral imperative to act. The budget represents priorities and these priorities in turn represent values. Look at this budget, and specifically the military budget, for what it represents. I would suggest that this administration has proposed to the American people a rapid, substantial, sustained growth in America's military budget. Rapid, in that, over the past several years, many of my colleagues in various Congresses have argued that our military budget has never exceeded twenty-four or twenty-five percent of our total. Yet, the Reagan Administration has now projected a military budget that in the next few years will exceed thirty-seven percent of our total budget. As a matter of fact, the military budget proposal for fiscal year 1982 is roughly twenty-nine percent of the total budget and is growing rapidly.

A substantial growth in America's military budget occurred in the last year of the Carter Administration. Using budget authority figures, America spent $173 billion dollars on the military budget. The last act of the Carter Administration was to propose to the American people a budget for FY 1982, expenditures of $196 billion—a $23 billion dollar increase in one year.

This was not enough for the Reagan Administration. They proposed a military budget of $226 billion in FY 1982 and, for the most part, that budget passed; a $53 billion dollar increase in budget authority in one year at the same time we're cutting $48.5 billion from the nonmilitary side of the budget. Then, we attempted to tell the American people that in some way we were reducing the cost of government. Nothing can be further from the truth. What we were doing was decreasing revenues and certain aspects of expenditures as we were rapidly increasing defense spending.

Last year it was $226 billion. This year, the Reagan Administration is asking for $258 billion in budget authority. Alice Rivlin of the Congressional Budget Office has stated that even if you only talk about a seven percent real growth increase in America's military budget, by fiscal year 1987, America's military budget will exceed $422 billion per year. By the end of this decade we will be talking about over one half a trillion dollars on the military function alone. Now let me shock you with the absurdity of these figures in a different way. When I first came to Congress we were fighting and killing people in Vietnam. Our military budget was roughly $80 billion. Ten years later $173 billion. Next year $226 billion. The next year $258 billion.

A few years down the road, $422 billion. A couple of short years down the road, in excess of $500 billion per year. In the decade of the 1970's America spent one trillion dollars, one hundred billion, one trillion. An incredible amount of money. We will spend in excess of $1.6 trillion in the first five years of the 1980's. It is suggested that, given the Reagan Administration's projections for the decade of the eighties, that we will probably exceed four trillion dollars in the next ten years on the military function alone, which means that in a relatively short span of ten years we will have gone from a one trillion dollar decade military budget to perhaps in excess of four trillion dollars. Four times the amount of funds in one ten year period of time. Stated another way, in the next five years, we will spend, on an average, one billion dollars per day, seven days a week, three hundred and sixty five days a year for the next five years. That, to me, is an obscenity.

Now, it is within the context of this kind of expenditure that we need to see our responsibilities. Before we go to that, let's ask the question: how do you finance a rapid, substantial, sustained growth in America's military budget that goes from twenty-four percent to thirty-seven percent of the total budget, that goes from $173 billion to over half a trillion dollars; a budget that goes from one trillion dollars in one ten year

span to almost four trillion dollars in the next ten year span?

The problems of the world, on an increasing basis, are not military problems; they are social problems; they are political problems; they are economic problems and they have to be solved in their context. Building bombs cannot solve America's problems.

Now, what are the implications? What are the implications of this level of expenditure and this kind of foreign policy thrust? First of all, we stand on the threshold of nuclear disaster. This is a war-fighting budget. It is terribly important that we as Black people in this country, understand that clearly and unequivocally.

Ask yourself, what is the role of nuclear weapons in our lives? Is it to use them or is it for deterrence? Every intelligent mind that I've spoken with says the role of nuclear weapons in our lives has never been to use them—only to deter the other person from using them. Once you cross the threshold and use nuclear weapons, you have destroyed society as we know it. Lord Mountbatten, a brilliant British fighter, in 1979, just before he died, made that statement. And the tragedy, the danger or peril is that nuclear weapons are actually military weapons, and with that perception, someone will use them. And that's the danger. We should never talk about using nuclear weapons. Once you cross that threshold, we have destroyed life.

Maybe you and I, who are the communicators in Black America, must now educate our people, because the tragic reality is, that with all of the advancements that have been made, my confidence has to be in you. We sat here for three days, in those hearings, but all they could see was my black face, not the perception, not the values, not the principles, not the perspective, only the black face. CBS network ran me down for two straight weeks, called sometimes twice a day in order to get my view on minority recruitment in our ROTC, but could not deal with the six days of hearings where we looked at the enormous implication of the military budget. Now you tell me what do I conclude from that? That we can only be seen in very narrow and parochial terms. So my plea is with you. Martin Luther King died talking about a dream. And maybe the dream that he had is that dream that we now must champion, and that is the dream for world peace.

This Administration, has perhaps more singularly, more powerfully than any other Administration, crammed in our faces the implications of foreign policy and the military budget on our lives. Both because, as I said, the H bomb is an equal opportunity destroyer and we have to be concerned about the preservation of life, and because we have to be concerned about the priorities. I don't know if any of you watched this movie a few weeks ago, it was on network television, and it's called "World War Three." I don't particularly like network television, I think that it insults my intellect in many ways. But I think that because I am a representative of the people I must watch that tube quite often because I need to understand how my constituents are being propagandized. So, I watched "World War Three," the movie, because I wanted to see how they treated the end of the world. An interesting thing was that when it came to a decision to destroy the world, it was a handful of white males over fifty that made that judgment, alone. There were no women, although fifty-one percent of this country and the world are women. Three quarters of the people on the face of this earth are people of color and if you can sit in a room and talk about national security and only white males can—the arrogance of that is incredible. And so we need you.

The Black community needs you, America needs you and the world needs you. The world needs you because when Black people stand up and become an inherent part of the struggle for world peace, the challenge to the insanity of nuclear weapons, and to come fighting against the madness of this ever-increasing military budget, we can turn it around. And so in many ways it's our destiny. So, that's why I come to you. I come to you with that level of passion to say that we now must educate our people. This debate is not occurring in Black America.

Many of our politicians are not educating, our own politicians are not educating Black America with respect to these implications. In some way in our minds we keep this dichotomy between foreign policy and domestic policy. There is no such thing in the real world. How can you be a domestic racist and an international progressive? It doesn't work. How can you cut social programs that affect the ghettos and the barrios of America and then have an enlightened foreign policy with regards to the third world? How can you do it? How can you play divide and conquer in this country and not play divide and conquer in the third world? It cannot be done. How can you spend money in foreign policy and take it out of the hides of human beings in this country and then assume that there's no relationship?

White politicians come into Black America when they're campaigning and they talk about housing, jobs, education and affirmative action; then they get in their car, go across town and talk about a reactionary foreign policy, a multi-billion dollar military budget authority and they just gave away the money that they were going to spend, that they had talked in your community about using to solve the problems. And we have allowed them to do that.

If you as the publishers and the writers and the journalists of Black America begin to articulate these issues, in powerful terms, Black America will begin to ask these questions of all their representatives because we are also citizens of this planet and we must have the audacity and the arrogance and the dignity to understand our profound responsibility at this moment in American history and in this moment in the history of the world to save this planet, to save this nation, even from itself, and to save our people against the madness of global nuclear war.●

H.R. 6046

HON. LES AuCOIN

OF OREGON

IN THE HOUSE OF REPRESENTATIVES

Wednesday, September 22, 1982

● Mr. AuCOIN. Mr. Speaker, I want to state for the RECORD my opposition to H.R. 6046, the Extradition Act of 1982. This bill, which may be considered by the House before the end of the session, is fatally flawed.

H.R. 6046 narrows the scope of judicial review in extradition cases, handing this responsibility over to the State Department. Expanding the power of the executive branch at the expense of the judicial branch is an unnecessary abridgment of our system of checks and balances. This transfer of authority creates an open space for possible abuse of the civil rights of foreigners and U.S. citizens alike.

H.R. 6046 allows the United States to hold, without bail, Americans or foreigners who have been charged with a crime by a foreign government—without one scrap of corroborating evidence. The bill gamely calls for a promise that evidence will be produced sometime in the unspecified future.

Further, subsections of the bill would deny benefit of the political crimes defense to any person charged by a foreign government with committing a crime of bodily violence or a crime involving the use of a firearm, except in extraordinary circumstances.

For all the above reasons, and more, the Extradition Act of 1982 runs contrary to our proud history of respect for the individual—the cornerstone of our political system. I urge my colleagues to oppose this bill.●

ISAI GOLDSTEIN

HON. STEWART B. McKINNEY

OF CONNECTICUT

IN THE HOUSE OF REPRESENTATIVES

Wednesday, September 22, 1982

● Mr. McKINNEY. Mr. Speaker, with the celebration of the Jewish New Year, Rosh Hashanah, recently passed, and with the issue of international human rights very much a primary concern of this Nation, I feel compelled once again to draw attention to those persons suffering in the Soviet Union as a result of their desire for religious freedom. Isai Goldstein, an established physicist, formerly of the Tiblisi branch of the Mendelev Standards Institute, has been denied both employment in his field and exit visa status since his first request for emigration to Israel 11 years ago. Since that time, the Soviet Union has denied Isai's emigration visa on the grounds that he had "access to State secrets," despite the fact that his work was never classified.

Isai's application makes him one of the thousands of so-called "refuseniks" currently struggling in the Soviet Union. These refuseniks are mostly Soviet Jews who have sought visas for emigration and have been denied—all because they sought a basic human right, the right to religious freedom. The horrifying conditions and terrible treatment of the Jewish people in the Soviet Union leaves them no alternative but to seek an exit from their homeland and attempt a new life somewhere else in the world, where they can prosper in liberty and peace. However, the trend of the Soviet Union now seems to be to

lower the number of emigrants considerably, almost to a point where fewer than 3,000 will escape Soviet persecution this year, in contrast to the figure of 51,320 permitted to leave in 1979.

The Soviet Union's continued harsh oppression, institutional anti-Semitism, and concerted efforts to exterminate Jewish culture in Russia represent an appalling abuse of civil rights. As the number of freed Jews falls unproportionately each year, the conditions for refuseniks and other dissidents deteriorate in as unproportioned a manner. Hebrew school teachers and culture group leaders are arrested, and books and sacred artifacts are confiscated and destroyed. These cultural leaders and teachers then face lives of oblivion, convicted of imaginary crimes and sentenced to what is officially termed "internal exile" but what is really imprisonment in Siberian and Gulag labor camps, prisons, and mental institutions.

The United States has heard of the horrifying details of Soviet human rights abuse with the examples of mathematician Anatoly Shcharansky, who has been imprisoned and made to live in conditions like a prisoner from Auschwitz; Lev Mikhailovich, a radio engineer, made to live an existence of periodic jail terms; and Grigory Vasserman, a Hebrew teacher, who has been raided and beaten into semiconsciousness on several occasions by the KGB. The list could go on. Even in this case of Isai Goldstein, violence, terror, and abuse have been used. In 1973 Isai was imprisoned on charges of slandering the Soviet State. He was released some time later due to Western pressures, but was unable to rejoice, as his brother was deported to a Soviet labor prison camp near the Arctic Circle. In this instance, as in all the others, Congress should implore the Soviet Union to abide to some degree of human rights.

As our Constitution clearly states, each individual is entitled to some "certain unalienable rights," upon which no institution in the world can encroach. These undeniable rights to food, shelter, health care, education, and finally to civil and political liberty, are the instruments upon which the whole of civilized society has been founded upon for thousands of years. I believe that no nation has the right to supersede that sacred privilege of life.

Isai Goldstein is merely one of the thousands who have had these privileges violated, such guarantees that we so often take for granted. His suffering is not his alone. His family has been persecuted. His 6-year-old son, Avi, has been forced to register in a Soviet school where he will undoubtedly be subjected to abuse from school authorities and also from his fellow classmates. Isai himself has been accused of leading "a parasitic way of life," and has been threatened with even further "consequences" if he is unable to find work soon.

It is my hope that the Members of this body will take heed of the gross violation of human rights and will continue to draw national attention to the individual refuseniks languishing in the Soviet Union. Let us begin the New Year by bringing promise to those less fortunate than us. Let us hope that Isai Goldstein, his wife and his little son Avi, can be brought closer to the freedom that we all love and cherish.●

PERSONAL EXPLANATION

HON. LARRY McDONALD

OF GEORGIA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, September 22, 1982

● Mr. McDONALD. Mr. Speaker, earlier today I reluctantly cast a vote against H.R. 5573, the Computer Equipment Contribution Act of 1982. I did so, not because I do not support the training of our Nation's young people in the use of computers, but because the bill was too narrow and too specific. In effect, the bill was nothing short of special interest legislation to allow the producers of small personal computers a special deduction for gifts of a single type to a particular group. I am hesitant to give one industry a tax advantage not available to other industries especially when that advantage will enable the industry to promote the training of students across the country in the use of its particular products.

I would hope that computer and other companies would take an active interest in the education of young people and would make donations of materials and equipment under existing tax laws without having to resort to special interest tax breaks. Such tax breaks are discriminatory and, therefore, I felt compelled to vote against H.R. 5573.●

THE REVEREND CANON THEODORE ROOSEVELT GIBSON

HON. WILLIAM LEHMAN

OF FLORIDA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, September 22, 1982

● Mr. LEHMAN. Mr. Speaker, south Florida has lost one of its giants. The Reverend Theodore Gibson is gone and we will not, I fear, see his likes again in our lifetime. He was bigger than life—a truly fearless man—yet a person who was tuned to the sensitive problems of the changes going on in our community.

Reverend Gibson made a tremendous difference in what really mattered in south Florida. He transcended bitterness and embraced the values that we reach for if we are to survive as civilized human beings.

As will his family and his loyal and faithful followers, I too will miss my good friend.

I would like to insert in the RECORD the following writeup from the Miami Herald on Rev. Theodore Roosevelt Gibson:

The article follows:

"A PRINCE HAS FALLEN"—REVEREND GIBSON DIES

"It's day now. And night is about to come. And I must work while it is day . . . ."—Theodore R. Gibson.

(By R. A. Zaldivar)

The Rev. Theodore Roosevelt Gibson, who in the late 1950's led Miami's blacks on their first tentative steps toward political power, died Monday at the age of 67.

"Today, a prince has fallen in our town," said Athalie Range, the first black to serve on the Miami City Commission.

Gibson, worn down by a nagging illness he described as "degenerative arthritis," retired last September after 9½ years as a Miami city commissioner.

He died at 11:20 a.m. at Cedars of Lebanon Hospital, a year and three days after his retirement. Hospital spokeswoman Debbie Zayas, who declined to disclose the cause of death, said Gibson had been admitted just over two weeks ago.

The Gibson family would not confirm or deny reports that he died of cancer, saying an autopsy would be conducted to determine the cause of death.

A canon of the Episcopal Church, Gibson earned a reputation as the peacemaker on the City Commission. He never tired of admonishing quarreling parties to settle their differences.

"It's a corny thing to say that a man was wise, but Gibson was," Mayor Maurice Ferre said. "He had a vision beyond the immediate. He had the courage of his convictions even when the community went against him."

Former Miami City Attorney George Knox recalled Gibson as "a voice of reason and moderation eminent on the City Commission."

It was a voice with a folksy twist that was all Gibson.

"I only went to law school for one day," Gibson was fond of reminding the many high-priced lawyers who appeared before the City Commission. "But you

WELL-REMEMBERED

"I always saw him as a man who gave everything—all that he had—for everybody else," said Donna Hildreth, his assistant first at Christ Episcopal Church, where Gibson was rector, and later at City Hall.

"If everybody can remember just one good thing out of the hundreds he did, he will be well-remembered," Hildreth added.

Gibson's private life was scarred by sorrow. His only son died of a heart attack in 1980 at the age of 36.

The elder Gibson found that coping with his illness was a daily personal challenge. It drew down his strength. Before his retirement, he would sit uncomfortably through marathon City Commission sessions, rising now and then to complain, in private, about stiffness and pain in his hips.

In an interview with The Herald shortly before his retirement, he described himself as a man "setting his house in order."

He had written his funeral service and chosen the hymns. His wife, Thelma, was to give the eulogy.

THE NIGHT COMETH

"It's day now," Gibson said at the time. "And night is about to come. And I must work while it is day, because night cometh and man cannot work in the night."

Gibson spent much of his year in retirement playing with his seven-year old grandson, Charles Anthony. He came out of retirement briefly to lend his support to the recent campaigns of County Judge Leah Simms and state Sen. Jack Gordon (D. Miami Beach), both of whom won.

Miami Commission J. L. Plummer, who visited Gibson in the hospital Friday, said he would miss his former colleague. "He was a gentleman," Plummer said.

A litany for the dead will be held Wednesday at 7 p.m. at Christ Episcopal Church, 3481 Hibiscus St., Coconut Grove, where Gibson was rector for 36 years.

A funeral mass of the Christian burial will be said Thursay at 10 a.m. at Christ Episcopal. Immediately followed by burial at Miami City Cemetery, where Gibson's father, Charles, is buried.

The family requests donations to the Theodore R. Gibson Institute of the Urban League, 1200 Biscayne Blvd., Miami 33132.

The Miami City Commission meeting scheduled for 9 a.m. Thursday has been rescheduled to 1 p.m.

The Gibson style was an embarrassing anchronism to some modern-day black leaders, but then Gibson made his mark in the days when whites and blacks still drank from separate water fountains and went to different schools.

In those days, as Miami NAACP president, the pastor was viewed as a radical.

Gibson broke the color bar at Crandon Park Beach, leading a group of blacks on a swim-in in November 1959. The suit he filed on behalf of his son, the late Theodore R. Gibson II, led to the integration of Dade's public schools. He campaigned to open up jobs for blacks.

His greatest public trial came in 1959 when he refused the demand of a Communist-hunting committee of the Florida Legislature that he turn over a list of NAACP members. Threatened with a six-month jail term, Gibson took his case all the way to the U.S. Supreme Court and won.

He would later quip that he didn't turn over the membership list out of embarrassment that the NAACP had so few members.

Appointed to the City Commission in 1972, Gibson cast pivotal votes in the selection of Knox and City Manager Howard Gary, both the first blacks to hold those jobs.

He was part of Ferre's three-vote coalition for opening up Miami's Civil Service to blacks and Hispanics.●

VOLUNTEER FIREFIGHTERS

HON. THOMAS B. EVANS, JR.

OF DELAWARE

IN THE HOUSE OF REPRESENTATIVES

Wednesday, September 22, 1982

● Mr. EVANS of Delaware. Mr. Speaker, we all grew up hearing the bibilical saying that no man can have greater love for his fellow human being than to offer his life for his friend. This noble sentiment is nowhere more heroically carried on in our modern society than in the self-sacrifice of our Nation's volunteer firefighters. In many important respects these brave individuals remind us of the high principles that transcend money and privilege which our society sometimes loses sight of. I believe that the volunteer firefighters of America are the true heirs of the early Minutemen who also put their lives on the line at a moment's notice to protect other members of the community. That is why I want to remind Members of some of the more important measures we have before us that are of great interest to America's firefighters.

I have been actively working for House passage of S. 2625, legislation that will greatly facilitate the transfer of surplus Federal property to volunteer fire departments. This measure, introduced by my good friend and colleague from Delaware Senator BILL ROTH, will enable fire departments to better utilize excess Federal equipment in their efforts to protect our communities from the ravages of fire. This important measure has passed the Senate, and we are working for House passage as well.

Another important concern of firefighters is H.R. 1968, legislation that I have cosponsored that will extend a $50,000 death benefit to the survivors of volunteer firemen who die from heart attacks connected with their firefighting duties. I am encouraged to see that this important proposal is finally beginning to move in the House Judiciary Committee, and have urged my colleagues on that panel to approve H.R. 1968 so that the full Congress can consider it soon.

Finally, the House has approved, with my strong support, a measure that will enable Federal law enforcement officials to more effectively crack-down on arson. Through ambiguities in the Federal laws, many arsonists are able to escape prosecution in Federal arson cases. The bill the House has passed will close these loopholes and mean more arsonists end up where they belong: Off the streets and in jail.

Mr. Speaker, I want to point out that the many fine Delaware volunteer firefighters have numerous colleagues around the country who look to us to do our part, so that the noble tradition they represent may be passed on and inspire future generations of selfless, patriotic Americans.●

NINE-YEAR-OLD DIONNE MYERS AWARDED LIFESAVING AWARD

HON. JOHN H. ROUSSELOT

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, September 22, 1982

● Mr. ROUSSELOT. Mr. Speaker, I would like to enlighten my colleagues to the competence, heroism, and leadership mustered by a 9-year-old Girl Scout, Dionne Myers, of Baldwin Park, to help save the life of her fourth-grade teacher. Miss Myers is without a doubt the ideal Juliette Low had in mind when she founded Girl Scouting in 1912.

In March 1982, teacher Joan Foerster, feeling ill, became unconscious upon leaving her classroom and hit her head on concrete steps. Joan Foerster was bleeding from the head and seemed to have stopped breathing when Dionne Myers, age 9, took charge instructing one classmate to get paper towels, another to inform the principal and contact the paramedics. Dionne, using the mouth-to-mouth resuscitation she learned as a Girl Scout, held the situation in check until the paramedics arrived.

To honor this courageous little lady's quick thinking and medical expertise, the Spanish Trails Girl Scout Council is awarding her its lifesaving award. This is the first time in 8 years that the award has been presented and Miss Myers is, as far as anyone can recollect, the youngest recipient.

We are all very proud of this young lady, now a Junior Scout, and the efforts and contributions of all Girl Scouts, which are numerous. The American Legion No. 241 of Baldwin Park, an organization that counts among its membership many heroes, has seen fit to sponsor a youth night with Dionne Myers as their guest. The two organizations, Girl Scouts and the American Legion, have been working together for years now and I wish them both success in their future endeavors.●

A SALUTE TO MARY GRAVES

HON. BENJAMIN A. GILMAN

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Wednesday, September 22, 1982
